TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DORIN REBELLO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: TYBSc(IT) Div:A SEMESTER: V MONTH: JUNE-SEPTEMBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to : Understand the importance of software project management, project evaluation and programme management was easy,to provide knowledge of step wise planning and monitoring, understand the importance of becoming a team and decision making and project closeout.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: USIT501 unit:1, Title: Software Project Management	**Introduction to Software Project Management**:Introduction, Why is Software Project Management Important? What is a Project? Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Success and Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus Modern Project Management Practices.	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Project Evaluation and Programme Management: Introduction, Business Case, Project Portfolio Management, Evaluation of Individual Projects, Cost–benefit Evaluation Techniques, Risk Evaluation, Programme Management, Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management.	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector
	An Overview of Project Planning:Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project Infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify Activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector
Paper: USIT501 unit:4 Title:	**Monitoring and Control**: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Software Project Management	Back to Target, Change Control, Software Configuration Management (SCM).			
	Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance.	3	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector
	Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns.	5	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector
Paper: USIT501 unit:5, Title: Software Project Management	**Working in Teams:** Introduction, becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership.	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector
	Software Quality: Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process	5	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability, Quality Plans.			
	Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project Closeout Report.	3	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Presentation, board, projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: FYIT SEMESTER: I MONTH: JUNE to SEPT ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

To understand the structure and operation of modern processors and their instruction sets.

To understand the basic of digital electronics needed for computers

To understand the basics of instruction set architecture for reduced and complex instruction sets.

To understand how data is transferred between the processor and I/O devices.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 Digital Electronics Unit 1	**Number System:** Analog System, digital system, numbering system, binary number system, octal number system, hexadecimal number system, conversion from one number system to another floating point numbers, weighted codes binary coded decimal, non-weighted codes Excess – 3 code, Gray code, Alphanumeric codes – ASCII Code EBCDIC, ISCII Code, Hollerith Code, Morse Code, Teletypewriter (TTY), Error detection and correction, Universal Product Code, Code conversion	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Black board & Chalk
	Binary Arithmetic:	6	Digital Electronics and	Black board & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Binary addition, Binary subtraction, Negative number representation, Subtraction using 1's complement and 2's complement, Binary multiplication and division, Arithmetic in octal number system, Arithmetic in hexadecimal number system, BCD and Excess – 3 arithmetic		Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	
Paper-02 Digital Electronics Unit 2	**Boolean Algebra and Logic Gates:** Introduction, Logic (AND OR NOT), Boolean theorems, Boolean Laws, De Morgan's Theorem, Perfect Induction, Reduction of Logic expression using Boolean Algebra, Deriving Boolean expression from given circuit, exclusive OR and Exclusive NOR gates, Universal Logic gates, Implementation of other gates using universal gates, Input bubbled logic, Assertion level.	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Black board & Chalk
	Minterm, Maxterm and Karnaugh Maps: Introduction, minterms and sum of minterm form, maxterm and Product of maxterm form, Reduction technique using Karnaugh maps – 2/3/4/5/6 variable K-maps, Grouping of variables in K-maps, K-maps for product of sum form, minimize Boolean expression using K-map and obtain K-map from Boolean expression, Quine Mc Cluskey Method	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Black board & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper-02 Digital Electronics Unit 3	**Combinational Logic Circuits:** Introduction, Multi-input, multi-output Combinational circuits, Code converters design and implementations **Arithmetic Circuits:** Introduction, Adder, BCD Adder, Excess – 3 Adder, Binary Subtractors, BCD Subtractor, Multiplier, Comparator	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Black board & Chalk
Paper-02 Digital Electronics Unit 4	**Multiplexer, Demultiplexer, ALU, Encoder and Decoder:** Introduction, Multiplexer, Demultiplexer, Decoder, ALU, Encoders.	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Black board & Chalk
	Sequential Circuits: Flip-Flop: Introduction, Terminologies used, S-R flip-flop, D flip-fop, JK flipflop, Race-around condition, Master – slave JK flip-flop, T flip-flop, conversion from one type of flip-flop to another, Application of flipflops.	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain	Black board & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Tata McGraw Hill	
Paper-02 Digital Electronics Unit 5	**Counters:** Introduction, Asynchronous counter, Terms related to counters, IC 7493 (4-bit binary counter), Synchronous counter, Bushing, Type T Design, Type JK Design, Preset table counter, IC 7490, IC 7492, Synchronous counter ICs, Analysis of counter circuits.	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Black board & Chalk
	Shift Register: Introduction, parallel and shift registers, serial shifting, serial–in serial– out, serial–in parallel–out , parallel–in parallel–out, Ring counter, Johnson counter, Applications of shift registers, Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Black board & Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT:CS

CLASS:FYIT-DIV A SEMESTER: SEM-1 MONTH: JUL-OCT ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: develop logics which will help them to create programs, applications in C. Also by learning the basic programming constructs they can easily switch over to any other language in future.

PAPER, TITLE, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1,Imperative programming, UNIT 1	**Introduction**: Types of Programming languages, History, features and application. Simple program logic, program development cycle	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	pseudocode statements and flowchart symbols, sentinel value to end a program, programming and user environments, evolution of programming models., desirable program characteristics	3		

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	Fundamentals: Structure of a program. Compilation and Execution of a Program,Character Set, identifiers and keywords, data types	3		
	constants, variables and arrays, declarations, expressions, statements, Variable definition, symbolic constants	4		
UNIT 2	**Operators and Expressions:** Arithmetic operators, unary operators, relational and logical operators	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	assignment operators, assignment operators, the conditional operator, library functions.	3		
	Data Input and output: Single character input and output, entering input data	3		

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	scanf function, printf function, gets and puts functions, interactive programming	3		
Unit 3	**Conditional Statements and Loops:** Decision Making Within AProgram,Conditions, Relational Operators, Logical Connectives, If Statement, If-Else Statement.	3	Let us c-by Yashwant kanetkar	BLACK BOARD AND CHALK
	Loops: While Loop, Do While, For Loop. Nested Loops, Infinite Loops,Switch Statement	4		
	Functions: Overview, defining a function, accessing a function, passing arguments to a function, specifying argument data types, function prototypes,recursion, modular programming and functions, standard library of c functions	3		
	prototype of a function: foo1lal parameter list, return type,function call, block structure, passing arguments to a function: call by reference,call by value	3		

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

UNIT 4	**Program structure:** Storage classes, automatic variables, external variables, static variables,multifile programs	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	more library functions,Preprocessor: Features, #define and #include, Directives and Macros	3		
	Arrays: Definition, processing, passing arrays to functions, multidimensional arrays, arrays and strings.	4		
Unit 5	**Pointers:** Fundamentals, declarations, Pointers Address Operators, Pointer Type Declaration, Pointer Assignment, Pointer Initialization.	3	Let us c-by Yashwant kanetkar	BLACK BOARD AND CHALK
	Pointer Arithmetic, Functions and Pointers, Arrays And Pointers, Pointer Arrays, passing functions to other functions	3		

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	Structures and Unions: Structure Variables, Initialization, Structure Assignment, Nested Structure, Structures and Functions,	3		
	Structures and Arrays: Arrays of Structures, Structures Containing Arrays, Unions, Structures and pointer	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: FYIT-DIV A SEMESTER: I MONTH: JULY-OCT ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: Develop basic understanding of Operating System, the concept of Memory management, File System, I/O System, Deadlock. Also they will be able to know new concepts like virtualization and cloud computing. Finally through case studies they can have practical knowledge on present day OS.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT103 Operating Systems I	**Introduction:** What is an operating system? History of operating system, computer hardware .	3	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk
	Different operating systems, operating system concepts, system calls, operating system structure.	3		
	Processes and Threads: Processes, Threads, Interprocess-communication.	3		
	Scheduling, IPC problems.	3		
II	**Memory Management**: No memory abstraction, memory abstraction: address spaces, virtual memory.	3	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk
	Page Replacement Algorithms, design issues for paging systems, implementation issues and segmentation.	3		
	File Systems: Files, directories, file system implementation, file-system management and optimization.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	MS-DOS file system, UNIX V7 file system, CD ROM file system.	3		
III	**Input-Output:** Principles of I/O hardware, Principles of I/O software, I/O software layers.	3	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk
	disks, clocks, user interfaces: keyboard, mouse, monitor, thin clients, power management Resources.	3		
	Deadlocks: Introduction to deadlocks, the ostrich algorithm, deadlock detection and recovery.	3		
	Deadlock avoidance, deadlock prevention, issues.	3		
IV	**Virtualization and cloud**: History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization.	3	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk
	Hypervisor microkernels, memory virtualization, I/O virtualization, Virtual appliances.	3		
	Virtual machines on multicore CPUs, Clouds.	2		
	Multiple Processor System: Multiprocessors, multicomputer, distributed systems.	4		
V	**Case Study on LINUX and ANDROID:** History of Unix and Linux, Linux Overview, Processes in Linux, Memory management in Linux, I/O in Linux, Linux file system, security in Linux.	4	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk, PowerPoint Presentation
	Android	2		
	Case Study on Windows: History of windows through Windows 10, programming windows, system structure, processes and threads in windows.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Memory management, caching in windows, I/O in windows, Windows NT file system, Windows power management, Security in windows.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT: CS

CLASS:FYIT-DIV B SEMESTER: SEM-1 MONTH: JUL-OCT ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: develop logics which will help them to create programs, applications in C. Also by learning the basic programming constructs they can easily switch over to any other language in future.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
1 IP UNIT 1	**Introduction**: Types of Programming languages, History, features and application. Simple program logic, program development cycle	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	pseudocode statements and flowchart symbols, sentinel value to end a program, programming and user environments, evolution of programming models., desirable program characteristics	3		
	Fundamentals: Structure of a program. Compilation and Execution of a Program,Character Set, identifiers and keywords, data types	3		
	constants, variables and arrays, declarations, expressions, statements, Variable definition,	3		

	symbolic constants			
UNIT 2	**Operators and Expressions:** Arithmetic operators, unary operators, relational and logical operators	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	assignment operators, assignment operators, the conditional operator, library functions.	3		
	Data Input and output: Single character input and output, entering input data	2		
	scanf function, printf function, gets and puts functions, interactive programming	3		
UNIT 4	**Program structure:** Storage classes, automatic variables, external variables, static variables,multifile programs	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	more library functions,Preprocessor: Features, #define and #include, Directives and Macros	3		

	Arrays: Definition, processing, passing arrays to functions, multidimensional arrays, arrays and strings.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:FYIT-DIV B SEMESTER: SEM-I MONTH: JUL-SEP ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: Understand role of Operating System in terms of process, memory, file and I/O management. Apply and analysis the concept of a process, thread, mutual exclusion and deadlock. Evaluate performance of process scheduling algorithms and IPC. Apply and analysis the concepts of memory management techniques. Apply and analyze different techniques of file and I/O management.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-3, OS, UNIT-1	**Introduction:** What is an operating system? History of operating system, computer hardware, different operating systems, operating system concepts, system calls, operating system structure.	4	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	Blackboard & Chalk
	Processes and Threads: Processes, threads	4		
	Interprocess communication, scheduling, IPC problems.	4		
UNIT-2	**Memory Management**: No memory abstraction, memory abstraction: address spaces, virtual memory	3	Modern Operating Systems-by Andrew S.	Blackboard & Chalk
	page replacement algorithms, design issues for paging systems, implementation issues, segmentation.	3		

	File Systems: Files, directories, file system implementation, file-system management and optimization	4	Tanenbaum, Herbert Bos	
	MS-DOS file system, UNIX V7 file system, CD ROM file system.	2		
UNIT-3	**Input-Output:** Principles of I/O hardware, Principles of I/O software	4	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	Blackboard & Chalk
	I/O software layers, disks, clocks,user interfaces: keyboard, mouse, monitor, thin clients, power management	3		
	Deadlocks: Resources, introduction to deadlocks, the ostrich algorithm,	2		
	deadlock detection and recovery, deadlock avoidance, deadlock prevention, issues.	3		
UNIT-4	**Virtualization and Cloud**: History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization, hypervisor microkernels	2	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	Blackboard & Chalk
	memory virtualization, I/O virtualization, Virtual appliances, virtual machines on multicore CPUs, Clouds.	2		
	Multiple Processor Systems : Multiprocessors	3		
	Multicomputers, Distributed systems.	5

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS:FYIT-DIV C SEMESTER: SEM-1 MONTH: JUL-OCT ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- To able to learn and understand the basic concepts of digital electronics with its applications and various laws to be implemented in area of electronics.
- To think analytically, creatively and critically in developing robust, extensible and highly maintainable technological solutions to simple and complex problems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT102 Digital Electronics UNIT 1	**Number System:** Analog System, digital system, numbering system, binary number system, octal number system, hexadecimal number system, conversion from one number system to another, floating point numbers	4	Digital Electronics and Logic Design By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	BLACK BOARD AND CHALK
	weighted codes binary coded decimal, non-weighted codes Excess – 3 code, Gray code, Alphanumeric codes – ASCII Code, EBCDIC, ISCII Code, Hollerith Code, Morse Code, Teletypewriter (TTY) Error detection and correction, Universal Product Code, Code conversion	4		
	Binary Arithmetic Binary addition, Binary subtraction, Negative number representation, Subtraction using 1's complement and 2's complement	2		
	Binary multiplication and division, Arithmetic in octal number system, Arithmetic in hexadecimal number system BCD and Excess – 3 arithmetic	2		
USIT102	**Boolean Algebra and Logic Gates:-**Introduction, Logic (AND OR NOT), Boolean theorems, Boolean Laws, De Morgan's Theorem,	3	Digital Electronics and Logic Design	BLACK BOARD AND CHALK

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Digital Electronics UNIT 2	Perfect Induction, Reduction of Logic expression using Boolean Algebra,		By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	
	Deriving Boolean expression from given circuit, exclusive OR and Exclusive NOR gates, Universal Logic gates, Implementation of other gates using universal gates, Input bubbled logic, Assertion level, Implementation of other gates using universal gates, Input bubbled logic, Assertion level	3		
	Minterm, Maxterm and Karnaugh Maps: Introduction, minterms and sum of minterm form, maxterm and Product of maxterm form, Reduction technique using Karnaugh maps – 2/3/4/5/6 variable K-maps Grouping of variables in K-maps, K-maps for product of sum form, minimize Boolean expression using K-map and obtain K-map from Boolean expression, Quine Mc Cluskey Method.	6		
USIT102 Digital Electronics UNIT 3	**Combinational Logic Circuits:** Introduction, Multi-input, multi-output Combinational circuits, Code converters design and implementations	6	Digital Electronics: Principles, Devices and Applications by Anil K. Maini	BLACK BOARD AND CHALK
	Arithmetic Circuits: Introduction, Adder, BCD Adder, Excess – 3 Adder, Binary Subtractors, BCD Subtractor, Multiplier, Comparator.	6

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYIT-A SEMESTER: SEM-2 MONTH: DEC-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- To gain an understanding why the green computing is instrumental for the environment.
- Identify key issues relevant to green computing and evaluate different approaches to these problems.
- Study of designing, engineering, manufacturing, using and disposing of computing devices in a way that reduces their environmental impact.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
5 GREEN COMPUTING UNIT 2	Minimizing Power Usage: Power Problems, Monitoring Power Usage, Servers, Low-Cost Options, Reducing Power Use, Data De-Duplication, Virtualization, Management, Bigger Drives, Involving the Utility Company,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Low Power Computers, PCs, Linux, Components, Servers, Computer Settings, Storage, Monitors, Power Supplies, Wireless Devices, Software.	3		
	Cooling: Cooling Costs, Power Cost, Causes of Cost, Calculating Cooling Needs, Reducing Cooling Costs, Economizers, On-Demand Cooling, HP's Solution, Optimizing Airflow, Hot Aisle/Cold Aisle, Raised Floors, Cable Management, Vapour Seal,	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Prevent Recirculation of Equipment Exhaust, Supply Air Directly to Heat Sources, Fans, Humidity, Adding Cooling, Fluid Considerations, System Design, Datacentre Design, Centralized Control, Design for Your Needs, Put Everything Together.	3		
UNIT 3	**Changing the Way of Work:** Old Behaviours, starting at the Top, Process Reengineering with Greening Mind, Analysing the Global Impact of Local Actions,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Steps: Water, Recycling, Energy, Pollutants, Teleworkers and Outsourcing, Telecommuting, Outsourcing, how to Outsource.	3		
	Going Paperless: Paper Problems, The Environment, Costs: Paper and Office, Practicality, Storage, Destruction, Going Paperless, Organizational Realities, Changing Over, Paperless Billing, Handheld Computers vs. the Clipboard,	3		
	Unified Communications, Intranets, What to Include, Building an Intranet, Microsoft Office SharePoint Server 2007, Electronic Data Interchange (EDI), Nuts and Bolts, Value Added Networks, Advantages, Obstacles.	3		
UNIT 5	**Greening Your Information Systems:** Initial Improvement Calculations, Selecting Metrics, Tracking Progress, Change Business Processes, Customer Interaction, Paper Reduction,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT: CS

CLASS: FYIT-A SEMESTER: SEM-2 MONTH: DEC-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- To gain an understanding why the green computing is instrumental for the environment.
- Identify key issues relevant to green computing and evaluate different approaches to these problems.
- Study of designing, engineering, manufacturing, using and disposing of computing devices in a way that reduces their environmental impact.

PAPER, TITLE, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 5,GREEN COMPUTING, UNIT 1	**Overview and Issues:** Problems: Toxins, Power Consumption, Equipment Disposal, Company's Carbon Footprint: Measuring, Details, reasons to bother, Plan for the Future, Cost Savings: Hardware, Power.	4	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Initiatives and Standards: Global Initiatives: United Nations, Basel Action Network, Basel Convention	4		
	North America: The United States, Canada, Australia, Europe, WEEE Directive, RoHS, National Adoption, Asia:	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Japan, China, Korea.			
UNIT 4	**Recycling:** Problems, China, Africa, Materials, Means of Disposal, Recycling, Refurbishing, Make the Decision, Life Cycle, from beginning to end, Life, Cost, Green Design, Recycling Companies, Finding the Best One, Checklist, Certifications	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Hard Drive Recycling, Consequences, cleaning a Hard Drive, Pros and cons of each method, CDs and DVDs, good and bad about CD and DVDs disposal, Change the mind-set, David vs. America Online	3		
	Hardware Considerations: Certification Programs, EPEAT, RoHS, Energy Star, Computers, Monitors, Printers, Scanners, All-in-Ones, Thin Clients, Servers, Blade Servers, Consolidation, Products,	3		
	Hardware Considerations, Planned Obsolescence, Packaging, Toxins, Other Factors, Remote Desktop, Using Remote Desktop, Establishing a Connection, In Practice	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.IT SEMESTER: II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand and realize the Interfacing of memory & various I/O devices with 8085 microprocessors.
- Understand and classify the instruction set of 8085 microprocessor and distinguish the use of different instructions and apply it in assembly language programming.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-II UNIT-III	**Programming Techniques With Additional Instructions:** Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	4		Blackboard, Chalk
	Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT-IV	**Code Conversion, BCD Arithmetic, and 16-Bit Data Operations:** BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-toSeven-Segment-LED Code Conversion, Binary-to-ASCII and ASCIIto-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Software Development System and Assemblers: Microprocessors-Based Software Development system, Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	4		Blackboard, Chalk
	Interrupts: The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		Blackboard, Chalk
UNIT-V	**The Pentium and Pentium Pro microprocessors:** Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor, Special Pentium Pro features.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Core 2 and later Microprocessors: Introduction, Pentium II software changes, Pentium IV and Core 2, i3, i5 and i7.	4		Blackboard, Chalk
	SUN SPARC Microprocessor: Architecture, Register file, data types and instruction format	4		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: FYIT SEMESTER: II MONTH: DECE to MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

To become familiar with the architecture and the instruction set of an Intel microprocessor

To study the Assembly language programming as well as the design of various types of digital and analog interfaces

To understand the architecture of 8085 and 8051

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 MPA Unit 1	**Microprocessor, microcomputers, and Assembly Language:** Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	4	Microprocessors Architecture, Programming and Applications with the 8085.	Black board & Chalk

			Ramesh Gaonkar PENRAM Fifth 2012	
	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
Paper-02 MPA Unit 2	**Interfacing of I/O Devices** : Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Instructions:	4	Microprocessors Architecture,	Black board & Chalk

	Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program		Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: F.Y.B.Sc. SEMESTER: II MONTH: Dec To March ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- Object-oriented programming aims to implement real-world entities like inheritance, hiding, polymorphism, etc in programming. The main aim of OOP is to bind together the data and the functions that operate on them so that no other part of the code can access this data except that function.

The learners will be able to :

- To understand difference between object oriented and procedural oriented language.
- To understand advantages benefits and applications of object oriented language.
- To understand characteristics of object oriented language.
- To gain how to implement classes, methods and objects.
- To understand constant variables, data types, operators of C++ language.
- To understand use of constructor and destructor and using its implementation.
- To enable use of arrays, pointers and objects.
- To understand polymorphism and its types.
- To understand virtual function and pure virtual function / abstract function.
- To understand inheritance and its types with constructor.
- To understand run time error handling using try, catch and throw key words and benefits of it.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT201 Object Oriented Programming UNIT-I	**Object Oriented Methodology:** Introduction, Advantages and Disadvantages of Procedure Oriented Languages, what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	6	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation, Inheritance, Polymorphism, Dynamic Binding, Message Passing	6		Black Board, Projector, PPT.
USIT201 Object Oriented Programming UNIT-II	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions, passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	8	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors	4		
USIT201 Object Oriented Programming UNIT-III	**Polymorphism:** Concept of function overloading, overloaded operators, overloading unary and binary operators, overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types,	7	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
	Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors.	5		
USIT201 Object Oriented Programming UNIT-IV	**Program development using Inheritance:** Introduction, understanding inheritance, Advantages provided by inheritance, choosing the access specifier, Derived class declaration, derived class constructors, class hierarchies, multiple inheritance, multilevel inheritance, containership, hybrid inheritance.	8	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
	Exception Handling: Introduction, Exception Handling Mechanism, Concept of throw & catch with example	4

NAME OF THE STAFF: AVINASH DILIP SONAWNAE **DEPARTMENT**: ____IT____

CLASS: FYIT_A DIV **SEMESTER**: 2 **MONTH**: Dec to March **ACADEMIC YEAR:** 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand HTML**
- **Understand JavaScript**
- **Understand how server-side programming works on the web.**
- **PHP Basic syntax for variable types and calculations.**
- **Creating conditional structures**
- **Storing data in arrays**
- **Using PHP built-in functions and creating custom functions**
- **Understanding POST and GET in form submission.**
- **How to receive and process form submission data.**
- **Reading and writing cookies.**
- **Security tips (i.e. SQL Injection)**
- **Create a database in phpMyAdmin.**
- **Read and process data in a MySQL database. Students will learn JavaScript's role in websites and web apps.**
- **Students will be introduced to basic CS concepts**
- **Students will learn basic programming structures such as: variables, functions arrays etc.**
- **Students will learn how JavaScript works with HTML and CSS.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT203 Web Programming Unit I	**Internet and the World Wide Web:** What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers – internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. search engine, web saver – apache, IIS, proxy server, HTTP protocol	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	BLACK BOARD AND CHALK
	HTML5: Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.	6		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to anotherURL, creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	BLACK BOARD AND CHALK
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout, formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment, creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page	6		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT III	Java Script: Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	2	JavaScript 2.0: The Complete Reference BY Thomas Powell and Fritz Schneider	BLACK BOARD AND CHALK
	Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	3		
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with	2		
	.Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer	2		
	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT IV	PHP: Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types,	3	PHP Project for Beginners BY SharanamShah, Vaishali	BLACK BOARD AND CHALK
	control structures, branching, looping, termination, functions, passing information with PHP, GET, POST,	3		
	formatting form variables, superglobal arrays, strings and string functions	3		
	regular expressions, arrays, number handling, basic PHP errors/problems	3		
UNIT V	Advanced PHP and MySQL : PHP/MySQL Functions, Integrating web forms and databases,	3	PHP Project for Beginners BY SharanamShah, Vaishaliz	BLACK BOARD AND CHALK
	Displaying queries in tables, Building Forms from queries,	3		
	String and Regular Expressions, Sessions,	3		
	Cookies and HTTP, E-Mail	3

	Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging, Counters and Time Delays.	3		
	Illustrative Program: Hexadecimal Counter, zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	3		
	Stack Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		
UNIT 4	BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-to-Seven-Segment-LED Code Conversion, Binary-to-ASCII and ASCII-to-Binary Code Conversion,	4	Microprocessors Architecture, Programming and Applications with t 8085 by Ramesh Gaonkar	Black board and chalk
	BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	2		
	Microprocessors-Based Software Development system, OS and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	3		

	The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		
UNIT 5	Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	Black board and chalk
	Special Pentium Pro features, Introduction, Pentium II software changes.	3		
	Pentium IV and Core 2, i3, i5 and i7.	3		
	Architecture, Register file, data types and instruction format	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT: CS

CLASS:FY BSc IT DIV-B(OOPS) SEMESTER: SEM-2 MONTH:DEC-MAR ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- The learners will be able to :
- To understand how C++ improves C with object-oriented features.
- To learn how to write inline functions for efficiency and performance.
- To learn the syntax and semantics of the C++ programming language.
- To learn how to design C++ classes for code reuse.
- To learn how to implement copy constructors and class member functions.
- To understand the concept of data abstraction and encapsulation.
- To learn how to overload functions and operators in C++.
- To learn how containment and inheritance promote code reuse in C++.
- To learn how inheritance and virtual functions implement dynamic binding with polymorphism.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER1 OOP UNIT 1	**Object Oriented Methodology**: Introduction, Advantages and Disadvantages of Procedure Oriented Languages,	3	Object Oriented Programming with C++ BY E. Balagurusamy	BLACK BOARD AND CHALK
	what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	3		
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation,	3		
	Inheritance, Polymorphism, Dynamic Binding	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Polymorphism:** Concept of function overloading, overloaded operators,	3	Object Oriented Programming with C++ BY E. Balagurusamy	BLACK BOARD AND CHALK
	overloading unary and binary operators, overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types,	3		
	Virtual Functions: Introduction and need, Pure Virtual Functions,	3		
	Static Functions, this Pointer, abstract classes, virtual	3		
UNIT 4	**Program development using Inheritance:** Introduction, understanding inheritance, Advantages provided by inheritance,	3	Object Oriented Programming with C++ BY E. Balagurusamy	BLACK BOARD AND CHALK
	choosing the access specifier, Derived class declaration, derived class constructors, class hierarchies,	3		
	multiple inheritance, multilevel inheritance, containership, hybrid inheritance.	3		
	Exception Handling: Introduction, Exception Handling Mechanism	3		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 36

--

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT: CS

CLASS: FYIT-DIV B SEMESTER: SEM-2 MONTH: DEC-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- Perform object oriented programming to develop solution to problems demonstrating usage of control structures, modularity, I/O and other standard language constructs.
- Demonstrate adeptness of object oriented programming to develop solution to problem demonstration usage of data abstraction, encapsulation, and inheritance.

PAPER, TITLE,UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1,Object oriented programming ,UNIT 2	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions, passing object as an argument	4	Object Oriented Programming with C++ by E.Balagurusamy	BLACK BOARD AND CHALK
	Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	4		
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructor	4		

UNIT 5	**Templates:** Introduction, Function Template and examples,	3	Object Oriented Programming with C++ by E.Balagurusamy	BLACK BOARD AND CHALK
	Class Template and examples.	3		
	Working with Files: Introduction, File Operations, Various File Modes,	4		
	File Pointer and their Manipulation	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.IT SEMESTER: II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

- design dynamic websites that meet specified needs and interests.
- write well-structured, easily maintained, standards-compliant, accessible HTML code.
- use JavaScript to add dynamic content to pages.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-III UNIT-II	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to another URL,	3	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Blackboard, Chalk
	creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions.	2		Blackboard, Chalk
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout,	2		Blackboard, Chalk
	formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment,	2		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page	3		Blackboard, Chalk
UNIT-III	**Java Script:** Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	1	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Blackboard, Chalk
	Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	2		Blackboard, Chalk
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with	2		Blackboard, Chalk
	Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp	2		Blackboard, Chalk
	Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer	2		Blackboard, Chalk
	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp, onMove, onReset, onResize, onSelect, onSubmit, onUnload	3		Blackboard, Chalk
UNIT-V	**Advanced PHP and MySQL :** PHP/MySQL Functions, Integrating web forms and databases,	5		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Displaying queries in tables, Building Forms from queries, String and	3	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Blackboard, Chalk
	Regular Expressions, Sessions, Cookies and HTTP, E-Mail	4		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SURBHI SHAH DEPARTMENT: IT-CS CLASS:FYIT-DIV C

SEMESTER: SEM-II MONTH: JAN-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: to think analytically, creatively and critically in developing robust, extensible and highly maintainable technological solutions to simple and complex problems to apply their knowledge and skills to be employed and excel in IT professional careers and/or to continue their education in IT and/or related post graduate programmes

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER NO:II TITLE OF PAPER:- **Microprocessor Architecture** UNIT 1	**Microprocessor, microcomputers, and Assembly Language:** Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC, JAMBOARD,MOBILE EAR- PHONE
	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	4		
	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer	5		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 2	**Interfacing of I/O Devices** Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC, JAMBOARD,MOBILE EAR- PHONE
	Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.	5		
	Introduction to 8085 Instructions: Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program.	4		
UNIT 3	**Programming Techniques With Additional Instructions:** Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.	4	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC, JAMBOARD,MOBILE EAR- PHONE
	Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	4		
	Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	4

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYIT-C SEMESTER: SEM-2 MONTH: DEC-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- Perform object oriented programming to develop solution to problems demonstrating usage of control structures, modularity, I/O and other standard language constructs.
- Demonstrate adeptness of object oriented programming to develop solution to problem demonstration usage of data abstraction, encapsulation, and inheritance.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
1 OBJECT ORIENTED PROGRAMMING UNIT 4	**Program development using Inheritance:** Introduction, understanding inheritance, Advantages provided by inheritance, choosing the access specifier, Derived class declaration,	3	Object Oriented Programming with C++ by E.Balagurusamy	BLACK BOARD AND CHALK
	derived class constructors, class hierarchies, multiple inheritance,	3		
	Multilevel inheritance, Containership, hybrid inheritance. Exception Handling: Introduction,	3		
	Exception Handling Mechanism, Concept of throw & catch with example	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 5	**Templates:** Introduction, Function Template and examples,	3	Object Oriented Programming with C++ by E.Balagurusamy	BLACK BOARD AND CHALK
	Class Template and examples.	3		
	Working with Files: Introduction, File Operations, Various File Modes,	4		
	File Pointer and their Manipulation	2		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 24

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:FYIT-DIV C SEMESTER: SEM-II MONTH: DEC-MAR ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: To apply fundamental programming constructs. To illustrate the concept of classes and objects, Data Abstraction and Data Encapsulation. To implement the concept of Pointer, friend function , Virtual Functions, Constructor& Destructors.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-1, OOPS, UNIT 1	**Object Oriented Methodology:** Introduction, Advantages and Disadvantages of Procedure Oriented Languages, what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	5	Object Oriented Programming with C++ -by E. Balagurusamy	Blackboard & Chalk
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation	3		
	Inheritance, Polymorphism, Dynamic Binding, Message Passing	4		

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

UNIT 2	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions	4	Object Oriented Programming with C++ -by E. Balagurusamy	Blackboard & Chalk
	passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	4		
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors.	4		
UNIT 3	**Polymorphism:** Concept of function overloading, overloaded operators, overloading unary and binary operators	4	Object Oriented Programming with C++ -by E. Balagurusamy	Blackboard & Chalk
	overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types.	5		
	Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors.	3		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 36

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: AVINASH DILIP SONAWNAE **DEPARTMENT**: ____IT____

CLASS: FYIT_C DIV **SEMESTER**: 2 **MONTH**: Dec to March **ACADEMIC YEAR:** 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand HTML**
- **Students will learn how t works with HTML and CSS**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT203 Web Programming	**Internet and the World Wide Web:** What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers – internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. search engine, web saver – apache, IIS, proxy server, HTTP protocol	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	BLACK BOARD AND CHALK

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit I	**HTML5:** Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.	6		
Unit II	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to anotherURL, creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	BLACK BOARD AND CHALK
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout, formatting tables: applying table borders, applying	6		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	background and foreground fills, changing cell padding, spacing and alignment, creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT:CS

CLASS: FY BSc IT DIV C(WEB) SEMESTER:SEM -2 MONTH: DEC-MAR ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand how server-side programming works on the web.
- PHP Basic syntax for variable types and calculations.
- Creating conditional structures
- Storing data in arrays
- Using PHP built-in functions and creating custom functions
- Understanding POST and GET in form submission.
- How to receive and process form submission data.
- Reading and writing cookies.
- Security tips (i.e. SQL Injection)
- Create a database in phpMyAdmin.
- Read and process data in a MySQL database. Students will learn JavaScript's role in websites and web apps.
- Students will be introduced to basic CS concepts
- Students will learn basic programming structures such as: variables, functions arrays etc.
- Students will learn how JavaScript works with HTML and CSS.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3	**Java Script:** Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	2	JavaScript 2.0: The Complete	BLACK BOARD AND CHALK

WEB PROGRAMMING UNIT 3	**Operators**: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	3	Reference BY Thomas Powell and Fritz Schneider	
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with,	2		
	Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp **Document and its associated objects:** document, Link, Area, Anchor, Image, Applet, Layer	2		
	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp,	3		
UNIT 4	**PHP:** Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types,	3	PHP Project for Beginners BY SharanamShah, Vaishali	BLACK BOARD AND CHALK
	control structures, branching, looping, termination, functions, passing information with PHP, GET, POST,	3		
	formatting form variables, superglobal arrays, strings and string functions,	3		

	regular expressions, arrays, number handling, basic PHP errors/problems	3		
UNIT 5	**Advanced PHP and MySQL :** PHP/MySQL Functions, Integrating web forms and databases,	3	PHP Project for Beginners BY SharanamShah, Vaishali	BLACK BOARD AND CHALK
	Displaying queries in tables, Building Forms from queries,	3		
	String and Regular Expressions, Sessions,	3		
	Cookies and HTTP, E-Mail	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT:CS

CLASS:SYIT-DIV A SEMESTER: SEM-4 MONTH: DEC-MAR ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
Have a knowledge and understanding of geometrical transformations and 3D viewing.
Have a knowledge and understanding of techniques for representing 3D geometrical objects
Explain different Image enhancement techniques
Understand and review image transforms

PAPER,TITLE , UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 5,Computer graphics and animation, UNIT 3	**Viewing in 3D:Stages in 3D viewing, Canonical View Volume (CVV), Specifying an Arbitrary 3D View, Examples of 3D Viewing, The Mathematics of Planar Geometric Projections, Combined transformation matrices for projections and viewing, Coordinate Systems and matrices, camera model and viewing pyramid.**	7	Computer graphics by Rajesh mourya Image processing by Dhananjay	BLACK BOARD AND CHALK
	Light:Radiometry,Transport,Equation,Photometry	4		

	Color:Colorimetry,ColorSpaces,ChromaticAdaptation,Color Appearance	4		
UNIT 4	**Visible-Surface Determination:Techniques for efficient Visible-Surface Algorithms, Categories of algorithms, Back face removal, The z-Buffer Algorithm, Scan-line method, Painter's algorithms (depth sorting), Area sub-division method, BSP trees, Visible-Surface Ray Tracing, comparison of the methods.**	7	Computer graphics by Rajesh mourya Image processing by Dhananjay	BLACK BOARD AND CHALK
	Plane Curves and Surfaces:Curve Representation, Nonparametric Curves, Parametric Curves,Parametric Representation of a Circle, Parametric Representation of an Ellipse, Parametric Representation of a Parabola, Parametric Representation of a Hyperbola	3		
	Representation of Space Curves,Cubic Splines, , Bezier Curves, B-spline Curves, B-spline Curve Fit,B-spline Curve Subdivision, Parametric Cubic Curves, Quadric Surfaces. Bezier Surfaces	6		
Unit 5	**Computer Animation:Principles of Animation, Key framing, Deformations, Character Animation, Physics-Based Animation, Procedural Techniques, Groups of Objects.**	6	Computer graphics by Rajesh mourya Image processing by Dhananjay	BLACK BOARD AND CHALK

	Image Manipulation and Storage: What is an Image? Digital image file formats, Image compression standard – JPEG,	4		
	Image Processing - Digital image enhancement,contrast stretching, Histogram Equalization, smoothing and median Filtering.	5

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:SYIT-DIV A SEMESTER: SEM-IV MONTH: DEC-MAR ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: Understand the basic concepts of Computer Graphics. Demonstrate various algorithms for scan conversion and filling of basic objects and their comparative analysis. Apply geometric transformations, viewing and clipping on graphical objects.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-5, CGA, UNIT-1	**Introduction to Computer Graphics:**Overview of Computer Graphics, Computer Graphics Application and Software, Description of some graphics devices, Input Devices for Operator Interaction, Active and Passive Graphics Devices, Display Technologies, Storage Tube Graphics Displays, Calligraphic Refresh Graphics Displays	3	Computer Graphics by Hearn, Baker	Blackboard & Chalk
	Raster Refresh (Raster-Scan) Graphics Displays, Cathode Ray Tube Basics, Color CRT Raster Scan Basics, Video Basics, The Video Controller, Random-Scan Display Processor, LCD displays.	2		
	Scan conversion – Digital Differential Analyzer (DDA) algorithm, Bresenhams' Line drawing algorithm.Bresenhams' method of Circle drawing, Midpoint Circle Algorithm, Midpoint Ellipse Algorithm	3		

	Mid-point criteria, Problems of Aliasing, end-point ordering and clipping lines, Scan Converting Circles, Clipping Lines algorithms– Cyrus-Beck, Cohen-Sutherland and Liang-Barsky, Clipping Polygons, problem with multiple components.	3		
UNIT-2	**Two-Dimensional Transformations:**Transformations and Matrices, Transformation Conventions, 2D Transformations, Homogeneous Coordinates and Matrix Representation of 2D Transformations, Translations and Homogeneous Coordinates	2	Computer Graphics by Hearn, Baker	Blackboard & Chalk
	Rotation, Reflection, Scaling, Combined Transformation, Transformation of Points, Transformation of The Unit Square, Solid Body Transformations, Rotation About an Arbitrary Point.	2		
	Reflection through an Arbitrary Line ,A Geometric Interpretation of Homogeneous Coordinates, The Window-to Viewport Transformations.	2		
	Three-Dimensional Transformations: Three-Dimensional Scaling, Three-Dimensional Shearing, Three Dimensional Rotation, Three-Dimensional Reflection, Three Dimensional Translation, Multiple Transformation, Rotation about an Arbitrary Axis in Space, Reflection through an Arbitrary Plane.	3		
	Matrix Representation of 3D Transformations, Composition of 3D Transformations, Affine and Perspective Geometry, Perspective Transformations, Techniques for Generating Perspective Views, Vanishing Points	2		

	the Perspective Geometry and camera models, Orthographic Projections, Axonometric Projections, Oblique Projections, View volumes for projections.	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: SYIT

SEMESTER: IV MONTH: DEC-MARCH ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Acquire knowledge of programming language java.
- Understand data types, control flow statements, iterations and classes.
- Gain proficiency in inheritance and packages.
- Understand enumeration, arrays, exceptions and byte stream.
- Acquire knowledge of event handling and layouts.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT401, Core Java, Unit III	**Inheritance:** Derived Class Objects, Inheritance and Access Control, Default Base Class Constructors, this and super keywords.	04	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk
	Abstract Classes And Interfaces, Abstract Classes, Abstract Methods, Interfaces, What Is An Interface? How Is An Interface Different From An Abstract Class?, Multiple Inheritance, Default Implementation, Adding New Functionality, Method Implementation, Classes V/s Interfaces, Defining An Interface, Implementing Interfaces.	05	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk
	Packages: Creating Packages, Default Package, Importing Packages, Using A Package.	03	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk

USIT401, Core Java, Unit V	**Event Handling:** Delegation Event Model, Events, Event classes, Event listener interfaces, Using delegation event model, adapter classes and inner classes.	03	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk
	Abstract Window Toolkit: Window Fundamentals, Component, Container, Panel, Window, Frame, Canvas. Components – Labels, Buttons, Check Boxes, Radio Buttons, Choice Menus, Text Fields, Text, Scrolling List, Scrollbars, Panels, Frames	07	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk
	Layouts: Flow Layout, Grid Layout, Border Layout, Card Layout.	02	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: S.Y.I.T.-A (Core Java)

SEMESTER: IV

MONTH: December - March

ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S :
The learners will be able to :

-Understand basics of Java programming language .

-Learn to control the flow of execution of the program.

-Understand of to create java classes and objects and using them to make java application

-Learn the concepts of multi threading and exception handling.

-Learn to use streams for reading and writing data to and from files.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT401 , Unit 1, Core Java .	**Introduction:** History, architecture and its components, Java Class File, Java Runtime Environment, The Java Virtual Machine, JVM Components, The Java API, java platform, java development kit, Lambda Expressions, Methods References, Type Annotations, Method Parameter Reflection, setting the path environment variable, Java Compiler And Interpreter, java programs, java applications, main(), public, static, void, string[]	08	Core Java 8 for Beginners -Vaishali Shah, Sharnam Shah	Black Board and chalk.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ____ HEMANT WANI__ DEPARTMENT: _____BSC-IT___ CLASS: __SYIT___ SEMESTER: ___IV

MONTH: ____December to March_____ ACADEMIC YEAR: ____2019-20__

LEARNING OBJECTIVE/S:
The learners will be able to:

To adhere to the highest standards of ethics, including relevant industry and organizational codes of conduct. To be capable of managing complex IT projects with consideration of the human, financial and environmental factors. To work effectively as a part of a team to achieve a common stated goal.

TITLE PAPER, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Software Engineering USIT404 Unit - 1	**Introduction**: What is software engineering? Software Development Life Cycle, Requirements Analysis, Software Design, Coding, Testing, Maintenance etc. Software Requirements: Functional and Non-functional requirements, User Requirements, System Requirements, Interface Specification, Documentation of the software requirements. Software Processes: Process and Project, Component Software Processes. Software Development Process Models. • Waterfall Model. • Prototyping. • Iterative Development. • Rational Unified Process. • The RAD Model • Time boxing Model. Agile software	3 4 3	Ian Somerville Roger Pressman	Chalk, Blackboard

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	development: Agile methods. Plan-driven and agile development, Extreme programming, Agile project management methods.	2		
Software Engineering USIT404 Unit - 2	**Socio-technical system:** Essential characteristics of socio technical systems, Emergent System Properties, Systems Engineering. Components of system such as organization, people and computers, Dealing Legacy Systems. Critical system: Types of critical system. A simple safety critical system, Dependability of a system, Availability and Reliability, Safety and Security of Software systems. Requirements Engineering Processes: Feasibility study, Requirements elicitation and analysis, Requirements Validations, Requirements Management	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard
Software Engineering USIT404 Unit - 3	**Architectural Design:** Architectural Design Decisions, System Organisation, Modular Decomposition Styles, Control Styles, Reference Architectures. User Interface Design: Need of UI design, Design issues, The UI design Process, User analysis, User Interface Prototyping, Interface Evaluation. Project Management Software Project Management, Management activities, Project Planning, Project Scheduling, Risk Management. Quality Management: Process and Product Quality, Quality assurance and Standards, Quality Planning,	2 3 2 2 3	Ian Somerville Roger Pressman	Chalk, Blackboard

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Quality Control, Software Measurement and Metrics.			
Software Engineering USIT404 Unit - 4	**Verification and Validation:** Planning Verification and Validation, Software Inspections, Automated Static Analysis, Verification and Formal Methods. Software Testing: System Testing, Component Testing, Test Case Design, Test Automation. Software Measurement: Size-Oriented Metrics, Function-Oriented Metrics, Extended Function Point Metrics **Software Cost Estimation:** Software Productivity, Estimation Techniques, Algorithmic Cost Modelling, Project Duration and Staffing.	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard
Software Engineering USIT404 Unit - 5	**Process Improvement:** Process and product quality, Process Classification, Process Measurement, Process Analysis and Modeling, Process Change. The CMMI Process Improvement Framework. Service Oriented Software Engineering: Services as reusable components, Service Engineering. Software Development with Services. Software reuse: The reuse landscape, Application frameworks, Software product lines, COTS product reuse. Distributed software engineering: Distributed systems issues, Client–server computing, Architectural patterns for distributed systems, Software as a service.	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**SY.B SC(IT)-C**_____ SEMESTER: ____**IV**_____MONTH: _____**DECEMBER-MARCH**_____ ACADEMIC YEAR: _____**2019-2020**_____

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand the concept of transformations and its types in 2D and 3D in computer graphics and how those can be implemented in variation of applications including Animation.**
- **Understanding the representation of matrices, projection in CG and its usage.**
- **To implement concepts, creation and how it works with different types of animation.**
- **To make understand what is image ,how it is created and how it is used in varieties of processing.**
- **To make understand the concept of image enhancement, compression,filtering and histogram of image to study subjective improvisation of image in applications to reduce the noise**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-05 (USIT405) **Computer Graphics and Animation**	**Two-Dimensional Transformations:** Transformations and Matrices, Transformation Conventions, 2D Transformations, Homogeneous Coordinates and Matrix Representation of 2D Transformations, Translations and Homogeneous Coordinates, Rotation, Reflection, Scaling, Combined Transformation, Transformation of Points,	06	Computer Graphics by R.K Maurya	Textbook, Blackboard, Chalk and Duster.

Unit No -02	Transformation of The Unit Square, Solid Body Transformations, Rotation About an Arbitrary Point, Reflection through an Arbitrary Line, A Geometric Interpretation of Homogeneous Coordinates, The Window-to-Viewport Transformations.			
Computer Graphics and Animation	**Three-Dimensional Transformations:** Three-Dimensional Scaling, Three-Dimensional Shearing, Three-Dimensional Rotation, Three-Dimensional Reflection, Three-Dimensional Translation, Multiple Transformation, Rotation about an Arbitrary Axis in Space, Reflection through an Arbitrary Plane, Matrix Representation of 3D Transformations, Composition of 3D Transformations,. Affine and Perspective Geometry, Perspective Transformations, Techniques for Generating Perspective Views, Vanishing Points, the Perspective Geometry and camera models, Orthographic Projections, Axonometric Projections, Oblique Projections, View volumes for projections.	06	Computer Graphics by R.K Maurya	Textbook, Blackboard, Chalk and Duster. Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -05	**Computer Animation:** Principles of Animation, Key framing, Deformations, Character Animation, Physics-Based Animation, Procedural Techniques, Groups of Objects.	06	Computer Graphics by R.K Maurya.	Projector, Laptop, PPTs.
	Image Manipulation and Storage: What is an Image? Digital image file formats, Image compression standard – JPEG, Image Processing - Digital image enhancement,	06	Digital Image Processing by Dhananjay.	Textbook, Blackboard, Chalk and Duster,

	contrast stretching, Histogram Equalization, smoothing and median Filtering.			Projector, Laptop, PPTs.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:S.Y.BSC(I.T) Div-B & C SEMESTER: **IV** MONTH:DECEMBER-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to : To list the basic concepts used in computer graphics

To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping.

To describe the importance of viewing and projections.

To define the fundamentals of animation, virtual reality and its related technologies.

To understand a typical graphics pipeline

To design an application with the principles of virtual reality

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Computer Graphics and Animation USIT405 Unit-1	**Introduction to Computer Graphics:** Overview of Computer Graphics, Computer Graphics Application andSoftware, Description of some graphics devices, Input Devices forOperator Interaction, Active and Passive Graphics Devices, DisplayTechnologies, Storage Tube Graphics Displays, Calligraphic Refresh Graphics Displays, Raster Refresh (Raster-Scan) Graphics Displays,Cathode Ray Tube Basics, Color CRT Raster Scan Basics, VideoBasics, The Video Controller, Random-Scan Display Processor, LCD displays.	5	Computer Graphics -Hearn, Baker Computer Graphics-Rajesh.k.Mourya	Powerpoint presentation,Projector,chalk blackboard

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: SYIT-DIV C SEMESTER: IV MONTH: DEC - MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: Develop logics to write programs, build application using Core Java. This will also help them to understand some basic concepts of object-oriented programming like class, inheritance, polymorphism, message passing. Also they will get to know the idea of multithreading, package, exception-handling.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

NAME OF THE STAFF: BRIJESH YATINDRA JOSHI **DEPARTMENT: INFORMATION TECHNOLOGY**

CLASS: TYIT DIV - A SEMESTER: VI MONTH: Dec to March ACADEMIC YEAR: 2019-2020

Learning Objectives

1. Understand the concept of business intelligence and Decision support systems
2. Understand the concept of decision making and use of it in decision making
3. Understand the concept of Data mining and data preparation
4. Understand the concept and various algorithms of Classification and clustering
5. Understand the concept of Business intelligence applications such as marketing models logistics and production models
6. Understanding concept of Knowledge management ,AI and Expert systems

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)** _____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**T.Y.B.SC(IT)-A**_____ SEMESTER: ____**VI**_____ MONTH: _____ _____**DECEMBER-MARCH** _____ ACADEMIC YEAR: _____**2019-2020**_____

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the Geographical Information System for processing standard geographic data.
- Make you understand where GIS system can be applied. Learning about different applications (example: GPS).
- How geographic data are capture, updated, profiled, stored and represented in the system.
- Enable to understand software and hardware trends, DBMS and varieties of Models.
- To understand how geographic data can be display with help of Maps and to understand the making of Maps.
- Studying about spatial referencing and positioning of data in system.
- To understand different operations and functions on data and to analyze and explore information in the system.
- To provide better visualization of data both in vector and raster manner.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-04 (USIT604) **Principles of**	**A Gentle Introduction to GIS** **The nature of GIS:** Some fundamental observations, Defining GIS, GISystems, GIScience and GIApplications, Spatial data and Geoinformation.	04	Principles of Geographic Information Systems- An	Textbook, Blackboard, Chalk and Duster, Projector,

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Geographic Information Systems **Unit No -01**	**The real world and representations of it:** Models and modelling, Maps, Databases, Spatial databases and spatial analysis		Introductory Text Book By Editors: Otto Huisman and Rolf A. , The International Institute of Geoinformation Science and Earth Observation Introduction to Geographic Information Systems Chang Kang-tsung McGrawHill	Laptop, PPTs.
	Geographic Information and Spatial Database **Models and Representations of the real world** **Geographic Phenomena:** Defining geographic phenomena, types of geographic phenomena, Geographic fields, Geographic objects, Boundaries	03		
	Computer Representations of Geographic Information: Regular tessellations, irregular tessellations, Vector representations, Topology and Spatial relationships, Scale and Resolution, Representation of Geographic fields, Representation of Geographic objects	03		
	Organizing and Managing Spatial Data **The Temporal Dimension**	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -02	**Data Management and Processing Systems** **Hardware and Software Trends** **Geographic Information Systems:** GIS Software, GIS Architecture and functionality, Spatial Data Infrastructure (SDI)	04	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto	Projector, Laptop, PPTs
	Stages of Spatial Data handling: Spatial data handling and preparation, Spatial Data Storage and maintenance, Spatial Query and Analysis, Spatial Data Presentation.	03		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Database management Systems: Reasons for using a DBMS, Alternatives for data management, The relational data model, Querying the relational database.	03	Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	
	GIS and Spatial Databases: Linking GIS and DBMS, Spatial database functionality.	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -03	**Spatial Referencing and Positioning** **Spatial Referencing:** Reference surfaces for mapping, Coordinate Systems, Map Projections, Coordinate Transformations	03	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Projector, Laptop, PPTs.
	Satellite-based Positioning: Absolute positioning, Errors in absolute positioning, Relative positioning, Network positioning, code versus phase measurements, Positioning technology	03		
	Data Entry and Preparation **Spatial Data Input:** Direct spatial data capture, Indirect spatial data captiure, Obtaining spatial data elsewhere	02		
	Data Quality: Accuracy and Positioning, Positional accuracy, Attribute accuracy, Temporal accuracy, Lineage, Completeness, Logical consistency	02		
	Data Preparation: Data checks and repairs, Combining data from multiple sources	01		
	Point Data Transformation: Interpolating discrete data, Interpolating continuous data	01		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -04	**Spatial Data Analysis** **Classification of analytical GIS Capabilities** **Retrieval, classification and measurement:** Measurement, Spatial selection queries, Classification	03	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Textbook, Blackboard, Chalk and Duster, Projector, Laptop, PPTs
	Overlay functions: Vector overlay operators,Raster overlay operators	01		
	Neighbourhood functions: Proximity computations, Computation of diffusion, Flow computation, Raster based surface analysis	03		
	Analysis: Network analysis, interpolation, terrain modeling	01		
	GIS and Application models: GPS, Open GIS Standards, GIS Applications and Advances	02		
	Error Propagation in spatial data processing: How Errors propagate, Quantifying error propagation	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -05	**Data Visualization** **GIS and Maps, The Visualization Process** **Visualization Strategies: Present or explore?**	04	Principles of Geographic Information	Textbook, Blackboard, Chalk and Duster,

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	The cartographic toolbox: What kind of data do I have?, How can I map my data?	03	Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Projector, Laptop, PPTs
	How to map?: How to map qualitative data, How to map quantitative data, How to map the terrain elevation, How to map time series	03		
	Map Cosmetics, Map Dissemination	02

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: VI MONTH: Dec to March ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S: To provide security against users, software, devices, operating systems, networks, cloud and data.

The learners will be able to :

- To understand the concept of Information Security.
- To know how to use Security Methodology, Strategy and Tactics.
- To analyze Risk by identifying possible Threat, Types of Attacks.
- To learn about Secure Design Principles like the CIA Triad and Other Models, Defense Models.
- To know Intrusion Detection and Prevention Systems.
- To learn Voice over IP (VoIP) and PBX Security, TEM (Telecom Expense Management).
- To understand Operating System Security Models, International Standards for Operating System Security.
- To have information related to Virtual Machines and Cloud Computing.
- To study Secure Application Design in Web Application Security, Client Application Security, Remote Administration Security.
- To know how to implement Physical Security by Choosing Site Location for Security, Securing Assets - Locks and Entry Controls, Physical Intrusion Detection.

CLASS: **TYIT B** SEMESTER: **VI** MONTH: **Dec-March** ACADEMIC YEAR: **2019-2020**

LEARNING OBJECTIVES:
The learners will be able to :

- Understand the role of Business Intelligence system and Decision support system in improvising the business.
- Understand different algorithms used in BI systems.
- Understand the use of AI and Knowledge management system.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
III,1, Business Intelligence	Business intelligence: Effective and timely decisions, Data, information and knowledge, The role of mathematical models, Business intelligence architectures, Ethics and business intelligence	5	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Decision support systems: Definition of system, Representation of the decision-making process, Evolution of information systems, Definition of decision support system, Development of a decision support system	5	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Mathematical models for decision making: Structure of mathematical models	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster

III,2, Business Intelligence	Development of a model, Classes of models Data mining: Definition of data mining,	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Representation of input data , Data mining process, Analysis methodologies Data preparation: Data validation, Data transformation, Data reduction	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
III,3, Business Intelligence	Classification: Classification problems, Evaluation of classification models, Bayesian methods, Logistic regression, Neural networks, Support vector machines	5	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Clustering: Clustering methods, Partition methods, Hierarchical methods, Evaluation of clustering models	5	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
III,4, Business Intelligence	Business intelligence applications: Marketing models: Relational marketing, Sales force management	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First	Chalk and Duster
	Logistic and production models: Supply chain optimization, Optimization models for logistics planning, Revenue management systems.	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Data envelopment analysis: Efficiency measures, Efficient frontier, The CCR model, Identification of good operating practices	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	
III,5, Business	Knowledge Management: Introduction to Knowledge Management, Organizational Learning and Transformation, Knowledge Management Activities, Approaches to Knowledge Management, Information Technology (IT) In Knowledge Management, Knowledge Management	5	Decision support and Business Intelligence Systems Efraim Turban, Ramesh Sharda, Dursun Delen Pearson Ninth 2011	Chalk and Duster

Intelligence	Systems Implementation, Roles of People in Knowledge Management			
	Artificial Intelligence and Expert Systems: Concepts and Definitions of Artificial Intelligence, Artificial Intelligence Versus Natural Intelligence, Basic Concepts of Expert Systems, Applications of Expert Systems, Structure of Expert Systems, Knowledge Engineering, Development of Expert Systems	5	Decision support and Business Intelligence Systems Efraim Turban, Ramesh Sharda, Dursun Delen Pearson Ninth 2011	Chalk and Duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: TYIT SEMESTER: VI MONTH: DECE to MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

To develop the understanding of relationship between commerce and cyberspace

To enable learner to understand, explore, and acquire a critical understanding Cyber Law.

