NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Ms. Pooja S. Tiwari** DEPARTMENT: **Botany** CLASS: **T.Y. B.Sc.** SEMESTER: V

MONTH: **July to November** ACADEMIC YEAR: **2019-2020**

LEARNING OBJECTIVE/S: Awareness about harmful pathological diseases in economic important plants.
The learners will be able to: study about different pathological diseases in plants, causal organisms that cause diseases, symptoms of diseases, affected parts of plants, effect of it on plant process, disease cycle (how disease spread and effect to entire plant and their mechanism) & control/ preventive measures of pathological diseases.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper I **Unit IV** **Plant Pathology**	**Study of plant diseases**: Causative organism, symptoms, predisposing factors, disease cycle and control measures of the following.,	01	College Botany Volume II (Gangulee & Kar)	1. Chalk and Board Method, 2. Power Point Presentation
	White Rust – *Albugo sp.* Tikka disease of ground nut: *Cercospora* Damping off disease: *Pythium* Citrus canker – *Xanthomonas* sp. Leaf curl – leaf curl virus	08		
	Study of Physical, chemical and biological control methods of plant diseases.	02		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

NAME OF THE STAFF: __Mr. Vinodkumar Didwana_____DEPARTMENT: _____Botany_____

CLASS: _S.Y. B.Sc. – BZ and CB____ SEMESTER: ____III_____MONTH: ____June____ ACADEMIC YEAR: ___2019-2020_____

LEARNING OBJECTIVE/S:
The learners will be able to:

- Define pharmacopoeia and identity different pharmacopoeia used in India.
- Describe the use of pharmacopeia in pharmaceutical and drug manufacturing industry.
- Recall the importance of pharmacopeia for identification of drug, purity and testing for adulteration.
- Describe Monograph
- Write down what are secondary metabolites, identify its sources; discuss its properties, uses and adulterants; and describe regional and seasonal variations.
- Identify and describe adulterants of the selected plants

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III – Unit – I - Pharmacognosy and phytochemistry	Introduction to pharmacopoeia	02	• Pharmacognosy by C. K. Kokate, Mr. S. B. Gokhale, A. P. Purohit ,	• Chalk and board method • Study the morphological, anatomical and powder characters *Phyllanthus amarus, Saraca asoka,*
	Indian pharmacopoeia, Indian Herbal Pharmacopoeia and Ayurvedic Pharmacopoeia	02		
	Study of Monograph from pharmacopoeia	03		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Secondary Metabolites: Sources, properties, uses and adulterants, regional and seasonal variations	03	Nirali Prakashan • A new course in Botany – Sheth publications	*Bacopa monieri* so thatcan identify their peculiar characters and test for adulteration.
	Adulterants: *Saraca asoca, Polyalthia longifolia* *Terminalia arjuna, Terminalia tomentosa* *Bacopa monnieri, Centella asiatica* *Abrus, Glycyrrhiza* *Phyllanthus amarus (Bhuiamla)*	05

CLASS: S.Y. B.Sc. – BZ & CB SEMESTER: IV MONTH: November ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- Define ecology
- Describe biogeochemical cycles like Carbon, Nitrogen and Water.
- Discuss the concepts of environmental factors
- Explain soil as edaphic factor
- Perform mechanical analysis of soil and identify type of soil
- Test soil pH
- Explain the process of soil formation and describe soil profile
- Define community and community ecology
- Describe the quantitative and qualitative characters of community
- Identify the ecological instruments
- Estimate quantitatively the organic matter of the soil by Walkley and Blacks Rapid titration method.
- Study the vegetation pattern is by list quadrat method

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. Hensal Rodrigues DEPARTMENT: Botany

CLASS: F. Y. B. Sc. (CBZ-A, B, Biochemistry) SEMESTER: II MONTH: November- March ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to: Gain information on the basis of Angiosperm morphology which will serve as the baseline for understanding this topic in S.Y and T.Y. They will also gain information on the diversity of lifeforms in Angiosperms, its evolution, and their morphological peculiarities which aids in identifying and classifying plants.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper I, Unit III, Angiosperm (Unit Shared)	Introduction to Angiosperm	01		Chalk and talk
	Defining A leaf	01		Chalk and talk, PowerPoint Presentation, Images through field experience shown.
	Simple Leaf, Leaf Incision	01	WILLIAM T. STEARN (1983). BOTANICAL LATIN, History, Grammar Syntax, Terminology and Vocabulary Third edition, revised DAVID &	Chalk and talk, PowerPoint Presentation, Images through field experience shown, Sharing of Real-life experience w.r.t. the topic so that the students can connect with the subject.
	Compound leaf	01		Chalk and talk, PowerPoint Presentation, Images through field experience shown.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Leaf stipules, Leaf margin, Leaf Apex	01	CHARLES Newton Abbot London North Pomfret (Vt).	Chalk and talk, PowerPoint Presentation, Images through field experience shown.
	Leaf venation	01		Chalk and talk, PowerPoint Presentation, Images through field experience shown.
	Leaf phyllotaxy, Leaf Base	01		Chalk and talk, PowerPoint Presentation, Images through field experience shown.
	Leaf shapes	01		Chalk and talk, PowerPoint Presentation, Images through field experience shown.
	Modifications of leaf: spine, tendril, hooks, phyllode, pitcher, Drosera or insectivorous plants	02	A New Course in Botany, (F.Y. B.Sc.) Sem I & II	Documentary on Carnivores plants, Chalk and Talk, PowerPoint Presentation, Images through field experience shown.
	Malvaceae	02	Timothy Utteridge & Gemma Bramley. 2015. The Kew. Tropical Plant families Identification Handbook, Second edition	Chalk and talk, PowerPoint Presentation, Writing.
	Revision	01		Chalk and talk
	Doubt solving Quiz and Question bank discussion	01		Grouping and discussion

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. Hensal Rodrigues DEPARTMENT: Botany

CLASS: S. Y. B. Sc. (BZ, CB) SEMESTER: III MONTH: June-September ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to: analyze plants technically with the help of systematic study including morphology, Nomenclature, classification, and identification. Furthermore, Studies of Plant Families will help them know the respective family in and out and also give information on economically valuable plants from that family which could be used as a tool for research and other purposes.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III, Unit II, Angiosperms (Unit Shared)	Objectives and Goals of Plant systematic	02	Turland, N.J., et al. 2018. International Code of Nomenclature for algae, fungi, and plants (Shenzhen Code) adopted by the Nineteenth International Botanical Congress	Chalk and Talk
	Plant Nomenclature	02		Chalk and Talk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. Hensal Rodrigues DEPARTMENT: Botany

CLASS: S. Y. B. Sc. (BZ, CB) SEMESTER: IV MONTH: November-February ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to: enlarge their horizon for obtaining jobs as horticulture is an ever increasing and trending field which yields good quality jobs. the basic knowledge of this topic will help the students gain the level of analyzing the type of plants to grow, soil content, climatic conditions etc. in making a garden for a company, industry, private sector etc. Studies on Botanical gardens and National Park will enlighten the students in conservation of the natural habitat, and also promote a scientific attitude towards nature. It will also promote research impetus into the students.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III, Unit I, Horticulture and Gardening	Introduction to Horticulture	01	A New Course in Botany (S.Y.B.Sc.) (Sem III & IV)	Chalk and Talk, Power point presentation
	Branches of Horticulture Gardening	02		Chalk and Talk, Power point presentation
	Locations in the garden- edges, hedges, lawn, flower beds, avenue, water garden, Focal point.	03		Chalk and Talk, Power point presentation
	Types of garden: Formal and informal gardens	02		Chalk and Talk, Power point presentation, Drawing of the Gardens

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. Hensal Rodrigues DEPARTMENT: Botany

CLASS: T. Y. B. Sc. (BZ, Botany) SEMESTER: V MONTH: June-October ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to: Gain a deep insight in the classification system of Bentham and Hooker with its pros and cons which will help them to follow it with more clear understanding. The extensive morphological information on flower and fruit (along with the information on leaf and Inflorescence from F.Y) will serve as the baseline for studying plants in detail in the present year and future helping them to identify, classify and diagnose plants more discreetly. Studies of Plant Families will help them know the respective family in and out and also give information on economically valuable plants from that family which could be used as a tool for research and other purposes.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

NAME OF THE STAFF: Mr. Hensal Rodrigues DEPARTMENT: Botany

CLASS: T. Y. B. Sc. (BZ, Botany) SEMESTER: VI MONTH: December-March ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to: Gain a deep insight in the classification system of Hutchinson's classification with its pros and cons which will help them to follow it with more clear understanding. Studies of Plant Families will help them know the respective family in and out and also give information on economically valuable plants from that family which could be used as a tool for research and other purposes. Study of Botanical Survey of India will give the students an insight into the activities that they conduct on a National scale to provide to the knowledge of plant taxonomy and the varied type of work the do. The knowledge of Botanical gardens in India aid in increasing their knowledge on the plants and their importance to be conserved.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Mr. Pratik Bhagwan Jagtap** DEPARTMENT: **Botany** CLASS: **SYBSc** SEMESTER: III
MONTH: **July to November** ACADEMIC YEAR: **2019-2020**
LEARNING OBJECTIVE/S: To being able to understand the economic values of some plants with respect to medicinal benefits.

The learners will be able to : To understand the commercial values of plant for earning capital. Better use of some medicinal herbs with its aromatheroptic uses and their health benefits. To understand the plant based new energy sources for traditional hydrocarbon fuels.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PaperIII Unit 3 Industry based on plant products	Aromatherapy- Introduction, Uses with few examples. Jojoba, lemon, jasmin	05	1. Textbook by sheth publication 2. Economic Botany: Kochar or Verma 3. Biology Discussion website 4. IGNTU eContent 5. NPTEL 6. ePGPathshala	1. PowerPoint presentations 2. Diagram 3. Chalk and Board
	Botanical and nutraceuticals -Spirulina, Vanillin, Garcinia indica/ Garcinia cambogia, Chlorella, and Kale.	08		
	Enzymes industry: Cellulases, Papain, Bromelain	04		
	Biofuels.	01

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Mr. Pratik Bhagwan Jagtap** DEPARTMENT: **Botany** CLASS: **TYBSc** SEMESTER: V

MONTH: **July to November** ACADEMIC YEAR: **2019-2020**

LEARNING OBJECTIVE/S: To acquire the knowledge about the physiological system of plant working and functioning.
The learners will be able to : To enables the understanding about water and mineral uptake and distribution in to plant system. Also to relate the physical factors of which are responsible for its distribution. To evaluate the Tissue/ cell system functioning and working factors.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II Unit II Plant Physiology I	**Water relations:** Potential, osmosis, transpiration, imbibition,	04	1. Introduction to Plant Physiology by Noggle and Fritz, Prentice Hall Publishers(2002), 2. Plant Physiology by Salisbury and Ross CBS Publishers, 3. Plant Physiology by Taiz and Zeiger Sinauer Associates Inc. Publishers,2002 1. Biology Discussion website 2. IGNTU eContent 3. NPTEL 4. ePGPathshala	Chalk and Board Method, Model Construction and Demonstration, Experimental Simulation, Diagram Charts PowerPoint presentations
	Solute transport: Transport of ions across cell membranes, active and passive transport, carriers, channels and pumps.	04		
	Translocation of solutes: Composition of phloem sap, girdling experiment.	04		
	Pressure flow model (Munch's hypothesis): Phloem loading and unloading, anatomy of sieve tube elements and mechanisms of sieve tube translocation.	04		
	Mineral Nutrition: Role of Macro and Micro nutrients, physiological functions and deficiency symptoms.	04

NAME OF THE STAFF: MADHULIKA YADAV DEPARTMENT: BOTANY CLASS: SY (CB/ BZ) SEMESTER:IV

MONTH: NOVEMBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S: The learners will be able to : Gain knowledge about salient features and classification of divisions Psilophyta and Lepidophyta. Study about the systematic position, structure and life cycle of pteridophyte *Selaginella*. Learn about the geological time scale, formation and types of fossils. Study about fossil pteredophyte *Rhynia*.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1 Unit 2 PTERIDOPHYTA AND PALEOBOTANY PTEREDOPHYTE	1) Salient features and classification upto order (with examples of each) of Psilophyta and Lepidophyta.	4	A New Course in Botany by Sheth Publications.	Chalk and Talk PPT
	2) Structure, life cycle and systematic position of *Selaginella.*	6		
	3) Paleobotany- The geological time scale; Formation and types of fossils; Structure and systematic position of form genus *Rhynia*.	5	Botany for Degree students Pteredophyta by A K Sinha, Anil Kumar and P C Vashistha

SEMESTER: V ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE): To explore the natural and artificial propagation and their use in commercial production.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper I, Unit 2 PROPAGATION PRACTICES	**By Seeds** Advantages and disadvantages, method of seed propagation Production of seeds, Handling, Collection and Storage Sowing and transplantation.	3	**P.Parvatha Reddy Sustainable Crop protection under protected cultivation**	Power point presentation and chalk and board
	By specialized Vegetative structures Bulbs, Tubers, Corms, Rhizomes, Root stock, runners, Offsets and suckers.	2		Power point presentation and chalk and board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Artificial methods of plant propagation Cutting– Root **cutting**, Stem cuttings, and leaf cuttings. rooting. **Layering** – Definition, Types: Simple, compound, (Serpentine) Tip, Trench, Mound, Air Layering. **Grafting**-Definition, advantages and disadvantages. Types: **Budding** – Definition, advantages and disadvantages. Types: T- budding, shield, Patch, ring budding.	08	Springer E book, **W J Lewis Grafting and Budding a** practical guide for fruit crops and ornamental plant second edition.	Power point presentation and chalk and board
	Developing new varieties: Technique of Emasculation	2		Power point presentation and chalk and board

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MR. KIRAN GANGADHAR CHAKRAL DEPARTMENT: Applied component (Horticulture) CLASS: T.Y BSc

SEMESTER: VI ACADEMIC YEAR: 2018-2019

- LEARNING OBJECTIVE/SThe students would be able: To gain insight into the green House technology: Layout, types, Irrigation and construction with applications in agriculture and horticulture and to learn about the commercial production fruits and vegetables in relation to propagation, post plantation care, harvesting and post-harvest management.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper I, Unit 2 PROPAGATION PRACTICES	High –tech Horticultural production- Green house technology- Meaning, types, layout & construction, irrigation systems. Care & attention. Hardening of plants. Space gardens.	6	**P.Parvatha Reddy Sustainable Crop protection under protected cultivation** Springer E book, **E Course Krishi shiksha, green** house management Agriculture Engineering.	Power Point Presentation chalk and Board
	Floriculture – Scope & importance, soil and climatic requirement and cultivation practices and Economics of greenhouse production of Gerbera, Carnation, Roses, Orchids. Propagation techniques, packing and marketing, enhancing and delaying period of bloom by special methods. Floral decoration, Florist shop management.	9		Power Point Presentation And chalk and Board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Deepa Verma DEPARTMENT: Botany CLASS: S.Y.B.Sc. (CB & BZ)

SEMESTER: **III** MONTH: October – December ACADEMIC YEAR: **2018-19**

LEARNING OBJECTIVE/S:

- To understand and differentiate about different preservation method
- To understand about techniques of microscopy
- To differentiate about different chromatographic techniques
- To understand about electrophoresis technique as a separation technique.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper I **Unit – III**	**Modern Techniques to Study Plant Diversity** Preservation methods :Dry and Wet method	03	A new course in botany – Sheth Publication Principles of Instrumental Analysis - by Douglas A. Skoog	Lectures on Google Meet, PowerPoint, Youtube videos, Pdfs, Upload of learning material on Google Classroom
	Microscopy – Principle and working of Light, and electron microscope.	04		
	Chromatography- Principles and techniques in paper and thin layer chromatography.	04		
	Principles and techniques of Horizontal and Vertical electrophoresis.	04

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. Hensal Rodrigues DEPARTMENT: Botany

CLASS: T. Y. B. Sc. (BZ, Botany) SEMESTER: V MONTH: June-October ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to: Will gain insight into the details of pharmacognosy and the pharmaceutical monographs. They will be made aware about the importance of plants for human health and how it is used their entire methodology and its details. The topic will generate research aura in students to study plants for their uses in order to cure more and more diseases.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper IV, Unit IV, Pharmacognosy and Medicinal Botany (Unit Shared)	Monographs of drugs with reference to biological sources, geographical distribution, common varieties, macro and microscopic characters, chemical constituents, therapeutic uses, adulterants	01	Pharmacognosy by Kokate, Purohit and Gokhale, Nirali Publications	Talk
	Strychnos seeds	02		PowerPoint presentation
	Senna leaves	02		PowerPoint presentation
	Clove buds	02		PowerPoint presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. Hensal Rodrigues DEPARTMENT: Botany

CLASS: T. Y. B. Sc. (BZ, Botany) SEMESTER: VI MONTH: December-March ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to: Gain a deep insight in the classification system of Hutchinson's classification with its pros and cons which will help them to follow it with more clear understanding. Studies of Plant Families will help them know the respective family in and out and also give information on economically valuable plants from that family which could be used as a tool for research and other purposes. Study of Botanical Survey of India will give the students an insight into the activities that they conduct on a National scale to provide to the knowledge of plant taxonomy and the varied type of work the do. The knowledge of Botanical gardens in India aid in increasing their knowledge on the plants and their importance to be conserved.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. Vinodkumar Didwana DEPARTMENT: Botany

CLASS: S.Y. B.Sc. – BZ and CB SEMESTER: III MONTH: June ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

- Define pharmacopoeia and identity different pharmacopoeia used in India.
- Describe the use of pharmacopeia in pharmaceutical and drug manufacturing industry.
- Recall the importance of pharmacopeia for identification of drug, purity and testing for adulteration.
- Describe Monograph
- Write down what are secondary metabolites, identify its sources; discuss its properties, uses and adulterants; and describe regional and seasonal variations.
- Identify and describe adulterants of the selected plants

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III – Unit – I -	Introduction to pharmacopoeia	02	• Pharmacognosy by	• Chalk and board method

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Pharmacognosy and phytochemistry	Indian pharmacopoeia, Indian Herbal Pharmacopoeia and Ayurvedic Pharmacopoeia	02	C. K. Kokate, Mr. S. B. Gokhale, A. P. Purohit , Nirali Prakashan • A new course in Botany – Sheth publications	• Study the morphological, anatomical and powder characters *Phyllanthus amarus, Saraca asoka, Bacopa monieri* so that can identify their peculiar characters and test for adulteration.
	Study of Monograph from pharmacopoeia	03		
	Secondary Metabolites: Sources, properties, uses and adulterants, regional and seasonal variations	03		
	Adulterants: *Saraca asoca, Polyalthia longifolia* *Terminalia arjuna, Terminalia tomentosa* *Bacopa monnieri, Centella asiatica* *Abrus, Glycyrrhiza* *Phyllanthus amarus (Bhuiamla)*	05

CLASS: M.Sc. SEMESTER: II MONTH: February ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Study Proton magnetic resonance spectroscopy: Principle, chemical shift, spin-spin coupling, coupling constant, karplus equation.
2. ^{13}C NMR spectroscopy: Theory and comparison with proton NMR, proton coupled and decoupled spectra, off-resonance decoupling.
3. Mass spectrometry: Molecular ion peak, base peak, isotopic abundance, Nitrogen rule, fragmentation pattern in various classes of organic compounds.
4. Structure determination involving individual or combined use of the above spectral techniques.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III, Unit IV- NMR spectroscopy and Mass spectrometry	Unit 4.1- Proton magnetic resonance spectroscopy	8 L	Introduction to Spectroscopy, Donald L. Pavia.	Chalk and board
	Unit 4.2- ^{13}C NMR spectroscopy	3 L	Organic Spectroscopy- Principles and Applications, Jagmohan.	Chalk and board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
	Unit 4.3- Mass spectrometry	4 L	Spectroscopy of Organic Compounds, P.S. Kalsi.	Chalk and board

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Gayatri Gadre DEPARTMENT: Chemistry

CLASS: M.Sc. SEMESTER: III MONTH: July ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Study Carbohydrates: structure elucidation of Lactose, structural features and applications of various carbohydrates.
2. Natural pigments: structural features and biological importance of various classes of natural pigments like carotenoids, flavones, quinones, porphyrins, structure elucidation of beta-carotene.
3. Insect pheromones: types of pheromones, synthesis of some pheromones.
4. Alkaloids: occurrence and importance of morphine, atropine, coniine.
5. Advanced spectroscopic techniques like DEPT, COSY, HETCOR, NOE, NOESY.
6. Drug discovery, design and development: Important topics of medicinal chemistry like Receptor, Therapeutic index, Drug assay. Basic pharmacokinetics as ADME properties.
7. Discovery of Penicillin and Librium without lead, identification of pharmacophore, functional group modification, structure activity relationship (SAR)

G.V. Gadre

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Gayatri Gadre DEPARTMENT: Chemistry

CLASS: M.Sc. SEMESTER: IV MONTH: JANUARY ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Study Steroids: Biological role, important structural and stereochemical features of different class of steroids, synthesis of 16-DPA, synthesis of various male and female hormones from 16 DPA.
2. Heterocyclic compounds: Nomenclature of monocyclic, bicyclic/tricyclic heterocycles by common, Hantzsch-Widman and replacement nomenclature method, nucleophilic ring opening reactions of three and four membered heterocyclic compounds, structure, reactivity, synthesis and reactions of some monocyclic, bicyclic, fused heterocycles.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCES	TEACHING METHOD/ ICT TOOLS USED

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT**: Chemistry **CLASS**: M.Sc. (I) SEMESTER: I **MONTH**: September

ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to: derive the wave function of sp, sp^2, sp^3hybridization, understand the concept of resonance and resonance energy, Valence Bond Theory and Molecular orbital theory, weak forces of attraction.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II, I, **Chemical Bonding**	**1.1** Recapitulation of hybridization. Derivation of wave functions for sp, sp^2, sp^3.	3L	Principles of Inorganic Chemistry.	Google Meet
	1.2 Discussion of involvement of d orbitals in various types of hybridization, concept of resonance, resonance energy derivation.	3L	Principles of Inorganic Chemistry.	Google Meet
	1.3 Critical analysis of VBT	2L	Principles of Inorganic Chemistry.	Google Meet

SIGNATURE OF THE STAFF PNagpal

SIGNATURE OF THE H.O.D.

	1.4 Molecular Orbital Theory for diatomic species of first transition series	2L	Principles of Inorganic Chemistry.	Google Meet
	1.5 Molecular Orbital Theory for SF_6, CO_2, B_2H_6, I^{3-}	3L	Principles of Inorganic Chemistry.	Google Meet
	1.6 Weak forces of attraction: Hydrogen bonding – concept, types, properties, methods of detection and importance, vander waals forces, ion-dipole, dipole-dipole, London forces	2L	Principles of Inorganic Chemistry.	Google Meet

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** M.Sc. (I) **SEMESTER:** II **MONTH:** February

ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to: understand the reaction mechanism of octahedral and square planar complexes, redox reactions, its mechanism and stereochemistry

SIGNATURE OF THE STAFF PNagpal **SIGNATURE OF THE H.O.D.**

Vishnu Waman Thakur Charitable Trust

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II, IV, **Some Special Topics**	**4.1 Metallurgy** **4.1.1** Types of metallurgies, **4.1.2** General steps of metallurgy; Concentration of ore, calcinations, roasting, reduction and refining. **4.1.3** Metallurgy of copper: occurrence, physicochemical principles, Extraction of copper from pyrites& refining by electrolysis.	7L	Puri, Sharma Kalia Inorganic chemistry.	Google Meet
	4.2 Chemistry of Group 18 **4.2.1** Historical perspectives **4.2.2** General characteristics and trends in physical and chemical properties **4.2.3** Isolation of noble gases	5L	Puri, Sharma Kalia Inorganic chemistry.	Google Meet
	4.2.4 Compounds of Xenon (oxides and fluorides) with respect to preparation and structure (VSEPR) **4.2.5** Uses of noble gases			

SIGNATURE OF THE STAFF PSNagpal

SIGNATURE OF THE H.O.D.

	4.3 Introduction to Bioinorganic Chemistry. **4.3.1**Essential and non-essential elements in biological systems. **4.3.2** Biological importance of metal ions such as Na^{+},K^{+} ,Fe^{+2}/Fe^{+3} and Cu^{+2}(Role of $Na^{+}$and K^{+} w.r.t ion pump)	3L	Puri, Sharma, Kalia Inorganic chemistry.	Google Meet

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 L

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** III **MONTH:** August

ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to: know about ionic bond and covalent bond, resonance, hybridization, valence bond theory and molecular orbital theory, know the various instrumental methods of analysis, advantages of using instruments to make measurements, the various observable properties of a given analyte and the

SIGNATURE OF THE STAFF PNagpal **SIGNATURE OF THE H.O.D.**

stimulus best suited for its analysis, know about a generalized diagram of an analytical instrument, select a suitable instrumental method for analysis, appreciate the basic terms in spectrometry, use the relationship between absorbance (and its variations) and concentration of the analyte, chose a suitable method for photometric titrations.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
I, II, **Chemical Bonding**	**2.1 Non-Directional Bonding** **2.1.1** Ionic Bond: Conditions for the Formation of Ionic Bond. **2.1.2** Types of Ionic Crystals **2.1.3** Radius Ratio Rules **2.1.4** Lattice Energy, Borne-Lande Equation **2.1.5** Kapustinski Equation **2.1.6** Born-Haber Cycle and its Application	4L	Puri, Sharma Kalia Inorganic chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	2.2. Directional Bonding: Orbital Approach. **2.2.1** Covalent Bonding The Valence Bond Theory Introduction and basic tenets. **2.2.2** Interaction between two hydrogen atoms and the Potential energy diagram of the resultant system. **2.2.3** Corrections applied to the system of two hydrogen atoms Formation of H_2 **2.2.4** Homonuclear diatomic molecules from He_2 to Ne_2 **2.2.5** Resonance and the concept of Formal Charge; Rules for Resonance or Canonical structures. **2.2.6** Bonding in Polyatomic Species: The role of Hybridization. And types of hybrid orbitals-*sp, sp^2, sp^3, sp^2d^2, sp^2d and $sp3d^2$* **2.2.7** Equivalent and Non-Equivalent hybrid orbitals **2.2.8** Contribution of a given atomic orbital to the hybrid orbitals (with reference to sp^3hybridisation as in CH_4, $NH_3$and H_2O and series like NH_3, PH_3, AsH_3, BiH_3)	6L	Puri, Sharma Kalia Inorganic chemistry.	Google Meet
	2.3 Molecular Orbital Theory **2.3.1.** Comparing Atomic Orbitals and Molecular Orbitals. **2.3.2**. Linear combination of atomic orbitals to give molecular orbitals LCAO-MO approach for diatomic homonuclear molecules. **2.3.4.** Wave mechanical treatment for molecular orbitals ($H^{2+}$and H) **2.3.4** Molecular orbital Theory and Bond Order and magnetic property: with reference to O_2,O_2^+ O_2^-,O_{22-}	5L	Puri ,Sharma Kalia Inorganic chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

III, III, **Basic Concepts in Instrumental methods**	**3.1.** Relation between the analyte, stimulus and measurement of change in the observable property. **3.2.** Block Diagram of an Analytical instrument. **3.3.** Types of Analytical Instrumental methods based on i) Optical interactions (e.g. Spectrometry: uv-visible, Polarimetry) ii) Electrochemical interactions (e.g. Potentiometry, Conductometry,) iii) Thermal interactions (e.g. Thermogravimetry)	3L	Instrumental Methods of Chemical Analysis	Google Meet
	3.4. Spectrometry **3.4.1.** Interaction of electromagnetic radiation with matter: Absorption and Emission spectroscopy **3.4.2.** Basic Terms: Radiant Power, Absorbance, Transmittance, Monochromatic light, Polychromatic light, Wavelength of maximum absorbance, Absorptivity and Molar Absorbtivity **3.4.3.** Statement of Beer's Law and Lambert's Law, Combined Mathematical Expression of Beer -Lambert's Law, Validity of Beer-Lambert's Law,Deviations from Beer-Lambert's Law ((Real deviations, Instrumentaldeviations and Chemical deviations) **3.4.4.** Instrumentation for absorption spectroscopy: Colorimeters and Spectrophotometers **3.4.5.** Block Diagrams for Single beam and Colorimeter, and Spectrophotometer (Principles, Construction and working Details of Components expected i.e source ,Sample holder , Filters/Monochromators, Detectors such as Photomultiplier tube)	7L	Instrumental Methods of Chemical Analysis	Google Meet

SIGNATURE OF THE STAFF PSNagpal

SIGNATURE OF THE H.O.D.

	3.4.6. Applications of UV-Visible Spectrophotometry **(02 L)** (a) Qualitative analysis such as Identification of functional groups in Organic compounds , Chromophores and Auxochrome,c*is* and *trans* isomers. (b) Quantitative analysis by Calibration curve method **3.4.7.** Photometric Titrations: Principle, Instrumentation, Types of Photometric titration Curves with examples.	2L 3L	Instrumental Methods of Chemical Analysis	Google Meet

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** IV **MONTH:** January

ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to: know the position of elements in periodic table, origin of color and magnetic properties of transition elements, qualitative tests of transition elements and introduction of coordination compounds, its theories, nature and applications, the use of statistical methods in chemical analysis, the nature of indeterminate errors, the randomness of such errors and its distribution around a correct or acceptable result, computation of confidence limits and confidence interval, test for rejection of doubtful result, method to draw best fitting straight line

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
I, II, **2.1 Comparative Chemistry of the transition metals**	**2.1.1** Position in the periodic table; Natural occurrence principal ores and minerals; **2.1.2** Significance of special stability of d_0, d_5 and d_{10} leading to variable oxidation states; Unusual oxidation states and their stabilities in aqueous solutions (with special reference to vanadium, and chromium.) **2.1.3** Origin of colour for transition metals and their compounds: such as reflectivity, surface coatings, particle size, packing density for metals and nature of d-orbitals, number of electrons in the d-orbitals, geometry, and ability for charge transfer).	9L	Puri, Sharma, Kalia Inorganic Chemistry.	Google Meet

SIGNATURE OF THE STAFF PNagpal

SIGNATURE OF THE H.O.D.

2.2 Coordination Chemistry	**2.1.4** Magnetic properties of transition metal compounds: Origin of magnetism-spin and orbital motion of electrons; equation for spin only and spin-orbital magnetism in terms of Bohr magnetons (No derivation of relevant equations expected); Reasons for quenching of orbital moments. **2.1.5** Chemistry of Titanium and vanadium: properties of Oxides and chlorides; use in titrimetric analysis **2.1.6** Qualitative tests for transition metal ions: General considerations in devising tests (with reference to Chromium, Manganese, iron, Cobalt			
	2.2 Coordination Chemistry **2.2.1 Introduction to Chemistry of Coordination Compounds** i. Historical perspectives: Early ideas on coordination compounds ii. Basic terms and nomenclature. iii. Types of ligands iv. Isomerism :General Types with special reference to stereoisomerism of coordination compounds (C.N=6) v. Evidence for the formation of coordination compounds, **2.2.2. Theories of coordination compounds** i. Werner's Theory of coordination compounds, ii. Effective atomic number rule. iii. Eighteen electron Rule **2.2.3. Nature of the Metal-Ligand Bond:** I Valence Bond Theory; Hybridisation of the central metal orbitals-sp^3, sd^3/d^3s, sp^3d^2/d^2sp^3, sp^2d.	6L	Puri, Sharma, Kalia Inorganic chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

III, III **Statistical Treatment of analytical data --II**	ii. Inner and outer orbital complexes of .(suitable examples of Mn(II), Fe(II),Fe(III),Co(II)/Co(III),Ni(II), Cu(II) Zn(II) complexes with ligands like aqua, ammonia CN-and halides may be used) iii. Limitations of V.B.T **2.2.4.** Application of coordination compounds.			
	3.1.**Nature of Indeterminate Errors:** 3.1.1. The true and acceptable value of a result of analysis 3.1.2. Measures of central tendency: mean, median. mode, average 3.1.3. Measures of dispersion: Absolute deviation, relative deviation, relative average deviation, standard deviation,(s, sigma) variance, coefficient of variation	3L	Modern Analytical Chemistry , David Harvey (page numbers 53 -84)	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	3.2.Distribution of random errors: 3.2.1. Gaussian distribution curve. 3.2.2. Equation and salient features of Gaussian distribution curve **3.3.Concept of Confidence limits and confidence interval and its computation using** (i) Population standard deviation (ii) Student's *t* test (iii) Range **3.4.Criteria for rejection of doubtful result** (i) 2.5 d rule (ii) 4.0 d rule (iii) Q test **3.5.Test of Significance** **(02 L)**	2L 3L 2L	Modern Analytical Chemistry , David Harvey (page numbers 53 -84)	Google Meet

	(i) Null hypothesis (ii) F-test (variance ratio test) **3.6. Graphical representation of data and obtaining best fitting straight line (03 L)** (a) For line passing through origin (b) For line not passing through origin	2L 3L

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR**

SEMESTER: V

LEARNING OBJECTIVE/S:

The learners will be able to:

i. Understand the mechanisms of important reactions

ii. Understand the important concept of green chemistry and apply it.

