TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DORIN REBELLO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: SYBSc(IT) DIV:B SEMESTER: III MONTH: JULY-OCTOBER ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to : Understand the different types of data structures and develop programs to search and sort for elements.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: USIT302 unit:1, Title: Data Structures	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation.	5	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Array:Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General Multi-Dimensional Arrays, Sparse Arrays, SparseMatrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	7	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

Paper: USIT302 unit:2, Title: Data Structures	**Linked List:** Linked List, One-way Linked List, Traversal of Linked List, Searching, Memory Allocation and De-allocation, Insertion in Linked List, Deletion from Linked List, Copying a List into Other List, Merging Two Linked Lists, Splitting a List into Two Lists, Reversing One way linked List, Circular Linked List, Applications of Circular Linked List,	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Two way Linked List, Traversing a Two way Linked List, Searching in a Two way linked List, Insertion of an element in Two way Linked List, Deleting a node from Two way Linked List, Header Linked List, Applications of the Linked list, Representation of Polynomials, Storage of Sparse Arrays, Implementing other Data Structures.	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:3, Title: Data Structures	**Stack**: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	5	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue,Some special kinds of queues, Deque,Priority Queue, Application of Priority Queue, Applications of Queues.	7	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:4, Title:	**Sorting and Searching Techniques** Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, Binary, Indexed Sequential Searches, Binary Search.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

Data Structures	**Tree:**Tree,Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary Tree,Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Advanced Tree Structures: Red Black Tree, Operations Performed on Red Black Tree, AVL Tree, Operations performed on AVL Tree, 2-3 Tree, B-Tree.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:5, Title: Data Structures	**Hashing Techniques** Hash function, Address calculation techniques, Common hashing functions Collision resolution, Linear probing, Quadratic,Double hashing, Buckethashing, Deletion and rehashing	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Graph: Introduction, Graph, Graph Terminology, Memory Representation of Graph, Adjacency Matrix Representation of Graph, Adjacency List or Linked Representation of Graph, Operations Performed on Graph, GraphTraversal, Applications of the Graph, Reachability, Shortest Path Problems, Spanning Trees.	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: S.Y.I.T.-B (Python)

SEMESTER: III

MONTH: July - Oct

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S :
The learners will be able to :

- Understand why Python is a useful scripting language for developers.
- Learn how to design and program Python applications.
- Learn how to use lists, tuples, and dictionaries in Python programs.
- Write functions and pass arguments in Python also to read and write files in Python.
- Learn how to design object-oriented programs with Python classes.
- Use exception handling in Python applications for error handling
- Understand the basics of python GUI component and be able to create GUI based application.
- Create Python application that will manage user data with the knowledge of DBMS.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT301 , Unit 1, Python .	**Introduction:** The Python Programming Language, History, features, Installing Python, Running Python program, Debugging , Experimental Debugging, Formal and Natural Languages, The Difference Between Brackets, Braces, and Parentheses,	04	Think Python -Allen Downey	Laptop, Google Meet, Power point presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Variables and Expressions Values and Types, Variables, Variable Names and Keywords, Type conversion, Operators and Operands, Expressions, Interactive Mode and Script Mode.	03	Think Python -Allen Downey	Laptop, Google Meet, Power point presentation
	Conditional Statements: if, if-else, nested if –else	02	Think Python -Allen Downey	Laptop, Google Meet, Power point presentation
	Looping: for, while, nested loops **Control statements:** Terminating loops, skipping specific conditions	03	Think Python -Allen Downey	Laptop, Google Meet, Power point presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT301 , Unit 2, Python .	**Functions:** Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions, Flow of Execution, Parameters and Arguments, Variables and Parameters Are Local, Stack Diagrams, Fruitful Functions and Void Functions, Why Functions? Importing with from, Return Values, Incremental Development, Boolean Functions, More Recursion, Leap of Faith, Checking Types.	05	Think Python -Allen Downey	Laptop, Google Meet, Power point presentation
	Strings: A String Is a Sequence, Traversal with a for Loop, String Slices, Strings Are Immutable, Searching, Looping and Counting, String Methods, The in Operator, String Comparison, String Operations.	07	Think Python -Allen Downey	Laptop, Google Meet, Power point presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SURBHI SHAH DEPARTMENT: IT-CS CLASS:SYIT-DIV C SEMESTER: SEM-III

MONTH: JULY – OCTOBER ACADEMIC YEAR: 2021-22.

LEARNING OBJECTIVE/S:
The learners will be able to: to be capable of managing complex IT projects with consideration of the human, financial and environmental factors. to work effectively as a part of a team to achieve a common stated goal.to adhere to the highest standards of ethics, including relevant industry and organizational codes of conduct.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER:-III TITLE:-Computer Networks UNIT 1	**Introduction:** Data communications, networks, network types, Internet history, standards and administration.	3	Data Communication and Networking By Behrouz A. Forouzan	Reference book,google meet,google slides,jamboard,ppt,slido.
	Network Models: Protocol layering, TCP/IP protocol suite, The OSI model.	2		
	Introduction to Physical layer: Data and signals, periodic analog signals, digital signals, transmission impairment, data rate limits, performance.	3		
	Digital and Analog transmission: Digital-to-digital conversion, analog-to-digital conversion, transmission modes, digital-to-analog conversion, analog-to-analog conversion.	2		
UNIT 2	**Bandwidth Utilization: Multiplexing and Spectrum Spreading:** Multiplexing, Spread Spectrum	3	Data Communication and Networking By Behrouz A.	Reference book,google meet,google slides,jamboard,ppt,slido.
	Transmission media: Guided Media**,** Unguided Media	2		
	Switching: Introduction, circuit switched networks, packet switching, structure of a switch.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction to the Data Link Layer: Link layer addressing, Data Link Layer Design Issues, Error detection and correction, block coding, cyclic codes, checksum, forward error correction, error correcting codes, error detecting codes.	2/3	Forouzan	
UNIT 3	**Data Link Control:** DLC services, data link layer protocols, HDLC, Point-to-point protocol.	2	Data Communication and Networking By Behrouz A. Forouzan	Reference book,google meet,google slides,jamboard,ppt,slido.
	Media Access Control: Random access, controlled access, channelization, Wired LANs – Ethernet Protocol, standard ethernet, fast ethernet, gigabit ethernet, 10 gigabit ethernet,	3		
	Wireless LANs: Introduction, IEEE 802.11 project, Bluetooth, WiMAX, Cellular telephony, Satellite networks.	2		
	Connecting devices and Virtual LANs.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: SY BSc IT. DIV-C SEMESTER: SEM 3 MONTH:JUL-OCT ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

1. To have a broad understanding of database concepts and database management system software
2. To have a high-level understanding of major DBMS components and their function
3. To be able to model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
4. To be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
5. To be able to program a data-intensive application using DBMS APIs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 4 DBMS UNIT 1	Introduction to Databases and Transactions What is database system, purpose of database system, view of data, relational databases, database architecture, transaction management.	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	POWER POINT PRESENTATION
	Data Models The importance of data models, Basic building blocks, Business rules, The evolution of data models, Degrees of data abstraction.	4		
	Database Design, ER Diagram and Unified Modelling Language Database design and ER Model: overview, ER Model, Constraints, ER Diagrams, ERD Issues, weak entity sets, Codd's rules, Relational Schemas, Introduction to UML	4		
	Relational database model: Logical view of data, keys, integrity rules,	2		POWER POINT PRESENTATION

UNIT 2	Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF, BCNF).	3	DATABASE SYSTEM AND CONCEPTS BY H KORTH	
	Relational Algebra and Calculus Relational algebra: introduction, Selection and projection, set operations, renaming, Joins, Division, syntax, semantics	3		
	Operators, grouping and ungrouping, relational comparison	2		
	Calculus: Tuple relational calculus, Domain relational Calculus, calculus vs algebra, computational capabilities	2		
UNIT 3	Constraints, Views and SQL Constraints, types of constrains, Integrity constraints,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	POWER POINT PRESENTATION
	Views: Introduction to views, data independence, security, updates on views, comparison between tables and views	4		
	SQL: data definition, aggregate function, Null Values, nested sub queries, Joined relations. Triggers	4		
UNIT 4	Transaction management and Concurrency Control Transaction management: ACID properties, serializability and concurrency control,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	POWER POINT PRESENTATION
	Lock based concurrency control (2PL, Deadlocks),Time stamping methods,	4		
	Optimistic methods, database recovery management.	4		
UNIT 5	PL-SQL: Beginning with PL / SQL, Identifiers and Keywords, Operators, Expressions, Sequences	4	PROGRAMMING WITH PL/SQL FOR BEGINNERS BY H. DAND,R. PATIL	POWER POINT PRESENTATION
	,Control Structures, Cursors and Transaction,	4		
	Collections and composite data types, Procedures and Functions, Exceptions Handling, Packages with Clause and Hierarchical Retrieval, Triggers.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: SYIT(C)