To give learners in depth knowledge of Information Technology Act and legal frame work of Right to Privacy, Data Security and Data Protection

To make learner conversant with the social and intellectual property issues emerging from 'Cyberspace

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-07 Cyber Law Unit 3	**Battling Cyber Squatters and Copyright Protection in the Cyber World:** Concept of Domain Name and Reply to Cyber Squatters, Meta-Tagging, Legislative and Other Innovative Moves Against Cyber Squatting, The Battle Between Freedom and Control on the Internet, Works in Which Copyright Subsists and meaning of Copyright, Copyright Ownership and Assignment, License of Copyright, Copyright Terms and Respect for Foreign Works, Copyright Infringement, Remedies and Offences, Copyright Protection of Content on the Internet; Copyright Notice, Disclaimer and Acknowledgement, Downloading for Viewing Content on the Internet, Hyper-Linking and Framing, Liability of ISPs for Copyright Violation in the Cyber World: Legal Developments in the US, Napster and its Cousins: A Revolution on the Internet but a Crisis for Copyright Owners, Computer Software Piracy.	12	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
Paper-07 Cyber Law Unit 4	**E-Commerce Taxation:** Real Problems in the Virtual World: A Tug of War on the Concept of „Permanent Establishment", Finding the PE in Cross Border E-Commerce, The United Nations Model Tax Treaty, The Law of Double Taxation Avoidance Agreements and Taxable Jurisdiction Over Non-Residents, Under the Income Tax Act, 1961, Tax Agents of Non-Residents under the Income Tax Act,1961 and the Relevance to E-Commerce, Source versus Residence and Classification between Business Income and Royalty, The Impact of the Internet on Customer Duties, Taxation Policies in India: At a Glance.	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Digital Signature, Certifying Authorities and E-Governance: Digital Signatures, Digital Signature Certificate, Certifying Authorities and Liability in the Event of Digital Signature Compromise, E-Governance in India: A Warning to Babudom!	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
Paper-07 Cyber Law Unit 5	**The Indian Evidence Act of 1872 v. Information Technology Act, 2000:** Status of Electronic Records as Evidence, Proof and Management of Electronic Records; Relevancy, Admissibility and Probative Value of E-Evidence, Proving Digital Signatures, Proof of Electronic Agreements, Proving Electronic Messages, Other Amendments in the Indian Evidence Act by the IT Act, Amendments to the Bankers Books Evidence Act, 1891 and Reserve Bank of India Act, 1934.	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
	Protection of Cyber Consumers in India: Are Cyber Consumers Covered Under the Consumer Protection Act? Goods and Services, Consumer Complaint, Defect in Goods and Deficiency in Services, Restrictive and Unfair Trade Practices, Instances of Unfair Trade Practices, Reliefs Under CPA, Beware Consumers, Consumer Foras, Jurisdiction and Implications on cyber Consumers in India, Applicability of CPA to Manufacturers, Distributors, Retailers and Service Providers Based in Foreign Lands Whose Goods are Sold or Services Provided to a Consumer in India. Amendments in Indian IT Act 2000	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:T.Y.BSC(I.T)DIV-B SEMESTER: **VI** MONTH:DECEMBER-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to : To create more awareness about cyber legal issues and challenges.

To provide advice, inputs as also guidance to students on their day-to-day legal issues concerning the use of cyberspace.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Cyber Laws Elective I USIT607 Unit-1	**Power of Arrest Without Warrant Under the IT Act, 2000:** A Critique, Crimes of this Millennium, Section 80 of the IT Act, 2000 – A Weapon or a Farce?	1	Cyber Law Simplified - Vivek Sood	Powerpoint Presentation, Blackboard,projector
	Forgetting the Line Between Cognizable and Non-Cognizable Offences.	2		
	Necessity of Arrest without Warrant from Any Place, Public or Otherwise.	2		
	Check and Balances Against Arbitrary Arrests,Arrest for "About to Commit" an Offence Under the IT Act: A Tribute to Draco, Arrest, But NO Punishment!	2		
	Cyber Crime and Criminal Justice: Penalties, Adjudication and Appeals Under the IT Act,2000: Concept of "Cyber Crime " and the IT Act , 2000, Hacking.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Teenage Web Vandals, Cyber Fraud and Cyber Cheating, Virus on the Internet,Defamation, Harassment and Email Abuse, Cyber Pornography, Other IT Act Offences	2		
	. Monetary Penalties, Adjudication and Appeals Under IT Act , 2000, Network Service Providers, Jurisdiction and Cyber Crime.	2		
	Nature of Cyber Criminality, Strategies to Tackle Cyber Crime and Trends, Criminal Justice in India and Implications on Cyber Crime.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	15		
Cyber Laws Elective I USIT607 Unit-2	**Contracts in the Infotech World:** Contracts in the Infotech World, Click-Wrap and Shrink-Wrap Contract: Status under the Indian Contract Act, 1872.	2	Cyber Law Simplified - Vivek Sood	Powerpoint Presentation, Blackboard,projector
	Contract Formation Under the Indian Contract Act, 1872, Contract Formation on the Internet.	2		
	Terms and Conditions of Contracts.	1		
	Jurisdiction in the Cyber World: Questioning the Jurisdiction and Validity of the Present Law of Jurisdiction,Civil Law of Jurisdiction in India.	2		
	Cause of Action, Jurisdiction and the Information Technology Act,2000.	2		
	Foreign Judgements in India, Place of Cause of Action in	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Contractual and IPR Disputes.			
	Exclusion Clauses in Contracts, Abuse of Exclusion Clauses, Objection of Lack of Jurisdiction, Misuse of the Law of Jurisdiction.	2		
	Legal Principles on Jurisdiction in the United State of America, Jurisdiction Disputes w.r.t. the Internet in the United State of America.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	15

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS: T.Y. BSc (IT) DIV-B SEMESTER:SEM -6 MONTH: DEC-MAR ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

- **GIS** helps visualizing important data about educational facilities and general statistics on local and national levels
- To display spatial data and to solve problems that involve spatial factors.
- To useful for relating, integrating, and analyzing information from these different themes (or layers) of spatial information.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT604 Principles of Geographic Information Systems UNIT 1	A Gentle Introduction to GIS The nature of GIS: Some fundamental observations, Defining GIS, GIS Systems, GIS Science and GIS Applications, Spatial data and Geoinformation.	3	1. Principles of Geographic Information Systems An Introductory Text Book Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation Fourth edition 2009	Black board and chalk , Projector
	The real world and representations of it: Models and modelling, Maps, Databases, Spatial databases and spatial analysis	3		
	Geographic Information and Spatial Database Models and Representations of the real world Geographic Phenomena: Defining geographic phenomena, types of geographic phenomena, Geographic fields, Geographic objects, Boundaries Computer Representations of Geographic Information: Regular tessellations, irregular	6		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	tessellations, Vector representations, Topology and Spatial relationships, Scale and Resolution, Representation of Geographic fields, Representation of Geographic objects Organizing and Managing Spatial Data The Temporal Dimension			
USIT604 Principles of Geographic Information Systems UNIT 2	Data Management and Processing Systems Hardware and Software Trends Geographic Information Systems: GIS Software, GIS Architecture and functionality, Spatial Data Infrastructure (SDI).	3	Principles of Geographic Information Systems An Introductory Text Book Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation Fourth edition 2009	Black board and chalk,projector
	Stages of Spatial Data handling: Spatial data handling and preparation, Spatial Data Storage and maintenance, Spatial Query and Analysis, Spatial Data Presentation.	3		
	Database management Systems: Reasons for using a DBMS, Alternatives for data management, The relational data model, Querying the relational database.	3		
	GIS and Spatial Databases: Linking GIS and DBMS, Spatial database functionality.	3

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **TYBSCIT** SEMESTER:**VI**

MONTH: **DEC-MARCH** ACADEMIC YEAR:**2019-20**

LEARNING OBJECTIVE/S:

The learners will be able to :

Understanding the customers priority for **quality assurance** while developing ...
that **will** be created by the organization, The scope of **Software** Testing applies to ... improvements of the processes through **learning** & innovation
Understand Manual and automated testing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT601 Software Quality Assurance UNIT-1	**Introduction to Quality:** Historical Perspective of Quality, What isQuality? (Is it a fact or perception?), Definitions of Quality, Core Components of Quality, Quality View, Financial Aspect of Quality, Customers, Suppliers and Processes, Total Quality Management (TQM), Quality Principles of Total Quality Management, Quality Management Through Statistical Process Control, Quality Management Through Cultural Changes, Continual (Continuous) Improvement Cycle, Quality in Different Areas, Benchmarking and Metrics, Problem Solving Techniques, Problem Solving Software Tools.	07	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
	Software Quality: Introduction, Constraints of Software Product Quality Assessment, Customer is a King, Quality and Productivity Relationship, Requirements of a Product, Organisation Culture, Characteristics of Software, Software Development Process, Types of Products, Schemes of Criticality Definitions, Problematic Areas of Software Development Life	05	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Cycle, Software Quality Management, Why Software Has Defects?Processes Related to Software Quality, Quality Management System Structure, Pillars of Quality Management System, Important Aspects of Quality Management..			
USIT601 Software Quality Assurance UNIT-2	**Fundamentals of testing:** Introduction, Necessity of testing, What is testing? Fundamental test process, The psychology of testing,Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During Development Life Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench,Important Features of Testing Process, Misconceptions About Testing,Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning, Testing Process and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges in Testing, Test Team Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy, Methods	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
	Structured Approach to Testing, Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies (Test Plan), Testing Process, Attitude Towards Testing (Common People Issues), Test Methodologies/Approaches, People Challenges in Software Testing, Raising Management Awareness for Testing, Skills Required by Tester, Testing throughout the software life cycle, Software development models, Test levels, Test types, the targets of testing, Maintenance testing	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
USIT601	**Unit Testing: Boundary Value Testing:** Normal Boundary ValueTesting, Robust Boundary Value Testing, Worst-Case Boundary ValueTesting, Special Value Testing, Examples,	05	Software Testing:	Black board and chalk, power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Software Quality Assurance UNIT-3	Random Testing, Guidelines for Boundary Value Testing, **Equivalence Class Testing:** Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations.		Principles, Techniques and Tools M. G. Limaye	
	Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations, **Path Testing:** Program Graphs, DD-Paths, Test Coverage Metrics, Basis Path Testing, Guidelines and Observations,**Data Flow Testing:** Define/Use Testing, Slice-Based Testing,Program Slicing Tools.	07	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
USIT601 Software Quality Assurance UNIT-4	**Software Verification and Validation:**Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews on the basis od Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification, Validation, Validation Workbench, Levels of Validation,Coverage in Validation, Acceptance Testing, Management of Verification and Validation, Software development verification and validation activities	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
	V-test Model: Introduction, V-model for software, Testing during Proposal stage, Testing during requirement stage, Testing during test planning phase, Testing during design phase, Testing during coding,VV Model, Critical Roles and Responsibilities.	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
USIT601 Software Quality Assurance	**Levels of Testing:** Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich	04	Software Testing: Principles, Techniques	Black board and chalk, power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT-5	Testing, Critical Path First, Sub System Testing, System Testing, Testing Stages.		and Tools M. G. Limaye	
	Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing,Regression Testing, Error Handling Testing, Manual Support Testing,Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing,Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing, Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph,Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage,Object Oriented Application Testing, Testing of Internal Controls COTS Testing, Client Server Testing, Web Application Testing,Mobile Application Testing, eBusiness eCommerce Testing, Agile Development Testing, Data Warehousing Testing.	08	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: TYIT

SEMESTER: VI MONTH: DEC-MARCH ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the use of business intelligence in real life.
- Describe the different mathematical models to develop decision making systems.
- Get the difference between supervised learning and unsupervised learning techniques.
- Understand the use of mathematical models in relational marketing, support chain optimization, CCR model.
- Familiar with knowledge management and Artificial intelligence and expert systems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT603, Business Intelligence Unit I	**Business intelligence:** Effective and timely decisions, Data, information and knowledge, The role of mathematical models, Business intelligence architectures, Ethics and business intelligence	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Black Board and chalk, Powerpoint
	Decision support systems: Definition of system, Representation of the decision-making process, Evolution of information systems, Definition of decision support system, Development of a decision support system	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Prof Sandesh Akre DEPARTMENT: Information technology CLASS: TYIT

SEMESTER: V MONTH: July ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand Legal aspects of Information technology
- Conceptual arrangements of Laws and amendments
- Pass on the legal information about how one should use technology

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT607, Cyber Laws Unit 1	Power of Arrest Without Warrant Under the IT Act, 2000: A Critique, Crimes of this Millennium, Section 80 of the IT Act, 2000 – A Weapon or a Farce? Forgetting the Line Between Cognizable and Non-Cognizable Offences, Necessity of Arrest without Warrant from Any Place, Public or Otherwise, Check and Balances Against Arbitrary Arrests, Arrest for "About to Commit" an Offence Under the IT Act: A Tribute to Draco, Arrest, But NO Punishment! Cyber Crime and Criminal Justice: Penalties, Adjudication and Appeals Under the IT Act, 2000:	12	Cyber Law Simplified – Vivek Sood	Chalk & Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Concept of "Cyber Crime " and the IT Act , 2000, Hacking, Teenage Web Vandals, Cyber Cheating, Virus on the Internet, Defamation, Harassment and E-mail Abuse, Cyber Pornography, Other IT Act Offences, Monetary Penalties, Adjudication and Appeals Under IT Act , 2000, Network Service Providers, Jurisdiction and Cyber Crime, Nature of Cyber Criminality, Strategies to Tackle Cyber Crime and Trends, Criminal Justice in India and Implications on Cyber Crime.			
Unit 2 Unit 3	Contracts in the Infotech World: Contracts in the Infotech World, Click-Wrap and Shrink-Wrap Contract: Status under the Indian Contract Act, 1872, Contract Formation Under the Indian Contract Act, 1872, Contract Formation on the Internet, Terms and Conditions of Contracts. Jurisdiction in the Cyber World: Questioning the Jurisdiction and Validity of the Present Law of Jurisdiction, Civil Law of Jurisdiction in India, Cause of Action, Jurisdiction and the Information Technology Act,2000, Foreign Judgements in India, Place of Cause of Action in Contractual and IPR Disputes, Exclusion Clauses in Contracts, Abuse of Exclusion Clauses, Objection of Lack of Jurisdiction, Misuse of the Law of Jurisdiction, Legal Principles on Jurisdiction in the United State of America, Jurisdiction Disputes w.r.t. the Internet in the United State of America.	12	Cyber Law Simplified – Vivek Sood	Chalk & Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 4	Battling Cyber Squatters and Copyright Protection in the Cyber World: Concept of Domain Name and Reply to Cyber Squatters, Meta- Tagging, Legislative and Other Innovative Moves Against Cyber Squatting, The Battle Between Freedom and Control on the Internet, Works in Which Copyright Subsists and meaning of Copyright, Copyright Ownership and Assignment, License of Copyright, Copyright Terms and Respect for Foreign works, Copyright Infringement, Remedies and Offences, Copyright Protection of Content on the Internet; Copyright Notice, Disclaimer and Acknowledgement, Downloading for Viewing Content on the Internet, Hyper-Linking and Framing, Liability of ISPs for Copyright Violation in the Cyber World: Legal Developments in the US, Napster and its Cousins: A Revolution on the Internet but a Crisis for Copyright Owners, Computer Software Piracy.	12	Cyber Law Simplified – Vivek Sood	Chalk & Board
	E-Commerce Taxation: Real Problems in the Virtual World: A Tug of War on the Concept of 'Permanent Establishment', Finding the PE in Cross Border E-Commerce, The United Nations Model Tax Treaty, The Law of Double Taxation Avoidance Agreements and Taxable Jurisdiction Over Non-Residents, Under the Income Tax Act, 1961, Tax Agents of Non-Residents under the Income Tax Act,1961 and the Relevance to E-Commerce, Source versus Residence and Classification	12	Cyber Law Simplified – Vivek Sood	Chalk & Board

Unit 5	between Business Income and Royalty, The Impact of the Internet on Customer Duties, Taxation Policies in India: At a Glance. Digital Signature, Certifying Authorities and E-Governance: Digital Signatures, Digital Signature Certificate, Certifying Authorities and Liability in the Event of Digital Signature Compromise, E-Governance in India: A Warning to Babudom!			
	The Indian Evidence Act of 1872 v. Information Technology Act, 2000: Status of Electronic Records as Evidence, Proof and Management of Electronic Records; Relevancy, Admissibility and Probative Value of E-Evidence, Proving Digital Signatures, Proof of Electronic Agreements, Proving Electronic Messages, Other Amendments in the Indian Evidence Act by the IT Act, Amendments to the Bankers Books Evidence Act, 1891 and Reserve Bank of India Act, 1934. Protection of Cyber Consumers in India: Are Cyber Consumers 12 Covered Under the Consumer Protection Act? Goods and Services, Consumer Complaint, Defect in Goods and Deficiency in Services, Restrictive and Unfair Trade Practices, Instances of Unfair Trade Practices, Reliefs Under CPA, Beware Consumers, Consumer Foras, Jurisdiction and Implications on cyber Consumers in India, Applicability of CPA to Manufacturers, Distributors, Retailers and Service Providers Based in Foreign Lands Whose Goods are Sold or Services Provided to a Consumer in India. Amendments in Indian IT Act 2000	12	Cyber Law Simplified – Vivek Sood	Chalk & Board

NAME OF THE STAFF: Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: T.Y.I.T.-C (Principles of Geographic Information Systems)

SEMESTER: VI

MONTH: December - March

ACADEMIC YEAR: 2019 -20

LEARNING OBJECTIVE/S :
The learners will be able to :

- Understand the basics of geographic information system.
- Learn GIS Models.
- Understand different types of GIS Data.
- Analyze data, explore issues, problem solve, and evaluate situations in a geographic and spatial context.
- Explore mapped data
- Relate GIS with remote sensing technologies
- Analyze spatial data, using GIS analysis tools
- Develop and manage geodatabases
- Create maps ans images to communicate spatial data in a meaningful way to others.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: INFORMATION TECHNOLOGY CLASS: TYIT-C

SEMESTER: VI MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of information security, Risk Analysis.
- Understand various security areas such as storage, database, Physical, application, operating system.
- Be familiar about the basic designing of secure network.
- Detect intrusion and how to prevent it, introduction to virtual machines and cloud computing.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: TYIT-DIV C SEMESTER: VI MONTH: DEC-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- The learners will be able to: know fundamentals of Testing, the idea of Test Policy, Test Strategy & Test Planning. Also they will learn different methods of Unit Testing, Verification, Validation, Acceptance Testing, how to use various Special Tests and understand different Risk Associated with New Technologies and how to overcome. Eventually learners will be able to use the knowledge in their future project.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT601 Software Quality Assurance II	**Fundamentals of testing:** Introduction, Necessity of testing, What is testing? Fundamental test process, The psychology of testing, Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During Development Life Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench, Important Features of Testing Process, Misconceptions About Testing.	3	Software Testing: Principles, Techniques and Tools By M. G. Limaye	Blackboard & chalk
	Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning, Testing Process and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges in Testing, Test Team Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy, Methods, Structured Approach to Testing,	3		
	Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	(Test Plan), Testing Process, Attitude Towards Testing(Common People Issues), Test Methodologies/ Approaches.			
	People Challenges in Software Testing, Raising Management Awareness for Testing, Skills Required by Tester, Testing throughout the software life cycle, Software development models, Test levels, Test types, the targets of testing, Maintenance testing.	3		
III	**Unit Testing: Boundary Value Testing:** Normal Boundary Value Testing, Robust Boundary Value Testing, Worst-Case Boundary Value Testing, Special Value Testing, Examples, Random Testing, Guidelines for Boundary Value Testing.	3	Software Testing: A Craftsman's Approach By Paul C. Jorgenson	Blackboard & chalk, PowerPoint Presentation
	Equivalence Class Testing: Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations.	3		
	Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations.	2		
	Path Testing: Program Graphs, DD-Paths, Test Coverage Metrics, Basis Path Testing, Guidelines and Observations, **Data Flow Testing:** Define/Use Testing, Slice-Based Testing, Program Slicing Tools.	4		
IV	**Software Verification and Validation:** Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews on the basis of Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification.	4	Software Testing: Principles, Techniques and Tools	Blackboard & chalk
	Validation, Validation Workbench, Levels of Validation, Coverage in Validation, Acceptance Testing, Management of Verification and Validation, Software development verification and validation activities.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	V-test Model: Introduction, V-model for software, Testing during Proposal stage, Testing during requirement stage, Testing during test planning phase, Testing during design phase, Testing during coding, VV Model, Critical Roles and Responsibilities.	4	By M. G. Limaye	
V	**Levels of Testing:** Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich Testing, Critical Path First, Sub System Testing, System Testing, Testing Stages.	4	Software Testing: Principles, Techniques and Tools By M. G. Limaye	Blackboard & chalk, PowerPoint Presentation
	Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing, Regression Testing, Error Handling Testing, Manual Support Testing, Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing, Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing, Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph,	4		
	Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage, Object Oriented Application Testing, Testing of Internal Controls, COTS Testing, Client Server Testing, Web Application Testing, Mobile Application Testing, eBusiness/eCommerce Testing, Agile Development Testing, Data Warehousing Testing.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**MSC(IT)**_____ SEMESTER: ____**IV**_____ MONTH: _____ **JANUARY-APRIL** _____ ACADEMIC YEAR: _____**2019-2020**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand the concept of Advanced Image Processing, its elements and application. To make understand the concept of image enhancement techniques in frequency domain, remote sensing and its applications. To make understand what are different platforms and sensors. To study subjective improvisation of medical image. To analyze the image and its applications in different areas. To under the different methods of feature representation and statistical measurements.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective 2 PSIT404b Advanced Image Processing **Unit No -01**	**Enhancement in Frequency domain** Introduction, 2-D Discrete Fourier Transform, Properties of Fourier transform, Basic filtering in the frequency domain, Smoothing and Sharpening filters, FFT algorithm. Discrete cosine transform (DCT), KL (PCT) transform, HAAR, Basics of wavelets.	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Remote Sensing	06	Text Book of Remote Sensing	Blackboard, Chalk and Duster.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction (Passive and Active sensing), Electromagnetic remote sensing process, Physics of radiant energy, Energy source and its characteristics, Atmospheric interactions with electromagnetic radiation, Energy interaction with Earth's surface materials.		and Geographical Information Systems M. Anji Reddy 4th Edition BS publication	PPts
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -02	**Microwave Remote Sensing** Introduction, The Radar principle, Factors affecting microwave measurements, Radar wavebands, Side looking airborne (SLAR) systems, Synthetic Aperture Radar (SAR), Polarimetric SAR (PolSAR), Interaction between microwaves and Earth's surface, Interpreting SAR images, Geometric characteristics.	06	Text Book of Remote Sensing and Geographical Information Systems M. Anji Reddy 4th Edition BS publication	Blackboard, Chalk and Duster. PPts.
	Remotes Sensing Platforms and Sensors Introduction, Satellite system parameters, Spatial Resolution, Spectral Resolution, Radiometric Resolution, Temporal resolution, Imaging sensor systems (thermal, multispectral and microwave imaging), Earth resources satellites, Meteorological satellites, Satellites carrying microwave sensors, OCEASAT-1, IKONOS, Latest trends in remote sensing platforms and sensors (weather, land observation and marine satellites).	06	Text Book of Remote Sensing and Geographical Information Systems M. Anji Reddy 4th Edition BS publication	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit No -03	**Image Analysis** Introduction, Visual interpretation, Elements of visual interpretation, Digital processing, Pre-processing, Enhancement, Transformations, Classification, Integration, Classification accuracy assessment.	06	Digital Image Processing and Analysis Bhabatosh Chanda, Dwijesh Dutta Majumder 2nd Edition PHI	Blackboard, Chalk and Duster. PPts.
	Applications Introduction, Agriculture, Forestry, Geology, Hydrology, Sea Ice, Land cover, Mapping, Oceans and Costal.	06	Digital Image Processing and Analysis Bhabatosh Chanda, Dwijesh Dutta Majumder 2nd Edition PHI	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -04	**Medical Image Processing** Various modalities of medical imaging, Breast cancer imaging, Mammographic imaging, Ultrasound imaging, Magnetic resonance imaging (MRI), Breast thermograph imaging, Problems with medical images. Image enhancement, Spatial domain methods, Frequency domain methods, Other modalities of medical imaging, Radiography, Positron emission tomography (PET), Computed tomography angiography (CTA), Echocardiogram.	12	Medical Image Processing Concepts and Applications Sinha, G.R., Patel, Bhagwati Charan PHI	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit No -05	**Feature Extraction and Statistical Measurement** Selection of features, Shape related features, Shape representation, Bounding box, Shape matrix, Moments of region and shape, Co-occurrence matrix, Principle feature analysis (PFA), Fourier descriptors, Snake boundary detection, Snake algorithm, Texture analysis, Texture features, Feature extraction using discrete Fourier transform, wavelet transform, Gabor filters for texture analysis, Breast tissue detection, Analysis of tissue structure.	12	Medical Image Processing Concepts and Applications Sinha, G.R., Patel, Bhagwati Charan PHI	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

NAME OF THE STAFF: Ms. Binita Thakkar DEPARTMENT: IT

CLASS: M. Sc. I. T SEMESTER: IV MONTH: January-April ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:
a. Work with strategies for storing digital evidence.
b. Work with analyzing evidence with tools.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-III Computer Forensics Unit -I	Computer Forensics and Investigation Processes- Understanding Computer Forensics, Preparing for Computer Investigations, Maintaining Professional Conduct	3	Guide to Computer Forensics and Investigations by Bell Nelson, Amelia Phillips,Christopher Steuart, 4th edition	PowerPoint presentation through projector
	Understanding Computing Investigations- Preparing a Computer Investigation, Taking a Systematic Approach, Procedures for Corporate High-Tech Investigations, Understanding Data Recovery Workstations and Software, Conducting an Investigation	3		PowerPoint presentation through projector
	The Investigator's Office and Laboratory- Understanding Forensics Lab Certification Requirements, Determining the Physical Requirements for a Computer Forensics Lab, Selecting a Basic Forensic Workstation	3		PowerPoint presentation through projector
	Data Acquisitions- Understanding Storage Formats for Digital Evidence, Determining the Best Acquisition Method, Using Acquisition Tools, Validating Data Acquisitions, Performing RAID Data Acquisitions	3		PowerPoint presentation through projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. BRIJESH Y JOSHI DEPARTMENT: Information Technology

CLASS: M.Sc.IT SEMESTER: IV MONTH: JAN TO APRIL ACADEMIC YEAR: 2019 -2020

LEARNING OBJECTIVE/S:

- To be able to Understand the concept of **ITIL, Service Life Cycle, Service Strategy**
- **To be able to understand Service Design , Service Transition , Service Operation , Continual service Improvement**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
IT Infrastructure Management UNIT I	**Introduction:** The four perspectives (attributes) of IT service management, benefits of IT service management, business and IT alignment, What is ITIL?, What are services?, Service Management as a practice, The concept of Good Practice, Concept of a Service, Concept of Service Management, Functions and Processes, The process model and the characteristics of processes. **The Service Lifecycle:** Mapping the Concepts of ITIL to the Service Lifecycle, How does the Service Lifecycle work? **Service Strategy:** Objectives, Creating Service Value, Service Packages and Service Level Packages, Service Strategy Processes, Service Portfolio Management, Financial Management, Demand Management, Service Strategy Summary, Interfaces with the Service Design Phase, Interfaces with the Service Transition Phase, Interfaces with the Service Operation Phase, Interfaces with the Continual Service Improvement Phase, Service Strategy Service Scenario,	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Overall Service Strategy, Service Portfolio Management Considerations, Financial Management Considerations			
UNIT II	**Service Design:** Objectives, Major Concepts, Five Major Aspects of Service Design, Service Design Packages, Service Design Processes, Service Level Management, Supplier Management, Service Catalogue Management, Capacity Management, Availability Management, IT Service Continuity Management, Information Security Management, Service Design Scenario, Service Level Management Considerations, Capacity Management Considerations, Availability Management Considerations, Information Security Management Considerations, Service Catalogue Management Considerations, ITSCM Considerations, Supplier Management Considerations	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop, PPT
UNIT III	**Service Transition:** Objectives, Service Transition Processes, Knowledge Management, Service Asset and Configuration Management, Change Management, Release and Deployment Management, Service Validation and Testing, Service Transition Summary, Service Transition Scenario, Knowledge Management Considerations, Service Asset and Configuration Management Considerations, Change Management Considerations, Release and Deployment Management Considerations, Service Validation and Testing Considerations	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop ,PPT
UNIT IV	**Service Operation:** Objectives, Major Concepts, Service Operation Functions, The Service Desk, Technical Management, IT Operations Management, Application Management, Service Operation Processes, Event Management, Incident Management, Problem Management, Request Fulfillment, Access Management, Service Operation Summary, Service Operation Scenario, Functions, Processes	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT V	**Continual Service Improvement:** Objectives, Major Concepts Continual Service Improvement Processes, Service Level Management, Service Measurement and Reporting , CSI (7 Step) Improvement Process, Continual Service Improvement Summary, Continual Service Improvement Scenario, Service Level Management Service Measurement and Reporting, CSI Process	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop ,PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: MScIT SEMESTER: III MONTH: JULY to DEC ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

To determine the market perspective of Embedded System

To compare and contrast the use of devices, hardware and software.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-01 Embedded System, Unit-1	**Introduction** What is an Embedded System, Embedded System Vs, General Computing System.	3	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	The Typical Embedded System Core of Embedded System, Memory, Sensors and Actuators, Communication Interface, Embedded Firmware.	3	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	Characteristic and quality attributes of Embedded System	3	Introduction to embedded systems- Shibu K. V	Laptop, PPT, Chalk &Black Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Characteristics of an Embedded System, Quality Attributes of Embedded System. RAM, Performance and Battery Life, Libraries, Debugging.		& Embedded Systems Architecture, Programming and Design-- Raj Kamal	
	Embedded product development life cycle What is EDLC, Why EDLC? Objectives of EDLC, Different Phases of EDLC.	3	Introduction to embedded systems-Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
Paper-01 Embedded System, Unit-2	**Hardware Software Co-design and Program Modelling** Fundamental Issues in Hardware Software Co-Design, Computational Models in Embedded Design, Introduction to Unified Modelling Language (UML), Hardware Software Trade-offs.	3	Introduction to embedded systems-Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	Embedded Hardware design and development Analog Electronic Components, Digital Electronic Components, Electronic design Automation (EDA) Tools, The PCB Layout design.	3	Introduction to embedded systems-Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	Embedded Firmware design and development Embedded Firmware Design Approaches, Embedded Firmware Development Languages	3	Introduction to embedded systems-Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	Real Time Operating System(RTOS) Operating System Basics, Types of Operating Systems, Device Drivers, How to choose an RTOS	3	Introduction to embedded systems-Shibu K. V &	Laptop, PPT, Chalk &Black Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Embedded Systems Architecture, Programming and Design-- Raj Kamal	
Paper-01 Embedded System, Unit-3	**Memories and Memory Subsystem** Introduction, Classifying Memory, A general Memory Interface, ROM Overview, Static RAM Overview, Dynamic RAM Overview, Chip Organization, A SRAM Design, A DRAM Design, The DRAM Memory Interface, The Memory Map, Memory Subsystem Architecture, Basic Concepts of Caching, Design a cache system, Dynamic Memory Allocation, Testing Memories.	12	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
Paper-01 Embedded System, Unit-4	**Programming Concept and Embedded Programming in C/C++ and Java** Software programming in Assembly Language (ALP) and in High-level Language 'C'., C program Elements: Header and Source Files and Pre-processor Directives, Program Elements: Macros and Functions, Program Elements: Types, Data Structures, Modifiers, Statements, Loops and Pointers, Object-Oriented Programming, Embedded Programming in C++, Embedded Programming in Java.	12	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
Paper-01 Embedded System, Unit-5	**Trends in the Embedded Industry** Processor trends in Embedded System, Embedded OS Trends, Development Language Trends, Introduction of PIC Family of Microcontrollers, Introduction of ARM Family of Microcontrollers, Introduction of AVR Family of Microcontrollers.	12	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)** _____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**MSC(IT)**_____ SEMESTER: ____**III**_____ MONTH: _____ **JULY-NOVEMBER** _____ ACADEMIC YEAR: _____**2019-2020**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand the concept of Image Processing, its elements and application. To make understand the concept of image enhancement techniques, filtering, colour processing, compression techniques, segmentation, morphology, representation and description of image and image recognition. To make understand what is image, how it is created and how it is used in varieties of processing. To study subjective improvisation of image in applications to reduce the noise.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective 2 PSIT304a Digital Image Processing **Unit No -01**	**Introduction to image processing**, Example of fields that uses image processing, Steps of image processing, Components, Applications, Image sensors and image formats	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit No -02	**Visual Preliminaries** Brightness adaptation and contrast, Acuity and contour, Texture and pattern discrimination, Shape detection and recognition, perception of colour, Computational model of perceptual processing, Image sampling and quantization, Basic relationships between pixels	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
	Intensity transformations Introduction, Some basic intensity transformation functions, Histogram equalization, local histogram processing, Using histogram statistics for image enhancement	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Spatial filtering Fundamentals of spatial filtering, Smoothing and Sharpening spatial filters, Combining spatial enhancement methods, Using fuzzy techniques for intensity transformations and spatial filtering	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit No -03	**Colour image processing** Colour fundamentals, Colour models, Pseudocolour image processing, Basic of full-colour image processing, Colour transformations, Smoothing and Sharpening, Image segmentation bases on colour, Noise in colour images, Colour image compression	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Image Compression Fundamentals, Some basic methods, Digital image watermarking, Full motion video compression	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -04	**Morphological Image Processing** Introduction, Erosion and Dilation, Opening and Closing, The Hit-or-Miss transformation, Some basic morphological algorithms, Gray scale morphology	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Segmentation Fundamentals, Point, Line, and Edge detection, Thresholding, Region based segmentation, Segmentation using morphological watersheds, The use of motion in segmentation- Spatial techniques.	06	Digital Image Processing Gonzalez and Woods 3rd Edition	Blackboard, Chalk and Duster. PPts.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Pearson Education	
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -05	**Representation and Description** Representation, Boundary Descriptors, Regional Descriptors, Use of Principal Components for Description, Relational Descriptors	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Object Recognition Patterns and pattern classes, Recognition based on decision theoretic methods, Structural methods	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF Mr.Sandesh Pandurang Akre DEPARTMENT: IT

CLASS: M. Sc. I. T SEMESTER: III MONTH: August-December ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

knowledge of security management and incident response. knowledge of security in software and operating systems. knowledge of data security and secure system development. knowledge of privacy and data protection

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Information security management Unit -IV	Auditing and Business continuity Planning: Introduction to information security audit and principles of audit. Business continuity planning and disaster recovery.	6	IT Security and Risk Management (Main reference) Slay, J. and Koronios, A 2006 Wiley	Powerpoint presentation through projector
	Case study: 9/11 tragedy. Backup and recovery techniques for applications and storage.	6		Powerpoint presentation through projector

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

NAME OF THE STAFF: AVINASH DILIP SONAWNAE DEPARTMENT: ____IT____

CLASS: _FYCS SEMESTER: 1 MONTH: July to Oct ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

Open Source has acquired a prominent place in software industry. Having knowledge of Open Source and its related technologies is an essential for Computer Science student. This course introduces Open Source methodologies and ecosystem to students.

Expected Learning Outcome:

1) Upon completion of this course, students should have a good working knowledge of Open Source ecosystem, its use, impact and importance.

2) This course shall help student to learn Open Source methodologies, case studies with real life examples

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.(CS) SEMESTER:I MONTH:JULY-OCTOBER ACADEMIC YEAR:2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the digital representation of data in a computer system.
- Understand the theory and architecture of central processing unit.
- Learn the concepts of parallel processing, pipelining and interprocessor communication.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-I Unit I Computer Organization and Design	**Computer Abstractions and Technology:** Basic structure and operation of a computer, functional units and their interaction.	1	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Blackboard, Chalk
	Representation of numbers and characters.	3		Blackboard, Chalk
	Logic circuits and functions:Combinational circuits and functions: Basic logic gates and functions, truth tables; logic circuits and functions.	1		Blackboard, Chalk
	Minimization with Karnaugh maps.	3		Blackboard, Chalk
	Synthesis of logic functions with and-or-not gates, nand gates, nor gates. Fan-in and fan-out requirements; tristate buffers.	2		Blackboard, Chalk
	Half adder, full adder, ripple carry adder. (Flip flops) Gated S-R and D latches, edge-triggered D latch.	2		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Shift registers and registers. Decoders, multiplexers.	1		Blackboard, Chalk
	Sequential circuits and functions: State diagram and state table; finite state machines and their synthesis.	2		Blackboard, Chalk
Paper-I Unit II Computer Organization and Design	**Instruction set architectures:** Memory organization, addressing and operations; word size, big-endian and little-endian arrangements.	2	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Blackboard, Chalk
	Instructions, sequencing. Instruction sets for RISC and CISC (examples Altera NIOS II and Freescale ColdFire).	3		Blackboard, Chalk
	Operand addressing modes; pointers; indexing for arrays	3		Blackboard, Chalk
	Machine language, assembly language, assembler directives. Function calls, processor runtime stack, stack frame.	3		Blackboard, Chalk
	Types of machine instructions: arithmetic, logic, shift, etc.	2		Blackboard, Chalk
	Instruction sets, RISC and CISC examples.	2		Blackboard, Chalk
Paper-I Unit III Computer Organization and Design	**Basic Processor Unit:**Main components of a processor: registers and register files, ALU, control unit, instruction fetch unit, interfaces to instruction and data memories.	4	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Blackboard, Chalk
	Datapath. Instruction fetch and execute; executing arithmetic/logic, memory access and	3		Blackboard, Chalk
	branch instructions; hardwired and microprogrammed control for RISC and CISC.	3		Blackboard, Chalk
	Basic I/O:Accessing I/O devices, data transfers between processor and I/O devices.	3		Blackboard, Chalk
	Interrupts and exceptions: interrupt requests and processing.	2		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: FYCS

SEMESTER: I MONTH: JULY-OCTOBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the concepts of programming before actually starting to write programs.
- Develop logic for Problem Solving.
- Be familiar about the basic constructs of programming such as data, operations, conditions, loops, functions etc.
- Apply the problem solving skills using syntactically simple language i.e. Python (version: 3.X or higher)

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS102, Unit 1, Programming with Python- I	Reasons for Python as the learner's first programming language. Introduction to the IDLE interpreter (shell) and its documentation. Expression evaluation: similarities and differences compared to a calculator; expressions and operators of types int, float, boolean. Built-in function type. Operator precedence.	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Enumeration of simple and compound statements. The expression statement. The assert statement, whose operand is a boolean expression (values true or false). The assignment statement, dynamic binding of names to values, automatic and implicit declaration of variable names with the assignment statement; assigning the valueNone to a name.	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	The del (delete) statement. Input/output with print and input functions. A statement list as a single interpreter command.	02	Paul Gries, Programming:	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			An Introduction to Computer Science Using Python 3	
	The import statement for already-defined functions and constants. The augmented assignment statement. The built-in help() function. Interactive and script modes of IDLE, running a script, restarting the shell. The compound statement def to define functions; the role of indentation for delimiting the body of a compound statement; calling a previously defined function. Compound data types str, tuple and list	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Indexing individual elements within these types. Strings and tuples are immutable, lists are mutable. Built-in functions min, max, sum. Interactive solution of model problems, by repeatedly executing the body of a loop.	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
USCS102, Unit 2, Programming with Python- I	Advantages of functions, function parameters, formal parameters, actual parameters, global and local variables..	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	The range function, the iterative for statement. The conditional statements if, if-else, if-elif-else. The iterative statements while, while-else, for-else	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	The continue statement to skip over one iteration of a loop, the break statement to exit the loop. Nested compound statements.	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Dictionaries: concept of key-value pairs, techniques to create, update and delete dictionary items. Problem-solving using compound types and statements	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
USCS102, Unit 3, Programming with Python-I	Anonymous functions. List comprehensions.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Gentle introduction to object-oriented programming; using the built-in dir() function, enumerate the methods of strings, tuples, lists, dictionaries	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Using these methods for problem-solving with compound types.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

TEACHING PLAN (UNIT 1 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: I MONTH: JULY ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

- Define a function, its domain, co domain, range and bijective functions, composite and inverse functions
- Check whether a given relation is equivalence or partial order relation.
- Represent the given relation using diagraph, adjacency matrix and arrow diagram.
- Solve a recurrence relation using various methods like back tracking , generating function method etc.
- Explain and solve the tower of Hanoi puzzle.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
DISCRETE MATHEMATICS Unit 1 Recurrence relations	➢ Functions, its domain, co domain and range ➢ Bijective, composite and inverse functions ➢ Relations: definition, examples and properties ➢ Equivalence & partial order relation, Hasse diagram ➢ Recurrence relation: definition, formulation & solving ➢ Tower of Hanoi puzzle	2 3 2 3 4 1	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Bijoya Sarma DEPARTMENT: Mathematics

CLASS: F.Y.B.Sc.(CS) SEMESTER: I MONTH: June to September ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:

- The learners will be able to know descriptive statistical concepts
- The learner will able to study probability concepts required for computer learners.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: 6 Descriptive statistics and introduction to probability **<u>Unit 1</u>**	**Data Presentation**: ● Data types:attribute,variable , discrete and continuous variable ● Data presentation: frequency distribution,histogram, O give curves, stem and leaf display	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Chalk and duster
	Data Aggregation: ● Measures of central tendency: mean , median, mode for raw data, discrete, grouped frequency distribution	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	
	Measures of dispersion: ● Variance, standard deviation, coefficient of variation for raw data,discrete, grouped frequency distribution, quartiles, quantiles real life example	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 2	**Moments**: ● Raw moments, Central moments,relation between raw and central moment	3		
	Measures of Skewness and kurtosis: ● Based on moments and quartiles ● Relation between mean , median and mode for symmetric and asymmetric frequency curve	3		
	Correlation and regression: ● Bivariate data, scatter plot, correlation,nonscence correlation, karl-pearson's coefficient of correlation, independence	5		
	Linear regression: ● Fitting of linear regression using least square method, coefficient of determination, properties of linear regression (only statement)	4		
Unit 3	**Probability:** ● Random experiment,sample space,events, types and operations of events ● Probability definition:classical, axiomatic ● Theorem of probability (without proof) -O<P(A)<1	8		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	- $P(A \cup B)=P(A)+P(B)-P(A \Delta B)$ - $P(A')=1-P(A)$ - $P(A)<P(B)$ if A is subset of B			
	Conditional probability,Baye's theorem, independence, examples of probability	7

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: FYCS SEMESTER: I MONTH:JULY-OCTOBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

The learners will be able to : Students should be able to evaluate business information problem and find the requirements of a problem in terms of data. Students should be able to design the database schema with the use of appropriate data types for storage of data in database. Students should be able to create, manipulate, query and back up the databases.

.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS201, Introduction to Database Management Systems, UNIT-I	**Introduction of DBMS** Database, DBMS – Definition, Overview of DBMS, Advantages of DBMS, Levels of abstraction, Data independence, DBMS Architecture	03	Ramez Elmasri & Shamkant B.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010.	Blackboard, Chalk
	Data models – Client-Server Architecture,Object Based Logical Model, Record Based Logical Model (relational, hierarchical, network)	02		Blackboard, Chalk
	Entity Relationship Model - Entities, attributes, entity sets, relations, relationship sets , Additional constraints (key constraints, participation constraints, weak entities, aggregation / generalization, Conceptual Design using ER (entities VS attributes, Entity Vs relationship, binary Vs ternary, constraints beyond ER)	04		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Relational data model– Domains, attributes, Tuples and Relations, Relational Model Notation, Characteristics of Relations, Relational Constraints - primary key, referential integrity, unique constraint, Null constraint, Check constraint	04		Blackboard, Chalk
	Entity to Table, Relationship to tables with and without key constraints.	02		Blackboard, Chalk
USCS201, Introduction to Database Management Systems, UNIT-II	**ER to The Relational Model** Schema Refinement and normal forms :Functional Dependencies and 1NF, 2NF, 3NF and BCNF normal forms based on primary keys, lossless join decomposition.	03	1.RamezElmasri&ShamkantB.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010. 2. Joel Murach, Murach's MySQL, Murach, 2012	Blackboard, Chalk
	Relational Algebra operations (selection, projection, set operations union, intersection, difference, cross product, Joins –conditional, equi join and natural joins, division)	03		Blackboard, Chalk
	DDL Statements - Creating Databases, Using Databases, datatypes, Creating Tables (with integrity constraints – primary key, default, check, not null), Altering Tables, Renaming Tables, Dropping Tables, Truncating Tables, Backing Up and Restoring databases	02		Blackboard, Chalk
	DML Statements – Viewing the structure of a table insert, update, delete, Select – all columns, specific columns, unique records, conditional select, in clause, between clause, limit, aggregate functions (count, min, max, avg, sum), group by clause, having clause	03		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Functions – String Functions (concat, instr, left, right, mid, length, lcase/lower, ucase/upper, replace, strcmp, trim, ltrim, rtrim), Math Functions (abs, ceil, floor, mod, pow, sqrt, round, truncate) Date Functions (adddate, datediff, day, month, year, hour, min, sec, now, reverse)	02		Blackboard, Chalk
	Joining Tables – inner join, outer join (left outer, right outer, full outer)	02		Blackboard, Chalk
USCS201, Introduction to Database Management Systems, UNIT-III	**Sub queries** Sub queries – sub queries with IN, EXISTS, sub queries restrictions, Nested sub queries, ANY/ALL clause, correlated sub queries	03	Joel Murach, Murach's MySQL, Murach, 2012	Blackboard, Chalk
	Database Protection: Security Issues, Threats to Databases, Security Mechanisms, Role of DBA, Discretionary Access Control	03		Blackboard, Chalk
	Views (creating, altering dropping, renaming and manipulating views)	03		Blackboard, Chalk
	DCL Statements (creating/dropping users, privileges introduction, granting/revoking privileges, viewing privileges)	03		Blackboard, Chalk

NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: SYCS

SEMESTER: III MONTH: JUNE- SEPTEMBER ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Write, compile and execute Java programs
- Build robust applications using Java's object-oriented features
- Create robust applications using Java class libraries
- Develop platform-independent GUIs
- Read and write data using Java streams

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS302, Core Java Unit 1	The Java Language: Features of Java, Java programming format, Java Tokens, Java Statements, Java Data Types, Typecasting, Arrays .	05	1) Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014 2) E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014 3) https://docs.oracle.com/javase/tutorial/	Black Board and chalk, Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	OOPS: Introduction, Class, Object, Static Keywords, Constructors, this Key Word, Inheritance, super Key Word, Polymorphism (overloading and overriding), Abstraction, Encapsulation, Abstract Classes, Interfaces	05	1. E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	String Manipulations: String, String Buffer, String Tokenizer	01	https://docs.oracle.com/javase/tutorial/	Black Board and chalk, PowerPoint
	Packages: Introduction to predefined packages (java.lang, java.util,java.io,Java.sql, java.swing),User Defined Packages, Access specifiers	04	1. E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
USCS302, Core Java Unit 2	Exception Handling: Introduction, Pre-Defined Exceptions, Try-Catch-Finally, Throws, throw, User Defined Exception examples.	05	1. Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	Black Board and chalk, PowerPoint
	Multithreading: Thread Creations, Thread Life Cycle, Life Cycle Methods, Synchronization, Wait() notify() notify all() methods I/O	04	1. Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	Black Board and chalk, PowerPoint
	Streams: Introduction, Byte-oriented streams, Character-oriented streams, File, Random access File, Serialization	03	1.Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Networking: Introduction, Socket, Server socket, Client – Server Communication	03	https://www.tutorialspoint.com/java/java_networking.html	PowerPoint
USCS302, Core Java Unit 3	Wrapper Classes: Introduction, Byte, Short, Integer, Long, Float, Double, Character, Boolean classes	02	1.E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	Collection Framework: Introduction, util Package interfaces, List, Set, Map, List interface & its classes, Set interface & its classes, Map interface & its classes	04	1.E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	Inner Classes: Introduction, Member inner class, Static inner class, Local inner class, Anonymous inner class	04	1.E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	AWT: Introduction, Components, Event-Delegation-Model, Listeners, Layouts, Individual components Label, Button, CheckBox, Radio Button, Choice, List, Menu, Text Field, Text Area	05	1. E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint

NAME OF THE STAFF: Gayatree Karnik DEPARTMENT: IT CLASS:S.Y.B.Sc.(C.S)

SEMESTER: III MONTH:JUNE-JULY ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

- Importance of Operating System, role ,operations and function and environment
- Operating system services, system calls and structure
- Process scheduling, inter process communication and details of threads

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Unit 1 Operating Systems	**Introduction and Operating-Systems Structures**: Definition of Operating system, Operating System's role, Operating-System Operations, Functions of Operating System, Computing Environments	7	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk
	Operating-System Structures: Operating-System Services, User and Operating-System Interface, System Calls, Types of System Calls, Operating-System Structure	5	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk
	Processes: Process Concept, Process Scheduling, Operations on Processes, Interprocess Communication. **Threads**: Overview, Multicore Programming, Multithreading Models	3	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk

NAME OF THE STAFF: GayatreeKarnik DEPARTMENT: IT

CLASS:S.YB.Sc.(C.S..) SEMESTER:III MONTH:JULY-AUGUST ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

- How the process are synchronized and scheduled in the CPU
- Different scheduling algorithms
- Deadlocks, how to avoid and recover from deadlocks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Unit 2 Operating Systems	**Process Synchronization**: General structure of a typical process, race condition, The Critical-Section Problem, Peterson's Solution, Synchronization Hardware, Mutex Locks, Semaphores, Classic Problems of Synchronization, Monitors	5	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk
	CPU Scheduling: Basic Concepts, Scheduling Criteria, Scheduling Algorithms (FCFS, SJF, SRTF, Priority, RR, Multilevel Queue Scheduling, Multilevel Feedback Queue Scheduling), Thread Scheduling	5	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk
	Deadlocks: System Model, Deadlock Characterization, Methods for Handling Deadlocks, Deadlock Prevention, Deadlock Avoidance, Deadlock Detection, Recovery from Deadlock	5	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: _Mr. ABHAY SHASHIKANT DHANMEHER DEPARTMENT: MATHEMATICS

CLASS: S.Y.B.Sc.C.S. SEMESTER: III MONTH: JULY – OCTOBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

1. Appreciate beauty of combinatorics and how combinatorial problems naturally arise in many settings.
2. Understand the combinatorial features in real world situations and Computer Science applications.
3. Apply combinatorial and graph theoretical concepts to understand Computer Science concepts and apply them to solve problems

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
UNIT – I **COMBINATORICS AND GRAPH THEORY**	**Introduction to Combinatorics:** Enumeration, Combinatorics and Graph Theory/ Number Theory/Geometry and Optimization, Sudoku Puzzles	3	Applied Combinatorics Mitchel T. Keller and William T. Trotter	Black-Board
	. Strings, Sets, and Binomial Coefficients: Strings- A First Look, Combinations, Combinatorial, The Ubiquitous Nature of Binomial Coefficients,	4		
	The Binomial, Multinomial Coefficients. Induction: Introduction, The Positive Integers are Well Ordered, The Meaning of Statements,	4		
	Binomial Coefficients Revisited, Solving Combinatorial Problems Recursively, Mathematical Induction, and Inductive Definitions Proofs by Induction. Strong Induction	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT:CS

CLASS:SYCS SEMESTER: SEM-3 MONTH: JUN-SEP ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
Students are able to :
Learn physical interfaces and electronics of Raspberry Pi and program them using practical's
Learn how to make consumer grade IoT safe and secure with proper use of protocols.