DEPARTMENT: CHEMISTRY MONTH: August to November

CLASS: TYBSc

ACADEMIC YEAR: 2022-2023

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-III (Organic Chemistry) Unit II 2.1 Stereochemistry I	2.1.1 Molecular chirality and elements of symmetry: Mirror plane symmetry, inversion center, roation -reflection (alternating) axis. 2.1.2 Chirality of compounds without a stereo genic center: cummulenes and biphenyls.	(5 L)	Stereochemistry P.S.Kalsi	Power point (Online)

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

2.2 Agrochemicals	2.2.1 General introduction & scope, meaning & examples of insecticides, herbicides, fungicide, rodenticide, pesticides, plant growth regulators. 2.2.2 Advantages & disadvantages of agrochemicals 2.2.3 Synthesis & application of IAA (Indole Acetic Acid) & Endosulphan, 2.2.4 Bio pesticides – Neem oil & Karanj oil.	(4 L)	Agrochemicals and pesticides: A.Jadhav and T.V.Sathe	Power point (Online)

2.3 Heterocyclic chemistry:	2.3.1 Reactivity of pyridine-N-oxide, quinoline and iso-quionoline. 2.3.2 Preparation of pyridine-N-oxide, quinoline (Skraup synthesis) and iso-quinoline (BischlerNapieralski synthesis). 2.3.3 Reactions of pyridine-N-oxide: halogenation, nitration and reaction with NaNH2/liq.NH3, n-BuLi. 2.3.4 Reactions of quinoline and isoquinoline; oxidation,reduction,nitration,halogenation and reaction with NaNH2/liq.NH3,n-BuLi.	(6 L)	Heterocyclic Chemistry, John A. Joule and Keith Mills, Wiley	Power point (Online)
Unit III 3.1 IUPAC	IUPAC Systematic nomenclature of the following classes of compounds (including compounds upto two substituents / functional groups): 3.1.1 Bicyclic compounds – spiro, fused and bridged (upto 11 carbon atoms) – saturated and unsaturated compounds. 3.1.2 Biphenyls 3.1.3 Cummulenes with upto 3 double bonds 3.1.4 Quinolines and isoquinolines.	(5 L)	IUPAC nomenclature by S.C.Pal.	Power point (Online)

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

3.2 Synthesis of organic compounds	3.2.1 Introduction: Linear and convergent synthesis, criteria for an ideal synthesis, concept of chemo selectivity and regioselectivity with examples, calculation of yields 3.2.2 Multicomponent Synthesis: Mannich reaction and Biginelli reaction. Synthesis with examples (no mechanism) 3.2.3 Green chemistry and synthesis: Introduction: Twelve principles of green chemistry, concept of atom economy and E-factor, calculations and their significance, numerical examples. i) Green reagents: dimethyl carbonate. ii) Green starting materials : D-glucose iii) Green solvents : supercritical CO2 iv) Green catalysts: Bio catalysts. 3.2.4 Planning of organic synthesis i) synthesis of nitroanilines. (o&p) ii) synthesis of halobenzoic acid.(o&p) iii) Alcohols (primary / secondary / tertiary) using Grignard reagents. iv) Alkanes (using organo lithium compounds)	(10L)	Green chemistry: V. K. Ahluwalia	Power point (Online)

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. JAYASHRI GOPAL NAPHADE, DEPARTMENT: _CHEMISTRY, CLASS: _M.SC II (ORGANIC CHEMISTRY), SEMESTER: III, MONTH: _July_____, ACADEMIC YEAR: 2022-2023.

LEARNING OBJECTIVE/S:
The learners will be able to: understand the concept of QSAR factor and how to relatedto drug design.Also understand the synthesis of some drug.they understand the concept of drug.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER IV Unit II: Drug Design, Develepment And Synthesis	2.1: QSAR Parameter Steric Factor , Talf Equation	5L	1.Medicinal Chemistry,Sriram &Yogeeswari,2nd edition 2.A Introduction to drug design,Pandeya and Dimmock.	White Board and Markar
	2.2: Mordern method of drug design & synthesis	3L		
	2.3: Concept of prodrug & soft drug	3L		
	2.4: Synthesis and application of the drug	4L

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ____Kirti Pankaj Mhatre _____DEPARTMENT: _____CHEMISTRY_____CLASS: ____TYBSC_____ SEMESTER: _VITH MONTH:. Dec-Jan

ACADEMIC YEAR: ___2022-2023_____

LEARNING OBJECTIVE/S:

The learners will be able to :

1.To study the polarography concepts like polarography H shaped polarographic cell, DME (construction, working,advantages and limitations), DC polarogram: Terms involved - Residual current, Diffusion current, Limiting current, Half-Wave Potential Role and selection of supporting electrolyte, Interference of oxygen, Half wave potential $E_{1/2}$,Factors affecting $E_{1/2}$ Ilkovic equations: various terms involved in it (No derivation)along with numericals.

2.To study Principle, Rotating Platinum Electrode(Construction, advantages and limitations)Titration curves with example, Advantages and limitations of amperometric titrations.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: June 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand UV – Visible spectroscopy, its basic theory and applications.
Study mass spectrometry, determination of molecular formula and its applications.
Learn natural products like terpenoids, alkaloids in detail.
To gain knowledge of hormones like adrenaline.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-III, Organic Chemistry **UNIT-IV, Spectroscopy-I And Natural Products**	Electromagnetic spectrum, units of wavelength and frequency, UV – Visible spectroscopy: Basic theory, solvents, nature of UV-Visible spectrum, concept of chromophore, auxochrome.	02	Introduction to spectroscopy (third edition), Pavia	Blackboard and ppt.
	Mass spectrometry: Basic theory. Nature of mass spectrum. General rules of fragmentation. Importance of molecular ion peak, isotopic peaks, base peak, nitrogen rule, rule of 13 for determination of empirical formula and molecular formula	03	Spectral identification of organic molecules by Silverstein.	Blackboard and ppt.
	Natural products: terpenoids, their introduction, isoprene rule, special isoprene rule, structural determination of citral,	04	Textbook, Himalaya publication	Blackboard and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Alkaloids introduction and occurrence, structural determination of nicotine,	04	Textbook, Himalaya publication	Blackboard and ppt.
	Hormones: Introduction, structure of adrenaline (epinephrine), physiological action of adrenaline.	02	Organic chemistry by Morrision and Boyd,7th edition	Blackboard and ppt. .

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc. PART-II, ORGANIC CHEMISTRY SEMESTER: III MONTH: June 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Study role of radicals in organic synthesis and their applications in detail.
Learn generation, stability, reactivity and structural and stereochemical properties of free radicals,.
Study characteristic reactions and applications of radicals in synthesis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PAPER-II, Synthetic Organic Chemistry-I **UNIT-II, Radicals in organic synthesis**	Stability, reactivity and structural and stereochemical properties of free radicals, Persistent and charged radicals, Electrophilic and nucleophilic radicals. Radical Initiators: azobisisobutyronitrile (AIBN) and dibenzoyl peroxide.	04	Advanced Organic Chemistry, Part A and Part B: Reaction and Synthesis, Francis A. Carey, Richard J. Sundberg, 5th Edition,	Blackboard and ppt.
	Characteristic reactions - free radical substitution, addition to multiple bonds. Radical chain reactions, radical halogenation of hydrocarbons (regioselectivity),radical cyclizations, autoxidations	04	Organic Chemistry, Clayden Greeves Warren and Wothers,	Blackboard and ppt.
	Radicals in synthesis: Inter and intra molecular C-C bond formation via mercuric hydride, tin hydride, thiol donors. Cleavage of C-X, C-Sn, C-Co, C-S, O-O bonds. Oxidative coupling, C-C bond formation in aromatics: $S_{RN}Ar$ reactions.	04	Advanced Organic Chemistry: Reaction Mechanism, R. Bruckner, Academic Press (2002).	Blackboard and ppt.
	Hunsdiecker reaction, Pinacol coupling, McMurry coupling, Sandmeyer reaction, Acyloin condensation.	03	Organic reactions and their mechanisms, 3rd revisededition, P.S. Kalsi, New Age International Publishers	Blackboard and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc. PART-II, ORGANIC CHEMISTRY SEMESTER: III MONTH: June 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Study enamines, their generation & application in organic synthesis with mechanistic pathways.
Learn phosphorus, sulfur and nitrogen ylides; preparation and their synthetic applications along with their stereochemical aspects.
Study α-C-H functionalization by nitro, sulfoxide, sulfone and phosphonate groups.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-II, Synthetic Organic Chemistry-I **UNIT-III, Enamines, Ylides and α-C-H functionalization**	Enamines**:** Generation & application in organic synthesis with mechanistic pathways, Stork enamine reaction. Reactivity, comparison between enamines and enolates. Synthetic reactions of enamines including asymmetric reactions of chiral enamines derived from chiral secondary amines.	04	Name Reactions and Reagents in Organic Synthesis**,** 2nd Edn., Bradford P. Mundy, Michael G. Ellard,	Blackboard and ppt.
	Phosphorus, Sulfur and Nitrogen Ylides: Preparation and their synthetic applications along with their stereochemical aspects.	03	Organic Chemistry, Clayden Greeves	Blackboard and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Warren and Wothers,	
	Wittig reaction, Horner-Wadsworth-Emmons Reaction, Barton-Kellogg olefination.	03	Advanced Organic Chemistry: Reaction Mechanism, R. Bruckner, Academic Press (2002).	Blackboard and ppt.
	α-C-H functionalization: By nitro, sulfoxide, sulfone and phosphonate groups: generation of carbanions by strong bases (LDA/n-butyl lithium) and applications in C-C bond formation.	03	Organic reactions and their mechanisms, 3rd revisededition, P.S. Kalsi, New Age International Publishers	Blackboard and ppt.
	Bamford-Stevens reaction, Julia olefination and its modification, Seyferth–Gilbert homologation, Steven's Rearrangement.	02	Advanced Organic Chemistry, Part A and Part B: Reaction and Synthesis, Francis A. Carey, Sundberg,	Blackboard and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc. PART-II, ORGANIC CHEMISTRY SEMESTER: III MONTH: June 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand importance of organosilicons, organoboron and organotin compounds in organic synthesis.
Study application of mercury, selenium in organic synthesis.
Study application of silyl enol ethers in organic synthesis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-II, Synthetic Organic Chemistry-I **UNIT-IV, Metals / Non-metals in organic synthesis**	Mercury in organic synthesis: Mechanism and regiochemistry of oxymercuration and demercuration of alkenes, mercuration of aromatics, transformation of aryl mercurials to aryl halides. Organomercurials as carbene transfer reagents.	03	Advanced Organic Chemistry: Reaction Mechanism, R. Bruckner, Academic Press	Blackboard and ppt.
	Organoboron compounds: Mechanism and regiochemistry of hydroboration of alkenes and alkynes, asymmetric hydroboration using chiral boron reagents, 9-BBN hydroboration, oxazaborolidine (CBS catalyst) and functional group reduction by diborane.	03	Organic Chemistry, Clayden Greeves Warren and Wothers,	Blackboard and ppt.
	Organosilicons: Salient features of silicon governing the reactivity of organosilicons, preparation and important bond-forming reactions of alkyl silanes, alkenyl silanes, aryl silanes and allyl silanes. β-silyl cations as intermediates. Iodotrimethylsilane in organic synthesis.	03	Modern Methods of Organic Synthesis, 4th Edition, W. Carruthers and Iain Coldham,.	Blackboard and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Silyl enol ethers: Application: As nucleophiles (Michael reaction, Mukaiyama aldol reaction), in ring contraction reactions.	02	Moder Organic Synthesis: An Introduction, G.S. Zweifel and M.H. Nantz,	Blackboard and ppt.
	Organotin compounds: Preparation of alkenyl and allyl tin compounds; application in C-C bond formation, in replacement of halogen by H at the same C atom. Selenium in organic synthesis: Preparation of selenols/selenoxide, selenoxide elimination to create unsaturation, selenoxide and seleno acetals as α-C-H activating groups	04	Advanced Organic Chemistry, Part A and Part B: Reaction and Synthesis, Francis A. Carey, Richard J. Sundberg,	Blackboard and ppt.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc. PART-II, ORGANIC CHEMISTRY SEMESTER: III MONTH: June 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand primary and secondary metabolites and the building blocks.
Study Acetate pathway: Biosynthesis of malonylCoA.
Study Shikimic Acid pathway and mevalonate pathway.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PAPER-IV, Medicinal , Biogenesis and green chemistry **UNIT-III, Biogenesis and biosynthesis of natural products**	Primary and secondary metabolites and the building blocks, general pathway of amino acid biosynthesis.	03	Natural product chemistry, A mechanistic, biosynthetic and ecological approach, Kurt B. G. Torssell, Apotekarsocieteten – Swedish pharmaceutical press.	Blackboard and ppt.
	Acetate pathway: Biosynthesis of malonylCoA, saturated fatty acids, prostaglandins from arachidonic acid, aromatic polyketides.	04	Organic Chemistry, Clayden Greeves Warren and Wothers,	Blackboard and ppt.
	Shikimic Acid pathway: Biosynthesis of shikimic acid, aromatic amino acids, cinnamic acid and its derivatives, lignin and lignans, benzoic acid and its derivatives, flavonoids and isofalvonoids.	04	Natural products Chemistry and applications, Sujata V Bhat, B.A. Nagasampagi and S. Meenakshi, Narosa Publishing House.,.	Blackboard and ppt.
	Mevalonate pathway: Biosynthesis of mevalonic acid, monoterpenes – geranyl cation and its derivatives, sesquiterpenes – farnesyl cation and its derivatives and diterpenes.	04	Natural Product Chemistry Vol.1 and 2, K. Nakanishi J. Goto. S.Ito Majori and S. Nozoo, Academic Press, 1974	Blackboard and ppt.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: T.Y.B.Sc. SEMESTER: VI MONTH: Dec-22 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Study polymers, their classification, stereochemistry and applications.
Understand concept of biodegradable polymers
Learn catalysts and reagents with respect to functional group transformations and selectivity.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-III, Organic Chemistry	Terms; monomer, polymer, homopolymer, copolymer, thermo plastics and thermosets. Addition polymers: polyethylene, polypropylene, teflon, polystyrene, PVC, Uses. Condensation polymers: polyesters, polyamides, polyurethanes, polycarbonates, phenol formaldehyde resins.Uses	03	Textbook, Himalaya publication	Blackboard and ppt.
UNIT-IV, Polymer, Catalysts and Reagents	Stereochemistry of polymers: Tacticity, mechanism of stereochemical control of polymerization using Ziegler Natta catalysts. Natural and synthetic rubbers: Polymerisation of isoprene: 1,2 and 1,4 addition (cis and trans), Styrene butadiene copolymer. Additives to polymers: Plasticisers, stabilizers and fillers.	03	Polymer science – a text book by Ahluwalia and Mishra	Blackboard and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Biodegradable polymers: Classification and uses. polylactic acid structure, properties and use for packaging and medical purposes.,	02	Textbook, Himalaya publication	Blackboard and ppt.
	Catalysts for hydrogenation: a. Raney Nickel b. Pt and PtO_2 (C=C, CN, NO_2, aromatic ring) c. Pd/C : C=C, COCl→CHO (Rosenmund) d. Lindlar catalyst: alkynes,	04	Oranic chemistry by Carey and Sundberg, Part A & B	Blackboard and ppt.
	Reagents**:** a. $LiAlH_4$ (reduction of CO, COOR, CN,NO_2) b. $NaBH_4$ (reduction of CO) c. SeO_2 (Oxidation of CH_2 alpha to CO) d. mCPBA (epoxidation of C=C) e. NBS (allylic and benzylic bromination)	03	Organic chemistry by Morrision and Boyd,7th edition	Blackboard and ppt.

CLASS: _____SY BSc_____ SEMESTER: ___III_____MONTH: _____ ACADEMIC YEAR: _2022- 23_____

LEARNING OBJECTIVE/S:
The learners will be able to : On completing the learning of this unit the learner is expected to

- Know the various instrumental methods of analysis
- Advantages of using instruments to make measurements
- The various observable properties of a given analyte and the stimulus best suited for its analysis
- Know about a generalized diagram of an analytical instrument
- Select a suitable instrumental method for analysis
- Appreciate the basic terms in spectrometry
- Use the relationship between absorbance (and its variations) and concentration of the analyte.
- Chose a suitable method foe photometric titrations.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER III **UNIT III** **ANALYTICAL CHEMISTRY**	**Instrumental Methods-I [15 L]** **3. Basic Concepts in Instrumental methods 03** **3.1.** Relation between the Analyte, Stimulus and measurement of change in the observable property. **3.2.** Block Diagram of an Analytical instrument. **3.3.** Types of Analytical Instrumental methods based on i. Optical interactions (eg. Spectrometry: uv-visible, Polarimetry) ii. Electrochemical interactions (eg. Potentiometry, Conductometry,) iii. Thermal interactions (eg. Thermogravimetry)	15	TEXT BOOKS REFFERENCE BOOKS U TUBE VIDEOS	CLALK AND TALK METHOD POWERPOINT PRESENTATION

Bpriya

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	3.4. Spectrometry (07 L) 3.4.1. Interaction of electromagnetic radiation with matter: Absorption and Emission spectroscopy 3.4.2. Basic Terms: Radiant Power, Absorbance, Transmittance, Monochromatic light, Polychromatic light, Wavelength of maximum absorbance, Absorptivity and Molar Absorbtivity 3.4.3. Statement of Beer's Law and Lambert's Law, Combined Mathematical Expression of Beer -Lambert's Law, Validity of Beer-Lambert's Law, Deviations from Beer-Lambert's Law ((Real deviations, Instrumental deviations and Chemical deviations) (Numerical problems based on Beer-Lambert's Law) 3.4.4. Instrumentation for absorption spectroscopy: Colorimeters and Spectrophotometers 3.4.5. Block Diagrams for Single beam and Colorimeter, and Spectrophotometer (Principles, Construction and working-Details of Components expected i.e , source ,Sample holder , Filters/Monochromators, Detectors such as Photomultiplier tube) 3.4.6. Applications of UV-Visible Spectrophotometry **(02 L)** (a) Qualitative analysis such as Identification of functional groups in Organic compounds ,Chromophores and Auxochrome,c*is* and *trans* isomers (b) Quantitative analysis by Calibration curve method and 3.4.7. Photometric Titrations: Principle ,Instrumentation, Types of Photometric titration Curves with examples.

NAME OF THE STAFF: _____Priya Sanjay Barve_____DEPARTMENT:_CHEMISTRY_____

CLASS: _____SY BSc_____ SEMESTER: __IV_____MONTH: _____ ACADEMIC YEAR: _2022- 23_____

LEARNING OBJECTIVE/S:
The learners will be able to : On completing this unit the learner is expected to understand
i) The use of statistical methods in chemical analysis.
ii) The nature of indeterminate errors
iii) The randomness of such errors and its distribution around a correct or acceptable result
iv) Computation of Confidence limits and confidence interval
v) Test for rejection of doubtful result
vi) Method to draw best fitting straight line

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER III **UNIT III** **ANALYTICAL CHEMISTRY**	**Statistical Treatment of analytical data --II (15 L)** Objectives: 3.1.**Nature of Indeterminate Errors:** 3.1.1. The true and acceptable value of a result of analysis 3.1.2. Measures of central tendency: mean, median. mode, average 3.1.3. Measures of dispersion: Absolute deviation, relative deviation, relative average deviation, standard deviation,(s,sigma) variance, coefficient of variation	**(03L)**	TEXT BOOKS REFFERENCE BOOKS U TUBE VIDEOS	CLALK AND TALK METHOD POWERPOINT PRESENTATION
	3.2.**Distribution of random errors:** 3.2.1. Gaussian distribution curve. 3.2.2. Equation and salient features of Gaussian distribution curve	**(02L)**	TEXT BOOKS REFFERENCE BOOKS	CLALK AND TALK METHOD POWERPOINT PRESENTATION

NAME OF THE STAFF: PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY CLASS: M.Sc-I SEMESTER: I MONTH: August-September ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to :

To learn - State function and exact differentials. Maxwell equations, Maxwell thermodynamic Relations.
To learn- Joule Thomson experiment, Joule Thomson coefficient, inversion temperature, Joule Thomson coefficient in terms of Vander Waals constants.
To know - Third law of Thermodynamics.
To learn - Entropy change for a phase transition, absolute entropies, determination of absolute entropies in terms of heat capacity, standard molar entropies and their dependence on molecular mass and molecular structure, residual entropy.

PAPER, UNIT, TITLE	SUBTOPIC	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

NAME OF THE STAFF: PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY CLASS: M.Sc-I

SEMESTER: II MONTH: February -March ACADEMIC YEAR:2022-2023 The learners will be able to :

To learn - Fugacity of real gases, Determination of fugacity of real gases using graphical method and from equation of state. Equilibrium constant for real gases in terms of fugacity. Gibbs energy of mixing, entropy and enthalpy of mixing.
To learn - Chemical potential in non ideal solutions excess functions of non ideal solution, Gibbs Duhem Margules equation. To learn - Laplace equation,Kelvin equation, Gibbs adsorption isotherm, BET isotherm.
To learn- standard free energy change in biochemical reactions, exergonic, endergonic. Hydrolysis of ATP, synthesis of ATP from ADP

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY

CLASS: M.Sc-I. SEMESTER: II MONTH: MARCH - APRIL ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to :

To study- Solvent Effects on reaction rates, Reactions between ions- influence of solvent Dielectric constant, influence of ionic strength, Linear free energy relationships Enzyme action
To learn - Michaelis-Menten analysis, Lineweaver-Burk and Eadie Analyses.
To learn- Competitive, Noncompetitive and Uncompetitive Inhibition. Effect of pH, Enzyme activation by metal ions, Regulatory enzymes. To study- The parabolic rate law, The first order rate Law, the contracting sphere rate law, Contracting area rate law, some examples of kinetic studies.

SIGNATURE OF THE STAFF ***SIGNATURE OF THE H.O.D.***

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Ms Rashmita Bharatkumar Vaychal DEPARTMENT: Chemistry CLASS: SY BSc (PC-CZ)

SEMESTER: III MONTH: July- October ACADEMIC YEAR: 2022 -2023

LEARNING OBJECTIVE/S:
The learners will be able to :
To make the learner proficient in analysing the various observations and chemical phenomena presented to him during the course.
To impart various skills of handling chemicals, reagents, apparatus, instruments and the care and safety aspects involved in such handling

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper I Unit I, Physical Chemistry Thermodynamics-II, Electrochemistry	1.1.1 Free Energy Functions: Helmholtz Free Energy, Gibb's Free Energy, Variation of Gibb's free energy with Pressure and Temperature.	2	Textbook of Himalaya Publication	Black Board
	1.1.2 Gibbs-Helmholtz equation, van't Hoff reaction isotherm and van't Hoff reaction isochore	2	Textbook of Himalaya Publication	Black Board
	1.1.3 Thermodynamics of Open System: Partial Molal Properties, Chemical Potential and its variation with Pressure and Temperature, Gibb's Duhem equation.	2	Textbook of Himalaya Publication	Black Board
	1.1.4 Concept of Fugacity and Activity	2	Textbook of Himalaya Publication	Black Board
	1.2.1 Conductivity, equivalent and molar conductivity and their variation with dilution for weak and strong electrolytes.	2	Textbook of Himalaya Publication	Black Board
	1.2.2 Kohlrausch law of independent migration of ions.	1	Textbook of Himalaya Publication	Black Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Vaychal

	1.2.3 Applications of conductance measurements: determination of degree of ionization and ionization constant of weak electrolyte, solubility and solubility product of sparingly soluble salts, ionic product of water.	2	Textbook of Himalaya Publication	Black Board
	1.2.4 Transference number and its experimental determination using Moving boundary method. Factors affecting transference number.	2	Textbook of Himalaya Publication	Black Board

CLASS: SY BSc (PC-CZ) SEMESTER: III MONTH: July -Oct ACADEMIC YEAR: 2022 -2023

LEARNING OBJECTIVE/S:
The learners will be able to : ideas about chemistry of Boron compounds, Chemistry of Silicon and Germanium and chemistry of Nitrogen family .

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED	
Paper II, Unit II ,Inorganic chemistry Selected topics on p block elements	2.1.1 Electron deficient compounds – BH_3, BF_3, BCl_3 with respect to Lewis acidity and applications.	2	Textbook of Himalaya Publication	BLACK BOARD	
	2.1.2 Preparation of simple boranes like diborane and tetraborane.	2	Textbook of Himalaya Publication	BLACK BOARD	
	2.1.3 Structure and bonding in diborane and tetraborane (2e-3c bonds)	2	Textbook of Himalaya Publication	BLACK BOARD	
	2.1.4 Synthesis of Borax.	1	Textbook of Himalaya Publication	BLACK BOARD	
	2.2.1 Silicon compounds: Occurrence , Structure and inertness of SiO_2	1	Textbook of Himalaya Publication	BLACK BOARD	
	2.2.2 Preparation of structure of $SiCl_4$	1	Textbook of Himalaya Publication	BLACK BOARD	
	2.2.3 Occurrence and extraction of Germanium	2	Textbook of Himalaya Publication	BLACK BOARD	
	2.2.4 Preparation of extra pure Silicon and Germanium	1	Textbook of Himalaya Publication	BLACK BOARD	

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Raychal

	2.3.1 Trends in chemical reactivity - Formation of hydrides, halides, oxides with special reference to oxides of nitrogen	1	Textbook of Himalaya Publication	BLACK BOARD	
	2.3.2 Oxides of nitrogen with respect to preparation and structure of NO, NO_2, N_2O and N_2O_4	1	Textbook of Himalaya Publication	BLACK BOARD	
	2.3.3 Synthesis of ammonia by Bosch – Haber process.	1	Textbook of Himalaya Publication	BLACK BOARD

LEARNING OBJECTIVE/S:

The learners will be able to : Have ideas about Ions in aqueous medium, acidity of Cations and Basicity of Anions and uses and Environmental chemistry of volatile oxides and Oxo-acids .

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II, Unit II ,Inorganic chemistry Ions in aqueous medium Uses and Environmental Chemistry of volatile Oxides and oxo-acids	Hydration of Cations; Hydrolysis of Cations predicting degree of hydrolysis of Cations-effect of Charge and Radius.	2	Textbook of Himalaya Publication	BLACK BOARD
	Latimer Equation. Relationship between pKa, acidity and z^2/r ratios of metal ions graphical Presentation	2	Textbook of Himalaya Publication	BLACK BOARD
	Classification of cations on the basis of acidity category – Non acidic, Moderately acidic, strongly acidic, very strongly acidic with pKa values range and examples	3	Textbook of Himalaya Publication	BLACK BOARD
	Hydration of Anions; Effect of Charge and Radius; Hydration of anions- concept, diagram classification on the basis of basicity	3	Textbook of Himalaya Publication	BLACK BOARD
	Physical properties of concentrated oxo-acids like sulfuric, Nitric and Phosphoric acid	2	Textbook of Himalaya Publication	BLACK BOARD
	Uses and environments aspects of these acids	3	Textbook of Himalaya	BLACK BOARD

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 2 Unit II Molecular Symmetry and Group Theory	2.1. Symmetry criterion of optical activity, symmetry restrictions on dipole moment. A systematic procedure for symmetry classification of molecules.	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	BLACK BOARD
	2.2. Concepts of Groups, Sub-groups, Classes of Symmetry operations, Group Multiplication Tables. Abelian and non-Abelian point groups	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	BLACK BOARD

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	2.3. Representation of Groups: Matrix representation of symmetry operations, reducible and irreducible representations. The Great Orthogonality Theorem and its application in construction of character tables for point groups C2v, C3v and D2h, structure of character tables.	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	BLACK BOARD
	2.4. Applications of Group Theory (a) Symmetry adapted linear combinations (SALC), symmetry aspects of MO theory, sigma bonding in ABn (Ammonia, CH4) molecule. (b) Determination of symmetry species for translations and rotations. (c) Mulliken's notations for irreducible representations. (d) Reduction of reducible representations using reduction formula. (e) Group-subgroup relationships. (f) Descent and ascent in symmetry correlation diagrams showing relationship between different groups.	6	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	BLACK BOARD

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: F.Y.B.Sc. SEMESTER: I MONTH: August 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand thermodynamic terms and state functions and path functions.
Study first law of thermodynamics in detail.
Study calculation of bond energy, bond dissociation energy and resonance energy from thermochemical data.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Chemistry Paper-I **UNIT-I Chemical Thermodynamics And Chemical Calculations**	Thermodynamic terms: System, surrounding, boundaries, open, closed and isolated system, intensive and extensive properties, state functions and path functions, zeroth law of thermodynamics	03	Text book Himalaya publication	Black board and ppt
	First law of thermodynamics: concept of heat (q), work (w), internal energy (U), statement of first law, enthalpy, relation between heat capacities, sign conventions, calculations of heat (q), work (w), internal energy (U), and enthalpy (H)	03	Atkins P.W. and Paula J.de, Atkin's Physical Chemistry, 10th Ed.	Black board and ppt
	Thermochemistry: Heats of reactions, standard states, enthalpy of formation of molecules, enthalpy of combustion and its applications, calculation of bond energy, bond dissociation energy and resonance energy from thermochemical data, Kirchhoff's equation	04	Text book Himalaya publication	Black board and ppt
	Expressing concentration of solutions: Normality, molality, molarity, formality, mole fractions, weight ratio,	02	Text book	Black board and ppt

SIGNATURE OF THE STAFF Sjadhav. **SIGNATURE OF THE H.O.D.**

			Himalaya publication	
	volume ratio, weight to volume ratio, ppm, ppb, millimoles, milliequivalents , Numericals.	03		Black board and ppt

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: III MONTH: June 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Introduce classical methods of chemical analysis.
Appreciate the various terms and types of titrimetric analysis.
Ability to select proper titrimetric method
Appreciate the usefulness of the gravimetric method of analysis
Identify a suitable gravimetric method
Perform the required calculations involved in the analysis by titrimetry as well as gravimetry.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
	Titrimetric Methods, Terms involved in Titrimetric methods of analysis. Comparing volumetry and Titrimetry The Conditions suitable for titrimetry Types of titrimetry – Neutralisation (Acidimetry, alkalimetry), Redox, Iodometry, Iodimetry.	02	Text book Himalaya publication	Black board and ppt

SIGNATURE OF THE STAFF Sjadhav. **SIGNATURE OF THE H.O.D.**

PAPER-Chemistry Paper-III **UNIT-II Classical Methods of Analysis**	Precipitation and Complexometric titrations and indicators used in these titrations, Tools of Titrimetry: Graduated glasswares and Callibration, Standard solutions (Primary and Secondary standards in Titrimetry) and Calculations in Titrimetry.	02	Text book Seth publication	Black board and ppt
	Concept of pH and its importance in Neutralisation Titrations End point and Equivalence point of Neutralisation titrations Determination of End point by using i. Indicators causing colour change ii. Change in potential, (by potentiometry) iii.Change in conductance (by conductometry). Construction of titration curve (on the basis of change in pH)of a titration.	04	Skoog et al. Fundamentals of Analytical chemistry Cengage Learning, Eight Edition, chapter 13, 14 and 15	Black board and ppt
	Types of Gravimetric Methods – Precipitation Gravimetry: i. Steps involved in precipitation gravimetry analysis	02	Text book Seth publication	Black board and ppt
	Conditions for precipitation iii. Completion of precipitation, iv. Role of Digestion, Filtration, Washing, Drying Ignition of precipitate.	02	Text book Himalaya publication	Black board and ppt
	Applications of Gravimetric Analysis: Determination of sulfur in organic compounds; Estimation of Nickel in Cu-Ni alloy using dimethyl glyoxime; Determination of Aluminum by converting it to its oxide.	03		Black board and ppt

CLASS: S.Y.B.Sc. SEMESTER: III MONTH: June 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

To describe the reactions of halogenated and oxygenated organic compounds of aliphatic and aromatic hydrocarbons
To predict the reactivity and stereochemistry of halogenated and oxygenated organic compounds

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-I **UNIT-III Alkyl And Aryl Halides and Compounds Containing Oxygen - Alcohols, Phenols, Ethers, & Epoxides**	Haloalkanes i. Nucleohilic substitution: SN1, SN2 & SNi, Mechanism and Stereochemistry ii. Factors affecting nucleophilic substitution: Substrate, Solvent, Reagent, Leaving group	02	Text book Himalaya publication	Black board and ppt
	Haloarenes i. Reactivity of aryl halides towards nucleophilic substitution ii. Mechanism of nucleophilic aromatic substitution: Addition-Elimination (SNAr); Elimination-Addition (Benzyne)	03	Text book Seth publication	Black board and ppt
	Alcohols & phenols i. Physical properties: Hydrogen bonding (types); effect of Hbonding on properties (o- & p-nitrophenol); comparison of acidity of alcohols & phenols; acidity of substituted phenols ii. Preparation & of alcohols: industrial preparation (fermentation); hydration of alkenes; hydrolysis of alkyl halides	03	Morrison, R. T.; Boyd, R. N. (2012). *Organic Chemistry*. Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).	Black board and ppt
	iii. Reactions of alcohols- with sodium, HX (Lucas test), esterification, Oppenaeur oxidation iv. Preparation of phenol- cumene hydroperoxide method	02	Text book Seth publication	Black board and ppt

SIGNATURE OF THE STAFF Sjadhav. **SIGNATURE OF THE H.O.D.**

	v. Reactions of phenols: O-alkylation & O-acylation; Schotten-Baumen reaction, Fries rearrangement, Claisen rearrangement			
	Ethers & Epoxides i. Preparation of ethers - Williamson's synthesis ii. Reaction of ethers - cleavage of ethers with HI iii. Preparation of epoxides- peroxyacids (m-CPBA)	02	Text book Himalaya publication	Black board and ppt
	iv. Reactivity & reactions of epoxides- ring opening reactions in acidic (HX, ROH, HCN), basic & neutral conditions (NH3, RMgX & RO-) with reference to regioselectivity	03		Black board and ppt

UNIT-I Kinetics and Phase equilibria of solutions	(Derivations not expected) iv. Thermal chain reactions: H and Br reaction. (Kinetic expression not expected).			
	Effect of temperature on the rate of reaction i. Arrhenius equation and its derivation ii. Concept of energy of activation (Ea). (Numerical expected) Theories of reaction rates i. Collision theory of unimolecular reaction(Lindemann's approach) and bimolecular reaction ii. Activated complex theory of bimolecular reactions iii. Comparison of the two theories (Qualitative treatment only)	03	Atkins P. W., and Paula J. De, *Physical Chemistry*, 10th ed., Oxford University, 12 press (2014).	Black board and ppt
	Phase rule & terms involved b) Liquid –liquid mixtures- classification i. Completely miscible liquids ii. Ideal solutions and Raoult's law iii. Deviations from Raoult's law –non-ideal solutions iv. Vapour pressure: composition and temperature; Composition curves of ideal and non-ideal solutions, Numericals	03	Text book Himalaya publication	Black board and ppt
	Partial miscibility of liquids i. Classification on the basis of Critical solution temperature ii. Effect of impurity on partial miscibility of liquids iii. Partially Miscible Liquids with Upper Critical Solution Temperature (Phenol-Water System) iv. Partially Miscible Liquids with Lower Critical Solution Temperature (Triethylamine-Water System) v. Partially Miscible Liquids with Upper and Lower Critical Solution Temperature (Nicotine-Water System)	03	Text book Himalaya publication	Black board and ppt
	Immiscibility of liquids: Principle of steam distillation (Numerical expected)	03	Text book	Black board and ppt

SIGNATURE OF THE STAFF Gpradhan.