SEMESTER: III MONTH: MID JULY-OCT ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to:

- Get deep knowledge about different types of data structures and also the importance of algorithm and its complexity.
- Understand the use of array and different types of linked list.
- Learn about stack, stack operations, queue and different types of it.
- Understand the use of different sorting and searching techniques.
- Learn about graph theory and different types of hashing techniques.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT302, Data Structures, Unit I	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Array: Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General MultiDimensional Arrays, Sparse Arrays, Sparse Matrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: S.Y.B.Sc.IT SEMESTER: III MONTH: JULY-OCTOBER ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- Students should be able to understand the concepts of programming before actually starting to write programs.
- Students should be able to develop logic for Problem Solving.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-I Unit I Python Programming	**Introduction:** The Python Programming Language, History, features, Installing Python, Running Python program,	3	Think Python Allen Downey O'Reilly 1st2012	Google Meet, PPT
	Debugging : Syntax Errors, Runtime Errors, Semantic Errors, Experimental Debugging, Formal and Natural Languages, The Difference Between Brackets, Braces, and Parentheses,	3		Google Meet, PPT
	Variables and Expressions Values and Types, Variables, Variable Names and Keywords, Type conversion, Operators and Operands, Expressions, Interactive Mode and Script Mode, Order of Operations.	3		Google Meet, PPT
	Conditional Statements: if, if-else, nested if –else	1		Google Meet, PPT
	Looping: for, while, nested loops Control	1		Google Meet, PPT
	statements: Terminating loops, skipping specific conditions	1		Google Meet, PPT
Paper-I	**Functions:** Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions,	2	Think Python Allen Downey	Google Meet, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II Python Programming	Definitions and Uses, Flow of Execution, Parameters and Arguments, Variables and Parameters Are Local, Stack Diagrams, Fruitful Functions and Void Functions, Why Functions?	3	O'Reilly 1st2012	Google Meet, PPT
	Importing with from, Return Values, Incremental Development, Composition, Boolean Functions, More Recursion, Leap of Faith, Checking Types	3		Google Meet, PPT
	Strings: A String Is a Sequence, Traversal with a for Loop, String Slices, Strings Are Immutable, Searching, Looping and Counting, String Methods, The in Operator, String Comparison, String Operations	4		Google Meet, PPT
Paper-I Unit III Python Programming	**Lists:** Values and Accessing Elements, Lists are mutable, traversing a List, Deleting elements from List, Built-in List Operators, Concatenation, Repetition, In Operator, Built-in List functions and methods	4	Think Python Allen Downey O'Reilly 1st2012	Google Meet, PPT
	Tuples and Dictionaries: Tuples, Accessing values in Tuples, Tuple Assignment, Tuples as return values, Variable-length argument tuples, Basic tuples operations, Concatenation, Repetition, in Operator, Iteration, Built-in Tuple Functions Creating a Dictionary, Accessing Values in a dictionary, Updating Dictionary, Deleting Elements from Dictionary, Properties of Dictionary keys, Operations in Dictionary, Built-In Dictionary Functions, Built-in Dictionary Methods	4		Google Meet, PPT
	Files: Text Files, The File Object Attributes, Directories	2		Google Meet, PPT
	Exceptions: Built-in Exceptions, Handling Exceptions, Exception with Arguments, User-defined Exceptions	2		Google Meet, PPT
Paper-I Unit IV Python	**Regular Expressions –** Concept of regular expression, various types of regular expressions, using match function.	2	Think Python Allen Downey O'Reilly 1st2012	Google Meet, PPT
	Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding	4		Google Meet, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Programming	**Multithreaded Programming:** Thread Module, creating a thread, synchronizing threads, multithreaded priority queue	3		Blackboard, Chalk
	Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	3		Blackboard, Chalk
Paper-I Unit V Python Programming	**Creating the GUI Form and Adding Widgets:** **Widgets:** Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets.	4	Think Python Allen Downey O'Reilly 1st2012	Blackboard, Chalk
	Layout Management: Designing GUI applications with proper Layout Management features.	2		Blackboard, Chalk
	Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets.	2		Blackboard, Chalk
	Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database.	4		Blackboard, Chalk

	the kill Command, using top to Show Current System Activity, Managing Process Niceness, Scheduling Jobs, Mounting Devices, Working with Links, Creating Backups, Managing Printers, Setting Up System Logging, Setting Up Rsyslog, Common Log Files, Setting Up Logrotate		Administration by Sander van Vugt	
	Managing Software: Understanding RPM, Understanding Meta Package Handlers, Creating Your Own Repositories, Managing Repositories,Installing Software with Yum, Querying Software, Extracting Files from RPM Packages	03	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
USIT505, Unit 2, Linux System Administration	Configuring and Managing Storage: Understanding Partitions and Logical Volumes, Creating Partitions, Creating File Systems, File Systems Overview, Creating File Systems, Changing File System Properties, Checking the File System Integrity, Mounting File Systems Automatically Through fstab, Working with Logical Volumes, Creating Logical Volumes, Resizing Logical Volumes, Working with Snapshots, Replacing Failing Storage Devices, Creating Swap Space, Working with Encrypted Volumes	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Connecting to the Network: Understanding NetworkManager, Working with Services and Runlevels, Configuring the Network with NetworkManager, Working with system-config-network, NetworkManager Configuration Files, Network Service Scripts, Networking from the Command Line, Troubleshooting Networking, Setting Up IPv6, Configuring SSH, Enabling the SSH Server, Using the SSH Client, Using PuTTY on Windows Machines, Configuring Key-Based SSH Authentication, Using Graphical Applications with SSH, Using SSH Port Forwarding, Configuring VNC Server Access	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Working with Users, Groups, and Permissions: Managing Users and Groups, Commands for User Management, Managing Passwords, Modifying and Deleting User Accounts, Configuration Files, Creating Groups, Using Graphical Tools for User, and Group Management, Using External Authentication Sources, the Authentication Process, sssd, nsswitch, Pluggable Authentication Modules, Managing Permissions, the Role of Ownership, Basic Permissions: Read, Write, and Execute, Advanced Permissions, Working with Access Control Lists, Setting Default Permissions with umask, Working with Attributes.	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
USIT505, Unit 3, Linux System Administration	Securing Server with iptables: Understanding Firewalls, Setting Up a Firewall with system-config-firewall, Allowing Services, Trusted Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule, Configuration Example, Advanced iptables Configuration, Configuring Logging, The Limit Module, Configuring NAT	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Setting Up Cryptographic Services: Introducing SSL, Proof of Authenticity: The Certificate Authority, Managing Certificates with openssl, Creating a Signing Request, Working with GNU Privacy Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys, Encrypting Files with GPG, GPG Signing, Signing RPM Files	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Configuring Server for File Sharing: What is NFS? Advantages and Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring Automount, Configuring Samba, Setting Up a Samba File Server, Samba Advanced Authentication Options, Accessing Samba Shares, Offering FTP Services	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT505, Unit 4, Linux System Administration	Configuring DNS and DHCP:Introduction to DNS, The DNS Hierarchy, DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, Configuring Dovecot for POP and IMAP	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Configuring Apache on Red Hat Enterprise Linux: Configuring the Apache Web Server, creating a Basic Website, Understanding the Apache Configuration Files, Apache Log Files, Working with Virtual Hosts, Securing the Web Server with TLS Certificates, Configuring Authentication, Setting Up Authentication with .htpasswd, Configuring LDAP Authentication, Setting Up MySQL	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
USIT505, Unit 5, Linux System Administration	Introducing Bash Shell Scripting: Introduction, Elements of a Good Shell Script, Executing the Script, Working with Variables and Input, Understanding Variables, Variables, Subshells, and Sourcing, Working with Script Arguments, Asking for Input, Using Command Substitution, Substitution Operators, Changing Variable Content with Pattern Matching, Performing Calculations, Using Control Structures, Using if...then...else, Using case, Using while, Using until, Using for, Configuring booting with GRUB.	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	High-Availability Clustering: High-Availability Clustering, The Workings of High Availability, High-Availability Requirements, Red Hat High-Availability Add-on Software, Components,	04	Red Hat Enterprise Linux6	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Configuring Cluster-Based Services, Setting Up Bonding, Setting Up Shared Storage, Installing the Red Hat High Availability Add-On, Building the Initial State of the Cluster, Configuring Additional Cluster Properties, Configuring a Quorum Disk, Setting Up Fencing, Creating Resources and Services, Troubleshooting a Nonoperational Cluster, Configuring GFS2 File Systems		Administration by Sander van Vugt	
	Setting Up an Installation Server: Configuring a Network Server as an Installation Server, Setting Up a TFTP and DHCP Server for PXE Boot, Installing the TFTP Server, Configuring DHCP for PXE Boot, Creating the TFTP PXE Server Content, creating a Kickstart File, Using a Kickstart File to Perform an Automated, Installation, Modifying the Kickstart File with, system-config-kickstart, Making Manual Modifications to the Kickstart File	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. **Advanced Web Programming** DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: July to Nov ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 **Advanced Web Programming** UNIT-1	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library. **The C# Language**: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods. **Types, Objects, and Namespaces**: The Basics About Classes, Building a Basic Class, Value Types and Reference	12	1.Beginning Visual C# 2010 2.Murach's ASP.NET 4 Web Programming with C# 2010, 3. Beginning ASP.NET 4 in C# and VB,	PPT, Google meets.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Types, Understanding Namespaces and Assemblies, Advanced Class Programming.			
USIT503 **Advanced Web Programming** UNIT-2	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application. **Form Controls**: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	12	1.Beginning Visual C# 2010 2.Murach's ASP.NET 4 Web Programming with C# 2010, 3. Beginning ASP.NET 4 in C# and VB	PPT, Google meets.
USIT503 **Advanced Web Programming** UNIT-4	**ADO.NET Fundamentals**: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access. **Data Binding**: Introducing Data Binding, Using Single-Value Data Binding, Using Repeated-Value Data Binding, Working with Data Source Controls, **The Data Controls**: The GridView, Formatting the GridView, selecting a GridView Row, Editing with the GridView, Sorting and Paging the GridView, Using GridView	12	1.Beginning Visual C# 2010 2.Murach's ASP.NET 4 Web Programming with C# 2010, 3. Beginning ASP.NET 4 in C# and VB	PPT, Google meets.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: TYIT (A)