PAPER,TITLE, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 6 Physical computing and IOT programming UNIT 1	**SoC and Raspberry PiSystem on Chip**: What is System on chip? Structure of System on Chip. **SoC products:** FPGA, GPU, APU, Compute Units.	4	Physical computing IOT programming by Himalaya publication	BLACK BOARD AND CHALK
	ARM 8 Architecture: SoC on ARM 8. ARM 8 Architecture Introduction	4		
	Introduction to Raspberry Pi: Introduction to Raspberry Pi, Raspberry Pi Hardware, Preparing your raspberry Pi.	4		
	Raspberry Pi Boot: Learn how this small SoC boots without BIOS. Configuring boot sequences and hardware	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 2	**Programming Raspberry Pi** **Raspberry Pi and Linux**: About Raspbian, Linux Commands, Configuring Raspberry Pi with Linux Commands	3	Physical computing IOT programming by Himalaya publication	BLACK BOARD AND CHALK
	Programing interfaces: Introduction to Node.js, Python.	4		
	Raspberry Pi Interfaces: UART, GPIO, I2C, SPI	4		
	Useful Implementations: Cross Compilation, Pulse Width Modulation, SPI for Camera.	4		
Unit 3	. **Introduction to IoT**: What is IoT? IoT examples, Simple IoT LED Program.	3	Physical computing IOT programming by Himalaya publication	BLACK BOARD AND CHALK
	IoT and Protocols **IoT Security**: HTTP, UPnp, CoAP, MQTT, XMPP.	4		
	IoT Service as a Platform: Clayster, Thinger.io, SenseIoT, carriots and Node RED.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	IoT Security and Interoperability: Risks, Modes of Attacks, Tools forSecurity and Interoperability.	4		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 45

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Mrs. Jagruti S. Raut** DEPARTMENT: **CS** CLASS: **S.Y.B.Sc.(CS)**

SEMESTER: **III** MONTH: **June - September** ACADEMIC YEAR: **2019-2020**

LEARNING OBJECTIVE/S:
The learners will be able:

1. Understand Grammar and Languages.
2. Learn about Automata theory and its application in Language Design.
3. Learn about Turing Machines and Pushdown Automata.
4. Understand Linear Bound Automata and its applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS301 Paper I **Theory of Computation** **UNIT I**	**Automata Theory:** Defining Automaton, Finite Automaton, Transitions and Its properties, Acceptability by Finite Automaton	4	Theory of Computer Science, K. L. P Mishra, Chandrasekharan, PHI,3rd Edition. Introduction to Computer Theory, Daniel Cohen, Wiley,2nd Edition.	Chalk and Board
	Nondeterministic Finite State Machines, DFA and NDFA equivalence, Mealy and Moore Machines, Minimizing Automata.	4		
	Formal Languages: Defining Grammar, Derivations, Languges generated by Grammar	3		
	Chomsky Classification of Grammar and Languages, Recursive Enumerable Sets, Operations on Languages, Languages and Automata	4		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT

CLASS:SYCS SEMESTER: SEM-III MONTH:JUN-SEP ACADEMIC YEAR:2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:Master concepts of stored procedure and triggers and its use.Learn about using PL/SQL for data management and understand concepts and implementations of transaction management and crash recovery.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-4 DBMS, UNIT-1	**Stored Procedures:** Types and benefits of stored procedures, creating stored procedures, executing stored procedures, altering stored procedures, viewing stored procedures.	4	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross , Database Management Systems by Ramakrishnam, Gehrke.	Blackboard & Chalk
	Triggers: Concept of triggers, Implementing triggers – creating triggers, Insert, delete, and update triggers, nested triggers, viewing, deleting and modifying triggers, and enforcing data integrity through triggers.	5		
	Sequences: creating sequences, referencing, altering and dropping a sequence.	2		
	File Organization and Indexing: Cluster, Primary and secondary indexing, Index data structure: hash and Tree based indexing	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Comparison of file organization: cost model, Heap files, sorted files, clustered files. Creating, dropping and maintaining indexes.	2		
UNIT-2	**Fundamentals of PL/SQL:** Defining variables and constants, PL/SQL expressions and comparisons: Logical Operators, Boolean Expressions, CASE Expressions Handling.	3	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross	Blackboard & Chalk
	Null Values in Comparisons and Conditional Statements, PL/SQL Datatypes: Number Types, Character Types, Boolean Type, Datetime and Interval Types.	3		
	Overview of PL/SQL Control Structures: Conditional Control: IF and CASE Statements, IF-THEN Statement, IF-THEN-ELSE Statement,	4		
	CASE Statement, Iterative Control: LOOP and EXIT Statements, WHILE-LOOP, FOR-LOOP, Sequential Control: GOTO and NULL Statements	5		
UNIT 3	**Transaction Management:** ACID Properties, Serializability, Two-phase Commit Protocol, Concurrency Control, Lock Management	3	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross, Database Management Systems by	Blackboard & Chalk
	Lost Update Problem, Inconsistent Read Problem , Read-Write Locks, Deadlocks Handling, Two Phase Locking protocol	3		
	DCL Statements: Defining a transaction, Making Changes Permanent with COMMIT, Undoing Changes with ROLLBACK, Undoing Partial Changes with SAVEPOINT and ROLLBACK.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Crash Recovery: ARIES algorithm. The log based recovery, recovery related structures like transaction and dirty page table	3	Ramakrishnam, Gehrke	
	Write-ahead log protocol, check points, recovery from a system crash, Redo and Undo phases.	3		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 45

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MONIKA MADHUKAR RAUT DEPARTMENT: IT/CS

CLASS: SYCS SEMESTER: III MONTH: JUNE TO SEPTEMBER ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to design and develop state of - the art web applications using client-side scripting, server-side scripting, and database connectivity

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307) Unit I	**HTML5:** Fundamental Elements of HTML, Formatting Text in HTML, Organizing Text in HTML, Links and URLs in HTML, Tables in HTML, Images on a Web Page, Image Formats, Image Maps, Colours, FORMs in HTML, Interactive Elements, Working with Multimedia - Audio and Video File Formats, HTML elements for inserting Audio / Video on a web page	8	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and jQuery, 2ed, Dreamtech Press	Black Board and Chalk, Computers while practical session
	CSS: Understanding the Syntax of CSS, CSS Selectors, Inserting CSS in an HTML Document, CSS properties to work with background of a Page, CSS properties to work with Fonts and Text Styles, CSS properties for positioning an element	7		
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307)	**JavaScript:** Using JavaScript in an HTML Document, Programming Fundamentals of JavaScript – Variables, Operators, Control Flow Statements, Popup Boxes, Functions – Defining and Invoking a Function, Defining Function arguments, Defining a Return Statement, Calling Functions with Timer	6	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and	Black Board and Chalk, Computers while practical session

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II	**JavaScript Objects** - String, RegExp, Math, Date, Browser Objects - Window, Navigator, History, Location, Document, Cookies, Document Object Model, Form Validation using JavaScript	2	jQuery, 2ed, Dreamtech Press	Black Board and Chalk, Computers while practical session
	XML: Comparing XML with HTML, Advantages and Disadvantages of XML, Structure of an XML Document, XML Entity References, DTD, XSLT: XSLT Elements and Attributes - xsl:template, xsl:apply-templates, xsl:import, xsl:call-template, xsl:include, xsl:element, xsl:attribute, xsl:attribute-set, xsl:value-of	7		Black Board and Chalk, Computers while practical session
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307) Unit III	**AJAX**: AJAX Web Application Model, How AJAX Works, XMLHttpRequest Object – Properties and Methods, Handling asynchronous requests using AJAX	4	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and jQuery, 2ed, Dreamtech Press, PHP: A Beginners Guide, Vikram Vaswani, TMH	Black Board and Chalk, Computers while practical session
	PHP: Variables and Operators, Program Flow, Arrays, Working with Files and Directories, Working with Databases, Working with Cookies, Sessions and Headers	7		Black Board and Chalk, Computers while practical session
	Introduction to jQuery: Fundamentals, Selectors, methods to access HTML attributes, methods for traversing, manipulators, events, effects	4		Black Board and Chalk, Computers while practical session

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

SEMESTER: **V** MONTH: **June - September** ACADEMIC YEAR: **2019-2020**

LEARNING OBJECTIVE/S:
The learners will be able:

- To get a clear understanding of AI and different search algorithms used for solving problems.
- To get acquainted with different learning algorithms and models used in machine learning.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS501 **Paper I** **Artificial Intelligence** **UNIT I**	**What Is AI:** Foundations, History and State of the Art of AI.	4	Artificial Intelligence: A Modern Approach, Stuart Russell and Peter Norvig,3rd Edition.	Microsoft PowerPoint Presentation
	Intelligent Agents: Agents and Environments, Nature of Environments, Structure of Agents.	3		
	Problem Solving by searching: Problem-Solving Agents, Example Problems, Searching for Solutions, Uninformed Search Strategies.	4		
	Informed (Heuristic) Search Strategies, Heuristic Functions.	4		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Late Shri. Vishnu Waman Thakur Charitable Trust
BhaskarWaman Thakur College of Science
YashvantKeshavPatil College of Commerce
VidhyaDayanandPatil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS501 **Paper I** **Artificial Intelligence** **UNIT II**	**Learning from Examples:** Forms of Learning, Supervised Learning, Learning Decision Trees	3	Artificial Intelligence: A Modern Approach, Stuart Russell and Peter Norvig,3rd Edition.	Microsoft PowerPoint Presentation
	Evaluating and Choosing the Best Hypothesis, Theory of Learning	3		
	Regression and Classification with Linear Models ,Artificial Neural Networks	4		
	Nonparametric Models, Support Vector Machines, Ensemble Learning, Practical Machine Learning	5		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV** DEPARTMENT: **IT** CLASS:**TYBSCCS**

SEMESTER:**V** MONTH:**JUNE-SEPT** ACADEMIC YEAR:**2019-20**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand computer Graphics programming using Directx or Opengl. Along with the VR and AR they should also aware of GPU, newer technologies and programming using most important API for windows.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS507 **Game Programming** Unit-1	**Cartesian Coordinate system:** The Cartesian XY-plane, Function Graphs, Geometric Shapes, Polygonal Shapes, Areas of Shapes, Theorem of Pythagoras in 2D, Coordinates, Theorem of Pythagoras in 3D, 3D Polygons, Euler's Rule	04	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk
	Vectors: Vector Manipulation, multiplying a Vector by a Scalar, Vector Addition and Subtraction, Position Vectors, Unit Vectors, Cartesian Vectors, Vector Multiplication, Scalar Product, Example of the Dot Product, The Dot Product in Lighting Calculations, The Dot Product in Back-Face Detection, The Vector Product, The Right-Hand Rule, deriving a Unit	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Normal Vector for a Triangle Areas, Calculating 2D Areas			
	Transformations: 2D Transformations, Matrices, Homogeneous Coordinates, 3D Transformations, Change of Axes, Direction Cosines, rotating a Point about an Arbitrary Axis, Transforming Vectors, Determinants, Perspective Projection, Interpolation	06	Computer Graphics, C Version, Donald Hern and Pauline Baker, Pearson Education, 2nd Edition, 1997	Black Board and chalk,power point
	DirectX: Understanding GPU and GPU architectures. How they are different from CPU Architectures? Understanding how to solve by GPU?	02	Introduction To 3D Game Programming With Directx® 11	Black Board and chalk,power point
USCS507 **Game Programming** Unit-2	**Introduction To DirectX 11:** COM, Textures and Resources Formats, The swap chain and Page flipping, Depth Buffering, Texture Resource Views, Multisampling Theory and MS in Direct3D, Feature Levels	03	Introduction To 3D Game Programming With Directx® 11	Black Board and chalk,power point
	Direct3D 11 Rendering Pipeline: Overview, Input Assembler Stage (IA), Vertex Shader Stage (VS), The Tessellation Stage (TS), Geometry Shader Stage (GS), Pixel Shader Stage (PS), Output merger Stage (OM) Understanding Meshes or Objects, Texturing, Lighting, Blending.	03	Introduction To 3D Game Programming With Directx® 11	Black Board and chalk,power point
	Trigonometry: The Trigonometric Ratios, Inverse Trigonometric Ratios, Trigonometric	03	Introduction To 3D Game Programming With Directx® 11	Black Board and chalk,power point

	Relationships, The Sine Rule, The Cosine Rule, Compound Angles, Perimeter Relationships			
	Interpolation: Linear Interpolant, Non-Linear Interpolation, Trigonometric Interpolation, Cubic Interpolation, Interpolating Vectors, Interpolating Quaternions	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk,power point
	Curves: Circle, Bezier, B-Splines **Analytic Geometry:** Review of Geometry, 2D Analytic Geometry, Intersection Points, Point in Triangle, and Intersection of circle with straight line.	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk,power point
USCS507 **Game Programming** Unit-3	**Introduction to Rendering Engines:** Understanding the current market Rendering Engines. Understanding AR, VR and MR.Depth Mappers, Mobile Phones, Smart Glasses, HMD's **Unity Engine: Multi-platform publishing, VR + AR:** Introduction and working in Unity, 2D, Graphics, Physics, Scripting, Animation, Timeline, Multiplayer and Networking, UI, Navigation and Pathfinding, XR, Publishing.	10	https://docs.unity3d.com/Manual/index.html	Black Board and chalk,power point
	Scripting: Scripting Overview, Scripting Tools and Event Overview **XR:** VR, AR, MR, Conceptual Differences. SDK, Devices	05	https://docs.unity3d.com/Manual/index.html	Black Board and chalk,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SAMPADA DESHMUKH DEPARTMENT: INFORMATION TECHNOLOGY CLASS: T.Y.C.S.

SEMESTER: V MONTH: JUNE - SEPTEMBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the concepts of basic computer security, Network Security and Cryptography.
- Understand different techniques of cryptography.
- Learn security threats and vulnerabilities and identify security problems.
- Identify threats of Network Security and apply protocol for the network.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS504 Unit 1, **Information and Network Security**	Security Trends, The OSI Security Architecture, Security Attacks, Security Services, Security Mechanisms	03	Cryptography and Network Security: Principles and Practice 5th Edition, William	Black Board and chalk
	Classical Encryption Techniques: Symmetric Cipher Model, Substitution Techniques . Transposition Techniques, Steganography, Block Cipher Principles, The Data Encryption Standard, The Strength of DES	04	Cryptography and Network Security, Atul Kahate, Tata McGraw-Hill, 2013.	Black Board and chalk
	Multiple encryption Triple DES	02	Cryptography and Network Security, Atul Kahate, Tata McGraw-Hill, 2013.	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Advanced Encryption Algorithm			
	Principles of public key cryptosystem concept and working Modes of operation Block cipher	03	Cryptography and Network Security: Principles and Practice 5th Edition, William	Black Board and chalk
	Stream cipher RSA Algorithm concept RSA algorithm problem solving	03	Cryptography and Network Security, Atul Kahate, Tata McGraw-Hill, 2013.	Black Board and chalk
USCS504, Unit 2, **Information and Network Security**	**Key Management:** Public-Key Cryptosystems Key Management Diffie-Hellman Key Exchange	03	Cryptography and Network Security: Principles and Practice 5th Edition, William	Black Board and chalk
	Message Authentication and Hash Functions: Authentication Requirements, Authentication Functions, Message Authentication Codes Hash Functions, Security of Hash Functions and Macs,	04	Cryptography and Network Security, Atul Kahate, Tata McGraw-Hill, 2013.	Black Board and chalk
	HMAC Secure Hash Algorithm **Digital Signatures and Authentication:** Digital Signatures, Authentication Protocols	04	Cryptography and Network Security: Principles and Practice 5th Edition, William	Black Board and chalk
	Digital Signature Standard **Authentication Applications:** Kerberos, X.509 Authentication, Public-Key Infrastructure	04	Cryptography and Network Security: Principles and Practice 5th Edition, William	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS504, Unit 3, **Information and Network Security**	**Electronic Mail Security:** Pretty Good Privacy, S/MIME **IP Security:** Overview, Architecture, Authentication Header, Encapsulating Security Payload, Combining Security Associations, Key Management	05	Cryptography and Network Security: Principles and Practice 5th Edition, William	Black Board , Projector
	Web Security: Web Security Considerations, Secure Socket Layer and Transport Layer Security, Secure Electronic Transaction **Intrusion:** Intruders, Intrusion Techniques, Intrusion Detection	05	Cryptography and Network Security: Principles and Practice 5th Edition, William	Black Board , projector
	Malicious Software: Viruses and Related Threats, Virus Countermeasures, DDOS **Firewalls:** Firewall Design Principles, Types of Firewalls	05	Cryptography and Network Security: Principles and Practice 5th Edition, William	Black Board , Projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande DEPARTMENT: Computer Science CLASS: T.Y.C.S.

SEMESTER: V MONTH: June - September ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand various software testing methods and strategies. Understand a variety of software metrics, and identify defects and managing those defects for improvement in quality for given software. Design SQA activities, SQA strategy, formal technical review report for software quality control and assurance.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS501 Software Testing and Quality Assurance UNIT : 01	**Software Testing and Introduction to quality :** Introduction, Nature of errors, an example for Testing, Definition of Quality , QA, QC, QM and SQA , Software Development Life Cycle, Software Quality Factors	05	Software Engineering for Students, A Programming Approach, Douglas Bell, 4th Edition,, Pearson Education, 2005	Blackboard PPT Projector
	Verification and Validation : Definition of V &V , Different types of V & V Mechanisms, Concepts of Software Reviews, Inspection and Walkthrough	05		Blackboard PPT Projector
	Software Testing Techniques : Testing Fundamentals, Test Case Design, White Box Testing and its types, Black Box Testing and its types	05		Blackboard PPT Projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: Information Technology

CLASS: TYCS SEMESTER: V MONTH: JUNE to SEPT ACADEMIC YEAR:2019-2020

LEARNING OBJECTIVE/S:

•To understand the details of web services technologies like SOAP, WSDL, and UDDI. To learn how to implement and deploy web service client and server.

•To understand the design principles and application of SOAP and REST based web services (JAX-Ws and JAX-RS).

•To understand WCF service. To design secure web services and QoS of Web Services

The learners will be able to:

•Emphasis on SOAP based web services and associated standards such as WSDL. Design SOAP based / RESTful / WCF services Deal with Security and QoS issues of Web Services

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Web Services Elective-II USCS506 Unit 1	**Web services basics:** What Are Web Services? Types of Web Services Distributed computing infrastructure,	5	Web Services: Principles and Technology,Michael P. Papazoglou, Pearson Education Limited, 2008	Projector, Laptop, Black board& Chalk
	overview of XML, SOAP, Building Web Services with JAX-WS, Registering and Discovering Web Services, Service Oriented Architecture	5	Web Services: Principles and Technology,Michael P. Papazoglou, Pearson Education Limited, 2008	Projector, Laptop, Black board& Chalk
	Web Services Development Life Cycle,	5	Web Services: Principles and Technology,Michael P.	Projector, Laptop, Black board& Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Developing and consuming simple Web Services across platform		Papazoglou, Pearson Education Limited, 2008	
Web Services Elective-II USCS506 Unit 2	**The REST Architectural style:** Introducing HTTP, The core architectural elements of a RESTful system, Description and discovery of RESTful web services,	5	RESTful Java Web Services, Jobinesh Purushothaman, PACKT Publishing,2 nd Edition, 2015	Projector, Laptop, Black board& Chalk
	Java tools and frameworks for building RESTful web services, JSON message format and tools and frameworks around JSON, Build RESTful web services with JAX-RS APIs,	5	RESTful Java Web Services, Jobinesh Purushothaman, PACKT Publishing,2 nd Edition, 2015	Projector, Laptop, Black board& Chalk
	The Description and Discovery of RESTful Web Services, Design guidelines for building RESTful web services, Secure RESTful web services.	5	RESTful Java Web Services, Jobinesh Purushothaman, PACKT Publishing,2 nd Edition, 2015	Projector, Laptop, Black board& Chalk
Web Services Elective-II USCS506 Unit 3	**Developing Service-Oriented Applications with WCF :** What Is Windows Communication Foundation, Fundamental Windows Communication Foundation Concepts	5	Developing Service-Oriented Applications with WCF, Microsoft, 2017 https://docs.microsoft.com/en-us/dotnet/framework/wcf/index	Projector, Laptop, Black board& Chalk
	Windows Communication Foundation Architecture,	3	Developing Service-Oriented Applications with WCF, Microsoft, 2017 https://docs.microsoft.com/en-us/dotnet/framework/wcf/index	Projector, Laptop, Black board& Chalk
	WCF and .NET Framework Client Profile, Basic WCF Programming, WCF Feature Details. Web Service QoS	7	Developing Service-Oriented Applications with WCF, Microsoft, 2017 https://docs.microsoft.com/en-us/dotnet/framework/wcf/index	Projector, Laptop, Black board& Chalk

TEACHING PLAN (UNIT 1 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: II MONTH: DECEMBER - JANUARY ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the concept of limit, continuity and derivative of a function.
- Check the continuity of the function at the given point.
- Find the derivatives of functions of various functions
- Use derivatives in various applications like concavity, maxima/minima, increasing/decreasing functions etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CALCULUS Unit 1 Derivatives & its applications	➢ Limit, continuity and derivative of a function ➢ Asymptotes, increasing/decreasing functions, concavity. ➢ Absolute and relative maxima and minima ➢ Graphing of polynomials and Newton's method	5 3 4 3	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TEACHING PLAN (UNIT 2 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: II MONTH: FEBRUARY ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

- Evaluate indefinite integral using different methods like substitution, integration by parts etc.
- Evaluate definite integral using the properties of definite integration and by Simpson's rule
- Find the area bounded between curves and length of plane curve using integration.
- Solve the given differential equation using different methods

s

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CALCULUS Unit 2 Integration & its applications	➢ Indefinite and definite integration ➢ Area between two curves ➢ Length of plane curve ➢ Simpson's rule ➢ Solving differential equations	5 3 1 2 4	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TEACHING PLAN (UNIT 3 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: II MONTH: MARCH ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the concept of limits, continuity and derivatives of functions of two or more variables.
- Find the first and second order partial derivatives of functions of two variables.
- Find the linearization of the given function at the given point.
- Understand the concept of gradients and directional derivatives.
- Find the derivative of a function of two variable using chain rule.
- Find the relative extrema and saddle point of the given function of two variables using partial derivatives.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CALCULUS Unit 3 Partial Derivatives & its applications	➢ Limit, continuity and partial derivatives of functions of two or more variables ➢ Linearization and chain rule ➢ Directional derivatives and gradients ➢ Tangent planes and normal lines ➢ Maxima and minima of functions of two variables	5 2 3 2 3	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: FYCS

SEMESTER: II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Be familiar with basic techniques of algorithm analysis
- Be familiar with writing recursive methods
- Describe common applications for arrays, records, linked structures, stacks, queues, trees, and graphs
- Ability to summarize searching and sorting techniques.
- Be familiar with advanced data structures such as balanced search trees, hash tables, priority queues and the disjoint set union/find data structure

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS204, Data Structures Unit 1	Abstract Data Types: Introduction, The Date Abstract Data Type, Bags, Iterators. Application Type,	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, Powerpoint
	Arrays: Array Structure, Python List, Two Dimensional Arrays, Matrix Abstract Data	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Application Sets and Maps: Sets-Set ADT, Selecting Data Structure, List based Implementation, Maps-Map ADT, List Based Implementation, Multi-Dimensional Arrays-	04	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Multi-Array ADT, Implementing Multiarrays, Application		Wiley India Edition	
	Application Searching and Sorting: Searching-Linear Search, Binary Search, Sorting-Bubble, Selection and Insertion Sort, Working with Sorted Lists-Maintaining Sorted List, Maintaining sorted Lists.	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Algorithm Analysis: Complexity Analysis-Big-O Notation, Evaluating Python Code, Evaluating Python List, Amortized Cost, Evaluating Set ADT,	02	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
USCS204, Data Structures Unit 2	Linked Structures: Introduction, Singly Linked List-Traversing, Searching, Prepending and Removing Nodes, Bag ADT-Linked List Implementation. Comparing Implementations, Linked List Iterators, More Ways to Build Kinked Lists	05	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Applications-Polynomials Stacks: Stack ADT, Implementing Stacks-Using Python List, Using Linked List, Stack Applications-Balanced Delimiters, Evaluating Postfix Expressions	04	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	, Queues: Queue ADT, Implementing Queue-Using Python List, Circular Array, Using List, Priority Queues- Priority Queue ADT, Bounded and unbounded Priority Queues	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Advanced Linked List: Doubly Linked Lists-Organization and Operation, Circular Linked List-Organization and Operation, Multi Lists	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS204, Data Structures Unit 3	Recursion: Recursive Functions, Properties of Recursion, Its working, Recursive	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Hash Table: Introduction, Hashing-Linear Probing, Clustering, Rehashing, Separate Chaining, Hash Functions	04	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Advanced Sorting: Merge Sort, Quick Sort, Radix Sort, Sorting Linked List	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Applications Binary Trees: Tree Structure, Binary Tree-Properties, Implementation and Traversals, Expression Trees, Heaps and Heapsort,Search Trees	05	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT

CLASS:FYCS SEMESTER: SEM-II MONTH:DEC-MAR ACADEMIC YEAR:2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:Develop logicwhich will help them to write, compile and debug programs in C language, able to use different data types in a computer program.Also by learning thedesign programs involving decision structures, loops and functions.It use different data structures and create/update basic data files.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-1 PROGRAMMING WITH C, UNIT 1	**Structure of C program:** Header and body, Use of comments. Interpreters vs compilers, Python vs C. Compilation of a program. Formatted I/O: printf(), scanf().	2	Programming in ANSI C : E Balagurusamy	Blackboard & Chalk
	Data: Variables, Constants, data types like: int, float char, double and void, short and long size qualifiers, signed and unsigned qualifiers. Compare with datatypes in Python. Compare static typing in C vs dynamic typing in Python .	2		
	Variables: Declaring variables, scope of the variables according to block, hierarchy of data types. Compare explicit declarations in C with implicit declarations in Python.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Types of operators: Arithmetic, relational, logical, compound assignment, increment and decrement, conditional or ternary, bitwise and comma operators. Precedence and order of evaluation, statements and Expressions. Automatic and explicit type conversion.	4		
	Iterations: Control statements for decision making: (i) Branching: if statement, else.. if statement, (does the writer mean if-else or nested ifs)switch statement. (ii) Looping: while loop, do.. while, for loop. (iii) Jump statements: break, continue and goto.	5		
UNIT-2	**Arrays**: (One and two dimensional), declaring array variables, initialization of arrays, accessing array elements. Compare array types of C with list and tuple types of Python.	4	Programming in ANSI C : E Balagurusamy	Blackboard & Chalk
	Data Input and Output functions: Character I/O format: getch(), getche(), getchar(), getc(), gets(), putchar(), putc(), puts().	4		
	Manipulating Strings: Declaring and initializing String variables, Character and string handling functions. Compare with Python strings.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Functions: Function declaration, function definition, Global and local variables, return statement, Calling a function by passing values.	4		
	Recursion: Definition, Recursive functions.	1		
UNIT 3	**Pointer**: Fundamentals, Pointer variables, Referencing and de-referencing, Pointer Arithmetic, Using Pointers with Arrays, Using Pointers with Strings, Array of Pointers, Pointers as function arguments, Functions returning pointers.	4	Programming in ANSI C : E Balagurusamy	Blackboard & Chalk
	Dynamic Memory Allocation:malloc(), calloc(), realloc(), free() and sizeof operator. Compare with automatic garbage collection in Python.	3		
	Structure: Declaration of structure, reading and assignment of structure variables, Array of structures, arrays within structures, structures within structures. Compare C structures with Python tuples.	4		
	Unions: Defining and working with unions.	1		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	File handling: Different types of files like text and binary, Different types of functions: fopen(), fclose(), fgetc(), fputc(), fgets(), fputs(), fscanf(), fprintf(), getw(), putw(), fread(), fwrite(), fseek().	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS CLASS: FYCS

SEMESTER: SEM-2 MONTH:DEC-MARCH ACADEMIC YEAR:2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- Familiarize with the concept of Green Computing and Green IT infrastructure for making computing andinformation system environment sustainable.
- Learn about green IT can be achieved in and by hardware, software, network communication and datacenter operations.
- Understand the strategies, frameworks, processes and management of green IT.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
7 GREEN TECHNOLOGY UNIT 1	**Green IT Overview:**Introduction , Environmental Concerns and SustainableDevelopment, Environmental Impacts of IT, Green I , Holistic Approach to Greening IT,Greening IT, Applying IT for Enhancing Environmental Sustainability, Green IT Standards and Eco-Labelling of IT , Enterprise Green IT Strategy, Green Washing, Green IT: Burdenor Opportunity?	4	Harnessing Green IT: Principles and Practices bySan Murugesan, G. R. Ganadharan, Wiley & IEEE.	BLACK BOARD AND CHALK
	Green Devices and Hardware: Introduction , Life Cycle of a Device or Hardware, Reuse,Recycle and Dispose	3		
	Green Software: Introduction , Processor Power States , Energy-Saving SoftwareTechniques, Evaluating and Measuring Software Impact to Platform Power	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Sustainable Software Development: Introduction, Current Practices, SustainableSoftware, Software Sustainability Attributes, Software Sustainability Metrics,Sustainable Software Methodology, Defining Actions	4		
UNIT 2	**Green Data Centres:**Data Centres and Associated Energy Challenges, Data Centre ITInfrastructure, Data Centre Facility Infrastructure: Implications for Energy Efficiency, ITInfrastructure Management, Green Data Centre Metrics	4	Harnessing Green IT: Principles and Practices by San Murugesan, G. R. Ganadharan, Wiley & IEEE.	BLACK BOARD AND CHALK
	Green Data Storage: Introduction , Storage Media Power Characteristics, EnergyManagement Techniques for Hard Disks, System-Level Energy Management	4		
	Green Networks and Communications: Introduction, Objectives of Green NetworkProtocols, Green Network Protocols and Standards	3		
	Enterprise Green IT Strategy: Introduction, Approaching Green IT Strategies, Business Drivers of Green IT Strategy, Business Dimensions for Green IT Transformation, Organizational Considerations in a Green IT Strategy, Steps in Developing a Green ITStrategy, Metrics and Measurements in Green Strategies.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Sustainable Information Systems and Green Metrics:**Introduction, MultilevelSustainable Information, Sustainability Hierarchy Models, Product Level Information,Individual Level Information, Functional Level Information, Organizational LevelInformation, Measuring the Maturity of Sustainable ICT	4	Harnessing Green IT: Principles and Practices bySan Murugesan, G. R. Ganadharan, Wiley & IEEE.	BLACK BOARD AND CHALK
	Enterprise Green IT Readiness: Introduction, Readiness and Capability, Development ofthe G-Readiness Framework, Measuring an Organization's G-Readiness	3		
	Sustainable IT Services: Creating a Framework for Service Innovation: Introduction,Factors Driving the Development of Sustainable IT, Sustainable IT Services (SITS), SITSStrategic Framework	4		
	Green Enterprises and the Role of IT: Introduction, Organizational and EnterpriseGreening, Information Systems in Greening Enterprises, Greening the Enterprise: ITUsage and Hardware, Inter-organizational Enterprise Activities and Green Issues	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar DEPARTMENT: Computer Science

CLASS: F.Y.B.Sc.(CS) SEMESTER: 2 MONTH: December to March ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- The learners will be able to know descriptive statistical concepts
- The learner will able to study probability concepts required for computer learners.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: 6 **Statistical methods and testing of hypothesis** **<u>Unit 1</u>**	Standard distribution: ● Random variable, discrete random variable, continuous random variable, ● Expectation and variance of discrete and continuous random variable	4	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Black board, chalk and duster
	● Pmf and Cdf for discrete random variable	2	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Black board, chalk and duster
	● PDF and Cdf for continuous random variable ● Reliability	3	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Black board, chalk and duster
	Introduction and properties without proof for following distribution: ● Binomial distribution	3	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Black board, chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	● Normal distribution			
	Introduction and properties without proof for following distribution: ● Chi-square distribution ● T- distribution ● F- distribution	3	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Black board, chalk and duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: FYCS

SEMESTER: II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand how to read/write to files using python.
- Catch their own errors that happen during execution of programs.
- Get introductions to the concept of pattern matching.
- Be familiar with the concepts of GUI controls and designing GUI applications.
- Connect to the database to move the data to/from the application.
- Know how to connect to computers, read from URL and send email.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS202, Unit 1, Programming with Python- II	Python File Input-Output: Opening and closing files, various types of file modes, reading and writing to files, manipulating directories. Iterables, iterators and their problem solving applications.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Exception handling: What is an exception, various keywords to handle exceptions such try, catch, except, else, finally, raise.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Regular Expressions: Concept of regular expression, various types of regular expressions, using match function.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
USCS202, Unit 2, Programming with Python- II	GUI Programming in Python (using Tkinter/wxPython/Qt) What is GUI, Advantages of GUI	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Introduction to GUI library. Layout management, events and bindings, fonts, colours, drawing on canvas (line, oval, rectangle, etc.)	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Widgets such as : frame, label, button, checkbutton, entry, listbox, message, radiobutton, text, spinbox etc	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
USCS202, Unit 3, Programming with Python-II	Database connectivity in Python: Installing mysql connector, accessing connector module module, using connect, cursor, execute & close functions.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Reading single & multiple results of query execution, executing different types of statements, executing transactions, understanding exceptions in database connectivity	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Network connectivity: Socket module, creating server-client programs, sending email, reading from URL	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: FYCS SEMESTER: II MONTH:DEC-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S: Students should have a good working knowledge of Linux, from botha graphical and command line perspective, allowing them to easily use any Linux distribution.This course shall help student to learn advanced subjects in computer science practically. Student shall be able to progress as a Developer or Linux System Administrator using the acquired skill set.

.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS203 Linux Unit I	Introduction History of Linux, Philosophy, Community, Terminology, Distributions, Linux kernel vsdistribution.Why learn Linux? Importance of Linux in software ecosystem: web servers, supercomputers, mobile, servers.	05	Unix Concepts and Applications by Sumitabha Das., Official Ubuntu Book, 8th Edition, by Matthew Helmke& Elizabeth K. Joseph with Jose Antonio Rey and Philips Ballew, Prentice Hall	Blackboard, Chalk
	Installation Installation methods, Hands on Installation using CD/DVD or USB drive.	03		Blackboard, Chalk
	Linux Structure Linux Architecture, Filesystem basics, The boot process, init scripts, runlevels,shutdown process, Very basic introductions to Linux processes, Packaging methods:rpm/deb, Graphical Vs Command line.	07		Blackboard, Chalk
USCS203 Linux	Graphical Desktop: Session Management, Basic Desktop Operations, Network	07	Unix Concepts and Applications	Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II	Management, Installingand Updating Software, Text editors: gedit, vi, vim, emacs, Graphics editors,Multimedia applications.		by SumitabhaDas., Official Ubuntu Book, 8th Edition, by Matthew Helmke& Elizabeth K. Joseph with Jose Antonio Rey and Philips Ballew, Prentice Hall	
	Command Line Command line mode options, Shells, Basic Commands, General Purpose Utilities,Installing Software, User management, Environment variables, Command aliases.	03		Blackboard, Chalk
	Linux Documentation: man pages, GNU info, help command, More documentation sources	02		Blackboard, Chalk
	File Operations Filesystem, Filesystem architecture, File types, File attributes, Working with files, Backup, compression	03		Blackboard, Chalk
	Security Understanding Linux Security, Uses of root, sudo command, working with passwords, Bypassing user authentication, Understanding ssh	05	Unix Concepts and Applications by Sumitabha Das., Official Ubuntu Book, 8th Edition, by Matthew Helmke& Elizabeth K. Joseph with Jose Antonio Rey and Philips Ballew, Prentice Hall	Blackboard, Chalk
	Networking: Basic introduction to Networking, Network protocols: http, ftp etc., IP address, DNS,Browsers, Transferring files.ssh, telnet, ping, traceroute, route, hostname, networking GUI.	04		Blackboard, Chalk
	Basic Shell Scripting Features and capabilities, Syntax, Constructs, Modifying files, Sed, awkcommand,File manipulation utilities, Dealing with large files and Text, String manipulation,Boolean expressions, File tests, Case, Debugging, Regular expressions	06		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV----** DEPARTMENT: **IT** CLASS:**SYBSCCS**

SEMESTER:**IV** MONTH:**DEC-MARCH** ACADEMIC YEAR:**2019-20**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand basic principles of algorithm design and why algorithm analysis is important
understand how to implement algorithms in Python
understand how to transform new problems into algorithmic problems with efficient solutions
understand algorithm design techniques for solving different problems

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS401 **Fundamentals of Algorithms** UNIT-1	Introduction to algorithm, Why to analysis algorithm, Running time analysis, How to Compare Algorithms, Rate of Growth, Commonly Used Rates of Growth, Types of Analysis, Asymptotic Notation, Big-O Notation, Omega-Ω Notation, Theta-Θ Notation, Asymptotic Analysis, Properties of Notations,	07	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point
	Commonly used Logarithms and Summations, Performance characteristics of algorithms, Master Theorem for Divide and Conquer, Divide and Conquer Master Theorem: Problems & Solutions, Master Theorem for Subtract and Conquer Recurrences, Method of Guessing and Confirming	08	Introduction to Algorithm,	Black board and chalk,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Thomas H Cormen, PHI	
USCS401 **Fundamentals of Algorithms** UNIT-2	Tree algorithms: What is a Tree? Glossary, Binary Trees, Types of Binary Trees, Properties of Binary Trees, Binary Tree Traversals, Generic Trees (N-ary Trees), Threaded Binary Tree Traversals, Expression Trees, Binary Search Trees (BSTs), Balanced Binary Search Trees, AVL (Adelson-Velskii and Landis) Trees	06	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point
	Graph Algorithms: Introduction, Glossary, Applications of Graphs, Graph Representation, Graph Traversals, Topological Sort, Shortest Path Algorithms, Minimal Spanning Tree Selection Algorithms: What are Selection Algorithms? Selection by Sorting, Partition-based Selection Algorithm, Linear Selection Algorithm - Median of Medians Algorithm, Finding the K Smallest Elements in Sorted Order	09	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point
USCS401 **Fundamentals of Algorithms** UNIT-3	Algorithms Design Techniques: Introduction, Classification, Classification by Implementation Method, Classification by Design Method Greedy Algorithms: Introduction, Greedy Strategy, Elements of Greedy Algorithms, Advantages and Disadvantages of Greedy Method, Greedy Applications, Understanding Greedy Technique Divide and Conquer Algorithms: Introduction, What is Divide and Conquer Strategy? Divide and Conquer Visualization, Understanding Divide and Conquer, Advantages of Divide and Conquer, Disadvantages of Divide and Conquer, Master Theorem, Divide and Conquer Applications	07	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Dynamic Programming: Introduction, What is Dynamic Programming Strategy? Properties of Dynamic Programming Strategy, Problems which can be solved using Dynamic Programming, Dynamic Programming Approaches, Examples of Dynamic Programming Algorithms, Understanding Dynamic Programming, Longest Common Subsequence	09	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar DEPARTMENT: Computer Science CLASS: S.Y.B.Sc.(CS)

SEMESTER: 4 MONTH: December to March ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

- Appreciate the relevance of linear algebra in a field of computer science.
- Understand the concept through program implementation.
- Instill the computational thinking while learning linear algebra.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405 **Linear Algebra using python** **<u>Unit 1</u>**	**Field**: ● Introduction to complex number,numbers in python,Abstracting over field ● playing with GF(2),	4	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board, chalk and duster
	Vector Space: ● Vectors are functions, ● Vector addition and scalar multiplication ● Combining vector addition and scalar multiplication ● Geometry of sets of vectors	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board, chalk and duster
	● Dictionary based representation of vectors ● Dot product	2	Coding the matrix linear algebra through application to computer science, edition 1 philip N	Black board, chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Klein, Newtonian press(2013)	
	Linear system : ● Homogeneous and non homogeneous equation ● Solving triangular system of linear equations	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board, chalk and duster
	● Linear combination and linear span	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board, chalk and duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405 **Linear Algebra using python** **<u>Unit 2</u>**	**Matrix:** ● Matrices as vectors, transpose ● Matrix -vector and vector-matrix multiplication in terms of linear combination ● Matrix -vector and vector-matrix multiplication in terms of dot-product	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board,chalk and duster
	● Null space, computing Sparse matrix, vector product	3	Coding the matrix linear algebra through	Black board,chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	• Linear function • Inner product and outer product • From function inverse to matrix inverse		application to computer science, edition 1 philip N Klein, Newtonian press(2013)	
	Basis: • Coordinate system,Two greedy algorithm for finding set of generators • Minimum spanning forest and GF(2) • Linear dependence and independence	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board,chalk and duster
	Basis: • Basis, unique representation,change of basis • Computational problems involving finding a basis	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board,chalk and duster
	Dimensions: • Dimension and rank, • Direct sum • Dimension and linear function • The annihilator	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board,chalk and duster

The learners will be able to : To explore .NET technologies for designing and developing dynamic, interactive and responsive web applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper:USCS406 unit:1, Title: .Net Technologies	**The .NET Framework:**.NET Languages, Common Language Runtime, .NET Class Library	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	C# Language Basics: Comments, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods, Classes, Value Types and Reference Types, Namespaces and Assemblies, Inheritance, Static Members, Casting Objects, Partial Classes	3	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	ASP.NET: Creating Websites, Anatomy of a Web Form - Page Directive, Doctype, Writing Code - Code-Behind Class, Adding Event Handlers, Anatomy of an ASP.NET Application - ASP.NET File Types, ASP.NET Web Folders,	5	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	HTML Server Controls - View State, HTML Control Classes, HTML Control Events, HtmlControl Base Class,	5		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	HtmlContainerControl Class, HtmlInputControl Class, Page Class, global.asax File, web.config File		Beginning ASP.NET 4.5 in C#	
Paper:USCS406 unit:2, Title: .Net Technologies	**Web Controls:** Web Control Classes, WebControl Base Class, List Controls, Table Controls, Web Control Events and AutoPostBack, Page Life Cycle	3	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	State Management: ViewState, Cross-Page Posting, Query String, Cookies, Session State, Configuring Session State, Application State	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	Validation: Validation Controls, Server-Side Validation, Client-Side Validation, HTML5 Validation, Manual Validation, Validation with Regular Expressions	3	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	Rich Controls: Calendar Control, AdRotator Control, MultiView Control	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	Themes and Master Pages: How Themes Work, Applying a Simple Theme, Handling Theme Conflicts, Simple Master Page and Content Page, Connecting Master pages and Content Pages, Master Page with Multiple Content Regions, Master Pages and Relative Paths	3	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	Website Navigation: Site Maps, URL Mapping and Routing, SiteMapPath Control, TreeView Control, Menu Control	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector

Paper:USCS406 unit:3, Title: .Net Technologies	**ADO.NET:** Data Provider Model, Direct Data Access - Creating a Connection, Select Command, DataReader, Disconnected Data Access	3	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	Data Binding: Introduction, Single-Value Data Binding, Repeated-Value Data Binding, Data Source Controls – SqlDataSource	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	Data Controls: GridView, DetailsView, FormView	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	Working with XML: XML Classes – XMLTextWriter, XMLTextReader	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	Caching: When to Use Caching, Output Caching, Data Caching	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	LINQ: Understanding LINQ, LINQ Basics,	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector
	ASP.NET AJAX: ScriptManager, Partial Refreshes, Progress Notification, Timed Refreshes	2	Beginning ASP.NET 4.5 in C#	Presentation, board, projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: TYCS

SEMESTER: VI MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Ability to use knowledge of data structures and indexing methods in information retrieval Systems·
- Understand the underlined problems related to IR
- Acquire the necessary experience to design, and implement real applications using Information Retrieval systems.

APER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS604, Information Retrieval Unit 1	Introduction to Information Retrieval: Introduction, History of IR, Components of IR, and Issues related to IR, Boolean retrieval, Dictionaries and tolerant retrieval.	07	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008 2. Modern Information Retrieval: The Concepts and Technology behind Search, Ricardo Baeza - Yates and Berthier Ribeiro – Neto, 2 nd Edition, ACM Press Books 2011.	Black Board and chalk, PowerPoint
USCS604, Information	Link Analysis and Specialized Search: Link Analysis, hubs and authorities, Page Rank and HITS algorithms, Similarity,	12	1. Introduction to Information Retrieval, C.	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Retrieval Unit 2	Hadoop & Map Reduce, Evaluation, Personalized search, Collaborative filtering and content-based recommendation of documents and products, handling ―invisible‖ Web, Snippet generation, Summarization, Question Answering, Cross-Lingual Retrieval.		Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008	
USCS604, Information Retrieval Unit 3	Web Search Engine: Web search overview, web structure, the user, paid placement, search engine optimization/spam, Web size measurement, search engine optimization/spam, Web Search Architectures.	06	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008	Black Board and chalk, PowerPoint
	XML retrieval: Basic XML concepts, Challenges in XML retrieval, A vector space model for XML retrieval, Evaluation of XML retrieval, Text-centric versus data-centric XML retrieval.	06	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SAMPADA DESHMUKH DEPARTMENT: INFORMATION TECHNOLOGY CLASS: T.Y.C.S.

SEMESTER: VI MONTH: DECEMBER - MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the procedures for identification, preservation, and extraction of electronic evidence
- Understand auditing and investigation of network and host system intrusions
- Learn analysis of documentation of information gathered
- Investigate various media to collect evidence, report them in a way that would be acceptable in the court of law
- Plan and prepare for all stages of an investigation - detection, initial response and management interaction

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande DEPARTMENT: Computer Science CLASS: T.Y.C.S.

SEMESTER: VI MONTH: Dec - March ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

After completion of this course, learner should be able to list various applications of wireless sensor networks, describe the concepts, protocols, design, implementation and use of wireless sensor networks. Also implement and evaluate new ideas for solving wireless sensor network design issues.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 01	**Introduction:** Introduction to Sensor Networks, unique constraints and challenges. Advantage of Sensor Networks, Applications of Sensor Networks, Mobile AdhocNETworks (MANETs) and Wireless Sensor Networks, Enabling technologies for Wireless Sensor Networks.	07	Protocols and Architectures for Wireless Sensor Network, Holger Kerl, Andreas Willig, John Wiley and Sons, 2005	Blackboard PPT Projector
	Sensor Node Hardware and Network Architecture: Single-node architecture, Hardware components & design constraints, Operating systems and execution environments, introduction to TinyOS and nesC. Network architecture, Optimization goals and figures of merit, Design principles for WSNs, Service interfaces of WSNs, Gateway concepts.	08		Blackboard PPT Projector

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 02	**Medium Access Control Protocols:** Fundamentals of MAC Protocols, MAC Protocols for WSNs, Sensor-MAC Case Study.	05	Wireless Sensor Networks Technology, Protocols, and Applications ,KazemSohraby, Daniel Minoli and TaiebZnati, John Wiley & Sons, 2007	Blackboard PPT
	Routing Protocols : Data Dissemination and Gathering, Routing Challenges and Design Issues in Wireless Sensor Networks, Routing Strategies in Wireless Sensor Networks.	05		Blackboard PPT
	Transport Control Protocols : Traditional Transport Control Protocols, Transport Protocol Design Issues, Examples of Existing Transport Control Protocols, Performance of Transport Control Protocols.	05		Blackboard PPT
USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 03	**Introduction, Wireless Transmission and Medium Access Control:** Applications, A short history of wireless communication.	02	Mobile communications, Jochen Schiller,2nd Edition, Addison wisely , Pearson Education,2012	Blackboard PPT
	Wireless Transmission: Frequency for radio transmission, Signals, Antennas, Signal propagation, Multiplexing, Modulation, Spread spectrum, Cellular systems.	05		Blackboard PPT
	Telecommunication, Satellite and Broadcast Systems: GSM: Mobile services, System architecture, Radio interface, Protocols, Localization And Calling, Handover, security, New data services; DECT: System architecture, Protocol architecture; ETRA, UMTS and IMT- 2000. Satellite Systems: History, Applications, Basics: GEO, LEO, MEO; Routing, Localization, Handover.	08		Blackboard PPT

	Types of vulnerabilities : OWASP Top 10 : cross-site scripting (XSS), cross site request forgery (CSRF/XSRF), SQL injection, input parameter manipulation, broken authentication, sensitive information disclosure, XML External Entities, Broken access control, Security Misconfiguration, Using components with known vulnerabilities, Insufficient Logging and monitoring, OWASP Mobile Top 10, CVE Database	4	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND Internet	Projector, Laptop, Black board& Chalk
	Types of attacks and their common prevention mechanisms : Keystroke Logging, Denial of Service (DoS /DDoS), Waterhole attack, brute force, phishing and fake WAP, Eavesdropping, Man-in-the-middle, Session Hijacking, Clickjacking, Cookie Theft, URL Obfuscation, buffer overflow, DNS poisoning, ARP poisoning, Identity Theft, IoT Attacks, BOTs and BOTNETs	4	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND Internet	Projector, Laptop, Black board& Chalk
	Case-studies : Recent attacks – Yahoo, Adult Friend Finder, eBay, Equifax, WannaCry, Target Stores, Uber, JP Morgan Chase, Bad Rabbit	1	Internet	Projector, Laptop, Black board& Chalk
Ethical Hacking Elective-II USCS506 Unit 2	**Ethical Hacking – I (Introduction and pre-attack) Introduction:** Black Hat vs. Gray Hat vs. White Hat (Ethical) hacking, Why is Ethical hacking needed?, How is Ethical hacking different from security auditing and digital forensics?, Signing NDA, Compliance and Regulatory 15L concerns, Black box vs. White box vs. Black box, Vulnerability assessment and Penetration Testing.	5	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND Internet	Projector, Laptop, Black board& Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Approach : Planning - Threat Modeling, set up security verification standards, Set up security testing plan – When, which systems/apps, understanding functionality, black/gray/white, authenticated vs. unauthenticated, internal vs. external PT, Information gathering, Perform Manual and automated (Tools: WebInspect/Qualys, Nessus, Proxies, Metasploit) VA and PT, How WebInspect/Qualys tools work: Crawling/Spidering, requests forging, pattern matching to known vulnerability database and Analyzing results, Preparing report, Fixing security gaps following the report	5	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
	Enterprise strategy : Repeated PT, approval by security testing team, Continuous Application Security Testing,	3	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
	Phases: Reconnaissance/foot-printing/Enumeration, Scanning, Sniffing	2	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
Ethical Hacking Elective-II	**Ethical Hacking :**Enterprise Security Phases : Gaining and Maintaining Access : Systems hacking – Windows and Linux – Metasploit and Kali Linux, Keylogging, Buffer Overflows, Privilege Escalation, Network hacking - ARP Poisoning, Password Cracking, WEP Vulnerabilities, MAC Spoofing, MAC Flooding, IPSpoofing, SYN Flooding, Smurf attack,	5	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk
	Applications hacking : SMTP/Email-based attacks, VOIP vulnerabilities, Directory traversal, Input Manipulation, Brute force attack, Unsecured login mechanisms, SQL injection, XSS, Mobile	5	Certified Ethical Hacker Study Guide v9, Sean-Philip	Projector, Laptop, Black board& Chalk

USCS506 Unit 3	apps security,		Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	
	Malware analysis : Netcat Trojan, wrapping definition, reverse engineering	1	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk
	Phases : Covering your tracks : Steganography, Event Logs alteration	1	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk
	Additional Security Mechanisms : IDS/IPS, Honeypots and evasion techniques, Secure Code Reviews (Fortify tool, OWASP Secure Coding Guidelines)	3	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: CS

CLASS:M.Sc(CS) Part-2 SEMESTER: SEM-3 MONTH: JUL-NOV ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- Design and develop location based messaging app
- Design and develop chat messaging app which is a location-based
- Design and develop app demonstrating Simple Downstream Messaging
- Design and develop app demonstrating Send Upstream Messages
- Implementing GCM Network Manager
- Demonstrate use of OpenGTS (Open Source GPS Tracking System)

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS301 Ubiquitous Computing UNIT 1	**Basics of Ubiquitous Computing :**Examples of Ubiquitous Computing Applications, Holistic Framework for UbiCom: Smart DEI, Modeling the Key Ubiquitous Computing Properties, Ubiquitous System Environment Interaction, Architectural Design for UbiCom Systems: Smart DEI Model, Smart Devices and Services, Service Architecture Models, Service Provision Life Cycle.	15	Ubiquitous Computing Smart Devices, Environments and Interactions, Stefan Poslad, Wiley, 2009.	Laptop,PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: MSc.CS(Part 1)

SEMESTER: I MONTH: AUGUST-DECEMBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of Robotics and Artificial Intelligence.
- Develop logic for developing Robot.
- Be familiar about the basic concepts of Artificial Intelligence.
- Apply the problem solving skills on Artificial Intelligence Algorithms.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS104, Unit 1, Robotics and Artificial Intelligence.	What is a Robot? Definition, History of Robots: Control Theory, Cybernetics, Grey Walter Tortoise, Analog Electronic Circuit, Reactive Theory, Braitenberg's Vehicle, Artificial Intelligence, Vision Based Navigation, Types of Robot Control.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	Robot Components: Embodiment, Sensors, States, Action, Brains and Brawn, Autonomy, Arms, Legs, Wheels, Tracks, and What really drives them effectors and actuators: Effector, Actuator, Passive and Active Actuation, Types of Actuator, Motors, Degree of freedom Locomotion: Stability, Moving and Gaits, Wheels and Steering, Staying on the path.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Manipulators: Endeffectors, Teleoperation, Why is manipulation hard? Sensors: Types of Sensors, Levels of Processing, Passive and Active sensors, Switches, Light sensors, Resistive position sensor.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
PSCS104, Unit 2, Robotics and Artificial Intelligence.	Ultrasonic and Sonar sensing, Specular Reflection, Laser Sensing, Visual Sensing, Cameras, Edge Detection, Motion Vision, Stereo Vision, Biological Vision, Vision for Robots	07	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	Feedback or Closed Loop Control: Example of Feedback Control Robot, Types of feedback control, Feed forward or Open loop control.	08	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
PSCS104, Unit 3, Robotics and Artificial Intelligence.	Algorithm, Architecture, The many ways to make a map, What is planning, Cost of planning, Reactive systems, Action selection, Subsumption architecture.	07	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	How to sequence behavior through world, hybrid control, Behavior based control and Behavior Coordination, Behavior Arbitration, Distributed mapping, Navigation and Path planning.	08	The Robotics Primer by Maja J Matarić, MIT	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			press Cambridge, Massachusetts, London, England (2007).	
PSCS104, Unit 4, Robotics and Artificial Intelligence.	Introduction, State space search: Generate and test, Simple search, Depth First Search (DFS), Breadth First Search (DFS), Comparison and quality of solutions.	07	Artificial Intelligence: A Modern Approach, 3e, Stuart Jonathan Russell, Peter Norvig, Prentice Hall Publications (2010)	Power Point Presentation
	Heuristic Search: Heuristic functions, Best First Search (BFS), Hill Climbing, Local Maxima, Beam search, Tabu search. Finding Optimum paths: Brute force, branch & bound, refine search, Dijkstra's algorithm, A* algorithm. Admissibility of A* algorithm.	08	Artificial Intelligence: A Modern Approach, 3e, Stuart Jonathan Russell, Peter Norvig, Prentice Hall Publications (2010)	Power Point Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shilpa Rodrigues **DEPARTMENT**: COMPUTER SCIENCE **CLASS**: MSc.CS(Part II)

SEMESTER: **III** **MONTH**: July - Nov **ACADEMIC YEAR**: 2019-20

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the social networks in real world.
- Represtation of social networks in graph theory.
- Identifying equivalence classes and analysis of equivalence classes.
- Understanding one mode and two mode netwroks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS302 , Unit 3 , Social Network Analysis.	Approaches to network positions and social roles- defining equivalence or similarity, structural equivalence, automorphic equivalence, finding equivalence sets, brute force and Tabu search, regular equivalence,	07	Introduction to Social Network Methods: Robert A. Hanneman, Mark Riddle	Power Point Presentation
	equivalence of distances: Maxsim, regular equivalence, Measuring similarity/dissimilarity- valued relations, Pearson correlations covariance and cross-products, Understanding clustering- agglomerative and divisive clusters, Euclidean, Manhattan, and squared distances, binary relations, matches: exact, Jaccard, Hamming,	08	Introduction to Social Network Methods: Robert A. Hanneman, Mark Riddle	Power Point Presentation

PSCS302 , Unit 4 , Social Network Analysis.	Understanding mode networks- Bi-partite data structures, visualizing two-mode data, quantitative analysis using two-mode Singular value decomposition (SVD) analysis.	07		Power Point Presentation
	two-mode factor analysis, two-mode correspondence analysis, qualitative analysis using two-mode core-periphery analysis, two-mode factions analysis, affiliation and attribute networks.	08		Power Point Presentation

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **MSCCS** SEMESTER:I

MONTH: **AUG-DEC** ACADEMIC YEAR: **2019-20**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand basic principles of algorithm design and why algorithm analysis is important
understand how to implement algorithms in JAVA
understand how to transform new problems into algorithmic problems with efficient solutions
understand algorithm design techniques for solving different problems

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS101 Analysis of Algorithms and Researching Computing **Unit I: Design strategies**	The Role of Algorithms in Computing: Algorithms as a technology. Getting Started: Insertion sort, Analyzing algorithms, Designing algorithms. Growth of Functions: Asymptotic notation, Standard notations and common functions. Divide-and-Conquer: The maximum-subarray problem, Strassen's algorithm for matrix multiplication, The substitution method for solving recurrences. Probabilistic Analysis and Randomized Algorithms: The hiring problem, Indicator random variables, Randomized algorithms.	15	Introduction to Algorithm, Thomas H Cormen, PHI	power point

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

PSCS101 **Unit II: Advanced Design and Analysis Techniques**	Dynamic Programming: Rod cutting, Elements of dynamic programming, longest common subsequence. Greedy Algorithms: An activity-selection problem, Elements of the greedy strategy, Huffman codes. Elementary Graph Algorithms: Representations of graphs, Breadth-first search, Depth-first search. Minimum Spanning Trees: Growing a minimum spanning tree, Algorithms of Kruskal and Prim. Single-Source Shortest Paths: The Bellman-Ford algorithm, Single-source shortest paths in directed acyclic graphs, Dijkstra's algorithm.	15	Introduction to Algorithm, Thomas H Cormen, PHI	power point
PSCS101 **Unit III: Number-Theoretic Algorithms and NP – Completeness**	Elementary number-theoretic notions, Greatest common divisor, Modular arithmetic, Solving modular linear equations, The Chinese remainder theorem, Powers of an element, The RSA public-key cryptosystem NP-Completeness: Polynomial time, Polynomial-time verification, NP-completeness and reducibility, NP-complete problems. Approximation Algorithms: The vertex-cover problem, The traveling-salesman problem, The set-covering problem, subset-sum problem.	15	Introduction to Algorithm, Thomas H Cormen, PHI	power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. BRIJESH Y JOSHI DEPARTMENT: Computer Science

CLASS: M.Sc.C.S. SEMESTER: III MONTH: AUG to OCT ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- To be able to understand Big data platform, statistical concepts
- To understand the overview of Big data processing i.e. MapReduce Processing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective I- Track C Business Intelligence and Big Data Analytics –II (Mining Massive Data sets)Unit-I	**Big data:** Introduction to Big data Platform, Traits of big data, Challenges of conventional systems, Web data, Analytic processes and tools, Analysis vs Reporting, Modern data analytic tools, Statistical concepts: Sampling distributions, Re-sampling, Statistical Inference, Prediction error. **Data Analysis:** Regression modeling, Analysis of time Series: Linear systems analysis, Nonlinear dynamics, Rule induction, Neural networks: Learning and Generalization, Competitive Learning, Principal Component Analysis and Neural Networks, Fuzzy Logic: Extracting Fuzzy Models from Data, Fuzzy Decision Trees, Stochastic Search Methods.	12	Mining of Massive Datasets, Anand Rajaraman and Jeffrey David Ullman, Cambridge University Press, 2012.	Laptop, PPT

Elective I- Track C Business Intelligence and Big Data Analytics –II (Mining Massive Data sets)Unit-II	**Introduction to Map Reduce:** The map tasks, Grouping by key, The reduce tasks, Combiners, Details of MapReduce Execution, Coping with node failures. Algorithms Using **MapReduce:** Matrix-Vector Multiplication, Computing Selections and Projections, Union, Intersection, and Difference, Natural Join. Extensions to MapReduce: Workflow Systems, Recursive extensions to MapReduce, Common map reduce algorithms		Mining of Massive Datasets, Anand Rajaraman and Jeffrey David Ullman, Cambridge University Press, 2012.

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Computer Science.

CLASS: M.Sc. SEMESTER: III MONTH: July To November ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- To understand social network and analyze the communication and predict the relationship between those actors.
- To understand Graph theory and network centrality and page rank for accessing webpages.
- To understand network structures.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS302 Social Network Analysis UNIT-I	**Introduction to social network analysis (SNA)** Introduction to networks and relations- analyzing relationships to understand people and groups, binary and valued relationships, symmetric and asymmetric relationships, multimode relationships,	6	1. Social Network Analysis for Startups- Finding connections on the social web 2. Social Network Analysis- 3rd edition	Projector, PPT.
	Using graph theory for social networks analysis- adjacency matrices, edge-lists, adjacency lists, graph traversals and distances, depth-first traversal, breadth-first traversal paths and walks, Dijkstra's algorithm, graph distance and graph diameter, social networks vs. link analysis, ego-centric and socio-centric density.	6		Projector, PPT.
PSCS302 Social Network Analysis	**Networks, Centrality and centralization in SNA** Understanding networks- density, reachability, connectivity, reciprocity, group-external and group-internal ties in networks, ego	8	1. Social Network Analysis for	Projector, PPT.