SIGNATURE OF THE H.O.D.

	e) Nernst distribution law and its applications i. Solvent extraction – method		Himalaya publication	

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc Part II SEMESTER: III MONTH: June 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

To study different types of Multi-step synthesis of natural products.
To learn the role of different Prostaglandins, Lipids, Insect growth regulators and Plant growth regulators.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-III **UNIT-II Natural products and Spectroscopy**	Multi-step synthesis of natural products: Synthesis of the following natural products with special reference to reagents used, stereochemistry and functional group transformations: [8L] a) Woodward synthesis of Reserpine from benzoquinone b) Corey synthesis of Longifoline from resorcinol c) Gilbert-Stork synthesis of Griseofulvin from phloroglucinol	04	Text book Himalaya publication	Black board and ppt
	d) Corey's Synthesis of Caryophyllene from 2-Cyclohexenone and Isobutylene e) Synthesis of Juvabione from Limonene f) Synthesis of Taxolii. Activated complex theory of bimolecular reactions iii. Comparison of the two theories (Qualitative treatment only)	04	Atkins P. W., and Paula J. De, *Physical Chemistry*, 10th ed., Oxford University, 12 press (2014).	Black board and ppt

SIGNATURE OF THE STAFF Sjadhav. **SIGNATURE OF THE H.O.D.**

	Prostaglandins: Classification, general structure and biological importance. Structure elucidation of PGE1.	02	Text book Himalaya publication	Black board and ppt
	Lipids: Classification, role of lipids, Fatty acids and glycerol derived from oils and fats. Insect growth regulators: General idea, structures of JH2 and JH3	03	Text book Himalaya publication	Black board and ppt
	Plant growth regulators: Structural features and applications of arylacetic acids, gibberellic acids and triacontanol. Synthesis of triacontanol (synthesis of stearyl magnesium bromide and 12-bromo-1- tetrahydropyranyloxydodecane expected)	02	Text book Himalaya publication	Black board and ppt

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: F.Y.B.Sc. SEMESTER: II MONTH: January 2023 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Study ideal gas laws, kinetic theory of gases in detail.
Study reversible and irreversible reactions, law of mass action, dynamic equilibria.
Study spontaneity and physical significance of free energy.

SIGNATURE OF THE STAFF Sjadhav. **SIGNATURE OF THE H.O.D.**

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

To study nomenclature, structure and physical properties, acidity of carboxylic acids.
To predict the reactivity, nomenclature, and preparation of aromatic sulphonic acids.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER Chemistry Paper-I **UNIT-III**	Nomenclature, structure and physical properties, acidity of carboxylic acids, effects of substituents on acid strength of aliphatic and aromatic carboxylic acids. Preparation of carboxylic acids: oxidation of alcohols and alkyl benzene, carbonation of Grignard and hydrolysis of nitriles.	03	Text book Himalaya publication	Black board and ppt
	Reactions: Acidity, salt formation, decarboxylation, Reduction of carboxylic acids with $LiAlH_4$, diborane, Hell-Volhard-Zelinsky reaction,Conversion of carboxylic acid to acid chlorides, esters, amides and acid anhydrides and their relative reactivity.	04	Text book Seth publication	Black board and ppt
	Mechanism of nucleophilic acyl substitution and acid-catalysed nucleophilic acyl substitution. Interconversion of acid derivatives by nucleophilic acyl substitution. Mechanism of Claisen condensation and Dieckmann condensation.	04	Morrison, R. T.; Boyd, R. N. (2012). *Organic Chemistry*. Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).	Black board and ppt

SIGNATURE OF THE STAFF Sjadhav. **SIGNATURE OF THE H.O.D.**

	Nomenclature, preparation of aromatic sulphonic acids by sulphonation of benzene (with mechanism), toluene and naphthalene, Reactions: Acidity of arene sulfonic acid,	02	Text book Seth publication	Black board and ppt
	Comparative acidity of carboxylic acid and sulfonic acids. Salt formation, desulphonation.Reaction with alcohol, phosphorous pentachloride, IPSO substitution.	02	Text book Himalaya publication	Black board and ppt

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

To study different Types of catalysis, catalytic activity, specificity and selectivity.
To learn Recapitulation of laws of crystallography and types of crystals

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Chemistry Paper-II **UNIT-I Solid State And Catalysis**	laws of crystallography and types of crystals Characteristics of simple cubic, face centered cubic and body centered cubic systems, interplanar distance in cubic lattice	03	Text book Himalaya publication	Black board and ppt
	Use of X-rays in the study of crystal structure, Bragg's equation (derivation expected), X-rays diffraction method of studying crystal lattice structure, structure of NaCl and KCl. Determination of Avogadro's number, Numericals.	04	Atkins P. W., and Paula J. De, *Physical Chemistry*, 10th	Black board and ppt

SIGNATURE OF THE STAFF Sjadhav. **SIGNATURE OF THE H.O.D.**

			ed., Oxford University, 12 press (2014).	
	Types of catalysis, catalytic activity, specificity and selectivity, inhibitors, catalyst poisoning and deactivation	03	Text book Himalaya publication	Black board and ppt
	Mechanisms and kinetics of acid-base catalyzed reactions, effect of pH. Mechanisms and kinetics of enzyme catalyzed reactions (Michaelis-Menten equation)	03	Text book Himalaya publication	Black board and ppt
	Effect of particle size and efficiency of nanoparticles as catalyst.	02	Text book Himalaya publication	Black board and ppt

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2022 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

Expected to appreciate the nature of interaction between applied electrical potential and the concentration of the analyte.
The nature of chemical reactions that influence potential of a given cell.
Familiar with the various types of electrodes or half cells.
Appreciate the nature, need and importance of pH.
Expected to know the applications of the various instrumental methods dealt with in this unit.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc part II SEMESTER: IV MONTH: January 2023 ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to:

To study vitamins, their classification, sources and biological importance.
To study Antibiotics their Classification on the basis of activity. Structure elucidation.
To study naturally occurring insecticides: Sources, structure and biological properties.
To study terpenoids, Occurrence, classification, structure elucidation.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-III	Vitamins: Classification, sources and biological importance of vitamin B1, B2, B6, folic acid, B12, C, D1, E (α-tocopherol), K1, K2, H (β- biotin). [5L] Synthesis of the following: Vitamin A from β-ionone and bromoester moiety. Vitamin B1 including synthesis of pyrimidine and thiazole moieties Vitamin B2 from 3, 4-dimethylaniline and D(-)ribose	03	Text book Himalaya publication	Black board and ppt
	Vitamin B6 from: 1) ethoxyacetylacetone and cyanoacetamide, 2) ethyl ester of N-formyl-DL-alanine (Harris synthesis) Vitamin E (α-tocopherol) from trimethylquinol and phytyl bromide Vitamin K1 from 2-methyl-1, 4-naphthaquinone and phytol.	02	Text book Seth publication	Black board and ppt

SIGNATURE OF THE STAFF Sradhay. **SIGNATURE OF THE H.O.D.**

UNIT-II Natural products-IV	Antibiotics: Classification on the basis of activity. Structure elucidation, spectral data of penicillin-G, cephalosporin-C and chloramphenicol. Synthesis of chloramphenicol (from benzaldehyde and β-nitroethanol)	03	Principles of Instrumental analysis, D. A. Skoog, 3rd Edition, Chapters: 20, 23	Black board and ppt
	penicillin-G and phenoxymethylpenicillin from D-penicillamine and t-butyl phthalimide malonaldehyde (synthesis of D-penicillamine and t-butyl phthalimide malonaldehyde expected).	03	Text book Seth publication	Black board and ppt
	Naturally occurring insecticides: Sources, structure and biological properties of pyrethrums (pyrethrin I), rotenoids (rotenone). Synthesis of pyrethrin I.	02	Text book Himalaya publication	Black board and ppt
	Terpenoids: Occurrence, classification, structure elucidation, stereochemistry, spectral data and synthesis of zingiberene	02		Black board and ppt

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: _____AJITKUMAR INGLE_____DEPARTMENT: _____CHEMISTRY_____CLASS: _TYBSC_____ SEMESTER: _____Vth_____ MONTH: __June 2021 _____

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to :

1. To study redox titration like Construction of the titration curves and calculation of E_{system} in aqueous medium , Theory of redox indicators, Criteria for selection of an indicator in details.

2. To study complexometric titrations in details like construction of titration curve, Use of EDTA as titrant and its standardisation, absolute and conditional formation constants of metal EDTA complexes,Selectivity of EDTA as a titrant,Factors enhancing selectivity with examples,Types of EDTA titrations,Metallochromic indicators, theory, examples and applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: _____AJITKUMAR INGLE_____DEPARTMENT: ___CHEMISTRY_

__CLASS: __TYBSC_____ SEMESTER: __ VTH _____ MONTH: __June 2021 ___

ACADEMIC YEAR: _2021-22__

LEARNING OBJECTIVE/S:
The learners will be able to :

1) To study solvent extraction in detail like Factors affecting extraction, Concept of $[pH]_{1/2}$ and its significance, Craig's counter current extraction.

SIGNATURE OF THE STAFF *SIGNATURE OF THE H.O.D.*

2) To study HPLC instrumentation, working and applications along with detectors. 3)To study HPTLC instrumentation, working and applications in details.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER IV UNIT IV **METHODS OF SEPARATION – I (6 UNITS)**	***4.1* Solvent Extraction** *4.1.1* Factors affecting extraction: Chelation, Ion pair formation and Solvation *4.1.2* Graph of percent extraction versus pH. Concept of $[pH]_{1/2}$ and its significance (derivation not expected) 4.1.3 Craig's counter current extraction: Principle, apparatus and applications 4.1.4 Solid phase extraction: Principle, process and applications with special reference to water and industrial effluent analysis.	06L	Saujanya publication,sheth publication,Himalaya publication textbook of analytical chemistry,	Online video lecture on Google meet

SIGNATURE OF THE STAFF *SIGNATURE OF THE H.O.D.*

	4.1.5 Comparison of solid phase extraction and solvent extraction.			
	4.2 High Performance Liquid chromatography (HPLC) 4.2.1 Introduction and Principle Instrumentation- components with their significance: Solvent Reservoir, Degassing system, Pumps-(reciprocating pumps, screw driven- syringe type pumps, pneumatic pumps, advantages and disadvantages of each pump), Precolumn, Sample injection system, HPLC Columns, Detectors(UV — Visible detector, Refractive index detector) 4.2.2 Qualitative and Quantitative Applications of HPLC	06L	SAME AS ABOVE	SAME AS ABOVE

	4.3 **High Performance Thin Layer Chromatography (HPTLC)** *4.3.1* Introduction and Principle	03L	SAME AS ABOVE	SAME AS ABOVE

	Stationary phase, Sample application and mobile phase 4.3.2 Detectors *a)* Scanning densitometer- Components. Types of densitometer- Single beam and Double beam *b)* Fluorometric Detector *4.3.3* Advantages, disadvantages and applications *4.3.4* Comparison of TLC and HPTLC

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: _Dipti Gharat, DEPARTMENT:Chemistry , CLASS: T. Y. Bsc, SEMESTER: _V_and VI_ MONTH:

ACADEMIC YEAR: _____2021-22

LEARNING OBJECTIVE/S:
The learners will be able to : Learning objectives are statements that define the expected goal of a curriculum, course, lesson or activity in terms of demonstrable skills or knowledge that will be acquired by a student as a result of instruction._____

_____

_____

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II Unit II SOLID STATE CHEMISTRY	Sem V Structures of Solids 2.2.1 Explanation of terms viz.crystal lattice, lattice point, unit cell and lattice constants. 2.1.2 Closest packing of rigid spheres (hcp,ccp), packing density in simple cubic, bcc and fcc lattices. Relationship between density, radius of unit cell and lattice parameters. 2.1.3 Stoichiometric Point defects in solids (discussion on	11	Solid State Chemistry and its Applications" by A R West Google, Himalaya and sheth publication text book, you tube	Google classroom

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Frenkel and Schottky defects expected).		video, e-books	
	2.2 Superconductivity. 2.2.1 Discovery of superconductivity. 2.2.2 Explanation of terms like superconductivity, transition temperature, Meissner effect. 2.2.3 Different types of super conductors viz.conventional superconductors, alkali metal fullerides, high temperature super conductors. 2.2.4 Brief application of superconductors.	04	Puri sharma kalia, puri sharma pathania	
	Sem VI			
Paper II Unit III ORGANOMETALLIC CHEMISTRY	3.1 Organometallic Compounds of main group metal 3.1.1General characteristics of various types of organometallic compounds, viz.ionic, □-bonded and electron deficient compounds. 3.1.2 General synthetic methods of organometallic compounds : (i) Oxidative-addition, (ii)Metal-metal exchange(transmetallation), (iii) Carbanion-halide exchange, (iv) Metal-hydrogen exchange(metallation) and (v) Methyleneinsertion reactions. 3.1.3 Some chemical reactions of organometallic compounds:(i) Reactions with oxygen and halogens, (ii) Alkylation and arylation reactions (iii) Reactions with protic reagents, (iv) Redistribution reactions and (v) Complex	06		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	formation reactions.			
	3.2 Metallocenes Introduction, Ferrocene : Synthesis, properties, structure and bonding on the basis of VBT. 3.3 Catalysis 3.3.1 Comparison between homogeneous and heterogeneous catalysis 3.3.2 Basic steps involved in homogeneous catalysis 3.3.3 Mechanism of Wilkinson's catalyst in hydrogenation of alkenes.	09

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Gayatri Gadre DEPARTMENT: Chemistry

CLASS: M.Sc. SEMESTER: II MONTH: JANUARY ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Study Proton magnetic resonance spectroscopy: Principle, chemical shift, spin-spin coupling, coupling constant, karplus equation.
2. ^{13}C NMR spectroscopy: Theory and comparison with proton NMR, proton coupled and decoupled spectra, off-resonance decoupling.
3. Mass spectrometry: Molecular ion peak, base peak, isotopic abundance, Nitrogen rule, fragmentation pattern in various classes of organic compounds.
4. Structure determination involving individual or combined use of the above spectral techniques.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III, Unit IV- NMR spectroscopy and Mass spectrometry	Unit 4.1- Proton magnetic resonance spectroscopy	8 L	Introduction to Spectroscopy, Donald L. Pavia.	Power point presentation-Google meet, Chalk and board
	Unit 4.2- ^{13}C NMR spectroscopy	3 L	Organic Spectroscopy-Principles and Applications, Jagmohan.	Chalk and board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Gayatri Gadre DEPARTMENT: Chemistry

CLASS: M.Sc. SEMESTER: III MONTH: AUGUST ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Study Carbohydrates: structure elucidation of Lactose, structural features and applications of various carbohydrates.
2. Natural pigments: structural features and biological importance of various classes of natural pigments like carotenoids, flavones, quinones, porphyrins, structure elucidation of beta-carotene.
3. Insect pheromones: types of pheromones, synthesis of some pheromones.
4. Alkaloids: occurrence and importance of morphine, atropine, coniine.
5. Synthesis of some natural products.
6. Study of Prostaglandins, Lipids, Insect growth regulators, Plant growth regulators.
7. Advanced spectroscopic techniques like DEPT, COSY, HETCOR, NOE, NOESY.
8. Drug discovery, design and development: Important topics of medicinal chemistry like Receptor, Therapeutic index, Drug assay. Basic pharmacokinetics as ADME properties.
9. Discovery of Penicillin and Librium without lead, identification of pharmacophore, functional group modification, structure activity relationship (SAR)

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** III **MONTH:** 7th August

ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to: know about ionic bond and covalent bond, resonance, hybridization, valence bond theory and molecular orbital theory, know the various instrumental methods of analysis, advantages of using instruments to make measurements, the various observable properties of a given analyte and the stimulus best suited for its analysis, know about a generalized diagram of an analytical instrument, select a suitable instrumental method for analysis, appreciate the basic terms in spectrometry, use the relationship between absorbance (and its variations) and concentration of the analyte, chose a suitable method for photometric titrations.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
I, II, **Chemical Bonding**	**2.1 Non-Directional Bonding** **2.1.1** Ionic Bond: Conditions for the Formation of Ionic Bond. **2.1.2** Types of Ionic Crystals **2.1.3** Radius Ratio Rules **2.1.4** Lattice Energy, Borne-Lande Equation **2.1.5** Kapustinski Equation **2.1.6** Born-Haber Cycle and its Application	4L	Puri, Sharma Kalia Inorganic chemistry.	Google Meet
	2.2. Directional Bonding: Orbital Approach. **2.2.1** Covalent Bonding The Valence Bond Theory- Introduction and basic tenets.	6L		

SIGNATURE OF THE STAFF PSNagpal

SIGNATURE OF THE H.O.D.

	2.2.2 Interaction between two hydrogen atoms and the Potential energy diagram of the resultant system. **2.2.3** Corrections applied to the system of two hydrogen atoms-Formation of H_2 **2.2.4** Homonuclear diatomic molecules from He_2 to Ne_2 **2.2.5** Resonance and the concept of Formal Charge; Rules for Resonance or Canonical structures. **2.2.6** Bonding in Polyatomic Species: The role of Hybridization. And types of hybrid orbitals-*sp, sp^2, sp^3, sp^2d^2, sp^2d and sp3d^2* **2.2.7** Equivalent and Non-Equivalent hybrid orbitals **2.2.8** Contribution of a given atomic orbital to the hybrid orbitals (with reference to sp^3 hybridisation as in CH_4, $NH_3$and H_2O and series like NH_3, PH_3, AsH_3, BiH_3)		Puri, Sharma Kalia Inorganic chemistry.	Google Meet
	2.3 Molecular Orbital Theory **2.3.1.** Comparing Atomic Orbitals and Molecular Orbitals. **2.3.2.** Linear combination of atomic orbitals to give molecular orbitals LCAO-MO approach for diatomic homonuclear molecules. **2.3.4.** Wave mechanical treatment for molecular orbitals ($H^{2+}$and H) **2.3.4** Molecular orbital Theory and Bond Order and magnetic property: with reference to O_2,O_2^+ O_2^-,O_2^{2-}	5L	Puri ,Sharma Kalia Inorganic chemistry.	Google Meet
III, III, **Basic Concepts in Instrumental methods**	**3.1.** Relation between the analyte, stimulus and measurement of change in the observable property. **3.2.** Block Diagram of an Analytical instrument. **3.3.** Types of Analytical Instrumental methods based on	3L	Instrumental Methods of Chemical Analysis	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	i) Optical interactions (e.g. Spectrometry: uv-visible, Polarimetry) ii) Electrochemical interactions (e.g. Potentiometry, Conductometry,) iii) Thermal interactions (e.g. Thermogravimetry)			
	3.4. Spectrometry **3.4.1.** Interaction of electromagnetic radiation with matter: Absorption and Emission spectroscopy **3.4.2.** Basic Terms: Radiant Power, Absorbance, Transmittance, Monochromatic light, Polychromatic light, Wavelength of maximum absorbance, Absorptivity and Molar Absorbtivity **3.4.3.** Statement of Beer's Law and Lambert's Law, Combined Mathematical Expression of Beer -Lambert's Law, Validity of Beer-Lambert's Law,Deviations from Beer-Lambert's Law ((Real deviations, Instrumentaldeviations and Chemical deviations) **3.4.4.** Instrumentation for absorption spectroscopy: Colorimeters and Spectrophotometers **3.4.5.** Block Diagrams for Single beam and Colorimeter, and Spectrophotometer (Principles, Construction and working-Details of Components expected i.e source ,Sample holder , Filters/Monochromators, Detectors such as Photomultiplier tube)	7L	Instrumental Methods of Chemical Analysis	Google Meet
	3.4.6. Applications of UV-Visible Spectrophotometry **(02 L)** (a) Qualitative analysis such as Identification of functional groups in Organic compounds, Chromophores and Auxochrome,c*is* and *trans* isomers. (b) Quantitative analysis by Calibration curve method	2L 3L	Instrumental Methods of Chemical Analysis	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	3.4.7. Photometric Titrations: Principle, Instrumentation, Types of Photometric titration Curves with examples.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** IV **MONTH:** 1st January

ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to: know the position of elements in periodic table, origin of color and magnetic properties of transition elements, qualitative tests of transition elements and introduction of coordination compounds, its theories, nature and applications, the use of statistical methods in chemical analysis, the nature of indeterminate errors, the randomness of such errors and its distribution around a correct or acceptable result, computation of confidence limits and confidence interval, test for rejection of doubtful result, method to draw best fitting straight line

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
I, II, **2.1 Comparative Chemistry of the transition metals**	**2.1.1** Position in the periodic table; Natural occurrence principal ores and minerals; **2.1.2** Significance of special stability of d_0, d_5 and d_{10} leading to variable oxidation states; Unusual oxidation states and their stabilities in aqueous solutions (with special reference to vanadium, and chromium.) **2.1.3** Origin of colour for transition metals and their compounds: such as reflectivity, surface coatings, particle size, packing density for metals and nature of d-orbitals, number of electrons in the d-orbitals, geometry, and ability for charge transfer). **2.1.4** Magnetic properties of transition metal compounds: Origin of magnetism-spin and orbital motion of electrons; equation for spin only and spin-orbital magnetism in terms of	9L	Puri, Sharma, Kalia Inorganic Chemistry.	Google Meet

SIGNATURE OF THE STAFF PSNagpal

SIGNATURE OF THE H.O.D.

	Bohr magnetons (No derivation of relevant equations expected); Reasons for quenching of orbital moments. **2.1.5** Chemistry of Titanium and vanadium: properties of Oxides and chlorides; use in titrimetric analysis **2.1.6** Qualitative tests for transition metal ions: General considerations in devising tests (with reference to Chromium, Manganese, iron, Cobalt			
2.2 Coordination Chemistry	**2.2 Coordination Chemistry** **2.2.1 Introduction to Chemistry of Coordination Compounds** i. Historical perspectives: Early ideas on coordination compounds ii. Basic terms and nomenclature. iii. Types of ligands iv. Isomerism :General Types with special reference to stereoisomerism of coordination compounds (C.N=6) v. Evidence for the formation of coordination compounds, **2.2.2. Theories of coordination compounds** i. Werner's Theory of coordination compounds, ii. Effective atomic number rule. iii. Eighteen electron Rule **2.2.3. Nature of the Metal-Ligand Bond:** I Valence Bond Theory; Hybridisation of the central metal orbitals-sp^3, sd^3/d^3s, sp^3d^2/d^2sp^3, sp^2d. ii. Inner and outer orbital complexes of .(suitable examples of Mn(II), Fe(II),Fe(III),Co(II)/Co(III),Ni(II), Cu(II) Zn(II) complexes with ligands like aqua, ammonia CN-and halides may be used)	6L	Puri, Sharma, Kalia Inorganic chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

III, III- **Statistical Treatment of analytical data --II**	iii. Limitations of V.B.T **2.2.4.** Application of coordination compounds.			
	3.1. Nature of Indeterminate Errors: 3.1.1. The true and acceptable value of a result of analysis 3.1.2. Measures of central tendency: mean, median. mode, average 3.1.3. Measures of dispersion: Absolute deviation, relative deviation, relative average deviation, standard deviation,(s, sigma) variance, coefficient of variation	3L	Modern Analytical Chemistry , David Harvey (page numbers 53 -84)	Google Meet
	3.2. Distribution of random errors: 3.2.1. Gaussian distribution curve. 3.2.2. Equation and salient features of Gaussian distribution curve **3.3. Concept of Confidence limits and confidence interval and its computation using** (i) Population standard deviation (ii) Student's *t* test (iii) Range **3.4. Criteria for rejection of doubtful result** (i) 2.5 d rule (ii) 4.0 d rule (iii) Q test **3.5. Test of Significance** **(02 L)** (i) Null hypothesis (ii) F-test (variance ratio test) **3.6. Graphical representation of data and obtaining best fitting straight line (03 L)**	2L 3L 2L 2L	Modern Analytical Chemistry , David Harvey (page numbers 53 -84)	Google Meet

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR** DEPARTMENT: CHEMISTRY CLASS: TYBSc SEMESTER: V MONTH: August to November

ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

i. Understand the mechanisms of important reactions

ii. Understand the important concept of green chemistry and apply it.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-III (Organic Chemistry) Unit II 2.1 Stereochemistry I	2.1.1 Molecular chirality and elements of symmetry: Mirror plane symmetry, inversion center, roation -reflection (alternating) axis. 2.1.2 Chirality of compounds without a stereo genic center: cummulenes and biphenyls.	(5 L)	Stereochemistry P.S.Kalsi	Power point (Online)

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

2.2 Agrochemicals	2.2.1 General introduction & scope, meaning & examples of insecticides, herbicides, fungicide, rodenticide, pesticides, plant growth regulators. 2.2.2 Advantages & disadvantages of agrochemicals 2.2.3 Synthesis & application of IAA (Indole Acetic Acid) & Endosulphan, 2.2.4 Bio pesticides – Neem oil & Karanj oil.	(4 L)	Agrochemicals and pesticides: A.Jadhav and T.V.Sathe	Power point (Online)

2.3 Heterocyclic chemistry:	2.3.1 Reactivity of pyridine-N-oxide, quinoline and iso-quionoline. 2.3.2 Preparation of pyridine-N-oxide, quinoline (Skraup synthesis) and iso-quinoline (BischlerNapieralski synthesis). 2.3.3 Reactions of pyridine-N-oxide: halogenation, nitration and reaction with NaNH2/liq.NH3, n-BuLi. 2.3.4 Reactions of quinoline and isoquinoline; oxidation,reduction,nitration,halogenation and reaction with NaNH2/liq.NH3,n-BuLi.	(6 L)	Heterocyclic Chemistry, John A. Joule and Keith Mills, Wiley	Power point (Online)
Unit III 3.1 IUPAC	IUPAC Systematic nomenclature of the following classes of compounds (including compounds upto two substituents / functional groups): 3.1.1 Bicyclic compounds – spiro, fused and bridged (upto 11 carbon atoms) – saturated and unsaturated compounds. 3.1.2 Biphenyls 3.1.3 Cummulenes with upto 3 double bonds 3.1.4 Quinolines and isoquinolines.	(5 L)	IUPAC nomenclature by S.C.Pal.	Power point (Online)

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

3.2 Synthesis of organic compounds	3.2.1 Introduction: Linear and convergent synthesis, criteria for an ideal synthesis, concept of chemo selectivity and regioselectivity with examples, calculation of yields 3.2.2 Multicomponent Synthesis: Mannich reaction and Biginelli reaction. Synthesis with examples (no mechanism) 3.2.3 Green chemistry and synthesis: Introduction: Twelve principles of green chemistry, concept of atom economy and E-factor, calculations and their significance, numerical examples. i) Green reagents: dimethyl carbonate. ii) Green starting materials : D-glucose iii) Green solvents : supercritical CO2 iv) Green catalysts: Bio catalysts. 3.2.4 Planning of organic synthesis i) synthesis of nitroanilines. (o&p) ii) synthesis of halobenzoic acid.(o&p) iii) Alcohols (primary / secondary / tertiary) using Grignard reagents. iv) Alkanes (using organo lithium compounds)	(10L)	Green chemistry: V. K. Ahluwalia	Power point (Online)

The learners will be able to : •To understand more about qualitative analysis

•To study how does various gases evolved

• To study the acid base theories concept

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Semester 2 Paper 1 Unit 2.1 Concept of qualitative analysis	a) Testing of Gaseous Evolutes, Role of Papers impregnated with Reagents in qualitative analysis (with reference to papers impregnated with starch iodide, potassium dichromate, lead acetate, dimethylglyoxime and oxine reagents) b) Precipitation equilibria, effect of common ions, uncommon ions, oxidation states, buffer action, complexing agents on precipitation of ionic compounds. (Balanced chemical equations and numerical problems expected.)	07	Himalaya Publications FYBSc textbook	Blackboard Chalk & Duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 2.2 Acid Base Theories	Arrhenius, Lowry- Bronsted, Lewis, Solvent – Solute concept of acids and bases, Hard and Soft acids and bases. Applications of HSAB Applications of acid base chemistry in: i) Understanding organic reactions like Friedel Craft's (acylation/alkylation) reaction ii) Volumetric analysis with special reference to calculation of titration curve involving strong acid and strong base.	08	Himalaya Publications FYBSc textbook	Blackboard Chalk & Duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc. PART-II, ORGANIC CHEMISTRY SEMESTER: III MONTH: June 2021 ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand importance of organosilicons, organoboron and organotin compounds in organic synthesis.
Study application of mercury, selenium in organic synthesis.
Study application of silyl enol ethers in organic synthesis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-II, Synthetic Organic Chemistry-I **UNIT-IV, Metals / Non-metals in organic synthesis**	Mercury in organic synthesis: Mechanism and regiochemistry of oxymercuration and demercuration of alkenes, mercuration of aromatics, transformation of aryl mercurials to aryl halides. Organomercurials as carbene transfer reagents.	03	Advanced Organic Chemistry: Reaction Mechanism, R. Bruckner, Academic Press	Online google classroom, google meet and ppt.
	Organoboron compounds: Mechanism and regiochemistry of hydroboration of alkenes and alkynes, asymmetric hydroboration using chiral boron reagents, 9-BBN hydroboration, oxazaborolidine (CBS catalyst) and functional group reduction by diborane.	03	Organic Chemistry, Clayden Greeves Warren and Wothers,	Online google classroom, google meet and ppt.
	Organosilicons: Salient features of silicon governing the reactivity of organosilicons, preparation and important bond-forming reactions of alkyl silanes, alkenyl silanes, aryl silanes	03	Modern Methods of Organic Synthesis, 4th	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	and allyl silanes. β-silyl cations as intermediates. Iodotrimethylsilane in organic synthesis.		Edition, W. Carruthers and Iain Coldham,.	
	Silyl enol ethers: Application: As nucleophiles (Michael reaction, Mukaiyama aldol reaction), in ring contraction reactions.	02	Moder Organic Synthesis: An Introduction, G.S. Zweifel and M.H. Nantz,	Online google classroom, google meet and ppt.
	Organotin compounds: Preparation of alkenyl and allyl tin compounds; application in C-C bond formation, in replacement of halogen by H at the same C atom. Selenium in organic synthesis: Preparation of selenols/selenoxide, selenoxide elimination to create unsaturation, selenoxide and seleno acetals as α-C-H activating groups	04	Advanced Organic Chemistry, Part A and Part B: Reaction and Synthesis, Francis A. Carey, Richard J. Sundberg,	Online google classroom, google meet and ppt.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: T.Y.B.Sc. SEMESTER: VI MONTH: Dec-21 ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

Study polymers, their classification, stereochemistry and applications.
Understand concept of biodegradable polymers
Learn catalysts and reagents with respect to functional group transformations and selectivity.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-III, Organic Chemistry **UNIT-IV, Polymer, Catalysts and Reagents**	Terms; monomer, polymer, homopolymer, copolymer, thermo plastics and thermosets. Addition polymers: polyethylene, polypropylene, teflon, polystyrene, PVC, Uses. Condensation polymers: polyesters, polyamides, polyurethanes, polycarbonates, phenol formaldehyde resins.Uses	03	Textbook, Himalaya publication	Online google classroom, google meet and ppt.
	Stereochemistry of polymers: Tacticity, mechanism of stereochemical control of polymerization using Ziegler Natta catalysts. Natural and synthetic rubbers: Polymerisation of isoprene: 1,2 and 1,4 addition (cis and trans), Styrene butadiene copolymer. Additives to polymers: Plasticisers, stabilizers and fillers.	03	Polymer science – a text book by Ahluwalia and Mishra	Online google classroom, google meet and ppt.
	Biodegradable polymers: Classification and uses. polylactic acid structure, properties and use for packaging and medical purposes.,	02	Textbook, Himalaya publication	Online google classroom, google meet and ppt.
	Catalysts for hydrogenation: a. Raney Nickel b. Pt and PtO_2 (C=C, CN, NO_2, aromatic ring)	04	Oranic chemistry by Carey and Sundberg, Part A	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	c. Pd/C : C=C, COCl→CHO (Rosenmund) d. Lindlar catalyst: alkynes,		& B	
	Reagents**:** a. $LiAlH_4$ (reduction of CO, COOR, CN,NO_2) b. $NaBH_4$ (reduction of CO) c. SeO_2 (Oxidation of CH_2 alpha to CO) d. mCPBA (epoxidation of C=C) e. NBS (allylic and benzylic bromination)	03	Organic chemistry by Morrision and Boyd,7th edition	Chalk/ marker pen and board

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc. PART-II, ORGANIC CHEMISTRY SEMESTER: IV MONTH: /January 2022 ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

Study principles of physical organic chemistry and structural effects and reactivity.
Study linear free energy relationship (LFER) in determination of organic reaction mechanism.
Learn uses of Hammett equation.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PAPER-I, Theoretical organic chemistry-II **UNIT-I, Physical organic chemistry**	Asymmetric synthesis: Principles of asymmetric synthesis: Introduction, the chiral pool in Nature, methods of asymmetric induction – substrate, reagent and catalyst controlled reactions.	03	Organic Chemistry, J. Clayden, S. Warren, N. Greeves, P. Wothers, 1st Edition, Oxford University Press (2001).	Chalk/ marker pen and board
	Synthesis of L-DOPA [Knowles's Mosanto process]. Asymmetric reactions with mechanism: Aldol and related reactions, Cram's rule, Felkin-Anh model,	04	A guide to mechanism in Organic Chemistry, 6th edition, 2009, Peter Sykes,	Chalk/ marker pen and board
	Sharpless enantioselective epoxidation, hydroxylation, aminohydroxylation, Diels-Alder reaction, reduction of prochiral carbonyl compounds and olefins.	05	Advanced Organic Chemistry: Reaction Mechanisms, R. Bruckner, Academic Press	Chalk/ marker pen and board
	Use of chiral auxiliaries in diastereoselective reductions, asymmetric amplification. Use of chiral BINOLs, BINAPs and chiral oxazolines asymmetric transformations.	03	Organic Chemistry, Part A and B, Fifth edition,2007, Francis A. Carey and Richard J. Sundberg,	Chalk/ marker pen and board.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Grunwald-Winstein equation, Dimroth's E_T parameter, Solvatochromism Zscale, Spectroscopic Correlations, Thermodynamic Implications.	03

CLASS: _____SY BSc_____ SEMESTER: _III_____MONTH: _____ ACADEMIC YEAR: _2021- 22_____

LEARNING OBJECTIVE/S:

The learners will be able to : On completing the learning of this unit the learner is expected to

- Know the various instrumental methods of analysis
- Advantages of using instruments to make measurements
- The various observable properties of a given analyte and the stimulus best suited for its analysis
- Know about a generalized diagram of an analytical instrument
- Select a suitable instrumental method for analysis
- Appreciate the basic terms in spectrometry
- Use the relationship between absorbance (and its variations) and concentration of the analyte.
- Chose a suitable method foe photometric titrations.