SEMESTER: V MONTH: MID JULY-OCT ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the Java EE Architecture, Server and Containers.
- Describe the different servlet API and lifecycle of servlet.
- Get the difference between cookies, session and request dispatcher.
- Understand the use of tag library, naming directory, interceptors.
- Familiar with java beans, JPA, hibernate and JSP.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506, Enterprise Java Unit I	**Understanding Java EE:** What is an Enterprise Application? What is java enterprise edition? Java EE Technologies, Java EE evolution, Glassfish server	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Java EE Architecture, Server and Containers: Types of System Architecture, Java EE Server, Java EE Containers.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction to Java Servlets: The Need for Dynamic Content, Java Servlet Technology, Why Servlets? What can Servlets do?	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Servlet API and Lifecycle: Java Servlet API, The Servlet Skeleton, The Servlet Life Cycle, A Simple Welcome Servlet	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working With Servlets: Getting Started, Using Annotations Instead of Deployment Descriptor.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working with Databases: What Is JDBC? JDBC Architecture, Accessing Database, The Servlet GUI and Database Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
USIT506, Enterprise Java Unit II	**Request Dispatcher:** Resquestdispatcher Interface, Methods of Requestdispatcher, Requestdispatcher Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	COOKIES: Kinds Of Cookies, Where Cookies Are Used? Creating Cookies Using Servlet, Dynamically Changing The Colors Of A Page	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	SESSION: What Are Sessions? Lifecycle Of Http Session, Session Tracking With Servlet API, A Servlet Session Example	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Working With Files: Uploading Files, Creating an Upload File Application, Downloading Files, Creating a Download File Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working With Non-Blocking I/O: Creating a Non-Blocking Read Application, Creating The Web Application, Creating Java Class, Creating Servlets, Retrieving The File, Creating index.jsp	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
USIT506, Enterprise Java Unit III	**Introduction To Java Server Pages:** Why use Java Server Pages? Disadvantages Of JSP, JSP v\s Servlets, Life Cycle of a JSP Page, How does a JSP function? How does JSP execute? About Java Server Pages	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Getting Started With Java Server Pages: Comments, JSP Document, JSP Elements, JSP GUI Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Action Elements: Including other Files, Forwarding JSP Page to Another Page, Passing Parameters for other Actions, Loading a Javabean.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Implicit Objects, Scope And El Expressions: Implicit Objects, Character Quoting Conventions, Unified Expression Language [Unified El], Expression Language.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Java Server Pages Standard Tag Libraries: What is wrong in using JSP Scriptlet Tags? How JSTL Fixes JSP Scriptlet's Shortcomings? Disadvantages Of JSTL, Tag Libraries.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT506, Enterprise Java Unit IV	**Introduction To Enterprise Javabeans:** Enterprise Bean Architecture, Benefits of Enterprise Bean, Types of Enterprise Bean, Accessing Enterprise Beans, Enterprise Bean Application, Packaging Enterprise Beans	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working With Session Beans: When to use Session Beans? Types of Session Beans, Remote and Local Interfaces, Accessing Interfaces, Lifecycle of Enterprise Beans, Packaging Enterprise Beans, Example of Stateful Session Bean, Example of Stateless Session Bean, Example of Singleton Session Beans.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working with Message Driven Beans: Lifecycle of a Message Driven Bean, Uses of Message Driven Beans, The Message Driven Beans Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Interceptors: Request And Interceptor, Defining An Interceptor, AroundInvoke Method, Applying Interceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
USIT506, Enterprise Java Unit V	**Persistence, Object/Relational Mapping And JPA:** What is Persistence? Persistence in Java, Current Persistence Standards in Java, Why another Persistence Standards? Object/Relational Mapping,	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Introduction to Java Persistence API: The Java Persistence API, JPA, ORM, Database and the Application, Architecture of JPA, How JPA Works? JPA Specifications.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Writing JPA Application: Application Requirement Specifications, Software Requirements, The Application Development Approach, Creating Database And Tables in Mysql, Creating a Web Application, Adding the Required Library Files, Creating a Javabean Class, Creating Persistence Unit [Persistence.Xml], Creating JSPS, The JPA Application Structure, Running The JPA Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Introduction to Hibernate: What is Hibernate? Why Hibernate? Hibernate, Database and The Application, Components of Hibernate, Architecture of Hibernate, How Hibernate Works?	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Writing Hibernate Application: Application Requirement Specifications, Software Requirements, The Application Development Approach, Creating Database and Tables in Mysql, Creating a Web Application, Adding The Required Library Files, Creating a Javabean Class, Creating Hibernate Configuration File, Adding a Mapping Class, Creating JSPS, Running The Hibernate Application.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: TYIT SEMESTER: V MONTH: JULY to OCT ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

To determine the market perspective of IoT

To compare and contrast the use of devices, gateways and Data management in IoT

To illustrate the applications of IoT in Industrial Automation and identify Real world design constraints.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 Internet Of Things Unit 3	**Prototyping the Physical Design:** Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling. Prototyping and Presence Protocol, Constrained Application Protocol.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet
	Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet
	Techniques for Writing Embedded Code: Memory	4	Designing the Internet of	Laptop, PPT, Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper-02 Internet Of Things Unit 4	Management, 12 8 Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries, Debugging.		Things Adrian McEwen, Hakim Cassimally	
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	8	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet
Paper-02 Internet Of Things Unit 5	**Moving to Manufacture:** What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet

NAME OF THE STAFF: DORIN REBELLO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: TYBSc(IT) Div:A SEMESTER: V MONTH: JULY-OCTOBER ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to : Understand the importance of software project management, project evaluation and programme management was easy,to provide knowledge of step wise planning and monitoring, understand the importance of becoming a team and decision making and project closeout.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: USIT501 unit:1, Title: Software Project Management	**Introduction to Software Project Management**:Introduction, Why is Software Project Management Important? What is a Project? Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Success and Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus Modern Project Management Practices.	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Project Evaluation and Programme Management: Introduction, Business Case, Project Portfolio Management, Evaluation of Individual Projects, Cost–benefit Evaluation Techniques, Risk Evaluation, Programme Management, Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management.	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
	An Overview of Project Planning:Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project Infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify Activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper: USIT501 unit:4 Title: Software Project Management	**Monitoring and Control**: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM).	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
	Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance.	3	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
	Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns.	5	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
Paper: USIT501 unit:5, Title:	**Working in Teams:** Introduction, becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership.	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Software Project Management	**Software Quality:** Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability, Quality Plans.	5	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
	Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project Closeout Report.	3	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE EACH UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SUVARNA S KANNAV DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:T.Y.BSC(I.T) DIV-A SEMESTER: **V** MONTH:JULy-OCTOBER ACADEMIC YEAR: 2021-2022