UNIT-II	networks, extracting and visualizing ego networks, structural holes, Centrality- degree of centrality, closeness and betweenness centrality, local and global centrality, centralization and graph centers, notion of importance within network, Google pagerank algorithm,		Startups- Finding connections on the social web 2. Social Network Analysis- 3rd edition	
	Analyzing network structure- bottom-up approaches using cliques, N-cliques, N-clans, K-plexes, K-cores, F-groups and top-down approaches using components, blocks and cut-points, lambda sets and bridges, and factions.	4

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: MSc.CS(Part II)

SEMESTER: **IV** MONTH: JANUARY-APRIL ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of Simulation and Modeling.
- Develop logic for developing Simulation Scenarios.
- Be familiar about the basic concepts of Agent Based Modeling.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS401 Unit 1, Simulation and Modeling	Introduction to Simulation, Need of Simulation, Time to simulate, Inside simulation software: Modeling the progress of Time, Modeling Variability, Conceptual Modeling: Introduction to Conceptual modelling.	07	Simulation: The Practice of Model Development and Use by Stewart Robinson, John Wiley and Sons, Ltd, 2004.	Power Point Presentation
	Defining conceptual model, Requirements of the conceptual model, Communicating the conceptual model, Developing the Conceptual Model: Introduction, A framework for conceptual modeling, methods of model simplification.	08	Simulation: The Practice of Model Development and Use by Stewart Robinson, John Wiley and Sons,	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Ltd, 2004.	
PSCS401 Unit 3, Simulation and Modeling.	Types of models, Analytical vs Simulation modeling, Application of simulation modeling, Level of abstraction, Simulation Modeling. Methods, System Dynamics, Discrete Event Modeling, Agent Based modeling: Introduction to Agent, Agent-based modeling, Time in agent based models, Space in agent based models, Discrete space, Continuous space movement in continuous space, Communication between agents, Dynamic creation and destruction of agents, Statics on agent population, Condition triggered events and transition in agents.	07	The Big Book of Simulation Modeling: Multi Method Modeling by Andrei Borshchev, 2013.	Power Point Presentation
	Building agents based models: The problem statement, Phases of modeling, Assumptions, 3 D animation. Dynamics Systems: Stock and flow diagrams, examples of stock and flow diagrams. Multi-method modeling: Architecture, Technical aspects of combining modeling methods, Examples.	08	The Big Book of Simulation Modeling: Multi Method Modeling by Andrei Borshchev, 2013.	Power Point Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Sampada Deshmukh DEPARTMENT: CS

CLASS: M. Sc. SEMESTER: II MONTH: April-January ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

a. learn android operating system working.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-I Advanced operating system Unit -IV	The Android Software Stack, The Linux Kernel – its functions, essential hardware drivers. Libraries - Surface Manager, Media framework, SQLite, WebKit, OpenGL.	5	Operating Systems: Design and Implementation, Third Edition, Andrew S. Tanenbaum, Albert S. Woodhull, Prentice Hall, 2006.	Powerpoint presentation through projector
	Android Runtime - Dalvik Virtual Machine, Core Java Libraries. Application Framework - Activity Manager, Content Providers, Telephony Manager, Location Manager, Resource	5		Powerpoint presentation through projector
	Manager. Android Application – Activities and Activity Lifecycle, applications such as SMS client app, Dialer, Web browser, Contact manager	5		Powerpoint presentation through projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Computer Science.

CLASS: M.Sc. SEMESTER: II MONTH: February To May ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- To understand structure of compiler.
- How to implement basic compiler.
- To understand Parser Implementation.
- To understand data flow analysis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS202 Design and implementation of Modern Compilers UNIT-I	**Introduction to Compilers** The structure of a compiler, A simple approach to the design of lexical analyzers, Regular expressions, Finite automata, From regular expressions to finite automata, Minimizing the number of states of a DFA.	6	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
	Context-free grammars, Derivations and Parse trees, Parsers, Shift-reduce parsing, Operator-precedence parsing, Top- down parsing, Predictive parsers.	6		Projector, PPT.

PSCS202 Design and implementation of Modern Compilers UNIT-II	**Automatic Construction of Efficient Parsers** LR parsers, The canonical collection of LR(0) items, Constructing SLR parsing tables, Constructing canonical LR parsing tables, Constructing LALR parsing tables, Using ambiguous grammars,	6	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
	An automatic parser generator, Implementation of LR parsing tables, Constructing LALR sets of items.	6		
PSCS202 Design and implementation of Modern Compilers UNIT-III	**Advanced syntax analysis and basic semantic analysis** Syntax-directed translation schemes, Implementation of syntax-directed translators, Initial introduction to the ongoing Tiger compiler, bindings for the Tiger compiler, type-checking expressions, type-checking declarations, activation records, stack frames, frames in the Tiger compiler, translation to intermediate code, intermediate representation trees, translation into trees, declarations, basic blocks and traces, taming conditional branches, liveness analysis, solution of dataflow equations, liveness in the Tiger compiler, interference graph construction.	12	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
PSCS202 Design and implementation of Modern Compilers UNIT-IV	**Dataflow analysis and loop optimization** The principle sources of optimization, Loop optimization: The DAG representation of basic blocks, Dominators, Reducible flow graphs, Depth-first search, Loop-invariant computations, Induction variable elimination, Some other loop optimizations. Dataflow Analysis: intermediate representation for flow analysis, various dataflow analyses, transformations using dataflow analysis, speeding up dataflow analysis, alias analysis.	12	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.

NAME OF THE STAFF: Mr. BRIJESH Y JOSHI DEPARTMENT: Computer Science

CLASS: M.Sc.C.S. SEMESTER: I MONTH: JAN to MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- To be able to understand Big data platform, statistical concepts
- To understand the overview of Big data processing i.e. MapReduce Processing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence	**Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence** Operational and Decision Support System, Data-Information-Knowledge-Decision making-Action cycle. Basic definitions-Business Intelligence; Data warehousing, Business Intelligence architecture, Use and benefits of Business Intelligence. Knowledge Discovery in Databases: KDD process model, Data Pre-processing: Cleaning: Missing Values; Noisy Values; Inconsistent values; redundant values. Outliers, Integration, transformation, reduction, Discretization: Equal Width Binning; Equal Depth Binning, Normalization, Smoothing.	12	Business Intelligence (2nd Edition), Efraim Turban, Ramesh Sharda, Dursun Delen, David King, Pearson (2013)	Laptop, PPT

Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence	**Unit II: Introduction to Business Data Warehouse** Definition of Data warehouse, Logical architecture of Data Warehouse, Data Warehouse model- Enterprise warehouse; Data Marts; Virtual warehouse. Populating business Data Warehousing: data integration and extract, transform, load (ETL).	12	Business Intelligence (2nd Edition), Efraim Turban, Ramesh Sharda, Dursun Delen, David King, Pearson (2013)	Laptop, PPT
Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence)	**Unit III: Designing Business Data Warehouse** OLTP and OLAP systems, Designing business information warehouse: Principles of dimensional modeling, Data cubes, Data cube operations, data cube schemas.	12	Business Intelligence (2nd Edition), Efraim Turban, Ramesh Sharda, Dursun Delen, David King, Pearson (2013)	Laptop, PPT
Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence)	**Unit IV: Introduction to Data Mining** Data mining definitions and process: business and data understanding. Association Analysis: Definition of association rule, General issues: Support; Confidence; Lift; Conviction, Frequent Item sets: APriori Algorithm; Issues with APriori Algorithm, Data structures: Hash tree and FP tree	12	Data Mining: Introductory and Advanced Topics, Dunham, Margaret H, Prentice Hall (2006)	Laptop, PPT

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**T.Y.B.SC(IT)-A**_____ SEMESTER: ____**VI**_____MONTH: _____**DECEMBER-MARCH** _____ ACADEMIC YEAR: _____**2018-2019**_____

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the Geographical Information Systemfor processing standard geographic data.
- Make you understand where GIS system can be applied.Learning about different applications(example:GPS).
- How geographic data are capture, updated, profiled, stored and represented in the system.
- Enable to understand software and hardware trends, DBMS and varieties of Models.
- To understand how geographic data can be display with help of Maps and to understand the making of Maps.
- Studying about spatial referencing and positioning of data in system.
- To understand different operations and functions on data and to analyze and explore information in the system.
- To provide better visualization of data both in vector and raster manner.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-04 (USIT604)	**A Gentle Introduction to GIS** **The nature of GIS:** Some fundamental observations, Defining GIS, GISystems, GIScience and GIApplications, Spatial data and Geoinformation.	04	Principles of Geographic Information Systems- An	Textbook, Blackboard, Chalk and Duster, Projector,

Principles of Geographic Information Systems **Unit No -01**	**The real world and representations of it:** Models and modelling, Maps, Databases, Spatial databases and spatial analysis		Introductory Text Book By Editors: Otto Huisman and Rolf A. , The International Institute of Geoinformation Science and Earth Observation Introduction to Geographic Information Systems Chang Kang-tsung McGrawHill	Laptop, PPTs.
	Geographic Information and Spatial Database Models and Representations of the real world **Geographic Phenomena:** Defining geographic phenomena, types of geographic phenomena, Geographic fields, Geographic objects, Boundaries	03		
	Computer Representations of Geographic Information: Regular tessellations, irregular tessellations, Vector representations, Topology and Spatial relationships, Scale and Resolution, Representation of Geographic fields, Representation of Geographic objects	03		
	Organizing and Managing Spatial Data The Temporal Dimension	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -02 Principles of Geographic Information Systems	**Data Management and Processing Systems Hardware and Software Trends** **Geographic Information Systems:** GIS Software, GIS Architecture and functionality, Spatial Data Infrastructure (SDI)	04	Principles of Geographic Information Systems- An Introductory Text Book By	Projector, Laptop, PPTs
	Stages of Spatial Data handling: Spatial data handling and preparation, Spatial Data Storage and maintenance, Spatial Query and Analysis, Spatial Data Presentation.	03		

	Database management Systems: Reasons for using a DBMS, Alternatives for data management, The relational data model, Querying the relational database.	03	Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	
	GIS and Spatial Databases: Linking GIS and DBMS, Spatial database functionality.	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -03 **Principles of Geographic Information Systems**	**Spatial Referencing and Positioning** **Spatial Referencing:** Reference surfaces for mapping, Coordinate Systems, Map Projections, Coordinate Transformations	03	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Projector, Laptop, PPTs.
	Satellite-based Positioning: Absolute positioning, Errors in absolute positioning, Relative positioning, Network positioning, code versus phase measurements, Positioning technology	03		
	Data Entry and Preparation **Spatial Data Input:** Direct spatial data capture, Indirect spatial data captiure, Obtaining spatial data elsewhere	02		
	Data Quality: Accuracy and Positioning, Positional accuracy, Attribute accuracy, Temporal accuracy, Lineage, Completeness, Logical consistency	02		
	Data Preparation: Data checks and repairs, Combining data from multiple sources	01		

	Point Data Transformation: Interpolating discrete data, Interpolating continuous data	01		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -04 **Principles of Geographic Information Systems**	**Spatial Data Analysis** **Classification of analytical GIS Capabilities** **Retrieval, classification and measurement:** Measurement, Spatial selection queries, Classification	03	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Textbook, Blackboard, Chalk and Duster, Projector, Laptop, PPTs
	Overlay functions: Vector overlay operators,Raster overlay operators	01		
	Neighbourhood functions: Proximity computations, Computation of diffusion, Flow computation, Raster based surface analysis	03		
	Analysis: Network analysis, interpolation, terrain modelling	01		
	GIS and Application models: GPS, Open GIS Standards, GIS Applications and Advances	02		
	Error Propagation in spatial data processing: How Errors propagate, Quantifying error propagation	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -05 **Principles of Geographic**	**Data Visualization** **GIS and Maps, The Visualization Process** **Visualization Strategies: Present or explore?**	04	Principles of Geographic Information	Textbook, Blackboard, Chalk and Duster,

Information Systems			Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Projector, Laptop, PPTs
	The cartographic toolbox: What kind of data do I have?, How can I map my data?	03		
	How to map?: How to map qualitative data, How to map quantitative data, How to map the terrain elevation, How to map time series	03		
	Map Cosmetics, Map Dissemination	02

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: VI MONTH: Dec to March ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S: To provide security against users, software, devices, operating systems, networks, cloud and data.

The learners will be able to :

- To understand the concept of Information Security.
- To know how to use Security Methodology, Strategy and Tactics.
- To analyze Risk by identifying possible Threat, Types of Attacks.
- To learn about Secure Design Principles like the CIA Triad and Other Models, Defense Models.
- To know Intrusion Detection and Prevention Systems.
- To learn Voice over IP (VoIP) and PBX Security, TEM (Telecom Expense Management).
- To understand Operating System Security Models, International Standards for Operating System Security.
- To have information related to Virtual Machines and Cloud Computing.
- To study Secure Application Design in Web Application Security, Client Application Security, Remote Administration Security.
- To know how to implement Physical Security by Choosing Site Location for Security, Securing Assets - Locks and Entry Controls, Physical Intrusion Detection.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT602 Security in computing UNIT-I	**Information Security Overview**: The Importance of Information Protection, The Evolution of Information Security, Justifying Security Investment, Security Methodology, How to Build a Security Program, The Impossible Job, The Weakest Link, Strategy and Tactics, Business Processes vs. Technical Controls.	4	1. The Complete Reference: Information Security 2. Essential	Black Board, Projector, PPT.

	Risk Analysis: Threat Definition, Types of Attacks, Risk Analysis.	4	Cybersecurity Science 3. Principles of Computer Security: CompTIA Security+ and Beyond	Black Board, Projector, PPT.
	Secure Design Principles: The CIA Triad and Other Models, Defense Models, Zones of Trust, Best Practices for Network Defense.	4		Black Board, Projector, PPT.
USIT602 Security in computing UNIT-IV	**Intrusion Detection and Prevention Systems**: IDS Concepts, IDS Types and Detection Models, IDS Features, IDS Deployment Considerations, Security Information and Event Management (SIEM).	5	1. The Complete Reference: Information Security 2. Essential Cybersecurity Science 3. Principles of Computer Security: CompTIA Security+ and Beyond	Black Board, Projector, PPT.
	Voice over IP (VoIP) and PBX Security: Background, VoIP Components, VoIP Vulnerabilities and Countermeasures, PBX, TEM: Telecom Expense Management.	5		
	Operating System Security Models: Operating System Models, Classic Security Models, Reference Monitor, Trustworthy Computing, International Standards for Operating System Security.	2		
USIT602 Security in computing UNIT-V	**Virtual Machines and Cloud Computing**: Virtual Machines, Cloud Computing.	4	1. The Complete Reference: Information Security 2. Essential Cybersecurity Science	Black Board, Projector, PPT.
	Secure Application Design: Secure Development Lifecycle, Application Security Practices, Web Application Security, Client Application Security, Remote Administration Security.	4		

	Physical Security: Classification of Assets, Physical Vulnerability Assessment, Choosing Site Location for Security, Securing Assets : Locks and Entry Controls, Physical Intrusion Detection.	4	3. Principles of Computer Security: CompTIA Security+ and Beyond

NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Sampada Deshmukh DEPARTMENT: Information Technology

CLASS: T. Y. B. Sc. I. T –A SEMESTER: VI MONTH: December-March ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

Learn authentication and authorization

Understand security concept and different encryption techniques

Understand the concept of database security and storage security with its applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Security in Computing Unit -II	**Authentication and Authorization**: Authentication, Authorization	3	The Complete Reference: Information Security by Mark Rhodes-Ousley	Black board and projector
	Encryption: A Brief History of Encryption, Symmetric-Key Cryptography, Public Key Cryptography, Public Key Infrastructure.	5		Black board and projector
	Storage Security: Storage Security Evolution, Modern Storage Security, Risk Remediation, Best Practices.	2		Black board and projector
	Database Security: General Database Security Concepts, Understanding Database Security Layers, Understanding Database-Level Security, Using Application Security, Database Backup and Recovery, Keeping Your Servers Up to Date, Database Auditing and Monitoring.	2		Black board and projector

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHARVARI PATIL DEPARTMENT: IT CLASS: T.Y.I.T SEMESTER: VI

MONTH: DECEMBER TO MARCH ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the definition of software Quality.
- Learn the fundamentals of Testing.
- Gain knowledge about different types of testing.
- Learn the various methods of verification and validation.
- Understand the importance of special tests.

Paper No.,Paper Title, Unit No.	**Sub Topics:**	**No. of Lectures**	**References**	**Teaching Method/ICT tools used**
USIT601 Software Quality Assurance	Introduction to Quality: Historical Perspective of Quality,What is Quality? (Is it a fact or perception?),Definitions of Quality,Core Components of Quality,Quality View, Financial Aspect of Quality, Customers, Suppliers and Processes, Total Quality Management (TQM) ,Quality Principles of Total Quality Management	6	Reference Book: Software Testing and Continuous	Chalk, Blackboard, ICT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 1	Quality Management Through Statistical Process Control,Quality Management Through Cultural Changes,Continual (Continuous) Improvement Cycle,Quality in Different Areas,Benchmarking and Metrics,Problem Solving Techniques,Problem Solving Software Tool Software Quality: Introduction, Constraints of Software ,Product Quality Assessment,Customer is a King,Quality and Productivity Relationship,Requirements of a Product ,Organisation Culture,Characteristics of Software, software Development Process,Types of Products, Schemes of Criticality Definitions, Problematic Areas of Software Development Life Cycle, Software Quality Management, Why Software Has Defects? Processes Related to Software Quality, Quality Management System Structure, Pillars of Quality Management System, Important Aspects of Quality Management	6	Quality Improvement William E. Lewis	
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT601	Fundamentals of testing: Introduction, Necessity of testing, What is	6		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Software Quality Assurance Unit 2	testing? Fundamental test process, The psychology of testing, Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During DevelopmentLife Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench, Important Features of Testing Process, Misconceptions About Testing, Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning, Testing Process and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges in Testing, Test Team Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy,Methods, Structured Approach to Testing, Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies (Test Plan), Testing Process, Attitude Towards Testing (Common People Issues), Test Methodologies/Approaches, People Challenges in Software Testing, Raising Management Awareness for Testing, Skills Required by Tester,Testing throughout the software life cycle, Software development models, Test levels, Test types, the targets of testing, Maintenance testing	3 3	Reference Book: Software Testing: Principles, Techniques and Tools M. G. Limaye	Chalk, Blackboard

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT601 Software Quality Assurance Unit 3	Unit Testing: Boundary Value Testing: Normal Boundary Value Testing, Robust Boundary Value Testing, Worst-Case Boundary ValueTesting, Special Value Testing, Examples, Random Testing, Guidelines for Boundary Value Testing, Equivalence Class Testing: Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause And Effect Graphing, Guidelines and Observations, Path Testing: Program Graphs, DD Paths, Test Coverage Metrics, Basis Path Testing, Guidelines and Observations, Data Flow Testing: Define/Use Testing, Slice-Based Testing, Program Slicing Tools	3 3 2 2 2	Reference Book: Software Testing: A Craftsman's Approach Paul C. Jorgenson	Chalk, Blackboard, ICT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	.			
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT601 Software Quality Assurance Unit 4	Software Verification and Validation: Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews on the basis of Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification, Validation, Validation Workbench, Levels of Validation, Coverage in Validation, Acceptance Testing, Management of Verification and Validation, Software development verification and validation activities. V-test Model: Introduction, V-model for software, Testing during Proposal stage, Testing during requirement stage, Testing during test planning phase, Testing during design phase, Testing during coding, VV Model, Critical Roles and Responsibilities.	6 6	Reference Book: Software Testing: Principles, Techniques and Tools M. G. Limaye, Foundations of Software Testing Dorothy Graham	Chalk, Blackboard
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT601 Software Quality Assurance Unit 5	Levels of Testing: Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich Testing, Critical Path First, Sub System Testing, System Testing, Testing Stages. Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing, Regression Testing, Error Handling Testing, Manual Support Testing, Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing, Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing,Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph, Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage, Object Oriented Application Testing, Testing of Internal Controls, COTS Testing, Client Server Testing, Web Application Testing, Mobile Application Testing, eBusiness eCommerce Testing, Agile Development Testing,Data Warehousing Testing.	2 10	Reference Book: Software Testing: Principles, Techniques and Tools M. G. Limaye	Chalk, Blackboard ICT

NAME OF THE STAFF: **SUJITHA MOHAN** DEPARTMENT: **B.Sc.I.T**

CLASS: **TYIT B** SEMESTER: **VI** MONTH: **Dec-March** ACADEMIC YEAR: **2018-2019**

LEARNING OBJECTIVES:
The learners will be able to :

- Understand the role of Business Intelligence system and Decision support system in improvising the business.
- Understand different algorithms used in BI systems.
- Understand the use of AI and Knowledge management system.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
III,1, Business Intelligence	Business intelligence: Effective and timely decisions, Data, information and knowledge, The role of mathematical models, Business intelligence architectures, Ethics and business intelligence	5	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Decision support systems: Definition of system, Representation of the decision-making process, Evolution of information systems, Definition of decision support system, Development of a decision support system	5	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster

III,2, Business Intelligence	Mathematical models for decision making: Structure of mathematical models	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Development of a model, Classes of models Data mining: Definition of data mining,	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Representation of input data , Data mining process, Analysis methodologies Data preparation: Data validation, Data transformation, Data reduction	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
III,3, Business Intelligence	Classification: Classification problems, Evaluation of classification models, Bayesian methods, Logistic regression, Neural networks, Support vector machines	5	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Clustering: Clustering methods, Partition methods, Hierarchical methods, Evaluation of clustering models	5	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Business intelligence applications: Marketing models: Relational marketing, Sales force management	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First	Chalk and Duster

III,4, Business Intelligence	Logistic and production models: Supply chain optimization, Optimization models for logistics planning, Revenue management systems.	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	Chalk and Duster
	Data envelopment analysis: Efficiency measures, Efficient frontier, The CCR model, Identification of good operating practices	4	Business Intelligence: Data Mining and Optimization for Decision Making Carlo Vercellis Wiley First 2009	
III,5, Business Intelligence	Knowledge Management: Introduction to Knowledge Management, Organizational Learning and Transformation, Knowledge Management Activities, Approaches to Knowledge Management, Information Technology (IT) In Knowledge Management, Knowledge Management Systems Implementation, Roles of People in Knowledge Management	5	Decision support and Business Intelligence Systems Efraim Turban, Ramesh Sharda, Dursun Delen Pearson Ninth 2011	Chalk and Duster
	Artificial Intelligence and Expert Systems: Concepts and Definitions of Artificial Intelligence, Artificial Intelligence Versus Natural Intelligence, Basic Concepts of Expert Systems, Applications of Expert Systems, Structure of Expert Systems, Knowledge Engineering, Development of Expert Systems	5	Decision support and Business Intelligence Systems Efraim Turban, Ramesh Sharda, Dursun Delen Pearson Ninth 2011	Chalk and Duster

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: TYIT SEMESTER: VI MONTH: DECE to MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

To develop the understanding of relationship between commerce and cyberspace

To enable learner to understand, explore, and acquire a critical understanding Cyber Law.

To give learners in depth knowledge of Information Technology Act and legal frame work of Right to Privacy, Data Security and Data Protection

To make learner conversant with the social and intellectual property issues emerging from 'Cyberspace

TITLE		ALLOTED		TOOLS USED
Paper-07 Cyber Law Unit 3	**Battling Cyber Squatters and Copyright Protection in the Cyber World:** Concept of Domain Name and Reply to Cyber Squatters, Meta-Tagging, Legislative and Other Innovative Moves Against Cyber Squatting, The Battle Between Freedom and Control on the Internet, Works in Which Copyright Subsists and meaning of Copyright, Copyright Ownership and Assignment, License of Copyright, Copyright Terms and Respect for Foreign Works, Copyright Infringement, Remedies and Offences, Copyright Protection of Content on the Internet; Copyright Notice, Disclaimer and Acknowledgement, Downloading for Viewing Content on the Internet, Hyper-Linking and Framing, Liability of ISPs for Copyright Violation in the Cyber World: Legal Developments in the US, Napster and its Cousins: A Revolution on the Internet but a Crisis for Copyright Owners, Computer Software Piracy.	12	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
Paper-07 Cyber Law Unit 4	**E-Commerce Taxation:** Real Problems in the Virtual World: A Tug of War on the Concept of „Permanent Establishment", Finding the PE in Cross Border E-Commerce, The United Nations Model Tax Treaty, The Law of Double Taxation Avoidance Agreements and Taxable Jurisdiction Over Non-Residents, Under the Income Tax Act, 1961, Tax Agents of Non-Residents under the Income Tax Act,1961 and the Relevance to E-Commerce, Source versus Residence and Classification between Business Income and Royalty, The Impact of the Internet on Customer Duties, Taxation Policies in India: At a Glance.	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
	Digital Signature, Certifying Authorities and E-Governance: Digital Signatures, Digital Signature Certificate, Certifying Authorities and Liability in the Event of Digital Signature	6	Cyber Law Simplified Vivek Sood	Projector, Laptop, Black board & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Compromise, E-Governance in India: A Warning to Babudom!		TMH Education	
Paper-07 Cyber Law Unit 5	**The Indian Evidence Act of 1872 v. Information Technology Act, 2000:** Status of Electronic Records as Evidence, Proof and Management of Electronic Records; Relevancy, Admissibility and Probative Value of E-Evidence, Proving Digital Signatures, Proof of Electronic Agreements, Proving Electronic Messages, Other Amendments in the Indian Evidence Act by the IT Act, Amendments to the Bankers Books Evidence Act, 1891 and Reserve Bank of India Act, 1934.	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
	Protection of Cyber Consumers in India: Are Cyber Consumers Covered Under the Consumer Protection Act? Goods and Services, Consumer Complaint, Defect in Goods and Deficiency in Services, Restrictive and Unfair Trade Practices, Instances of Unfair Trade Practices, Reliefs Under CPA, Beware Consumers, Consumer Foras, Jurisdiction and Implications on cyber Consumers in India, Applicability of CPA to Manufacturers, Distributors, Retailers and Service Providers Based in Foreign Lands Whose Goods are Sold or Services Provided to a Consumer in India. Amendments in Indian IT Act 2000	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **TYBSCIT** SEMESTER:**VI**

MONTH: **DEC-MARCH** ACADEMIC YEAR:**2018-19**

LEARNING OBJECTIVE/S:

The learners will be able to :

Understanding the customers priority for **quality assurance** while developing ...
that **will** be created by the organization, The scope of **Software** Testing applies to ... improvements of the processes through **learning** & innovation
Understand Manual and automated testing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT601 Software Quality Assurance UNIT-1	**Introduction to Quality:** Historical Perspective of Quality, What isQuality? (Is it a fact or perception?), Definitions of Quality, Core Components of Quality, Quality View, Financial Aspect of Quality, Customers, Suppliers and Processes, Total Quality Management (TQM), Quality Principles of Total Quality Management, Quality Management Through Statistical Process Control, Quality Management Through Cultural Changes, Continual (Continuous) Improvement Cycle, Quality in Different Areas, Benchmarking and Metrics, Problem Solving Techniques, Problem Solving Software Tools.	07	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
	Software Quality: Introduction, Constraints of Software Product Quality Assessment, Customer is a King, Quality and Productivity Relationship, Requirements of a Product, Organisation Culture, Characteristics of Software, Software Development Process, Types of Products, Schemes of Criticality Definitions, Problematic Areas of Software Development Life	05	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Cycle, Software Quality Management, Why Software Has Defects?Processes Related to Software Quality, Quality Management System Structure, Pillars of Quality Management System, Important Aspects of Quality Management..			
USIT601 Software Quality Assurance UNIT-2	**Fundamentals of testing:** Introduction, Necessity of testing, What is testing? Fundamental test process, The psychology of testing,Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During Development Life Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench,Important Features of Testing Process, Misconceptions About Testing,Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning, Testing Process and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges in Testing, Test Team Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy, Methods	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
	Structured Approach to Testing, Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies (Test Plan), Testing Process, Attitude Towards Testing (Common People Issues), Test Methodologies/Approaches, People Challenges in Software Testing, Raising Management Awareness for Testing, Skills Required by Tester, Testing throughout the software life cycle, Software development models, Test levels, Test types, the targets of testing, Maintenance testing	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
USIT601	**Unit Testing: Boundary Value Testing:** Normal Boundary ValueTesting, Robust Boundary Value Testing, Worst-Case Boundary ValueTesting, Special Value Testing, Examples,	05	Software Testing:	Black board and chalk, power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Software Quality Assurance UNIT-3	Random Testing, Guidelines for Boundary Value Testing, **Equivalence Class Testing:** Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations.		Principles, Techniques and Tools M. G. Limaye	
	Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations, **Path Testing:** Program Graphs, DD-Paths, Test Coverage Metrics, Basis Path Testing, Guidelines and Observations,**Data Flow Testing:** Define/Use Testing, Slice-Based Testing,Program Slicing Tools.	07	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
USIT601 Software Quality Assurance UNIT-4	**Software Verification and Validation:**Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews on the basis od Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification, Validation, Validation Workbench, Levels of Validation,Coverage in Validation, Acceptance Testing, Management of Verification and Validation, Software development verification and validation activities	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
	V-test Model: Introduction, V-model for software, Testing during Proposal stage, Testing during requirement stage, Testing during test planning phase, Testing during design phase, Testing during coding,VV Model, Critical Roles and Responsibilities.	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point
USIT601 Software Quality Assurance	**Levels of Testing:** Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich	04	Software Testing: Principles, Techniques	Black board and chalk, power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT-5	Testing, Critical Path First, Sub System Testing, System Testing, Testing Stages.		and Tools M. G. Limaye	
	Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing,Regression Testing, Error Handling Testing, Manual Support Testing,Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing,Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing, Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph,Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage,Object Oriented Application Testing, Testing of Internal Controls COTS Testing, Client Server Testing, Web Application Testing,Mobile Application Testing, eBusiness eCommerce Testing, Agile Development Testing, Data Warehousing Testing.	08	Software Testing: Principles, Techniques and Tools M. G. Limaye	Black board and chalk, power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: TYIT

SEMESTER: VI MONTH: DEC-MARCH ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the use of business intelligence in real life.
- Describe the different mathematical models to develop decision making systems.
- Get the difference between supervised learning and unsupervised learning techniques.
- Understand the use of mathematical models in relational marketing, support chain optimization, CCR model.
- Familiar with knowledge management and Artificial intelligence and expert systems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT603, Business Intelligence Unit I	**Business intelligence:** Effective and timely decisions, Data, information and knowledge, The role of mathematical models, Business intelligence architectures, Ethics and business intelligence	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Black Board and chalk, Powerpoint
	Decision support systems: Definition of system, Representation of the decision-making process, Evolution of information systems, Definition of decision support system, Development of a decision support system	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT603, Business Intelligence Unit II	**Mathematical models for decision making:** Structure of mathematical models, Development of a model, Classes of models	05	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Black Board and chalk, PowerPoint
	Data mining: Definition of data mining, Representation of input data , Data mining process, Analysis methodologies	04	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Black Board and chalk, PowerPoint
	Data preparation: Data validation, Data transformation, Data reduction	03	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Black Board and chalk, PowerPoint

NAME OF THE STAFF:Miss Shilpa James Rodrigues **DEPARTMENT**: IT

CLASS: T.Y.I.T.-C (Principles of Geographic Information Systems) **SEMESTER**:VI

MONTH:December - March **ACADEMIC YEAR**: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the basics of geographic information system.
- Learn GIS Models.
- Understand different types of GIS Data.
- Analyze data, explore issues, problem solve, and evaluate situations in a geographic and spatial context.
- Explore mapped data
- Relate GIS with remote sensing technologies
- Analyze spatial data, using GIS analysis tools
- Develop and manage geodatabases
- Create maps ans images to communicate spatial data in a meaningful way to others.

Fundamental test process, The psychology of testing, Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During Development Life Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench, Important Features of Testing Process, Misconceptions About Testing.	3	Software Testing: Principles, Techniques and Tools By M. G. Limaye	Blackboard & chalk
	Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning, Testing Process and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges in Testing, Test Team Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy, Methods, Structured Approach to Testing,	3		
	Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	(Test Plan), Testing Process, Attitude Towards Testing(Common People Issues), Test Methodologies/ Approaches.			
	People Challenges in Software Testing, Raising Management Awareness for Testing, Skills Required by Tester, Testing throughout the software life cycle, Software development models, Test levels, Test types, the targets of testing, Maintenance testing.	3		
III	**Unit Testing: Boundary Value Testing:** Normal Boundary Value Testing, Robust Boundary Value Testing, Worst-Case Boundary Value Testing, Special Value Testing, Examples, Random Testing, Guidelines for Boundary Value Testing.	3	Software Testing: A Craftsman's Approach By Paul C. Jorgenson	Blackboard & chalk, PowerPoint Presentation
	Equivalence Class Testing: Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations.	3		
	Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations.	2		
	Path Testing: Program Graphs, DD-Paths, Test Coverage Metrics, Basis Path Testing, Guidelines and Observations, **Data Flow Testing:** Define/Use Testing, Slice-Based Testing, Program Slicing Tools.	4		
IV	**Software Verification and Validation:** Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews on the basis of Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification.	4	Software Testing: Principles, Techniques and Tools	Blackboard & chalk
	Validation, Validation Workbench, Levels of Validation, Coverage in Validation, Acceptance Testing, Management of Verification and Validation, Software development verification and validation activities.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	V-test Model: Introduction, V-model for software, Testing during Proposal stage, Testing during requirement stage, Testing during test planning phase, Testing during design phase, Testing during coding, VV Model, Critical Roles and Responsibilities.	4	By M. G. Limaye	
V	**Levels of Testing:** Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich Testing, Critical Path First, Sub System Testing, System Testing, Testing Stages.	4	Software Testing: Principles, Techniques and Tools By M. G. Limaye	Blackboard & chalk, PowerPoint Presentation
	Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing, Regression Testing, Error Handling Testing, Manual Support Testing, Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing, Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing, Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph,	4		
	Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage, Object Oriented Application Testing, Testing of Internal Controls, COTS Testing, Client Server Testing, Web Application Testing, Mobile Application Testing, eBusiness/eCommerce Testing, Agile Development Testing, Data Warehousing Testing.	4

NAME OF THE STAFF: Shweta Kiran Yande DEPARTMENT: Computer Science

CLASS: T.Y.I.T SEMESTER: VI

MONTH: Dec - March ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

Student will able to understand the importance of software quality.
Aspects that the related to software quality.
Stakeholders and their relationship.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCSIT601 Software Quality Assurance UNIT - I	**Introduction to Quality:** Historical Perspective of Quality, What is Quality? (Is it a fact or perception?), Definitions of Quality, Core Components of Quality, Quality View, Financial Aspect of Quality, Customers, Suppliers and Processes, Total Quality Management (TQM), Quality Principles of Total Quality Management, Quality Management Through Statistical Process Control, Quality Management Through Cultural Changes, Continual (Continuous) Improvement Cycle, Quality in Different Areas, Benchmarking and Metrics, Problem Solving Techniques, Problem Solving Software Tools.	6	Software Testing and Continuous Quality Improvement Software Testing: Principles, Techniques and Tools	Blackboard PPT
	Software Quality: Introduction, Constraints of Software Product Quality Assessment, Customer is a King, Quality and Productivity Relationship, Requirements of a Product, Organisation Culture,	6		Blackboard PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: TYIT DIV-A

SEMESTER: VI MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Make Learner Conversant With The Social And Intellectual Property Issues Emerging From 'Cyberspace.
- Explore The Legal And Policy Developments In Various Countries To Regulate Cyberspace;
- Develop The Understanding Of Relationship Between Commerce And Cyberspace
- Give Learners In Depth Knowledge Of Information Technology Act And Legal Frame Work Of Right To Privacy, Data Security And Data Protection.
- Make Study On Various Case Studies On Real Time Crimes.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:SYIT-DIV A SEMESTER: SEM-IV MONTH: DEC-MAR ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: Understand the basic concepts of Computer Graphics. Demonstrate various algorithms for scan conversion and filling of basic objects and their comparative analysis. Apply geometric transformations, viewing and clipping on graphical objects.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-5, CGA, UNIT-1	**Introduction to Computer Graphics:**Overview of Computer Graphics, Computer Graphics Application and Software, Description of some graphics devices, Input Devices for Operator Interaction, Active and Passive Graphics Devices, Display Technologies, Storage Tube Graphics Displays, Calligraphic Refresh Graphics Displays	3	Computer Graphics by Hearn, Baker	Blackboard & Chalk
	Raster Refresh (Raster-Scan) Graphics Displays, Cathode Ray Tube Basics, Color CRT Raster Scan Basics, Video Basics, The Video Controller, Random-Scan Display Processor, LCD displays.	2		
	Scan conversion – Digital Differential Analyzer (DDA) algorithm, Bresenhams' Line drawing algorithm.Bresenhams' method of Circle drawing, Midpoint Circle Algorithm, Midpoint Ellipse Algorithm	3		

	Mid-point criteria, Problems of Aliasing, end-point ordering and clipping lines, Scan Converting Circles, Clipping Lines algorithms– Cyrus-Beck, Cohen-Sutherland and Liang-Barsky, Clipping Polygons, problem with multiple components.	3		
UNIT-2	**Two-Dimensional Transformations:**Transformations and Matrices, Transformation Conventions, 2D Transformations, Homogeneous Coordinates and Matrix Representation of 2D Transformations, Translations and Homogeneous Coordinates	2	Computer Graphics by Hearn, Baker	Blackboard & Chalk
	Rotation, Reflection, Scaling, Combined Transformation, Transformation of Points, Transformation of The Unit Square, Solid Body Transformations, Rotation About an Arbitrary Point.	2		
	Reflection through an Arbitrary Line ,A Geometric Interpretation of Homogeneous Coordinates, The Window-to Viewport Transformations.	2		
	Three-Dimensional Transformations: Three-Dimensional Scaling, Three-Dimensional Shearing, Three Dimensional Rotation, Three-Dimensional Reflection, Three Dimensional Translation, Multiple Transformation, Rotation about an Arbitrary Axis in Space, Reflection through an Arbitrary Plane.	3		
	Matrix Representation of 3D Transformations, Composition of 3D Transformations, Affine and Perspective Geometry, Perspective Transformations, Techniques for Generating Perspective Views, Vanishing Points	2		

	the Perspective Geometry and camera models, Orthographic Projections, Axonometric Projections, Oblique Projections, View volumes for projections.	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: SYIT

SEMESTER: IV MONTH: DEC-MARCH ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Acquire knowledge of programming language java.
- Understand data types, control flow statements, iterations and classes.
- Gain proficiency in inheritance and packages.
- Understand enumeration, arrays, exceptions and byte stream.
- Acquire knowledge of event handling and layouts.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT401, Core Java, Unit III	**Inheritance:** Derived Class Objects, Inheritance and Access Control, Default Base Class Constructors, this and super keywords.	04	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk
	Abstract Classes And Interfaces, Abstract Classes, Abstract Methods, Interfaces, What Is An Interface? How Is An Interface Different From An Abstract Class?, Multiple Inheritance, Default Implementation, Adding New Functionality, Method Implementation, Classes V/s Interfaces, Defining An Interface, Implementing Interfaces.	05	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk
	Packages: Creating Packages, Default Package, Importing Packages, Using A Package.	03	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk

USIT401, Core Java, Unit V	**Event Handling:** Delegation Event Model, Events, Event classes, Event listener interfaces, Using delegation event model, adapter classes and inner classes.	03	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk
	Abstract Window Toolkit: Window Fundamentals, Component, Container, Panel, Window, Frame, Canvas. Components – Labels, Buttons, Check Boxes, Radio Buttons, Choice Menus, Text Fields, Text, Scrolling List, Scrollbars, Panels, Frames	07	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk
	Layouts: Flow Layout, Grid Layout, Border Layout, Card Layout.	02	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Black Board and chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: S.Y.I.T.-A (Core Java)

SEMESTER:IV

MONTH:December - March

ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

-Understand basics of Java programming language .

-Learn to control the flow of execution of the program.

-Understand of to create java classes and objects and using them to make java application

-Learn the concepts of multi threading and exception handling.

-Learn to use streams for reading and writing data to and from files.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT401, Unit 1, Core Java .	**Introduction:** History, architecture and its components, Java Class File, Java Runtime Environment, The Java Virtual Machine, JVM Components, The Java API, java platform, java development kit, Lambda Expressions, Methods References, Type Annotations, Method Parameter Reflection, setting the path environment variable, Java Compiler And Interpreter, java programs, java applications, main(), public, static, void, string[]	08	Core Java 8 for Beginners -Vaishali Shah, Sharnam Shah	Black Board and chalk.

	args, statements, white space, case sensitivity, identifiers, keywords, comments, braces and code blocks, variables, variable name			
	Data types: primitive data types, Object Reference Types, Strings, Auto boxing, operators and properties of operators, Arithmetic operators, assignment operators, increment and decrement operator, relational operator, logical operator, bitwise operator, conditional operator.	04	Core Java 8 for Beginners -Vaishali Shah, Sharnam Shah	Black Board and chalk.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Gayatree Karnik DEPARTMENT: Information Technology

CLASS: S.Y.B.Sc.(I.T) SEMESTER: IV MONTH: DEC-JAN ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S: The learners will be able to :

- Understand the Software Development Life Cycle and its Phases
- Understand the processes and models of Software
- Develop new software from the previous existing software.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 4 Software Engineering Unit 1	**Introduction**: What is software engineering? Software Development Life Cycle, Requirements Analysis, Software Design, Coding, Testing, Maintenance etc. **Software Requirements:** Functional and Non-functional requirements, User Requirements, System Requirements, Interface Specification, Documentation of the software requirements.	4	Software Engineering, edition, By-Ian Somerville Software engineering, a practitioner's approach By- Roger Pressman	Black Board and Chalk
	Software Processes: Process and Project, Component Software Processes. **Software Development Process Models.** ● Waterfall Model. ● Prototyping. ● Iterative Development.	5	Software Engineering, edition, By-Ian Somerville Software engineering, a practitioner's approach By- Roger Pressman	Black Board and Chalk

	• Rational Unified Process. • The RAD Model • Time boxing Model			
	Agile software development: Agile methods, Plan-driven and agile development, Extreme programming, Agile project management, Scaling agile methods.	3	Software Engineering, edition, By-Ian Somerville Software engineering, a practitioner's approach By- Roger Pressman	Black Board and Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MONIKA MADHUKAR RAUT DEPARTMENT: IT/CS

CLASS: SYIT- B SEMESTER: IV MONTH: DECEMBER TO MARCH ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to learn basics things of computer graphics and able to work on Animation. Learner will able to learn different algorithms related to Computer Graphics and Animation

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Computer Graphics and Animation (USIT405) Unit I	**Introduction to Computer Graphics:** Overview of Computer Graphics, Computer Graphics Application and Software, Description of some graphics devices, Input Devices for Operator Interaction, Active and Passive Graphics Devices, Display Technologies, Storage Tube Graphics Displays, Calligraphic Refresh Graphics Displays, Raster Refresh (Raster-Scan) Graphics Displays, Cathode Ray Tube Basics, Color CRT Raster Scan Basics, Video Basics, The Video Controller, Random-Scan Display Processor, LCD displays	6	Computer Graphics by R. K. Mourya, Computer Graphics by Hearn, Baker	Black Board and Chalk
	Scan conversion – Digital Differential Analyzer (DDA) algorithm, Bresenhams' Line drawing algorithm. Bresenhams' method of Circle drawing, Midpoint Circle Algorithm, Midpoint Ellipse Algorithm, Mid-point criteria, Problems of Aliasing, end-point ordering and clipping lines, Scan Converting Circles, Clipping Lines algorithms– Cyrus-Beck, Cohen-Sutherland and Liang-Barsky, Clipping Polygons, problem with multiple components	6	Computer Graphics by R. K. Mourya, Computer Graphics by Hearn, Baker	Black Board and Chalk

Computer Graphics and Animation (USIT405) Unit III	**Viewing in 3D** Stages in 3D viewing, Canonical View Volume (CVV), Specifying an Arbitrary 3D View, Examples of 3D Viewing, The Mathematics of Planar Geometric Projections, Combined transformation matrices for projections and viewing, Coordinate Systems and matrices, camera model and viewing pyramid.	6	Computer Graphics by Hearn, Baker Computer Graphics by R. K. Mourya	Black Board and Chalk
	Light: Radiometry, Transport, Equation, Photometry	3		Black Board and Chalk
	Color: Colorimetry, Color Spaces, Chromatic Adaptation, Color Appearance	3		Black Board and Chalk
Computer Graphics and Animation (USIT405) Unit IV	**Visible-Surface Determination**: Techniques for efficient Visible-Surface Algorithms, Categories of algorithms, Back face removal, The z-Buffer Algorithm, Scan-line method, Painter's algorithms (depth sorting), Area sub-division method, BSP trees, Visible-Surface Ray Tracing, comparison of the methods	6	Computer Graphics by R. K. Mourya, Computer Graphics by Hearn, Baker	Black Board and Chalk
	Plane Curves and Surfaces: Curve Representation, Nonparametric Curves, Parametric Curves, Parametric Representation of a Circle, Parametric Representation of an Ellipse, Parametric Representation of a Parabola, Parametric Representation of a Hyperbola, Representation of Space Curves, Cubic Splines, , Bezier Curves, B-spline Curves, B-spline Curve Fit, B-spline Curve Subdivision, Parametric Cubic Curves, Quadric Surfaces. Bezier Surfaces	6	Computer Graphics by R. K. Mourya, Computer Graphics by Hearn, Baker	Black Board and Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT:CS
CLASS:SYIT-DIV B SEMESTER: SEM-4 MONTH: DEC-MAR ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
To learn why Java is useful for the design of desktop and web applications.
To learn how to implement object-oriented designs with Java.
To identify Java language components and how they work together in applications.
To design and program stand-alone Java applications.

PAPER, TITLE, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1,Core Java, UNIT 2	**Control Flow Statements: The If…Else If…Else Statement, The Switch…Case Statement Iterations: The While Loop, The Do … While Loop, The For Loop,The Foreach Loop, Labeled Statements, The Break And Continue Statements,**	**4**	**Core Java by vaishali shah and Sherman shah**	**BLACK BOARD AND CHALK**
	The Return Statement Classes: Types of Classes, Scope Rules, Access Modifier,Instantiating Objects From A Class, Initializing The Class Object And Its Attributes, Class Methods, Accessing A Method, Method Returning A Value, Method's Arguments, Method Overloading,Variable Arguments [Varargs], Constructors, this Instance, super Instance,	**5**		
	Characteristics Of Members Of A Class, constants, this instance, static fields of a class, static methods of a class, garbag collection.	**3**		

UNIT 3	Inheritance: Derived Class Objects, Inheritance and Access Control,Default Base Class Constructors, this and super keywords.Abstract Classes And Interfaces,	4	Core Java by vaishali shah and Sherman shah	BLACK BOARD AND CHALK
	Abstract Classes And Interfaces, Abstract Classes, Abstract Methods,Interfaces, What Is An Interface? How Is An Interface Different From An Abstract Class?	4		
	Multiple Inheritance, Default Implementation,Adding New Functionality, Method Implementation	2		
	Classes Interfaces, Defining An Interface, Implementing Interfaces.Packages: Creating Packages, Default Package, Importing Packages,Using A Package	3		
Unit 4	Enumerations,Arrays: Two Dimensional Arrays, Multi-Dimensional Arrays, Vectors, Adding Elements To A Vector, Accessing Vector Elements, Searching For Elements In A Vector, Working With The Size of The Vector.	3	Core Java by vaishali shah and Sherman shah	BLACK BOARD AND CHALK
	Multithreading: the thread control methods, thread life cycle, the main thread, creating a thread, extending the thread class.	3		
	Exceptions:Catching Java Exceptions, Catching Run-Time Exceptions, Handling Multiple Exceptions, The finally Clause	4		

	The throws Clause Byte streams: reading console input, writing console output, reading file, writing file, writing binary data, reading binary data, getting started with character streams, writing file, reading file	**3**

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: SY BSc IT SEMESTER: IV MONTH: DEC-MAR ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

The learners will be able to:
1. Understand what is a microcontroller, microcomputer, embedded system.
2. Understand different components of a micro-controller and their interactions.
3. Become familiar with programming environment used to develop embedded systems.
4. Understand key concepts of embedded systems like IO, timers, interrupts, interaction with peripheral devices.
5. Learn debugging techniques for an embedded system.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 2 ES UNIT 1	Embedded Systems and general purpose computer systems, history, classifications, applications and purpose of embedded systems	4	Introduction to embedded systems by Shibu K V	Black board and chalk
	Microprocessors and microcontrollers ,RISC and CISC controllers, Big endian and Little endian processors, Application specific ICs, Programmable logic devices, COTS.	3		
	Sensors and actuators, communication interface, embedded firmware, other system components.	3		

	Characteristics, operational and non-operational quality attributes.	2		
UNIT 2	Application specific – washing machine, domain specific - automotive.	3	Introduction to embedded systems by Shibu K V	Black board and chalk
	Memory map, i/o map, interrupt map, processor family, external peripherals	3		
	memory – RAM , ROM, types of RAM and ROM, memory testing, CRC ,Flash memory .	3		
	Control and Status Registers, Device Driver, Timer Driver - Watchdog Timers.	3		
UNIT 3	Microcontrollers and Embedded processors, Overview of 8051 family.8051 Microcontroller hardware	4	Programming Embedded Systems in C C++ by Michael Barr	Black board and chalk
	Input/output pins, Ports, and Circuits, External Memory.	4		
	Data Types and time delay in 8051 C, I/O Programming, Logic operations, Data conversion Programs.	4		
UNIT 4	Factors to be considered in selecting a controller, why 8051 Microcontroller, Designing with 8051.	4	https://www.tutorialspoint.com/embedded_systems Introduction to embedded systems by Shibu K V	Black board and chalk
	structure of embedded program, infinite loop	4		

	compiling, linking and debugging	4		
UNIT 5	Operating system basics, types of operating systems, Real-Time Characteristics, Selection Process of an RTOS.	4	https://www.tutorialspoint.com/embedded_systems	Black board and chalk
	Embedded system development Environment – IDE, types of file generated on cross compilation, disassembler/ de-compiler,	4		
	simulator, emulator and debugging, embedded product development life-cycle, trends in embedded industry.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ____ HEMANT WANI__ DEPARTMENT: _____BSC-IT___ CLASS: __SYIT___ SEMESTER: ___IV

MONTH: ____December to March_____ ACADEMIC YEAR: ____2018-19__

LEARNING OBJECTIVE/S:
The learners will be able to:

To adhere to the highest standards of ethics, including relevant industry and organizational codes of conduct. To be capable of managing complex IT projects with consideration of the human, financial and environmental factors. To work effectively as a part of a team to achieve a common stated goal.

TITLE PAPER, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Software Engineering USIT404 Unit - 1	**Introduction**: What is software engineering? Software Development Life Cycle, Requirements Analysis, Software Design, Coding, Testing, Maintenance etc. Software Requirements: Functional and Non-functional requirements, User Requirements, System Requirements, Interface Specification, Documentation of the software requirements. Software Processes: Process and Project, Component Software Processes. Software Development Process Models. Waterfall Model. Prototyping. Iterative	3 4 3	Ian Somerville Roger Pressman	Chalk, Blackboard

	Development. Rational Unified Process. The RAD Model Time boxing Model. Agile software development: Agile methods. Plan-driven and agile development, Extreme programming, Agile project management methods.	2		
Software Engineering USIT404 Unit - 2	**Socio-technical system:** Essential characteristics of socio technical systems, Emergent System Properties, Systems Engineering. Components of system such as organization, people and computers, Dealing Legacy Systems. Critical system: Types of critical system. A simple safety critical system, Dependability of a system, Availability and Reliability, Safety and Security of Software systems. Requirements Engineering Processes: Feasibility study, Requirements elicitation and analysis, Requirements Validations, Requirements Management	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard
Software Engineering USIT404 Unit - 3	**Architectural Design:** Architectural Design Decisions, System Organisation, Modular Decomposition Styles, Control Styles, Reference Architectures. User Interface Design: Need of UI design, Design issues, The UI design Process, User analysis, User Interface Prototyping, Interface Evaluation. Project Management	2 3 2	Ian Somerville Roger Pressman	Chalk, Blackboard

	Software Project Management, Management activities, Project Planning, Project Scheduling, Risk Management. Quality Management: Process and Product Quality, Quality assurance and Standards, Quality Planning, Quality Control, Software Measurement and Metrics.	2 3		
Software Engineering USIT404 Unit - 4	**Verification and Validation:** Planning Verification and Validation, Software Inspections, Automated Static Analysis, Verification and Formal Methods. Software Testing: System Testing, Component Testing, Test Case Design, Test Automation. Software Measurement: Size-Oriented Metrics, Function-Oriented Metrics, Extended Function Point Metrics **Software Cost Estimation:** Software Productivity, Estimation Techniques, Algorithmic Cost Modelling, Project Duration and Staffing.	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard
Software Engineering USIT404 Unit - 5	**Process Improvement:** Process and product quality, Process Classification, Process Measurement, Process Analysis and Modeling, Process Change. The CMMI Process Improvement Framework. Service Oriented Software Engineering: Services as reusable components, Service Engineering. Software Development with Services. Software reuse: The reuse landscape, Application frameworks, Software product lines, COTS product reuse. Distributed software engineering: Distributed systems issues, Client–server computing, Architectural patterns for distributed systems, Software as a service.	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:S.Y.BSC(I.T) Div-C SEMESTER: **IV** MONTH:DECEMBER-MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to : To list the basic concepts used in computer graphics

To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping.

To describe the importance of viewing and projections.

To define the fundamentals of animation, virtual reality and its related technologies.

To understand a typical graphics pipeline

To design an application with the principles of virtual reality

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Computer Graphics and Animation USIT405 Unit-1	**Introduction to Computer Graphics:** Overview of Computer Graphics, Computer Graphics Application andSoftware, Description of some graphics devices, Input Devices forOperator Interaction, Active and Passive Graphics Devices, DisplayTechnologies, Storage Tube Graphics Displays, Calligraphic Refresh Graphics Displays, Raster Refresh (Raster-Scan) Graphics Displays,Cathode Ray Tube Basics, Color CRT Raster Scan Basics, VideoBasics, The Video Controller, Random-Scan Display Processor, LCD displays.	5	Computer Graphics -Hearn, Baker Computer Graphics-Rajesh.k.Mourya	Powerpoint presentation,Projector,chalk blackboard

	Scan conversion – Digital Differential Analyzer (DDA) algorithm,Bresenhams' Line drawing algorithm.Bresenhams' method of Circle drawing	3		
	Midpoint Circle Algorithm, Midpoint Ellipse Algorithm,Mid-point criteria	3		
	Problems of Aliasing, end-point ordering andclipping lines, Scan Converting Circles	2		
	Clipping Lines algorithms–Cyrus-Beck, Cohen-Sutherland and Liang-Barsky, Clipping Polygons,problem with multiple components.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	15		
Computer Graphics and Animation USIT405 Unit-3	**Viewing in 3D** Stages in 3D viewing, Canonical View Volume (CVV), Specifying an Arbitrary 3D View, Examples of 3D Viewing, The Mathematics of Planar Geometric Projections, Combined transformation matrices for projections and viewing, Coordinate Systems and matrices, camera model and viewing pyramid.	5	Computer Graphics -Hearn, Baker Computer Graphics-Rajesh.k.Mourya Computer Graphics - Principles and Practice- J. D. Foley, A. Van	Powerpoint presentation,Projector,chalk blackboard
	Light: Radiometry,Transport,Equation,Photometry	3		
	Color: Colorimetry,ColorSpaces,ChromaticAdaptation, Color Appearance	3		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	11		

			Dam, S. K. Feiner and J. F. Hughes	
Computer Graphics and Animation USIT405 Unit-4	**Visible-Surface Determination:** Techniques for efficient Visible-Surface Algorithms, Categories of algorithms, Back face removal, The z-Buffer Algorithm, Scan-line method, Painter's algorithms (depth sorting), Area subdivision method, BSP trees, Visible-Surface Ray Tracing, comparison of the methods.	5	Computer Graphics -Hearn, Baker Computer Graphics-Rajesh.k.Mourya Computer Graphics - Principles and Practice-J. D. Foley, A. Van	Powerpoint presentation,Projector,chalk blackboard
	Plane Curves and Surfaces: Curve Representation, Nonparametric Curves, Parametric Curves, Parametric Representation of a Circle, Parametric Representation of an Ellipse, Parametric Representation of a Parabola, Parametric Representation of a Hyperbola, Representation of Space Curves, Cubic Splines, , Bezier Curves, B-spline Curves, B-spline Curve Fit, B-spline Curve Subdivision, Parametric Cubic Curves, QuadricSurfaces. Bezier Surfaces.	5

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**SY.B SC(IT)-C**_____ SEMESTER: ____**IV**_____ MONTH: _____**DECEMBER-MARCH**_____ ACADEMIC YEAR: _____**2018-2019**_____

LEARNING OBJECTIVE/S:
The learners will be able to :

Understand the concept of transformations and its types in 2D and 3D in computer graphics and how those can be implemented in variation of applications including Animation. Understanding the representation of matrices, projection in CG and its usage. To implement concepts, creation and how it works with different types of animation. To make understand what is image ,how it is created and how it is used in varieties of processing, To make understand the concept of image enhancement, compression, filtering and histogram of image to study subjective improvisation of image in applications to reduce the noise

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-05 (USIT405) **Computer Graphics and Animation** **Unit No -02**	**Two-Dimensional Transformations:** Transformations and Matrices, Transformation Conventions, 2D Transformations, Homogeneous Coordinates and Matrix Representation of 2D Transformations, Translations and Homogeneous Coordinates, Rotation, Reflection, Scaling, Combined Transformation, Transformation of Points, Transformation of The Unit Square, Solid Body Transformations, Rotation About an Arbitrary Point, Reflection through an Arbitrary Line, A Geometric Interpretation of Homogeneous Coordinates, The Window-to-Viewport Transformations.	06	Computer Graphics by R.K Maurya	Textbook, Blackboard, Chalk and Duster.