Electrochemical interactions (eg. Potentiometry, Conductometry,) iii. Thermal interactions (eg. Thermogravimetry) 3.4. Spectrometry (07 L) 3.4.1. Interaction of electromagnetic radiation with matter: Absorption and Emission spectroscopy 3.4.2. Basic Terms: Radiant Power, Absorbance, Transmittance, Monochromatic light, Polychromatic light, Wavelength of maximum absorbance, Absorptivity and Molar Absorbtivity 3.4.3. Statement of Beer's Law and Lambert's Law, Combined Mathematical Expression of Beer -Lambert's Law, Validity of Beer- Lambert's Law, Deviations from Beer-Lambert's Law ((Real deviations, Instrumental deviations and Chemical deviations) (Numerical problems based on Beer-Lambert's Law) 3.4.4. Instrumentation for absorption spectroscopy: Colorimeters and Spectrophotometers 3.4.5. Block Diagrams for Single beam and Colorimeter, and Spectrophotometer (Principles, Construction and working- Details of Components expected i.e , source ,Sample holder , Filters/Monochromators, Detectors such as Photomultiplier tube) 3.4.6. Applications of UV-Visible Spectrophotometry (02 L)			
	(a) Qualitative analysis such as Identification of functional groups in Organic compounds ,Chromophores and Auxochrome,cisand transisomers (b) Quantitative analysis by Calibration curve method and 3.4.7. Photometric Titrations: Principle ,Instrumentation, Types of Photometric titration Curves with examples.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: _____Priya Sanjay Barve_____DEPARTMENT:_CHEMISTRY_____

CLASS: _____SY BSc_____ SEMESTER: IV_____MONTH: _____ ACADEMIC YEAR: _____

LEARNING OBJECTIVE/S:
The learners will be able to : On completing this unit the learner is expected to understand
i) The use of statistical methods in chemical analysis.
ii) The nature of indeterminate errors
iii) The randomness of such errors and its distribution around a correct or acceptable result
iv) Computation of Confidence limits and confidence interval
v) Test for rejection of doubtful result
vi) Method to draw best fitting straight line

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER III UNIT III ANALYTICAL CHEMISTRY	Statistical Treatment of analytical data --II (15 L) Objectives: 3.1. Nature of Indeterminate Errors: 3.1.1. The true and acceptable value of a result of analysis 3.1.2. Measures of central tendency: mean, median. mode, average	(03L)	TEXT BOOKS REFFERENCE BOOKS U TUBE VIDEOS	Google class room, Jamboard Canva. POWERPOINT PRESENTATION
	3.1.3. Measures of dispersion: Absolute deviation, relative deviation, relative average deviation, standard deviation,(s,sigma) variance, coefficient of variation			
	3.2. Distribution of random errors: 3.2.1. Gaussian distribution curve. 3.2.2. Equation and salient features of Gaussian distribution curve	(02L)	TEXT BOOKS REFFERENCE BOOKS U TUBE VIDEOS	Google class room, Jamboard Canva. POWERPOINT PRESENTATION
	3.3.Concept of Confidence limits and confidence interval and its computation using) (i) Population standard deviation (ii) Student's ttest (iii) Range	(03 L	TEXT BOOKS REFFERENCE BOOKS U TUBE VIDEOS	Google class room, Jamboard Canva. POWERPOINT PRESENTATION
	3.4.Criteria for rejection of doubtful result (i) 2.5 d rule (ii) 4.0 d rule (iii) Q test	(02 L)	TEXT BOOKS REFFERENCE BOOKS U TUBE VIDEOS	Google class room, Jamboard Canva. POWERPOINT PRESENTATION
	3.5.Test of Significance (i) Null hypothesis (ii) F-test (variance ratio test)	(02 L)	TEXT BOOKS REFFERENCE BOOKS U TUBE VIDEOS	Google class room, Jamboard Canva. POWERPOINT PRESENTATION
	3.6. Graphical representation of data and obtaining best fitting straight line (a) For line passing through origin (b) For line not passing through origin [Numerical problems wherever possible, expected	(03 L)	TEXT BOOKS REFFERENCE BOOKS U TUBE VIDEOS	Google class room, Jamboard Canva. POWERPOINT PRESENTATION

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY CLASS: M.Sc-I SEMESTER: I MONTH: October November ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

To learn - State function and exact differentials. Maxwell equations, Maxwell thermodynamic Relations.
To learn- Joule Thomson experiment, Joule Thomson coefficient, inversion temperature, Joule Thomson coefficient in terms of Vander Waals constants.
To know - Third law of Thermodynamics.
To learn - Entropy change for a phase transition, absolute entropies, determination of absolute entropies in terms of heat capacity, standard molar entropies and their dependence on molecular mass and molecular structure, residual entropy.

PAPER, UNIT, TITLE	SUBTOPIC	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Ms Rashmita Bharatkumar Vaychal DEPARTMENT: Chemistry

CLASS: MSc Part I SEMESTER:I MONTH: August ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to : Learn Molecular Symmetry , Group Theory and application of Group Theory

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 2 Unit II Molecular Symmetry and Group Theory	2.1. Symmetry criterion of optical activity, symmetry restrictions on dipole moment. A systematic procedure for symmetry classification of molecules.	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	Online google classroom, google meet and ppt.
	2.2. Concepts of Groups, Sub-groups, Classes of Symmetry operations, Group Multiplication Tables. Abelian and non-Abelian point groups	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter,	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Vaychal

			Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	
	2.3. Representation of Groups: Matrix representation of symmetry operations, reducible and irreducible representations. The Great Orthogonality Theorem and its application in construction of character tables for point groups C2v, C3v and D2h, structure of character tables.	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	Online google classroom, google meet and ppt.
	2.4. Applications of Group Theory (a) Symmetry adapted linear combinations (SALC), symmetry aspects of MO theory, sigma bonding in ABn (Ammonia, CH4) molecule. (b) Determination of symmetry species for translations and rotations. (c) Mulliken's notations for irreducible representations. (d) Reduction of reducible representations using reduction formula. (e) Group-subgroup relationships. (f) Descent and ascent in symmetry correlation diagrams showing relationship between different groups.	6	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	Online google classroom, google meet and ppt.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Ms Rashmita Bharatkumar Vaychal DEPARTMENT: Chemistry

CLASS: MSc Part I SEMESTER:II MONTH: January ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to : _Have an idea about bioinorganic chemistry , biological oxygen carrier and various enzymes and metal ion transport and storage.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II Unit IV Bioinorganic Chemistry	4.1. Biological oxygen carriers; hemoglobin, hemerythrene and hemocyanine- structure of metal active center and differences in mechanism of oxygen binding, Differences between hemoglobin and myoglobin: Cooperativity of oxygen binding in hemoglobin and Hill equation, pH dependence of oxygen affinity in hemoglobin and myoglobin and it's implications	5	Robert R.Crechton, Biological Inorganic Chemistry – An Introduction, Elsevie	Blackboard and chalk
	4.2. Activation of oxygen in biological system with examples of mono-oxygenases, and oxidases- structure of the metal center and mechanism of oxygen activation by these enzymes.	4	Robert R.Crechton, Biological Inorganic Chemistry – An Introduction, Elsevie	Blackboard and chalk
	4.3. Copper containing enzymes- superoxide dismutase, tyrosinase and laccase: catalytic reactions and the structures	3	Robert R.Crechton, Biological	Blackboard and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Raychal

	of the metal binding site		Inorganic Chemistry – An Introduction, Elsevie	
	4.4. Nitrogen fixation-nitrogenase, hydrogenases	1	Robert R.Crechton, Biological Inorganic Chemistry – An Introduction, Elsevie	Blackboard and chalk
	4.5. Metal ion transport and storage:Ionophores, transferrin, ferritin and metallothionins	1	Robert R.Crechton, Biological Inorganic Chemistry – An Introduction, Elsevie	Blackboard and chalk
	4.6. Medicinal applications of cis-platin and related compounds	1	Robert R.Crechton, Biological Inorganic Chemistry – An Introduction, Elsevie	Blackboard and chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: __Miss Riyan Rocky Gardner_____ DEPARTMENT: ____Chemistry ESTER: __First_____ MONTH: __August_____ ACADEMIC YEAR: __2021-2022_____

LEARNING OBJECTIVE/S:
The learners will be able to : ____Study about atomic structure ,hydrogenicatoms, many electron atoms,shell ,seashells and atomic orbitals.learn about radial shape of atomic orbitals ,Aufbau principle .

Study about periodic table and periodicity ,classification of elements ,electronegativity like Pauling, Alfred and Rochow and Mulliken etc._____

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1 unit 2 Atomic structure and Periodic table and periodicity	1. Atomic structure :Historical perspective of the atomic structure,Rutherford's atomic model,Bohrs atomic model ,it's limitations and atomic spectrum of atomic model,and structure of hydrogen atom. 2. Hydrogenic atom : Simple principle of quantum mechanics, atomic orbitals. Hydrogenic energy level ,shell, subshells and atomic orbitals, electron spin,radial shape of atomic orbitals, radial distribution function, angular shape of orbitals.	10	Himalaya publications F.Y.Bsc textbook	Google classroom

SIGNATURE OF THE STAFF Rgardner **SIGNATURE OF THE H.O.D.**

	3. Many electron atom : penetration and shielding ,effective nuclear charge. 4. Aufbau principle.			
	1. Periodic table and periodicity : Long form of periodic table,classification of elements, periodicity in following properties : atomic and ionic size,ionization enthalpy, electron gain enthalpy, effective nuclear charge ,electronegativity : Pauling, mulliken and Alfred and Rochow electronegativity.	05	Himalaya publications F.Y.Bsc textbook	Google classroom.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: F.Y.B.Sc. SEMESTER: I MONTH: October 2020 ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand thermodynamic terms and state functions and path functions.
Study first law of thermodynamics in detail.
Study calculation of bond energy, bond dissociation energy and resonance energy from thermochemical data.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Chemistry Paper-I	Thermodynamic terms: System, surrounding, boundaries, open, closed and isolated system, intensive and extensive properties, state functions and path functions, zeroth law of thermodynamics	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
UNIT-I Chemical Thermodynamics And Chemical Calculations	First law of thermodynamics: concept of heat (q), work (w), internal energy (U), statement of first law, enthalpy, relation between heat capacities, sign conventions, calculations of heat (q), work (w), internal energy (U), and enthalpy (H)	03	Atkins P.W. and Paula J.de, Atkin's Physical Chemistry, 10th Ed.	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

	Thermochemistry: Heats of reactions, standard states, enthalpy of formation of molecules, enthalpy of combustion and its applications, calculation of bond energy, bond dissociation energy and resonance energy from thermochemical data, Kirchhoff's equation	04	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Expressing concentration of solutions: Normality, molality, molarity, formality, mole fractions, weight ratio,	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	volume ratio, weight to volume ratio, ppm, ppb, millimoles, milliequivalents , Numericals.	03		Online google classroom, google meet and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: III MONTH: July 2021 ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

Introduce classical methods of chemical analysis.
Appreciate the various terms and types of titrimetric analysis.
Ability to select proper titrimetric method
Appreciate the usefulness of the gravimetric method of analysis
Identify a suitable gravimetric method
Perform the required calculations involved in the analysis by titrimetry as well as gravimetry.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

PAPER-Chemistry Paper-III **UNIT-II Classical Methods of Analysis**	Titrimetric Methods, Terms involved in Titrimetric methods of analysis. Comparing volumetry and Titrimetry The Conditions suitable for titrimetry Types of titrimetry – Neutralisation (Acidimetry, alkalimetry), Redox, Iodometry, Iodimetry.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Precipitation and Complexometric titrations and indicators used in these titrations, Tools of Titrimetry: Graduated glasswares and Callibration, Standard solutions (Primary and Secondary standards in Titrimetry) and Calculations in Titrimetry.	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Concept of pH and its importance in Neutralisation Titrations End point and Equivalence point of Neutralisation titrations Determination of End point by using i. Indicators causing colour change ii. Change in potential, (by potentiometry) iii.Change in conductance (by conductometry). Construction of titration curve (on the basis of change in pH)of a titration.	04	Skoog et al. Fundamentals of Analytical chemistry Cengage Learning, Eight Edition, chapter 13, 14 and 15	Online google classroom, google meet and ppt.
	Types of Gravimetric Methods – Precipitation Gravimetry: i. Steps involved in precipitation gravimetry analysis	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Conditions for precipitation iii. Completion of precipitation, iv. Role of Digestion, Filtration, Washing, Drying Ignition of precipitate.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Applications of Gravimetric Analysis: Determination of sulfur in organic compounds; Estimation of Nickel in Cu-Ni alloy using dimethyl glyoxime; Determination of Aluminum by converting it to its oxide.	03		Online google classroom, google meet and ppt.

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: III MONTH: July 2021 ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

To describe the reactions of halogenated and oxygenated organic compounds of aliphatic and aromatic hydrocarbons
To predict the reactivity and stereochemistry of halogenated and oxygenated organic compounds

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-I	Haloalkanes i. Nucleohilic substitution: SN1, SN2 & SNi, Mechanism and Stereochemistry ii. Factors affecting nucleophilic substitution: Substrate, Solvent, Reagent, Leaving group	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Haloarenes i. Reactivity of aryl halides towards nucleophilic substitution ii. Mechanism of nucleophilic aromatic substitution: Addition-Elimination (SNAr); Elimination-Addition (Benzyne)	03	Text book Seth publication	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

UNIT-III Alkyl And Aryl Halides and Compounds Containing Oxygen - Alcohols, Phenols, Ethers, & Epoxides	Alcohols & phenols i. Physical properties: Hydrogen bonding (types); effect of Hbonding on properties (o- & p-nitrophenol); comparison of acidity of alcohols & phenols; acidity of substituted phenols ii. Preparation & of alcohols: industrial preparation (fermentation); hydration of alkenes; hydrolysis of alkyl halides	03	Morrison, R. T.; Boyd, R. N. (2012). *Organic Chemistry*. Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).	Online google classroom, google meet and ppt.
	iii. Reactions of alcohols- with sodium, HX (Lucas test), esterification, Oppenaeur oxidation iv. Preparation of phenol- cumene hydroperoxide method v. Reactions of phenols: O-alkylation & O-acylation; Schotten-Baumen reaction, Fries rearrangement, Claisen rearrangement	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Ethers & Epoxides i. Preparation of ethers - Williamson's synthesis ii. Reaction of ethers - cleavage of ethers with HI iii. Preparation of epoxides- peroxyacids (m-CPBA)	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	iv. Reactivity & reactions of epoxides- ring opening reactions in acidic (HX, ROH, HCN), basic & neutral conditions (NH3, RMgX & RO-) with reference to regioselectivity	03		Online google classroom, google meet and ppt.

Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

LEARNING OBJECTIVE/S:
The learners will be able to:

Study ideal gas laws, kinetic theory of gases in detail.
Study reversible and irreversible reactions, law of mass action, dynamic equilibria.
Study spontaneity and physical significance of free energy.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-II **UNIT-II Chemical Bond and Reactivity And Oxidation Reduction Chemistry**	Types of chemical bond, comparison between ionic and covalent bonds, polarizability Fajan's Rule, shapes of molecules, Lewis dot structure, Sidgwick Powell Theory	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Basic VSEPR theory for ABn type molecules with and without lone pair of electrons, isoelectronic principles, applications and limitations of VSEPR theory.	04	Atkins, P.W. & Paula, J. Physical Chemistry, 10th Ed., Oxford University Press,	Online google classroom, google meet and ppt.
	Reduction potentials Redox potentials: half reactions; balancing redox equations.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Redox stability in water i) Latimer and Frost Diagrams ii) pH dependence of redox potentials.	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Applications of redox chemistry i) Extraction of elements: (example: isolation of copper by auto reduction) ii) Redox reagents in Volumetric analysis: a) I2; b) KMnO4 iii) Titration curves:i) single electron systems (example Ce(IV) against Fe(II)); and ii) Multi electron systems as in KMnO4 against Fe(II))	03	Text book Himalaya publication	Online google classroom, google meet and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2021 ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

To study nomenclature, structure and physical properties, acidity of carboxylic acids.
To predict the reactivity, nomenclature, and preparation of aromatic sulphonic acids.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER Chemistry Paper-I **UNIT-III**	Nomenclature, structure and physical properties, acidity of carboxylic acids, effects of substituents on acid strength of aliphatic and aromatic carboxylic acids. Preparation of carboxylic acids: oxidation of alcohols and alkyl benzene, carbonation of Grignard and hydrolysis of nitriles.	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Reactions: Acidity, salt formation, decarboxylation, Reduction of carboxylic acids with $LiAlH_4$, diborane, Hell-Volhard-Zelinsky reaction,Conversion of carboxylic acid to acid chlorides, esters, amides and acid anhydrides and their relative reactivity.	04	Text book Seth publication	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

	Mechanism of nucleophilic acyl substitution and acid-catalysed nucleophilic acyl substitution. Interconversion of acid derivatives by nucleophilic acyl substitution. Mechanism of Claisen condensation and Dieckmann condensation.	04	Morrison, R. T.; Boyd, R. N. (2012). *Organic Chemistry*. Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).	Online google classroom, google meet and ppt.
	Nomenclature, preparation of aromatic sulphonic acids by sulphonation of benzene (with mechanism), toluene and naphthalene, Reactions: Acidity of arene sulfonic acid,	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Comparative acidity of carboxylic acid and sulfonic acids. Salt formation, desulphonation.Reaction with alcohol, phosphorous pentachloride, IPSO substitution.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2021 ACADEMIC YEAR: 2021-20222

LEARNING OBJECTIVE/S:
The learners will be able to:

To study different Types of catalysis, catalytic activity, specificity and selectivity.
To learn Recapitulation of laws of crystallography and types of crystals

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

PAPER-Chemistry Paper-II **UNIT-I Solid State And Catalysis**	laws of crystallography and types of crystals Characteristics of simple cubic, face centered cubic and body centered cubic systems, interplanar distance in cubic lattice	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Use of X-rays in the study of crystal structure, Bragg's equation (derivation expected), X-rays diffraction method of studying crystal lattice structure, structure of NaCl and KCl. Determination of Avogadro's number, Numericals.	04	Atkins P. W., and Paula J. De, *Physical Chemistry*, 10th ed., Oxford University, 12 press (2014).	Online google classroom, google meet and ppt.
	Types of catalysis, catalytic activity, specificity and selectivity, inhibitors, catalyst poisoning and deactivation	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Mechanisms and kinetics of acid-base catalyzed reactions, effect of pH. Mechanisms and kinetics of enzyme catalyzed reactions (Michaelis-Menten equation)	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Effect of particle size and efficiency of nanoparticles as catalyst.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2021 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

Expected to appreciate the nature of interaction between applied electrical potential and the concentration of the analyte.
The nature of chemical reactions that influence potential of a given cell.
Familiar with the various types of electrodes or half cells.
Appreciate the nature, need and importance of pH.
Expected to know the applications of the various instrumental methods dealt with in this unit.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-III **UNIT-II Instrumental Methods-II**	Instruments based on the electrochemical properties of the analytes Potentiometry: Principle, Role of Reference and indicator electrodes	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Applications in Neutralisation reactions with reference to the titration of a Strong acid against a Strong Base (using quinhydrone electrode, Graphical methods for detection of end points.	02	Text book Seth publication	Online google classroom, google meet and ppt.
	pHmetry: Principle Types of pH meters.	02	Principles of Instrumental analysis, D. A. Skoog, 3rd Edition, Chapters: 20, 23	Online google classroom, google meet and ppt.
	Construction Working and Care of Combined Glass electrode Applications in Titrimetry (Strtong acid-Strong Base) biological and environmental analysis	02	Text book Seth publication	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

	Conductometry: Principle , Conductivity cell its construction and care.	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Applications in Neutralisation Titrimetry with respect to i. Strong Acid-Strong Base ii. Strong Acid-Weak Base iii. Strong Base-weak Acid iv. Weak Acid- Weak Base. Advantages & limitations of conductometric titrations.	03		Online google classroom, google meet and ppt.

NAME OF THE STAFF: Sunny Suresh Baing DEPARTMENT: Chemistry ____

CLASS: FYBSc. SEMESTER: VI _____ MONTH: January to March ACADEMIC YEAR: 2021-22

_____

LEARNING OBJECTIVE/S:
The learners will be able to :

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 1	**3.1 CARBON- CARBON SIGMA BONDS** 1. Chemistry of alkanes- Formation of Alkanes, wurtz reaction, Wurtz-Fittig reaction,free radical substitutions	3L	Himalaya Publication textbook of	Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3 Chemistry of aliphatic hydrocarbons - II	: halogenation- relative reactivity and selectivity		FYBSc	
	3.2 CARBON-CARBON PI BONDS Formation of Alkenes and Alkynes by elimination reactions- Mechanism of E1,E2 ,E1cb reactions. Saytzeff and Hofmann eliminations Reaction of alkenes- Electrophilic additions their mechanisms (Markownikoff and Anti Markownikoff addition), Mechanism of oxymercuration-demercuration , hydroboration-oxidation , ozonolysis, reduction (catalytic and chemical) , syn and anti- hydroxylation (oxidation). 1,2 - and 1,4-addition reaction,Diels-alder reaction, allylic and benzylic bromination using N-bromosuccinimide and mechanism Reaction of Alkynes- acidity , electrophilic and nucleophilic additions , hydration to form carbonyl compounds, alkylation of terminal Alkynes	12L	Himalaya Publication, textbook of FYBSc.	Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: _15_____

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Late shri. Vishnu Waman Thakur Charitable Trust

Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts VIVA
COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: _____Swati shreedhar Dhumal._____ DEPARTMENT: Chemistry_____

CLASS: ____M.Sc. I_____SEMESTER: _____I _st_____ MONTH: ___Sep _____ACADEMIC YEAR: ____2021-22_____

LEARNING OBJECTIVE/S:

The learners will be able to : 1) To learn concept of FT technique and it's concept.

2) To understand the concept and application of Molecular Ultraviolet and Visible Spectroscopy 3)

To be able to carry out numerical based on UV Visible spectroscopy.

4) To gain knowledge in concept of Infrared Absorption Spectroscopy, Dual spectrometry , diffuse reflectance spectroscopy.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Vidhya Dayanand Patil College of Arts VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69

PAPER, UNIT, TITLE	SUBTOPICS	LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper IV, Unit 2 Calculations based on chemical principles	The following topics are to be covered in the form of numerical problems only. a. Concentration of a solution based on volume and mass units. b. Calculations of ppm, ppb and dilution of the solutions, concept of mmol c. Stoichiometry of chemical reactions, concept of kg mol, limiting reactant, theoretical and practical yield. d. Solubility and solubility equilibria,effect of presence of common ion. e. Calculations of pH of acids, bases, acidic and basic buffers. f. Concept of formation constants, stability and instability constants, stepwise formation constants.		3000 solved problems in chemistry, Schaums Solved problem series, David E. Goldbers, Mc Graw Hill international	Google Classroom

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	g. Oxidation number, rules for assigning oxidation number, redox reaction in term of oxidation number, oxidizing and reducing agents, equivalent weight of oxidizing and reducing agents, stoichiometry of redox titration (Normality of a solution of a oxidizing / reducing agent and its relationship with molarity).	**[15 L]**	Editions	Google classroom
Paper – IV, Unit – 3. Optical Methods	Recapitulation and FT Technique : Recapitulation of basic concepts, Electromagnetic spectrum, Sources, Detectors, sample containers. Laser as a source of radiation, Fibre optics. Introduction of Fourier Transform Molecular Ultraviolet and Visible Spectroscopy	**(6L)**	D. A. Skoog, F. J. Holler, T. A. Nieman, Principles of Instrumental Analysis, 5th Edition, Google.	Google classroom
	NUMERICALS ARE EXPECTED Derivation of Beer- Lambert's Law and its limitations, factors affecting molecular absorption, types of transitions [emphasis on charge transfer absorption], pH, temperature, solvent and effect of substituents. Applications of Ultraviolet and Visible spectroscopy: 1) On charge transfer absorption 2) Simultaneous spectroscopy 3) Derivative Spectroscopy	**(3L)** **(6L)**		Google classroom Google classroom

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Dual spectrometry – Introduction, Principle, Instrumentation and			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Applications Infrared Absorption Spectroscopy Instrumentation: Sources, Sample handling, Transducers, Dispersive, non-dispersive instrument FTIR and its advantages Applications of IR [Mid IR, Near IR, Far IR]: Qualitative with emphasis on "Finger print" region, Quantitative analysis, Advantages and Limitations of IR Introduction and basic principles of diffuse reflectance spectroscopy	**(6L)**		Google classroom

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Tanvi .A. Raul DEPARTMENT: Chemistry

CLASS: F.Y.B.sc (CBZ-A & B) SEMESTER: I MONTH: AUGUST TO DECEMBER ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

Develop the knowledge about chemical kinetics and liquid state.