SUBJECT:SOFTWARE PROJECT MANAGEMENT

LEARNING OBJECTIVE/S:
The learners will be able to : Apply project management concepts and techniques to an IT project. Identify issues that could lead to IT project success or failure. Explain project management in terms of the software development process. Describe the responsibilities of IT project managers.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Software Project Management USIT501 Unit-2	**Selection of an Appropriate Project Approach:** Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model.	5	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation, google classroom, google meet
	Software Effort Estimation: Introduction, where are the Estimates Done? Problems with Over- and Under-Estimates, The	5		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Basis for Software Estimating, Software Effort Estimation Techniques, Bottom up Estimating, The Top-down Approach and Parametric Models, Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II, COSMIC Full Function Points, COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb.			
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**10**		
Software Project Management USIT501 Unit-3	**Activity Planning:** Introduction, Objectives of Activity Planning, When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating a Network Model, Adding the Time Dimension, The Forward Pass, Backward Pass, Identifying the Critical Path, Activity Float, Shortening the Project Duration, Identifying Critical Activities, Activity-on-Arrow Networks.	4	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation, google classroom, google meet
	Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for Dealing with Risk, Risk Identification, Risk Assessment, Risk Planning, Risk Management, Evaluating Risks to the Schedule, Boehm"s Top 10 Risks and Countermeasures, Applying the PERT Technique, Monte Carlo Simulation, Critical Chain Concepts.	4		
	Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc.I.T. SEMESTER: V MONTH: June to October ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 Advance Web Programming UNIT-I	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning	PPT.
	The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.	4		PPT.
	Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types,	4		PPT.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Understanding Namespaces and Assemblies, Advanced Class Programming.		Visual C# 2010	
USIT503 Advance Web Programming UNIT-II	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.	6	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	PPT.
	Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	6		
USIT503 Advance Web Programming UNIT- III	**Error Handling, Logging, and Tracing** : Avoiding Common Errors, Understanding Exception Handling, Handling Exceptions, Throwing Your Own Exceptions, Using Page Tracing	5	C# 2015 Murach"s ASP.NET 4.6 Web Programming in C#2015 Beginning Visual C# 2010	PPT.
	State Management : Understanding the Problem of State, Using View State, Transferring Information Between Pages, Using Cookies, Managing Session State, Configuring Session State, Using Application State, Comparing State Management Options	4		, PPT.
	Styles, Themes, and Master Pages : Styles, Themes, Master Page Basics, Advanced Master Pages,	3		PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT503 Advance Web Programming UNIT-IV	**ADO.NET Fundamentals**: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	PPT.
	Data Binding: Introducing Data Binding, Using Single-Value Data Binding, Using Repeated-Value Data Binding, Working with Data Source Controls,	4		
	The Data Controls: The GridView, Formatting the GridView, selecting a GridView Row, Editing with the GridView, Sorting and Paging the GridView, Using GridView Templates, The DetailsView and FormView	4		
USIT503 Advance Web Programming UNIT - V	**XML**: XML Explained, The XML Classes, XML Validation, XML Display and Transforms. .	3	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	PPT.
	Security Fundamentals: Understanding Security Requirements, Authentication and Authorization, Forms Authentication, Windows Authentication.	4		PPT.
	ASP.NET AJAX: Understanding Ajax, Using Partial Refreshes, Using Progress Notification, Implementing Timed Refreshes, Working with the ASP.NET AJAX Control Toolkit	5		PPT.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: T.Y.I.T.-B (Enterprise Java)

SEMESTER: V

MONTH: July - Oct.

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S :
The learners will be able to :

- Learn advance technology of java programming.
- Develop web based java program.
- Create dynamic content providing java web application using servlets.
- Describe and explain various multi-tier software architecture framework using Java EE including the roles and responsibilities of each relevant tier
- Develop enterprise software applications using the Java EE framework.
- Understand and implements new technologies like JSP, Session, Cookies, JSTL, Hibernate etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 1, Enterprise Java.	**Understanding Java EE:** What is an Enterprise Application? What is java enterprise edition? Java EE Technologies, Java EE evolution, Glass fish server	04	Java EE 7 For Beginners	Laptop, Google Meet, Power point presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	JavaEE Architecture,Serverand Containers: Types of System Architecture, Java EE Server, Java EE Containers.		-Sharanam Shah, Vaishali Shah	
	Introduction to Java Servlets: The Need for Dynamic Content, Java Servlet Technology, Why Servlets? What can Servlets do? **Servlet API and Lifecycle:** Java Servlet API, The Servlet Skeleton, The Servlet LifeCycle, A Simple WelcomeS ervlet.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	WorkingWithServlets: Getting Started, Using Annotations, Insteadof, Deployment Descriptor. **Working with Databases:** What Is JDBC? JDBC Architecture, Accessing Database, The Servlet GUI and Database Example.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 2, Enterprise Java.	**Request Dispatcher:** Resquest dispatcher Interface, Methods of Request dispatcher, Request dispatcher Application.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	COOKIES: Kinds Of Cookies, Where Cookies Are Used? Creating Cookies.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	SESSION: What Are Sessions? Lifecycle Of HttpSession, Session Tracking With Servlet API, AServlet Session Example	03	Java EE 7 For Beginners	Laptop, Google Meet, Power point presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			-Sharanam Shah, Vaishali Shah	
	WorkingWith Files: Uploading Files, Creatingan Upload File Application, Downloading Files, Creatinga Download File Application.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Working With Non-Blocking I/O: Creatinga Non Blocking Read Application, Creating The Web Application, Creating Java Class, Creating Servlets, Retrieving The File, Creating index.jsp	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 3 , Enterprise Java.	**Introduction To Java ServerPages:** Why use Java Server Pages? Disadvantages Of JSP, JSP v\s Servlets, Life Cycle of a JSP Page, How does a JSP function? How does JSP execute? About Java Server Pages **Getting Started With Java ServerPages:** Comments, JSP Document, JSP Elements, JSP GUI Example.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Action Elements: Including other Files, Forwarding JSP Page to Another Page, Passing Parameters for other Actions, Loadinga Javabean.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Implicit Objects, ScopeAnd ElExpressions: Implicit Objects, Character Quoting Conventions, Unified Expression Language[UnifiedEl], Expression Language.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Java Server Pages Standard Tag Libraries: What is wrong in using JSP Scriptlet Tags? How JSTL Fixes JSP Scriptlet's Short comings? Disadvantages Of JSTL, TagLibraries.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 4, Enterprise Java.	**Introduction To EnterpriseJavabeans:** Enterprise Bean Architecture, Benefits of Enterprise Bean, Types of EnterpriseBean, Accessing Enterprise Beans, Enterprise Bean Application, Packaging Enterprise Beans .	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Working With Session Beans: When to use SessionBeans? Types of SessionBeans, Remote and Local Interfaces, Accessing Interfaces, Lifecycle of EnterpriseBeans, Packaging EnterpriseBeans, Example of Stateful SessionBean, Example of Stateless SessionBean, Example of Singleton SessionBeans.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Working with Message DrivenBeans: Lifecycle of a MessageDrivenBean, Uses of MessageDrivenBeans, The Message DrivenBeansExample.	01	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Interceptors: Request And Interceptor, Defining An Interceptor, Around Invoke Method, Applying Interceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application. JNDI, Datasource Resource Definition in Java EE.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT506 , Unit 5, Enterprise Java.	**Persistence, Object/Relational Mapping And JPA:** What is Persistence? Persistence in Java, Current Persistence Standards in Java,Object/RelationalMapping, **Introduction to JavaPersistence API:** The Java Persistence API, JPA,ORM, Architecture of JPA, JPA Specifications.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Writing JPA Application: Software Requirements, Creating Database And Tables in Mysql, Creating a WebApplication, Adding the Required Library Files, Creating aJavabean Class, Creating Persistence Unit[Persistence.Xml], Creating JSPS, The JPA Application Structure, Running The JPA Application.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Introduction to Hibernate: What is Hibernate? Why Hibernate? , Database and The Application, Components of Hibernate, Architecture of Hibernate, How HibernateWorks? **WritingHibernateApplication:** Requirements, TheApplication Development Approach, Creating Database and Tables in Mysql, Creating aWeb Application, Adding The Required Library Files, Creatinga JavabeanClass, Creating Hibernate Configuration File, Addinga Mapping Class, Creating JSPS, Running The Hibernate Application.	06	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: TYIT DIV-B