	Three-Dimensional Transformations: Three-Dimensional Scaling, Three-Dimensional Shearing, Three-Dimensional Rotation, Three-Dimensional Reflection, Three-Dimensional Translation, Multiple Transformation, Rotation about an Arbitrary Axis in Space, Reflection through an Arbitrary Plane, Matrix Representation of 3D Transformations, Composition of 3D Transformations,. Affine and Perspective Geometry, Perspective Transformations, Techniques for Generating Perspective Views, Vanishing Points, the Perspective Geometry and camera models, Orthographic Projections, Axonometric Projections, Oblique Projections, View volumes for projections.	06	Computer Graphics by R.K Maurya	Textbook, Blackboard, Chalk and Duster. Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -05	**Computer Animation:** Principles of Animation, Key framing, Deformations, Character Animation, Physics-Based Animation, Procedural Techniques, Groups of Objects.	06	Computer Graphics by R.K Maurya.	Projector, Laptop, PPTs.
	Image Manipulation and Storage: What is an Image? Digital image file formats, Image compression standard – JPEG, Image Processing - Digital image enhancement, contrast stretching, Histogram Equalization, smoothing and median Filtering.	06	Digital Image Processing by Dhananjay.	Textbook, Blackboard, Chalk and Duster, Projector, Laptop, PPTs.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: SYIT-DIV C SEMESTER: IV MONTH: DEC - MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: Develop logics to write programs, build application using Core Java. This will also help them to understand some basic concepts of object-oriented programming like class, inheritance, polymorphism, message passing. Also they will get to know the idea of multithreading, package, exception-handling.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT401 Core Java II	**Control Flow Statements:** The If…Else If…Else Statement, The Switch…Case Statement	3	Core Java 8 for Beginners By Vaishali Shah, Sharnam Shah	Blackboard & chalk
	Iterations: The While Loop, The Do … While Loop, The For Loop, The Foreach Loop, Labeled Statements, The Break And Continue Statements, The Return Statement	3		
	Classes: Types of Classes, Scope Rules, Access Modifier, Instantiating Objects From A Class, Initializing The Class Object And Its Attributes, Class Methods, Accessing A Method, Method Returning A Value, Method's Arguments, Method Overloading	3		
	Variable Arguments [Varargs], Constructors, this Instance, super Instance, Characteristics Of Members Of A Class, constants, this instance, static fields of a class, static methods of a class, garbage collection.	3		
	Inheritance: Derived Class Objects, Inheritance and Access Control, Default Base Class Constructors, this and super keywords.	3		

III	Abstract Classes And Interfaces, Abstract Classes, Abstract Methods, Interfaces, What Is An Interface? How Is An Interface Different From An Abstract Class?	3	Core Java 8 for Beginners By Vaishali Shah, Sharnam Shah	Blackboard & chalk
	Multiple Inheritance, Default Implementation, Adding New Functionality, Method Implementation, Classes V/s Interfaces, Defining An Interface, Implementing Interfaces.	4		
	Packages: Creating Packages, Default Package, Importing Packages, Using A Package.	2		
IV	**Enumerations, Arrays:** Two Dimensional Arrays, Multi-Dimensional Arrays, Vectors, Adding Elements To A Vector, Accessing Vector Elements, Searching For Elements In A Vector, Working With The Size of The Vector.	3	Core Java 8 for Beginners By Vaishali Shah, Sharnam Shah	Blackboard & chalk
	Multithreading: the thread control methods, thread life cycle, the main thread, creating a thread, extending the thread class.	3		
	Exceptions: Catching Java Exceptions, Catching Run-Time Exceptions, Handling Multiple Exceptions, The finally Clause, The throws Clause	3		
	Byte streams: reading console input, writing console output, reading file, writing file, writing binary data, reading binary data, getting started with character streams, writing file, reading file	3

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT:CS

CLASS: SY BSc IT DIV-C(CJ) SEMESTER:SEM-4 MONTH:DEC-MAR ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

The learners will be able to :

- To learn why Java is useful for the design of desktop and web applications.
- To learn how to implement object-oriented designs with Java.
- To identify Java language components and how they work together in applications.
- To design and program stand-alone Java applications.
- To learn how to design a graphical user interface (GUI) .
- To understand how to use Java APIs for program development.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CORE JAVA PAPER-1 Unit 1	**Introduction:**History, architecture and its components,Java Class File, Java Runtime Environment, The Java Virtual Machine, JVM Components, The Java API, java platform, java development kit,	2	Core Java 8 for Beginners BY Vaishali Shah, Sharnam Shah	BLACK BOARD AND CHALK
	Lambda Expressions, Methods References, Type Annotations, Method Parameter Reflection, setting the path environment variable, Java Compiler And Interpreter, java programs, java applications,	2		
	main(), public, static, void, string[] args, statements, white space, case sensitivity, identifiers, keywords, comments, braces and code blocks, variables, variable name	2		
	Data types: primitive data types, Object Reference Types, Strings, Auto boxing, operators and properties of operator	4		

Unit 5	Arithmetic operators, assignment operators, increment and decrement operator, relational operator, logical operator,		Core Java 8 for Beginners BY Vaishali Shah, Sharnam Shah	BLACK BOARD AND CHALK
	bitwise operator, conditional operator.	2		
	Event Handling: Delegation Event Model, Events, Event classes, Event listener interfaces, Using delegation event model, adapter classes and inner classes.	3		
	Abstract Window Toolkit: Window Fundamentals, Component, Container, Panel, Window, Frame, Canvas	3		
	.Components – Labels, Buttons, Check Boxes, Radio Buttons, Choice Menus, Text Fields, Text, Scrolling List, Scrollbars, Panels, Frames	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYIT-A SEMESTER: SEM-2 MONTH: DEC-MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

- To gain an understanding why the green computing is instrumental for the environment.
- Identify key issues relevant to green computing and evaluate different approaches to these problems.
- Study of designing, engineering, manufacturing, using and disposing of computing devices in a way that reduces their environmental impact.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
5 GREEN COMPUTING UNIT 2	Minimizing Power Usage: Power Problems, Monitoring Power Usage, Servers, Low-Cost Options, Reducing Power Use, Data De-Duplication, Virtualization, Management, Bigger Drives, Involving the Utility Company,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Low Power Computers, PCs, Linux, Components, Servers, Computer Settings, Storage, Monitors, Power Supplies, Wireless Devices, Software.	3		
	Cooling: Cooling Costs, Power Cost, Causes of Cost, Calculating Cooling Needs, Reducing Cooling Costs, Economizers, On-Demand Cooling, HP's Solution, Optimizing Airflow, Hot Aisle/Cold Aisle, Raised Floors, Cable Management, Vapour Seal,	3		

	Prevent Recirculation of Equipment Exhaust, Supply Air Directly to Heat Sources, Fans, Humidity, Adding Cooling, Fluid Considerations, System Design, Datacentre Design, Centralized Control, Design for Your Needs, Put Everything Together.	3		
UNIT 3	**Changing the Way of Work:** Old Behaviours, starting at the Top, Process Reengineering with Greening Mind, Analysing the Global Impact of Local Actions,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Steps: Water, Recycling, Energy, Pollutants, Teleworkers and Outsourcing, Telecommuting, Outsourcing, how to Outsource.	3		
	Going Paperless: Paper Problems, The Environment, Costs: Paper and Office, Practicality, Storage, Destruction, Going Paperless, Organizational Realities, Changing Over, Paperless Billing, Handheld Computers vs. the Clipboard,	3		
	Unified Communications, Intranets, What to Include, Building an Intranet, Microsoft Office SharePoint Server 2007, Electronic Data Interchange (EDI), Nuts and Bolts, Value Added Networks, Advantages, Obstacles.	3		
UNIT 5	**Greening Your Information Systems:** Initial Improvement Calculations, Selecting Metrics, Tracking Progress, Change Business Processes, Customer Interaction, Paper Reduction,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Green Supply Chain, Improve Technology Infrastructure, Reduce PCs and Servers, Shared Services, Hardware Costs,	3		

	Cooling.			
	Staying Green: Organizational Check-ups, Chief Green Officer, Evolution, Sell the CEO, SMART Goals, Equipment Check-ups, Gather Data, Tracking the data,	3		
	Baseline Data, Benchmarking, Analyse Data, Conduct Audits, Certifications, Benefits, Realities, Helpful Organizations.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.IT - A SEMESTER: II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand and realize the Interfacing of memory & various I/O devices with 8085 microprocessors.
- Understand and classify the instruction set of 8085 microprocessor and distinguish the use of different instructions and apply it in assembly language programming.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Unit-III Microprocessor Architecture	**Programming Techniques With Additional Instructions:** Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	4		Blackboard, Chalk
	Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		Blackboard, Chalk

Paper-II UNIT-IV Microprocessor Architecture	**Code Conversion, BCD Arithmetic, and 16-Bit Data Operations:** BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-toSeven-Segment-LED Code Conversion, Binary-to-ASCII and ASCIIto-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Software Development System and Assemblers: Microprocessors-Based Software Development system, Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	4		Blackboard, Chalk
	Interrupts: The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		Blackboard, Chalk
Paper-II UNIT-V Microprocessor Architecture	**The Pentium and Pentium Pro microprocessors:** Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor, Special Pentium Pro features.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Core 2 and later Microprocessors: Introduction, Pentium II software changes, Pentium IV and Core 2, i3, i5 and i7.	4		Blackboard, Chalk
	SUN SPARC Microprocessor: Architecture, Register file, data types and instruction format	4		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: FYIT SEMESTER: II MONTH: DECE to MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

To become familiar with the architecture and the instruction set of an Intel microprocessor

To study the Assembly language programming as well as the design of various types of digital and analog interfaces

To understand the architecture of 8085 and 8051

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 MPA Unit 1	**Microprocessor, microcomputers, and Assembly Language:** Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	4	Microprocessors Architecture, Programming and Applications with the 8085.	Black board & Chalk

			Ramesh Gaonkar PENRAM Fifth 2012	
	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
Paper-02 MPA Unit 2	**Interfacing of I/O Devices** : Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Instructions:	4	Microprocessors Architecture,	Black board & Chalk

	Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program		Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: F.Y.B.Sc. SEMESTER: II MONTH: Dec To March ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- Object-oriented programming aims to implement real-world entities like inheritance, hiding, polymorphism, etc in programming. The main aim of OOP is to bind together the data and the functions that operate on them so that no other part of the code can access this data except that function.

The learners will be able to :

- To understand difference between object oriented and procedural oriented language.
- To understand advantages benefits and applications of object oriented language.
- To understand characteristics of object oriented language.
- To gain how to implement classes, methods and objects.
- To understand constant variables, data types, operators of C++ language.
- To understand use of constructor and destructor and using its implementation.
- To enable use of arrays, pointers and objects.
- To understand polymorphism and its types.
- To understand virtual function and pure virtual function / abstract function.
- To understand inheritance and its types with constructor.
- To understand run time error handling using try, catch and throw key words and benefits of it.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

USIT201 Object Oriented Programming UNIT-I	**Object Oriented Methodology:** Introduction, Advantages and Disadvantages of Procedure Oriented Languages, what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	6	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation, Inheritance, Polymorphism, Dynamic Binding, Message Passing	6		Black Board, Projector, PPT.
USIT201 Object Oriented Programming UNIT-II	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions, passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	8	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors	4		
USIT201 Object Oriented Programming UNIT-III	**Polymorphism:** Concept of function overloading, overloaded operators, overloading unary and binary operators, overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types,	7	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
	Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors.	5		
USIT201 Object Oriented Programming UNIT-IV	**Program development using Inheritance:** Introduction, understanding inheritance, Advantages provided by inheritance, choosing the access specifier, Derived class declaration, derived class constructors, class hierarchies, multiple inheritance, multilevel inheritance, containership, hybrid inheritance.	8	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
	Exception Handling: Introduction, Exception Handling Mechanism, Concept of throw & catch with example	4

NAME OF THE STAFF: AVINASH DILIP SONAWNAE **DEPARTMENT**: ____IT____

CLASS: FYIT_A DIV **SEMESTER**: 2 **MONTH**: Dec to March **ACADEMIC YEAR:** 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand HTML**
- **Understand JavaScript**
- **Understand how server-side programming works on the web.**
- **PHP Basic syntax for variable types and calculations.**
- **Creating conditional structures**
- **Storing data in arrays**
- **Using PHP built-in functions and creating custom functions**
- **Understanding POST and GET in form submission.**
- **How to receive and process form submission data.**
- **Reading and writing cookies.**
- **Security tips (i.e. SQL Injection)**
- **Create a database in phpMyAdmin.**
- **Read and process data in a MySQL database. Students will learn JavaScript's role in websites and web apps.**
- **Students will be introduced to basic CS concepts**
- **Students will learn basic programming structures such as: variables, functions arrays etc.**
- **Students will learn how JavaScript works with HTML and CSS.**

Late Shri. Vishnu Waman Thakur Charitable Trust

NAAC accredited "B" Grade, 2.69 CGPA

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT203 Web Programming Unit I	**Internet and the World Wide Web:** What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers – internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. search engine, web saver – apache, IIS, proxy server, HTTP protocol	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	BLACK BOARD AND CHALK
	HTML5: Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.	6		

Unit II	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to anotherURL, creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	BLACK BOARD AND CHALK
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout, formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment, creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page	6		

UNIT III	Java Script: Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	2	JavaScript 2.0: The Complete Reference BY Thomas Powell and Fritz Schneider	BLACK BOARD AND CHALK
	Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	3		
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with	2		
	.Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer	2		
	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp	3		

UNIT IV	PHP: Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types,	3	PHP Project for Beginners BY SharanamShah, Vaishali	BLACK BOARD AND CHALK
	control structures, branching, looping, termination, functions, passing information with PHP, GET, POST,	3		
	formatting form variables, superglobal arrays, strings and string functions	3		
	regular expressions, arrays, number handling, basic PHP errors/problems	3		
UNIT V	Advanced PHP and MySQL : PHP/MySQL Functions, Integrating web forms and databases,	3	PHP Project for Beginners BY SharanamShah, Vaishaliz	BLACK BOARD AND CHALK
	Displaying queries in tables, Building Forms from queries,	3		
	String and Regular Expressions, Sessions,	3		
	Cookies and HTTP, E-Mail	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: FY BSc IT SEMESTER:II MONTH: DEC-MAR ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

The learners will be able to:

1. To learn about how computer systems work and underlying principles.
2. To understand the basics of digital electronics needed for computers.
3. To understand the basics of instruction set architecture for reduced and complex instruction sets.
4. To understand the basics of processor structure and operation.
5. To understand how data is transferred between the processor and I/O devices.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 2 MPA UNIT 2	Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	Black board and chalk
	The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple Program.	3		
	Overview of 8085 Instruction Set, Writing and Assembling Program, Data Transfer Operations.	2		

	Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program.	4		
UNIT 3	Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	Black board and chalk
	Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging, Counters and Time Delays.	3		
	Illustrative Program: Hexadecimal Counter, zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	3		
	Stack Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		
UNIT 4	BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-to-Seven-Segment-LED Code Conversion, Binary-to-ASCII and ASCII-to-Binary Code Conversion,	4	Microprocessors Architecture, Programming and Applications with t 8085 by Ramesh Gaonkar	Black board and chalk
	BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	2		
	Microprocessors-Based Software Development system, OS and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	3		

	The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		
UNIT 5	Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	Black board and chalk
	Special Pentium Pro features, Introduction, Pentium II software changes.	3		
	Pentium IV and Core 2, i3, i5 and i7.	3		
	Architecture, Register file, data types and instruction format	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT: CS

CLASS:FY BSc IT DIV-B(OOP) SEMESTER: SEM-2 MONTH:DEC-MAR ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- The learners will be able to :
- To understand how C++ improves C with object-oriented features.
- To learn how to write inline functions for efficiency and performance.
- To learn the syntax and semantics of the C++ programming language.
- To learn how to design C++ classes for code reuse.
- To learn how to implement copy constructors and class member functions.
- To understand the concept of data abstraction and encapsulation.
- To learn how to overload functions and operators in C++.
- To learn how containment and inheritance promote code reuse in C++.
- To learn how inheritance and virtual functions implement dynamic binding with polymorphism.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER1 OOP UNIT 1	**Object Oriented Methodology**: Introduction, Advantages and Disadvantages of Procedure Oriented Languages,	3	Object Oriented Programming with C++ BY E. Balagurusamy	BLACK BOARD AND CHALK
	what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	3		
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation,	3		
	Inheritance, Polymorphism, Dynamic Binding	3		
UNIT 3	**Polymorphism:** Concept of function overloading, overloaded operators,	3	Object Oriented Programming	BLACK BOARD AND CHALK

	overloading unary and binary operators, overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types,	3	with C++ BY E. Balagurusamy	
	Virtual Functions: Introduction and need, Pure Virtual Functions,	3		
	Static Functions, this Pointer, abstract classes, virtual	3		
UNIT 4	**Program development using Inheritance:** Introduction, understanding inheritance, Advantages provided by inheritance,	3	Object Oriented Programming with C++ BY E. Balagurusamy	BLACK BOARD AND CHALK
	choosing the access specifier, Derived class declaration, derived class constructors, class hierarchies,	3		
	multiple inheritance, multilevel inheritance, containership, hybrid inheritance.	3		
	Exception Handling: Introduction, Exception Handling Mechanism	3

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.IT - B SEMESTER: II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

- design dynamic websites that meet specified needs and interests.
- write well-structured, easily maintained, standards-compliant, accessible HTML code.
- use JavaScript to add dynamic content to pages.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-III UNIT-II WEB PROGRAMMING	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to another URL,	3	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Blackboard, Chalk
	creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions.	2		Blackboard, Chalk
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout,	2		Blackboard, Chalk

	formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment,	2		Blackboard, Chalk
	creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page	3		Blackboard, Chalk
PAPER-III UNIT-III WEB PROGRAMMING	**Java Script:** Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	1	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Blackboard, Chalk
	Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	2		Blackboard, Chalk
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with	2		Blackboard, Chalk
	Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp	2		Blackboard, Chalk
	Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer	2		Blackboard, Chalk
	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad,	3		Blackboard, Chalk

	onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp, onMove, onReset, onResize, onSelect, onSubmit, onUnload			
PAPER-III UNIT-V WEB PROGRAMMING	**Advanced PHP and MySQL :** PHP/MySQL Functions, Integrating web forms and databases,	5	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Blackboard, Chalk
	Displaying queries in tables, Building Forms from queries, String and	3		Blackboard, Chalk
	Regular Expressions, Sessions, Cookies and HTTP, E-Mail	4		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SURBHI SHAH DEPARTMENT: IT-CS

CLASS:FYIT-DIV B SEMESTER: SEM-II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to: learn advanced html programming with its basic concepts and to create database with the help of php and mysql.and to be capable of managing complex IT projects with consideration of the human, financial and environmental factors. to work effectively as a part of a team to achieve a common stated goal.to adhere to the highest standards of ethics, including relevant industry and organizational codes of conduct.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER:-III TITLE:- Web Programming UNIT 1	**Internet and the World Wide Web:** What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business.	2	Web Design The Complete Reference By Thomas Powell And HTML5 Step by Step by Faithe Wempen	BLACK BOARD AND CHALK
	Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers – internet explorer, Netscape navigator, opera, Firefox,	2		
	chrome, Mozilla. search engine, web saver – apache, IIS, proxy server, HTTP protocol	2		
	HTML5: Introduction, Why HTML5? Formatting text by using tags,	3		
	using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.	3		

UNIT 4	**PHP:** Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments,	3	PHP 5.1 for Beginners By Ivan Bayross Sharanam Shah,	BLACK BOARD AND CHALK
	types, control structures, branching, looping, termination, functions,	3		
	passing information with PHP, GET, POST, formatting form variables, superglobal arrays,	3		
	strings and string functions, regular expressions, arrays, number handling, basic PHP errors/problems	3

	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation	4		
	Inheritance, Polymorphism, Dynamic Binding, Message Passing	4		
UNIT 2	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions	4	Object Oriented Programming with C++ -by E. Balagurusamy	Blackboard & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	4		
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors	4		
UNIT 3	**Polymorphism:** Concept of function overloading, overloaded operators, overloading unary and binary operators	5	Object Oriented Programming with C++ -by E. Balagurusamy	Blackboard & Chalk
	overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types.	4		
	Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors.	3		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 36

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SURBHI SHAH DEPARTMENT: IT-CS CLASS:FYIT-DIV C

SEMESTER: SEM-II MONTH: JAN-MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: to think analytically, creatively and critically in developing robust, extensible and highly maintainable technological solutions to simple and complex problems to apply their knowledge and skills to be employed and excel in IT professional careers and/or to continue their education in IT and/or related post graduate programmes

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER NO:II TITLE OF PAPER:- **Microprocessor Architecture** UNIT 1	**Microprocessor, microcomputers, and Assembly Language:** Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	• Reference book,chalk and blackboard
	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	4		
	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer	5		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 2	**Interfacing of I/O Devices** Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	Reference book,chalk and blackboard
	Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.	5		
	Introduction to 8085 Instructions: Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program.	4		
UNIT 3	**Programming Techniques With Additional Instructions:** Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.	4	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	Reference book,chalk and blackboard
	Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	4		
	Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

UNIT 4	**Code Conversion, BCD Arithmetic, and 16-Bit Data Operations:** BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-to-Seven-Segment-LED Code Conversion, Binary-to-ASCII and ASCII-to-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	4	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	Reference book,chalk and blackboard
	Software Development System and Assemblers: Microprocessors-Based Software Development system, Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	4		
	Interrupts:-The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	4		
UNIT 5	**The Pentium and Pentium Pro microprocessors:** Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor, Special Pentium Pro features.	5	Structured Computer Organization By Andrew C. Tanenbaum And internet.	Reference book,chalk and blackboard
	Core 2 and later Microprocessors: Introduction, Pentium II software changes, Pentium IV and Core 2, i3, i5 and i7.	3		
	SUN SPARC Microprocessor: Architecture, Register file, data types and instruction format	4		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 60

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MONIKA MADHUKAR RAUT DEPARTMENT: IT/CS

CLASS: FYIT-C SEMESTER: II MONTH: DECEMBER TO MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to design valid, well-formed, scalable, and meaningful pages using emerging technologies, and database connectivity

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
WEB PROGRAMMING (USIT203) Unit I	**Internet and the World Wide Web:** What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers – internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. search engine, web saver – apache, IIS, proxy server, HTTP protocol	6	Web Design The Complete Reference-Thomas Powell Tata McGraw Hill, HTML5 Step by Step-Faithe Wempen	Black Board and Chalk
	HTML5: Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.	6	Web Design The Complete Reference-Thomas Powell Tata McGraw Hill, HTML5 Step by Step-Faithe Wempen	Black Board and Chalk

WEB PROGRAMMING (USIT203) Unit V	**Advanced PHP and MySQL :** PHP/MySQL Functions, Integrating web forms and databases, Displaying queries in tables, Building Forms from queries,	8	PHP 6 and MySQL Bible by Steve Suehring, Tim Converse, Joyce Park	Black Board and Chalk
	String and Regular Expressions, Sessions, Cookies and HTTP, E-Mail	4	PHP 5.1 for Beginners by Ivan Bayross, Sharanam Shah	Black Board and Chalk

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

SIGNATURE OF THE STAFF

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:NAMITA NITIN RODE DEPARTMENT: CS

CLASS:FY BSc IT DIV C (WEB) SEMESTER:SEM -2 MONTH:DEC-MAR ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

Insert a graphic within a web page. Create a link within a web page.Create a table within a web page.

Insert heading levels within a web page. will learn JavaScript's role in websites and web apps.Students will be introduced to basic CS concepts

Students will learn basic programming structures such as: variables, functions arrays etc.Students will learn how JavaScript works with HTML and CSS.

Students will learn how to debug basic JavaScript errors. PHP Basic syntax for variable types and calculations.Creating conditional structures.Storing data in arrays.Using PHP built-in functions and creating custom functions.Understanding POST and GET in form submission.How to receive and process form submission data

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3 WEB PROGRAMMING UNIT 2	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map,	2	HTML5 Step by Step BY Faithe Wempen	BLACK BOARD AND CHALK
	redirecting to another URL, creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions.	2		
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout,	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment,	2		
	creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in	2		
	HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page.	2		
UNIT 3	**Java Script:** Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	2	JavaScript 2.0: The Complete Reference BY Thomas Powell and Fritz Schneider	BLACK BOARD AND CHALK
	Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	3		
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with,	2		
	Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp	2		
	Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp	3		
UNIT 4	**PHP:** Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types,	3	PHP Project for Beginners BY SharanamShah, Vaishali	BLACK BOARD AND CHALK
	control structures, branching, looping, termination, functions, passing information with PHP, GET, POST,	3		
	formatting form variables, superglobal arrays, strings and string functions,	3		
	regular expressions, arrays, number handling, basic PHP errors/problems	3		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 38

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: INFORMATION TECHNOLOGY CLASS: TYIT-A

SEMESTER: V MONTH: JUNE-SEPTEMBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of open source operating system Linux, command line working, managing soft wares on Linux .
- Develop logic for connecting to network, giving permissions to users.
- Be familiar about the basic file sharing, setting iptables in linux .
- Apply the problem solving skills on high availability of cluster, installation of servers, bash shell scripting.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT505, Unit 1, Linux System Administration	Introduction to Red Hat Enterprise Linux: Linux, Open Source and Red Hat, Origins of Linux, Distributions, Duties of Linux System Administrator.	02	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Command Line: Working with the Bash Shell, Getting the Best of Bash, Useful Bash Key Sequences, Working with Bash History, Performing Basic File System Management Tasks, Working with Directories, Piping and Redirection, Finding Files.	03	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, powerpoint
	System Administration Tasks: Performing Job Management Tasks, System and Process Monitoring and Management, Managing Processes with ps, Sending Signals to Processes with	04	Red Hat Enterprise Linux6	Black Board and chalk, PowerPoint t

	the kill Command, using top to Show Current System Activity, Managing Process Niceness, Scheduling Jobs, Mounting Devices, Working with Links, Creating Backups, Managing Printers, Setting Up System Logging, Setting Up Rsyslog, Common Log Files, Setting Up Logrotate		Administration by Sander van Vugt	
	Managing Software: Understanding RPM, Understanding Meta Package Handlers, Creating Your Own Repositories, Managing Repositories,Installing Software with Yum, Querying Software, Extracting Files from RPM Packages	03	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
USIT505, Unit 2, Linux System Administration	Configuring and Managing Storage: Understanding Partitions and Logical Volumes, Creating Partitions, Creating File Systems, File Systems Overview, Creating File Systems, Changing File System Properties, Checking the File System Integrity, Mounting File Systems Automatically Through fstab, Working with Logical Volumes, Creating Logical Volumes, Resizing Logical Volumes, Working with Snapshots, Replacing Failing Storage Devices, Creating Swap Space, Working with Encrypted Volumes	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Connecting to the Network: Understanding NetworkManager, Working with Services and Runlevels, Configuring the Network with NetworkManager, Working with system-config-network, NetworkManager Configuration Files, Network Service Scripts, Networking from the Command Line, Troubleshooting Networking, Setting Up IPv6, Configuring SSH, Enabling the SSH Server, Using the SSH Client, Using PuTTY on Windows Machines, Configuring Key-Based SSH Authentication, Using Graphical Applications with SSH, Using SSH Port Forwarding, Configuring VNC Server Access	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint

	Working with Users, Groups, and Permissions: Managing Users and Groups, Commands for User Management, Managing Passwords, Modifying and Deleting User Accounts, Configuration Files, Creating Groups, Using Graphical Tools for User, and Group Management, Using External Authentication Sources, the Authentication Process, sssd, nsswitch, Pluggable Authentication Modules, Managing Permissions, the Role of Ownership, Basic Permissions: Read, Write, and Execute, Advanced Permissions, Working with Access Control Lists, Setting Default Permissions with umask, Working with Attributes.	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
USIT505, Unit 3, Linux System Administration	Securing Server with iptables: Understanding Firewalls, Setting Up a Firewall with system-config-firewall, Allowing Services, Trusted Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule, Configuration Example, Advanced iptables Configuration, Configuring Logging, The Limit Module, Configuring NAT	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Setting Up Cryptographic Services: Introducing SSL, Proof of Authenticity: The Certificate Authority, Managing Certificates with openssl, Creating a Signing Request, Working with GNU Privacy Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys, Encrypting Files with GPG, GPG Signing, Signing RPM Files	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Configuring Server for File Sharing: What is NFS? Advantages and Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring Automount, Configuring Samba, Setting Up a Samba File Server, Samba Advanced Authentication Options, Accessing Samba Shares, Offering FTP Services	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint

USIT505, Unit 4, Linux System Administration	Configuring DNS and DHCP:Introduction to DNS, The DNS Hierarchy, DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, Configuring Dovecot for POP and IMAP	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Configuring Apache on Red Hat Enterprise Linux: Configuring the Apache Web Server, creating a Basic Website, Understanding the Apache Configuration Files, Apache Log Files, Working with Virtual Hosts, Securing the Web Server with TLS Certificates, Configuring Authentication, Setting Up Authentication with .htpasswd, Configuring LDAP Authentication, Setting Up MySQL	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
USIT505, Unit 5, Linux System Administration	Introducing Bash Shell Scripting: Introduction, Elements of a Good Shell Script, Executing the Script, Working with Variables and Input, Understanding Variables, Variables, Subshells, and Sourcing, Working with Script Arguments, Asking for Input, Using Command Substitution, Substitution Operators, Changing Variable Content with Pattern Matching, Performing Calculations, Using Control Structures, Using if...then...else, Using case, Using while, Using until, Using for, Configuring booting with GRUB.	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	High-Availability Clustering: High-Availability Clustering, The Workings of High Availability, High-Availability Requirements, Red Hat High-Availability Add-on Software, Components,	04	Red Hat Enterprise Linux6	Black Board and chalk, PowerPoint

	Configuring Cluster-Based Services, Setting Up Bonding, Setting Up Shared Storage, Installing the Red Hat High Availability Add-On, Building the Initial State of the Cluster, Configuring Additional Cluster Properties, Configuring a Quorum Disk, Setting Up Fencing, Creating Resources and Services, Troubleshooting a Nonoperational Cluster, Configuring GFS2 File Systems		Administration by Sander van Vugt	
	Setting Up an Installation Server: Configuring a Network Server as an Installation Server, Setting Up a TFTP and DHCP Server for PXE Boot, Installing the TFTP Server, Configuring DHCP for PXE Boot, Creating the TFTP PXE Server Content, creating a Kickstart File, Using a Kickstart File to Perform an Automated, Installation, Modifying the Kickstart File with, system-config-kickstart, Making Manual Modifications to the Kickstart File	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: June to Sept ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 Advance Web Programming UNIT-I	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning	Black Board, Projector, PPT.
	The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.	4		Black Board, Projector, PPT.
	Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types,	4		Black Board, Projector,

	Understanding Namespaces and Assemblies, Advanced Class Programming.		Visual C# 2010	PPT.
USIT503 Advance Web Programming UNIT-II	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.	6	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	6		
USIT503 Advance Web Programming UNIT-III	**ADO.NET Fundamentals**: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Data Binding: Introducing Data Binding, Using Single-Value Data Binding, Using Repeated-Value Data Binding, Working with Data Source Controls,	4		
	The Data Controls: The GridView, Formatting the GridView, selecting a GridView Row, Editing with the GridView, Sorting and Paging the GridView, Using GridView Templates, The DetailsView and FormView	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: TYIT

SEMESTER: V MONTH: JUNE-SEPT ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the Java EE Architecture, Server and Containers.
- Describe the different servlet API and lifecycle of servlet.
- Get the difference between cookies, session and request dispatcher.
- Understand the use of tag library, naming directory, interceptors.
- Familiar with java beans, JPA, hibernate and JSP.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506, Enterprise Java Unit I	**Understanding Java EE:** What is an Enterprise Application? What is java enterprise edition? Java EE Technologies, Java EE evolution, Glassfish server	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, Powerpoint
	Java EE Architecture, Server and Containers: Types of System Architecture, Java EE Server, Java EE Containers.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Introduction to Java Servlets: The Need for Dynamic Content, Java Servlet Technology, Why Servlets? What can Servlets do?	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali	Black Board and chalk, PowerPoint

			Shah, SPD, First, 2012	
	Servlet API and Lifecycle: Java Servlet API, The Servlet Skeleton, The Servlet Life Cycle, A Simple Welcome Servlet	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working With Servlets: Getting Started, Using Annotations Instead of Deployment Descriptor.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working with Databases: What Is JDBC? JDBC Architecture, Accessing Database, The Servlet GUI and Database Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
USIT506, Enterprise Java Unit II	**Request Dispatcher:** Resquestdispatcher Interface, Methods of Requestdispatcher, Requestdispatcher Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	COOKIES: Kinds Of Cookies, Where Cookies Are Used? Creating Cookies Using Servlet, Dynamically Changing The Colors Of A Page	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	SESSION: What Are Sessions? Lifecycle Of Http Session, Session Tracking With Servlet API, A Servlet Session Example	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working With Files: Uploading Files, Creating an Upload File Application, Downloading Files, Creating a Download File Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint

	Working With Non-Blocking I/O: Creating a Non-Blocking Read Application, Creating The Web Application, Creating Java Class, Creating Servlets, Retrieving The File, Creating index.jsp	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
USIT506, Enterprise Java Unit III	**Introduction To Java Server Pages:** Why use Java Server Pages? Disadvantages Of JSP, JSP v\s Servlets, Life Cycle of a JSP Page, How does a JSP function? How does JSP execute? About Java Server Pages	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Getting Started With Java Server Pages: Comments, JSP Document, JSP Elements, JSP GUI Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Action Elements: Including other Files, Forwarding JSP Page to Another Page, Passing Parameters for other Actions, Loading a Javabean.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Implicit Objects, Scope And El Expressions: Implicit Objects, Character Quoting Conventions, Unified Expression Language [Unified El], Expression Language.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Java Server Pages Standard Tag Libraries: What is wrong in using JSP Scriptlet Tags? How JSTL Fixes JSP Scriptlet's Shortcomings? Disadvantages Of JSTL, Tag Libraries.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
USIT506, Enterprise Java Unit IV	**Introduction To Enterprise Javabeans:** Enterprise Bean Architecture, Benefits of Enterprise Bean, Types of Enterprise Bean, Accessing Enterprise Beans, Enterprise Bean Application, Packaging Enterprise Beans	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working With Session Beans: When to use Session Beans? Types of Session Beans, Remote and Local Interfaces, Accessing	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali	Black Board and chalk, PowerPoint

	Interfaces, Lifecycle of Enterprise Beans, Packaging Enterprise Beans, Example of Stateful Session Bean, Example of Stateless Session Bean, Example of Singleton Session Beans.		Shah, SPD, First, 2012	
	Working with Message Driven Beans: Lifecycle of a Message Driven Bean, Uses of Message Driven Beans, The Message Driven Beans Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Interceptors: Request And Interceptor, Defining An Interceptor, AroundInvoke Method, Applying Interceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
USIT506, Enterprise Java Unit V	**Persistence, Object/Relational Mapping And JPA:** What is Persistence? Persistence in Java, Current Persistence Standards in Java, Why another Persistence Standards? Object/Relational Mapping,	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Introduction to Java Persistence API: The Java Persistence API, JPA, ORM, Database and the Application, Architecture of JPA, How JPA Works? JPA Specifications.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Writing JPA Application: Application Requirement Specifications, Software Requirements, The Application Development Approach, Creating Database And Tables in Mysql, Creating a Web Application, Adding the Required Library Files, Creating a Javabean Class, Creating Persistence Unit [Persistence.Xml], Creating JSPS, The JPA Application Structure, Running The JPA Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint

	Introduction to Hibernate: What is Hibernate? Why Hibernate? Hibernate, Database and The Application, Components of Hibernate, Architecture of Hibernate, How Hibernate Works?	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Writing Hibernate Application: Application Requirement Specifications, Software Requirements, The Application Development Approach, Creating Database and Tables in Mysql, Creating a Web Application, Adding The Required Library Files, Creating a Javabean Class, Creating Hibernate Configuration File, Adding a Mapping Class, Creating JSPS, Running The Hibernate Application.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: IT CLASS:TYIT SYSEMESTER: 5 MONTH: JUNE -SEPT

ACADEMIC YEAR:2018-19

LEARNING OBJECTIVE/S:

- To determine the market perspective of IoT
- To compare and contrast the use of devices, gateways and Data management in IoT
- To illustrate the applications of IoT in Industrial Automation and identify Real world design constraints.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Internet Of Things Paper 2 Code: USIT502 Unit 1	**The Internet of Things: An Overview**: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses, DNS, Static IP Address Assignment, Dynamic IP Address Assignment,	4	Designing the	Projector, Laptop, Black board&

	IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other Common Ports,Application Layer Protocols, HTTP,HTTPS: Encrypted HTTP, Other Application Layer Protocols		Internet of Things Adrian McEwen, Hakim Cassimally	Chalk
Internet Of Things Paper 2 Code: USIT502 Unit 2	**Thinking About Prototyping:** Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation, climbing into the Cloud, Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk

Internet Of Things Paper 2 Code: USIT502 Unit 3	**Prototyping the Physical Design:** Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling. Prototyping and Presence Protocol, Constrained Application Protocol.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
	Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
Internet Of Things Paper 2 Code: USIT502 Unit 4	**Techniques for Writing Embedded Code:** Memory Management, 12 8 Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tailof the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	8	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
Internet Of	**Moving to Manufacture:** What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The	6	Designing the Internet of Things Adrian	Projector, Laptop, Black board& Chalk

Things Paper 2 Code: USIT502 Unit 5	Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.		McEwen, Hakim Cassimally	
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:T.Y.BSC(I.T) SEMESTER: **V** MONTH:JUNE-SEPTEMBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to : Apply project management concepts and techniques to an IT project. Identify issues that could lead to IT project success or failure. Explain project management in terms of the software development process. Describe the responsibilities of IT project managers.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Software Project Management USIT501 Unit-1	**Introduction to Software Project Management:** Introduction, Why is Software Project Management Important? What is a Project? Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Success and Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus Modern Project Management Practices.	5	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation,BlackBoard, Projector
	Project Evaluation and Programme Management:	5		

	Introduction, Business Case, Project PortfolioManagement, Evaluation of Individual Projects, Cost–benefit Evaluation Techniques, Risk Evaluation, Programme Management, Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management.			
	An Overview of Project Planning: Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project Infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify Activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning **TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15**	5		
Software Project Management USIT501 Unit-2	**Selection of an Appropriate Project Approach:**Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model.	5	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation,BlackBoard, Projector

	Software Effort Estimation: Introduction, Where are the Estimates Done? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottomup Estimating, The Top-down Approach and Parametric Models, Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II, COSMIC Full Function Points, COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb. **TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 10**	5		
Software Project Management USIT501 Unit-3	**Activity Planning:** Introduction, Objectives of Activity Planning, When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating a Network Model, Adding the Time Dimension, The Forward Pass, Backward Pass, Identifying the Critical Path, Activity Float, Shortening the Project Duration, Identifying Critical Activities, Activity-on-Arrow Networks.	4	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation,BlackBoard, Projector
	Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for Dealing with Risk, Risk Identification, Risk Assessment, Risk Planning, Risk Management, Evaluating Risks to the Schedule, Boehm"s Top 10 Risks and Counter Measures, Applying the PERT Technique, Monte Carlo Simulation, Critical Chain Concepts.	4		
	Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling	3		

	Sequence. **TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 11**			
Software Project Management USIT501 Unit-4	**Monitoring and Control**: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM).	3	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation,BlackBoard, Projector
	Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance	2		
	Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns **TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 9**	4		

USIT501 Software Project Management UNIT-5	**Working in Teams:** Introduction, Becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Software Quality : Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing,	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

	Software Reliability,Quality Plans.			
	Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project CloseoutReport	02	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:Miss Shilpa James Rodrigues **DEPARTMENT**: IT

CLASS: T.Y.I.T.-B (Enterprise Java) **SEMESTER**:V

MONTH:June - September **ACADEMIC YEAR**: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- Learn advance technology of java programming.
- Develop web based java program.
- Create dynamic content providing java web application using servlets.
- Describe and explain various multi-tier software architecture framework using Java EE including the roles and responsibilities of each relevant tier
- Develop enterprise software applications using the Java EE framework.
- Understand and implements new technologies like JSP, Session, Cookies, JSTL, Hibernate etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 1, Enterprise Java.	**Understanding Java EE:** What is an Enterprise Application? What is java enterprise edition? Java EE Technologies, Java EE evolution, Glass fish server **JavaEE Architecture,Serverand Containers:** Types of System Architecture, Java EE Server, Java EE Containers.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.

	Introduction to Java Servlets: The Need for Dynamic Content, Java Servlet Technology, Why Servlets? What can Servlets do? **Servlet API and Lifecycle:** Java Servlet API, The Servlet Skeleton, The Servlet LifeCycle, A Simple WelcomeS ervlet.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.
	WorkingWithServlets: Getting Started, Using Annotations, Insteadof, Deployment Descriptor. **Working with Databases:** What Is JDBC? JDBC Architecture, Accessing Database, The Servlet GUI and Database Example.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 2, Enterprise Java.	**Request Dispatcher:** Resquest dispatcher Interface, Methods of Request dispatcher, Request dispatcher Application.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.
	COOKIES: Kinds Of Cookies, Where Cookies Are Used? Creating Cookies.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.
	SESSION: What Are Sessions? Lifecycle Of HttpSession, Session Tracking With Servlet API, AServlet Session Example	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.
	WorkingWith Files: Uploading Files, Creatingan Upload File Application, Downloading Files, Creatinga Download File Application.	02	Java EE 7 For Beginners -Sharanam Shah,	Black Board, chalk and Power Point.

			Vaishali Shah	
	Working With Non-Blocking I/O: Creatinga Non Blocking Read Application, Creating The Web Application, Creating Java Class, Creating Servlets, Retrieving The File, Creating index.jsp	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 3 , Enterprise Java.	**Introduction To Java ServerPages:** Why use Java Server Pages? Disadvantages Of JSP, JSP v\s Servlets, Life Cycle of a JSP Page, How does a JSP function? How does JSP execute? About Java Server Pages **Getting Started With Java ServerPages:** Comments, JSP Document, JSP Elements, JSP GUI Example.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Powerpoint.
	Action Elements: Including other Files, Forwarding JSP Page to Another Page, Passing Parameters for other Actions, Loadinga Javabean.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Powerpoint.
	Implicit Objects, ScopeAnd ElExpressions: Implicit Objects, Character Quoting Conventions, Unified Expression Language[UnifiedEl], Expression Language.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Powerpoint.

	Java Server Pages Standard Tag Libraries: What is wrong in using JSP Scriptlet Tags? How JSTL Fixes JSP Scriptlet's Short comings? Disadvantages Of JSTL, TagLibraries.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Powerpoint.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 4, Enterprise Java.	**Introduction To EnterpriseJavabeans:** Enterprise Bean Architecture, Benefits of Enterprise Bean, Types of EnterpriseBean, Accessing Enterprise Beans, Enterprise Bean Application, Packaging Enterprise Beans .	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.
	Working With Session Beans: When to use SessionBeans? Types of SessionBeans, Remote and Local Interfaces, Accessing Interfaces, Lifecycle of EnterpriseBeans, Packaging EnterpriseBeans, Example of Stateful SessionBean, Example of Stateless SessionBean, Example of Singleton SessionBeans.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.
	Working with Message DrivenBeans: Lifecycle of a MessageDrivenBean, Uses of MessageDrivenBeans, The Message DrivenBeansExample.	01	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.

	Interceptors: Request And Interceptor, Defining An Interceptor, Around Invoke Method, Applying Interceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application. JNDI, Datasource Resource Definition in Java EE.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.
	Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 5, Enterprise Java.	**Persistence, Object/Relational Mapping And JPA:** What is Persistence? Persistence in Java, Current Persistence Standards in Java,Object/RelationalMapping, **Introduction to JavaPersistence API:** The Java Persistence API, JPA,ORM, Architecture of JPA, JPA Specifications.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.
	Writing JPA Application: Software Requirements, Creating Database And Tables in Mysql, Creating a WebApplication, Adding the Required Library Files, Creating aJavabean Class, Creating Persistence Unit[Persistence.Xml], Creating JSPS, The	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.

	JPA Application Structure, Running The JPA Application.			
	Introduction to Hibernate: What is Hibernate? Why Hibernate? , Database and The Application, Components of Hibernate, Architecture of Hibernate, How HibernateWorks? **WritingHibernateApplication:** Requirements, TheApplication Development Approach, Creating Database and Tables in Mysql, Creating aWeb Application, Adding The Required Library Files, Creatinga JavabeanClass, Creating Hibernate Configuration File, Addinga Mapping Class, Creating JSPS, Running The Hibernate Application.	06	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Black Board, chalk and Power Point.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc.I.T. SEMESTER: V MONTH: June to Sept ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 Advance Web Programming UNIT-I	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning	Black Board, Projector, PPT.
	The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.	4		Black Board, Projector, PPT.
	Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types,	4		Black Board, Projector,

.

	Understanding Namespaces and Assemblies, Advanced Class Programming.		Visual C# 2010	PPT.
USIT503 Advance Web Programming UNIT-II	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.	6	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	6		
USIT503 Advance Web Programming UNIT- III	**Error Handling, Logging, and Tracing** : Avoiding Common Errors, Understanding Exception Handling, Handling Exceptions, Throwing Your Own Exceptions, Using Page Tracing	5	C# 2015 Murach"s ASP.NET 4.6 Web Programming in C#2015 Beginning Visual C# 2010	Black Board, Projector, PPT.
	State Management : Understanding the Problem of State, Using View State, Transferring Information Between Pages, Using Cookies, Managing Session State, Configuring Session State, Using Application State, Comparing State Management Options	4		Black Board, Projector, PPT.
	Styles, Themes, and Master Pages : Styles, Themes, Master Page Basics, Advanced Master Pages,	3		Black Board, Projector,

.

USIT503 Advance Web Programming UNIT-IV	**ADO.NET Fundamentals**: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Data Binding: Introducing Data Binding, Using Single-Value Data Binding, Using Repeated-Value Data Binding, Working with Data Source Controls,	4		
	The Data Controls: The GridView, Formatting the GridView, selecting a GridView Row, Editing with the GridView, Sorting and Paging the GridView, Using GridView Templates, The DetailsView and FormView	4		
USIT503 Advance Web Programming UNIT - V	**XML**: XML Explained, The XML Classes, XML Validation, XML Display and Transforms. .	3	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Security Fundamentals: Understanding Security Requirements, Authentication and Authorization, Forms Authentication, Windows Authentication.	4		Black Board, Projector, PPT.
	ASP.NET AJAX: Understanding Ajax, Using Partial Refreshes, Using Progress Notification, Implementing Timed Refreshes, Working with the ASP.NET AJAX Control Toolkit	5		Black Board, Projector, PPT.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Ms. Binita Thakkar DEPARTMENT: IT

CLASS: T. Y. B. Sc. I. T –B SEMESTER: V MONTH: June-September ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

a. Work with various Linux OS commands

b. Work with configurations of various servers with Linux OS

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-IV Linux System Administration Unit -III	**Securing Server with iptables:** Understanding Firewalls, Setting Up a Firewall with system-config-firewall, Allowing Services, Trusted Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule, Configuration Example, Advanced iptables Configuration, Configuring Logging, The Limit Module, Configuring NAT	4	Red Hat Enterprise Linux 6 Administration By Sander van Vugt	Powerpoint presentation through projector
	Setting Up Cryptographic Services: Introducing SSL, Proof of Authenticity: the Certificate Authority, Managing Certificates with openssl, Creating a Signing Request, Working with GNU Privacy Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys, Encrypting Files with GPG, GPG Signing, Signing RPM Files	4		Powerpoint presentation through projector

	Configuring Server for File Sharing: What is NFS? Advantages and Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring Automount, Configuring Samba, Setting Up a Samba File Server, Samba Advanced Authentication Options, Accessing Samba Shares, Offering FTP Services.	4		Powerpoint presentation through projector

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: TYBSCIT SEMESTER:V

MONTH: **JUNE-SEPT** ACADEMIC YEAR:**2018-19**

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand fundanentals of project

Be familiar with diff methods and tools used for project management

Do the project planning,scheduling,costing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT501 Software Project Management UNIT-1	**Introduction to Software Project Management**:Introduction, Whyis Software Project Management Important? What is a Project?Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies,Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Successand Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus Modern Project Management Practices.	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Project Evaluation and Programme Management: Introduction, Business Case, Project Portfolio Management, Evaluation of Individual Projects, Cost–benefit Evaluation Techniques, Risk Evaluation, Programme Management,	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

	Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management.			
	An Overview of Project Planning :Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project Infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify Activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning	03	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
USIT501 Software Project Management UNIT-2	**Selection of an Appropriate Project Approach:**Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model.	06	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Software Effort Estimation: Introduction, Where are the Estimates Done? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottomup Estimating, The Top-down Approach and Parametric Models,Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II, COSMIC Full Function Points,COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of	06	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

	Thumb.			
USIT501 Software Project Management UNIT-3	**Activity Planning:** Introduction, Objectives of Activity Planning,When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating aNetwork Model, Adding the Time Dimension, The Forward Pass,Backward Pass, Identifying the Critical Path, Activity Float,Shortening the Project Duration, Identifying Critical Activities,Activity-on-Arrow Networks.	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for Dealing with Risk, RiskIdentification, Risk Assessment, Risk Planning, Risk Management,Evaluating Risks to the Schedule, Boehm"s Top 10 Risks and Counter Measures, Applying the PERT Technique, Monte Carlo Simulation,Critical Chain Concepts	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
USIT501 Software Project Management UNIT-4	**Monitoring and Control**: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM).	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance.	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

	Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns.	03	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
USIT501 Software Project Management UNIT-5	**Working in Teams:** Introduction, Becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Software Quality : Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability,Quality Plans.	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project CloseoutReport	02	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: BRIJESH YATINDRA JOSHI **DEPARTMENT: INFORMATION TECHNOLOGY**

CLASS: TYIT DIV - A SEMESTER: V MONTH: June to September ACADEMIC YEAR: 2018-2019

Learning Objectives

1. **Understand .NET Framework, Learn C # language , implementation of object oriented programming concepts using C# language**
2. **Understand the fundamentals of web form, learn to develop the .net application.**
3. **Understand various GUI controls and their use .**
4. **Understand the concept and implementation of error handling ,logging and tracing .**
5. **Understand the concept and implementation of state management , styles, themes and master pages**
6. **Understand the basics of ADO.Net and basics of Data binding and data controls**
7. **Understand various concepts in XML ,security fundamentals and ASP.NET AJAX**

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: June To Sept ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- To support for many industry standards and continues simplification of enterprise ready APIs.

The learners will be able to :

- To understand Java Enterprise edition with its different technologies.
- To understand Java EE architectural server and contains.
- To understand server side technology like Java Servlets with its API and life cycle.
- To make data base connectivity using JDBC.
- To navigate using request dispatcher interface.
- To understand state management using cookies and session.
- To understand how to upload and download the file.
- To be able to work with non-blocking I/O resources.
- To understand server side technology like Java Server Pages.
- To make use of action elements, implicit objects, expression language and JSTL.
- To understand enterprise bill, architectural and its bill.
- To be able to working with session beans and message driven beans.
- To understand interceptors and JNDI.
- To make use of ORM and JPA with its API.
- To understand writing JPA application.
- To be able to understand hibernate architectural and components.
- To understand writing hibernate application.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 Enterprise Java UNIT-I	**Understanding Java EE:** WhatisanEnterpriseApplication? Whatisjavaenterpriseedition? JavaEETechnologies, JavaEEevolution,Glassfishserver.	2	1. Java EE 7 For Beginners 2. Java EE 8 Cookbook: Build reliable applications with the most robust and mature technology for enterprise development 3. Advanced Java Programming	Black Board, Projector, PPT.
	JavaEE Architecture,Serverand Containers: TypesofSystemArchitecture, JavaEEServer, JavaEEContainers.	2		Black Board, Projector, PPT.
	Introduction to Java Servlets: TheNeedforDynamicContent, JavaServletTechnology, WhyServlets? WhatcanServletsdo?	2		Black Board, Projector, PPT.
	Servlet API and Lifecycle: JavaServletAPI, TheServletSkeleton, TheServletLifeCycle, ASimpleWelcomeServlet	2		
	WorkingwithServlets: GettingStarted, UsingAnnotationsInsteadofDeploymentDescriptor.	2		
	Working with Databases: WhatIsJDBC? JDBCArchitecture, AccessingDatabase, TheServletGUI and DatabaseExample.	2		
USIT506 Enterprise Java	**Request Dispatcher:** Resquestdispatcher Interface, Methods of Requestdispatcher, Requestdispatcher Application	2	1. Java EE 7 For Beginners	Black Board, Projector,

UNIT-II	**COOKIES:** KindsofCookies, WhereCookiesAreUsed? CreatingCookiesUsingServlet, DynamicallyChangingtheColorsofAPage	3	2. Java EE 8 Cookbook: Build reliable applications with the most robust and mature technology for enterprise development 3. Advanced Java Programming	PPT.
	SESSION: WhatAreSessions? LifecycleofHttpSession, SessionTrackingWithServletAPI, AServlet Session Example	2		
	Workingwith Files: UploadingFiles, CreatinganUploadFileApplication, DownloadingFiles, CreatingaDownloadFileApplication.	2		
	Workingwith Non-Blocking I/O: CreatingaNon-BlockingReadApplication, CreatingTheWeb Application, CreatingJavaClass, Creating Servlets, Retrieving The File, Creating index.jsp	3		
USIT506 Enterprise Java UNIT-III	**Introduction To Java ServerPages:** WhyuseJava ServerPages? DisadvantagesOfJSP, JSPv\sServlets, LifeCycleofaJSPPage, HowdoesaJSPfunction? HowdoesJSPexecute? AboutJava ServerPages	3	1. Java EE 7 For Beginners 2. Java EE 8 Cookbook: Build reliable applications with the most robust and mature technology for enterprise development 3. Advanced Java Programming	Black Board, Projector, PPT.
	Getting Started With Java ServerPages: Comments, JSPDocument,JSPElements, JSPGUIExample	2		
	Action Elements: IncludingotherFiles, ForwardingJSPPagetoAnotherPage, PassingParametersforotherActions, LoadingaJavabean.	2		
	Implicit Objects, Scopeand ElExpressions: ImplicitObjects, CharacterQuotingConventions, UnifiedExpressionLanguage[UnifiedEl], ExpressionLanguage.	3		
	Java Server Pages Standard Tag Libraries: WhatiswronginusingJSPScriptletTags?	2		

	HowJSTLFixesJSPScriptlet'sShortcomings? DisadvantagesOfJSTL, TagLibraries.			
USIT506 Enterprise Java UNIT-IV	**Introduction To EnterpriseJavabeans:** EnterpriseBeanArchitecture, BenefitsofEnterpriseBean, TypesofEnterpriseBean, AccessingEnterpriseBeans, EnterpriseBeanApplication, PackagingEnterpriseBeans	2	1. Java EE 7 For Beginners 2. Java EE 8 Cookbook: Build reliable applications with the most robust and mature technology for enterprise development 3. Advanced Java Programming	Black Board, Projector, PPT.
	Workingwith Session Beans: WhentouseSessionBeans? TypesofSessionBeans, RemoteandLocalInterfaces, AccessingInterfaces, LifecycleofEnterpriseBeans, PackagingEnterpriseBeans, Exampleof StatefulSessionBean, Example ofStatelessSessionBean, Example of SingletonSessionBeans.	3		
	Working with Message DrivenBeans: LifecycleofaMessageDrivenBean, UsesofMessageDrivenBeans, TheMessage DrivenBeansExample.	2		
	Interceptors: Request andInterceptor, Defining An Interceptor, AroundInvokeMethod, ApplyingInterceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application.	2		
	Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.	3		
USIT506 Enterprise Java UNIT-V	**Persistence, Object/Relational Mapping And JPA:** WhatisPersistence? PersistenceinJava,Current Persistence Standards in Java, Why an other Persistence Standards? Object/RelationalMapping,	2	1. Java EE 7 For Beginners 2. Java EE 8 Cookbook: Build reliable applications with the	Black Board, Projector, PPT.
	Introduction to JavaPersistence API: TheJavaPersistenceAPI, JPA,ORM,DatabaseandtheApplication, ArchitectureofJPA, HowJPAWorks? JPA Specifications.	2		

	Writing JPA Application: ApplicationRequirementSpecifications, SoftwareRequirements, TheApplicationDevelopmentApproach, CreatingDatabaseandTablesinMysql, creatingaWebApplication, AddingtheRequiredLibraryFiles, creatingaJavabeanClass, CreatingPersistenceUnit[Persistence.Xml], CreatingJSPS, TheJPAApplicationStructure, RunningtheJPAApplication.	3	most robust and mature technology for enterprise development 3. Advanced Java Programming	
	Introduction to Hibernate: WhatisHibernate? WhyHibernate? Hibernate,DatabaseandTheApplication, ComponentsofHibernate, ArchitectureofHibernate, HowHibernateWorks?	2		
	WritingHibernateApplication: ApplicationRequirementSpecifications, SoftwareRequirements, TheApplicationDevelopmentApproach, CreatingDatabaseandTablesinMysql, creatingaWebApplication, AddingtheRequiredLibraryFiles, creatingaJavabeanClass, CreatingHibernateConfigurationFile, AddingaMappingClass, CreatingJSPS, RunningTheHibernateApplication.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS: T.Y. BSc (IT) DIV-C SEMESTER:SEM -5 MONTH: JUN-SEPT ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand what is a The Internet of Things and its applications .
- Introduction of Prototyping the Physical Design and online design.
- Understand different techniques of Prototyping.
- Learn the concept of automation.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT502 Internet Of Things UNIT 1	**The Internet of Things:** An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	Black board and chalk , Projector
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	4		
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses,	4		

	DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols.			
USIT502 Internet Of Things UNIT 2	**Thinking About Prototyping**: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation	4	1.Designing the Internetof Things Adrian McEwen, Hakim Cassimally WILEY First 2014 , 2.Internet of Things – Architecture and Design Raj Kamal McGraw Hill First 201	Black board and chalk, Projector
	Climbing into the Cloud Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community	4		
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness	4		
USIT502 Internet Of Things	**Prototyping the Physical Design:** Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling.	5	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	Black board and chalk, Projector

UNIT 3	**Prototyping Online Components**: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further	3		
	Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol.	4		
USIT502 Internet Of Things UNIT 4	**Techniques for Writing Embedded Code:** Memory Management,Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging.	5	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014 www.tutorialspoint.com	Black board and chalk, Projector
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models	3		
	Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	4		
USIT502	**Moving to Manufacture:** What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design	5	1.DesigningtheInternetof Things Adrian McEwen, Hakim Cassimally WILEY First 2014 ,	Black board and chalk, Projector

Internet Of Things UNIT 5	Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures.		2.Getting Started with Raspberry Pi Matt Richardson and Shawn Wallace SPD Third 2016	
	Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	3		
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition	4

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**T.Y.B SC(IT)-C**_____ SEMESTER: ____**V**_____ MONTH: _____ _____**JUNE-SEPTEMBER** _____ ACADEMIC YEAR: _____**2018-2019**_____

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand the background of Red Hat Linux administration as an operating system.**
- **How to work with various commands and their implementation in Linux bash shell system.**
- **To understand basic management tasks, administrative tasks and managing different services with RPM.**
- **Helps to make you configure and install the software, working with the networks and creation of users, groups and permissions in system.**
- **To make you understand the security concept of the system and cryptographic services.**
- **It also make you understand how to configure and to install different servers(FTP, Mail services, DHCP, Samba etc.) and to enable its services and to provide client server architecture working.**
- **Helps to create clusters and provide better understanding of shell scripting.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-04 (USIT505) **Linux System**	**Introduction to Red Hat Enterprise Linux:** Linux, Open Source and Red Hat, Origins of Linux, Distributions, Duties of Linux System Administrator.	01	Red Hat Enterprise Linux 6 Administration By	Textbook, Blackboard, Chalk and Duster.