To develop the understanding about order of reactions and different instruments used to measure different properties of liquids.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II Unit I	**1.1 Chemical Kinetics** Rate of reaction, rate constant, measurement of reaction rates, order and molecularity of reaction, integrated rate equation of first and second order reactions (with equal initial concentration of reactants) (Numericals expected) Determination of order of reaction by (a) Integration method (b) Graphical method (c) Ostwald's isolation method (d) Half time method (Numericals expected)	8	Himalaya Publication F.Y.B.sc, Physical chemistry Textbook	Google meet and google classroom
	1.2 Liquid State Surface tension: Introduction, methods of determination of surface tension by drop number method	7		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	(Numericals expected) Viscosity: Introduction, coefficient of viscosity, relative viscosity, specific viscosity, reduced viscosity, determination of viscosity by Ostwald viscometer (Numericals expected) Refractive index: Introduction, molar refraction and polarizability, determination of refractive index by Abbe's refractometer (Numerical s expected) Liquid crystals: Introduction, classification and structure of thermotropic phases (Nematic, smectic and cholesteric phases), applications of liquid crystals :

NAME OF THE STAFF: VIPAL DEEPAK DOSHI DEPARTMENT: CHEMISTRY CLASS: TYBSC (3UNITS) SEMESTER: VI

MONTH: JAN - FEB ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to: learn the various rearrangement reactions. They will able to know the new concepts of carbohydrates and its various structures.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3 UNIT 2 – Molecular Rearrangements & Carbohydrates	**2.1 MOLECULAR REARRANGEMENT** 2.1.1. Pinacol-Pinacolone Rearrangement 2.1.2. Beckmann Rearrangement	2	Himalaya Publishing House College Organic Chemistry T.Y.B.Sc.	Online mode – Powerpoint Presentation
	2.1.3. Favorski Rearrangement 2.1.4. Michael Addition, Wittig Reaction	2		
	2.2 CARBOHYDRATES 2.2.1. Introduction, classification, reducing & non reducing sugars, DL notation	1		
	2.2.2. Structures of monosaccharides: Fischer projection & Haworth formula, Interconversion, Chair conformation with stereochemistry of D-glucose	2		
	2.2.3. Stereoisomers of D-glucose 2.2.4. Mutarotation in D-glucose	2		
	2.2.5. Chain lengthening & shortening reactions 2.2.6. Reactions of D-glucose and D-fructose	4		
	2.2.7. Glycosides	1		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 14 lectures

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: VIPAL DEEPAK DOSHI DEPARTMENT: CHEMISTRY CLASS: TYBSC (3 UNITS) SEMESTER: VI

MONTH: FEB-MAR ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to: learn new concepts of stereochemistry and reactions involving stereochemistry. The learners will know about Amino acids, Polypeptides and Proteins.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3 UNIT 1- Stereochemistry II & Amino Acids and	1.1 Stereochemistry II 1.1.1 Stereoselectivity and stereospecificity : Idea of enantioselectivity (ee) and diastereoselectivity (de) , Topicity : enantiotopic and diasterotopic atoms, groups and faces.	2	Himalaya Publishing House College Organic Chemistry T.Y.B.Sc.	Online mode – Powerpoint presentation
	1.1.2 Stereochemistry of – i) Substitution reactions : SNi (reaction of alcohol with thionyl chloride) ii) Elimination reactions: E2–Base induced dehydrohalogenation of 1-bromo-1,2- diphenylpropane. iii) Addition reactions to olefins: a) bromination (electrophilic anti addition) b) syn hydroxylation with OsO4 and KMnO4 c) epoxidation followed by hydrolysis.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	1.2 Amino acids & Proteins (5 L) 1.2.1 α-Amino acids: General Structure, configuration, and classification based on structure and nutrition. Properties: pH dependency of ionic structure, isoelectric point and zwitter ion. Methods of preparations: Strecker synthesis, amido malonate synthesis, Erlenmeyer azlactone synthesis.	3		
	1.2.2 Polypeptides and Proteins: Polypeptides: Peptide bond. Nomenclature and representation of polypeptides (di- and tri-peptides) with examples.	2		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 11 lectures

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: VIPAL DEEPAK DOSHI DEPARTMENT: CHEMISTRY CLASS: M.Sc. (ORGANIC CHEMISTRY) SEMESTER: IV

MONTH: JAN-FEB ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to: learn the concept of LFER, Hammett equation and its applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 1 UNIT 1-	1.1 Structural effects and reactivity: Linear free energy relationship (LFER) in determination of organic reaction mechanism, The Hammett equation, substituent constants,	6L	Modern physical chemistry, Eric V Anslyn, Dennis A.	Online mode – Powerpoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Physical Organic Chemistry	theories of substituent effects, interpretation of σ values, reaction constants ρ, Yukawa-Tsuno equation.		Dougherty, University science books,2006 22	
	1.2 Uses of Hammett equation, deviations from Hammett equation. Dual parameter correlations, Inductive substituent constants. The Taft model, σI and σR scales, steric parameters Es and β. Solvent effects, Okamoto-Brown equation, Swain-Scott equation, Edward and Ritchie correlations, Grunwald-Winstein equation, Dimroth's ET parameter, Solvatochromism Zscale, Spectroscopic Correlations, Thermodynamic Implications.	6L	Physical Organic Chemistry, N. S. Isaacs, ELBS/Longman	

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12 lectures

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: VIPAL DEEPAK DOSHI DEPARTMENT: CHEMISTRY CLASS: M.Sc. (ORGANIC CHEMISTRY) SEMESTER: IV

MONTH: FEB-MAR ACADEMIC YEAR: 2021-2022

The learners will be able to : learn about natural products such as vitamins, antibiotics, insecticides and terpenoids and their synthesis

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3	2.1 Vitamins	5L	Organic Chemistry Natural Products Volume-II, O. P.	Offline mode – Chalk and Board method
UNIT 2-	2.2 Antibiotics	6L		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Natural Products-IV	2.3 Naturally occurring Insecticides	2L	Agarwal, Krishna Prakashan, 2011.	
	2.4 Terpenoids	2L

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR** DEPARTMENT: CHEMISTRY CLASS: FYBSc

SEMESTER: I MONTH: August to December ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

i. Understand the basics of Organic Chemistry

ii. Understand and be well versed with the nomenclature of various functional groups

iii. Learn bonding, formation and reactions of organic compounds

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-I U-III Basics of Organic Chemistry	Classification and Nomenclature of Organic Compounds: Review of basic rules of IUPAC nomenclature. Nomenclature of mono and bi-functional aliphatic compounds on the basis of priority order of the following classes of compounds: alkanes, alkenes, alkynes, haloalkanes, alcohols, ethers, aldehydes, ketones, carboxylic acids, carboxylic acid derivatives (acid halides, esters, anhydrides, amides), nitro compounds, nitriles and amines; including their cyclic analogues.	(5L)	Morrison and Boyd Organic Chemistry Mc Murry, J.E. Fundamentals of Organic Chemistry	Chalk and Board
	Bonding and Structure of organic compounds: Hybridization: sp3, sp2, sp hybridization of carbon and nitrogen;	(4L)		Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	sp3 and sp2 hybridizations of oxygen in Organic compounds (alcohol, ether, aldehyde, ketone, carboxylic acid, ester, cyanide, amine and amide) Overlap of atomic orbitals: Overlaps of atomic orbitals to form sigma and pi bonds, shapes of organic molecules. Shapes of molecules; Influence of hybridization on bond properties (as applicable to ethane, ethene, ethyne)			
	Fundamentals of organic reaction mechanism: Electronic Effects: Inductive, electromeric, resonance and mesomeric effects, hyperconjugation and their applications; Dipole moment; Organic acids and bases; their relative strengths. Bond fission: Homolytic and Heterolytic fission with suitable examples. Electrophiles and Nucleophiles; Nucleophilicity and basicity; Types (primary, secondary, tertiary, allyl, benzyl), shape and their relative stability of reactive intermediates: Carbocations, Carbanions and Free radicals. Introduction to types of organic reactions: Addition, Elimination and Substitution reaction.	(6L)		Chalk and Board

LEARNING OBJECTIVE/S:
The learners will be able to:

vii. Understand the mechanisms of important reactions

viii. Understand the important concept of green chemistry and apply it.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-III (Organic Chemistry) Unit II 2.1 Stereochemistry I	2.1.1 Molecular chirality and elements of symmetry: Mirror plane symmetry, inversion center, roation -reflection (alternating) axis. 2.1.2 Chirality of compounds without a stereo genic center: cummulenes and biphenyls.	(5 L)	Stereochemistry P.S.Kalsi	Power point (Online)
2.2 Agrochemicals	2.2.1 General introduction & scope, meaning & examples of insecticides, herbicides, fungicide, rodenticide, pesticides, plant growth regulators. 2.2.2 Advantages & disadvantages of agrochemicals 2.2.3 Synthesis & application of IAA (Indole Acetic Acid) & Endosulphan, 2.2.4 Bio pesticides – Neem oil & Karanj oil.	(4 L)	Agrochemicals and pesticides: A.Jadhav and T.V.Sathe	Power point (Online)
2.3 Heterocyclic chemistry:	2.3.1 Reactivity of pyridine-N-oxide, quinoline and iso-quionoline. 2.3.2 Preparation of pyridine-N-oxide, quinoline (Skraup synthesis) and iso-quinoline (BischlerNapieralski synthesis). 2.3.3 Reactions of	(6 L)	Heterocyclic Chemistry, John A. Joule and Keith	Power point (Online)

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	pyridine-N-oxide: halogenation, nitration and reaction with NaNH2/liq.NH3, n-BuLi. 2.3.4 Reactions of quinoline and isoquinoline; oxidation,reduction,nitration,halogenation and reaction with NaNH2/liq.NH3,n-BuLi.		Mills, Wiley	
Unit III 3.1 IUPAC	IUPAC Systematic nomenclature of the following classes of compounds (including compounds upto two substituents / functional groups): 3.1.1 Bicyclic compounds – spiro, fused and bridged (upto 11 carbon atoms) – saturated and unsaturated compounds. 3.1.2 Biphenyls 3.1.3 Cummulenes with upto 3 double bonds 3.1.4 Quinolines and isoquinolines.	(5 L)	IUPAC nomenclature by S.C.Pal.	Power point (Online)
3.2 Synthesis of organic compounds	3.2.1 Introduction: Linear and convergent synthesis, criteria for an ideal synthesis, concept of chemo selectivity and regioselectivity with examples, calculation of yields 3.2.2 Multicomponent Synthesis: Mannich reaction and Biginelli reaction. Synthesis with examples (no mechanism) 3.2.3 Green chemistry and synthesis: Introduction: Twelve principles of green chemistry, concept of atom economy and E-factor, calculations and their significance, numerical examples. i) Green reagents: dimethyl carbonate. ii) Green starting materials : D-glucose iii) Green solvents : supercritical CO2 iv) Green catalysts: Bio catalysts. 3.2.4 Planning of organic synthesis i) synthesis of nitroanilines. (o&p) ii) synthesis of halobenzoic acid.(o&p) iii) Alcohols (primary / secondary / tertiary) using Grignard reagents. iv) Alkanes (using organo lithium compounds)	(10L)	Green chemistry: V. K. Ahluwalia	Power point (Online)

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT**: Chemistry **CLASS**: M.Sc. (I) SEMESTER: I **MONTH**: August

ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: derive the wave function of sp, sp^2, sp^3 hybridization, understand the concept of resonance and resonance energy, Valence Bond Theory and Molecular orbital theory, and weak forces of attraction.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II, I, **Chemical Bonding**	**1.1** Recapitulation of hybridization. Derivation of wave functions for sp, sp^2, sp^3.	3L	Principles of Inorganic Chemistry.	Google Meet
	1.2 Discussion of involvement of d orbitals in various types of hybridization, concept of resonance, resonance energy derivation.	3L	Principles of Inorganic Chemistry.	Google Meet
	1.3 Critical analysis of VBT	2L	Principles of Inorganic Chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PSNagpal

	1.4 Molecular Orbital Theory for diatomic species of first transition series	2L	Principles of Inorganic Chemistry.	Google Meet
	1.5 Molecular Orbital Theory for SF_6, CO_2, B_2H_6, I^{3-}	3L	Principles of Inorganic Chemistry.	Google Meet
	1.6 Weak forces of attraction: Hydrogen bonding – concept, types, properties, methods of detection and importance, vander waals forces, ion-dipole, dipole-dipole, London forces	2L	Principles of Inorganic Chemistry.	Google Meet

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15L

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** M.Sc. (I) **SEMESTER:** II **MONTH:** January

ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: understand the reaction mechanism of octahedral and square planar complexes, redox reactions, its mechanism and stereochemistry

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II, I, **Inorganic Reaction Mechanism**	**1.1** Rate of reactions, factors affecting the rate of reactions, techniques for determination of rate of reaction.	5L	Concise Coordination Chemistry	Google Meet
	1.2 Ligand Substitution reactions of : a) Octahedral complexes without breaking of metal ligand bond. b) Square planar complexes, trans effect, its theories and aplications.	5L	Principles of Inorganic Chemistry.	Google Meet
	1.3 Redox reactions: inner and outer sphere mechanism, complimentary and non-complimentary reactions.	3L	Concise Coordination Chemistry	Google Meet
	1.4 Stereochemistry of substitution reactions of octahedral complexes.	2L	Principles of Inorganic Chemistry.	Google Meet

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** III **MONTH:** 7th August

ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: know about ionic bond and covalent bond, resonance, hybridization, valence bond theory and molecular orbital theory, know the various instrumental methods of analysis, advantages of using instruments to make measurements, the various observable properties of a given analyte and the stimulus best suited for its analysis, know about a generalized diagram of an analytical instrument, select a suitable instrumental method for analysis, appreciate the basic terms in spectrometry, use the relationship between absorbance (and its variations) and concentration of the analyte, chose a suitable method for photometric titrations.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
I, II, **Chemical Bonding**	**2.1 Non-Directional Bonding** **2.1.1** Ionic Bond: Conditions for the Formation of Ionic Bond. **2.1.2** Types of Ionic Crystals **2.1.3** Radius Ratio Rules **2.1.4** Lattice Energy, Borne-Lande Equation **2.1.5** Kapustinski Equation **2.1.6** Born-Haber Cycle and its Application	4L	Puri, Sharma Kalia Inorganic chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PSNagpal

	2.2. Directional Bonding: Orbital Approach. **2.2.1** Covalent Bonding The Valence Bond Theory-Introduction and basic tenets. **2.2.2** Interaction between two hydrogen atoms and the Potential energy diagram of the resultant system. **2.2.3** Corrections applied to the system of two hydrogen atoms-Formation of H_2 **2.2.4** Homonuclear diatomic molecules from He_2 to Ne_2 **2.2.5** Resonance and the concept of Formal Charge; Rules for Resonance or Canonical structures. **2.2.6** Bonding in Polyatomic Species: The role of Hybridization. And types of hybrid orbitals-*sp, sp^2, sp^3, sp^2d^2, sp^2d and sp3d^2* **2.2.7** Equivalent and Non-Equivalent hybrid orbitals **2.2.8** Contribution of a given atomic orbital to the hybrid orbitals (with reference to sp^3 hybridisation as in CH_4, $NH_3$and H_2O and series like NH_3, PH_3, AsH_3, BiH_3)	6L	Puri, Sharma Kalia Inorganic chemistry.	Google Meet
	2.3 Molecular Orbital Theory **2.3.1.** Comparing Atomic Orbitals and Molecular Orbitals. **2.3.2**. Linear combination of atomic orbitals to give molecular orbitals LCAO-MO approach for diatomic homonuclear molecules. **2.3.4.** Wave mechanical treatment for molecular orbitals ($H^{2+}$and H) **2.3.4** Molecular orbital Theory and Bond Order and magnetic property: with reference to O_2,O_2^+ O_2^-,O_2^{2-}	5L	Puri ,Sharma Kalia Inorganic chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

III, III, **Basic Concepts in Instrumental methods**	**3.1.** Relation between the analyte, stimulus and measurement of change in the observable property. **3.2.** Block Diagram of an Analytical instrument. **3.3.** Types of Analytical Instrumental methods based on i) Optical interactions (e.g. Spectrometry: uv-visible, Polarimetry) ii) Electrochemical interactions (e.g. Potentiometry, Conductometry,) iii) Thermal interactions (e.g. Thermogravimetry)	3L	Instrumental Methods of Chemical Analysis	Google Meet
	3.4. Spectrometry **3.4.1.** Interaction of electromagnetic radiation with matter: Absorption and Emission spectroscopy **3.4.2.** Basic Terms: Radiant Power, Absorbance, Transmittance, Monochromatic light, Polychromatic light, Wavelength of maximum absorbance, Absorptivity and Molar Absorbtivity **3.4.3.** Statement of Beer's Law and Lambert's Law, Combined Mathematical Expression of Beer -Lambert's Law, Validity of Beer-Lambert's Law,Deviations from Beer-Lambert's Law ((Real deviations, Instrumentaldeviations and Chemical deviations) **3.4.4.** Instrumentation for absorption spectroscopy: Colorimeters and Spectrophotometers **3.4.5.** Block Diagrams for Single beam and Colorimeter, and Spectrophotometer (Principles, Construction and working-Details of Components expected i.e source ,Sample holder , Filters/Monochromators, Detectors such as Photomultiplier tube)	7L	Instrumental Methods of Chemical Analysis	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	3.4.6. Applications of UV-Visible Spectrophotometry **(02 L)** (a) Qualitative analysis such as Identification of functional groups in Organic compounds , Chromophores and Auxochrome,*cis* and *trans* isomers. (b) Quantitative analysis by Calibration curve method **3.4.7.** Photometric Titrations: Principle, Instrumentation, Types of Photometric titration Curves with examples.	2L 3L	Instrumental Methods of Chemical Analysis	Google Meet

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** IV **MONTH:** 1st January

ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: know the position of elements in periodic table, origin of color and magnetic properties of transition elements, qualitative tests of transition elements and introduction of coordination compounds, its theories, nature and applications, the use of statistical methods in chemical analysis, the nature of indeterminate errors, the randomness of such errors and its distribution around a correct or acceptable result, computation of confidence limits and confidence interval, test for rejection of doubtful result, method to draw best fitting straight line

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
I, II, **2.1 Comparative Chemistry of the transition metals**	**2.1.1** Position in the periodic table; Natural occurrence principal ores and minerals; **2.1.2** Significance of special stability of d_0, d_5 and d_{10} leading to variable oxidation states; Unusual oxidation states and their stabilities in aqueous solutions (with special reference to vanadium, and chromium.) **2.1.3** Origin of colour for transition metals and their compounds: such as reflectivity, surface coatings, particle size, packing density for metals and nature of d-orbitals, number of	9L	Puri, Sharma, Kalia Inorganic Chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PSNagpal

	electrons in the d-orbitals, geometry, and ability for charge transfer). **2.1.4** Magnetic properties of transition metal compounds: Origin of magnetism-spin and orbital motion of electrons; equation for spin only and spin-orbital magnetism in terms of Bohr magnetons (No derivation of relevant equations expected); Reasons for quenching of orbital moments. **2.1.5** Chemistry of Titanium and vanadium: properties of Oxides and chlorides; use in titrimetric analysis **2.1.6** Qualitative tests for transition metal ions: General considerations in devising tests (with reference to Chromium, Manganese, iron, Cobalt			
2.2 Coordination Chemistry	**2.2 Coordination Chemistry** **2.2.1 Introduction to Chemistry of Coordination Compounds** i. Historical perspectives: Early ideas on coordination compounds ii. Basic terms and nomenclature. iii. Types of ligands iv. Isomerism :General Types with special reference to stereoisomerism of coordination compounds (C.N=6) v. Evidence for the formation of coordination compounds, **2.2.2. Theories of coordination compounds** i. Werner's Theory of coordination compounds, ii. Effective atomic number rule. iii. Eighteen electron Rule **2.2.3. Nature of the Metal-Ligand Bond:**	6L	Puri, Sharma, Kalia Inorganic chemistry.	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

III, III- **Statistical Treatment of analytical data --II**	I Valence Bond Theory; Hybridisation of the central metal orbitals-sp^3, sd^3/d^3s, sp^3d^2/d^2sp^3, sp^2d. ii. Inner and outer orbital complexes of .(suitable examples of Mn(II), Fe(II),Fe(III),Co(II)/Co(III),Ni(II), Cu(II) Zn(II) complexes with ligands like aqua, ammonia CN-and halides may be used) iii. Limitations of V.B.T **2.2.4.** Application of coordination compounds.			
	3.1.**Nature of Indeterminate Errors:** 3.1.1. The true and acceptable value of a result of analysis 3.1.2. Measures of central tendency: mean, median. mode, average 3.1.3. Measures of dispersion: Absolute deviation, relative deviation, relative average deviation, standard deviation,(s, sigma) variance, coefficient of variation	3L	Modern Analytical Chemistry , David Harvey (page numbers 53 -84)	Google Meet
	3.2.Distribution of random errors: 3.2.1. Gaussian distribution curve. 3.2.2. Equation and salient features of Gaussian distribution curve **3.3.Concept of Confidence limits and confidence interval and its computation using** (i) Population standard deviation (ii) Student's *t* test (iii) Range **3.4.Criteria for rejection of doubtful result** (i) 2.5 d rule (ii) 4.0 d rule	2L 3L 2L	Modern Analytical Chemistry , David Harvey (page numbers 53 -84)	Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	(iii) Q test **3.5.Test of Significance (02 L)** (i) Null hypothesis (ii) F-test (variance ratio test) **3.6. Graphical representation of data and obtaining best fitting straight line (03 L)** (a) For line passing through origin (b) For line not passing through origin	2L 3L

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:Dr. Arti Dubey DEPARTMENT: Chemistry CLASS: F.Y.B.Sc. SEMESTER: I MONTH: From 7-8-2020 To 31-12-2020

ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S: The learners will be able to : To gain knowledge about the Nomenclature mono and bi-functional aliphatic compounds . To understand Bonding and Structure of organic compounds .To study the Fundamentals of organic reaction mechanism: To learn Electronic Effects and bond fission.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED	
Paper-I (General Chemistry) Unit III	**3. Basics of Organic Chemistry** **3.1 Classification and Nomenclature of Organic Compounds:** Review of basic rules of IUPAC nomenclature. Nomenclature of mono and bi-functional aliphatic compounds on the basis of priority order of the following classes of compounds:	**(5L)**	Text Book, Reference Book, You tube video	Google classroom ,Google slide Jamboard, Canva chrome

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: M.Sc. PART-II, ORGANIC CHEMISTRY SEMESTER: III MONTH: August 2020 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand importance of organosilicons, organoboron and organotin compounds in organic synthesis.
Study application of mercury, selenium in organic synthesis.
Study application of silyl enol ethers in organic synthesis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-II, Synthetic Organic Chemistry-I **UNIT-IV, Metals / Non-metals in organic synthesis**	Mercury in organic synthesis: Mechanism and regiochemistry of oxymercuration and demercuration of alkenes, mercuration of aromatics, transformation of aryl mercurials to aryl halides. Organomercurials as carbene transfer reagents.	03	Advanced Organic Chemistry: Reaction Mechanism, R. Bruckner, Academic Press	Online google classroom, google meet and ppt.
	Organoboron compounds: Mechanism and regiochemistry of hydroboration of alkenes and alkynes, asymmetric hydroboration using chiral boron reagents, 9-BBN hydroboration, oxazaborolidine (CBS catalyst) and functional group reduction by diborane.	03	Organic Chemistry, Clayden Greeves Warren and Wothers,	Online google classroom, google meet and ppt.
	Organosilicons: Salient features of silicon governing the reactivity of organosilicons, preparation and important bond-forming reactions of alkyl silanes, alkenyl silanes, aryl silanes	03	Modern Methods of Organic Synthesis, 4th	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	and allyl silanes. β-silyl cations as intermediates. Iodotrimethylsilane in organic synthesis.		Edition, W. Carruthers and Iain Coldham,.	
	Silyl enol ethers: Application: As nucleophiles (Michael reaction, Mukaiyama aldol reaction), in ring contraction reactions.	02	Moder Organic Synthesis: An Introduction, G.S. Zweifel and M.H. Nantz,	Online google classroom, google meet and ppt.
	Organotin compounds: Preparation of alkenyl and allyl tin compounds; application in C-C bond formation, in replacement of halogen by H at the same C atom. Selenium in organic synthesis: Preparation of selenols/selenoxide, selenoxide elimination to create unsaturation, selenoxide and seleno acetals as α-C-H activating groups	04	Advanced Organic Chemistry, Part A and Part B: Reaction and Synthesis, Francis A. Carey, Richard J. Sundberg,	Online google classroom, google meet and ppt.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: T.Y.B.Sc. SEMESTER: VI MONTH: January 2021 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

Study polymers, their classification, stereochemistry and applications.
Understand concept of biodegradable polymers
Learn catalysts and reagents with respect to functional group transformations and selectivity.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-III, Organic Chemistry **UNIT-IV, Polymer, Catalysts and Reagents**	Terms; monomer, polymer, homopolymer, copolymer, thermo plastics and thermosets. Addition polymers: polyethylene, polypropylene, teflon, polystyrene, PVC, Uses. Condensation polymers: polyesters, polyamides, polyurethanes, polycarbonates, phenol formaldehyde resins.Uses	03	Textbook, Himalaya publication	Online google classroom, google meet and ppt.
	Stereochemistry of polymers: Tacticity, mechanism of stereochemical control of polymerization using Ziegler Natta catalysts. Natural and synthetic rubbers: Polymerisation of isoprene: 1,2 and 1,4 addition (cis and trans), Styrene butadiene copolymer. Additives to polymers: Plasticisers, stabilizers and fillers.	03	Polymer science – a text book by Ahluwalia and Mishra	Online google classroom, google meet and ppt.
	Biodegradable polymers: Classification and uses. polylactic acid structure, properties and use for packaging and medical purposes.,	02	Textbook, Himalaya publication	Online google classroom, google meet and ppt.
	Catalysts for hydrogenation: a. Raney Nickel b. Pt and PtO_2 (C=C, CN, NO_2, aromatic ring)	04	Oranic chemistry by Carey and Sundberg, Part A	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	c. Pd/C : C=C, COCl→CHO (Rosenmund) d. Lindlar catalyst: alkynes,		& B	
	Reagents: a. $LiAlH_4$ (reduction of CO, COOR, CN,NO_2) b. $NaBH_4$ (reduction of CO) c. SeO_2 (Oxidation of CH_2 alpha to CO) d. mCPBA (epoxidation of C=C) e. NBS (allylic and benzylic bromination)	03	Organic chemistry by Morrision and Boyd,7th edition	Online google classroom, google meet and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV DEPARTMENT: CHEMISTRY

CLASS: T.Y.B.Sc. SEMESTER: VI MONTH: January 2021 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

Study classification of dyes based on chemical constitution and and synthesis of selected dyes.
Get a brief idea of health and environmental hazards of synthetic dyes and their remediation processes.
Get a brief idea of impact of the textile and leather dye industry on the environment and effluent treatment strategies.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Drugs and Dyes,	Classification of Dyes, Nitro Dye: Naphthol Yellow S Nitroso Dye: Gambine Y, Azo dyes,	03	Textbook, Himalaya publication	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT-III, Classification of Dyes based on Chemical Constitution and Synthesis of Selected Dyes. Health and Environmental Hazards of Synthetic Dyes	Diphenylmethane dye: Auramine O*, Triphenylmethane dye: Diamine series: Malachite Green* Triamine series: Acid Magenta	03	Textbook, Himalaya publications	Online google classroom, google meet and ppt.
	Heterocyclic Dyes:Thiazine dyes, Azine dyes, Quinone Dyes: a) Naphthaquinone: Naphthazarin b) Anthraquinone Dyes:	03	Textbook, Seth publication	Online google classroom, google meet and ppt.
	Indigoid Dyes: Indigo* (from aniline + monochloroacetic acid) Phthalocyanine Dyes: Monastral Fast Blue B	03	Textbook, Seth publication	Online google classroom, google meet and ppt.
	Health and Environmental Hazards of Synthetic Dyes and their Remediation Processes Impact of the textile and leather dye Industry on the environment	03	Textbook, Seth publication	Online google classroom, google meet and ppt.

CLASS: _____SY BSc_____ SEMESTER: ___III_____MONTH: _____August to December_____ ACADEMIC YEAR: _2020-21_____

LEARNING OBJECTIVE/S:
The learners will be able to : On completing the learning of this unit the learner is expected to

- Know the various instrumental methods of analysis
- Advantages of using instruments to make measurements
- The various observable properties of a given analyte and the stimulus best suited for its analysis
- Know about a generalized diagram of an analytical instrument
- Select a suitable instrumental method for analysis
- Appreciate the basic terms in spectrometry
- Use the relationship between absorbance (and its variations) and concentration of the analyte.
- Chose a suitable method foe photometric titrations.

CLASS: MSc Part I SEMESTER:I MONTH: August ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to : Learn Molecular Symmetry , Group Theory and application of Group Theory

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 2 Unit II Molecular Symmetry and Group Theory	2.1. Symmetry criterion of optical activity, symmetry restrictions on dipole moment. A systematic procedure for symmetry classification of molecules.	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	Online google classroom, google meet and ppt.
	2.2. Concepts of Groups, Sub-groups, Classes of Symmetry operations, Group Multiplication Tables. Abelian and non-Abelian point groups	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter,	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	
	2.3. Representation of Groups: Matrix representation of symmetry operations, reducible and irreducible representations. The Great Orthogonality Theorem and its application in construction of character tables for point groups C2v, C3v and D2h, structure of character tables.	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	Online google classroom, google meet and ppt.
	2.4. Applications of Group Theory (a) Symmetry adapted linear combinations (SALC), symmetry aspects of MO theory, sigma bonding in ABn (Ammonia, CH4) molecule. (b) Determination of symmetry species for translations and rotations. (c) Mulliken's notations for irreducible representations. (d) Reduction of reducible representations using reduction formula. (e) Group-subgroup relationships. (f) Descent and ascent in symmetry correlation diagrams showing relationship between different groups.	6	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	Online google classroom, google meet and ppt.

NAME OF THE STAFF: _RUTUJA HEMANT SAWANT _____ DEPARTMENT: CHEMISTRY _____ CLASS: _____SYBSC (PC-CZ)_____ SEMESTER: _____3_____ MONTH: __AUG-DEC_____ ACADEMIC YEAR: _2020-2021_____

LEARNING OBJECTIVE/S:

- The learners will be able to : __TO learn the chemistry of HALOGENTED HYDROCARBON
- To study about nucleophilic substitution
- To study about reactions with ALCOHOL,PHENOL,EPOXIDE.
- TO understand different types of reagents and it's uses in reaction.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Late Shri. Vishnu Waman Thakur Charitable Trust

Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
• PAPER 1 • UNIT 3 • REACTIONS AND REACTIVITY OF HALOGENATED HYDROCARBON	Alkyl Halides-SN1,SN2,SNi, reactions, Factors affecting reactions, Aryl Halides- substitution reaction, SnAr, addition-elimination, benzyne mechanism	7	Text Book, Clayden.	Google Classroom
	Preparation using alkyl and Aryl halide, cyanide, and epoxides. Alcohols-Reaction of Aldehydes and Ketones, Acidity and reaction of alcohols	5	Text Book, Clayden	Google Classroom
	Phenols-Preparation, Physical Properties, strength of acidic nature of alcohol and phenol, Resonance stabilization of phenoixde ion, Reactions of phenol.	3	Text Book, Clayden	Google Classroom
	Epoxides-Reactivity, Ring opening, reaction with halogen halide, alcohol and Hydrogen Cyanide	3	Text Book, Clayden	Google Classroom
	In neutral or basic conditions- Ammonia, Amines, grignard reagent, alkoxide	2	Text Book, Clayden	Google Classroom

NAME OF THE STAFF: __RUTUJA HEMANT SAWANT _____ DEPARTMENT: _____CHEMISTRY _____ CLASS: _____MSC PART 1_____ SEMESTER: _____1_____ MONTH: ____JAN-FEB_____ ACADEMIC YEAR: ___2020-2021_____

LEARNING OBJECTIVE/S:

- The learners will be able to : To learn about various THERMAL METHODS.
- To differentiate between DSC and DTA.
- To learn about the instrumentation and working of different instruments
- To understand need for automation in modern life.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
• PAPER- 4 • Unit- 4 • THERMAL METHODS	Recapitulation of thermal methods, thermoanalytical methods, types of curves, TGA VS DTA, TGA-Instrumentation, working factors affecting TGA, Applications.	4	Vogal, Skoog, Instrumentation in Analytical Chemistry	Google Classroom
	DSC- Instrumentation, working, block diag, Factors affecting curve, types of DSC	4	Vogal, Skoog, Instrumentation in Analytical Chemistry	Google Classroom

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	DTA- Working, Principal, Instrumentation, Application, comparison to DSC	3	Vogal, Skoog, Instrumentation in Analytical Chemistry	Google Classroom
	Application's of DSC, Automation of Chemical Analysis- Need and Objectives of Automation, flow injections and discrete automated system	5	Vogal, Skoog, Instrumentation in Analytical Chemistry	Google Classroom
	Multiplayer films, Gas monitoring equipment, Automatic titrators and benifits	4	Vogal, Skoog, Instrumentation in Analytical Chemistry	Google Classroom

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: _____15_____

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: __RUTUJA HEMANT SAWANT _____ DEPARTMENT: ____CHEMISTRY _____ CLASS: ____FYBSC (PCM)_____ SEMESTER: ___2_____ MONTH: _JAN-MAY_____ ACADEMIC YEAR: __2020-2021_____

LEARNING OBJECTIVE/S:

- The learners will be able to : To learn about Carbon Bonding.
- To study about reaction and mechanism of various compounds

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

- To study about hydrocarbon it's , properties and reactions.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
• PAPER- 1 • UNIT- 3 • ALIPHATIC HYDROCARBON	C-C Sigma bond, Chemistry of alkanes- formation, Wurtz reaction, free radical halogenation- Wurtz fitting reactions. C-C Pi bond, formation of alkenes and alkynes, E1 and E2 reaction	4	Clayden	Google Classroom
	E1cb, Satzeff, Hoffman eliminations, Markownikoff and Anti- Markownikoff addition, Oxy and Demercuration, Hydroboration oxidation, Ozonolysis	5	Clayden	Google Classroom
	Syn-Anti Hydroxylation, 1,2 and 1,4 addition, Diels's Alder reaction, Allylic and Benzylic Bromination	3	Clayden	Google Classroom
	Propen, 1-butene, toluene, ethyl-benzene Reactions of Alkyenes- Acidic, Electrophilic, Nucleophilic Additions	3	Clayden	Google Classroom
	Hydration to form carbon compounds, Alkylation of Terminal Alkyenes	2	Clayden	Google Classroom

LEARNING OBJECTIVE/S:

- The learners will be able to : _To understand about ionic equilibria
- To understand about pH and buffer and their uses in reaction
- To learn about MOLECULAR SPECTROSCOPY
- To study about solids.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
• PAPER- 2 • UNIT- 1 • Ionic Equilibria, • Molecular Spectroscopy, • Solid State Chemistry.	Types of electrolytes, Degree of Ionization and factors affecting It, ionization constant, ionization product of water, ionization of weak acids and base, pH scale, common ion effect.	5	J. Butler, Text Book	Google Classroom
	Buffers- Types, Henderson equations for acid and base, Buffer action, Buffer capacity, Numericals	3	J. Butler, Text Book	Google Classroom
	Molecular Spectroscopy- EMR and spectrum, planks equation, absorption, emission, scattering, fluorescence, electronic.	4	C.N Banwell, Text Book	Google Classroom

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Vibrational and Rotational transition and Numericals			
	Solid State Chemistry- Types of solids, Crystal lattice, lattice points, unit cell, space lattice, lattice plan.	2	A.R WEST, Text Book	Google Classroom
	Crystallography- Law of Constancy, interfacial Angel, Law of symmetry, Law of Rational indices	3	Text Book, A.R WEST	Google Classroom