SEMESTER: V MONTH: JULY- OCTOBER ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to:

- Able to understand the application areas of IOT ·
- Able to realize the revolution of Internet in Mobile Devices, Cloud & Sensor Networks ·
- Able to understand building blocks of Internet of Things and characteristics

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT502, Internet of Things Unit 1	The Internet of Things: An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	03	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, Powerpoint
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	04	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses, DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other	03	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

	Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols			
USIT502, Internet of Things **Unit 2**	Thinking About Prototyping: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation, climbing into the Cloud, Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
USIT502, Internet of Things **Unit 3**	Prototyping the Physical Design: Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Prototyping Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

USIT502, Internet of Things **Unit 4**	Techniques for Writing Embedded Code: Memory Management, 12 8 Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging.	04	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	06	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
USIT502, Internet of Things **Unit 5**	Moving to Manufacture: What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: TYBSCIT SEMESTER:V

MONTH: **JULY-OCT** ACADEMIC YEAR:**21-22**

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand fundanentals of project

Be familiar with diff methods and tools used for project management

Do the project planning,scheduling,costing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT501 Software Project Management UNIT-1	**Introduction to Software Project Management**:Introduction, Whyis Software Project Management Important? What is a Project?Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies,Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Successand Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus Modern Project Management Practices.	05	Bob Hughes, Mike Cotterell, Rajib Mall	Laptop,power point
	Project Evaluation and Programme Management: Introduction, Business Case, Project Portfolio Management, Evaluation of Individual Projects, Cost–benefit Evaluation Techniques, Risk Evaluation, Programme Management,	04	Bob Hughes, Mike Cotterell, Rajib Mall	Laptop,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management.			
	An Overview of Project Planning :Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project Infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify Activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning	03	Bob Hughes, Mike Cotterell, Rajib Mall	Laptop,power point
USIT501 Software Project Management UNIT-2	**Selection of an Appropriate Project Approach:**Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model.	06	Bob Hughes, Mike Cotterell, Rajib Mall	Laptop,power point
	Software Effort Estimation: Introduction, Where are the Estimates Done? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottomup Estimating, The Top-down Approach and Parametric Models,Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II, COSMIC Full Function Points,COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of	06	Bob Hughes, Mike Cotterell, Rajib Mall	Laptop,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Brijesh Joshi. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc.I.T. SEMESTER: V MONTH: June to October ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 Advance Web Programming UNIT-I	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning	PPT.
	The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.	4		PPT.
	Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types,	4		PPT.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Understanding Namespaces and Assemblies, Advanced Class Programming.		Visual C# 2010	
USIT503 Advance Web Programming UNIT-II	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.	6	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	PPT.
	Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	6		
USIT503 Advance Web Programming UNIT- III	**Error Handling, Logging, and Tracing** : Avoiding Common Errors, Understanding Exception Handling, Handling Exceptions, Throwing Your Own Exceptions, Using Page Tracing	5	C# 2015 Murach"s ASP.NET 4.6 Web Programming in C#2015 Beginning Visual C# 2010	PPT.
	State Management : Understanding the Problem of State, Using View State, Transferring Information Between Pages, Using Cookies, Managing Session State, Configuring Session State, Using Application State, Comparing State Management Options	4		, PPT.
	Styles, Themes, and Master Pages : Styles, Themes, Master Page Basics, Advanced Master Pages,	3		PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT503 Advance Web Programming UNIT-IV	**ADO.NET Fundamentals**: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	PPT.
	Data Binding: Introducing Data Binding, Using Single-Value Data Binding, Using Repeated-Value Data Binding, Working with Data Source Controls,	4		
	The Data Controls: The GridView, Formatting the GridView, selecting a GridView Row, Editing with the GridView, Sorting and Paging the GridView, Using GridView Templates, The DetailsView and FormView	4		
USIT503 Advance Web Programming UNIT - V	**XML**: XML Explained, The XML Classes, XML Validation, XML Display and Transforms. .	3	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	PPT.
	Security Fundamentals: Understanding Security Requirements, Authentication and Authorization, Forms Authentication, Windows Authentication.	4		PPT.
	ASP.NET AJAX: Understanding Ajax, Using Partial Refreshes, Using Progress Notification, Implementing Timed Refreshes, Working with the ASP.NET AJAX Control Toolkit	5		PPT.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. **Enterprise JAVA** DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: July To Nov ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

- To support for many industry standards and continues simplification of enterprise ready APIs.

The learners will be able to :

- To understand Java Enterprise edition with its different technologies.
- To understand Java EE architectural server and contains.
- To understand server side technology like Java Servlets with its API and life cycle.
- To make data base connectivity using JDBC.
- To navigate using request dispatcher interface.
- To understand state management using cookies and session.
- To understand how to upload and download the file.
- To be able to work with non-blocking I/O resources.
- To understand server side technology like Java Server Pages.
- To make use of action elements, implicit objects, expression language and JSTL.
- To understand enterprise bill, architectural and its bill.
- To be able to working with session beans and message driven beans.
- To understand interceptors and JNDI.
- To make use of ORM and JPA with its API.
- To understand writing JPA application.
- To be able to understand hibernate architectural and components.
- To understand writing hibernate application.

NAAC accredited "B" Grade, 2.69 CGPA

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 **ENTERPRISE JAVA** UNIT-1	**Understanding Java EE:** WhatisanEnterpriseApplication? Whatisjavaenterpriseedition? JavaEETechnologies, JavaEEevolution, Glassfishserver **JavaEE Architecture,Serverand Containers:** TypesofSystemArchitecture, JavaEEServer, JavaEEContainers. **Introduction to Java Servlets:** TheNeedforDynamicContent, JavaServletTechnology, WhyServlets? WhatcanServletsdo? **Servlet API and Lifecycle:** JavaServletAPI, TheServletSkeleton, TheServletLifeCycle, ASimpleWelcomeServlet **WorkingwithServlets:** GettingStarted, UsingAnnotationsInsteadofDeploymentDescriptor. **Working with Databases:** WhatIsJDBC? JDBCArchitecture, AccessingDatabase, TheServletGUI and DatabaseExample.	12	**1.** Java Complete Reference, **2.** Core Java Vol. II – Advanced Features, **3.** Java EE 6 Beginners,	PPT, Google meets.
USIT506 **ENTERPRISE JAVA** UNIT-2	**Request Dispatcher:** Resquestdispatcher Interface, Methods of Requestdispatcher, Requestdispatcher Application. **COOKIES:** KindsofCookies, WhereCookiesAreUsed? CreatingCookiesUsingServlet, DynamicallyChangingtheColorsofAPage **SESSION:** WhatAreSessions? LifecycleofHttpSession, SessionTrackingWithServletAPI, AServlet Session Example **Workingwith Files:** UploadingFiles, CreatinganUploadFileApplication, DownloadingFiles, CreatingaDownloadFileApplication. **Workingwith Non-Blocking I/O:** CreatingaNon-BlockingReadApplication, CreatingTheWeb Application, CreatingJavaClass, Creating Servlets, Retrieving The File, Creating index.jsp	12	**1.** Java Complete Reference, **2.** Core Java Vol. II – Advanced Features, **3.** Java EE 6 Beginners,	PPT, Google meets.