Administration **Unit No -01**	**Command Line:** Working with the Bash Shell, Getting the Best of Bash, Useful Bash Key Sequences, Working with Bash History, Performing Basic File System Management Tasks, Working with Directories, Piping and Redirection, Finding Files	04	Sander van Vugt , John Wiley and Sons	Textbook, Blackboard, Chalk and Duster, Projector, Laptop, PPTs.
	System Administration Tasks: Performing Job Management Tasks, System and Process Monitoring and Management, Managing Processes with ps, Sending Signals to Processes with the kill Command, Using top to Show Current System Activity, Managing Process Niceness, Scheduling Jobs, Mounting Devices, Working with Links, Creating Backups, Managing Printers, Setting Up System Logging, Setting Up Rsyslog, Common Log Files, Setting Up Logrotate	04		Projector, Laptop, PPTs.
	Managing Software: Understanding RPM, Understanding Meta Package Handlers, Creating Your Own Repositories, Managing Repositories, Installing Software with Yum, Querying Software, Extracting Files from RPM Packages	03		Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -02	**Configuring and Managing Storage:** Understanding Partitions and Logical Volumes, Creating Partitions, Creating File Systems, File Systems Overview, Creating File Systems, Changing File System Properties, Checking the File System Integrity, Mounting File Systems Automatically Through fstab, Working with Logical Volumes, Creating Logical Volumes, Resizing Logical Volumes, Working with Snapshots, Replacing Failing Storage Devices, Creating Swap Space, Working with Encrypted	04	Red Hat Enterprise Linux 6 Administration By Sander van Vugt , John Wiley and	Projector, Laptop, PPTs.

	Volumes .		Sons	
	Connecting to the Network: Understanding NetworkManager, Working with Services and Runlevels, Configuring the Network with NetworkManager, Working with system-config-network, NetworkManager Configuration Files, Network Service Scripts, Networking from the Command Line, Troubleshooting Networking, Setting Up IPv6, Configuring SSH, Enabling the SSH Server, Using the SSH Client, Using PuTTY on Windows Machines, Configuring Key-Based SSH Authentication, Using Graphical Applications with SSH, Using SSH Port Forwarding, Configuring VNC Server Access	04		Projector, Laptop, PPTs.
	Working with Users, Groups, and Permissions: Managing Users and Groups, Commands for User Management, Managing Passwords, Modifying and Deleting User Accounts, Configuration Files, Creating Groups, Using Graphical Tools for User, and Group Management, Using External Authentication Sources, the Authentication Process, sssd, nsswitch, Pluggable Authentication Modules, Managing Permissions, the Role of Ownership, Basic Permissions: Read, Write, and Execute, Advanced Permissions, Working with Access Control Lists, Setting Default Permissions with umask, Working with Attributes	04		Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -03	**Securing Server with iptables:** Understanding Firewalls, Setting Up a Firewall with system-config-firewall, Allowing	04	Red Hat	Projector, Laptop,

	Services, Trusted Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule, Configuration Example, Advanced iptables Configuration, Configuring Logging, The Limit Module, Configuring NAT		Enterprise Linux 6 Administration By Sander van Vugt , John Wiley and Sons	PPTs.
	Setting Up Cryptographic Services: Introducing SSL, Proof of Authenticity: the Certificate Authority, Managing Certificates with openssl, Creating a Signing Request, Working with GNU Privacy Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys, Encrypting Files with GPG, GPG Signing, Signing RPM Files	04		Projector, Laptop, PPTs.
	Configuring Server for File Sharing: What is NFS? Advantages and Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring Automount, Configuring Samba, Setting Up a Samba File Server, Samba Advanced Authentication Options, Accessing Samba Shares, Offering FTP Services.	04		Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -04	**Configuring DNS and DHCP:** Introduction to DNS, The DNS Hierarchy, DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server	04	Red Hat Enterprise Linux 6 Administration By Sander van Vugt ,	Projector, Laptop, PPTs.

	Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, Configuring Dovecot for POP and IMAP	03	John Wiley and Sons	Projector, Laptop, PPTs.
	Configuring Apache on Red Hat Enterprise Linux: Configuring the Apache Web Server, Creating a Basic Website, Understanding the Apache Configuration Files, Apache Log Files, Working with Virtual Hosts, Securing the Web Server with TLS Certificates, Configuring Authentication, Setting Up Authentication with .htpasswd, Configuring LDAP Authentication, Setting Up MySQL	05		Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -05	**Introducing Bash Shell Scripting:** Introduction, Elements of a Good Shell Script, Executing the Script, Working with Variables and Input, Understanding Variables, Variables, Subshells, and Sourcing, Working with Script Arguments, Asking for Input, Using Command Substitution, Substitution Operators, Changing Variable Content with Pattern Matching, Performing Calculations, Using Control Structures, Using if...then...else, Using case, Using while, Using until, Using for, Configuring booting with GRUB.	03	Red Hat Enterprise Linux 6 Administration By Sander van Vugt , John Wiley and Sons	Textbook, Blackboard, Chalk and Duster, Projector, Laptop, PPTs.
	High-Availability Clustering: High-Availability Clustering, The Workings of High Availability, High-Availability Requirements, Red Hat High-Availability Add-on Software, Components, Configuring Cluster-Based Services, Setting Up Bonding, Setting Up Shared Storage, Installing the Red Hat High	05		Projector, Laptop, PPTs.

	Availability Add-On, Building the Initial State of the Cluster, Configuring Additional Cluster Properties, Configuring a Quorum Disk, Setting Up Fencing, Creating Resources and Services, Troubleshooting a Nonoperational Cluster, Configuring GFS2 File Systems			
	Setting Up an Installation Server: Configuring a Network Server as an Installation Server, Setting Up a TFTP and DHCP Server for PXE Boot, Installing the TFTP Server, Configuring DHCP for PXE Boot, Creating the TFTP PXE Server Content, Creating a Kickstart File, Using a Kickstart File to Perform an Automated, Installation, Modifying the Kickstart File with, system-config-kickstart, Making Manual Modifications to the Kickstart File	04		Projector, Laptop, PPTs.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Prof Sandesh Akre DEPARTMENT: Information technology CLASS: TYIT

SEMESTER: V MONTH: June ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Learn Software Development Methodology
- Conceptual Software development Approaches
- Different development techniques

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT501 Software Project Management Unit 1	Introduction to Software Project Management: Introduction, Whyis Software Project Management Important? What is a Project? Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Success and Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus	12	Software Project Management Bob Hughes, MikeCotterell, Rajib Mall	Chalk and Board

Unit 2	Modern Project Management Practices. Project Evaluation and Programme Management: Introduction, Business Case, Project Portfolio Management, Evaluation of Individual Projects, Cost–benefit Evaluation Techniques, Programme Management, Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management. An Overview of Project Planning : Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning			
	Selection of an Appropriate Project Approach: Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid	12	Software Project Management Bob Hughes, MikeCotterell, Rajib Mall	Chalk and Board

Unit 3	Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model. Software Effort Estimation: Introduction, Where are the EstimatesDone? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottom- up Estimating, The Top-down Approach and Parametric Models, Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II, COSMIC Full Function Points, COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb.			
	Activity Planning: Introduction, Objectives of Activity Planning, When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating a Network Model, Adding the Time Dimension, The Forward Pass, Backward Pass, Identifying the Critical Path, Activity Float, Shortening the Project Duration, Identifying Critical Activities, Activity-on-Arrow Networks. Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for Dealing with Risk, Risk Identification, Risk Assessment,	12	Software Project Management Bob Hughes, MikeCotterell, Rajib Mall	Chalk and Board

Unit 4	Risk Planning, Risk Management, Evaluating Risks to the Schedule, Boehm's Top 10 Risks and Counter Measures, Applying the PERT Technique, Monte Carlo Simulation, Critical Chain Concepts. Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence.			
Unit 5	Monitoring and Control: Introduction, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM). Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms Management, Acceptance. Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns.	12	Software Project Management Bob Hughes, MikeCotterell, Rajib Mall	Chalk and Board
	Working in Teams: Introduction, Becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership.	12	Software Project Management Bob Hughes, MikeCotterell,	Chalk and Board

	Software Quality : Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability, Quality Plans. Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project Closeout Report.		Rajib Mall

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: TYIT DIV-B

SEMESTER: V MONTH: JUNE- SEPTEMBER ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Able to understand the application areas of IOT ·
- Able to realize the revolution of Internet in Mobile Devices, Cloud & Sensor Networks ·
- Able to understand building blocks of Internet of Things and characteristics

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT502, Internet of Things Unit 1	The Internet of Things: An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	03	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, Powerpoint
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	04	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses, DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other	03	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

	Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols			
USIT502, Internet of Things **Unit 2**	Thinking About Prototyping: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation, climbing into the Cloud, Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
USIT502, Internet of Things **Unit 3**	Prototyping the Physical Design: Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Prototyping Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

USIT502, Internet of Things **Unit 4**	Techniques for Writing Embedded Code: Memory Management, 12 8 Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging.	04	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	06	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
USIT502, Internet of Things **Unit 5**	Moving to Manufacture: What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

NAME OF THE STAFF: **SUJITHA MOHAN** DEPARTMENT: **B.Sc.I.T**

CLASS: **FYIT A** SEMESTER: **I** MONTH: **July-Oct** ACADEMIC YEAR: **2018-2019**

LEARNING OBJECTIVES:
The learners will be able to :

- Understand the Business Communication strategies and its importance.
- Also the paper acts like a personality development course for the student.
- Also the students gets confidence in facing the problems faced during interviews.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
V,1, Communication Skills	The Seven Cs of Effective Communication: Completeness, Conciseness, Consideration, Concreteness, Clarity, Courtesy, Correctness	4	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster
	Understanding Business Communication: Nature and Scope of Communication, Non-verbal Communication,	4	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster
	Cross-cultural communication, Technology-enabled Business Communication	4	Business Communication Edited by Meenakshi Raman and	Chalk and Duster

V,2, Communication Skills	Writing Business Messages and Documents: Business writing, Business Correspondence, Instructions Business Reports and Proposals,	5	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster
	Career building and Resume writing, Developing Oral Communication Skills for Business: Effective Listening, Business Presentations and Public Speaking,	5	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster
	Conversations, Interviews	2	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster
V,3, Communication Skills	Developing Oral Communication Skills for Business: Meetings and Conferences,	5	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster
	Group Discussions and Team Presentations, Team Briefing,	5	Business Communication Edited by Meenakshi Raman and Prakash Singh	Chalk and Duster
	Understanding Specific Communication Needs: Communication across Functional Areas	2	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster

V,4, Communication Skills	Understanding Specific Communication Needs: Corporate Communication, Persuasive Strategies in Business Communication	6	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster
	Ethics in Business Communication, Business Communication Aids	4	Business Communication Edited by Meenakshi Raman and Prakash Singh Oxford University Press Second	Chalk and Duster
V,5, Communication Skills	Presentation Process: Planning the resentations, executing the presentations, Impressing the audience by performing,	4	Strategies for improving your business communication Prof. M. S. Rao Shroff publishers and distributors	Chalk and Duster
	Planning stage: Brainstorming, mind maps / concept maps, executing stage: chunking theory, creating outlines, Use of templates. Adding graphics to your presentation: Visual communication, Impress stage: use of font, colour, layout, Importance of practice and performance.	4	Strategies for improving your business communication Prof. M. S. Rao Shroff publishers and distributors	Chalk and Duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SURBHI SHAH DEPARTMENT: IT-CS CLASS:FYIT-DIV A SEMESTER: SEM-1

MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S: The learners will be able to learn and understand the basic concepts of digital electronics with its applications and various laws to be implemented in area of electronics.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper no :2 Title of paper: - Digital Electronics UNIT 1	**Number System:** Analog System, digital system, numbering system, binary number system, octal number system, hexadecimal number system, conversion from one number system to another, floating point numbers	4	Digital Electronics and Logic Design By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	Reference book,chalk and blackboard,
	weighted codes binary coded decimal, non-weighted codes Excess – 3 code, Gray code, Alphanumeric codes – ASCII Code, EBCDIC, ISCII Code, Hollerith Code, Morse Code, Teletypewriter (TTY)	3		
	Error detection and correction, Universal Product Code, Code conversion.	1		
	Binary Arithmetic Binary addition, Binary subtraction, Negative number representation, Subtraction using 1's complement and 2's complement	2		
	Binary multiplication and division, Arithmetic in octal number system, Arithmetic in hexadecimal number system BCD and Excess – 3 arithmetic	2		
UNIT 2	**Boolean Algebra and Logic Gates:-**Introduction, Logic (AND OR NOT), Boolean theorems, Boolean Laws, De Morgan's Theorem,	3	Digital Electronics and Logic Design	Reference book,chalk and blackboard,

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Perfect Induction, Reduction of Logic expression using BooleanAlgebra,		By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	
	Deriving Boolean expression from given circuit, exclusive OR and Exclusive NOR gates, Universal Logic gates,	2		
	Implementation of other gates using universal gates, Input bubbled logic, Assertion level	1		
	Minterm, Maxterm and Karnaugh Maps: Introduction, minterms and sum of minterm form, maxterm and Product of maxterm form, Reduction technique using Karnaugh maps – 2/3/4/5/6 variable K-maps Grouping of variables in K-maps, K-maps for product of sum form, minimize Boolean expression using K-map and obtain K-map from Boolean expression, Quine Mc Cluskey Method.	6		
UNIT 3	**Combinational Logic Circuits:** Introduction, Multi-input, multi-output Combinational circuits, Code converters design and implementations	4	Digital Electronics: Principles, Devices and Applications by Anil K. Maini	Reference book,chalk and blackboard,
	Arithmetic Circuits: Introduction, Adder, BCD Adder, Excess – 3 Adder, Binary Subtractors, BCD Subtractor, Multiplier, Comparator.	4		
Unit 4	**Multiplexer, Demultiplexer, ALU, Encoder and Decoder:** Introduction, Multiplexer, Demultiplexer, Decoder, ALU, Encoders.	4	Modern Digital Electronics - R. P. Jain	Reference book,chalk and blackboard,
	Sequential Circuits: Flip-Flop: Introduction, Terminologies used, S-R flip-flop, D flip-fop, JK flip-flop, Race-around condition, Master – slave JK flip-flop, T flip-flop	4		
	conversion from one type of flip-flop to another, Application of flip-flops	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 5	**Counters:** Introduction, Asynchronous counter, Terms related to counters, IC 7493 (4-bit binary counter), Synchronous counter,	3	Modern Digital Electronics - R. P. Jain	Reference book,chalk and blackboard,
	Bushing, Type T Design, Type JK Design, Presettable counter, IC 7490, IC 7492, Synchronous counter ICs, Analysis of counter circuits	4		
	Shift Register: Introduction, parallel and shift registers, serial shifting, serial–in serial–out, serial–in parallel–out , parallel–in parallel–out,	3		
	Ring counter, Johnson counter, Applications of shift registers,	1		
	Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters.	1

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT:CS

CLASS:FYIT-DIV A SEMESTER: SEM-1 MONTH: JUL-OCT ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: develop logics which will help them to create programs, applications in C. Also by learning the basic programming constructs they can easily switch over to any other language in future.

PAPER, TITLE, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1,Imperative programming, UNIT 1	**Introduction**: Types of Programming languages, History, features and application. Simple program logic, program development cycle	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	pseudocode statements and flowchart symbols, sentinel value to end a program, programming and user environments, evolution of programming models., desirable program characteristics	3		
	Fundamentals: Structure of a program. Compilation and Execution of a Program,Character Set, identifiers and keywords, data types	3		

	constants, variables and arrays, declarations, expressions, statements, Variable definition, symbolic constants	3		
UNIT 2	**Operators and Expressions:** Arithmetic operators, unary operators, relational and logical operators	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	assignment operators, assignment operators, the conditional operator, library functions.	3		
	Data Input and output: Single character input and output, entering input data	2		
	scanf function, printf function, gets and puts functions, interactive programming	3		
Unit 3	**Conditional Statements and Loops:** Decision Making Within AProgram,Conditions, Relational Operators, Logical Connectives, If Statement, If-Else Statement.	3	Let us c-by Yashwant kanetkar	BLACK BOARD AND CHALK

	Loops: While Loop, Do While, For Loop. Nested Loops, Infinite Loops,Switch Statement	4		
	Functions: Overview, defining a function, accessing a function, passing arguments to a function, specifying argument data types, function prototypes,recursion, modular programming and functions, standard library of c functions	3		
	prototype of a function: foo1lal parameter list, return type,function call, block structure, passing arguments to a function: call by reference,call by value	3		
UNIT 4	**Program structure:** Storage classes, automatic variables, external variables, static variables,multifile programs	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	more library functions,Preprocessor: Features, #define and #include, Directives and Macros	3		
	Arrays: Definition, processing, passing arrays to functions, multidimensional arrays, arrays and strings.	4		

Unit 5	**Pointers:** Fundamentals, declarations, Pointers Address Operators, Pointer Type Declaration, Pointer Assignment, Pointer Initialization.	3	Let us c-by Yashwant kanetkar	BLACK BOARD AND CHALK
	Pointer Arithmetic, Functions and Pointers, Arrays And Pointers, Pointer Arrays, passing functions to other functions	3		
	Structures and Unions: Structure Variables, Initialization, Structure Assignment, Nested Structure, Structures and Functions,	3		
	Structures and Arrays: Arrays of Structures, Structures Containing Arrays, Unions, Structures and pointer	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: FYIT-DIV A SEMESTER: I MONTH: JULY-OCT ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: Develop basic understanding of Operating System, the concept of Memory management, File System, I/O System, Deadlock. Also they will be able to know new concepts like virtualization and cloud computing. Finally through case studies they can have practical knowledge on present day OS.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT103 Operating Systems I	**Introduction:** What is an operating system? History of operating system, computer hardware.	3	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk
	Different operating systems, operating system concepts, system calls, operating system structure.	3		
	Processes and Threads: Processes, Threads, Interprocess-communication.	3		
	Scheduling, IPC problems.	3		
II	**Memory Management**: No memory abstraction, memory abstraction: address spaces, virtual memory.	2	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk
	Page Replacement Algorithms, design issues for paging systems, implementation issues and segmentation.	4		
	File Systems: Files, directories, file system implementation, file-system management and optimization.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	MS-DOS file system, UNIX V7 file system, CD ROM file system.	3		
III	**Input-Output:** Principles of I/O hardware, Principles of I/O software, I/O software layers.	3	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk
	disks, clocks, user interfaces: keyboard, mouse, monitor, thin clients, power management Resources.	3		
	Deadlocks: Introduction to deadlocks, the ostrich algorithm, deadlock detection and recovery.	3		
	Deadlock avoidance, deadlock prevention, issues.	3		
IV	**Virtualization and cloud**: History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization.	3	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk
	Hypervisor microkernels, memory virtualization, I/O virtualization, Virtual appliances.	3		
	Virtual machines on multicore CPUs, Clouds.	2		
	Multiple Processor System: Multiprocessors, multicomputer, distributed systems.	4		
V	**Case Study on LINUX and ANDROID:** History of Unix and Linux, Linux Overview, Processes in Linux, Memory management in Linux, I/O in Linux, Linux file system, security in Linux.	4	Modern Operating Systems by Andrew S. Tanenbaum	Blackboard & chalk, PowerPoint Presentation
	Android	2		
	Case Study on Windows: History of windows through Windows 10, programming windows, system structure, processes and threads in windows.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Memory management, caching in windows, I/O in windows, Windows NT file system, Windows power management, Security in windows.	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SURBHI SHAH DEPARTMENT: IT-CS CLASS:FYIT-DIV B SEMESTER: SEM-1

MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S: The learners will be able to learn and understand the basic concepts of digital electronics with its applications and various laws to be implemented in area of electronics.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper no :2 Title of paper: - Digital Electronics UNIT 1	**Number System:** Analog System, digital system, numbering system, binary number system, octal number system, hexadecimal number system, conversion from one number system to another, floating point numbers	4	Digital Electronics and Logic Design By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	Reference book,chalk and blackboard,
	weighted codes binary coded decimal, non-weighted codes Excess – 3 code, Gray code, Alphanumeric codes – ASCII Code, EBCDIC, ISCII Code, Hollerith Code, Morse Code, Teletypewriter (TTY)	3		
	Error detection and correction, Universal Product Code, Code conversion.	1		
	Binary Arithmetic Binary addition, Binary subtraction, Negative number representation, Subtraction using 1's complement and 2's complement	2		
	Binary multiplication and division, Arithmetic in octal number system, Arithmetic in hexadecimal number system BCD and Excess – 3 arithmetic	2		
UNIT 2	**Boolean Algebra and Logic Gates:-**Introduction, Logic (AND OR NOT), Boolean theorems, Boolean Laws, De Morgan's Theorem,	3	Digital Electronics and Logic Design	Reference book,chalk and blackboard,

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Perfect Induction, Reduction of Logic expression using BooleanAlgebra,		By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	
	Deriving Boolean expression from given circuit, exclusive OR and Exclusive NOR gates, Universal Logic gates,	2		
	Implementation of other gates using universal gates, Input bubbled logic, Assertion level	1		
	Minterm, Maxterm and Karnaugh Maps: Introduction, minterms and sum of minterm form, maxterm and Product of maxterm form, Reduction technique using Karnaugh maps – 2/3/4/5/6 variable K-maps Grouping of variables in K-maps, K-maps for product of sum form, minimize Boolean expression using K-map and obtain K-map from Boolean expression, Quine Mc Cluskey Method.	6		
UNIT 3	**Combinational Logic Circuits:** Introduction, Multi-input, multi-output Combinational circuits, Code converters design and implementations	4	Digital Electronics: Principles, Devices and Applications by Anil K. Maini	Reference book,chalk and blackboard,
	Arithmetic Circuits: Introduction, Adder, BCD Adder, Excess – 3 Adder, Binary Subtractors, BCD Subtractor, Multiplier, Comparator.	4		
Unit 4	**Multiplexer, Demultiplexer, ALU, Encoder and Decoder:** Introduction, Multiplexer, Demultiplexer, Decoder, ALU, Encoders.	4	Modern Digital Electronics - R. P. Jain	Reference book,chalk and blackboard,
	Sequential Circuits: Flip-Flop: Introduction, Terminologies used, S-R flip-flop, D flip-fop, JK flip-flop, Race-around condition, Master – slave JK flip-flop, T flip-flop	4		
	conversion from one type of flip-flop to another, Application of flip-flops	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 5	**Counters:** Introduction, Asynchronous counter, Terms related to counters, IC 7493 (4-bit binary counter), Synchronous counter,	3	Modern Digital Electronics - R. P. Jain	Reference book,chalk and blackboard,
	Bushing, Type T Design, Type JK Design, Presettable counter, IC 7490, IC 7492, Synchronous counter ICs, Analysis of counter circuits	4		
	Shift Register: Introduction, parallel and shift registers, serial shifting, serial–in serial–out, serial–in parallel–out , parallel–in parallel–out,	3		
	Ring counter, Johnson counter, Applications of shift registers,	1		
	Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters.	1

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT: CS

CLASS:FYIT-DIV B SEMESTER: SEM-1 MONTH: JUL-OCT ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: develop logics which will help them to create programs, applications in C. Also by learning the basic programming constructs they can easily switch over to any other language in future.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 1 IP UNIT 1	**Introduction**: Types of Programming languages, History, features and application. Simple program logic, program development cycle	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	pseudocode statements and flowchart symbols, sentinel value to end a program, programming and user environments, evolution of programming models., desirable program characteristics	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Fundamentals: Structure of a program. Compilation and Execution of a Program,Character Set, identifiers and keywords, data types	3		
	constants, variables and arrays, declarations, expressions, statements, Variable definition, symbolic constants	3		
UNIT 2	**Operators and Expressions:** Arithmetic operators, unary operators, relational and logical operators	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	assignment operators, assignment operators, the conditional operator, library functions.	3		
	Data Input and output: Single character input and output, entering input data	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	scanf function, printf function, gets and puts functions, interactive programming	3		
UNIT 4	**Program structure:** Storage classes, automatic variables, external variables, static variables,multifile programs	3	Let us c-by Yashwant Kanetkar	BLACK BOARD AND CHALK
	more library functions,Preprocessor: Features, #define and #include, Directives and Macros	3		
	Arrays: Definition, processing, passing arrays to functions, multidimensional arrays, arrays and strings.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:FYIT-DIV B SEMESTER: SEM-I MONTH: JUL-SEP ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to: Understand role of Operating System in terms of process, memory, file and I/O management. Apply and analysis the concept of a process, thread, mutual exclusion and deadlock. Evaluate performance of process scheduling algorithms and IPC. Apply and analysis the concepts of memory management techniques. Apply and analyze different techniques of file and I/O management.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-3, OS, UNIT-1	**Introduction:** What is an operating system? History of operating system, computer hardware, different operating systems, operating system concepts, system calls, operating system structure.	4	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	Blackboard & Chalk
	Processes and Threads: Processes, threads	4		
	Interprocess communication, scheduling, IPC problems.	4		

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

UNIT-2	**Memory Management**: No memory abstraction, memory abstraction: address spaces, virtual memory	3	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	Blackboard & Chalk
	page replacement algorithms, design issues for paging systems, implementation issues, segmentation.	3		
	File Systems: Files, directories, file system implementation, file-system management and optimization	4		
	MS-DOS file system, UNIX V7 file system, CD ROM file system.	2		
UNIT-3	**Input-Output:** Principles of I/O hardware, Principles of I/O software	4	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	Blackboard & Chalk
	I/O software layers, disks, clocks,user interfaces: keyboard, mouse, monitor, thin clients, power management	3		
	Deadlocks: Resources, introduction to deadlocks, the ostrich algorithm,	2		
	deadlock detection and recovery, deadlock avoidance, deadlock prevention, issues.	3		
UNIT-4	**Virtualization and Cloud**: History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization, hypervisor microkernels	2		

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	memory virtualization, I/O virtualization, Virtual appliances, virtual machines on multicore CPUs, Clouds.	2	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	Blackboard & Chalk

NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **SUJITHA MOHAN** DEPARTMENT: **B.Sc.I.T**

CLASS: **FYIT C** SEMESTER: **I** MONTH: **July-Oct** ACADEMIC YEAR: **2018-2019**

LEARNING OBJECTIVES:
The learners will be able to :

- Understand the basics concept of Digital circuit which includes MUX, DEMUX, Flip flops, counters etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II,4, Digital Electronics	Multiplexer, Demultiplexer, ALU, Encoder and Decoder: Introduction, Multiplexer, Demultiplexer, Decoder, ALU, Encoders	4	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Chalk and Duster
	Sequential Circuits: Flip-Flop: Introduction, Terminologies used, S-R flip-flop, D flip-fop	4	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Chalk and Duster
	JK flipflop, Race-around condition, Master – slave JK flip-flop, T flip-flop, conversion from one type of flip-flop to another, Application of flipflops.	4	Digital Principles and Applications Malvino and Leach Tata McGraw Hill	Chalk and Duster
II,5, Digital Electronics	Counters:	3	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Chalk and Duster

	Introduction, Asynchronous counter, Terms related to counters, IC7493 (4-bit binary counter),			
	Synchronous counter, Bushing, Type T Design, Type JK Design, Presettable counter, IC 7490, IC 7492, Synchronous counter ICs, Analysis of counter circuits.	3	Digital Principles and Applications Malvino and Leach Tata McGraw Hill	Chalk and Duster
	Shift Register: Introduction, parallel and shift registers, serial shifting, serial–in serial–out, serial–in parallel–out , parallel–in parallel–out,	2	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Chalk and Duster
	Ring counter, Johnson counter, Applications of shift registers, Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters.	2	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Chalk and Duster
	Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters.	2	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Chalk and Duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ____ HEMANT WANI_ DEPARTMENT: _____BSC-IT___ CLASS: __FYIT___ SEMESTER: ___I_____

MONTH: ____July to October_____ ACADEMIC YEAR: ____2018-19__

LEARNING OBJECTIVE/S:
The learners will be able to:

Think analytically, creatively and critically in developing robust, extensible and highly maintainable technological solutions to simple and complex problems. To apply their knowledge and skills to be employed and excel in IT professional careers and/or to continue their education in IT and/or related post graduate programs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Imperative Programming USIT101 Unit 1	**Introduction**: Types of Programming languages, History, features and application. Simple program logic, program development cycle, pseudocode statements and flowchart symbols sentinel value to end a program Evolution of programming models., desirable program characteristics. Fundamentals: Structure of a program. Compilation and Execution of a Program,Character Set, identifiers and keywords, data types, constants, variables	3 3 2 4	Yashwant Kanetkar 'Let us C'	Chalk, Blackboard

	and arrays, declarations, expressions, statements, Variable definition, symbolic constants			
Imperative Programming USIT101 Unit 2	**Operators and Expressions:** Arithmetic operators, unary operators, relational and logical operators, assignment operators, assignment operators, the conditional operator, library functions. **Data Input and output:** Single character input and output, entering input data, scanf function, printf function, gets and puts functions, interactive programming.	4 4 2 2	Yashwant Kanetkar 'Let us C'	Chalk, Blackboard
Imperative Programming USIT101 Unit 3	**Conditional Statements and Loops:** Decision Making Within a Program, Conditions, Relational Operators, Logical Connectives, If Statement, If-Else Statement, Loops: While Loop, Do While, For Loop. Nested Loops, Infinite Loops, Switch statement **Functions:**	4 3 2	Yashwant Kanetkar 'Let us C'	Chalk, Blackboard

	Overview, defining a function, accessing a function, passing arguments to a function, specifying argument data types, function prototypes Recursion, modular programming and functions, standard library of c functions, prototype of a function: foo1lal parameter list, return type, function call, block structure, passing arguments to a function: call by reference, call by value.	3		
Imperative Programming USIT101 Unit 4	**Program structure:** Storage classes, automatic variables, external variables, static variables, multifile program Library functions, Preprocessor: Features, #define and #include, Directives and Macros **Arrays:** Definition, processing, passing arrays to functions, multidimensional arrays, arrays and strings.	3 3 2 4	Yashwant Kanetkar 'Let us C'	Chalk, Blackboard
Imperative Programming USIT101 Unit 5	**Pointers:** Fundamentals, declarations, Pointers Address Operators, Pointer Type Declaration, Pointer Assignment, Pointer Initialization	3 3 2	Yashwant Kanetkar 'Let us C'	Chalk, Blackboard

	Arithmetic, Functions and Pointers, Arrays And Pointers, Pointer Arrays, passing functions to other functions **Structures and Unions**: Structure Variables, Initialization, Structure Assignment, Nested Structure, Structures and Functions, Structures and Arrays: Arrays of Structures, Structures Containing Arrays, Unions, Structures and pointers.	4

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: FY BSC IT SEMESTER: I MONTH: JUL-OCT ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

The learners will be able to:

1. Learners must understand proper working of operating system.
2. To provide a sound understanding of Computer operating system, its structures, functioning and algorithms.
3. To provide a understanding of operating system, its structures and functioning.
4. Develop and master understanding of algorithms used by operating systems for various purposes.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3 OS UNIT 1	What is an operating system? History of operating system, computer hardware, different operating systems	2	Modern Operating Systems by Andrew S. Tanenbaum, Herbert Bos	Black board and chalk
	Operating system concepts, system calls, operating system structure	3		
	Processes, threads	4		
	Interprocess communication, scheduling, IPC problem	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 4	History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization.	3	Modern Operating Systems by Andrew S. Tanenbaum, Herbert Bos	Black board , chalk & PowerPoint Presentation
	Hypervisor microkernels, memory virtualization, I/O virtualization, Virtual appliances.	3		
	Virtual machines on multicore CPUs, Clouds.	2		
	Multiprocessors, multicomputer, distributed systems.	4		
UNIT 5	History of Unix and Linux, Linux Overview, Processes in Linux, Memory management in Linux, I/O in Linux.	3	Modern Operating Systems by Andrew S. Tanenbaum, Herbert Bos	Black board and chalk
	Linux file system, security in Linux. Android, History of windows through Windows 10, programming windows.	3		
	System structure, processes and threads in windows, Memory management, caching in windows, I/O in windows.	3		
	Windows NT file system, Windows power management, Security in windows.	3

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**SY.B SC(IT)-A**_____SEMESTER: ____**III**_____MONTH: _____**JUNE-SEPTEMBER**_____ ACADEMIC YEAR:_____**2018-2019**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

- **Understand the concept of data structure and how it is stored.**
- **The varieties of symbols used to store data, analysis on data, algorithms used to reduce the complexity regarding time, space and programs can be understood.**
- **Understanding the concept of Arrays and operations on array, Stack and Queue and variation of operation on them.**
- **To make understand applications where it is used, advantages and disadvantages of operation.**
- **To enable to practically generate code for it and implement it for data storage.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 (USIT302) Data Structures **Unit No -01**	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	Textbook, Chalk and Duster. Blackboard.

			SPD	
	Array:Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General Multi-Dimensional Arrays, Sparse Arrays, SparseMatrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Textbook, Laptop, Projector, Chalk and Duster. Blackboard.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -03	**Stack**: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Textbook, Laptop, Projector, Chalk and Duster, Blackboard.
Data Structures	**Queue:** Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue, Some special kinds of queues, Deque, Priority Queue, Application of Priority Queue, Applications of Queues.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Textbook, Laptop, Projector, Chalk and Duster, Blackboard.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHARVARI PATIL DEPARTMENT: IT CLASS: S.Y.I.T SEMESTER: III

MONTH: JUNE TO SEPTEMBER ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the importance of python programming.
- Gain knowledge about function declaration and function call.
- Learn about various data structures used in python.
- Understand the use of regular expressions.
- Learn GUI development using python programming.

Paper No.,Paper Title, Unit No.	**Sub Topics:**	**No.of Lectures**	**References**	**Teaching Method/ICT tools used**
USIT301 Python Programming Unit 1	Introduction:The Python Programming Language, History, features, Installing Python, Running Python program, Debugging : Syntax Errors, Runtime Errors, Semantic Errors, Experimental Debugging, Formal and Natural Languages, The Difference Between Brackets, Braces, and Parentheses	4	Reference book: "Think Python"	Chalk, Blackboard
	Variables and Expressions:Values and Types, Variables, Variable Names and Keywords, Type conversion, Operators and Operands, Expressions, Interactive Mode and Script Mode	3		
	Conditional Statements:if, if-else, nested if –else	2		

	Looping:for, while, nested loops Control statements: Terminating loops, skipping specific conditions	1 2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming Unit 2	Functions: Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions, Definitions and Uses, Flow of Execution, Parameters and Arguments, Variables and Parameters Are Local, Stack Diagrams, Fruitful Functions and Void Functions, Why Functions? Importing with from, Return Values, Incremental Development, Composition, Boolean Functions, More Recursion, Leap of Faith, Checking Types Strings: A String Is a Sequence, Traversal with a for Loop, String Slices, Strings Are Immutable, Searching, Looping and Counting, String Methods, The in Operator, String Comparison, String Operations.	4 4 2 2	Reference book: "Think Python"	Chalk, Blackboard
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301	Lists: Values and Accessing Elements, Lists are mutable, traversing a List, Deleting elements from List, Built-in List Operators, Concatenation, Repetition, In Operator, Built-in List functions and methods	3	Reference book: "Think Python"	Chalk, Blackboard

Python Programming Unit 3	Tuples and Dictionaries: Tuples, Accessing values in Tuples, Tuple Assignment, Tuples as return values, Variable-length argument tuples, Basic tuples operations, Concatenation, Repetition, in Operator, Iteration, Built-in Tuple Functions Creating a Dictionary, Accessing Values in a dictionary, Updating Dictionary, Deleting Elements from Dictionary, Properties of Dictionary keys, Operations in Dictionary, Built-In Dictionary Functions, Built-in Dictionary Methods Files: Text Files, The File Object Attributes, Directories Exceptions: Built-in Exceptions, Handling Exceptions, Exception with Arguments, User-defined Exceptions	3 3 1 2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming Unit 4	Regular Expressions – Concept of regular expression, various types of regular expressions, using match function. Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding Multithreaded Programming: Thread Module, creating a thread, synchronizing threads, multithreaded priority queue	4 4 4	Reference book: "Think Python"	Chalk, Blackboard

	Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming Unit 5	Creating the GUI Form and Adding Widgets: Widgets: Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets. Layout Management: Designing GUI applications with proper Layout Management features. Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets. Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database	4 2 2 4	Reference book: "Think Python"	Chalk, Blackboard
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT: CS

CLASS: SY BSc IT DIV-B(DBMS) SEMESTER:SEM 3 MONTH: JUN-SEP ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- The learners will be able to : have a broad understanding of database concepts and database management system software
- have a high-level understanding of major DBMS components and their function
- be able to model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
- be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
- be able to program a data-intensive application using DBMS APIs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 4 DBMS UNIT 1	Introduction to Databases and Transactions What is database system, purpose of database system, view of data, relationaldatabases, database architecture, transaction management	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Data Models The importance of data models, Basic building blocks, Business rules, The evolutionof data models, Degrees of data abstraction.	4		
	Database Design,ER Diagram and Unified Modeling Language Database design and ER Model:overview, ERModel, Constraints, ERDiagrams, ERDIssues, weak entity sets, Codd's rules, Relational Schemas, Introduction to UML	4		
	Relational database model: Logical view of data, keys, integrity rules,	3		Black board and chalk

UNIT 2	Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF, BCNF).	3	DATABASE SYSTEM AND CONCEPTS BY H KORTH	
	Relational Algebra and Calculus Relational algebra: introduction, Selection and projection, set operations, renaming,Joins, Division, syntax, semantics	3		
	. Operators, grouping and ungrouping,relationalcomparison	2		
	Calculus: Tuple relational calculus, Domain relational Calculus, calculus vsalgebra,computational capabilities	4		
UNIT 3	Constraints, Views and SQL Constraints, types of constrains, Integrity constraints,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Views: Introduction to views, data independence, security, updates on views,comparison between tables and views	4		
	SQL: data definition, aggregate function, Null Values, nested sub queries, Joined relations. Triggers	4		
UNIT 4	Transaction management and Concurrency Control Transaction management: ACID properties, serializability and concurrency control,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Lock based concurrency control (2PL, Deadlocks),Time stamping methods,	4		
	optimistic methods, database recovery management.	4		
UNIT 5	PL-SQL: Beginning with PL / SQL,Identifiers and Keywords, Operators, Expressions, Sequences	4	PROGRAMMING WITH PL/SQL FOR BEGINNERS BY H. DAND,R. PATIL	Black board and chalk
	,Control Structures, Cursors and Transaction,	4		
	Collections and composite data types, Procedures and Functions, Exceptions Handling ,Packages,With Clause and Hierarchical Retrieval,Triggers.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: S.Y.I.T.-B (Python)

SEMESTER:III

MONTH:June - September

ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand why Python is a useful scripting language for developers.
- Learn how to design and program Python applications.
- Learn how to use lists, tuples, and dictionaries in Python programs.
- Write functions and pass arguments in Python also to read and write files in Python.
- Learn how to design object-oriented programs with Python classes.
- Use exception handling in Python applications for error handling
- Understand the basics of python GUI component and be able to create GUI based application.
- Create Python application that will manage user data with the knowledge of DBMS.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT301 , Unit 2, Python .	**Functions:** Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions, Flow of Execution, Parameters and Arguments, Variables and Parameters Are Local, Stack Diagrams, Fruitful Functions and Void Functions, Why Functions? Importing with from, Return Values, Incremental Development, Boolean Functions, More Recursion, Leap of Faith, Checking Types.	05	Think Python - Allen Downey	Black Board and chalk.

	Strings: A String Is a Sequence, Traversal with a for Loop, String Slices, Strings Are Immutable, Searching, Looping and Counting, String Methods, The in Operator, String Comparison, String Operations.	07	Think Python - Allen Downey	Black Board and chalk.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT301 , Unit 4, Python .	**Regular Expressions –** Concept of regular expression, various types of regular expressions, using match function.	03	Think Python - Allen Downey	Black Board and chalk.
	Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation.	04	Think Python - Allen Downey	Black Board and chalk.
	Multithreaded Programming: Thread Module, creating a thread, synchronizing threads, multithreaded priority queue	02	Think Python - Allen Downey	Black Board and chalk.
	Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	03	Think Python - Allen Downey	Black Board and chalk.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

USIT301 , Unit 5, Python .	**Creating the GUI Form and Adding Widgets:** **Widgets:** Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets.	04	Python GUI Programming Cookbook -Burkhard A. Meier	Black Board, chalk and Powerpoint.
	Layout Management: Designing GUI applications with proper Layout Management features.	02	Python GUI Programming Cookbook - Burkhard A. Meier	Black Board, chalk and Powerpoint.
	Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets.	02	Python GUI Programming Cookbook - Burkhard A. Meier	Black Board, chalk and Powerpoint.
	Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database.	04	Python GUI Programming Cookbook - Burkhard A. Meier	Black Board, chalk and Powerpoint.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: SY BSc IT SEMESTER: SEM 3 MONTH: JUN-SEP ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

1. To have a broad understanding of database concepts and database management system software
2. To have a high-level understanding of major DBMS components and their function
3. To be able to model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
4. To be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
5. To be able to program a data-intensive application using DBMS APIs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 4 DBMS UNIT 1	Introduction to Databases and Transactions What is database system, purpose of database system, view of data, relational databases, database architecture, transaction management.	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Data Models The importance of data models, Basic building blocks, Business rules, The evolution of data models, Degrees of data abstraction.	4		
	Database Design, ER Diagram and Unified Modelling Language Database design and ER Model: overview, ER Model, Constraints, ER Diagrams, ERD Issues, weak entity sets, Codd's rules, Relational Schemas, Introduction to UML	4		
	Relational database model: Logical view of data, keys, integrity rules,	2		Black board and chalk

UNIT 2	Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF, BCNF).	3	DATABASE SYSTEM AND CONCEPTS BY H KORTH	
	Relational Algebra and Calculus Relational algebra: introduction, Selection and projection, set operations, renaming, Joins, Division, syntax, semantics	3		
	Operators, grouping and ungrouping, relational comparison	2		
	Calculus: Tuple relational calculus, Domain relational Calculus, calculus vs algebra, computational capabilities	2		
UNIT 3	Constraints, Views and SQL Constraints, types of constrains, Integrity constraints,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Views: Introduction to views, data independence, security, updates on views, comparison between tables and views	4		
	SQL: data definition, aggregate function, Null Values, nested sub queries, Joined relations. Triggers	4		
UNIT 4	Transaction management and Concurrency Control Transaction management: ACID properties, serializability and concurrency control,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Lock based concurrency control (2PL, Deadlocks),Time stamping methods,	4		
	Optimistic methods, database recovery management.	4		
UNIT 5	PL-SQL: Beginning with PL / SQL, Identifiers and Keywords, Operators, Expressions, Sequences	4	PROGRAMMING WITH PL/SQL FOR BEGINNERS BY H. DAND,R. PATIL	Black board and chalk
	,Control Structures, Cursors and Transaction,	4		
	Collections and composite data types, Procedures and Functions, Exceptions Handling, Packages with Clause and Hierarchical Retrieval, Triggers.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: SYIT

SEMESTER: III MONTH: JUNE-SEPT ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Get deep knowledge about different types of data structures and also the importance of algorithm and its complexity.
- Understand the use of array and different types of linked list.
- Learn about stack, stack operations, queue and different types of it.
- Understand the use of different sorting and searching techniques.
- Learn about graph theory and different types of hashing techniques.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT302, Data Structures, Unit I	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
	Array: Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General MultiDimensional Arrays, Sparse Arrays, Sparse Matrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT302, Data Structures, Unit III	**Stack**: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
	Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue, Some special kinds of queues, Deque, Priority Queue, Application of Priority Queue, Applications of Queues.	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
USIT302, Data Structures, Unit IV	**Sorting and Searching Techniques** Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, Binary, Indexed Sequential Searches, Binary Search.	04	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
	Tree: Tree, Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary Tree, Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort.	05	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
	Advanced Tree Structures: Red Black Tree, Operations Performed on Red Black Tree, AVL Tree, Operations performed on AVL Tree, 23 Tree, B-Tree.	03	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Sampada Deshmukh DEPARTMENT: IT

CLASS: M. Sc. I. T – SEMESTER: I MONTH: August-December ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

a. Understand the concept of data mining and its various algorithms.

b.Understand the concept of text mining , graph mining ,Social network analysis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-I Data Mining Unit -I	**Introduction:** Basics of data mining, related concepts, Data mining techniques. **Data:** Introduction, Attributes, Data Sets, and Data Storage, IssuesConcerning the Amount and Quality of Data	4	M. H. Dunham. Data Mining: Introductory and Advanced Topics. Pearson Education. 2010.	Powerpoint presentation through projector
	Knowledge Representation: Data Representation and their Categories: General Insights, Categories ofKnowledge Representation, Granularity of Data and KnowledgeRepresentation Schemes, Sets and Interval Analysis	4		Powerpoint presentation through projector
	Fuzzy Sets as Human- Centric Information Granules, Shadowed Sets, Rough Sets, Characterization ofKnowledge Representation Schemes, Levels of Granularity and PerceptionPerspectives, The Concept of Granularity in Rules.	4		Powerpoint presentation through projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. BRIJESH Y JOSHI DEPARTMENT: Information Technology

CLASS: M.Sc.IT SEMESTER: IV MONTH: AUG TO OCT ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- To be able to Understand the basics of software testing and testing process
- To be able to understand test closure activities , various testing techniques
- To be able to understand software characteristics
- To be able to understand test standards

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
SOFTWARE TESTING UNIT I	**Test Basics:** Introduction, Testing in the Software Lifecycle, Specific Systems, Metrics and Measurement, Ethics **Testing Processes:** Introduction, Test Process Models, Test Planning and Control, Test Analysis and Design, Non-functional Test Objectives, Identifying and Documenting Test Conditions, Test Oracles, Standards, Static Tests, Metrics, Test Implementation and Execution, Test Procedure Readiness, Test Environment Readiness, Blended Test Strategies, Starting Test Execution, Running a Single Test Procedure, Logging Test Results, Use of Amateur Testers, Standards, Metrics, Evaluating Exit Criteria and Reporting, Test Suite, Defect Breakdown, Confirmation Test Failure Rate, System Test Exit Review, Standards, Evaluating Exit Criteria and Report	12	**Advanced SoftwareTesting—Vol. 3 by Rex Black and· Jamie L. Mitchell, Rocky Nook Publication,**	Laptop, PPT
SOFTWARE TESTING UNIT II	Closure Activities 4 II Test Management: Introduction, Test Management Documentation, Test Plan Documentation Templates, Test Estimation, Scheduling and Test Planning, Test Progress Monitoring and Control, Business Value of Testing, Distributed, Outsourced, and Insourced Testing, RiskBased Testing, Risk	12	**Advanced SoftwareTesting—Vol. 3 by Rex Black and· Jamie**	Laptop, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Management, Risk Identification, Risk Analysis or Risk Assessment, Risk Mitigation or Risk Control, Risk Identification and Assessment Results, Risk-Based Testing throughout the Lifecycle, Risk-Aware Testing Standards, Risk- 7 Based Testing Exercise, Project Risk By-Products, Requirements Defect By-Products, Test Case Sequencing Guidelines, Failure Mode and Effects Analysis, Test Management Issues		**L. Mitchell, Rocky Nook Publication,**	
SOFTWARE TESTING **UNIT III**	Test Techniques Introduction, Specification-Based, Equivalence Partitioning, Avoiding Equivalence Partitioning Errors, Composing Test Cases with Equivalence Partitioning, Equivalence Partitioning Exercise, Boundary Value Analysis, Examples of Equivalence Partitioning and Boundary Values, Non-functional Boundaries, Functional Boundaries, Integers, Floating Point Numbers, Testing Floating Point Numbers, Number of Boundaries, Boundary Value Exercise, Decision Tables, Collapsing Columns in the, Combining Decision Table Testing with Other Techniques, Nonexclusive Rules in Decision Tables, 4 Decision Table Exercise, Decision Table Exercise Debrief, State-Based Testing and State Transition Diagrams, Superstates and Substates, State Transition Tables, Switch Coverage, State Testing with Other Techniques, State Testing Exercise, State Testing Exercise Debrief, RequirementsBased Testing Exercise, Requirements-Based Testing Exercise Debrief, Structure-Based, Control-Flow Testing, Building Control-Flow Graphs, Statement Coverage, Decision Coverage, Loop Coverage, Hexadecimal Converter Exercise, Hexadecimal Converter Exercise Debrief, Condition Coverage, Decision/Condition Coverage, Modified Condition/Decision Coverage(MC/DC), Multiple Condition Coverage, Control-Flow Exercise, Control-Flow Exercise Debrief, Path Testing, LCSAJ, Basis Path/Cyclomatic Complexity Testing, Cyclomatic Complexity Exercise, Cyclomatic Complexity Exercise Debrief, Final Word on Structural Testing, Structure-Based Testing Exercise, Structure-Based Testing Exercise Debrief, Defect- and Experience-Based, Defect Taxonomies, Error Guessing, Checklist Testing, Exploratory	12	**Advanced SoftwareTesting—Vol. 3 by Rex Black and· Jamie L. Mitchell, Rocky Nook Publication,**	Laptop ,PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Testing, Test Charters, Exploratory Testing Exercise, Software Attacks, An Example of Effective Attacks, Other Attacks, Software Attack Exercise, Software Attack Exercise Debrief, Specification-, Defect-, and Experience-Based Exercise, Specification-, Defect-,and Experience-Based Exercise Debrief, Common Themes, Static Analysis, Complexity Analysis, Code Parsing Tools, Standards and Guidelines, Data-Flow Analysis, Set-Use Pairs, Set-Use Pair Example, Data-Flow Exercise, Data-Flow Exercise Debrief, Data-Flow Strategies, Static Analysis for Integration Testing, Call-Graph Based Integration Testing, McCabe Design Predicate Approach to Integration Testing, Hex Converter Example, McCabe Design Predicate Exercise, McCabe Design Predicate Exercise Debrief, Dynamic Analysis, Memory Leak Detection, Wild Pointer Detection, API Misuse Detection.			
SOFTWARE TESTING **UNIT IV**	Tests of Software Characteristics Introduction, Quality Attributes for Domain Testing, Accuracy, Suitability, Interoperability, Usability, Usability Test Exercise, Usability Test Exercise Debrief, Quality Attributes for Technical Testing, Technical Security, Security Issues, Timely Information, Reliability, Efficiency, Multiple Flavours of Efficiency Testing, Modelling the System, Efficiency Measurements, Examples of 8 Efficiency Bugs, Exercise: Security, Reliability and Efficiency, Exercise: Security, Reliability, and Efficiency Debrief, Maintainability, Subcharacteristics of Maintainability, Portability, Maintainability and Portability Exercise. Reviews Introduction, The Principles of Reviews, Types of Reviews, Introducing Reviews, Success Factors for Reviews, Deutsch's Design Review Checklist, Marick's Code Review Checklist, The Open Laszlo Code Review Checklist, Code Review Exercise, Deutsch Checklist Review Exercise. Incident Management Introduction, When Can a Defect Be Detected? Defect Lifecycle, Defect Fields, Metrics and Incident Management, Communicating Incidents, Incident Management Exercise.	12	**Advanced SoftwareTesting—Vol. 3 by Rex Black and· Jamie L. Mitchell, Rocky Nook Publication,**	Laptop, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

SOFTWARE TESTING **UNIT V**	Standards and Test Process Improvement Introduction, Standards Considerations, Test Improvement Process, Improving the Test Process,Improving the Test Process with TMM, Improving the Test Process with TPI, Improving the Test Process with CTP, Improving the Test Process with STEP, Capability Maturity Model Integration, CMMI, Test Improvement Process Exercise. Test Techniques Introduction, Test Tool Concepts, The Business Case for Automation, General Test Automation Strategies, An Integrated Test System Example, Test Tool Categories, Test Management Tools, Test Execution Tools, Debugging, Troubleshooting, Fault Seeding,and Injection Tools, Static and Dynamic Analysis Tools, Performance Testing Tools, Monitoring Tools, Web Testing Tools, Simulators and Emulators, Keyword-Driven Test Automation, Capture/Replay Exercise, Capture/Replay Exercise Debrief, Evolving from Capture/Replay, The Simple Framework Architecture, Data-Driven Architecture, Keyword-Driven Architecture, Keyword Exercise, Performance Testing, Performance Testing Exercise. People Skills and Team Composition Introduction, Individual Skills, Test Team Dynamics, Fitting Testing within an Organization, Motivation, Communication.	12	Advanced SoftwareTesting—Vol. 3 by Rex Black and· Jamie L. Mitchell, Rocky Nook Publication,	Laptop ,PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Ms. Binita Thakkar DEPARTMENT: IT

CLASS: M. Sc. I. T SEMESTER: II MONTH: February-May ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:
a. Work with various networking concepts.
b. Work with protocol design on GNS3.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Advanced Computer Networks Unit -I	TCP/IP Review- The TCP/IP Protocol Layers, The IP Packet Header, IP Addresses, ARP, ICMP, The Host-to-Host Layer	3	CCIE Professional Development Routing TCP/IP: Volume I by Jeff Doyle, Jennifer DeHaven Carroll, Cisco Press	PowerPoint presentation through projector
	Static Routing- The Route Table, Configuring Static Routes, Case Study: Simple Static Route, Summary Routes, Alternative Routes, Simple Floating Routes, Load Sharing, Recursive Table Lookups, Troubleshooting Static Routes, Case Study: Tracing a Failed Route, A Protocol Conflict	3		PowerPoint presentation through projector
	Dynamic Routing Protocols- Routing Protocol Basics Distance Vector Routing Protocols Link State Routing Protocols	3		PowerPoint presentation through projector
	Interior Gateway Protocol & Exterior Gateway Protocol- Operation of EGP, EGP Function, EGP Message Format, Shortcomings of EGP	3		PowerPoint presentation through projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Mrs. Jagruti S. Raut** DEPARTMENT: **CS** CLASS: **M.Sc. (CS)**