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: F.Y.B.Sc. SEMESTER: I MONTH: August 2020 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand metallic and non-metallic nature of main group elements.
Study anomalous behavior of second period elements
Study comparative chemistry of carbides, nitrides, oxides and hydroxides of group-i and group-ii elements.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Chemistry Paper-II **UNIT-II Comparative chemistry of Main Group Elements**	Metallic and non-metallic nature, oxidation states, electronegativity,	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Anomalous behaviour of second period elements, allotropy, catenation, diagonal relationship.	03	Lee, J.D. Concise Inorganic Chemistry ELBS, 1991	Online google classroom, google meet and ppt.
	Comparative chemistry of carbides, nitrides, oxides and hydroxides of group I and group II elements.	04	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Some important compounds- $NaHCO_3$, Na_2CO_3, NaCl, NaOH, CaO, $CaCO_3$	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	oxides of carbon, oxides and oxyacids of sulphur and nitrogen with respect to environmental aspects.	03		Online google classroom, google meet and ppt.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: F.Y.B.Sc. SEMESTER: I MONTH: August 2020 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand thermodynamic terms and state functions and path functions.
Study first law of thermodynamics in detail.
Study calculation of bond energy, bond dissociation energy and resonance energy from thermochemical data.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-I **UNIT-I Chemical Thermodynamics And Chemical Calculations**	Thermodynamic terms: System, surrounding, boundaries, open, closed and isolated system, intensive and extensive properties, state functions and path functions, zeroth law of thermodynamics	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	First law of thermodynamics: concept of heat (q), work (w), internal energy (U), statement of first law, enthalpy, relation between heat capacities, sign conventions, calculations of heat (q), work (w), internal energy (U), and enthalpy (H)	03	Atkins P.W. and Paula J.de, Atkin's Physical Chemistry, 10th Ed.	Online google classroom, google meet and ppt.
	Thermochemistry: Heats of reactions, standard states, enthalpy of formation of molecules, enthalpy of combustion and its applications, calculation of bond energy, bond dissociation energy and resonance energy from	04	Text book Himalaya publication	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

	thermochemical data, Kirchhoff's equation			
	Expressing concentration of solutions: Normality, molality, molarity, formality, mole fractions, weight ratio,	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	volume ratio, weight to volume ratio, ppm, ppb, millimoles, milliequivalents , Numericals.	03		Online google classroom, google meet and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: III MONTH: August 2020 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

Introduce classical methods of chemical analysis.
Appreciate the various terms and types of titrimetric analysis.
Ability to select proper titrimetric method
Appreciate the usefulness of the gravimetric method of analysis
Identify a suitable gravimetric method
Perform the required calculations involved in the analysis by titrimetry as well as gravimetry.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

PAPER-Chemistry Paper-III **UNIT-II Classical Methods of Analysis**	Titrimetric Methods, Terms involved in Titrimetric methods of analysis. Comparing volumetry and Titrimetry The Conditions suitable for titrimetry Types of titrimetry – Neutralisation (Acidimetry, alkalimetry), Redox, Iodometry, Iodimetry.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Precipitation and Complexometric titrations and indicators used in these titrations, Tools of Titrimetry: Graduated glasswares and Callibration, Standard solutions (Primary and Secondary standards in Titrimetry) and Calculations in Titrimetry.	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Concept of pH and its importance in Neutralisation Titrations End point and Equivalence point of Neutralisation titrations Determination of End point by using i. Indicators causing colour change ii. Change in potential, (by potentiometry) iii.Change in conductance (by conductometry). Construction of titration curve (on the basis of change in pH)of a titration.	04	Skoog et al. Fundamentals of Analytical chemistry Cengage Learning, Eight Edition, chapter 13, 14 and 15	Online google classroom, google meet and ppt.
	Types of Gravimetric Methods – Precipitation Gravimetry: i. Steps involved in precipitation gravimetry analysis	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Conditions for precipitation iii. Completion of precipitation, iv. Role of Digestion, Filtration, Washing, Drying Ignition of precipitate.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Applications of Gravimetric Analysis: Determination of sulfur in organic compounds; Estimation of Nickel in Cu-Ni alloy using dimethyl glyoxime; Determination of Aluminum by converting it to its oxide.	03		Online google classroom, google meet and ppt.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: III MONTH: August 2020 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

To describe the reactions of halogenated and oxygenated organic compounds of aliphatic and aromatic hydrocarbons
To predict the reactivity and stereochemistry of halogenated and oxygenated organic compounds

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-I **UNIT-III Alkyl And Aryl Halides and Compounds Containing Oxygen - Alcohols, Phenols,**	Haloalkanes i. Nucleohilic substitution: SN1, SN2 & SNi, Mechanism and Stereochemistry ii. Factors affecting nucleophilic substitution: Substrate, Solvent, Reagent, Leaving group	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Haloarenes i. Reactivity of aryl halides towards nucleophilic substitution ii. Mechanism of nucleophilic aromatic substitution: Addition-Elimination (SNAr); Elimination-Addition (Benzyne)	03	Text book Seth publication	Online google classroom, google meet and ppt.
	Alcohols & phenols i. Physical properties: Hydrogen bonding (types); effect of Hbonding on properties (o- & p-nitrophenol); comparison of acidity of alcohols & phenols; acidity of substituted phenols ii. Preparation & of alcohols: industrial preparation (fermentation); hydration of alkenes; hydrolysis of alkyl halides	03	Morrison, R. T.; Boyd, R. N. (2012). *Organic Chemistry*. Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

Ethers, & Epoxides	iii. Reactions of alcohols- with sodium, HX (Lucas test), esterification, Oppenaeur oxidation iv. Preparation of phenol- cumene hydroperoxide method v. Reactions of phenols: O-alkylation & O-acylation; Schotten-Baumen reaction, Fries rearrangement, Claisen rearrangement	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Ethers & Epoxides i. Preparation of ethers - Williamson's synthesis ii. Reaction of ethers - cleavage of ethers with HI iii. Preparation of epoxides- peroxyacids (m-CPBA)	02	Text book Himalaya publication	Online google classroom, google meet and ppt.
	iv. Reactivity & reactions of epoxides- ring opening reactions in acidic (HX, ROH, HCN), basic & neutral conditions (NH3, RMgX & RO-) with reference to regioselectivity	03		Online google classroom, google meet and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: III MONTH: August 2020 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

To study different types of complex chemical reactions and their reaction rates.
To learn the role of different phases in solution equilibrium system.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

PAPER-Chemistry Paper-II **UNIT-I Kinetics and Phase equilibria of solutions**	Types of Complex Chemical reactions i. Reversible or opposing reactions ii. Consecutive reactions iii. Parallel reactions (Derivations not expected) iv. Thermal chain reactions: H and Br reaction. (Kinetic expression not expected).	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Effect of temperature on the rate of reaction i. Arrhenius equation and its derivation ii. Concept of energy of activation (Ea). (Numerical expected) Theories of reaction rates i. Collision theory of unimolecular reaction(Lindemann's approach) and bimolecular reaction ii. Activated complex theory of bimolecular reactions iii. Comparison of the two theories (Qualitative treatment only)	03	Atkins P. W., and Paula J. De, *Physical Chemistry*, 10th ed., Oxford University, 12 press (2014).	Online google classroom, google meet and ppt.
	Phase rule & terms involved b) Liquid –liquid mixtures- classification i. Completely miscible liquids ii. Ideal solutions and Raoult's law iii. Deviations from Raoult's law –non-ideal solutions iv. Vapour pressure: composition and temperature; Composition curves of ideal and non-ideal solutions, Numericals	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Partial miscibility of liquids i. Classification on the basis of Critical solution temperature ii. Effect of impurity on partial miscibility of liquids iii. Partially Miscible Liquids with Upper Critical Solution Temperature (Phenol-Water System) iv. Partially Miscible Liquids with Lower Critical Solution Temperature (Triethylamine-Water System)	03	Text book Himalaya publication	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF Sradhay.

SIGNATURE OF THE H.O.D.

	v. Partially Miscible Liquids with Upper and Lower Critical Solution Temperature (Nicotine-Water System)			
	Immiscibility of liquids: Principle of steam distillation (Numerical expected) e) Nernst distribution law and its applications i. Solvent extraction – method	03	Text book Himalaya publication	Online google classroom, google meet and ppt.

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: January 2021 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

To study nomenclature, structure and physical properties, acidity of carboxylic acids.
To predict the reactivity, nomenclature, and preparation of aromatic sulphonic acids.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER Chemistry Paper-I **UNIT-III**	Nomenclature, structure and physical properties, acidity of carboxylic acids, effects of substituents on acid strength of aliphatic and aromatic carboxylic acids. Preparation of carboxylic acids: oxidation of alcohols and alkyl benzene, carbonation of Grignard and hydrolysis of nitriles.	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Reactions: Acidity, salt formation, decarboxylation, Reduction of carboxylic acids with $LiAlH_4$, diborane, Hell-Volhard-Zelinsky reaction,Conversion of carboxylic acid to acid chlorides, esters, amides and acid anhydrides and their relative reactivity.	04	Text book Seth publication	Online google classroom, google meet and ppt.
	Mechanism of nucleophilic acyl substitution and acid-catalysed nucleophilic acyl substitution. Interconversion of acid derivatives by nucleophilic acyl substitution. Mechanism of Claisen condensation and Dieckmann condensation.	04	Morrison, R. T.; Boyd, R. N. (2012). *Organic Chemistry*. Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

	Nomenclature, preparation of aromatic sulphonic acids by sulphonation of benzene (with mechanism), toluene and naphthalene, Reactions: Acidity of arene sulfonic acid,	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Comparative acidity of carboxylic acid and sulfonic acids. Salt formation, desulphonation.Reaction with alcohol, phosphorous pentachloride, IPSO substitution.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: January 2021 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

To study different Types of catalysis, catalytic activity, specificity and selectivity.
To learn Recapitulation of laws of crystallography and types of crystals

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Chemistry Paper-II **UNIT-I Solid State And Catalysis**	laws of crystallography and types of crystals Characteristics of simple cubic, face centered cubic and body centered cubic systems, interplanar distance in cubic lattice	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Use of X-rays in the study of crystal structure, Bragg's equation (derivation expected), X-rays diffraction method of studying crystal lattice structure, structure of NaCl and KCl. Determination of Avogadro's number, Numericals.	04	Atkins P. W., and Paula J. De, *Physical Chemistry*, 10th ed., Oxford	Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

			University, 12 press (2014).	
	Types of catalysis, catalytic activity, specificity and selectivity, inhibitors, catalyst poisoning and deactivation	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Mechanisms and kinetics of acid-base catalyzed reactions, effect of pH. Mechanisms and kinetics of enzyme catalyzed reactions (Michaelis-Menten equation)	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Effect of particle size and efficiency of nanoparticles as catalyst.	02	Text book Himalaya publication	Online google classroom, google meet and ppt.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: January 2021 ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

Expected to appreciate the nature of interaction between applied electrical potential and the concentration of the analyte.

SIGNATURE OF THE STAFF SJadhav. **SIGNATURE OF THE H.O.D.**

The nature of chemical reactions that influence potential of a given cell.
Familiar with the various types of electrodes or half cells.
Appreciate the nature, need and importance of pH.
Expected to know the applications of the various instrumental methods dealt with in this unit.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-Chemistry Paper-III **UNIT-II Instrumental Methods-II**	Instruments based on the electrochemical properties of the analytes Potentiometry: Principle, Role of Reference and indicator electrodes	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Applications in Neutralisation reactions with reference to the titration of a Strong acid against a Strong Base (using quinhydrone electrode, Graphical methods for detection of end points.	02	Text book Seth publication	Online google classroom, google meet and ppt.
	pHmetry: Principle Types of pH meters.	02	Principles of Instrumental analysis, D. A. Skoog, 3rd Edition, Chapters: 20, 23	Online google classroom, google meet and ppt.
	Construction Working and Care of Combined Glass electrode Applications in Titrimetry (Strtong acid-Strong Base) biological and environmental analysis	02	Text book Seth publication	Online google classroom, google meet and ppt.
	Conductometry: Principle , Conductivity cell its construction and care.	03	Text book Himalaya publication	Online google classroom, google meet and ppt.
	Applications in Neutralisation Titrimetry with respect to i. Strong Acid-Strong Base ii. Strong Acid-Weak Base iii. Strong Base-weak Acid iv. Weak Acid- Weak Base.	03		Online google classroom, google meet and ppt.

SIGNATURE OF THE STAFF Sradhay.

SIGNATURE OF THE H.O.D.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MISS. SHEETAL ANIL JAISWAL DEPARTMENT: CHEMISTRY

CLASS: F.Y. BSC CBZ'A' SEMESTER: SEM-I MONTH: AUGUST TO DECEMBER ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to: 1.The Students will able to understand the basic concept of stereochemistry and 3D arrangement of atoms and groups in space.

2. The Students will able to know that how optical property of any organic compound is responsible for change in it's physical and chemical properties.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Unit-III Stereochemistry-I	3.1 Introduction of Projection Formulae and their inter conversions	02	Himalaya Publication textbook	Google meet, Google classroom and Presentation
	3.2 Geometrical Isomerism in alkenes and cycloalkanes	02		Google meet, Google classroom and Presentation
	3.3 Optical isomerism	06		Google meet, Google classroom and Presentation
	3.4 Relative and Absolute configuration	02		Google meet, Google classroom and Presentation
	3.5 Conformation analysis of alkanes	03		Google meet, Google classroom and Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Tanvi .A. Raul DEPARTMENT: Chemistry

CLASS: F.Y.B.sc (CBZ-A & B) SEMESTER: I MONTH: AUGUST TO DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

Develop the knowledge about chemical kinetics and liquid state.

To develop the understanding about order of reactions and different instruments used to measure different properties of liquids.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II Unit I	**1.1 Chemical Kinetics** Rate of reaction, rate constant, measurement of reaction rates, order and molecularity of reaction, integrated rate equation of first and second order reactions (with equal initial concentration of reactants) (Numericals expected) Determination of order of reaction by (a) Integration method (b) Graphical method (c) Ostwald's isolation method (d) Half time method (Numericals expected) **1.2 Liquid State** Surface tension: Introduction, methods of determination of surface tension by drop number method (Numericals expected)	8 7	Himalaya Publication F.Y.B.sc, Physical chemistry Textbook	Google meet and google classroom

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Viscosity: Introduction, coefficient of viscosity, relative viscosity, specific viscosity, reduced viscosity, determination of viscosity by Ostwald viscometer (Numericals expected) Refractive index: Introduction, molar refraction and polarizability, determination of refractive index by Abbe's refractometer (Numerical s expected) Liquid crystals: Introduction, classification and structure of thermotropic phases (Nematic, smectic and cholesteric phases), applications of liquid crystals :			

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: TANVI A. RAUL DEPARTMENT: CHEMISTRY

CLASS: F.Y.B.sc (CBZ-A&B) SEMESTER: II MONTH: JANUARY TO MAY ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

To develop knowledge about Ionic Equilibria, Solid state and Molecular spectroscopy.

To develop understanding about different types of electrolytes and electromagnetic waves.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II Unit I	**1.1 Ionic Equilibria** Strong, moderate and weak electrolytes, degree of ionization, factors affecting degree of ionization, ionization constant and ionic product of water, ionization of weak acids and bases, pH scale, common ion effect, dissociation constants of mono di and triprotic acid (exact treatment for monoprotic acid) Buffers: Introduction, types of buffers, derivation of Henderson equation for acidic and basic buffers, buffer action, buffer capacity (Numericals expected)	7	Himalaya Publication F.Y.B.sc, Physical chemistry Textbook	Google meet and google classroom
	1.2 Molecular Spectroscopy Electromagnetic radiation, electromagnetic spectrum, Planck's equation, interaction of electromagnetic radiation with matter: Absorption, emission, scattering, flourescence, electronic, vibrational and rotational transitions Beer Lambert's law (Numericals expected)	4		
	1.3 Solid State Chemistry Types of solids, crystal lattice, lattice points, unit cell, space lattice and lattice plane, laws of crystallography: Law of constancy of interfacial angle, law of symmetry and law of	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	rational indices (Numericals expected)

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF : DIPIKA CHORGHE DEPARTMENT: CHEMISTRY

CLASS: T.Y.BSc. SEMESTER: VI MONTH: DECEMBER/JANUARY ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S: To study quantum chemistry
The learners will be able to: Understand the concept of quantum chemistry and to solve Numericals based on it.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- 1 UNIT – III BASICS OF QUANTUM CHEMISTRY	Introduction, basics of quantum chemistry, black body radiation, Compton effect	3L	R.K.Prasad	Chalk -board
	Quantum mechanics, postulates ,Progressive and standing waves, interpretation and properties of wave function	4L	R.K.Prasad	Chalk -board
	State function and significance, operator concept, algebra, eigen value, Numericals	3L	R.K.Prasad	Chalk -board
	Renewable energy sources, solar energy, Silicon solar cell	3L	Ira Levine	Chalk -board
	Hydrogen: fuel of the future, production of hydrogen fuel, advantages.	2L	Ira Levine	Chalk -board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR** DEPARTMENT: CHEMISTRY CLASS: FYBSc

SEMESTER: I MONTH: July to September ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

i. Understand the basics of Organic Chemistry

ii. Understand and be well versed with the nomenclature of various functional groups

iii. Learn bonding, formation and reactions of organic compounds

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-I U-III Basics of Organic Chemistry	Classification and Nomenclature of Organic Compounds: Review of basic rules of IUPAC nomenclature. Nomenclature of mono and bi-functional aliphatic compounds on the basis of priority order of the following classes of compounds: alkanes, alkenes, alkynes, haloalkanes, alcohols, ethers, aldehydes, ketones, carboxylic acids, carboxylic acid derivatives (acid halides, esters, anhydrides, amides), nitro compounds, nitriles and amines; including their cyclic analogues.	(5L)	Morrison and Boyd Organic Chemistry Mc Murry, J.E. Fundamentals of Organic Chemistry	Chalk and Board
	Bonding and Structure of organic compounds:	(4L)		Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Hybridization: sp3, sp2, sp hybridization of carbon and nitrogen; sp3 and sp2 hybridizations of oxygen in Organic compounds (alcohol, ether, aldehyde, ketone, carboxylic acid, ester, cyanide, amine and amide) Overlap of atomic orbitals: Overlaps of atomic orbitals to form sigma and pi bonds, shapes of organic molecules. Shapes of molecules; Influence of hybridization on bond properties (as applicable to ethane, ethene, ethyne)			
	Fundamentals of organic reaction mechanism: Electronic Effects: Inductive, electromeric, resonance and mesomeric effects, hyperconjugation and their applications; Dipole moment; Organic acids and bases; their relative strengths. Bond fission: Homolytic and Heterolytic fission with suitable examples. Electrophiles and Nucleophiles; Nucleophilicity and basicity; Types (primary, secondary, tertiary, allyl, benzyl), shape and their relative stability of reactive intermediates: Carbocations, Carbanions and Free radicals. Introduction to types of organic reactions: Addition, Elimination and Substitution reaction.	(6L)		Chalk and Board

SEMESTER: V MONTH: July to September ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

i. Understand the mechanisms of important reactions

ii. Understand the important concept of green chemistry and apply it.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-III (Organic Chemistry) Unit II 2.1 Stereochemistry I	2.1.1 Molecular chirality and elements of symmetry: Mirror plane symmetry, inversion center, roation -reflection (alternating) axis. 2.1.2 Chirality of compounds without a stereo genic center: cummulenes and biphenyls.	(5 L)	Stereochemistry P.S.Kalsi	Chalk and Board
2.2 Agrochemicals	2.2.1 General introduction & scope, meaning & examples of insecticides, herbicides, fungicide, rodenticide, pesticides, plant growth regulators. 2.2.2 Advantages & disadvantages of agrochemicals 2.2.3 Synthesis & application of IAA (Indole Acetic Acid) & Endosulphan, 2.2.4 Bio pesticides – Neem oil & Karanj oil.	(4 L)	Agrochemicals and pesticides: A.Jadhav and T.V.Sathe	Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

2.3 Heterocyclic chemistry:	2.3.1 Reactivity of pyridine-N-oxide, quinoline and iso-quionoline. 2.3.2 Preparation of pyridine-N-oxide, quinoline (Skraup synthesis) and iso-quinoline (BischlerNapieralski synthesis). 2.3.3 Reactions of pyridine-N-oxide: halogenation, nitration and reaction with NaNH2/liq.NH3, n-BuLi. 2.3.4 Reactions of quinoline and isoquinoline; oxidation,reduction,nitration,halogenation and reaction with NaNH2/liq.NH3,n-BuLi.	(6 L)	Heterocyclic Chemistry, John A. Joule and Keith Mills, Wiley	Chalk and Board
Unit III 3.1 IUPAC	IUPAC Systematic nomenclature of the following classes of compounds (including compounds upto two substituents / functional groups): 3.1.1 Bicyclic compounds – spiro, fused and bridged (upto 11 carbon atoms) – saturated and unsaturated compounds. 3.1.2 Biphenyls 3.1.3 Cummulenes with upto 3 double bonds 3.1.4 Quinolines and isoquinolines.	(5 L)	IUPAC nomenclature by S.C.Pal.	Chalk and Board
3.2 Synthesis of organic compounds	3.2.1 Introduction: Linear and convergent synthesis, criteria for an ideal synthesis, concept of chemo selectivity and regioselectivity with examples, calculation of yields 3.2.2 Multicomponent Synthesis: Mannich reaction and Biginelli reaction. Synthesis with examples (no mechanism) 3.2.3 Green chemistry and synthesis: Introduction: Twelve principles of green chemistry, concept of atom economy and E-factor, calculations and their significance, numerical examples. i) Green reagents: dimethyl carbonate. ii) Green starting materials : D-glucose iii) Green solvents : supercritical CO2 iv) Green catalysts: Bio catalysts. 3.2.4 Planning of organic synthesis i) synthesis of nitroanilines. (o&p) ii) synthesis of halobenzoic acid.(o&p) iii) Alcohols (primary / secondary / tertiary) using Grignard reagents. iv) Alkanes (using organo lithium compounds)	(10L)	Green chemistry: V. K. Ahluwalia	PowerPoint presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT**: Chemistry **CLASS**: M.Sc. (I) SEMESTER: I **MONTH**: August

ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: derive the wave function of sp, sp^2, sp^3 hybridization, understand concept of resonance and resonance energy, Valence Bond Theory and Molecular orbital theory, weak forces of attraction.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II, I, **Chemical Bonding**	**1.1** Recapitulation of hybridization. Derivation of wave functions for sp, sp^2, sp^3.	3L	Principles of Inorganic Chemistry.	White Board and marker
	1.2 Discussion of involvement of d orbitals in various types of hybridization, concept of resonance, resonance energy derivation.	3L	Principles of Inorganic Chemistry.	White Board and marker
	1.3 Critical analysis of VBT	2L	Principles of Inorganic Chemistry.	White Board and marker

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

	1.4 Molecular Orbital Theory for diatomic species of first transition series	2L	Principles of Inorganic Chemistry.	White Board and Marker
	1.5 Molecular Orbital Theory for SF_6, CO_2, B_2H_6, I^{3-}	3L	Principles of Inorganic Chemistry.	White Board and marker
	1.6 Weak forces of attraction: Hydrogen bonding – concept, types, properties, methods of detection and importance, vander waals forces, ion-dipole, dipole-dipole, London forces	2L	Principles of Inorganic Chemistry.	White Board and Marker

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15L

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** T.Y.B.Sc. **SEMESTER:** V **MONTH:** June

ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: understand the chemistry of non-aqueous solvents, comparative study of group 16 and 17.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II, IV, Some Special Topics	**4.1 Chemistry of Non-aqueous Solvents** **4.1.1** Classification of solvents and importance of non-aqueous solvents. **4.1.2** Characteristics and study of liquid ammonia, dinitrogen tetra oxide as non-aqueous solvents with respect to: (i) acid-base reactions and (ii) redox reactions.	5L	J. D. Lee, Concise Inorganic Chemistry	Black Board and Chalk
	4.2 Comparative Chemistry of Group 16 **4.2.1** Electronic configurations, trends in physical properties, allotropy. **4.2.2** Manufacture of sulphuric acid by Contact process.	5L	J. D. Lee, Concise Inorganic Chemistry	Black Board and Chalk
	4.3 Comparative Chemistry of Group 17 **4.3.1** Electronic configuration, General characteristics, anamolous properties of fluorine, comparative study of acidity of oxyacids of chlorine w.r.t acidity, oxidising properties and structures (on the basis of VSEPR theory).	5L	J. D. Lee, Concise Inorganic Chemistry	Black Board and Chalk

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

	4.3.2 Chemistry of interhalogens with reference to preparations, properties and structures (on the basis of VSEPR theory).			

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15L

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** T.Y.B.Sc. SEMESTER: VI **MONTH:** October

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** III **MONTH:** July

ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: know about ionic bond and covalent bond, resonance, hybridization, valence bond theory and molecular orbital theory, know the various instrumental methods of analysis, advantages of using instruments to make measurements, the various observable properties of a given analyte and the stimulus best suited for its analysis, know about a generalized diagram of an analytical instrument, select a suitable instrumental method for analysis, appreciate

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

the basic terms in spectrometry, use the relationship between absorbance (and its variations) and concentration of the analyte, chose a suitable method for photometric titrations.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
I, II, **Chemical Bonding**	**2.1 Non-Directional Bonding** **2.1.1** Ionic Bond: Conditions for the Formation of Ionic Bond. **2.1.2** Types of Ionic Crystals **2.1.3** Radius Ratio Rules **2.1.4** Lattice Energy, Borne-Lande Equation **2.1.5** Kapustinski Equation **2.1.6** Born-Haber Cycle and its Application	4L	Puri, Sharma Kalia Inorganic chemistry.	Black Board and Chalk
	2.2. Directional Bonding: Orbital Approach. **2.2.1** Covalent Bonding The Valence Bond Theory-Introduction and basic tenets. **2.2.2** Interaction between two hydrogen atoms and the Potential energy diagram of the resultant system. **2.2.3** Corrections applied to the system of two hydrogen atoms-Formation of H_2 **2.2.4** Homonuclear diatomic molecules from He_2 to Ne_2 **2.2.5** Resonance and the concept of Formal Charge; Rules for Resonance or Canonical structures. **2.2.6** Bonding in Polyatomic Species: The role of Hybridization. And types of hybrid orbitals-*sp, sp^2, sp^3, sp^2d^2, sp^2d and sp3d^2*	6L	Puri, Sharma Kalia Inorganic chemistry.	Black Board and Chalk

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

	2.2.7 Equivalent and Non-Equivalent hybrid orbitals **2.2.8** Contribution of a given atomic orbital to the hybrid orbitals (with reference to sp^3 hybridisation as in CH_4, $NH_3$and H_2O and series like NH_3, PH_3, AsH_3, BiH_3)			
	2.3 Molecular Orbital Theory **2.3.1.** Comparing Atomic Orbitals and Molecular Orbitals. **2.3.2**. Linear combination of atomic orbitals to give molecular orbitals LCAO-MO approach for diatomic homonuclear molecules. **2.3.4.** Wave mechanical treatment for molecular orbitals ($H^{2+}$and H) **2.3.4** Molecular orbital Theory and Bond Order and magnetic property: with reference to O_2,O_2^+ O_2^-,O_2^{2-}	5L	Puri ,Sharma Kalia Inorganic chemistry.	Black Board and Chalk
III, III, **Basic Concepts in Instrumental methods**	**3.1.** Relation between the analyte, stimulus and measurement of change in the observable property. **3.2.** Block Diagram of an Analytical instrument. **3.3.** Types of Analytical Instrumental methods based on i) Optical interactions (e.g. Spectrometry: uv-visible, Polarimetry) ii) Electrochemical interactions (e.g. Potentiometry, Conductometry,) iii) Thermal interactions (e.g. Thermogravimetry)	3L	Instrumental Methods of Chemical Analysis	Black Board and Chalk
	3.4. Spectrometry **3.4.1.** Interaction of electromagnetic radiation with matter: Absorption and Emission spectroscopy	7L		

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

	3.4.2. Basic Terms: Radiant Power, Absorbance, Transmittance, Monochromatic light, Polychromatic light, Wavelength of maximum absorbance, Absorptivity and Molar Absorbtivity **3.4.3.** Statement of Beer's Law and Lambert's Law, Combined Mathematical Expression of Beer -Lambert's Law, Validity of Beer-Lambert's Law,Deviations from Beer-Lambert's Law ((Real deviations, Instrumentaldeviations and Chemical deviations) **3.4.4.** Instrumentation for absorption spectroscopy: Colorimeters and Spectrophotometers **3.4.5.** Block Diagrams for Single beam and Colorimeter, and Spectrophotometer (Principles, Construction and working-Details of Components expected i.e source ,Sample holder , Filters/Monochromators, Detectors such as Photomultiplier tube)		Instrumental Methods of Chemical Analysis	BlackBoard and Chalk
	3.4.6. Applications of UV-Visible Spectrophotometry **(02 L)** (a) Qualitative analysis such as Identification of functional groups in Organic compounds , Chromophores and Auxochrome,*cis* and *trans* isomers. (b) Quantitative analysis by Calibration curve method **3.4.7.** Photometric Titrations: Principle, Instrumentation, Types of Photometric titration Curves with examples.	2L 3L	Instrumental Methods of Chemical Analysis	Black Board and Chalk

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** IV **MONTH:** October

ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: know the position of elements in periodic table, origin of color and magnetic properties of transition elements, qualitative tests of transition elements and introduction of coordination compounds, its theories, nature and applications, the use of statistical methods in chemical analysis, the nature of indeterminate errors, the randomness of such errors and its distribution around a correct or acceptable result, computation of confidence limits and confidence interval, test for rejection of doubtful result, method to draw best fitting straight line

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

I, II, **2.1 Comparative Chemistry of the transition metals**	**2.1.1** Position in the periodic table; Natural occurrence principal ores and minerals; **2.1.2** Significance of special stability of d_0, d_5 and d_{10} leading to variable oxidation states; Unusual oxidation states and their stabilities in aqueous solutions (with special reference to vanadium, and chromium.) **2.1.3** Origin of colour for transition metals and their compounds: such as reflectivity, surface coatings, particle size, packing density for metals and nature of d-orbitals, number of electrons in the d-orbitals, geometry, and ability for charge transfer). **2.1.4** Magnetic properties of transition metal compounds: Origin of magnetism-spin and orbital motion of electrons; equation for spin only and spin-orbital magnetism in terms of Bohr magnetons (No derivation of relevant equations expected); Reasons for quenching of orbital moments. **2.1.5** Chemistry of Titanium and vanadium: properties of Oxides and chlorides; use in titrimetric analysis **2.1.6** Qualitative tests for transition metal ions: General considerations in devising tests (with reference to Chromium, Manganese, iron, Cobalt	9L	Puri, Sharma, Kalia Inorganic Chemistry.	Black Board and Chalk
2.2 Coordination Chemistry	**2.2 Coordination Chemistry** **2.2.1 Introduction to Chemistry of Coordination Compounds** i. Historical perspectives: Early ideas on coordination compounds ii. Basic terms and nomenclature.	6L	Puri, Sharma, Kalia Inorganic chemistry.	Black Board and Chalk

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

	iii. Types of ligands iv. Isomerism :General Types with special reference to stereoisomerism of coordination compounds (C.N=6) v. Evidence for the formation of coordination compounds, **2.2.2. Theories of coordination compounds** i. Werner's Theory of coordination compounds, ii. Effective atomic number rule. iii. Eighteen electron Rule **2.2.3. Nature of the Metal-Ligand Bond:** I Valence Bond Theory; Hybridisation of the central metal orbitals-sp^3, sd^3/d^3s, sp^3d^2/d^2sp^3, sp^2d. ii. Inner and outer orbital complexes of .(suitable examples of Mn(II), Fe(II),Fe(III),Co(II)/Co(III),Ni(II), Cu(II) Zn(II) complexes with ligands like aqua, ammonia CN-and halides may be used) iii. Limitations of V.B.T **2.2.4.** Application of coordination compounds.			
III, III- **Statistical Treatment of analytical data --II**	3.1.**Nature of Indeterminate Errors:** 3.1.1. The true and acceptable value of a result of analysis 3.1.2. Measures of central tendency: mean, median. mode, average 3.1.3. Measures of dispersion: Absolute deviation, relative deviation, relative average deviation, standard deviation,(s, sigma) variance, coefficient of variation	3L	Modern Analytical Chemistry , David Harvey (page numbers 53 -84)	Black Board and Chalk
	3.2.Distribution of random errors: 3.2.1. Gaussian distribution curve.	2L	Modern Analytical Chemistry , David	Black Board and Chalk

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

	3.2.2. Equation and salient features of Gaussian distribution curve **3.3.Concept of Confidence limits and confidence interval and its computation using** (i) Population standard deviation (ii) Student's *t* test (iii) Range **3.4.Criteria for rejection of doubtful result** (i) 2.5 d rule (ii) 4.0 d rule (iii) Q test **3.5.Test of Significance (02 L)** (i) Null hypothesis (ii) F-test (variance ratio test) **3.6. Graphical representation of data and obtaining best fitting straight line (03 L)** (a) For line passing through origin (b) For line not passing through origin	3L 2L 2L 3L	Harvey (page numbers 53 -84)

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:Dr. Arti Dubey DEPARTMENT:Chemistry CLASS:F.Y.B.Sc. SEMESTER: I MONTH: June-OctACADEMIC YEAR:2019-20

LEARNING OBJECTIVE/S: The learners will be able to : To gain knowledge about the Nomenclature mono and bi-functional aliphatic compounds . To understand Bonding and Structure of organic compounds . To study the Fundamentals of organic reaction mechanism:To learn Electronic Effects and bond fission.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-I (General Chemistry) Unit III 3. Basics of Organic	**3. Basics of Organic Chemistry** **3.1 Classification and Nomenclature of Organic Compounds:** Review of basic rules of IUPAC nomenclature. Nomenclature of mono and bi-functional aliphatic compounds on the basis of priority order of the following classes of compounds: alkanes, alkenes, alkynes, haloalkanes, alcohols, ethers, aldehydes, ketones, carboxylic acids, carboxylic acid derivatives (acid halides, esters, anhydrides, amides), nitrocompounds,	**(5L)**	Text Book, Reference Book, You tube video	Chalk and talk method

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Chemistry	nitriles and amines; including their cyclic analogues. **3.2 Bonding and Structure of organic compounds:** Hybridization: sp_3, sp_2, sp hybridization of carbon and nitrogen; sp_3 and sp_2 hybridizations of oxygen in Organic compounds (alcohol, ether, aldehyde, ketone, carboxylic acid, ester, cyanide, amine and amide) Overlap of atomic orbitals: Overlaps of atomic orbitals to form sigma and pi bonds, shapes of organic molecules. Shapes of molecules; Influence of hybridization on bond properties (as applicable toethane, ethene, ethyne) **3.3 Fundamentals of organic reaction mechanism:** **Electronic Effects:** Inductive, electromeric, resonance and mesomeric effects,hyperconjugation and their applications; Dipole moment; Organic acids and bases; their relative strengths. **Bond fission:** Homolytic and Heterolytic fission with suitable examples. Electrophiles and Nucleophiles; Nucleophilicity and basicity;	**(4L)** **(6L)**			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Types (primary, secondary, tertiary, allyl, benzyl), shape and their relative stability of reactive intermediates: Carbocations, Carbanions and Free radicals. **Introduction to types of organic reactions:** Addition, Elimination and Substitution reaction. (With one example of each)

NAME OF THE STAFF: Dr.Arti Dubey DEPARTMENT: Chemistry CLASS: F.Y.B.Sc. SEMESTER: I MONTH: June-Oct ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:

The learners will be able to :

- Understand basics of chemical kinetics and predict reaction mechanism.
- Calculate rate constant of zero, first and second order reaction.
- The basics of solutions, Colligative properties, and their applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II (General Chemistry) Unit-I Title-Physical	**1.1 Chemical Kinetics:** Rate of reaction, rate constant, measurement of reaction rates, order and molecularity of reaction, integrated rate equation of first and second order reactions (with equal initial concentration of reactants) (Numericals expected) Determination of order of reaction by (a) Integration method (b)	**(8L)**	Text Book, Reference Book, You tube video	Chalk and talk method

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

Chemistry	Graphical method (c)Ostwald's isolation method (d) Half time method (Numericals expected) **1.2 Liquid State:** Surface tension: Introduction, methods of determination of surface tension by drop number method (Numericals expected) Viscosity: Introduction, coefficient of viscosity, relative viscosity, specific viscosity,reduced viscosity, determination of viscosity by Ostwald viscometer (Numericals expected) Refractive index: Introduction, molar refraction and polarizability, determination of refractive index by Abbe's refractometer (Numericals expected) Liquid crystals: Introduction, classification and structure of thermotropic phases (Nematic,smectic and cholesteric phases), applications of liquid crystals	**(7L)**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:Dr.Arti Dubey DEPARTMENT: _Chemistry CLASS: S.Y.B.Sc. SEMESTER: III MONTH: June-Oct ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S: The learners will be able to : Know about Chemical Bonding, Non-Directional Bonding, Directional Bonding- Orbital approach, Molecular Orbital Theory .