USIT506 **ENTERPRISE JAVA** UNIT-3	**Introduction To Java ServerPages:** WhyuseJava ServerPages? DisadvantagesOfJSP, JSPv\sServlets, LifeCycleofaJSPPage, HowdoesaJSPfunction? HowdoesJSPexecute? AboutJava ServerPages **Getting Started With Java ServerPages:** Comments, JSPDocument, JSPElements, JSPGUIExample. **Action Elements:** IncludingotherFiles, ForwardingJSPPagetoAnotherPage, PassingParametersforotherActions, LoadingaJavabean. **Implicit Objects, Scopeand ElExpressions:** ImplicitObjects, CharacterQuotingConventions, UnifiedExpressionLanguage[UnifiedEl], ExpressionLanguage. **Java Server Pages Standard Tag Libraries:** WhatiswronginusingJSPScriptletTags? HowJSTLFixesJSPScriptlet'sShortcomings? DisadvantagesOfJSTL, TagLibraries.	12	**1.** Java Complete Reference, **2.** Core Java Vol. II – Advanced Features, **3.** Java EE 6 Beginners,	Black Board, Projector, PPT
USIT506 **ENTERPRISE JAVA** UNIT-4	**Introduction To EnterpriseJavabeans:** EnterpriseBeanArchitecture, BenefitsofEnterpriseBean, TypesofEnterpriseBean, AccessingEnterpriseBeans, EnterpriseBeanApplication, PackagingEnterpriseBeans **Workingwith Session Beans:** WhentouseSessionBeans? TypesofSessionBeans, RemoteandLocalInterfaces, AccessingInterfaces, LifecycleofEnterpriseBeans, PackagingEnterpriseBeans, Exampleof StatefulSessionBean, Example ofStatelessSessionBean, Example of SingletonSessionBeans. **Working with Message DrivenBeans:** LifecycleofaMessageDrivenBean, UsesofMessageDrivenBeans, TheMessage DrivenBeansExample.	12	**1.** Java Complete Reference, **2.** Core Java Vol. II – Advanced Features, **3.** Java EE 6 Beginners,	PPT, Google meets.

	Interceptors: Request andInterceptor, Defining An Interceptor, AroundInvokeMethod, ApplyingInterceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application. **Java Naming and Directory Interface**: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.			
USIT506 **ENTERPRISE JAVA** UNIT-5	**Persistence, Object/Relational Mapping And JPA:** WhatisPersistence? PersistenceinJava, CurrentPersistenceStandardsinJava, WhyanotherPersistenceStandards? Object/RelationalMapping, **Introduction to JavaPersistence API:** TheJavaPersistenceAPI, JPA,ORM,DatabaseandtheApplication, ArchitectureofJPA, HowJPAWorks? JPA Specifications. **Writing JPA Application:** ApplicationRequirementSpecifications, SoftwareRequirements, TheApplicationDevelopmentApproach, CreatingDatabaseandTablesinMysql, creatingaWebApplication, AddingtheRequiredLibraryFiles, creatingaJavabeanClass, CreatingPersistenceUnit[Persistence.Xml], CreatingJSPS, TheJPAApplicationStructure, RunningtheJPAApplication. **Introduction to Hibernate:** WhatisHibernate? WhyHibernate? Hibernate,DatabaseandTheApplication, ComponentsofHibernate, ArchitectureofHibernate, HowHibernateWorks? **WritingHibernateApplication:** ApplicationRequirementSpecifications, SoftwareRequirements, TheApplicationDevelopmentApproach, CreatingDatabaseandTablesinMysql, creatingaWebApplication, AddingtheRequiredLibraryFiles, creatingaJavabeanClass, CreatingHibernateConfigurationFile, AddingaMappingClass,	12	**1.** Java Complete Reference, **2.** Core Java Vol. II – Advanced Features, **3.** Java EE 6 Beginners,	PPT, Google meets.

	CreatingJSPS, RunningTheHibernateApplication.

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand the background of Red Hat Linux administration as an operating system.**
- **How to work with various commands and their implementation in Linux bash shell system.**
- **To understand basic management tasks, administrative tasks and managing different services with RPM.**
- **Helps to make you configure and install the software, working with the networks and creation of users, groups and permissions in system.**
- **To make you understand the security concept of the system and cryptographic services.**
- **It also make you understand how to configure and to install different servers(FTP, Mail services, DHCP, Samba etc.) and to enable its services and to provide client server architecture working.**
- **Helps to create clusters and provide better understanding of shell scripting.**

	Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence.	3		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	11		
Software Project Management USIT501 Unit-4	**Monitoring and Control**: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM).	3	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation,Slido,Google Forms
	Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance	2		
	Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns	4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE	9		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	UNIT:			
Software Project Management USIT501 Unit-5	**Working in Teams:** Introduction, Becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres,Communication Plans, Leadership.	3	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation,Slido,Google Forms
	Software Quality : Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability, Quality Plans.	5		
	Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project Closeout Report.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**10**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS: T.Y. BSc (IT) DIV-C SEMESTER:SEM -5 MONTH: JUL-OCT ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand what is a The Internet of Things and its applications .
- Introduction of Prototyping the Physical Design and online design.
- Understand different techniques of Prototyping.
- Learn the concept of automation.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT502 Internet Of Things UNIT 1	**The Internet of Things:** An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	Laptop, power point, jamboard
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	4		
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses,	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols.			
USIT502 Internet Of Things UNIT 2	**Thinking About Prototyping**: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation	4	1.Designing the Internetof Things Adrian McEwen, Hakim Cassimally WILEY First 2014 , 2.Internet of Things – Architecture and Design Raj Kamal McGraw Hill First 201	Laptop, power point, jamboard
	Climbing into the Cloud Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community	4		
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness	4		
USIT502 Internet Of Things	**Prototyping the Physical Design:** Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling.	5	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Prototyping Online Components**: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further	3		Laptop, power point, jamboard
	Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol.	4		
USIT502 Internet Of Things UNIT 4	**Techniques for Writing Embedded Code:** Memory Management,Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging.	5	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	Laptop, power point, jamboard
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models	3		
	Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	4		
USIT502	**Moving to Manufacture:** What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design	5	1.DesigningtheInternetof Things Adrian McEwen, Hakim Cassimally WILEY First 2014 ,	

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Internet Of Things UNIT 5	Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures.		2.Getting Started with Raspberry Pi Matt Richardson and Shawn Wallace SPD Third 2016	Laptop, power point, jamboard
	Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	3		
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control, Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition	4		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYIT-A SEMESTER: SEM-2 MONTH: FEB-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

- To gain an understanding why the green computing is instrumental for the environment.
- Identify key issues relevant to green computing and evaluate different approaches to these problems.
- Study of designing, engineering, manufacturing, using and disposing of computing devices in a way that reduces their environmental impact.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
5 GREEN COMPUTING UNIT 2	Minimizing Power Usage: Power Problems, Monitoring Power Usage, Servers, Low-Cost Options, Reducing Power Use, Data De-Duplication, Virtualization, Management, Bigger Drives, Involving the Utility Company,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Low Power Computers, PCs, Linux, Components, Servers, Computer Settings, Storage, Monitors, Power Supplies, Wireless Devices, Software.	3		
	Cooling: Cooling Costs, Power Cost, Causes of Cost, Calculating Cooling Needs, Reducing Cooling Costs, Economizers, On-Demand Cooling, HP's Solution, Optimizing Airflow, Hot Aisle/Cold Aisle, Raised Floors, Cable Management, Vapour Seal,	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Prevent Recirculation of Equipment Exhaust, Supply Air Directly to Heat Sources, Fans, Humidity, Adding Cooling, Fluid Considerations, System Design, Datacentre Design, Centralized Control, Design for Your Needs, Put Everything Together.	3		
UNIT 3	**Changing the Way of Work:** Old Behaviours, starting at the Top, Process Reengineering with Greening Mind, Analysing the Global Impact of Local Actions,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Steps: Water, Recycling, Energy, Pollutants, Teleworkers and Outsourcing, Telecommuting, Outsourcing, how to Outsource.	3		
	Going Paperless: Paper Problems, The Environment, Costs: Paper and Office, Practicality, Storage, Destruction, Going Paperless, Organizational Realities, Changing Over, Paperless Billing, Handheld Computers vs. the Clipboard,	3		
	Unified Communications, Intranets, What to Include, Building an Intranet, Microsoft Office SharePoint Server 2007, Electronic Data Interchange (EDI), Nuts and Bolts, Value Added Networks, Advantages, Obstacles.	3		
UNIT 5	**Greening Your Information Systems:** Initial Improvement Calculations, Selecting Metrics, Tracking Progress, Change Business Processes, Customer Interaction, Paper Reduction,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Green Supply Chain, Improve Technology Infrastructure, Reduce PCs and Servers, Shared Services, Hardware Costs,	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Cooling.			
	Staying Green: Organizational Check-ups, Chief Green Officer, Evolution, Sell the CEO, SMART Goals, Equipment Check-ups, Gather Data, Tracking the data,	3		
	Baseline Data, Benchmarking, Analyse Data, Conduct Audits, Certifications, Benefits, Realities, Helpful Organizations.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.IT - A SEMESTER: II MONTH: FEBRUARY-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand and realize the Interfacing of memory & various I/O devices with 8085 microprocessors.
- Understand and classify the instruction set of 8085 microprocessor and distinguish the use of different instructions and apply it in assembly language programming.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-II UNIT-III	**Programming Techniques With Additional Instructions:** Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	4		Blackboard, Chalk
	Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT-IV	**Code Conversion, BCD Arithmetic, and 16-Bit Data Operations:** BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-toSeven-Segment-LED Code Conversion, Binary-to-ASCII and ASCIIto-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Software Development System and Assemblers: Microprocessors-Based Software Development system, Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	4		Blackboard, Chalk
	Interrupts: The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		Blackboard, Chalk
UNIT-V	**The Pentium and Pentium Pro microprocessors:** Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor, Special Pentium Pro features.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Core 2 and later Microprocessors: Introduction, Pentium II software changes, Pentium IV and Core 2, i3, i5 and i7.	4		Blackboard, Chalk
	SUN SPARC Microprocessor: Architecture, Register file, data types and instruction format	4		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. (Mrs.) Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: FYIT SEMESTER: II MONTH: FEB to APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