SEMESTER: **II** MONTH: **January - May** ACADEMIC YEAR: **2018-2019**

LEARNING OBJECTIVE/S:
The learners will be able:

- To acquire knowledge about how to execute queries on these fragments that will demonstrate distributed databases environment.
- To learn how to create temporal database
- To learn how to create XML database
- To understand multimedia database systems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSIT204 **Paper IV** **Advanced Database Systems** **UNIT I**	**The Extended Entity Relationship Model and Object Model:** The ER model revisited, Motivation for complex data types, User defined abstract data types and structured types, Subclasses, Super classes, Inheritance, Specialization and Generalization, Constraints and characteristics of specialization and Generalization, Relationship types of degree higher than two.	12	Database Management Systems, 3rd edition, Raghu Ramakrishnan and Johannes Gehrke, McGraw-Hill (2002).	Microsoft PowerPoint Presentation

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**MSC(IT)**_____ SEMESTER: ____**III**_____ MONTH: _____ **JULY-NOVEMBER** _____ ACADEMIC YEAR: _____**2018-2019**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand the concept of Image Processing, its elements and application. To make understand the concept of image enhancement techniques, filtering, colour processing , compression techniques, segmentation, morphology, representation and description of image and image recognition. To make understand what is image, how it is created and how it is used in varieties of processing. To study subjective improvisation of image in applications to reduce the noise.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective 2 PSIT304a Digital Image Processing **Unit No -01**	**Introduction to image processing**, Example of fields that uses image processing, Steps of image processing, Components, Applications, Image sensors and image formats	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit No -02	**Visual Preliminaries** Brightness adaptation and contrast, Acuity and contour, Texture and pattern discrimination, Shape detection and recognition, perception of colour, Computational model of perceptual processing, Image sampling and quantization, Basic relationships between pixels	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
	Intensity transformations Introduction, Some basic intensity transformation functions, Histogram equalization, local histogram processing, Using histogram statistics for image enhancement	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Spatial filtering Fundamentals of spatial filtering, Smoothing and Sharpening spatial filters, Combining spatial enhancement methods, Using fuzzy techniques for intensity transformations and spatial filtering	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit No -03	**Colour image processing** Colour fundamentals, Colour models, Pseudocolour image processing, Basic of full-colour image processing, Colour transformations, Smoothing and Sharpening, Image segmentation bases on colour, Noise in colour images, Colour image compression	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Image Compression Fundamentals, Some basic methods, Digital image watermarking, Full motion video compression	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -04	**Morphological Image Processing** Introduction, Erosion and Dilation, Opening and Closing, The Hit-or-Miss transformation, Some basic morphological algorithms, Gray scale morphology	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Segmentation Fundamentals, Point, Line, and Edge detection, Thresholding, Region based segmentation, Segmentation using morphological watersheds, The use of motion in segmentation- Spatial techniques.	06	Digital Image Processing Gonzalez and Woods 3rd Edition	Blackboard, Chalk and Duster. PPts.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: Information Technology CLASS:MScIT

SEMESTER: III MONTH:JULY to NOV ACADEMIC YEAR:2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

To determine the market perspective of Embedded System

To compare and contrast the use of devices, hardware and software.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-01 Embedded System, Unit-1	**Introduction** What is an Embedded System, Embedded System Vs, General Computing System.	3	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	The Typical Embedded System Core of Embedded System, Memory, Sensors and Actuators, Communication Interface, Embedded Firmware.	3	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	Characteristic and quality attributes of Embedded System	3	Introduction to embedded systems- Shibu K. V	Laptop, PPT, Chalk &Black Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Characteristics of an Embedded System, Quality Attributes of Embedded System. RAM, Performance and Battery Life, Libraries, Debugging.		& Embedded Systems Architecture, Programming and Design-- Raj Kamal	
	Embedded product development life cycle What is EDLC, Why EDLC? Objectives of EDLC, Different Phases of EDLC.	3	Introduction to embedded systems-Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
Paper-01 Embedded System, Unit-2	**Hardware Software Co-design and Program Modelling** Fundamental Issues in Hardware Software Co-Design, Computational Models in Embedded Design, Introduction to Unified Modelling Language (UML), Hardware Software Trade-offs.	3	Introduction to embedded systems-Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	Embedded Hardware design and development Analog Electronic Components, Digital Electronic Components, Electronic design Automation (EDA) Tools, The PCB Layout design.	3	Introduction to embedded systems-Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	Embedded Firmware design and development Embedded Firmware Design Approaches, Embedded Firmware Development Languages	3	Introduction to embedded systems-Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
	Real Time Operating System(RTOS) Operating System Basics, Types of Operating Systems, Device Drivers, How to choose an RTOS	3	Introduction to embedded systems-Shibu K. V &	Laptop, PPT, Chalk &Black Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Embedded Systems Architecture, Programming and Design-- Raj Kamal	
Paper-01 Embedded System, Unit-3	**Memories and Memory Subsystem** Introduction, Classifying Memory, A general Memory Interface, ROM Overview, Static RAM Overview, Dynamic RAM Overview, Chip Organization, A SRAM Design, A DRAM Design, The DRAM Memory Interface, The Memory Map, Memory Subsystem Architecture, Basic Concepts of Caching, Design a cache system, Dynamic Memory Allocation, Testing Memories.	12	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
Paper-01 Embedded System, Unit-4	**Programming Concept and Embedded Programming in C/C++ and Java** Software programming in Assembly Language (ALP) and in High-level Language 'C'., C program Elements: Header and Source Files and Pre-processor Directives, Program Elements: Macros and Functions, Program Elements: Types, Data Structures, Modifiers, Statements, Loops and Pointers, Object-Oriented Programming, Embedded Programming in C++, Embedded Programming in Java.	12	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board
Paper-01 Embedded System, Unit-5	**Trends in the Embedded Industry** Processor trends in Embedded System, Embedded OS Trends, Development Language Trends, Introduction of PIC Family of Microcontrollers, Introduction of ARM Family of Microcontrollers, Introduction of AVR Family of Microcontrollers.	12	Introduction to embedded systems- Shibu K. V & Embedded Systems Architecture, Programming and Design-- Raj Kamal	Laptop, PPT, Chalk &Black Board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. BRIJESH Y JOSHI DEPARTMENT: Information Technology

CLASS: M.Sc.IT SEMESTER: IV MONTH: JAN TO APRIL ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- To be able to Understand the concept of **ITIL, Service Life Cycle, Service Strategy**
- **To be able to understand Service Design , Service Transition , Service Operation , Continual service Improvement**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
IT Infrastructure Management UNIT I	**Introduction:** The four perspectives (attributes) of IT service management, benefits of IT service management, business and IT alignment, What is ITIL?, What are services?, Service Management as a practice, The concept of Good Practice, Concept of a Service, Concept of Service Management, Functions and Processes, The process model and the characteristics of processes. **The Service Lifecycle:** Mapping the Concepts of ITIL to the Service Lifecycle, How does the Service Lifecycle work? **Service Strategy:** Objectives, Creating Service Value, Service Packages and Service Level Packages, Service Strategy Processes, Service Portfolio Management, Financial Management, Demand Management, Service Strategy Summary, Interfaces with the Service Design Phase, Interfaces with the Service Transition Phase, Interfaces with the Service Operation Phase, Interfaces with the Continual Service Improvement Phase, Service Strategy Service Scenario,	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Overall Service Strategy, Service Portfolio Management Considerations, Financial Management Considerations			
UNIT II	**Service Design:** Objectives, Major Concepts, Five Major Aspects of Service Design, Service Design Packages, Service Design Processes, Service Level Management, Supplier Management, Service Catalogue Management, Capacity Management, Availability Management, IT Service Continuity Management, Information Security Management, Service Design Scenario, Service Level Management Considerations, Capacity Management Considerations, Availability Management Considerations, Information Security Management Considerations, Service Catalogue Management Considerations, ITSCM Considerations, Supplier Management Considerations	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop, PPT
UNIT III	**Service Transition:** Objectives, Service Transition Processes, Knowledge Management, Service Asset and Configuration Management, Change Management, Release and Deployment Management, Service Validation and Testing, Service Transition Summary, Service Transition Scenario, Knowledge Management Considerations, Service Asset and Configuration Management Considerations, Change Management Considerations, Release and Deployment Management Considerations, Service Validation and Testing Considerations	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop ,PPT
UNIT IV	**Service Operation:** Objectives, Major Concepts, Service Operation Functions, The Service Desk, Technical Management, IT Operations Management, Application Management, Service Operation Processes, Event Management, Incident Management, Problem Management, Request Fulfillment, Access Management, Service Operation Summary, Service Operation Scenario, Functions, Processes	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT V	**Continual Service Improvement:** Objectives, Major Concepts Continual Service Improvement Processes, Service Level Management, Service Measurement and Reporting , CSI (7 Step) Improvement Process, Continual Service Improvement Summary, Continual Service Improvement Scenario, Service Level Management Service Measurement and Reporting, CSI Process	12	**ITIL V3 Foundation Complete Certification Kit**	Laptop ,PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**MSC(IT)**_____ SEMESTER: ____**IV**_____ MONTH: _____ **JANUARY-APRIL** _____ ACADEMIC YEAR: _____**2018-2019**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand the concept of Advanced Image Processing, its elements and application. To make understand the concept of image enhancement techniques in frequency domain, remote sensing and its applications. To make understand what are different platforms and sensors. To study subjective improvisation of medical image. To analyze the image and its applications in different areas. To under the different methods of feature representation and statistical measurements.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective 2 PSIT404b Advanced Image Processing **Unit No -01**	**Enhancement in Frequency domain** Introduction, 2-D Discrete Fourier Transform, Properties of Fourier transform, Basic filtering in the frequency domain, Smoothing and Sharpening filters, FFT algorithm. Discrete cosine transform (DCT), KL (PCT) transform, HAAR, Basics of wavelets.	06	Digital Image Processing Gonzalez and Woods 3rd Edition Pearson Education	Blackboard, Chalk and Duster. PPts.
	Remote Sensing	06	Text Book of Remote Sensing	Blackboard, Chalk and Duster.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction (Passive and Active sensing), Electromagnetic remote sensing process, Physics of radiant energy, Energy source and its characteristics, Atmospheric interactions with electromagnetic radiation, Energy interaction with Earth's surface materials.		and Geographical Information Systems M. Anji Reddy 4th Edition BS publication	PPts
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -02	**Microwave Remote Sensing** Introduction, The Radar principle, Factors affecting microwave measurements, Radar wavebands, Side looking airborne (SLAR) systems, Synthetic Aperture Radar (SAR), Polarimetric SAR (PolSAR), Interaction between microwaves and Earth's surface, Interpreting SAR images, Geometric characteristics.	06	Text Book of Remote Sensing and Geographical Information Systems M. Anji Reddy 4th Edition BS publication	Blackboard, Chalk and Duster. PPts.
	Remotes Sensing Platforms and Sensors Introduction, Satellite system parameters, Spatial Resolution, Spectral Resolution, Radiometric Resolution, Temporal resolution, Imaging sensor systems (thermal, multispectral and microwave imaging), Earth resources satellites, Meteorological satellites, Satellites carrying microwave sensors, OCEASAT-1, IKONOS, Latest trends in remote sensing platforms and sensors (weather, land observation and marine satellites).	06	Text Book of Remote Sensing and Geographical Information Systems M. Anji Reddy 4th Edition BS publication	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit No -03	**Image Analysis** Introduction, Visual interpretation, Elements of visual interpretation, Digital processing, Pre-processing, Enhancement, Transformations, Classification, Integration, Classification accuracy assessment.	06	Digital Image Processing and Analysis Bhabatosh Chanda, Dwijesh Dutta Majumder 2nd Edition PHI	Blackboard, Chalk and Duster. PPts.
	Applications Introduction, Agriculture, Forestry, Geology, Hydrology, Sea Ice, Land cover, Mapping, Oceans and Costal.	06	Digital Image Processing and Analysis Bhabatosh Chanda, Dwijesh Dutta Majumder 2nd Edition PHI	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -04	**Medical Image Processing** Various modalities of medical imaging, Breast cancer imaging, Mammographic imaging, Ultrasound imaging, Magnetic resonance imaging (MRI), Breast thermograph imaging, Problems with medical images. Image enhancement, Spatial domain methods, Frequency domain methods, Other modalities of medical imaging, Radiography, Positron emission tomography (PET), Computed tomography angiography (CTA), Echocardiogram.	12	Medical Image Processing Concepts and Applications Sinha, G.R., Patel, Bhagwati Charan PHI	Blackboard, Chalk and Duster. PPts.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit No -05	**Feature Extraction and Statistical Measurement** Selection of features, Shape related features, Shape representation, Bounding box, Shape matrix, Moments of region and shape, Co-occurrence matrix, Principle feature analysis (PFA), Fourier descriptors, Snake boundary detection, Snake algorithm, Texture analysis, Texture features, Feature extraction using discrete Fourier transform, wavelet transform, Gabor filters for texture analysis, Breast tissue detection, Analysis of tissue structure.	12	Medical Image Processing Concepts and Applications Sinha, G.R., Patel, Bhagwati Charan PHI	Blackboard, Chalk and Duster. PPts.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: FYCS

SEMESTER: II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Be familiar with basic techniques of algorithm analysis
- Be familiar with writing recursive methods
- Describe common applications for arrays, records, linked structures, stacks, queues, trees, and graphs
- Ability to summarize searching and sorting techniques.
- Be familiar with advanced data structures such as balanced search trees, hash tables, priority queues and the disjoint set union/find data structure

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS204, Data Structures Unit 1	Abstract Data Types: Introduction, The Date Abstract Data Type, Bags, Iterators. Application Type,	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, Powerpoint
	Arrays: Array Structure, Python List, Two Dimensional Arrays, Matrix Abstract Data	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Application Sets and Maps: Sets-Set ADT, Selecting Data Structure, List based Implementation, Maps-Map ADT,	04	1) Data Structure and algorithm Using Python,	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	List Based Implementation, Multi-Dimensional Arrays-Multi-Array ADT, Implementing Multiarrays, Application		Rance D. Necaise, 2016 Wiley India Edition	
	Application Searching and Sorting: Searching-Linear Search, Binary Search, Sorting-Bubble, Selection and Insertion Sort, Working with Sorted Lists-Maintaining Sorted List, Maintaining sorted Lists.	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Algorithm Analysis: Complexity Analysis-Big-O Notation, Evaluating Python Code, Evaluating Python List, Amortized Cost, Evaluating Set ADT,	02	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
USCS204, Data Structures Unit 2	Linked Structures: Introduction, Singly Linked List-Traversing, Searching, Prepending and Removing Nodes, Bag ADT-Linked List Implementation. Comparing Implementations, Linked List Iterators, More Ways to Build Kinked Lists	05	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Applications-Polynomials Stacks: Stack ADT, Implementing Stacks-Using Python List, Using Linked List, Stack Applications-Balanced Delimiters, Evaluating Postfix Expressions	04	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	, Queues: Queue ADT, Implementing Queue-Using Python List, Circular Array, Using List, Priority Queues- Priority Queue ADT, Bounded and unbounded Priority Queues	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Advanced Linked List: Doubly Linked Lists-Organization and Operation, Circular Linked List-Organization and Operation, Multi Lists	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS204, Data Structures Unit 3	Recursion: Recursive Functions, Properties of Recursion, Its working, Recursive	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Hash Table: Introduction, Hashing-Linear Probing, Clustering, Rehashing, Separate Chaining, Hash Functions	04	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Advanced Sorting: Merge Sort, Quick Sort, Radix Sort, Sorting Linked List	03	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint
	Applications Binary Trees: Tree Structure, Binary Tree-Properties, Implementation and Traversals, Expression Trees, Heaps and Heapsort,Search Trees	05	1) Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Black Board and chalk, PowerPoint

CLASS:FYCS SEMESTER: SEM-II MONTH:DEC-MAR ACADEMIC YEAR:2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:Develop logic which will help them to write, compile and debug programs in C language, able to use different data types in a computer program.Also by learning the design programs involving decision structures, loops and functions. It use different data structures and create/update basic data files.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-1 PROGRAMMING WITH C, UNIT 1	**Structure of C program:** Header and body, Use of comments. Interpreters vs compilers, Python vs C. Compilation of a program. Formatted I/O: printf(), scanf().	2	Programming in ANSI C : E Balagurusamy	Blackboard & Chalk
	Data: Variables, Constants, data types like: int, float char, double and void, short and long size qualifiers, signed and unsigned qualifiers. Compare with datatypes in Python. Compare static typing in C vs dynamic typing in Python .	2		
	Variables: Declaring variables, scope of the variables according to block, hierarchy of data types. Compare explicit declarations in C with implicit declarations in Python.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Types of operators: Arithmetic, relational, logical, compound assignment, increment and decrement, conditional or ternary, bitwise and comma operators. Precedence and order of evaluation, statements and Expressions. Automatic and explicit type conversion.	4		
	Iterations: Control statements for decision making: (i) Branching: if statement, else.. if statement, (does the writer mean if-else or nested ifs)switch statement. (ii) Looping: while loop, do.. while, for loop. (iii) Jump statements: break, continue and goto.	5		
UNIT-2	**Arrays**: (One and two dimensional), declaring array variables, initialization of arrays, accessing array elements. Compare array types of C with list and tuple types of Python.	4	Programming in ANSI C : E Balagurusamy	Blackboard & Chalk
	Data Input and Output functions: Character I/O format: getch(), getche(), getchar(), getc(), gets(), putchar(), putc(), puts().	4		
	Manipulating Strings: Declaring and initializing String variables, Character and string handling functions. Compare with Python strings.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Functions: Function declaration, function definition, Global and local variables, return statement, Calling a function by passing values.	4		
	Recursion: Definition, Recursive functions.	1		
UNIT 3	**Pointer**: Fundamentals, Pointer variables, Referencing and de-referencing, Pointer Arithmetic, Using Pointers with Arrays, Using Pointers with Strings, Array of Pointers, Pointers as function arguments, Functions returning pointers.	4	Programming in ANSI C : E Balagurusamy	Blackboard & Chalk
	Dynamic Memory Allocation:malloc(), calloc(), realloc(), free() and sizeof operator. Compare with automatic garbage collection in Python.	3		
	Structure: Declaration of structure, reading and assignment of structure variables, Array of structures, arrays within structures, structures within structures. Compare C structures with Python tuples.	4		
	Unions: Defining and working with unions.	1		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	File handling: Different types of files like text and binary, Different types of functions: fopen(), fclose(), fgetc(), fputc(), fgets(), fputs(), fscanf(), fprintf(), getw(), putw(), fread(), fwrite(), fseek().	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS CLASS: FYCS

SEMESTER: SEM-2 MONTH:DEC-MARCH ACADEMIC YEAR:2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

- Familiarize with the concept of Green Computing and Green IT infrastructure for making computing andinformation system environment sustainable.
- Learn about green IT can be achieved in and by hardware, software, network communication and datacenter operations.
- Understand the strategies, frameworks, processes and management of green IT.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
7 GREEN TECHNOLOGY UNIT 1	**Green IT Overview:**Introduction , Environmental Concerns and SustainableDevelopment, Environmental Impacts of IT, Green I , Holistic Approach to Greening IT,Greening IT, Applying IT for Enhancing Environmental Sustainability, Green IT Standards and Eco-Labelling of IT , Enterprise Green IT Strategy, Green Washing, Green IT: Burdenor Opportunity?	4	Harnessing Green IT: Principles and Practices bySan Murugesan, G. R. Ganadharan, Wiley & IEEE.	BLACK BOARD AND CHALK
	Green Devices and Hardware: Introduction , Life Cycle of a Device or Hardware, Reuse,Recycle and Dispose	3		
	Green Software: Introduction , Processor Power States , Energy-Saving SoftwareTechniques, Evaluating and Measuring Software Impact to Platform Power	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Sustainable Software Development: Introduction, Current Practices, SustainableSoftware, Software Sustainability Attributes, Software Sustainability Metrics,Sustainable Software Methodology, Defining Actions	4		
UNIT 2	**Green Data Centres:**Data Centres and Associated Energy Challenges, Data Centre ITInfrastructure, Data Centre Facility Infrastructure: Implications for Energy Efficiency, ITInfrastructure Management, Green Data Centre Metrics	4	Harnessing Green IT: Principles and Practices by San Murugesan, G. R. Ganadharan, Wiley & IEEE.	BLACK BOARD AND CHALK
	Green Data Storage: Introduction , Storage Media Power Characteristics, EnergyManagement Techniques for Hard Disks, System-Level Energy Management	4		
	Green Networks and Communications: Introduction, Objectives of Green NetworkProtocols, Green Network Protocols and Standards	3		
	Enterprise Green IT Strategy: Introduction, Approaching Green IT Strategies, Business Drivers of Green IT Strategy, Business Dimensions for Green IT Transformation, Organizational Considerations in a Green IT Strategy, Steps in Developing a Green ITStrategy, Metrics and Measurements in Green Strategies.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Sustainable Information Systems and Green Metrics:**Introduction, MultilevelSustainable Information, Sustainability Hierarchy Models, Product Level Information,Individual Level Information, Functional Level Information, Organizational LevelInformation, Measuring the Maturity of Sustainable ICT	4	Harnessing Green IT: Principles and Practices bySan Murugesan, G. R. Ganadharan, Wiley & IEEE.	BLACK BOARD AND CHALK
	Enterprise Green IT Readiness: Introduction, Readiness and Capability, Development ofthe G-Readiness Framework, Measuring an Organization's G-Readiness	3		
	Sustainable IT Services: Creating a Framework for Service Innovation: Introduction,Factors Driving the Development of Sustainable IT, Sustainable IT Services (SITS), SITSStrategic Framework	4		
	Green Enterprises and the Role of IT: Introduction, Organizational and EnterpriseGreening, Information Systems in Greening Enterprises, Greening the Enterprise: ITUsage and Hardware, Inter-organizational Enterprise Activities and Green Issues	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: FYCS

SEMESTER: II MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand how to read/write to files using python.
- Catch their own errors that happen during execution of programs.
- Get introductions to the concept of pattern matching.
- Be familiar with the concepts of GUI controls and designing GUI applications.
- Connect to the database to move the data to/from the application.
- Know how to connect to computers, read from URL and send email.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS202, Unit 1, Programming with Python- II	Python File Input-Output: Opening and closing files, various types of file modes, reading and writing to files, manipulating directories. Iterables, iterators and their problem solving applications.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Exception handling: What is an exception, various keywords to handle exceptions such try, catch, except, else, finally, raise.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Regular Expressions: Concept of regular expression, various types of regular expressions, using match function.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
USCS202, Unit 2, Programming with Python- II	GUI Programming in Python (using Tkinter/wxPython/Qt) What is GUI, Advantages of GUI	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Introduction to GUI library. Layout management, events and bindings, fonts, colours, drawing on canvas (line, oval, rectangle, etc.)	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Widgets such as : frame, label, button, checkbutton, entry, listbox, message, radiobutton, text, spinbox etc	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
USCS202, Unit 3, Programming with Python-II	Database connectivity in Python: Installing mysql connector, accessing connector module module, using connect, cursor, execute & close functions.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Reading single & multiple results of query execution, executing different types of statements, executing transactions, understanding exceptions in database connectivity	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Network connectivity: Socket module, creating server-client programs, sending email, reading from URL	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

NAME OF THE STAFF:MONIKA MADHUKAR RAUT DEPARTMENT: IT

CLASS:SYCS SEMESTER: IV MONTH:DECEMBER TO MARCH ACADEMIC YEAR:2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to explore .NET technologies for designing and developing dynamic, interactive and responsive web applications

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
.Net Technologies (USCS406) Unit I	**The .NET Framework:.**NET Languages, Common Language Runtime, .NET Class Library	2	Beginning ASP.NET 4.5 in C#, Matthew MacDonald	Black Board and Chalk, PowerPoint presentation
	C# Language Basics: Comments, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods, Classes, Value Types and Reference Types, Namespaces and Assemblies, Inheritance, Static Members, Casting Objects, Partial Classes	5		
	ASP.NET: Creating Websites, Anatomy of a Web Form - Page Directive, Doctype, Writing Code - Code-Behind Class, Adding Event Handlers, Anatomy of an ASP.NET Application - ASP.NET File Types, ASP.NET Web Folders	4	Beginning ASP.NET 4.5 in C#, Matthew MacDonald	
	HTML Server Controls - View State, HTML Control Classes, HTML Control Events, HtmlControl Base Class,	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	HtmlContainerControl Class, HtmlInputControl Class, Page Class, global.asax File, web.config File			
.Net Technologies (USCS406) Unit II	**Web Controls:** Web Control Classes, WebControl Base Class, List Controls, Table Controls, Web Control Events and AutoPostBack, Page Life Cycle	3	Beginning ASP.NET 4.5 in C#, Matthew MacDonald	Black Board and Chalk
	State Management: ViewState, Cross-Page Posting, Query String, Cookies, Session State, Configuring Session State, Application State	2		Black Board and Chalk
	Validation: Validation Controls, Server-Side Validation, Client-Side Validation, HTML5 Validation, Manual Validation, Validation with Regular Expression,**Rich Controls:** Calendar Control, AdRotator Control, MultiView Control	4		Black Board and Chalk
	Themes and Master Pages: How Themes Work, Applying a Simple Theme,Handling Theme Conflicts, Simple Master Page and Content Page, Connecting Master pages and Content Pages, Master Page with Multiple Content Regions, Master Pages and Relative Paths	4		Black Board and Chalk
	Website Navigation: Site Maps, URL Mapping and Routing, SiteMapPath Control, TreeView Control, Menu Control	2		Black Board and Chalk
.Net Technologies (USCS406)	**ADO.NET:** Data Provider Model, Direct Data Access - Creating a Connection, Select Command, DataReader, Disconnected Data Access	3	Beginning ASP.NET 4.5 in	Black Board and Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit III	**Data Binding**: Introduction, Single-Value Data Binding, Repeated-Value Data Binding, Data Source Controls – SqlDataSource	2	C#, Matthew MacDonald	Black Board and Chalk
	Data Controls: GridView, DetailsView, FormView	3	Beginning ASP.NET 4.5 in C#, Matthew MacDonald	Black Board and Chalk
	Working with XML: XML Classes – XMLTextWriter, XMLTextReader	2		Black Board and Chalk
	Caching: When to Use Caching, Output Caching, Data Caching	2		Black Board and Chalk
	LINQ: Understanding LINQ, LINQ Basics	1		Black Board and Chalk
	ASP.NET AJAX: ScriptManager, Partial Refreshes, Progress Notification, Timed Refreshes	2		Black Board and Chalk

	Solutions, Master Theorem for Subtract and Conquer Recurrences, Method of Guessing and Confirming		Thomas H Cormen, PHI	
USCS401 **Fundamentals of Algorithms** UNIT-2	Tree algorithms: What is a Tree? Glossary, Binary Trees, Types of Binary Trees, Properties of Binary Trees, Binary Tree Traversals, Generic Trees (N-ary Trees), Threaded Binary Tree Traversals, Expression Trees, Binary Search Trees (BSTs), Balanced Binary Search Trees, AVL (Adelson-Velskii and Landis) Trees	06	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point
	Graph Algorithms: Introduction, Glossary, Applications of Graphs, Graph Representation, Graph Traversals, Topological Sort, Shortest Path Algorithms, Minimal Spanning Tree Selection Algorithms: What are Selection Algorithms? Selection by Sorting, Partition-based Selection Algorithm, Linear Selection Algorithm - Median of Medians Algorithm, Finding the K Smallest Elements in Sorted Order	09	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point
USCS401 **Fundamentals of Algorithms** UNIT-3	Algorithms Design Techniques: Introduction, Classification, Classification by Implementation Method, Classification by Design Method Greedy Algorithms: Introduction, Greedy Strategy, Elements of Greedy Algorithms, Advantages and Disadvantages of Greedy Method, Greedy Applications, Understanding Greedy Technique Divide and Conquer Algorithms: Introduction, What is Divide and Conquer Strategy? Divide and Conquer Visualization, Understanding Divide and Conquer, Advantages of Divide and Conquer, Disadvantages of Divide and Conquer, Master Theorem, Divide and Conquer Applications	07	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Dynamic Programming: Introduction, What is Dynamic Programming Strategy? Properties of Dynamic Programming Strategy, Problems which can be solved using Dynamic Programming, Dynamic Programming Approaches, Examples of Dynamic Programming Algorithms, Understanding Dynamic Programming, Longest Common Subsequence	09	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande DEPARTMENT: Computer Science

CLASS: S.Y.C.S. SEMESTER: IV MONTH: Dec - March ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

Learner will able to understand the concept of networking.
Useful to proceed with industrial requirement and international vendor certification

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS403 Computer Networks UNIT - 1	Introduction to data communication, Components, Data Representation, Data Flow, Networks, Network Criteria, Physical Structures, Network types, Local Area Network, Wide Area Network, Switching, The Internet, Accessing the Internet, standards and administration Internet Standards.	02	Data Communication and Networking , Behrouz Forouzan	Blackboard PPT
	Network Models, Protocol layering, Scenarios, Principles of Protocol Layering, Logical Connections, TCP/IP Protocol Suite, Layered Architecture, Layers in the TCP/IP Protocol Suite, Encapsulation and Decapsulation, Addressing, Multiplexing and Demultiplexing. Detailed introduction to Physical Layer, Detailed introduction to Data-Link Layer, Detailed introduction to Network	08		Blackboard PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Layer, Detailed introduction to Transport Layer, Detailed introduction to Application Layer.			
	Data and Signals, Analog and Digital Data, Analog and Digital Signals, Sine Wave Phase, Wavelength, Time and Frequency Domains, Composite Signals, Bandwidth, Digital Signal, Bit Rate, Bit Length, Transmission of Digital Signals, Transmission Impairments, Attenuation, Distortion, Noise, Data Rate Limits, Performance, Bandwidth, Throughput, Latency (Delay)	05		Blackboard PPT
USCS403 Computer Networks UNIT - 2	Digital Transmission digital-to-digital conversion, Line Coding, Line Coding Schemes, analog-to-digital conversion, Pulse Code Modulation (PCM), Transmission Modes, Parallel Transmission, Serial Transmission. Analog Transmission, digital-to-analog Conversion, Aspects of Digital-to-Analog Conversion, Amplitude Shift Keying, Frequency Shift Keying, Phase Shift Keying, analog-to-analog Conversion, Amplitude Modulation (AM), Frequency Modulation (FM), Phase Modulation (PM), Multiplexing, Frequency-Division Multiplexing, Wavelength-Division Multiplexing, Time-Division Multiplexing. Transmission Media, Guided Media, Twisted-Pair Cable, Coaxial Cable, Fiber-Optic Cable. Switching, Three Methods of Switching , Circuit Switched Networks, Packet Switching,	09	Data Communication and Networking , Behrouz Forouzan	Blackboard PPT
	Introduction to Data-Link Layer, Nodes and Links, Services, Two Sub-layers, Three Types of addresses, Address Resolution Protocol (ARP). Error Detection and Correction, introduction, Types of Errors, Redundancy, Detection versus Correction,	06		Blackboard PPT
USCS403	Media Access Control (MAC), random access, CSMA, CSMA/CD, CSMA/CA, controlled access, Reservation, Polling, Token Passing, channelization, FDMA, TDMA, CDMA.	02	Data Communication	Blackboard PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Computer Networks UNIT - 3			and Networking , Behrouz Forouzan	
	Connecting Devices and Virtual LANs, connecting devices, Hubs, Link-Layer	02		
	Introduction to Network Layer, network layer services, Packetizing, Routing and Forwarding, Other Services, IPv4 addresses, Address Space, Classful Addressing.	03		
	Unicast Routing, General Idea, Least-Cost Routing, Routing Algorithms, Distance-Vector Routing, Link-State Routing, Path-Vector Routing, Introduction to Transport Layer, Transport-Layer Services, Connectionless and Connection-Oriented Protocols.	03		
	Transport-Layer Protocols, Service, Port Numbers, User Datagram Protocol, User Datagram, UDP Services, UDP Applications, Transmission Control Protocol, TCP Services, TCP Features, Segment.	03

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar DEPARTMENT: Computer Science CLASS: S.Y.B.Sc.(CS)

SEMESTER: 4 MONTH: December to March ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- Appreciate the relevance of linear algebra in a field of computer science.
- Understand the concept through program implementation.
- Instill the computational thinking while learning linear algebra.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405 **Linear Algebra using python** **<u>Unit 1</u>**	**Field**: ● Introduction to complex number,numbers in python,Abstracting over field ● playing with GF(2),	4	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board, chalk and duster
	Vector Space: ● Vectors are functions, ● Vector addition and scalar multiplication ● Combining vector addition and scalar multiplication ● Geometry of sets of vectors	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board, chalk and duster
	● Dictionary based representation of vectors ● Dot product	2	Coding the matrix linear algebra through application to computer science, edition 1 philip N	Black board, chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Klein, Newtonian press(2013)	
	Linear system : ● Homogeneous and non homogeneous equation ● Solving triangular system of linear equations	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board, chalk and duster
	● Linear combination and linear span	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board, chalk and duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405 **Linear Algebra using python** **<u>Unit 2</u>**	**Matrix:** ● Matrices as vectors, transpose ● Matrix -vector and vector-matrix multiplication in terms of linear combination ● Matrix -vector and vector-matrix multiplication in terms of dot-product	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board,chalk and duster
	● Null space, computing Sparse matrix, vector product	3	Coding the matrix linear algebra through	Black board,chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	● Linear function ● Inner product and outer product ● From function inverse to matrix inverse		application to computer science, edition 1 philip N Klein, Newtonian press(2013)	
	Basis: ● Coordinate system,Two greedy algorithm for finding set of generators ● Minimum spanning forest and GF(2) ● Linear dependence and independence	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board,chalk and duster
	Basis: ● Basis, unique representation,change of basis ● Computational problems involving finding a basis	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board,chalk and duster
	Dimensions: ● Dimension and rank, ● Direct sum ● Dimension and linear function ● The annihilator	3	Coding the matrix linear algebra through application to computer science, edition 1 philip N Klein, Newtonian press(2013)	Black board,chalk and duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: TYCS

SEMESTER: VI MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Ability to use knowledge of data structures and indexing methods in information retrieval Systems·
- Understand the underlined problems related to IR
- Acquire the necessary experience to design, and implement real applications using Information Retrieval systems.

APER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS604, Information Retrieval Unit 1	Introduction to Information Retrieval: Introduction, History of IR, Components of IR, and Issues related to IR, Boolean retrieval, Dictionaries and tolerant retrieval.	07	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008 2. Modern Information Retrieval: The Concepts and Technology behind Search, Ricardo Baeza - Yates and Berthier Ribeiro – Neto, 2 nd Edition, ACM Press Books 2011.	Black Board and chalk, PowerPoint
USCS604,	Link Analysis and Specialized Search: Link Analysis, hubs and authorities, Page Rank and HITS algorithms, Similarity,	12	1. Introduction to Information Retrieval, C.	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Information Retrieval Unit 2	Hadoop & Map Reduce, Evaluation, Personalized search, Collaborative filtering and content-based recommendation of documents and products, handling ―invisible‖ Web, Snippet generation, Summarization, Question Answering, Cross-Lingual Retrieval.		Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008	
USCS604, Information Retrieval Unit 3	Web Search Engine: Web search overview, web structure, the user, paid placement, search engine optimization/spam, Web size measurement, search engine optimization/spam, Web Search Architectures.	06	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008	Black Board and chalk, PowerPoint
	XML retrieval: Basic XML concepts, Challenges in XML retrieval, A vector space model for XML retrieval, Evaluation of XML retrieval, Text-centric versus data-centric XML retrieval.	06	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: Information Technology CLASS: TYCS

SEMESTER: V MONTH: December to March ACADEMIC YEAR:2018-2019

LEARNING OBJECTIVE/S:

- To understand the ethics, legality, methodologies and techniques of hacking.

The learners will be able to:

- Learner will know to identify security vulnerabilities and weaknesses in the target applications.
- They will also know to test and exploit systems using various tools and understand the impact of hacking in real time machines.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Ethical Hacking Elective-II USCS506 Unit 1	**Information Security : Attacks and Vulnerabilities** **Introduction to information security :** Asset, Access Control, CIA, Authentication, Authorization, Risk, Threat, Vulnerability, Attack, Attack Surface, Malware, Security-Functionality-Ease of Use Triangle	4	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND Internet	Projector, Laptop, Black board& Chalk
	Types of malware : Worms, viruses, Trojans, Spyware, Rootkits	2	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND	Projector, Laptop, Black board& Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Internet	
	Types of vulnerabilities : OWASP Top 10 : cross-site scripting (XSS), cross site request forgery (CSRF/XSRF), SQL injection, input parameter manipulation, broken authentication, sensitive information disclosure, XML External Entities, Broken access control, Security Misconfiguration, Using components with known vulnerabilities, Insufficient Logging and monitoring, OWASP Mobile Top 10, CVE Database	4	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND Internet	Projector, Laptop, Black board& Chalk
	Types of attacks and their common prevention mechanisms : Keystroke Logging, Denial of Service (DoS /DDoS), Waterhole attack, brute force, phishing and fake WAP, Eavesdropping, Man-in-the-middle, Session Hijacking, Clickjacking, Cookie Theft, URL Obfuscation, buffer overflow, DNS poisoning, ARP poisoning, Identity Theft, IoT Attacks, BOTs and BOTNETs	4	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND Internet	Projector, Laptop, Black board& Chalk
	Case-studies : Recent attacks – Yahoo, Adult Friend Finder, eBay, Equifax, WannaCry, Target Stores, Uber, JP Morgan Chase, Bad Rabbit	1	Internet	Projector, Laptop, Black board& Chalk
Ethical Hacking Elective-II USCS506 Unit 2	**Ethical Hacking – I (Introduction and pre-attack) Introduction:** Black Hat vs. Gray Hat vs. White Hat (Ethical) hacking, Why is Ethical hacking needed?, How is Ethical hacking different from security auditing and digital forensics?, Signing NDA, Compliance and Regulatory 15L concerns, Black box vs. White box vs. Black box, Vulnerability assessment and Penetration Testing.	5	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND Internet	Projector, Laptop, Black board& Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Approach : Planning - Threat Modeling, set up security verification standards, Set up security testing plan – When, which systems/apps, understanding functionality, black/gray/white, authenticated vs. unauthenticated, internal vs. external PT, Information gathering, Perform Manual and automated (Tools: WebInspect/Qualys, Nessus, Proxies, Metasploit) VA and PT, How WebInspect/Qualys tools work: Crawling/Spidering, requests forging, pattern matching to known vulnerability database and Analyzing results, Preparing report, Fixing security gaps following the report	5	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
	Enterprise strategy : Repeated PT, approval by security testing team, Continuous Application Security Testing,	3	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
	Phases: Reconnaissance/foot-printing/Enumeration, Scanning, Sniffing	2	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
Ethical Hacking Elective-II	**Ethical Hacking :**Enterprise Security Phases : Gaining and Maintaining Access : Systems hacking – Windows and Linux – Metasploit and Kali Linux, Keylogging, Buffer Overflows, Privilege Escalation, Network hacking - ARP Poisoning, Password Cracking, WEP Vulnerabilities, MAC Spoofing, MAC Flooding, IPSpoofing, SYN Flooding, Smurf attack,	5	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk
	Applications hacking : SMTP/Email-based attacks, VOIP vulnerabilities, Directory traversal, Input Manipulation, Brute force	5	Certified Ethical Hacker Study Guide v9, Sean-Philip	Projector, Laptop, Black board& Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SAMPADA DESHMUKH DEPARTMENT: INFORMATION TECHNOLOGY CLASS: T.Y.C.S.

SEMESTER: VI MONTH: DECEMBER - MARCH ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the procedures for identification, preservation, and extraction of electronic evidence
- Understand auditing and investigation of network and host system intrusions
- Learn analysis of documentation of information gathered
- Investigate various media to collect evidence, report them in a way that would be acceptable in the court of law
- Plan and prepare for all stages of an investigation - detection, initial response and management interaction

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande DEPARTMENT: Computer Science CLASS: T.Y.C.S.

SEMESTER: VI MONTH: Dec - March ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

After completion of this course, learner should be able to list various applications of wireless sensor networks, describe the concepts, protocols, design, implementation and use of wireless sensor networks. Also implement and evaluate new ideas for solving wireless sensor network design issues.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 01	**Introduction:** Introduction to Sensor Networks, unique constraints and challenges. Advantage of Sensor Networks, Applications of Sensor Networks, Mobile AdhocNETworks (MANETs) and Wireless Sensor Networks, Enabling technologies for Wireless Sensor Networks.	07	Protocols and Architectures for Wireless Sensor Network, Holger Kerl, Andreas Willig, John Wiley and Sons, 2005	Blackboard PPT Projector
	Sensor Node Hardware and Network Architecture: Single-node architecture, Hardware components & design constraints, Operating systems and execution environments, introduction to TinyOS and nesC. Network architecture, Optimization goals and figures of merit, Design principles for WSNs, Service interfaces of WSNs, Gateway concepts.	08		Blackboard PPT Projector

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 02	**Medium Access Control Protocols:** Fundamentals of MAC Protocols, MAC Protocols for WSNs, Sensor-MAC Case Study.	05	Wireless Sensor Networks Technology, Protocols, and Applications ,KazemSohraby, Daniel Minoli and TaiebZnati, John Wiley & Sons, 2007	Blackboard PPT
	Routing Protocols : Data Dissemination and Gathering, Routing Challenges and Design Issues in Wireless Sensor Networks, Routing Strategies in Wireless Sensor Networks.	05		Blackboard PPT
	Transport Control Protocols : Traditional Transport Control Protocols, Transport Protocol Design Issues, Examples of Existing Transport Control Protocols, Performance of Transport Control Protocols.	05		Blackboard PPT
USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 03	**Introduction, Wireless Transmission and Medium Access Control:** Applications, A short history of wireless communication.	02	Mobile communications, Jochen Schiller,2nd Edition, Addison wisely , Pearson Education,2012	Blackboard PPT
	Wireless Transmission: Frequency for radio transmission, Signals, Antennas, Signal propagation, Multiplexing, Modulation, Spread spectrum, Cellular systems.	05		Blackboard PPT
	Telecommunication, Satellite and Broadcast Systems: GSM: Mobile services, System architecture, Radio interface, Protocols, Localization And Calling, Handover, security, New data services; DECT: System architecture, Protocol architecture; ETRA, UMTS and IMT- 2000. Satellite Systems: History, Applications, Basics: GEO, LEO, MEO; Routing, Localization, Handover.	08		Blackboard PPT

CLASS: _FYCS SEMESTER: 1 MONTH: July to Oct ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

Open Source has acquired a prominent place in software industry. Having knowledge of Open Source and its related technologies is an essential for Computer Science student. This course introduces Open Source methodologies and ecosystem to students.

Expected Learning Outcome:

1) Upon completion of this course, students should have a good working knowledge of Open Source ecosystem, its use, impact and importance.

2) This course shall help student to learn Open Source methodologies, case studies with real life examples

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT:INFORMATION TECHNOLOGY

CLASS:F.Y.B.Sc.CS SEMESTER:I MONTH:JULY-OCTOBER ACADEMIC YEAR:2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the digital representation of data in a computer system.
- Understand the theory and architecture of central processing unit.
- Learn the concepts of parallel processing, pipelining and interprocessor communication.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-I Unit I Computer Organization and Design	**Computer Abstractions and Technology:** Basic structure and operation of a computer, functional units and their interaction.	1	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Blackboard, Chalk
	Representation of numbers and characters.	3		Blackboard, Chalk
	Logic circuits and functions:Combinational circuits and functions: Basic logic gates and functions, truth tables; logic circuits and functions.	1		Blackboard, Chalk
	Minimization with Karnaugh maps.	3		Blackboard, Chalk
	Synthesis of logic functions with and-or-not gates, nand gates, nor gates. Fan-in and fan-out requirements; tristate buffers.	2		Blackboard, Chalk
	Half adder, full adder, ripple carry adder. (Flip flops) Gated S-R and D latches, edge-triggered D latch.	2		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Shift registers and registers. Decoders, multiplexers.	1		Blackboard, Chalk
	Sequential circuits and functions: State diagram and state table; finite state machines and their synthesis.	2		Blackboard, Chalk
Paper-I Unit II Computer Organization and Design	**Instruction set architectures:** Memory organization, addressing and operations; word size, big-endian and little-endian arrangements.	2	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Blackboard, Chalk
	Instructions, sequencing. Instruction sets for RISC and CISC (examples Altera NIOS II and Freescale ColdFire).	3		Blackboard, Chalk
	Operand addressing modes; pointers; indexing for arrays	3		Blackboard, Chalk
	Machine language, assembly language, assembler directives. Function calls, processor runtime stack, stack frame.	3		Blackboard, Chalk
	Types of machine instructions: arithmetic, logic, shift, etc.	2		Blackboard, Chalk
	Instruction sets, RISC and CISC examples.	2		Blackboard, Chalk
Paper-I Unit III Computer Organization and Design	**Basic Processor Unit:**Main components of a processor: registers and register files, ALU, control unit, instruction fetch unit, interfaces to instruction and data memories.	4	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Blackboard, Chalk
	Datapath. Instruction fetch and execute; executing arithmetic/logic, memory access and	3		Blackboard, Chalk
	branch instructions; hardwired and microprogrammed control for RISC and CISC.	3		Blackboard, Chalk
	Basic I/O:Accessing I/O devices, data transfers between processor and I/O devices.	3		Blackboard, Chalk
	Interrupts and exceptions: interrupt requests and processing.	2		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: FYCS

SEMESTER: I MONTH: JULY-OCTOBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the concepts of programming before actually starting to write programs.
- Develop logic for Problem Solving.
- Be familiar about the basic constructs of programming such as data, operations, conditions, loops, functions etc.
- Apply the problem solving skills using syntactically simple language i.e. Python (version: 3.X or higher)

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS102, Unit 1, Programming with Python- I	Reasons for Python as the learner's first programming language. Introduction to the IDLE interpreter (shell) and its documentation. Expression evaluation: similarities and differences compared to a calculator; expressions and operators of types int, float, boolean. Built-in function type. Operator precedence.	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Enumeration of simple and compound statements. The expression statement. The assert statement, whose operand is a boolean expression (values true or false). The assignment statement, dynamic binding of names to values, automatic and implicit declaration of variable names with the assignment statement; assigning the valueNone to a name.	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	The del (delete) statement. Input/output with print and input functions. A statement list as a single interpreter command.	02	Paul Gries, Programming: An Introduction	Black Board and chalk

			to Computer Science Using Python 3	
	The import statement for already-defined functions and constants. The augmented assignment statement. The built-in help() function. Interactive and script modes of IDLE, running a script, restarting the shell. The compound statement def to define functions; the role of indentation for delimiting the body of a compound statement; calling a previously defined function. Compound data types str, tuple and list	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Indexing individual elements within these types. Strings and tuples are immutable, lists are mutable. Built-in functions min, max, sum. Interactive solution of model problems, by repeatedly executing the body of a loop.	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
USCS102, Unit 2, Programming with Python- I	Advantages of functions, function parameters, formal parameters, actual parameters, global and local variables..	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	The range function, the iterative for statement. The conditional statements if, if-else, if-elif-else. The iterative statements while, while-else, for-else	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	The continue statement to skip over one iteration of a loop, the break statement to exit the loop. Nested compound statements.	04	Paul Gries, Programming: An Introduction	Black Board and chalk

			to Computer Science Using Python 3	
	Dictionaries: concept of key-value pairs, techniques to create, update and delete dictionary items. Problem-solving using compound types and statements	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
USCS102, Unit 3, Programming with Python- I	Anonymous functions. List comprehensions.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Gentle introduction to object-oriented programming; using the built-in dir() function, enumerate the methods of strings, tuples, lists, dictionaries	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk
	Using these methods for problem-solving with compound types.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Black Board and chalk

TEACHING PLAN (UNIT 1 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: I MONTH: JULY ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- Define a function, its domain, co domain, range and bijective functions, composite and inverse functions
- Check whether a given relation is equivalence or partial order relation.
- Represent the given relation using diagraph, adjacency matrix and arrow diagram.
- Solve a recurrence relation using various methods like back tracking , generating function method etc.
- Explain and solve the tower of Hanoi puzzle.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
DISCRETE MATHEMATICS Unit 1 Recurrence relations	➢ Functions, its domain, co domain and range ➢ Bijective, composite and inverse functions ➢ Relations: definition, examples and properties ➢ Equivalence & partial order relation, Hasse diagram ➢ Recurrence relation: definition, formulation & solving ➢ Tower of Hanoi puzzle	2 3 2 3 4 1	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

NAME OF THE STAFF: Manisha Machhindra Kotkar DEPARTMENT: Computer Science

CLASS: F.Y.B.Sc.(CS) SEMESTER: I MONTH: June to September ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:

- The learners will be able to know descriptive statistical concepts
- The learner will able to study probability concepts required for computer learners.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: 6 Descriptive statistics and introduction to probability **<u>Unit 1</u>**	**Data Presentation**: ● Data types:attribute,variable , discrete and continuous variable ● Data presentation: frequency distribution,histogram, O give curves, stem and leaf display	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Chalk and duster
	Data Aggregation: ● Measures of central tendency: mean , median, mode for raw data, discrete, grouped frequency distribution	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	
	Measures of dispersion: ● Variance, standard deviation, coefficient of variation for raw data,discrete, grouped frequency distribution, quartiles, quantiles real life example	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 2	**Moments**: ● Raw moments, Central moments,relation between raw and central moment	3		
	Measures of Skewness and kurtosis: ● Based on moments and quartiles ● Relation between mean , median and mode for symmetric and asymmetric frequency curve	3		
	Correlation and regression: ● Bivariate data, scatter plot, correlation,nonscence correlation, karl-pearson's coefficient of correlation, independence	5		
	Linear regression: ● Fitting of linear regression using least square method, coefficient of determination, properties of linear regression (only statement)	4		
Unit 3	**Probability:** ● Random experiment,sample space,events, types and operations of events ● Probability definition:classical, axiomatic ● Theorem of probability (without proof) -O<P(A)<1	8		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	- P(AUB)=P(A)+P(B)-P(AΔB) - P(A')=1-P(A) - P(A)<P(B) if A is subset of B			
	Conditional probability,Baye's theorem, independence, examples of probability	7

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: FYCS SEMESTER: IMONTH:JULY-OCTOBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

The learners will be able to : Students should be able to evaluate business information problem and find the requirements of a problem in terms of data. Students should be able to design the database schema with the use of appropriate data types for storage of data in database. Students should be able to create, manipulate, query and back up the databases.

.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS201, Introduction to Database Management Systems, UNIT-I	**Introduction of DBMS** Database, DBMS – Definition, Overview of DBMS, Advantages of DBMS, Levels of abstraction, Data independence, DBMS Architecture	03	Ramez Elmasri &Shamkant B.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010.	Blackboard, Chalk
	Data models – Client-Server Architecture,Object Based Logical Model, Record Based Logical Model (relational, hierarchical, network)	02		Blackboard, Chalk
	Entity Relationship Model - Entities, attributes, entity sets, relations, relationship sets , Additional constraints (key constraints, participation constraints, weak entities, aggregation / generalization, Conceptual Design using ER (entities VS attributes, Entity Vs relationship, binary Vs ternary, constraints beyond ER)	04		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Relational data model– Domains, attributes, Tuples and Relations, Relational Model Notation, Characteristics of Relations, Relational Constraints - primary key, referential integrity, unique constraint, Null constraint, Check constraint	04		Blackboard, Chalk
	Entity to Table, Relationship to tables with and without key constraints.	02		Blackboard, Chalk
USCS201, Introduction to Database Management Systems, UNIT-II	**ER to The Relational Model** Schema Refinement and normal forms :Functional Dependencies and 1NF, 2NF, 3NF and BCNF normal forms based on primary keys, lossless join decomposition.	03	1.RamezElmasri&ShamkantB.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010. 2. Joel Murach, Murach's MySQL, Murach, 2012	Blackboard, Chalk
	Relational Algebra operations (selection, projection, set operations union, intersection, difference, cross product, Joins –conditional, equi join and natural joins, division)	03		Blackboard, Chalk
	DDL Statements - Creating Databases, Using Databases, datatypes, Creating Tables (with integrity constraints – primary key, default, check, not null), Altering Tables, Renaming Tables, Dropping Tables, Truncating Tables, Backing Up and Restoring databases	02		Blackboard, Chalk
	DML Statements – Viewing the structure of a table insert, update, delete, Select – all columns, specific columns, unique records, conditional select, in clause, between clause, limit, aggregate functions (count, min, max, avg, sum), group by clause, having clause	03		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Functions – String Functions (concat, instr, left, right, mid, length, lcase/lower, ucase/upper, replace, strcmp, trim, ltrim, rtrim), Math Functions (abs, ceil, floor, mod, pow, sqrt, round, truncate) Date Functions (adddate, datediff, day, month, year, hour, min, sec, now, reverse)	02		Blackboard, Chalk
	Joining Tables – inner join, outer join (left outer, right outer, full outer)	02		Blackboard, Chalk
USCS201, Introduction to Database Management Systems, UNIT-III	**Sub queries** Sub queries – sub queries with IN, EXISTS, sub queries restrictions, Nested sub queries, ANY/ALL clause, correlated sub queries	03	Joel Murach, Murach's MySQL, Murach, 2012	Blackboard, Chalk
	Database Protection: Security Issues, Threats to Databases, Security Mechanisms, Role of DBA, Discretionary Access Control	03		Blackboard, Chalk
	Views (creating, altering dropping, renaming and manipulating views)	03		Blackboard, Chalk
	DCL Statements (creating/dropping users, privileges introduction, granting/revoking privileges, viewing privileges)	03		Blackboard, Chalk

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: SYCS

SEMESTER: III MONTH: JUNE- SEPTEMBER ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- Write, compile and execute Java programs
- Build robust applications using Java's object-oriented features
- Create robust applications using Java class libraries
- Develop platform-independent GUIs
- Read and write data using Java streams

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS302, Core Java Unit 1	The Java Language: Features of Java, Java programming format, Java Tokens, Java Statements, Java Data Types, Typecasting, Arrays .	05	1) Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014 2) E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014 3) https://docs.oracle.com/javase/tutorial/	Black Board and chalk, Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	OOPS: Introduction, Class, Object, Static Keywords, Constructors, this Key Word, Inheritance, super Key Word, Polymorphism (overloading and overriding), Abstraction, Encapsulation, Abstract Classes, Interfaces	05	1. E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	String Manipulations: String, String Buffer, String Tokenizer	01	https://docs.oracle.com/javase/tutorial/	Black Board and chalk, PowerPoint
	Packages: Introduction to predefined packages (java.lang, java.util,java.io, java.sql, java.swing), User Defined Packages, Access specifiers	04	1. E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
USCS302, Core Java Unit 2	Exception Handling: Introduction, Pre-Defined Exceptions, Try-Catch-Finally, Throws, throw, User Defined Exception examples.	05	1. Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	Black Board and chalk, PowerPoint
	Multithreading: Thread Creations, Thread Life Cycle, Life Cycle Methods, Synchronization, Wait() notify() notify all() methods I/O	04	1. Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	Black Board and chalk, PowerPoint
	Streams: Introduction, Byte-oriented streams, Character-oriented streams, File, Random access File, Serialization	03	1.Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Networking: Introduction, Socket, Server socket, Client – Server Communication	03	https://www.tutorialspoint.com/java/java_networking.html	PowerPoint
USCS302, Core Java Unit 3	Wrapper Classes: Introduction, Byte, Short, Integer, Long, Float, Double, Character, Boolean classes	02	1.E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	Collection Framework: Introduction, util Package interfaces, List, Set, Map, List interface & its classes, Set interface & its classes, Map interface & its classes	04	1.E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	Inner Classes: Introduction, Member inner class, Static inner class, Local inner class, Anonymous inner class	04	1.E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	AWT: Introduction, Components, Event-Delegation-Model, Listeners, Layouts, Individual components Label, Button, CheckBox, Radio Button, Choice, List, Menu, Text Field, Text Area	05	1. E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:MONIKA MADHUKAR RAUT DEPARTMENT: IT

CLASS:SYCS SEMESTER: III MONTH: JUNE TO SEPTEMBER ACADEMIC YEAR:2018-19

LEARNING OBJECTIVE/S:
The learners will be able to design and develop state of - the art web applications using client-side scripting, server-side scripting, and database connectivity

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307) Unit I	**HTML5:** Fundamental Elements of HTML, Formatting Text in HTML, Organizing Text in HTML, Links and URLs in HTML, Tables in HTML,Images on a Web Page, Image Formats, Image Maps, Colours, FORMs in HTML, Interactive Elements, Working with Multimedia - Audio and Video File Formats, HTML elements for inserting Audio / Video on a web page	8	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and jQuery, 2ed, Dreamtech Press	Black Board and Chalk, Computers while practical session
	CSS: Understanding the Syntax of CSS, CSS Selectors, Inserting CSS in an HTML Document, CSS properties to work with background of a Page, CSS properties to work with Fonts and Text Styles, CSS properties for positioning an element	7		
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307)	**JavaScript:**Using JavaScript in an HTML Document, Programming Fundamentals of JavaScript – Variables, Operators, Control Flow Statements, Popup Boxes, Functions – Defining and Invoking a Function, Defining Function arguments,Defining a Return Statement, Calling Functions with Timer	6	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and	Black Board and Chalk, Computers while practical session

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II	**JavaScript Objects** - String, RegExp, Math, Date, Browser Objects - Window, Navigator, History, Location, Document, Cookies, Document Object Model, Form Validation using JavaScript	2	jQuery, 2ed, Dreamtech Press	Black Board and Chalk, Computers while practical session
	XML: Comparing XML with HTML, Advantages and Disadvantages of XML, Structure of an XML Document, XML Entity References, DTD, XSLT: XSLT Elements and Attributes - xsl:template, xsl:apply-templates, xsl:import, xsl:call-template, xsl:include, xsl:element, xsl:attribute, xsl:attribute-set, xsl:value-of	7		Black Board and Chalk, Computers while practical session
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307) Unit III	**AJAX**: AJAX Web Application Model, How AJAX Works, XMLHttpRequest Object – Properties and Methods, Handling asynchronous requests using AJAX	4	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and jQuery, 2ed, Dreamtech Press, PHP: A Beginners Guide, VikramVaswani, TMH	Black Board and Chalk, Computers while practical session
	PHP: Variables and Operators, Program Flow, Arrays, Working with Files and Directories, Working with Databases, Working with Cookies, Sessions and Headers	7		Black Board and Chalk, Computers while practical session
	Introduction to jQuery: Fundamentals, Selectors, methods to access HTML attributes, methods for traversing, manipulators, events, effects	4		Black Board and Chalk, Computers while practical session

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT

CLASS:SYCS SEMESTER: SEM-III MONTH:JUN-SEP ACADEMIC YEAR:2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:Master concepts of stored procedure and triggers and its use.Learn about using PL/SQL for data management and understand concepts and implementations of transaction management and crash recovery.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-4 DBMS, UNIT-1	**Stored Procedures:** Types and benefits of stored procedures, creating stored procedures, executing stored procedures, altering stored procedures, viewing stored procedures.	4	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross , Database Management Systems by Ramakrishnam, Gehrke.	Blackboard & Chalk
	Triggers: Concept of triggers, Implementing triggers – creating triggers, Insert, delete, and update triggers, nested triggers, viewing, deleting and modifying triggers, and enforcing data integrity through triggers.	5		
	Sequences: creating sequences, referencing, altering and dropping a sequence.	2		
	File Organization and Indexing: Cluster, Primary and secondary indexing, Index data structure: hash and Tree based indexing	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Comparison of file organization: cost model, Heap files, sorted files, clustered files. Creating, dropping and maintaining indexes.	2		
UNIT-2	**Fundamentals of PL/SQL:** Defining variables and constants, PL/SQL expressions and comparisons: Logical Operators, Boolean Expressions, CASE Expressions Handling.	3	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross	Blackboard & Chalk
	Null Values in Comparisons and Conditional Statements, PL/SQL Datatypes: Number Types, Character Types, Boolean Type, Datetime and Interval Types.	3		
	Overview of PL/SQL Control Structures: Conditional Control: IF and CASE Statements, IF-THEN Statement, IF-THEN-ELSE Statement,	4		
	CASE Statement, Iterative Control: LOOP and EXIT Statements, WHILE-LOOP, FOR-LOOP, Sequential Control: GOTO and NULL Statements	5		
UNIT 3	**Transaction Management:** ACID Properties, Serializability, Two-phase Commit Protocol, Concurrency Control, Lock Management	3	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross, Database Management Systems by	Blackboard & Chalk
	Lost Update Problem, Inconsistent Read Problem , Read-Write Locks, Deadlocks Handling, Two Phase Locking protocol	3		
	DCL Statements: Defining a transaction, Making Changes Permanent with COMMIT, Undoing Changes with ROLLBACK, Undoing Partial Changes with SAVEPOINT and ROLLBACK.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Crash Recovery: ARIES algorithm. The log based recovery, recovery related structures like transaction and dirty page table	3	Ramakrishnam, Gehrke	
	Write-ahead log protocol, check points, recovery from a system crash, Redo and Undo phases.	3		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 45

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Manisha Kotkar DEPARTMENT: CS

CLASS: S.Y.B.Sc.C.S. SEMESTER: III MONTH: JULY – OCTOBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to :

1. Appreciate beauty of combinatorics and how combinatorial problems naturally arise in many settings.
2. Understand the combinatorial features in real world situations and Computer Science applications.
3. Apply combinatorial and graph theoretical concepts to understand Computer Science concepts and apply them to solve problems

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
UNIT – I **COMBINATORICS AND GRAPH THEORY**	**Introduction to Combinatorics:** Enumeration, Combinatorics and Graph Theory/ Number Theory/Geometry and Optimization, Sudoku Puzzles	3	Applied Combinatorics Mitchel T. Keller and William T. Trotter	Black-Board
	. Strings, Sets, and Binomial Coefficients: Strings- A First Look, Combinations, Combinatorial, The Ubiquitous Nature of Binomial Coefficients,	4		
	The Binomial, Multinomial Coefficients. Induction: Introduction, The Positive Integers are Well Ordered, The Meaning of Statements,	4		
	Binomial Coefficients Revisited, Solving Combinatorial Problems Recursively, Mathematical Induction, and Inductive Definitions Proofs by Induction. Strong Induction	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT:CS

CLASS:SYCS SEMESTER: SEM-3 MONTH: JUN-SEP ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
Students are able to :
Learn physical interfaces and electronics of Raspberry Pi and program them using practical's
Learn how to make consumer grade IoT safe and secure with proper use of protocols.