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Course Title: (General Chemistry) Paper-I Unit-II Inorganic Chemistry	**Unit-II** **Chemical Bonding** **2.1 Non-Directional Bonding** 2.1.1 Ionic Bond: Conditions for the Formation of Ionic Bond. 2.1.2 Types of Ionic Crystals 2.1.3 Radius Ratio Rules 2.1.4 Lattice Energy, Borne-Lande Equation 2.1.5 Kapustinski quation 2.1.6 Born-Haber Cycle and its Application	**(4L)**	Text Book, Reference Book, You tube video	Chalk and Talk Method

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	2.2. Directional Bonding: Orbital Approach. 2.2.1 Covalent Bonding The Valence Bond Theory- Introduction and basic tenets. 2.2.2 Interaction between two hydrogen atoms and the Potential energy diagram of the resultant system. 2.2.3 Corrections applied to the system of two hydrogen atoms- Formation of H_2 2.2.4 Homonuclear diatomic molecules from He_2 to Ne_2 2.2.5 Resonance and the concept of Formal Charge; Rules for Resonance or Canonical structures. 2.2.6 Bonding in Polyatomic Species: The role of Hybridization. And types of hybrid orbitals-*sp, sp*$_2$*, sp*$_3$*, sp*$_3$*d, sp*$_2$*d*$_2$*and sp*$_2$*d sp*$_3$*d*$_2$*.* 2.2.7 Equivalent and Non-Equivalent hybrid orbitals 2.2.8 Contribution of a given atomic orbital to the hybrid orbitals (with reference to *sp*$_3$ hybridisation as in CH_4, NH_3 and H_2O and series like NH_3, PH_3, AsH_3, BiH_3)	**(6L)**		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	2.3 **Molecular Orbital Theory** 2.3.1. Comparing Atomic Orbitals and Molecular Orbitals. 2.3.2. Linear combination of atomic orbitals. to give molecular orbitals LCAO-MO approach for diatomic homonuclear molecules). 2.3.4. Wave mechanical treatment for molecular orbitals (H_2^+ and H_2) 2.3.4 Molecular orbital Theory and Bond Order and magnetic property: with reference to O_2,O_2^+ O_2^-,O_2^{2-} (Problems and numerical problems expected wherever possible)	**(5L)**

NAME OF THE STAFF: Dr.Arti Dubey DEPARTMENT: Chemistry CLASS: S.Y.B.Sc. SEMESTER: III MONTH: June-Oct ACADEMIC YEAR:2019-20

LEARNING OBJECTIVE/S: The learners will be able to :

- To gain knowledge about the Nomenclature of aliphatic, alicyclic and aromatic carbonyl compounds.
- To know about General mechanism of nucleophilic addition reaction.
- To understand the Reactions of aldehydes and ketones
- To learn common reaction mechanisms of Benzoin condensation, Knoevenagel condensation, Claisen-Schmidt and Cannizzaro reaction.
- To gain knowledge about the Keto-enol tautomerism.
- To study the Active methylene compounds.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Course Title: (General Chemistry) Paper-II	**Unit III: Organic Chemistry** **Carbonyl Compounds:** 3.1 Nomenclature of aliphatic, alicyclic and aromatic carbonyl compounds. Structure, reactivity of aldehydes and ketones and methods of preparation; Oxidation of primary and secondary	**[15L]**	Text Book, Reference Book, You tube video	Chalk and Talk Method

NAME OF THE STAFF:Dr.Arti Dubey DEPARTMENT:Chemistry CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: Nov-April ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S: The learners will be able to : To gain knowledge about the Nomenclature, Preparation and Reactions of aliphatic, and aromatic compounds. To learn common reaction and mechanisms of Salt Formation, N-acylation, N-alkylation, Hofmann's exhaustive methylation (HEM),Hofmann-elimination reaction, reaction with nitrous acid, carbylamine reaction, Electrophilic substitution in aromatic amines: bromination, nitration and sulphonation. To study about Heterocyclic Compounds.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER –II Unit III Title: Organic	**Unit III: Organic Chemistry** **Nitrogen containing compounds and heterocyclic compounds:** **3.1 Amines:** Nomenclature, effect of substituent on basicity of aliphatic and aromatic amines; 3.1.1. Preparation: Reduction ofaromaticnitro compounds using catalytic hydrogenation,chemical reduction using Fe-HCI, Sn-HCl,	**(7 L)**	Text Book, Reference Book, You tube video	Chalk and Talk Method and ICT Tool

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Chemistry	Zn-acetic acid, reduction of nitriles, ammonolysis of halides, reductive amination , Hofmann bromamide reaction. 3.1.2. Reactions- Salt Formation, N-acylation, N-alkylation, Hofmann's exhaustive methylation (HEM),Hofmann-elimination reaction, reaction with nitrous acid, carbylamine reaction, Electrophilic substitution in aromatic amines: bromination, nitration and sulphonation. **3.2 Diazonium Salts**: Preparation and their reactions/synthetic application - Sandmeyer reaction, Gattermann reaction, Gomberg reaction, Replacement of diazo group by -H,-OH. Azo coupling with phenols, naphthols and aromatic amines, reduction of diazonium salt to aryl hydrazine and hydroazobenzene **3.3 Heterocyclic Compounds:** 3.3.1. Classification, nomenclature, electronic structure, aromaticity in 5-numbered and 6-membered rings containing one heteroatom; 3.3.2. Synthesis of Furan, Pyrrole (Paal-Knorr synthesis, Knorr pyrrole synthesis, and Hantzsch synthesis), Thiophene, Pyridine	**(8 L)**		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	(Hantzsch synthesis), 3.3.3. Reactivity of furan, pyrrole and thiophene towards electrophilic substitution reactions on the basis of stability of intermediate and of pyridine on the basis of electron distribution. Reactivity of pyridine towards nucleophilic substitution on the basis of electron distribution. 3.3.4. Reactions of furan, pyrrole and thiophene: halogenation, nitration, sulphonation, Vilsmeier-Haack reaction, Friedel-Crafts reaction. Furan: Diels-Alder reaction, Ring opening. Pyrrole: Acidity and basicity of pyrrole. Comparison of basicity of pyrrole and pyrrolidine. 3.3.5. Pyridine: Basicity. Comparison of basicity of pyridine, pyrrole and piperidine. Sulphonation of pyridine (with and without catalyst), reduction and action of sodamide (Chichibabin reaction).

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:Dr.Arti Dubey DEPARTMENT: Chemistry CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: Nov-April ACADEMIC YEAR:2019-20

LEARNING OBJECTIVE/S: The learners will be able to understand :

- The importance of separation in sample treatment
- Various methods of separations
- How to select a method of separation of an analyte from the matrix
- How a solute gets distributed between two immiscible phases
- Principle of solvent extraction and various terms involved therein
- Effect of various parameters on solvent extraction of a solute
- Classification of Chromatographic methods
- Paper and thin layer chromatography and using them in practice.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

The learners will be able to:

Understand relation between color and chemical constitution, Armstrong theory, Witt's theory.
Study preparation of the dyes intermediates and its applications.
Get a brief idea of unit processes in dyes and dye intermediates.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Drugs and Dyes,	Absorption of visible light, Colour of wavelength absorbed, Complementary colour. Relation between colour and chemical constitution.	02	Textbook, Himalaya publication	Black board/ chalk and duster.
UNIT-IV, Colour and Chemical Constitution of Dyes	Armstrong theory (quinonoid theory) and its limitations. Witt's Theory, Valence Bond theory, comparative study and relation of colour,	02	Textbook, Himalaya publications	Black board/ chalk and duster.
	brief idea of Unit Processes, Introduction to primaries and intermediates, Benzenesulphonic acid; 1,3-Benzenedisulphonic acid; sulphanilic acid; o-, m-, p-chloronitrobenzenes; o-, m-, p-nitroanilines	03	Textbook, Seth publication	Black board/ chalk and duster.

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

	Preparation of the dyes Intermediates; Benzene derivatives. Schaeffer acid; Tobias acid; Naphthionic acid; N.W. acid; cleve-6-acid; H-acid; Naphthol AS	04	Textbook, Seth publication	Black board/ chalk and duster.
	Preparation of the dyes Intermediates; Naphthalene Derivative, Anthracene Derivative; 1-Nitroanthraquinone; 1-Aminoanthraquinone Anthraquinone-2-sulphonic acid; Benzanthrone.	04	Textbook, Seth publication	Black board/ chalk and duster.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV *DEPARTMENT: CHEMISTRY*

CLASS: T.Y.B.Sc. *SEMESTER: V* *MONTH: June 2019* *ACADEMIC YEAR: 2019-2020*

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand UV – Visible spectroscopy, its basic theory and applications.
Study mass spectrometry, determination of molecular formula and its applications.
Learn natural products like terpenoids, alkaloids in detail.
To gain knowledge of hormones like adrenaline.

SIGNATURE OF THE STAFF ***SIGNATURE OF THE H.O.D.***

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-III, Organic Chemistry UNIT-IV, Spectroscopy-I And Natural Products	Electromagnetic spectrum, units of wavelength and frequency, UV – Visible spectroscopy: Basic theory, solvents, nature of UV-Visible spectrum, concept of chromophore, auxochrome.	02	Introduction to spectroscopy (third edition), Pavia	Black board/ chalk and duster.
	Mass spectrometry: Basic theory. Nature of mass spectrum. General rules of fragmentation. Importance of molecular ion peak, isotopic peaks, base peak, nitrogen rule, rule of 13 for determination of empirical formula and molecular formula	03	Spectral identification of organic molecules by Silverstein.	Black board/ chalk and duster.
	Natural products: terpenoids, their introduction, isoprene rule, special isoprene rule, structural determination of citral,	04	Textbook, Himalaya publication	Black board/ chalk and duster.
	Alkaloids introduction and occurrence, structural determination of nicotine,	04	Textbook, Himalaya publication	Black board/ chalk and duster.
	Hormones: Introduction, structure of adrenaline (epinephrine), physiological action of adrenaline.	02	Organic chemistry by Morrision and Boyd,7th edition	Black board/ chalk and duster.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHAILESH GURAV *DEPARTMENT: CHEMISTRY*

CLASS: M.Sc. PART-II, ORGANIC CHEMISTRY *SEMESTER: III* *MONTH: June 2019* *ACADEMIC YEAR: 2019-2020*

LEARNING OBJECTIVE/S:
The learners will be able to:

Study role of radicals in organic synthesis and their applications in detail.
Learn generation, stability, reactivity and structural and stereochemical properties of free radicals,.
Study characteristic reactions and applications of radicals in synthesis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-II, Synthetic Organic Chemistry-I UNIT-II, Radicals in organic synthesis	Stability, reactivity and structural and stereochemical properties of free radicals, Persistent and charged radicals, Electrophilic and nucleophilic radicals. Radical Initiators: azobisisobutyronitrile (AIBN) and dibenzoyl peroxide.	04	Advanced Organic Chemistry, Part A and Part B: Reaction and Synthesis, Francis A. Carey, Richard J. Sundberg, 5th Edition,	White board/ marker pen and duster.

SIGNATURE OF THE STAFF *SIGNATURE OF THE H.O.D.*

	Characteristic reactions - free radical substitution, addition to multiple bonds. Radical chain reactions, radical halogenation of hydrocarbons (regioselectivity),radical cyclizations, autoxidations	04	Organic Chemistry, Clayden Greeves Warren and Wothers,	White board/ marker pen and duster.
	Radicals in synthesis: Inter and intra molecular C-C bond formation via mercuric hydride, tin hydride, thiol donors. Cleavage of C-X, C-Sn, C-Co, C-S, O-O bonds. Oxidative coupling, C-C bond formation in aromatics: $S_{RN}Ar$ reactions.	04	Advanced Organic Chemistry: Reaction Mechanism, R. Bruckner, Academic Press (2002).	White board/ marker pen and duster.
	Hunsdiecker reaction, Pinacol coupling, McMurry coupling, Sandmeyer reaction, Acyloin condensation.	03	Organic reactions and their mechanisms, 3rd revisededition, P.S. Kalsi, New Age International Publishers	White board/ marker pen and duster.

TEACHING PLAN (UNITPLAN)

NAME OF THE STAFF : PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY CLASS: T.Y.Bsc.

SEMESTER:VI MONTH: JANUARY-FEBRUARY ACADEMICYEAR:2019-2020

LEARNINGOBJECTIVE/S:

The learners will be able to:

To Learn-Principle of NMR, Nuclear spin, magnetic moment, nuclear 'g' factor, energy levels, Larmor precession, Relaxation processes in NMR i.e. spin-spin relaxation and spin-lattice relaxation, Instrumentation of NMR Spectrometer,
To learn-Principle of ESR, fundamental equation, g-value–dimensionless constant or electron g-factor, hyperfine splitting, Instrumentation of ESR spectrometer, ESR spectrum of hydrogen and deuterium.

PAPER,UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHINGMETHOD/ICT TOOLSUSED
PAPER-I, UNIT-IV TITLE: NMRandESR	1.NUCLEAR MAGNETIC RESONANCE	07	1) T.Y.Bsc Physical Chemistry Text book by Sheth Pub. by Himalaya Pub. 2) Principles of Physical Chemistry B.R.Puri, L.R. Sharma, M.S. Pathania, VISHAL PUB.,2008.	Chalk-board
	2.ELECTRON SPIN RESONANCE SPECTROSCOPY	08		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:15

VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

SEMESTER: II MONTH: JANUARY-FEBRUARY ACADEMIC YEAR: 2019-2020

LEARNINGOBJECTIVE/S:

The learners will be able to:

To learn-Fugacity of real gases, Determination of fugacity of real gases using graphical method and from equation of state. Equilibrium constant for real gases in terms of fugacity. Gibb's energy of mixing, entropy and enthalpy of mixing.
To learn-Chemical potential in nonideal solutions excess functions of nonideal solution, Gibbs Duhem Margules equation.
To learn-Laplace equation, Kelvin equation, Gibb's adsorption isotherm, BET isotherm.
To learn-standard free energy change in biochemical reactions, exergonic, endergonic. Hydrolysis of ATP, synthesis of ATP from ADP.

PAPER,UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHINGMETHOD/ICT TOOLSUSED
PAPER-I, UNIT-I TITLE: Thermodynamics -II	1.Fugacity	05	Peter Atkins and Juliode Paula, Atkin's Physical Chemistry,7th Edn., Oxford University Press,2002	Chalk-board
	2.Real solutions	03		
	3.Thermodynamics of surfaces	04		
	4.Bioenergetics	03

TEACHINGPLAN(UNITPLAN)

NAME OF THE STAFF : PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY CLASS: M.Sc-I.

SEMESTER: II MONTH: MARCH-APRIL ACADEMICYEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

To study – Solvent Effects on reaction rates, Reactions between ions -influence of solvent Dielectric constant, influence of ionic strength, Linear free energy relationships Enzyme action
To learn-Michaelis-Menten analysis, Lineweaver-Burk and Eadie Analyses.
To learn-Competitive, Non competitive and Uncompetitive Inhibition. Effect of pH, Enzyme activation by metal ions, Regulatory enzymes.
To study-The parabolic rate law, The first order rate Law, the contracting sphere rate law, Contracting area rate law, some examples of kinetic studies.

PAPER,UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ICT TOOLS USED
PAPER-I, UNIT-III TITLE: Chemical Kinetics and Molecular Reaction Dynamics	1.Elementary Reactions in Solution	04	Peter Atkins and Juliode Paula, Atkin's Physical Chemistry,7th Edn., Oxford University Press,2002.	Chalk-board
	2.Kinetics of reactions catalysed by enzymes	03		
	3.Inhibition of Enzyme action	04		
	4.Kinetics of reactions in the Solid State	04

NAME OF THE STAFF: Ms Rashmita Bharatkumar Vaychal DEPARTMENT: Chemistry

CLASS: MSc Part I SEMESTER:I MONTH: Aug - Dec ACADEMIC YEAR: 2019 -2020

LEARNING OBJECTIVE/S:
The learners will be able to : __Learn Molecular Symmetry , Group Theory and application of Group Theory

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 2 Unit II Molecular Symmetry and Group Theory	2.1. Symmetry criterion of optical activity, symmetry restrictions on dipole moment. A systematic procedure for symmetry classification of molecules.	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	WHITE BOARD
	2.2. Concepts of Groups, Sub-groups, Classes of Symmetry operations, Group Multiplication Tables. Abelian and non-Abelian point groups	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular	WHITE BOARD

SIGNATURE OF THE STAFF Rvaychal **SIGNATURE OF THE H.O.D.**

			Symmetry and Group Theory, John Wiley & Sons, New York, 1998	
	2.3. Representation of Groups: Matrix representation of symmetry operations, reducible and irreducible representations. The Great Orthogonality Theorem and its application in construction of character tables for point groups C2v, C3v and D2h, structure of character tables.	3	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	WHITE BOARD
	2.4. Applications of Group Theory (a) Symmetry adapted linear combinations (SALC), symmetry aspects of MO theory, sigma bonding in ABn (Ammonia, CH4) molecule. (b) Determination of symmetry species for translations and rotations. (c) Mulliken's notations for irreducible representations. (d) Reduction of reducible representations using reduction formula. (e) Group-subgroup relationships. (f) Descent and ascent in symmetry correlation diagrams showing relationship between different groups.	6	F. A. Cotton, Chemical Applications of Group Theory, 2nd Edition, Wiley Eastern Ltd., 1989 and R. L. Carter, Molecular Symmetry and Group Theory, John Wiley & Sons, New York, 1998	WHITE BOARD

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: III MONTH: June 2019 ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

Introduce classical methods of chemical analysis.
Appreciate the various terms and types of titrimetric analysis.
Ability to select proper titrimetric method
Appreciate the usefulness of the gravimetric method of analysis
Identify a suitable gravimetric method
Perform the required calculations involved in the analysis by titrimetry as well as gravimetry.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-	Titrimetric Methods, Terms involved in Titrimetric methods of analysis. Comparing volumetry and Titrimetry The Conditions suitable for titrimetry Types of titrimetry – Neutralisation (Acidimetry, alkalimetry), Redox, Iodometry, Iodimetry.	02	Text book Himalaya publication	Black board/ chalk and duster.
	Precipitation and Complexometric titrations and indicators used in these titrations, Tools of Titrimetry: Graduated glasswares and Callibration, Standard solutions (Primary and Secondary standards in Titrimetry) and Calculations in Titrimetry.	02	Text book Seth publication	Black board/ chalk and duster.

SIGNATURE OF THE STAFF SJyadhav. SIGNATURE OF THE H.O.D.

Chemistry Paper-III	Concept of pH and its importance in Neutralisation Titrations End point and Equivalence point of Neutralisation titrations Determination of End point by using i. Indicators causing colour change ii. Change in potential, (by potentiometry) iii. Change in conductance (by conductometry). Construction of titration curve (on the basis of change in pH)of a titration.	04	Skoog et al. Fundamentals of Analytical chemistry Cengage Learning, Eight Edition, chapter 13, 14 and 15	Black board/ chalk and duster. . .
UNIT-II Classical Methods of Analysis	Types of Gravimetric Methods – Precipitation Gravimetry: i. Steps involved in precipitation gravimetry analysis	02	Text book Seth publication	Black board/ chalk and duster.
	Conditions for precipitation iii. Completion of precipitation, iv. Role of Digestion, Filtration, Washing, Drying Ignition of precipitate.	02	Text book Himalaya publication	Black board/ chalk and duster.
	Applications of Gravimetric Analysis: Determination of sulfur in organic compounds; Estimation of Nickel in Cu-Ni alloy using dimethyl glyoxime; Determination of Aluminum by converting it to its oxide.	03		Black board/ chalk and duster.

	iii. Preparation of epoxides- peroxyacids (m-CPBA)			

SIGNATURE OF THE STAFF ***SIGNATURE OF THE H.O.D.***

	iv. Reactivity & reactions of epoxides- ring opening reactions in acidic (HX, ROH, HCN), basic & neutral conditions (NH3, RMgX & RO-) with reference to regioselectivity	03		Black board/ chalk and duster.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY CLASS: S.Y.B.Sc. SEMESTER: III MONTH: June 2019 ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

To study different types of complex chemical reactions and their reaction rates.
To learn the role of different phases in solution equilibrium system.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF SJyadhav. SIGNATURE OF THE H.O.D.

PAPER- **Chemistry Paper-II**	Types of Complex Chemical reactions i. Reversible or opposing reactions ii. Consecutive reactions iii. Parallel reactions	03	Text book Himalaya publication	White board/ marker pen and duster.
UNIT-I **Kinetics and Phase equilibria of**	(Derivations not expected) iv. Thermal chain reactions: H and Br reaction. (Kinetic expression not expected).			

SIGNATURE OF THE STAFF Gyadhay.

SIGNATURE OF THE H.O.D.

solutions	Effect of temperature on the rate of reaction i. Arrhenius equation and its derivation ii. Concept of energy of activation (Ea). (Numerical expected) Theories of reaction rates i. Collision theory of unimolecular reaction(Lindemann's approach) and bimolecular reaction ii. Activated complex theory of bimolecular reactions iii. Comparison of the two theories (Qualitative treatment only)	03	Atkins P. W., and Paula J. De, Physical Chemistry, 10th ed., Oxford University, 12 press (2014).	White board/ marker pen and duster.
	Phase rule & terms involved b) Liquid -liquid mixtures- classification i. Completely miscible liquids ii. Ideal solutions and Raoult's law	03	Text book Himalaya publication	White board/ marker pen and duster. .

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

	iii. Deviations from Raoult's law -non-ideal solutions iv. Vapour pressure: composition and temperature; Composition curves of ideal and non-ideal solutions, Numericals			
	Partial miscibility of liquids i. Classification on the basis of Critical solution temperature ii. Effect of impurity on partial miscibility of liquids iii. Partially Miscible Liquids with Upper Critical Solution Temperature (Phenol-Water System) iv. Partially Miscible Liquids with Lower Critical Solution Temperature (Triethylamine-Water System) v. Partially Miscible Liquids with Upper and Lower Critical Solution Temperature (Nicotine-Water System)	03	Text book Himalaya publication	White board/ marker pen and duster.

SIGNATURE OF THE STAFF Gyadhay.

SIGNATURE OF THE H.O.D.

	Immiscibility of liquids: Principle of steam distillation *(Numerical expected)* *e) Nernst distribution law and its applications* *i. Solvent extraction – method*	*03*	*Text book* *Himalaya publication*	*White board/ marker pen and duster.*

SIGNATURE OF THE STAFF ***SIGNATURE OF THE H.O.D.***

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV *DEPARTMENT: CHEMISTRY* *CLASS: F.Y.B.Sc.* *SEMESTER: II* *MONTH: November 2019* *ACADEMIC YEAR: 2019-2020*

LEARNING OBJECTIVE/S:
The learners will be able to:

Study ideal gas laws, kinetic theory of gases in detail.
Study reversible and irreversible reactions, law of mass action, dynamic equilibria.
Study spontaneity and physical significance of free energy.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF ***SIGNATURE OF THE H.O.D.***

PAPER- Chemistry Paper-I	Ideal gas laws, kinetic theory of gases, Maxwell-Boltzmann's distribution of velocities (qualitative discussion), ideal gases, real gases, compressibility factor, Boyle's Temperature, Numericals.	04	Text book Himalaya publication	White board/ marker pen and duster.
UNIT-I Gaseous State And Chemical Equilibria and Thermodynamic Parameters	Deviation from ideal gas laws, reasons for deviation from ideal gas laws, Van der Waals equation of state, Joule-Thomson effect: qualitative discussion and experimentation, inversion temperature. Numericals.	04	Text book Seth publication	White board/ marker pen and duster.
	Reversible and irreversible reactions, law of mass action, dynamic equilibria, equilibrium constant, (Kc and Kp),	02	Text book Himalaya publication	White board/ marker pen and duster.
	relationship between Kc and Kp, Le Chatelier's principle, factors affecting chemical equilibrium, Numericals.	02	Text book Himalaya publication	White board/ marker pen and duster.
	Statement of second law of thermodynamics, concepts of entropy and free energy, spontaneity and physical significance of free energy, thermodynamic derivation of equilibrium constant, Numericals.	03	Text book Himalaya publication	White board/ marker pen and duster.

NAME OF THE STAFF: SEEMA JADHAV *DEPARTMENT: CHEMISTRY*

CLASS: S.Y.B.Sc. *SEMESTER: IV* *MONTH: November 2019* *ACADEMIC YEAR: 2019-2020*

LEARNING OBJECTIVE/S:
The learners will be able to:

To study nomenclature, structure and physical properties, acidity of carboxylic acids.
To predict the reactivity, nomenclature, and preparation of aromatic sulphonic acids.

SIGNATURE OF THE STAFF ***SIGNATURE OF THE H.O.D.***

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
		ALLOTED		
PAPER Chemistry Paper-I UNIT-III	Nomenclature, structure and physical properties, acidity of carboxylic acids, effects of substituents on acid strength of aliphatic and aromatic carboxylic acids. Preparation of carboxylic acids: oxidation of alcohols and alkyl benzene, carbonation of Grignard and hydrolysis of nitriles.	03	Text book Himalaya publication	Black board/ chalk and duster.
	Reactions: Acidity, salt formation, decarboxylation, Reduction of carboxylic acids with $LiAlH_4$, diborane, Hell-Volhard-Zelinsky reaction,Conversion of carboxylic acid to acid chlorides, esters, amides and acid anhydrides and their relative reactivity.	04	Text book Seth publication	Black board/ chalk and duster.
	Mechanism of nucleophilic acyl substitution and acid-catalysed nucleophilic acyl substitution. Interconversion of acid derivatives by nucleophilic acyl substitution. Mechanism of Claisen condensation and Dieckmann condensation.	04	Morrison, R. T.; Boyd, R. N. (2012). Organic Chemistry. Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).	Black board/ chalk and duster. . .

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	Nomenclature, preparation of aromatic sulphonic acids by sulphonation of benzene (with mechanism), toluene and naphthalene, Reactions: Acidity of arene sulfonic acid,	*02*	*Text book* *Seth publication*	*Black board/ chalk and duster.*

SIGNATURE OF THE STAFF ***SIGNATURE OF THE H.O.D.***

	Comparative acidity of carboxylic acid and sulfonic acids. Salt formation, desulphonation.Reaction with alcohol, phosphorous pentachloride, IPSO substitution.	02	Text book Himalaya publication	Black board/ chalk and duster.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2019 ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

To study different Types of catalysis, catalytic activity, specificity and selectivity.
To learn Recapitulation of laws of crystallography and types of crystals

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Chemistry Paper-II	laws of crystallography and types of crystals Characteristics of simple cubic, face centered cubic and body centered cubic systems, interplanar distance in cubic lattice	03	Text book Himalaya publication	White board/ marker pen and duster.

SIGNATURE OF THE STAFF SJadhav. SIGNATURE OF THE H.O.D.

UNIT-I	Use of X-rays in the study of crystal structure, Bragg's equation (derivation expected), X-rays diffraction method of studying crystal lattice structure, structure of NaCl and KCl. Determination	04	Atkins P. W., and Paula J. De, Physical	White board/ marker pen and duster.
Solid State And Catalysis	of Avogadro's number, Numericals.		Chemistry, 10th ed., Oxford University, 12 press (2014).	
	Types of catalysis, catalytic activity, specificity and selectivity, inhibitors, catalyst poisoning and deactivation	03	Text book Himalaya publication	White board/ marker pen and duster. .
	Mechanisms and kinetics of acid-base catalyzed reactions, effect of pH. Mechanisms and kinetics of enzyme catalyzed reactions (Michaelis-Menten equation)	03	Text book Himalaya publication	White board/ marker pen and duster.
	Effect of particle size and efficiency of nanoparticles as catalyst.	02	Text book Himalaya publication	White board/ marker pen and duster.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2019 ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

Expected to appreciate the nature of interaction between applied electrical potential and the concentration of the analyte.
The nature of chemical reactions that influence potential of a given cell.
Familiar with the various types of electrodes or half cells.
Appreciate the nature, need and importance of pH.
Expected to know the applications of the various instrumental methods dealt with in this unit.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-	Instruments based on the electrochemical properties of the analytes Potentiometry: Principle, Role of Reference and indicator electrodes	03	Text book Himalaya publication	Black board/ chalk and duster.
	Applications in Neutralisation reactions with reference to the titration of a Strong acid against a Strong Base (using quinhydrone electrode, Graphical methods for detection of end points.	02	Text book Seth publication	Black board/ chalk and duster.

SIGNATURE OF THE STAFF SJadhav. SIGNATURE OF THE H.O.D.