To become familiar with the architecture and the instruction set of an Intel microprocessor

To study the Assembly language programming as well as the design of various types of digital and analog interfaces

To understand the architecture of 8085 and 8051

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 MPA Unit 1	**Microprocessor, microcomputers, and Assembly Language:** Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	4	Microprocessors Architecture, Programming and Applications with the 8085.	Black board & Chalk

			Ramesh Gaonkar PENRAM Fifth 2012	
	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
Paper-02 MPA Unit 2	**Interfacing of I/O Devices** : Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Instructions:	4	Microprocessors Architecture,	Black board & Chalk

	Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program		Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. **OBJECT ORIENTED PROGRAMMING** DEPARTMENT: Information Technology.

CLASS: F.Y.B.Sc. SEMESTER: II MONTH: Dec To March ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

- Object-oriented programming aims to implement real-world entities like inheritance, hiding, polymorphism, etc in programming. The main aim of OOP is to bind together the data and the functions that operate on them so that no other part of the code can access this data except that function.

The learners will be able to :

- To understand difference between object oriented and procedural oriented language.
- To understand advantages benefits and applications of object oriented language.
- To understand characteristics of object oriented language.
- To gain how to implement classes, methods and objects.
- To understand constant variables, data types, operators of C++ language.
- To understand use of constructor and destructor and using its implementation.
- To enable use of arrays, pointers and objects.
- To understand polymorphism and its types.
- To understand virtual function and pure virtual function / abstract function.
- To understand inheritance and its types with constructor.
- To understand run time error handling using try, catch and throw key words and benefits of it.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT201 Object Oriented Programming UNIT-I	**Object Oriented Methodology:** Introduction, Advantages and Disadvantages of Procedure Oriented Languages, what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS. **Principles of OOPS:** OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation, Inheritance, Polymorphism, Dynamic Binding, Message Passing	12	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
USIT201 Object Oriented Programming UNIT-II	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions, passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object. **Constructors and Destructors:** Introduction, Default Constructor, Parameterized Constructor and examples, Destructors	12	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
USIT201 Object Oriented Programming UNIT-III	**Polymorphism:** Concept of function overloading, overloaded operators, overloading unary and binary operators, overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types, **Virtual Functions:** Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors.	12	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.
USIT201 Object Oriented Programming UNIT-IV	**Exception Handling:** Introduction, Exception Handling Mechanism, Concept of throw & catch with example	12	1. Object Oriented Analysis and Design 2. Mastering C++	Black Board, Projector, PPT.

NAME OF THE STAFF: AVINASH DILIP SONAWNAE **DEPARTMENT**: ____IT____

CLASS: FYIT_A DIV **SEMESTER**: 2 **MONTH**: FEB-APRIL **ACADEMIC YEAR:** 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand HTML**
- **Understand JavaScript**
- **Understand how server-side programming works on the web.**
- **PHP Basic syntax for variable types and calculations.**
- **Creating conditional structures**
- **Storing data in arrays**
- **Using PHP built-in functions and creating custom functions**
- **Understanding POST and GET in form submission.**
- **How to receive and process form submission data.**
- **Reading and writing cookies.**
- **Security tips (i.e. SQL Injection)**
- **Create a database in phpMyAdmin.**
- **Read and process data in a MySQL database. Students will learn JavaScript's role in websites and web apps.**
- **Students will be introduced to basic CS concepts**
- **Students will learn basic programming structures such as: variables, functions arrays etc.**
- **Students will learn how JavaScript works with HTML and CSS.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT203 Web Programming Unit I	**Internet and the World Wide Web:** What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers – internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. search engine, web saver – apache, IIS, proxy server, HTTP protocol	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	GOOGLE MEET AND GOOGLE CLASSROOM, BLACKBOARD AND CHALK
	HTML5: Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.	6		

Unit II	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to anotherURL, creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	GOOGLE MEET AND GOOGLE CLASSROOM, BLACKBOARD AND CHALK
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout, formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment, creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page	6		

UNIT III	Java Script: Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	2	JavaScript 2.0: The Complete Reference BY Thomas Powell and Fritz Schneider	BLACKBOARD AND CHALK
	Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	3		
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with	2		
	.Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer	2		
	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp	3		

UNIT IV	PHP: Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types,	3	PHP Project for Beginners BY SharanamShah, Vaishali	BLACKBOARD AND CHALK
	control structures, branching, looping, termination, functions, passing information with PHP, GET, POST,	3		
	formatting form variables, superglobal arrays, strings and string functions	3		
	regular expressions, arrays, number handling, basic PHP errors/problems	3		
UNIT V	Advanced PHP and MySQL : PHP/MySQL Functions, Integrating web forms and databases,	3	PHP Project for Beginners BY SharanamShah, Vaishaliz	BLACKBOARD AND CHALK
	Displaying queries in tables, Building Forms from queries,	3		
	String and Regular Expressions, Sessions,	3		
	Cookies and HTTP, E-Mail	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: AVINASH DILIP SONAWNAE **DEPARTMENT**: ____IT____

CLASS: FYIT_B DIV **SEMESTER**: 2 **MONTH**: Jan to March **ACADEMIC YEAR:** 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand Green Computing**
- **Understand Problems of green Computing**
- **Understand how to solve problem properly**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT205 Green Computing Unit 1	Overview and Issues**:** Problems: Toxins, Power Consumption, Equipment Disposal, Company's Carbon Footprint: Measuring, Details, reasons to bother, Plan for the Future, Cost Savings: Hardware, Power.	6	Green IT Toby Velte, Anthony Velte, Robert Elsenpeter	Google Meet And Google Classroom

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Initiatives and Standards: Global Initiatives: United Nations, Basel Action Network, Basel Convention, North America: The United States, Canada, Australia, Europe, WEEE Directive, RoHS, National Adoption, Asia: Japan, China, Korea	6		
Unit 2	Minimizing Power Usage: Power Problems, Monitoring Power Usage, Servers, Low-Cost Options, Reducing Power Use, Data De-Duplication, Virtualization, Management, Bigger Drives, Involving the Utility Company, LowPower Computers, PCs, Linux, Components, Servers, Computer Settings, Storage, Monitors, Power Supplies, Wireless Devices, Software.	6	Green IT Toby Velte, Anthony Velte, Robert Elsenpeter	Google Meet And Google Classroom
	Cooling: Cooling Costs, Power Cost, Causes of Cost, Calculating Cooling Needs, Reducing Cooling Costs, Economizers, On-Demand Cooling, HP's Solution, Optimizing Airflow, Hot Aisle/Cold Aisle, Raised	6		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Floors, Cable Management, Vapour Seal, Prevent Recirculation of Equipment Exhaust, Supply Air Directly to Heat Sources, Fans, Humidity, Adding Cooling, Fluid Considerations, System Design, Datacentre Design, Centralized Control, Design for Your Needs, Put Everything Together.			
	Going Paperless: Paper Problems, The Environment, Costs: Paper and Office, Practicality, Storage, Destruction, Going Paperless, Organizational Realities, Changing Over, Paperless Billing, Handheld Computers vs. the Clipboard, Unified Communications, Intranets, What to Include, Building an Intranet, Microsoft Office SharePoint Server 2007, Electronic Data Interchange (EDI), Nuts and Bolts, Value Added Networks, Advantages, Obstacles.	6		
Unit 5	Greening Your Information Systems: Initial Improvement Calculations, Selecting Metrics, Tracking	6	Green IT Toby Velte, Anthony Velte,	Google Meet And Google Classroom

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Progress, Change Business Processes, Customer Interaction, Paper Reduction, Green Supply Chain, Improve Technology Infrastructure, Reduce PCs and Servers, Shared Services, Hardware Costs, Cooling.		Robert Elsenpeter	
	Staying Green: Organizational Check-ups, Chief Green Officer, Evolution, Sell the CEO, SMART Goals, Equipment Check-ups, Gather Data, Tracking the data, Baseline Data, Benchmarking, Analyse Data, Conduct Audits, Certifications, Benefits, Realities, Helpful Organizations.	6

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: BRIJESH JOSHI DEPARTMENT: IT CLASS: FYIT-B

SEMESTER: SEM-2 MONTH: JAN-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- To gain an understanding why the green computing is instrumental for the environment.
- Identify key issues relevant to green computing and evaluate different approaches to these problems.
- Study of designing, engineering, manufacturing, using and disposing of computing devices in a way that reduces their environmental impact.