PAPER,TITLE, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 6 Physical computing and IOT programming UNIT 1	**SoC and Raspberry PiSystem on Chip**: What is System on chip? Structure of System on Chip. **SoC products:** FPGA, GPU, APU, Compute Units.	4	Physical computing IOT programming by Himalaya publication	BLACK BOARD AND CHALK
	ARM 8 Architecture: SoC on ARM 8. ARM 8 Architecture Introduction	4		
	Introduction to Raspberry Pi: Introduction to Raspberry Pi, Raspberry Pi Hardware, Preparing your raspberry Pi.	4		
	Raspberry Pi Boot: Learn how this small SoC boots without BIOS. Configuring boot sequences and hardware	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 2	**Programming Raspberry Pi** **Raspberry Pi and Linux**: About Raspbian, Linux Commands, Configuring Raspberry Pi with Linux Commands	3	Physical computing IOT programming by Himalaya publication	BLACK BOARD AND CHALK
	Programing interfaces: Introduction to Node.js, Python.	4		
	Raspberry Pi Interfaces: UART, GPIO, I2C, SPI	4		
	Useful Implementations: Cross Compilation, Pulse Width Modulation, SPI for Camera.	4		
Unit 3	. **Introduction to IoT**: What is IoT? IoT examples, Simple IoT LED Program.	3	Physical computing IOT programming by Himalaya publication	BLACK BOARD AND CHALK
	IoT and Protocols **IoT Security**: HTTP, UPnp, CoAP, MQTT, XMPP.	4		
	IoT Service as a Platform: Clayster, Thinger.io, SenseIoT, carriots and Node RED.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	IoT Security and Interoperability: Risks, Modes of Attacks, Tools forSecurity and Interoperability.	4		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 45

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GayatreeKarnik DEPARTMENT: IT CLASS:S.Y.B.Sc.(C.S)

SEMESTER: III MONTH:JUNE-JULY ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- Importance of Operating System, role ,operations and function and environment
- Operating system services, system calls and structure
- Process scheduling, inter process communication and details of threads

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Unit 1 Operating Systems	**Introduction and Operating-Systems Structures**: Definition of Operating system, Operating System's role, Operating-System Operations, Functions of Operating System, Computing Environments	7	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk
	Operating-System Structures: Operating-System Services, User and Operating-System Interface, System Calls, Types of System Calls, Operating-System Structure	5	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk
	Processes: Process Concept, Process Scheduling, Operations on Processes, Interprocess Communication. **Threads**: Overview, Multicore Programming, Multithreading Models	3	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GayatreeKarnik DEPARTMENT: IT

CLASS:S.YB.Sc.(C.S..) SEMESTER:III MONTH:JULY-AUGUST ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- How the process are synchronized and scheduled in the CPU
- Different scheduling algorithms
- Deadlocks, how to avoid and recover from deadlocks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Unit 2 Operating Systems	**Process Synchronization**: General structure of a typical process, race condition, The Critical-Section Problem, Peterson's Solution, Synchronization Hardware, Mutex Locks, Semaphores, Classic Problems of Synchronization, Monitors	5	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk
	CPU Scheduling: Basic Concepts, Scheduling Criteria, Scheduling Algorithms (FCFS, SJF, SRTF, Priority, RR, Multilevel Queue Scheduling, Multilevel Feedback Queue Scheduling), Thread Scheduling	5	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk
	Deadlocks: System Model, Deadlock Characterization, Methods for Handling Deadlocks, Deadlock Prevention, Deadlock Avoidance, Deadlock Detection, Recovery from Deadlock	5	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Black Board and Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Mrs. Jagruti S. Raut** DEPARTMENT: **CS** CLASS: **S.Y.B.Sc.(CS)**

SEMESTER: **III** MONTH: **June - September** ACADEMIC YEAR: **2018-2019**

LEARNING OBJECTIVE/S:
The learners will be able:

1. Understand Grammar and Languages.
2. Learn about Automata theory and its application in Language Design.
3. Learn about Turing Machines and Pushdown Automata.
4. Understand Linear Bound Automata and its applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS301 Paper I **Theory of Computation** **UNIT I**	**Automata Theory:** Defining Automaton, Finite Automaton, Transitions and Its properties, Acceptability by Finite Automaton	4	Theory of Computer Science, K. L. P Mishra, Chandrasekharan, PHI,3rd Edition. Introduction to Computer Theory, Daniel Cohen, Wiley,2nd Edition.	Chalk and Board
	Nondeterministic Finite State Machines, DFA and NDFA equivalence, Mealy and Moore Machines, Minimizing Automata.	4		
	Formal Languages: Defining Grammar, Derivations, Languges generated by Grammar	3		
	Chomsky Classification of Grammar and Languages, Recursive Enumerable Sets, Operations on Languages, Languages and Automata	4		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Mrs. Jagruti S. Raut** DEPARTMENT: **CS** CLASS: **T.Y.B.Sc.(CS)**

SEMESTER: **V** MONTH: **June - September** ACADEMIC YEAR: **2018-2019**

LEARNING OBJECTIVE/S:
The learners will be able:

- To get a clear understanding of AI and different search algorithms used for solving problems.
- To get acquainted with different learning algorithms and models used in machine learning.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS501 Paper I **Artificial Intelligence** **UNIT I**	**What Is AI:** Foundations, History and State of the Art of AI.	4	Artificial Intelligence: A Modern Approach, Stuart Russell and Peter Norvig,3rd Edition.	Microsoft PowerPoint Presentation
	Intelligent Agents: Agents and Environments, Nature of Environments, Structure of Agents.	3		
	Problem Solving by searching: Problem-Solving Agents, Example Problems, Searching for Solutions, Uninformed Search Strategies.	4		
	Informed (Heuristic) Search Strategies, Heuristic Functions.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV** DEPARTMENT: **IT** CLASS:**TYBSCCS**

SEMESTER:**V** MONTH:**JUNE-SEPT** ACADEMIC YEAR:**2018-19**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand computer Graphics programming using Directx or Opengl. Along with the VR and AR they should also aware of GPU, newer technologies and programming using most important API for windows.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS507 **Game Programming** Unit-1	**Cartesian Coordinate system:** The Cartesian XY-plane, Function Graphs, Geometric Shapes, Polygonal Shapes, Areas of Shapes, Theorem of Pythagoras in 2D, Coordinates, Theorem of Pythagoras in 3D, 3D Polygons, Euler's Rule	04	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk
	Vectors: Vector Manipulation, multiplying a Vector by a Scalar, Vector Addition and Subtraction, Position Vectors, Unit Vectors, Cartesian Vectors, Vector Multiplication, Scalar Product, Example of the Dot Product, The Dot Product in Lighting Calculations, The Dot Product in Back-Face Detection, The Vector Product, The Right-Hand Rule, deriving a Unit	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Normal Vector for a Triangle Areas, Calculating 2D Areas			
	Transformations: 2D Transformations, Matrices, Homogeneous Coordinates, 3D Transformations, Change of Axes, Direction Cosines, rotating a Point about an Arbitrary Axis, Transforming Vectors, Determinants, Perspective Projection, Interpolation	06	Computer Graphics, C Version, Donald Hern and Pauline Baker, Pearson Education, 2nd Edition, 1997	Black Board and chalk,power point
	DirectX: Understanding GPU and GPU architectures. How they are different from CPU Architectures? Understanding how to solve by GPU?	02	Introduction To 3D Game Programming With Directx® 11	Black Board and chalk,power point
USCS507 **Game Programming** Unit-2	**Introduction To DirectX 11:** COM, Textures and Resources Formats, The swap chain and Page flipping, Depth Buffering, Texture Resource Views, Multisampling Theory and MS in Direct3D, Feature Levels	03	Introduction To 3D Game Programming With Directx® 11	Black Board and chalk,power point
	Direct3D 11 Rendering Pipeline: Overview, Input Assembler Stage (IA), Vertex Shader Stage (VS), The Tessellation Stage (TS), Geometry Shader Stage (GS), Pixel Shader Stage (PS), Output merger Stage (OM) Understanding Meshes or Objects, Texturing, Lighting, Blending.	03	Introduction To 3D Game Programming With Directx® 11	Black Board and chalk,power point
	Trigonometry: The Trigonometric Ratios, Inverse Trigonometric Ratios, Trigonometric	03	Introduction To 3D Game Programming With Directx® 11	Black Board and chalk,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Relationships, The Sine Rule, The Cosine Rule, Compound Angles, Perimeter Relationships			
	Interpolation: Linear Interpolant, Non-Linear Interpolation, Trigonometric Interpolation, Cubic Interpolation, Interpolating Vectors, Interpolating Quaternions	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk,power point
	Curves: Circle, Bezier, B-Splines **Analytic Geometry:** Review of Geometry, 2D Analytic Geometry, Intersection Points, Point in Triangle, and Intersection of circle with straight line.	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk,power point
USCS507 **Game Programming** Unit-3	**Introduction to Rendering Engines:** Understanding the current market Rendering Engines. Understanding AR, VR and MR.Depth Mappers, Mobile Phones, Smart Glasses, HMD's **Unity Engine: Multi-platform publishing, VR + AR:** Introduction and working in Unity, 2D, Graphics, Physics, Scripting, Animation, Timeline, Multiplayer and Networking, UI, Navigation and Pathfinding, XR, Publishing.	10	https://docs.unity3d.com/Manual/index.html	Black Board and chalk,power point
	Scripting: Scripting Overview, Scripting Tools and Event Overview **XR:** VR, AR, MR, Conceptual Differences. SDK, Devices	05	https://docs.unity3d.com/Manual/index.html	Black Board and chalk,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: Information Technology

CLASS: TYCS SEMESTER: V MONTH: JUNE to SEPT ACADEMIC YEAR:2018-2019

LEARNING OBJECTIVE/S:

•To understand the details of web services technologies like SOAP, WSDL, and UDDI. To learn how to implement and deploy web service client and server.

•To understand the design principles and application of SOAP and REST based web services (JAX-Ws and JAX-RS).

•To understand WCF service. To design secure web services and QoS of Web Services

The learners will be able to:

•Emphasis on SOAP based web services and associated standards such as WSDL. Design SOAP based / RESTful / WCF services Deal with Security and QoS issues of Web Services

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Web Services Elective-II USCS506 Unit 1	**Web services basics:** What Are Web Services? Types of Web Services Distributed computing infrastructure,	5	Web Services: Principles and Technology,Michael P. Papazoglou, Pearson Education Limited, 2008	Projector, Laptop, Black board& Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	overview of XML, SOAP, Building Web Services with JAX-WS, Registering and Discovering Web Services, Service Oriented Architecture	5	Web Services: Principles and Technology,Michael P. Papazoglou, Pearson Education Limited, 2008	Projector, Laptop, Black board& Chalk
	Web Services Development Life Cycle, Developing and consuming simple Web Services across platform	5	Web Services: Principles and Technology,Michael P. Papazoglou, Pearson Education Limited, 2008	Projector, Laptop, Black board& Chalk
Web Services Elective-II USCS506 Unit 2	**The REST Architectural style:** Introducing HTTP, The core architectural elements of a RESTful system, Description and discovery of RESTful web services,	5	RESTful Java Web Services, Jobinesh Purushothaman, PACKT Publishing,2 nd Edition, 2015	Projector, Laptop, Black board& Chalk
	Java tools and frameworks for building RESTful web services, JSON message format and tools and frameworks around JSON, Build RESTful web services with JAX-RS APIs,	5	RESTful Java Web Services, Jobinesh Purushothaman, PACKT Publishing,2 nd Edition, 2015	Projector, Laptop, Black board& Chalk
	The Description and Discovery of RESTful Web Services, Design guidelines for building RESTful web services, Secure RESTful web services.	5	RESTful Java Web Services, Jobinesh Purushothaman, PACKT Publishing,2 nd Edition, 2015	Projector, Laptop, Black board& Chalk
Web Services Elective-II USCS506 Unit 3	**Developing Service-Oriented Applications with WCF :** What Is Windows Communication Foundation, Fundamental Windows Communication Foundation Concepts	5	Developing Service-Oriented Applications with WCF, Microsoft, 2017 https://docs.microsoft.com/en-us/dotnet/framework/wcf/index	Projector, Laptop, Black board& Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: MSc.CS(Part 1)

SEMESTER: I MONTH: AUGUST-DECEMBER ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of Robotics and Artificial Intelligence.
- Develop logic for developing Robot.
- Be familiar about the basic concepts of Artificial Intelligence.
- Apply the problem solving skills on Artificial Intelligence Algorithms.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS104, Unit 1, Robotics and Artificial Intelligence.	What is a Robot? Definition, History of Robots: Control Theory, Cybernetics, Grey Walter Tortoise, Analog Electronic Circuit, Reactive Theory, Braitenberg's Vehicle, Artificial Intelligence, Vision Based Navigation, Types of Robot Control.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	Robot Components: Embodiment, Sensors, States, Action, Brains and Brawn, Autonomy, Arms, Legs, Wheels, Tracks, and What really drives them effectors and actuators: Effector, Actuator, Passive and Active Actuation, Types of Actuator, Motors, Degree of freedom Locomotion: Stability, Moving and Gaits, Wheels and Steering, Staying on the path.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation

	Manipulators: Endeffectors, Teleoperation, Why is manipulation hard? Sensors: Types of Sensors, Levels of Processing, Passive and Active sensors, Switches, Light sensors, Resistive position sensor.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
PSCS104, Unit 2, Robotics and Artificial Intelligence.	Ultrasonic and Sonar sensing, Specular Reflection, Laser Sensing, Visual Sensing, Cameras, Edge Detection, Motion Vision, Stereo Vision, Biological Vision, Vision for Robots	07	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	Feedback or Closed Loop Control: Example of Feedback Control Robot, Types of feedback control, Feed forward or Open loop control.	08	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
PSCS104, Unit 3, Robotics and Artificial Intelligence.	Algorithm, Architecture, The many ways to make a map, What is planning, Cost of planning, Reactive systems, Action selection, Subsumption architecture.	07	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	How to sequence behavior through world, hybrid control, Behavior based control and Behavior Coordination, Behavior Arbitration, Distributed mapping, Navigation and Path planning.	08	The Robotics Primer by Maja J Matarić, MIT press Cambridge,	Power Point Presentation

			Massachusetts, London, England (2007).	
PSCS104, Unit 4, Robotics and Artificial Intelligence.	Introduction, State space search: Generate and test, Simple search, Depth First Search (DFS), Breadth First Search (DFS), Comparison and quality of solutions.	07	Artificial Intelligence: A Modern Approach, 3e, Stuart Jonathan Russell, Peter Norvig, Prentice Hall Publications (2010)	Power Point Presentation
	Heuristic Search: Heuristic functions, Best First Search (BFS), Hill Climbing, Local Maxima, Beam search, Tabu search. Finding Optimum paths: Brute force, branch & bound, refine search, Dijkstra's algorithm, A* algorithm. Admissibility of A* algorithm.	08	Artificial Intelligence: A Modern Approach, 3e, Stuart Jonathan Russell, Peter Norvig, Prentice Hall Publications (2010)	Power Point Presentation

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **MSCCS** SEMESTER:I

MONTH: **AUG-DEC** ACADEMIC YEAR: **2018-19**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand basic principles of algorithm design and why algorithm analysis is important
understand how to implement algorithms in JAVA
understand how to transform new problems into algorithmic problems with efficient solutions
understand algorithm design techniques for solving different problems

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS101 Analysis of Algorithms and Researching Computing **Unit I: Design strategies**	The Role of Algorithms in Computing: Algorithms as a technology. Getting Started: Insertion sort, Analyzing algorithms, Designing algorithms. Growth of Functions: Asymptotic notation, Standard notations and common functions. Divide-and-Conquer: The maximum-subarray problem, Strassen's algorithm for matrix multiplication, The substitution method for solving recurrences. Probabilistic Analysis and Randomized Algorithms: The hiring problem, Indicator random variables, Randomized algorithms.	15	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

PSCS101 **Unit II: Advanced Design and Analysis Techniques**	Dynamic Programming: Rod cutting, Elements of dynamic programming, longest common subsequence. Greedy Algorithms: An activity-selection problem, Elements of the greedy strategy, Huffman codes. Elementary Graph Algorithms: Representations of graphs, Breadth-first search, Depth-first search. Minimum Spanning Trees: Growing a minimum spanning tree, Algorithms of Kruskal and Prim. Single-Source Shortest Paths: The Bellman-Ford algorithm, Single-source shortest paths in directed acyclic graphs, Dijkstra's algorithm.	15	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point
PSCS101 **Unit III: Number-Theoretic Algorithms and NP – Completeness**	Elementary number-theoretic notions, Greatest common divisor, Modular arithmetic, Solving modular linear equations, The Chinese remainder theorem, Powers of an element, The RSA public-key cryptosystem NP-Completeness: Polynomial time, Polynomial-time verification, NP-completeness and reducibility, NP-complete problems. Approximation Algorithms: The vertex-cover problem, The traveling-salesman problem, The set-covering problem, subset-sum problem.	15	Introduction to Algorithm, Thomas H Cormen, PHI	Black board and chalk,power point

NAME OF THE STAFF: Ms. Shweta Kiran Yande DEPARTMENT: CS

CLASS: M. Sc. C.S SEMESTER: I MONTH: August-December ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:
The learners will be able to:
a. learn different networking protocols, virtualization technique, wireless sensor network.
b. working of wireless sensor network

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II PSCS102 Advanced Networking Concepts Unit 1	Networking Internet and Intranet, Protocol layer and their services, Network Applications like Web, HTTP, FTP and Electronic Mail in the Internet, Domain Name System, Transport-Layer Services, Multiplexing and Demultiplexing, UDP, TCP, TCP Congestion Control, Network Layer, Virtual Circuit and Datagram Networks, Need of Router, The Internet Protocol (IP), Routing Algorithms, Routing in the Internet.	15	Computer Networking: A Top-Down Approach 6th edition, James F. Kurose, Keith W. Ross, Pearson (2012).	PowerPoint presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

Late Shri. Vishnu Waman Thakur Charitable Trust
BhaskarWaman Thakur College of Science
YashvantKeshavPatil College of Commerce
VidhyaDayanandPatil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shilpa Rodrigues **DEPARTMENT**: COMPUTER SCIENCE **CLASS**: MSc.CS(Part II)

SEMESTER: **III** **MONTH**: July - Nov **ACADEMIC YEAR**: 2018-19

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the social networks in real world.
- Represtation of social networks in graph theory.
- Identifying equivalence classes and analysis of equivalence classes.
- Understanding one mode and two mode netwroks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS302 , Unit 3 , Social Network Analysis.	Approaches to network positions and social roles- defining equivalence or similarity, structural equivalence, automorphic equivalence, finding equivalence sets, brute force and Tabu search, regular equivalence,	07	Introduction to Social Network Methods: Robert A. Hanneman, Mark Riddle	Power Point Presentation
	equivalence of distances: Maxsim, regular equivalence, Measuring similarity/dissimilarity- valued relations, Pearson correlations covariance and cross-products, Understanding clustering- agglomerative and divisive clusters, Euclidean, Manhattan, and squared distances, binary relations, matches: exact, Jaccard, Hamming,	08	Introduction to Social Network Methods: Robert A. Hanneman, Mark Riddle	Power Point Presentation

PSCS302 , Unit 4 , Social Network Analysis.	Understanding mode networks- Bi-partite data structures, visualizing two-mode data, quantitative analysis using two-mode Singular value decomposition (SVD) analysis.	07		Power Point Presentation
	two-mode factor analysis, two-mode correspondence analysis, qualitative analysis using two-mode core-periphery analysis, two-mode factions analysis, affiliation and attribute networks.	08		Power Point Presentation

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **MSCCS** SEMESTER:II

MONTH: **FEB-MAY** ACADEMIC YEAR: **2018-19**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand basic concepts of security in cloud
understand basic concepts of security in mobile.
Understand services of mobile

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS2032 Cyber and Information Security **Unit III: Cloud Security ign strategies**	How concepts of Security apply in the cloud, User authentication in the cloud; How the cloud provider can provide this- Virtualization System Security Issues: e.g. ESX and ESXi Security, ESX file system security- storage considerations, backup and recovery- Virtualization System Vulnerabilities, security management standards- SaaS, PaaS, IaaS availability management- access control- Data security and storage in cloud.	15	Cloud Security: A Comprehensive Guide to Secure Cloud Computing, Ronald L. Krutz, Russell Dean Vines, Wiley	Black board and chalk,power point

PSCS2032 **Cyber and Information Security** **Unit IV: Mobile Security:**	Mobile system architectures, Overview of mobile cellular systems, GSM and UMTS Security & Attacks, Vulnerabilities in Cellular Services, Cellular Jamming Attacks & Mitigation, Security in Cellular VoIP Services, Mobile application security. Securing Wireless Networks: Overview of Wireless Networks, Scanning and Enumerating 802.11 Networks, Attacking 802.11 Networks, Bluetooth Scanning and Reconnaissance, Bluetooth Eavesdropping, Attacking & Exploiting Bluetooth, Zigbee Security & Attacks	15	Mobile and Wireless Security and Privacy, Kia Makki, Peter Reiher, Springer	Black board and chalk,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Computer Science.

CLASS: M.Sc. SEMESTER: II MONTH: February To May ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- To understand structure of compiler.
- How to implement basic compiler.
- To understand Parser Implementation.
- To understand data flow analysis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS202 Design and implementation of Modern Compilers UNIT-I	**Introduction to Compilers** The structure of a compiler, A simple approach to the design of lexical analyzers, Regular expressions, Finite automata, From regular expressions to finite automata, Minimizing the number of states of a DFA.	6	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
	Context-free grammars, Derivations and Parse trees, Parsers, Shift-reduce parsing, Operator-precedence parsing, Top- down parsing, Predictive parsers.	6		Projector, PPT.

PSCS202 Design and implementation of Modern Compilers UNIT-II	**Automatic Construction of Efficient Parsers** LR parsers, The canonical collection of LR(0) items, Constructing SLR parsing tables, Constructing canonical LR parsing tables, Constructing LALR parsing tables, Using ambiguous grammars,	6	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
	An automatic parser generator, Implementation of LR parsing tables, Constructing LALR sets of items.	6		
PSCS202 Design and implementation of Modern Compilers UNIT-III	**Advanced syntax analysis and basic semantic analysis** Syntax-directed translation schemes, Implementation of syntax-directed translators, Initial introduction to the ongoing Tiger compiler, bindings for the Tiger compiler, type-checking expressions, type-checking declarations, activation records, stack frames, frames in the Tiger compiler, translation to intermediate code, intermediate representation trees, translation into trees, declarations, basic blocks and traces, taming conditional branches, liveness analysis, solution of dataflow equations, liveness in the Tiger compiler, interference graph construction.	12	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
PSCS202 Design and implementation of Modern Compilers UNIT-IV	**Dataflow analysis and loop optimization** The principle sources of optimization, Loop optimization: The DAG representation of basic blocks, Dominators, Reducible flow graphs, Depth-first search, Loop-invariant computations, Induction variable elimination, Some other loop optimizations. Dataflow Analysis: intermediate representation for flow analysis, various dataflow analyses, transformations using dataflow analysis, speeding up dataflow analysis, alias analysis.	12	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.

Vacca, Second Edition, 2005.	Power Point Presentation using projector
	Internet Tracing Methods,Security and Wireless Technologies. Types of Computer Forensics Systems:	5	Computer Forensics Computer Crime Scene	Power Point Presentation using projector

	Studydifferent Security System: Internet, Intrusion Detection, Firewall, Storage Area, Network Disaster Recovery, Public Key Infrastructure, Wireless Network, Satellite Encryption,Instant Messaging (IM), Net Privacy, Identity Management, Biometric, Identity Theft.		Investigation, John R. Vacca, Second Edition, 2005.	

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Sampada Deshmukh DEPARTMENT:Computer Science

CLASS:M.Sc. SEMESTER:III MONTH:July-November ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to :

- Learn different data recovery method.
- Learn security techniques for forensic purpose.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Cyber and Information Security Unit 2	**Data Recovery:** Data Recovery and Backup, Role of Data Recovery, Hiding and Recovering Hidden Data. Evidence Collection: Need to Collect the Evidence, Types of Evidences, The Rules of Evidence, Collection Steps. Computer Image Verification and Authentication	6	Computer Forensics Computer Crime Scene Investigation, John R. Vacca, Second Edition, 2005.	Power Point Presentation using projector

	Special Needs of Evidence Authentication. Identification of Data: Timekeeping, Forensic Identification and Analysis of Technical Surveillance Devices,	5	Computer Forensics Computer Crime Scene Investigation, John R. Vacca, Second Edition, 2005.	Power Point Presentation using projector
	Reconstructing Past Events: How to Become a Digital Detective, Useable File Formats, Unusable File Formats, Converting Files.	4	Computer Forensics Computer Crime Scene Investigation, John R. Vacca, Second Edition, 2005.	Power Point Presentation using projector

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Computer Science.

CLASS: M.Sc. SEMESTER: III MONTH: July To November ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- To understand social network and analyze the communication and predict the relationship between those actors.
- To understand Graph theory and network centrality and page rank for accessing webpages.
- To understand network structures.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS302 Social Network Analysis UNIT-I	**Introduction to social network analysis (SNA)** Introduction to networks and relations- analyzing relationships to understand people and groups, binary and valued relationships, symmetric and asymmetric relationships, multimode relationships,	6	1. Social Network Analysis for Startups- Finding connections on the social web 2. Social Network Analysis- 3rd edition	Projector, PPT.
	Using graph theory for social networks analysis- adjacency matrices, edge-lists, adjacency lists, graph traversals and distances, depth-first traversal, breadth-first traversal paths and walks, Dijkstra's algorithm, graph distance and graph diameter, social networks vs. link analysis, ego-centric and socio-centric density.	6		Projector, PPT.
PSCS302 Social Network Analysis	**Networks, Centrality and centralization in SNA** Understanding networks- density, reachability, connectivity, reciprocity, group-external and group-internal ties in networks, ego networks, extracting and visualizing ego networks, structural holes,	8	1. Social Network Analysis for Startups- Finding	Projector, PPT.

UNIT-II	Centrality- degree of centrality, closeness and betweenness centrality, local and global centrality, centralization and graph centers, notion of importance within network, Google pagerank algorithm,		connections on the social web 2. Social Network Analysis- 3rd edition	
	Analyzing network structure- bottom-up approaches using cliques, N-cliques, N-clans, K-plexes, K-cores, F-groups and top-down approaches using components, blocks and cut-points, lambda sets and bridges, and factions.	4

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: CS

CLASS:M.Sc(CS) Part-2 SEMESTER: SEM-3 MONTH: JUL-NOV ACADEMIC YEAR: 2018-2019

LEARNING OBJECTIVE/S:

- Design and develop location based messaging app
- Design and develop chat messaging app which is a location-based
- Design and develop app demonstrating Simple Downstream Messaging
- Design and develop app demonstrating Send Upstream Messages
- Implementing GCM Network Manager
- Demonstrate use of OpenGTS (Open Source GPS Tracking System)

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS301 Ubiquitous Computing UNIT 1	**Basics of Ubiquitous Computing :**Examples of Ubiquitous Computing Applications, Holistic Framework for UbiCom: Smart DEI, Modeling the Key Ubiquitous Computing Properties, Ubiquitous System Environment Interaction, Architectural Design for UbiCom Systems: Smart DEI Model, Smart Devices and Services, Service Architecture Models, Service Provision Life Cycle.	15	Ubiquitous Computing Smart Devices, Environments and Interactions, Stefan Poslad, Wiley, 2009.	Laptop,PPT

PSCS301 Ubiquitous Computing UNIT 2	**Smart Environments Tagging, Sensing and Controlling**, Tagging the Physical World, Sensors and Sensor Networks, Micro Actuation and Sensing: MEMS, Embedded Systems and Real Time Systems, Control Systems.	15	Ubiquitous Computing Smart Devices, Environments and Interactions, Stefan Poslad, Wiley, 2009.	Laptop,PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: M.Sc.CS

SEMESTER: IV MONTH: JAN TO APRIL ACADEMIC YEAR: 2018-19

LEARNING OBJECTIVE/S:
The learners will be able to:

- To understand basics of Cryptography and Network Security.
- To be able to secure a message over insecure channel by various means.
- To learn about how to maintain the Confidentiality, Integrity and Availability of a data.
- To understand various protocols for network security to protect against the threats in the networks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS4022 Cyber and Information Security (Cryptography and Crypt Analysis) **UNIT 1**	: Introduction to Number Theory Topics in Elementary Number Theory: O and notations, time estimates for doing arithmetic-divisibility and the Euclidean algorithm, Congruence: Definitions and properties, linear congruence, residue classes, Euler's phi function, Fermat's Little Theorem, Chinese Reminder Theorem, Applications to factoring, finite fields, quadratic residues and reciprocity: Quadratic residues, Legendre symbol, Jacobi Symbol. (proofs of the theorems are not expected to cover).	10	Discrete Mathematics and Its Applications, Kenneth H. Rosen, 7 th Edition, McGraw Hill, 2012. Cryptography Theory and Practice, 3rd Edition, Douglas R. Stinson, 2005	Powerpoint,Black Board and chalk

PSCS4022 Cyber and Information Security (Cryptography and Crypt Analysis) **UNIT 3**	RSA Cryptosystem The RSA Algorithm, Primarily Testing, Legendre and Jacobi Symbols, The SolovayStrassen Algorithm, The Miller-Rabin Algorithm, Factoring Algorithm: The pollard p-1 Algorithm, Dixon's Random Squares Algorithm, Attacks on RSA, The Rabin Cryptosystem. Public Key Cryptosystems: The idea of public key Cryptography, The Diffie-Hellman Key Agreement, ElGamal Cryptosystem, The Pollard Rho Discrete Logarithm Algorithm, Elliptic Curves, Knapsack problem.	10	Discrete Mathematics and Its Applications, Kenneth H. Rosen, 7 th Edition, McGraw Hill, 2012. Cryptography Theory and Practice, 3rd Edition, Douglas R. Stinson, 2005. Network Security and Cryptography, Atul Kahate, McGraw Hill, 2003. Cryptography and Network Security: Principles and Practices, William Stalling, Fourth Edition, Prentice Hall, 2013.	Black Board and chalk, PowerPoint

NAME OF THE STAFF: Shilpa Rodrigues **DEPARTMENT**: COMPUTER SCIENCE **CLASS**: MSc.CS(Part II)

SEMESTER: IV **MONTH**: JANUARY-APRIL **ACADEMIC YEAR**: 2018-2019

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of Simulation and Modeling.
- Develop logic for developing Simulation Scenarios.
- Be familiar about the basic concepts of Agent Based Modeling.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS401 Unit 2, Simulation and Modeling	Data Collection and Analysis: Introduction, Data requirements, Obtaining data, Representing unpredictable variability, Selecting statistical distributions. Obtaining Accurate Results: Introduction, The nature of simulation models and simulation output, Issues in obtaining accurate simulation results, example model, dealing with initialization bias: warm-up and initial conditions, Selecting the number of replications and run-length.	07	Simulation: The Practice of Model Development and Use by Stewart Robinson, John Wiley and Sons, Ltd, 2004.	Power Point Presentation
	Searching the Solution Space: Introduction, The nature of simulation experimentation, Analysis of results from a single scenario, Comparing alternatives, Search experimentation, and Sensitive analysis. Verification, Validation and Confidence: Introduction, Defining	08	Simulation: The Practice of Model Development and	Power Point Presentation

	Verification and Validation, The difficulties of verification and validation, Methods of verification and validation, Independent verification and validation.		Use by Stewart Robinson, John Wiley and Sons, Ltd, 2004.	
PSCS401 Unit 4, Simulation and Modeling.	Designing state-based behavior: Statecharts, State transitions, Viewing and debugging Statecharts at runtime, Statecharts for dynamic objects. Discrete events and Event model object: Discrete event, Event-the simplest low level model object, Dynamic events, and Exchanging data with external world. Presentation and animation: Working with shapes, groups and colors.	07	The Big Book of Simulation Modeling: Multi Method Modeling by Andrei Borshchev, 2013.	Power Point Presentation
	, Designing interactive models: using controls, Dynamic properties of controls, 3D Animation. Randomness in Models: Probability distributions, sources of randomness in the model, randomness in system dynamics model, random number generators, Model time, date and calendar: Virtual and real time: The model time, date and calendar, Virtual and real-time execution modes.	08	The Big Book of Simulation Modeling: Multi Method Modeling by Andrei Borshchev, 2013.	Power Point Presentation

MONTH: July - November ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to: Understand the concept of Differential equation, methods of problem solving & it's applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Pape I Calculus , Unit III Differential Equation	1. Definition of a differential equation, order, degree, ordinary differential equation and partial differential equation, linear and nonlinear ODE	3	Vipul's Calculus III	Chalk-Board Method
	2. Solution of homogeneous and non-homogeneous differential equations of first order and first degree. Notion of partial derivatives.	4		
	3. Exact equations of first order and first degree. Necessary and sufficient condition for M dx + N dy = 0 to be exact	2		

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	4. non-exact equations: Rules for finding integrating factors for non-exact equations. Reduction of order.	4		
	5. Linear and reducible linear equations of first order, Applications to orthogonal trajectories, population growth, and finding the current at a given time.	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: Mathematics

CLASS: Tybsc(Maths)

SEMESTER: 5

MONTH: August to December

ACADEMIC YEAR: 2022-23

LEARNING OBJECTIVE/S:
The learners will be able to :

- Demonstrate an understanding of concepts of metric spaces and topological spaces and their roll in mathematics.
- prove the basic results about compactness.
- Apply the theory in course to solve variety of problems at an appropriate level of difficulties
- Demonstrate the skill in communicating mathematics orally and in writing.

CLASS: SYB.Sc (PM/MS) SEMESTER: IV (Maths Paper II) MONTH: December-March ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to : concept the of Definition of a linear transformation of vector spaces; elementary properties, Rank-Nullity Theorem, Invertible linear transformations,Similar matrices.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II UNIT I. Linear Transformation	1. Definition of a linear transformation of vector spaces; elementary properties. Examples. Sums and scalar multiples of linear transformations. Composites of linear transformations. A Linear transformation of V $\longrightarrow$ W, where V, W are vector spaces over R and V is a finite-dimensional vector space is completely determined by its action on an ordered basis of V.	3	2. Serge Lang; Introduction to Linear Algebra; Springer.	Chalk and duster ,black board
	2. Null-space (kernel) and the image (range) of a linear transformation. Nullity and rank	4

CLASS: SYB.Sc (PM/MS) **SEMESTER: IV (Maths Paper II)** **MONTH: December-March** **ACADEMIC YEAR: 2022-2023**

LEARNING OBJECTIVE/S:

The learners will be able to learn inner product space, properties, Cauchy Schwarz Inequality, orthogonal complement, orthogonal decomposition.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II UNIT II. Inner Products and Orthogonality	Inner product spaces (over R). Examples, including the Euclidean space Rn and the space of real valued continuous functions on a closed and bounded interval. Norm associated to an inner product. Cauchy-Schwarz inequality. Triangle inequality.	3	2. Serge Lang; Introduction to Linear Algebra; Springer.	Chalk and duster ,black board
	Angle between two vectors. Orthogonality of vectors. Pythagoras theorem and some	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

	geometric applications in R2 . Orthogonal sets, Orthonormal sets. Gram-Schmidt orthogonalizaton process. Orthogonal basis and orthonormal basis for a finite-dimensional inner product space.			
	Orthogonal complement of any set of vectors in an inner product space. Orthogonal complement of a set is a vector subspace of the inner product space	4		
	Orthogonal decomposition of an inner product space with respect to its subspace. Orthogonal projection of a vector onto a line (one dimensional subspace). Orthogonal projection of an inner product space onto its subspace.	4

CLASS:TYB.Sc (Mathematics) SEMESTER: VI (Subject -Maths Paper IV) MONTH: December-March ACADEMIC YEAR: 2022-2023

LEARNING OBJECTIVE/S:
The learners will be able to : concept the of coloring of graph, planar graphs, combinatorics.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER I, UNIT I Colorings of graph	Vertex coloring- evaluation of vertex chromatic number of some standard graphs, critical graph.	3	1 Bondy and Murty Grapgh, Theory with Applications. 2 Balkrishnan and Ranganathan, Graph theory and applications.	Chalk and duster method,black board
	Upper and lower bounds of Vertex chromatic Number- Statement of Brooks theorem. Edge coloring- Evaluation of edge chromatic number of standard graphs such as complete graph,	4		
	complete bipartite graph, cycle. Statement of VizingTheorem. Chromatic polynomial of graphs- Recurrence Relation and properties of Chromatic polynomials. Vertex and Edge cuts vertex	4		
	the relation between vertex and edge connectivity. Equality of vertex and edge connectivity of cubic graphs. Whitney's theorem on 2-vertex connected graph	4		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: _____Rakhee N Jadhav_____ DEPARTMENT: _____Mathematics_____ CLASS: SYPM_____ SEMESTER: _____III_____ MONTH: _____July-aug2019_____ ACADEMIC YEAR: __2019-20_____

LEARNING OBJECTIVE/S:
The learners will be able to : _Differentiability of scalar field,total derivative,examples

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper I /Calculus III Unit II Differentiation	1. Differentiability of a scalar eld at a point of Rn (in terms of linear transformation)	3	Mathematical analysis by T Apostol	Blackboard, chalk
	open subset of Rn; the total derivative, uniqueness of total derivative of a di er-entiable function at a point	2	Mathematical analysis by T Apostol	
	simple examples of nding total derivative of functions such as f(x; y) = x2 + y2; f(x; y; z) = x + y + z;,	4	Mathematical analysis by T Apostol	
	differentiability at a point of a function f implies continuity	2	Mathematical analysis by T Apostol	
	and existence of direction derivatives of f at the point, the existence of continuous partial derivatives in a neighbourhood of point	3	Mathematical analysis by T Apostol

LEARNING OBJECTIVE/S:
The learners will be able to : Vertex coloring, Edge coloring , the relation between vertex and edge connectivity

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PaperIV /Unit I. Colorings of graph	Vertex coloring- evaluation of vertex chromatic number of some standard graphs, critical graph. Upper and lower bounds of Vertex chromatic Number- Statement of Brooks theorem	2	Bondy &murty,grph theory	Blackboard,Chalk
	Edge coloring- Evaluation of edge chromatic number of standard graphs such as complete graph	4	West D.G grph theory	
	com- plete bipartite graph, cycle. Statement of Vizing Theorem. Chromatic polynomial of graphs-	3	Bondy &murty,grph theory	
	Recurrence Relation and properties of Chromatic polynomials. Vertex and Edge cuts vertex and edge connectivity	3	West D.G grph theory	
	the relation between vertex and edge connectivity. Equality of vertex and edge connectivity of cubic graphs. Whitney's theorem on 2-vertex connected graphs	3	West D.G grph theory

(Affiliated to University of Mumbai)

NAME OF THE STAFF: Anushita A.Moger. DEPARTMENT: Physics CLASS: S.Y.B.Sc. SEMESTER:4

MONTH: November-February ACADEMICYEAR:2022-23

LEARNING OBJECTIVE/S:
The learners will be able to:

1) understand the postulates of quantum mechanics and to understand its importance in explaining significant phenomena in physics.

2)todemonstratequantitativeproblemsolvingskillsinallthetopicscovered.

PAPER, UNIT,TITLE	SUBTOPICS	NOOFLECTURES ALLOTED	REFERENCE/S	TEACHINGMETHOD/ICTTOOLSUSED
Phy-2(unit-1) quantum mechanics	Schrodinger's wave equation,concept of wave function ,Born interpretation of wave function, position, momentum and energy operators,eigen value equation , expectation value of operators, postulates of quantum mechanics,analogy between wave and Schrodinger's equation,STDE and STIE ,superposition principle, probability current density ,equation of continuity and it's physical interpretation.	15		Chalk & duster method & google classroom

NAME OF THE STAFF: Anushita A. Moger. DEPARTMENT:Physics CLASS: T.Y.B.Sc. SEMESTER:6

MONTH: November-February ACADEMICYEAR:2022-23

LEARNING OBJECTIVE/S:

1) understand the significance of Michelson Morley experiment and failure of the existing theories to explain the null result.

2) the importance postulates of special relativity, Lorenz transformation equations and how it changed the way we look at space and time

, Absolute time and relativity, Commonsense versus Einstein concept of Space and time.

3) Understand the transformation equations for: Space and time, velocity, frequency, mass, momentum ,force ,Energy, Charge and current density, electric and magnetic fields.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **MISS.NIYANTA DAVE** DEPARTMENT: **PHYSICS** CLASS: **T.Y.B.Sc.**

SEMESTER: **V** MONTH: **- June - September** ACADEMIC YEAR: **2022-23**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Apply theory of quantum physics in atomic physics.
- Understand importance of electron spins, symmetric & antisymmetric wave functions & vector atom model.
- Learn the Effect of magnetic field on atoms & its application.
- Learn molecular physics & its application.
- This course will be useful to get an insight into spectroscopy.
- Get the insight of the modern medical instruments in principle, which are used in day to day life.
- From this course, the students are expected to learn some mathematical techniques required to understand the physical phenomena at the undergraduate level and get exposure to important ideas of statistical mechanics.
- The units on statistical mechanics would introduce the students to the concept of microstates, Boltzmann distribution and statistical origins of entropy.
- It is also expected that the student will understand the difference between different statistics, classical as well as quantum.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

Paper-I, Unit - 4 **Mathematical, Thermal and Statistical Physics**	1. The probability of a distribution, The most probable distribution, Maxwell Boltzmann statistics, Molecular speeds. 2. Bose-Einstein statistics, Black-body radiation, The Rayleigh-Jeans formula. 3. The Planck radiation formula, Fermi-Dirac statistics, Comparison of results.	15	Perspectives of Modern Physics: Arthur Beiser, (Mc Graw Hill International).	chalk and Board

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 60

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **MISS.NIYANTA DAVE** DEPARTMENT: **PHYSICS** CLASS: **S.Y.B.Sc.**

SEMESTER: **III** MONTH: **June-September** ACADEMIC YEAR: **2022-23**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Comprehend the basic concepts of thermodynamics & its applications in physical situation.
- Learn about situations in low temperature.
- Demonstrate tentative problem solving skills in all above areas.
- Students will be exposed to contextual real life situations.
- Students will appreciate the role of Physics in 'interdisciplinary areas related to Acoustics.
- The learner will understand the scope of the subject in Industry & Research.

NAME OF THE STAFF: **MISS.NIYANTA DAVE** DEPARTMENT: **PHYSICS** CLASS: **T.Y.B.Sc.**

SEMESTER: **VI** MONTH: **November- March** ACADEMIC YEAR: **2022-23**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the basics of semiconductor devices and their applications.
- Understand the basic electronic circuits for universal logic building blocks and basic concepts of digital communication.
- Develop quantitative problem solving skills in all the topics covered.
- Analyze/design and implement combinational logic circuits.
- Develop assembly language programming skills and real time applications of microprocessor.
- Illustrate how to interface the I/O peripheral (PPI) with 8085 microprocessor.
- Understand architecture, silent features, instruction set, programming and interfacing of 8051 microcontroller.
- Get practical training to interface different programmable peripherals and I/O devices to microprocessor and microcontroller.

NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Jyoti Gupta DEPARTMENT: Physics CLASS: S.Y.B.Sc SEMESTER: III MONTH: September-October

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to: 1. Understand the concepts of energy band gap of different materials.

2. Understand the concepts of electrical, optical & magnetic properties.

3. Students will appreciate the role of Physics in interdisciplinary areas related to materials and acoustics etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper -III (Applied Physics -I), Unit-III (Properties of Material), 1.Electrical Properties 2.Optical	1.Energy Band diagram for Materials -conductors, semiconductors & insulators, Effect of Temperature on conductivity.	03	Sheth Publication S.Y.B.Sc. Phy-III Textbook	Lecture Method /Chalk and Board
	2.Reflection, refraction, absorption & transmission of electromagnetic radiation in solids	04	Sheth Publication S.Y.B.Sc. Phy-III Textbook	Lecture Method /Chalk and Board
	3.Origin of Magnetism in solids, Types of magnetic order, magnetic hysteresis	06	Sheth Publication S.Y.B.Sc. Phy-III Textbook	Lecture Method /Chalk and Board

SIGNATURE OF THE H.O.D.

Properties 3.Magnetic Properties 4.Applications	4.Dielectric materials: Piezoelectric, ferroelectric, and pyro electric materials	02	Sheth Publication S.Y.B.Sc. Phy-III Textbook	Lecture Method /Chalk and Board

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Jyoti Gupta DEPARTMENT: Physics CLASS: S.Y.B.Sc. SEMESTER: III MONTH: November –December

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to: 1. Understand the basic concepts of mathematical physics and their applications in physical situations.
2. Understand the basic laws of electrodynamics and be able to perform calculations using them.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II (Vector calculus, Analog	1.Fundamental Theorems of Calculus, Fundamental Theorems of gradient, Fundamental Theorems of Divergence, Fundamental Theorems of Curl, Problems based on these theorems	08	Introduction to Electrodynamics by D.J. Griffith	

Jyoti

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

Electronics), Unit-I 1.Line, Surface and Volume Integrals 2. Curvilinear co-ordinate	2.Cylindrical Coordinates, Spherical Coordinates Problems based on these topics	07	Sheth Publication's S.Y.B.Sc Textbook	Lecture Method /Chalk and Board

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Jyoti Gupta DEPARTMENT: Physics CLASS: F.Y.B.Sc SEMESTER: I MONTH: August -September

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to: 1. Understand the concepts of black body radiation and different laws associated with it.

2. Understand the concepts of Compton affect, Pair production, Gravitational -Red shift.

3. Understand and able to solve the problem related to topic.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper -II, Unit-III 1.Origin of quantum Mechanics 2.Wave Nature of Particle 3. Particle Nature of	1.Black Body (Definition), Black body Spectrum, Wein's Displacement law, Rayleigh -Jeans Formula	03	Sheth Publication F.Y.B.Sc. Textbook	Lecture Method /Chalk and Board
	2. Production of X-ray, Properties of X-ray, Davisson - Germer Experiment,G.P.Thompson experiment, Diffraction of X-rays, Bragg's law, Application of X-rays	05	Sheth Publication F.Y.B.Sc. Textbook	Lecture Method /Chalk and Board
	3.Compton effect, Pair production, Gravitational -Red shift	05	Arthur Beiser, Perspective of Modern Physics	Lecture Method /Chalk and Board

Jyoti

SIGNATURE OF THE STAFF

Wave	3.Heisenberg's Uncertainty Principle ,Problems on covered topics	02	Arthur Beiser, Perspective of Modern Physics	Lecture Method /Chalk and Board

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Jyoti Gupta DEPARTMENT: Physics CLASS: S.Y.B.Sc SEMESTER: III MONTH: September-October

ACADEMIC YEAR: 2021-22 Subject: Foundation Course-III

LEARNING OBJECTIVE/S:

The learners will be able to: 1. Appreciate the importance of developing a scientific temper towards technology and its use in everyday life.

2. Understand the values of scientific attitude towards the Indian society.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Unit-III (Science & Technology-I)	1.the ancient culture, the classical era, the middle ages, the Renaissance, the age of Reason and Enlightenment	03	Foundation Course by manan Prakashan	Lecture Method /Chalk and Board
1.Devepolment of science	2.Principle and characteristics, science as empirical, practical theoretical, validated knowledge.	02	Foundation Course by manan Prakashan	Discussion method

Jyoti

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

2.Nature of Science 3.Science and superstition 4.Science in everyday life	3.role of science exploding myths, blind beliefs and prejudice ,science temper as a fundamental duty of the Indian society	03	Foundation Course by manan Prakashan	Lecture Method /Chalk and Board

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 11

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Jyoti Gupta DEPARTMENT: Physics CLASS: S.Y.B.Sc SEMESTER: III MONTH: October-November

ACADEMIC YEAR: 2021-22 Subject: Foundation Course-III

LEARNING OBJECTIVE/S:
The learners will be able to: 1. Develop a basic understanding of the importance of communication.

2) Gain an overview of significant skills required to address competition in career choice.

Jyoti

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Jyoti Gupta DEPARTMENT: Physics CLASS: T.Y.B.Sc SEMESTER: VI MONTH: December -January

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to: 1. Understand the concept of OOP & POP.

2. Understand the concept of C++ and different concepts available in C++.

3. Apply different concepts of C++ to write different program.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper -VI (Electronic Instrumentation -II) Unit – IV Basic concepts of object oriented programming with C++ 1. Basics of OOP with C++	Procedure oriented programming, OOP , basic concepts of OOP, objects Benefits of OOP ,application of OOP ,programming language of C++ ,simple C++ program ,the cout & cin cascading of I/O operators	03	C++ by Balguruswami	PowerPoint presentation
	Tokens ,variables& constants ,keywords ,basic data types ,power of constants ,operators, binary operators ,arithmetic operators ,logical operators, assignment operator ,comma operator ,typecast operator ,operator precedence ,formatting of output	04	C++ by Balguruswami E-I-II textbook by sheth publication	PowerPoint presentation
	Simple if statement ,if -else statement ,nested if -else ,the switch statement ,the while ,Do-while ,for loop ,programs	06	C++ by Balguruswami	PowerPoint presentation

Jyoti

SIGNATURE OF THE STAFF

Sarout

SIGNATURE OF THE H.O.D.

2. Token & expressions in C++ 3. Control structures & functions	Functions ,types of function ,structure of C++ function function prototyping ,function calling ,inline function ,default argument ,const argument ,function overloading ,mathematical library function	02	C++ by Balguruswami	PowerPoint presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Jyoti Gupta DEPARTMENT: Physics CLASS: T.Y.B.Sc SEMESTER: VI MONTH: February -March

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to: 1. Understand the concepts of stack & subroutine.

2. Understands the different instructions used for stack & subroutine

3. Understand the concepts of mode 0.mode 1& mode 2 in 8255 & also BSR mode

4. Apply the concepts of different modes to program 8255.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper -V (E-II) Unit-II,	Introduction to advanced instructions & applications Stack & subroutine	05	Electronic Instrumentation-II Sheth Publication	Lecture Method /PPT

Jyoti

SIGNATURE OF THE STAFF

Sharad

SIGNATURE OF THE H.O.D.

Advanced 8085 Programming & 8255 (PPI) 1. Introduction to advanced instructions & applications 2. Stack & subroutines 3. The 8255 programmable Peripheral Interface	The 8255 programmable peripheral interface: block diagram of 8255 ,mode 0-simple input/output mode ,BSR mode	07	Electronic Instrumentation-II Sheth Publication	Lecture Method /PPT

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Jyoti Gupta DEPARTMENT: Physics CLASS: T.Y.B.Sc SEMESTER: VI MONTH: January -February

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to: 1. Understand the concepts of K-map & Boolean expressions.

2. Understand the concepts of decoder, encoder ad differentiate between them.

3. Understand the concept of multiplexer & demultiplexer in combinational logic design

Jyoti

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

4. Apply k-map to build different circuit for SOP & POS

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper -V (E-II) Unit-I, Digital Electronics 1. Combinational logic design 2. Design & implementation of	Introduction ,Boolean identities , SOP & POS ,k-map (2,3 & 4 variable)	05	Electronic Instrumentation-II Sheth Publication	Lecture Method /PPT
	Decoder ,encoder ,multiplexer ,demultiplexers ,use of MUX & DEMUX in combinational logic design	07	Electronic Instrumentation-II Sheth Publication	Lecture Method /PPT
	Code converters (based on -binary ,BCD ,Gray & Excess -3 codes),Tri-state logic ,buffers ,D latch	03	Electronic Instrumentation-II Sheth Publication	Lecture Method /PPT