Chemistry Paper-III UNIT-II Instrumental Methods-II	pHmetry: Principle Types of pH meters.	02	Principles of Instrumental analysis, D. A. Skoog, 3rd Edition, Chapters: 20, 23	Black board/ chalk and duster.
	Construction Working and Care of Combined Glass electrode Applications in Titrimetry (Strtong acid-Strong Base) biological and environmental analysis	02	Text book Seth publication	Black board/ chalk and duster.
	Conductometry: Principle , Conductivity cell its construction and care.	03	Text book Himalaya publication	Black board/ chalk and duster.
	Applications in Neutralisation Titrimetry with respect to i. Strong Acid-Strong Base ii. Strong Acid-Weak Base iii. Strong Base-weak Acid iv. Weak Acid- Weak Base. Advantages & limitations of conductometric titrations.	03		Black board/ chalk and duster.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MISS. SHEETAL ANIL JAISWAL DEPARTMENT: CHEMISTRY

CLASS: F.Y. BSC CBZ'A' SEMESTER: SEM-I MONTH: JULY TO OCTOBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: 1.The Students will able to understand the basic concept of stereochemistry and 3D arrangement of atoms and groups in space.

2. The Students will able to know that how optical property of any organic compound is responsible for change in it's physical and chemical properties.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Unit-III Stereochemistry-I	3.1 Introduction of Projection Formulae and their inter conversions	02	Himalaya Publication textbook	Black board, Chalk and duster
	3.2 Geometrical Isomerism in alkenes and cycloalkanes	02		Black board, Chalk and duster
	3.3 Optical isomerism	06		Black board, Chalk and duster
	3.4 Relative and Absolute configuration	02		Black board, Chalk and duster
	3.5 Conformation analysis of alkanes	03		Black board, Chalk and duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ____Swati Shreedhar Dhumal. _____ DEPARTMENT: ___Chemistry_____

CLASS: ___Msc. II_____ SEMESTER: _____IIrd_____ MONTH: _Sep , Oct 19____ ACADEMIC YEAR: __2019-20_____

LEARNING OBJECTIVE/S:

The learners will be able to : __1) To understand about measurements of uncertainty.

2) To gain knowledge about signal to noise ratio.

3) To know about pharmaceutical legislation.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper - II Unit - II Quality In Analytical Chemistry - II	Measurement of uncertainty: Definition and evaluation of uncertainty,putting uncertainty to use, interpretation of results and improving the quality of results.	(4L)	Quality in the analytical chemistry laboratory, E Prichard, John Wiley and sons N.Y 1997. Quality assurance in analytical Chemistry, W Funk, V Dammann, G. Donnevert VCH Weinheim1995	Problem solving method, lecture method. / White board and marker

	Signal to noise: Signal to noise ratio, sources of noise in instrumental analysis. Signal to noise enhancement, hardware devices for noise reduction,software methods for noise reduction.	(6L)		
	Pharmaceutical Legislation: introduction to drug acts, drug rules(schedules), concept of regulatory affairs in pharmaceuticals, review of GLP and GMP and their regulations for analytical labs, roles and responsibilities ofpersonnel, appropriate design and placement of laboratory equipment, requirements for maintenance and calibration.	(5L)		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

CLASS: ___T.Y.Bsc_____ SEMESTER: _____VI th_____ MONTH: _Feb 2020____ACADEMIC YEAR: __2019-20_____

LEARNING OBJECTIVE/S:
The learners will be able to : ___1) To understand about food processing and preservation.

2) To acquire knowledge in analysis of food products and detection of adulterants.

3) To know about cosmetic products and it's Composition and analysis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper- IV Unit- III Food and cosmetic analysis.	Food processing and preservation: Introduction, need, chemical methods, action of chemicals(sulphur dioxide, boric acid, sodium benzoate, acetic acid, sodium chloride and sugar) and pH control Physical methods (Pasteurization and Irradiation)	(10L)	Analytical chemistry (Himalaya publishing house).	Question answers method, cooperative learning method and group discussion method. / Black board and chalk
	Determination of boric acid by titrimetry and sodium benzoate by HPLC.			
	Study and analysis of food products and detection of adulterants 1) Milk: Composition & nutrients, types of milk (fat free, organic and			
	lactose milk) Analysis of milk for lactose by Lane Eynon's Method 2) Honey: Composition,Analysis of reducing sugars in honey by Coles Ferricyanide method. 3) Tea: Composition, types (green tea and mixed tea)Analysis of Tannin by Lowenthal's method4) Coffee: Constituents and composition, Role of Chicory Analysis of caffeine by Bailey Andrew method			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Cosmetics : Introduction and sensory properties	(5L)		
	Study of cosmetic products –1) Face powder: Composition Estimation of calcium and magnesium by complexometric titration2) Lipstick: ConstituentsAsh analysis for water soluble salts: borates, carbonates and zinc oxide 3) Deodorants and Antiperspirants: Constituents, properties ,Estimation of zinc by gravimetry.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR** DEPARTMENT: CHEMISTRY CLASS: FYBSc

SEMESTER: I MONTH: July to September ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

i. Understand the basics of Organic Chemistry

ii. Understand and be well versed with the nomenclature of various functional groups

iii. Learn bonding, formation and reactions of organic compounds

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-I U-III Basics of Organic Chemistry	Classification and Nomenclature of Organic Compounds: Review of basic rules of IUPAC nomenclature. Nomenclature of mono and bi-functional aliphatic compounds on the basis of priority order of the following classes of compounds: alkanes, alkenes, alkynes, haloalkanes, alcohols, ethers, aldehydes, ketones, carboxylic acids, carboxylic acid derivatives (acid halides, esters, anhydrides, amides), nitro compounds, nitriles and amines; including their cyclic analogues.	(5L)	Morrison and Boyd Organic Chemistry Mc Murry, J.E. Fundamentals of Organic Chemistry	Chalk and Board
	Bonding and Structure of organic compounds: Hybridization: sp3, sp2, sp hybridization of carbon and nitrogen; sp3 and sp2 hybridizations of oxygen in Organic compounds (alcohol, ether, aldehyde, ketone, carboxylic acid, ester, cyanide, amine and amide) Overlap of atomic orbitals: Overlaps of atomic orbitals to form sigma and pi bonds, shapes of organic molecules. Shapes of molecules; Influence of hybridization on bond	(4L)		Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	properties (as applicable to ethane, ethene, ethyne)			
	Fundamentals of organic reaction mechanism: Electronic Effects: Inductive, electromeric, resonance and mesomeric effects, hyperconjugation and their applications; Dipole moment; Organic acids and bases; their relative strengths. Bond fission: Homolytic and Heterolytic fission with suitable examples. Electrophiles and Nucleophiles; Nucleophilicity and basicity; Types (primary, secondary, tertiary, allyl, benzyl), shape and their relative stability of reactive intermediates: Carbocations, Carbanions and Free radicals. Introduction to types of organic reactions: Addition, Elimination and Substitution reaction.	(6L)		Chalk and Board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR** DEPARTMENT: CHEMISTRY CLASS: FYBSc

SEMESTER: I MONTH: Nov to February ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

i. Understand the basics of Organic Chemistry

ii. Learn the bonding and reactions of aliphatic compounds.

iii. Learn the mechanisms of certain basic reactions.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-I U-III Chemistry of Aliphatic Hydrocarbons	3.1 Carbon-Carbon sigma bonds: Chemistry of alkanes: Formation of alkanes, Wurtz Reaction, Wurtz-Fittig Reactions, Free radical substitutions: Halogenation - relative reactivity and selectivity.	(3L))	Morrison and Boyd Organic Chemistry Mc Murry, J.E. Fundamentals of Organic Chemistry	Chalk and Board
	3.2 Carbon-Carbon pi bonds: Formation of alkenes and alkynes by elimination reactions: Mechanism of E1, E2, E1cb reactions. Saytzeff and Hofmann eliminations. Reactions of alkenes: Electrophilic additions their mechanisms (Markownikoff/ Anti Markownikoff addition), Mechanism of oxymercuration-demercuration, hydroboration-oxidation, ozonolysis, reduction(catalytic and chemical), syn and	(12L)		Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	anti-hydroxylation (oxidation). 1, 2-and 1, 4- addition reactions in conjugated dienes and, Diels-Alder reaction; Allylic and benzylic bromination using N-bromosuccinimide and mechanism, e.g. propene, 1-butene, toluene, ethylbenzene. Reactions of alkynes: Acidity, Electrophilic and Nucleophilic additions. Hydration to form carbonyl compounds, Alkylation of terminal alkynes.			

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR** DEPARTMENT: CHEMISTRY CLASS: TYBSc

SEMESTER: V MONTH: July to September ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

i. Understand the mechanisms of important reactions

ii. Learn the basics of pericyclic reactions

iii. Understand the reactions and mechanisms in photochemical process

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
P-III (Organic Chemistry) Unit I 1.1. Mechanism of organic reactions	1.1.1 The basic terms & concepts: bond fission, reaction intermediates, electrophiles & nucleophiles, ligand, base, electrophilicity vs. acidity & nucleophilicity vs basicity. 1.1.2 Neighbouring group participation in nucleophilic substitution reactions: participation of lone pair of electrons, kinetics and stereochemical outcome.	(10 L)	A guidebook to mechanism in Organic Chemistry, Peter Sykes, Organic Reaction	Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	1.1.3 Acyl nucleophilic substitution (Tetrahedral mechanism): Acid catalyzed esterification of carboxylic acids (AAC2) and base promoted hydrolysis of esters (BAC2). 1.1.4 Pericyclic reactions, classification and nomenclature : Electro cyclic reactions (ring opening and ring closing), cycloaddition, sigma tropic Rearrangement, group transfer reactions, cheletropic reaction (definition and one example of each type) 1.1.4.2 Pyrolytic elimination: Cope, Chugaev, pyrolysis of acetates		Mechanism, 4th edition, Ahluwalia	
1.2 Photochemistry	1.2.1 Introduction: Difference between thermal and photochemical reactions. Jablonski diagram, singlet and triplet states, allowed and forbidden transitions, fate of excited molecules, photosensitization. 1.2.2 Photochemical reactions of olefins: photoisomerization, photochemical rearrangement of 1,4- dienes (di- π methane) 1.2.3 Photochemistry of carbonyl compounds: Norrish I, Norrish II cleavages. Photo reduction (e.g. benzophenone to benzpinacol)	(5 L)	Organic Chemistry, Morrison and Boyd Organic chemistry, John Mc Murry	Chalk and Board

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAAC accredited "B" Grade, 2.69 CGPA

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR** DEPARTMENT: CHEMISTRY CLASS: MSc

SEMESTER: III MONTH: Aug to Oct ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

i. Understand the mechanisms and concepts of new reactions

ii. Learn new methods of synthesis

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper - II Synthetic Organic Chemistry-I Unit 1: Name reactions with mechanism and application	1.1 Mukaiyama esterification, Mitsonobu reaction, Darzen's Glycidic Ester syntheis, Ritter reaction, Yamaguchi esterification, Peterson olefination.	[5L]	Organic Chemistry, Clayden Greeves Warren and Wothers,	Chalk and Board
	1.2 Domino reactions: Characteristics; Nazerov cyclization	[3L]		
	1.3 Multicomponent reactions: Strecker Synthesis, Ugi 4CC, Biginelli synthesis, Hantzsch synthesis, Pictet-Spengler synthesis	[5L]		
	1.4 Click Reactions: Characteristics; Huisgen 1,3-Dipolar Cycloaddition	[2L]		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Dr. SHEETAL R. POWAR** DEPARTMENT: CHEMISTRY CLASS: MSc

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Gayatri Gadre DEPARTMENT: Chemistry

CLASS: M.Sc. SEMESTER: I MONTH: AUGUST-OCTOBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Aliphatic nucleophilic substitution reactions: S_N1, S_N2, S_N^i reactions, SET mechanism, S_N reactions involving neighboring group participation (NGP), Aromatic nucleophilic substitution: S_NAr, benzyne mechanism, ipso, cine, tele, vicarious substitution, Ester hydrolysis.

2. Aromaticity: Frost-Musulin diagram, Huckel's (4n+2) and 4n rules, aromatic and antiaromatic compounds upto 18 carbon atoms.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III, Unit II- Nucleophilic substitution reactions and Aromaticity.	Unit 2.1- Nucleophilic substitution reactions	9 L	Advanced Organic Chemistry, F. A. Carey and R. J. Sundberg.	Chalk and board
	Unit 2.2- Aromaticity	6 L	Advanced Organic Chemistry: Reactions and mechanism, L.G. Wade, Jr., Maya Shankar Singh.	Chalk and board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Gayatri Gadre DEPARTMENT: Chemistry

CLASS: M.Sc. SEMESTER: II MONTH: January-March ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Study Proton magnetic resonance spectroscopy: Principle, chemical shift, spin-spin coupling, coupling constant, Karplus equation.
2. ^{13}C NMR spectroscopy: Theory and comparison with proton NMR, proton coupled and decoupled spectra, off-resonance decoupling.
3. Mass spectrometry: Molecular ion peak, base peak, isotopic abundance, Nitrogen rule, fragmentation pattern in various classes of organic compounds.
4. Structure determination involving individual or combined use of the above spectral techniques.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III, Unit IV- NMR spectroscopy and Mass spectrometry	Unit 4.1- Proton magnetic resonance spectroscopy	8 L	Introduction to Spectroscopy, Donald L. Pavia.	Chalk and board
	Unit 4.2- ^{13}C NMR spectroscopy	3 L	Organic Spectroscopy- Principles and Applications,	Chalk and board

G.V. Gadre

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Gayatri Gadre DEPARTMENT: Chemistry

CLASS: M.Sc. SEMESTER: III MONTH: AUGUST-NOVEMBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Study Carbohydrates: structure elucidation of Lactose, structural features and applications of various carbohydrates.
2. Natural pigments: structural features and biological importance of various classes of natural pigments like carotenoids, flavones, quinones, porphyrins.
3. Insect pheromones: types of pheromones, synthesis of some pheromones.
4. Alkaloids: occurrence and importance of morphine, atropine, coniine.
5. Synthesis of some natural products.
6. Study of Prostaglandins, Lipids, Insect growth regulators, Plant growth regulators.
7. Drug discovery, design and development: Important topics of medicinal chemistry like Receptor, Therapeutic index, Drug assay. Basic pharmacokinetics as ADME properties.
8. Discovery of Penicillin and Librium without lead, identification of pharmacophore, functional group modification, structure activity relationship (SAR)

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper III- Unit I-	Unit 1.1- Carbohydrates	5 L	Organic Chemistry	Chalk and board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Gayatri Gadre DEPARTMENT: Chemistry

CLASS: M.Sc. SEMESTER: IV MONTH: JANUARY-MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

1. Study Steroids: Biological role, important structural and stereochemical features of different class of steroids, synthesis of 16-DPA, synthesis of various male and female hormones from 16 DPA.

2. Heterocyclic compounds: Nomenclature of bicyclic/ tricyclic heterocycles by common, Hantzsch-Widman and replacement nomenclature method, nucleophilic ring opening reactions of some heterocyclic compounds, structure, reactivity, synthesis and reactions of some fused heterocycles.

3. Research methodology: Reporting practical and project work, organizing poster display, giving oral presentation, writing scientific papers.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT**: Chemistry **CLASS**: M.Sc. (I) SEMESTER: I **MONTH**: August

ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: derive the wave function of sp, sp^2, sp^3 hybridization, understand the concept of resonance and resonance energy, Valence Bond Theory and Molecular orbital theory, and weak forces of attraction.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II, I, **Chemical Bonding**	**1.1** Recapitulation of hybridization. Derivation of wave functions for sp, sp^2, sp^3.	3L	Principles of Inorganic Chemistry.	White Board and marker
	1.2 Discussion of involvement of d orbitals in various types of hybridization, concept of resonance, resonance energy derivation.	3L	Principles of Inorganic Chemistry.	White Board and marker
	1.3 Critical analysis of VBT	2L	Principles of Inorganic Chemistry.	White Board and marker

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

	1.4 Molecular Orbital Theory for diatomic species of first transition series	2L	Principles of Inorganic Chemistry.	White Board and Marker
	1.5 Molecular Orbital Theory for SF_6, CO_2, B_2H_6, I^{3-}	3L	Principles of Inorganic Chemistry.	White Board and marker
	1.6 Weak forces of attraction: Hydrogen bonding – concept, types, properties, methods of detection and importance, vander waals forces, ion-dipole, dipole-dipole, London forces	2L	Principles of Inorganic Chemistry.	White Board and Marker

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Promila Nagpal **DEPARTMENT:** Chemistry **CLASS:** S.Y.B.Sc. **SEMESTER:** IV **MONTH:** October

ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: the importance of separation in sample treatment, various methods of separations, how to select a method of separation of an analyte from the matrix, how a solute gets distributed between two immiscible phases, principle of solvent extraction and various terms involved therein, effect of various parameters on solvent extraction of a solute, classification of Chromatographic methods, Paper and thin layer chromatography and using them in practice, acidity of cations and basicity of anions, uses and environmental chemistry of oxides and oxo-acids

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

II, II, **Ions in aqeous medium**	**2.1. Acidity of Cations and Basicity of Anions** i) Hydration of Cations; Hydrolysis of Cations predicting degree of hydrolysis of cations-effect of Charge and Radious. II) Latimer Equation. Relationship between pKa, acidity and z^2/r ratios of metal ions graphical Presentation iii) Classification of cations on the basis of acidity category – Non acidic,moderately acidic, strongly acidic, very strongly acidic with pKa values range and examples iv) Hydration of Anions; Effect of Charge and Radius; Hydration of anions-concept, diagram classification on the basis of basicity. **2.2. Uses and environmental chemistry of volatile oxides and oxo-acids** i) Physical properties of concentrated oxo-acids like sulfuric, Nitric and Phosphoric acid. ii) Uses and environments aspects of these acids	9L 6L	Puri, Sharma, Kalia Inorganic Chemistry. James E. Huheey, Inorganic Chemistry: Principles of Structure and Reactivity,	Black Board and Chalk
III, I- **Methods of separation**	**1. Separation Techniques in Analytical Chemistry** **1.1.** An Introduction to Analytical Separations and its importance in analysis. **1.2.** Estimation of an analyte without effecting separation. **1.3.** Types of separation methods **1.3.1.** Based on Solubilities (Precipitation, Filtration Crystallisation) **1.3.2.** Based on Gravity- Centrifugation **1.3.3.** Based on volatility-Distillation ; **1.3.4.** Based on Electrical effects-Electrophoresis **1.3.5.** Based on retention capacity of a Stationary Phase - Chromatography;	2L 2L 6L	Modern Analytical Chemistry , David Harvey (page numbers 596 -606) Modern Analytical Chemistry , David Harvey (page numbers 215 -217)	Black Board and Chalk

SIGNATURE OF THE STAFF PSNagpal **SIGNATURE OF THE H.O.D.**

	1.3.6. Based on distribution in two immiscible phases-Solvent Extraction; **1.3.7.** Based on capacity to exchange with a resin-Ion Exchange; **1.4. Electrophoresis:** Principles, Basic Instrumentation, Working and Application in Separation of biomolecules like enzymes and DNA. **1.5. Solvent extraction** **1.5.1.** Introduction, Nernst distribution Law, Distribution Ratio, Partition Coefficient. **1.5.2.** Conditions of extraction: Equilibration time, Solvent volumes, temperature, pH. **1.5.3**. Single step and multi-step extraction, Percentage extraction for single step and Multistep extraction. Separation factor. **1.5.4**. Batch and continuous extraction **1.6.** Chromatography : **1.6.1.** Introduction to Chromatography **1.6.2.** Classification of chromatographic methods based on stationary and mobile phase **1.6.3**. Paper Chromatography: Principle, techniques and applications of Paper Chromatography in separation of cations. **1.6.4.** Thin layer Chromatography Principle, technique and Applications in determining the purity of a given solute; Following progress of a given reaction.	5L

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Arti Dubey DEPARTMENT: Chemistry CLASS: F.Y.B.Sc. SEMESTER: I MONTH: June-Oct ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:

The learners will be able to :

- Understand basics of chemical kinetics and predict reaction mechanism.
- Calculate rate constant of zero, first and second order reaction.
- The basics of solutions, Colligative properties, and their applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II (General Chemistry) Unit-I Title-Physical	**1.1 Chemical Kinetics:** Rate of reaction, rate constant, measurement of reaction rates, order and molecularity of reaction, integrated rate equation of first and second order reactions (with equal initial concentration of reactants) (Numericals expected) Determination of order of reaction by (a) Integration method (b)	**(8L)**	Text Book, Reference Book, You tube video	Chalk and talk method

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Chemistry	Graphical method (c)Ostwald's isolation method (d) Half time method (Numericals expected) **1.2 Liquid State:** Surface tension: Introduction, methods of determination of surface tension by drop number method (Numericals expected) Viscosity: Introduction, coefficient of viscosity, relative viscosity, specific viscosity,reduced viscosity, determination of viscosity by Ostwald viscometer (Numericals expected) Refractive index: Introduction, molar refraction and polarizability, determination of refractive index by Abbe's refractometer (Numericals expected) Liquid crystals: Introduction, classification and structure of thermotropic phases (Nematic,smectic and cholesteric phases), applications of liquid crystals	**(7L)**

LEARNING OBJECTIVE/S:

The learners will be able to :

Study about Molecular Symmetry and Group Theory.

Know about Concepts of Groups, Sub-groups, Classes of Symmetry operations, Group Multiplication Tables and Applications of Group Theory.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Unit-II Title-Inorganic chemistry	**Molecular Symmetry and Group Theory:** 2.1. Symmetry criterion of optical activity, symmetry restrictions on dipole moment. A systematic procedure for symmetry classification of molecules. 2.2. Concepts of Groups, Sub-groups, Classes of Symmetry operations, Group Multiplication Tables. Abelian and non-Abelian point groups. 2.3. Representation of Groups: Matrix representation of symmetry operations, reducible and irreducible representations. The Great Orthogonality Theorem and its application in construction of character tables for point groups C_{2v}, C_{3v} and D_{2h}, structure of	**[15L]**	Text Book, Reference Book, You tube video	Chalk and Talk Method, Power point presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	character tables. 2.4. Applications of Group Theory (a) Symmetry adapted linear combinations (SALC), symmetry aspects of MO theory, sigma bonding in AB_n (Ammonia, CH_4) molecule. (b) Determination of symmetry species for translations and rotations. (c) Mulliken"s notations for irreducible representations. (d) Reduction of reducible representations using reduction formula. (e) Group-subgroup relationships. *(f)* Descent and ascent in symmetry correlation diagrams showing relationship between different groups.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCES	TEACHING METHOD/ ICT TOOLSUSED
PAPER IV UNIT II **Calculations based on Chemical Principles**	**The following topics are to be covered in the form of numerical problems only.** a. Concentration of a solution based on volume and mass units. b. Calculations of ppm, ppb and dilution of the solutions, concept of mmol. c. Stoichiometry of chemical reactions, concept of kg mol, limiting reactant, theoretical and practical yield. d. Solubility and solubility equilibria, effect of presence of common ion. e. Calculations of pH of acids, bases, acidic and basic buffers. f. Concept of formation constants, stability and instability constants, stepwise formation constants. g. Oxidation number, rules for assigning oxidation number, redox reaction in term of oxidation number, oxidizing and reducing agents, equivalent weight of oxidizing and reducing agents, stoichiometry of redox titration (Normality of a solution of a oxidizing / reducing agent and its relationship with molarity).	15L	3000 solved problems in chemistry ,schaums solved problem series,David E.Goldberg , Mc Graw Hill international Editions, chapter 11, 15, 16, 21, 22	CHALK AND BOARD

NAME OF THE STAFF: SHAILESH GURAV *DEPARTMENT: CHEMISTRY*

CLASS: T.Y.B.Sc. *SEMESTER: VI* *MONTH: November 2018* *ACADEMIC YEAR: 2018-2019*

LEARNING OBJECTIVE/S:
The learners will be able to:

Study classification of dyes based on chemical constitution and and synthesis of selected dyes.
Get a brief idea of health and environmental hazards of synthetic dyes and their remediation processes.
Get a brief idea of impact of the textile and leather dye industry on the environment and effluent treatment strategies.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER- Drugs and Dyes,	Classification of Dyes, Nitro Dye: Naphthol Yellow S Nitroso Dye: Gambine Y, Azo dyes,	03	Textbook, Himalaya publication	Black board/ chalk and duster.
UNIT-III, Classification of Dyes based on Chemical Constitution and Synthesis	Diphenylmethane dye: Auramine O*, Triphenylmethane dye: Diamine series: Malachite Green* Triamine series: Acid Magenta	03	Textbook, Himalaya publications	Black board/ chalk and duster.
	Heterocyclic Dyes:Thiazine dyes, Azine dyes, Quinone Dyes: a) Naphthaquinone: Naphthazarin b) Anthraquinone Dyes:	03	Textbook, Seth publication	Black board/ chalk and duster.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

of Selected Dyes.	Indigoid Dyes: Indigo* (from aniline + monochloroacetic acid) Phthalocyanine Dyes: Monastral Fast Blue B	03	Textbook, Seth publication	Black board/ chalk and duster.
Health and Environmental Hazards of Synthetic Dyes	Health and Environmental Hazards of Synthetic Dyes and their Remediation Processes Impact of the textile and leather dye Industry on the environment	03	Textbook, Seth publication	Black board/ chalk and duster.

NAME OF THE STAFF: PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY CLASS: T.Y.Bsc. SEMESTER : V MONTH :JUNE-JULY

ACADEMICYEAR: 2018-2019

LEARNINGOBJECTIVE/S:
The learners will be able to:

To learn- dipole moment, polarization of a bond, bond moment, derivation for Rotational spectroscopy, Vibrational spectroscopy,
To learn-Rotational-Vibrational spectroscopy, Raman spectroscopy, solve the numerical problems based on this topic.

PAPER,UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHINGMETHOD/ICT TOOLSUSED
PAPER-I, UNIT-I TITLE: MOLECULAR SPECTROSCOPY	1.Rotational Spectrum	04	1)T.Y.Bsc Physical Chemistry Text book by Sheth Pub. And by Himalaya Pub. 2)Principles of Physical Chemistry B.R. Puri, L.R. Sharma, M.S. Pathania, VISHAL PUB.,2008.	Chalk-board
	2.Vibrational Spectrum	04		
	3.Vibrational Rotational spectrum of diatomic molecule	04		
	4.Raman Spectroscopy	03

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY CLASS: M.Sc-I

SEMESTER: I MONTH: JULY-AUGUST ACADEMICYEAR: 2018-2019

The learners will be able to:

To learn-State function and exact differentials. Maxwell equations, Maxwell thermodynamic Relations.
To learn-Joule Thomson experiment, Joule Thomson coefficient, inversion temperature, Joule Thomson coefficient in terms of Vander Waals constants.
To know-Third law of Thermodynamics.
To learn-Entropy change for a phase transition, absolute entropies, determination of absolute entropies in terms of heat capacity, standard molar entropies and their dependence on molecular mass and molecular structure, residual entropy.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHINGMETHOD/ICT TOOLSUSED
PAPER-I, UNIT-I	1.Maxwell equations	05	Atkin's Physical Chemistry, 7th Edn., Oxford University Press, 2002.	Chalk-board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRIYANKA MELWIN RODRIGUES. DEPARTMENT: CHEMISTRY CLASS: M.Sc-I

SEMESTER : I MONTH : SEPTEMBER–OCTOBER ACADEMIC YEAR:2018-2019

LEARNINGOBJECTIVE/S:

The learners will be able to:

To learn-Rate laws, Differential rate equations, Consecutive reactions, Steady state Approximation, formation and decomposition of phosgene, decomposition of ozone, Reaction between Hydrogen and Bromine, Decomposition of ethane, decomposition of acetaldehyde, Reaction between hydrogen and oxygen, Semenov-Hinshelwood and Thompson mechanism, Explosion limits and factors affecting explosion limits.
To learn-Kinetics of step wise polymerization, Kinetics of free radical chain polymerization.
To know-Unimolecular Reactions : Lindeman-Hinshelwood theory, Rice-Ramsperger-Kasssel(RRK)theory, Rice-Ramsperger-Kassel Marcus (RRKM) theory.

PAPER, UNIT, TITLE	SUB TOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD / ICT TOOLS USED

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: __Miss Riyan Rocky Gardner_____DEPARTMENT:

____Chemistry ESTER: __First____ MONTH: __August_____ ACADEMIC YEAR: __2018-2019_____

LEARNING OBJECTIVE/S:
The learners will be able to : ____Study about atomic structure ,hydrogenicatoms, many electron atoms,shell ,seashells and atomic orbitals.learn about radial shape of atomic orbitals ,Aufbau principle .

Study about periodic table and periodicity ,classification of elements ,electronegativity like Pauling, Alfred and Rochow and Mulliken etc._____

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1 unit 2 Atomic structure and Periodic table and periodicity	1. Atomic structure :Historical perspective of the atomic structure,Rutherford's atomic model,Bohrs atomic model ,it's limitations and atomic spectrum of atomic model,and structure of hydrogen atom. 2. Hydrogenic atom : Simple principle of quantum mechanics, atomic orbitals. Hydrogenic energy level ,shell, subshells and atomic orbitals, electron spin,radial shape of atomic orbitals, radial distribution function, angular shape of orbitals.	10	Himalaya publications F.Y.Bsc textbook	Black board ,chalk and duster

SIGNATURE OF THE STAFF Rardner **SIGNATURE OF THE H.O.D.**

	3. Many electron atom : penetration and shielding ,effective nuclear charge. 4. Aufbau principle.			
	1. Periodic table and periodicity : Long form of periodic table,classification of elements, periodicity in following properties : atomic and ionic size,ionization enthalpy, electron gain enthalpy, effective nuclear charge ,electronegativity : Pauling, mulliken and Alfred and Rochow electronegativity.	05	Himalaya publications F.Y.Bsc textbook	Black board ,chalk and duster.

NAME OF THE STAFF: SEEMA JADHAV DEPARTMENT: CHEMISTRY

CLASS: S.Y.B.Sc. SEMESTER: IV MONTH: November 2018 ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

To study nomenclature, structure and physical properties, acidity of carboxylic acids.
To predict the reactivity, nomenclature, and preparation of aromatic sulphonic acids.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
	Nomenclature, structure and physical properties, acidity of carboxylic acids, effects of substituents on acid strength of aliphatic and aromatic carboxylic acids. Preparation of carboxylic acids: oxidation of alcohols and alkyl benzene, carbonation of Grignard and hydrolysis of nitriles.	03	Text book Himalaya publication	Black board/ chalk and duster.

SIGNATURE OF THE STAFF SJyadhav **SIGNATURE OF THE H.O.D.**

	Reactions: Acidity, salt formation, decarboxylation, Reduction of carboxylic acids with $LiAlH_4$, diborane, Hell-Volhard-Zelinsky reaction,Conversion of carboxylic acid to acid chlorides, esters, amides and acid anhydrides and their relative reactivity.	04	Text book Seth publication	Black board/ chalk and duster.
PAPER **Chemistry Paper-I**	Mechanism of nucleophilic acyl substitution and acid-catalysed nucleophilic acyl substitution. Interconversion of acid derivatives by nucleophilic acyl substitution. Mechanism of Claisen condensation and Dieckmann condensation.	04	Morrison, R. T.; Boyd, R. N. (2012). Organic Chemistry. Dorling Kindersley (India) Pvt. Ltd.	Black board/ chalk and duster.
UNIT-III	Nomenclature, preparation of aromatic sulphonic acids by sulphonation of benzene (with mechanism), toluene and naphthalene, Reactions: Acidity of arene sulfonic acid,	02	Text book Seth publication	Black board/ chalk and duster.
	Comparative acidity of carboxylic acid and sulfonic acids. Salt formation, desulphonation.Reaction with alcohol, phosphorous pentachloride, IPSO substitution.	02	Text book Himalaya publication	Black board/ chalk and duster.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Komal Sudhir Naik DEPARTMENT: Mathematics CLASS: FYBCOM (I, J, L)

SEMESTER: I SUBJECT : Maths and Stats MONTH: Aug-Sep ACADEMIC YEAR:- 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to: develop critical and logical thinking and will able to solve various problems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
MATHEMATICAL AND STATISTICAL METHODS UNIT I Shares and Mutual Funds	**Shares:** Concept of share, face value, market value, dividend, equity shares, preferential shares, bonus shares. Simple examples.	08	Securities Laws & Regulation of Financial Market : Intermediate Course Paper 8, Institute of Company Secretaries of India, Chapter 11.	Chalk and board
	Mutual Funds: Simple problems on calculation of Net income after considering entry load, dividend, change in Net Asset Value (N.A.V.) and exit load. Averaging of price under the Systematic Investment Plan (S.I.P.)	07	Indian Mutual Funds Handbook : By Sundar Shankaran, Vision Books, 2006, Sections 1.7,1.8.1, 6.5 & Annexures 1.1to 1.3.	Chalk and board