PAPER, TITLE, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 5,GREEN COMPUTING, UNIT 3	**Changing the Way of Work:** Old Behaviours, starting at the Top, Process Reengineering with Greening Mind, Analysing the Global Impact of Local Actions,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	BLACK BOARD AND CHALK
	Steps: Water, Recycling, Energy, Pollutants, Teleworkers and Outsourcing, Telecommuting, Outsourcing, how to Outsource.	3		
	Going Paperless: Paper Problems, The Environment, Costs: Paper and Office, Practicality, Storage, Destruction, Going Paperless, Organizational Realities, Changing Over, Paperless Billing, Handheld Computers vs. the Clipboard,	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 4	Unified Communications, Intranets, What to Include, Building an Intranet, Microsoft Office SharePoint Server 2007, Electronic Data Interchange (EDI), Nuts and Bolts, Value Added Networks, Advantages, Obstacles.	3		
	Hard Drive Recycling, Consequences, cleaning a Hard Drive, Pros and cons of each method, CDs and DVDs, good and bad about CD and DVDs disposal, Change the mind-set, David vs. America Online	3		
	Hardware Considerations: Certification Programs, EPEAT, RoHS, Energy Star, Computers, Monitors, Printers, Scanners, All-in-Ones, Thin Clients, Servers, Blade Servers, Consolidation, Products,	3		
	Hardware Considerations, Planned Obsolescence, Packaging, Toxins, Other Factors, Remote Desktop, Using Remote Desktop, Establishing a Connection, In Practice	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SNEHA TUSHAR VAZE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.IT - B SEMESTER: II MONTH: FEBRUARY-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand and realize the Interfacing of memory & various I/O devices with 8085 microprocessors.
- Understand and classify the instruction set of 8085 microprocessor and distinguish the use of different instructions and apply it in assembly language programming.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 MPA Unit 1	**Microprocessor, microcomputers, and Assembly Language:** Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk

	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
Paper-02 MPA	**Interfacing of I/O Devices** : Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	4	Microprocessors Architecture, Programming and Applications with the 8085.	Black board & Chalk

Unit 2			Ramesh Gaonkar PENRAM Fifth 2012	
	Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Instructions: Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk

PAPER-02 MPA UNIT-3	**Programming Techniques With Additional Instructions:** Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions,	5	Microprocessors Architecture, Programming and	Blackboard, Chalk

	Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.		Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	
	Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	4		Blackboard, Chalk
	Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		Blackboard, Chalk
Paper 02 MPA UNIT-4	**Code Conversion, BCD Arithmetic, and 16-Bit Data Operations:** BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-toSeven-Segment-LED Code Conversion, Binary-to-ASCII and ASCIIto-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Software Development System and Assemblers: Microprocessors-Based Software Development system, Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	4		Blackboard, Chalk
	Interrupts: The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		Blackboard, Chalk
Paper-02 MPA UNIT-5	**The Pentium and Pentium Pro microprocessors:** Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor, Special Pentium Pro features.	4	Microprocessors Architecture, Programming and	Blackboard, Chalk

	Core 2 and later Microprocessors: Introduction, Pentium II software changes, Pentium IV and Core 2, i3, i5 and i7.	4	Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	SUN SPARC Microprocessor: Architecture, Register file, data types and instruction format	4		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT: CS

CLASS: FYIT-DIV B SEMESTER: SEM-2 MONTH: FEB-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

- Perform object oriented programming to develop solution to problems demonstrating usage of control structures, modularity, I/O and other standard language constructs.
- Demonstrate adeptness of object oriented programming to develop solution to problem demonstration usage of data abstraction, encapsulation, and inheritance.

PAPER, TITLE,UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1,Object oriented programming ,UNIT 2	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions, passing object as an argument	4	Object Oriented Programming with C++ by E.Balagurusamy	BLACK BOARD AND CHALK
	Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	4		
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructor	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 5	**Templates:** Introduction, Function Template and examples,	3	Object Oriented Programming with C++ by E.Balagurusamy	BLACK BOARD AND CHALK
	Class Template and examples.	3		
	Working with Files: Introduction, File Operations, Various File Modes,	4		
	File Pointer and their Manipulation	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ASHLESHA DATTARAM GURAV DEPARTMENT:IT

CLASS: FY BSc IT DIV B (WEB) SEMESTER:SEM -2 MONTH: FEB-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand basics of the Internet and its applications.
- Learn basics of HTML 5, creating hyperlinks and adding background.
- Learn CSS and formatting using CSS.
- Understand how server-side programming works on the web.
- PHP Basic syntax for variable types and calculations.
- Create conditional structures, storing data in arrays
- Use PHP built-in functions and creating custom functions
- Understand POST and GET in form submission.
- Learn how to receive and process form submission data.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3 WEB PROGRAMMING UNIT 1	Internet and the World Wide Web: What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers – internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. search engine, web saver – apache, IIS, proxy server, HTTP protocol.	4 .	1. Web Design The Complete Reference By Thomas Powell- Tata McGraw Hill	BLACK BOARD AND CHALK

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	HTML5: Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.	8	2. HTML5 Step by Step By Faithe Wempen - Microsoft Press	
UNIT 4	**PHP:** Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types,	3	PHP Project for Beginners BY SharanamShah, Vaishali	BLACK BOARD AND CHALK
	control structures, branching, looping, termination, functions, passing information with PHP, GET, POST,	3		
	formatting form variables, superglobal arrays, strings and string functions,	3		
	regular expressions, arrays, number handling, basic PHP errors/problems	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT: CS

CLASS:FY BSc IT DIV-B(OOP) SEMESTER: SEM-2 MONTH:JAN-MAR ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

- The learners will be able to :
- To understand how C++ improves C with object-oriented features.
- To learn how to write inline functions for efficiency and performance.
- To learn the syntax and semantics of the C++ programming language.
- To learn how to design C++ classes for code reuse.
- To learn how to implement copy constructors and class member functions.
- To understand the concept of data abstraction and encapsulation.
- To learn how to overload functions and operators in C++.
- To learn how containment and inheritance promote code reuse in C++.
- To learn how inheritance and virtual functions implement dynamic binding with polymorphism.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER1 OOP UNIT 1	**Object Oriented Methodology**: Introduction, Advantages and Disadvantages of Procedure Oriented Languages,	3	Object Oriented Programming with C++ BY E. Balagurusamy	BLACK BOARD AND CHALK
	what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	3		
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation,	3		
	Inheritance, Polymorphism, Dynamic Binding	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Polymorphism:** Concept of function overloading, overloaded operators,	3	Object Oriented Programming with C++ BY E. Balagurusamy	BLACK BOARD AND CHALK
	overloading unary and binary operators, overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types,	3		
	Virtual Functions: Introduction and need, Pure Virtual Functions,	3		
	Static Functions, this Pointer, abstract classes, virtual	3		
UNIT 4	**Program development using Inheritance:** Introduction, understanding inheritance, Advantages provided by inheritance,	3	Object Oriented Programming with C++ BY E. Balagurusamy	BLACK BOARD AND CHALK
	choosing the access specifier, Derived class declaration, derived class constructors, class hierarchies,	3		
	multiple inheritance, multilevel inheritance, containership, hybrid inheritance.	3		
	Exception Handling: Introduction, Exception Handling Mechanism	3

The learners will be able to :

- Understand and realize the Interfacing of memory & various I/O devices with 8085 microprocessors.
- Understand and classify the instruction set of 8085 microprocessor and distinguish the use of different instructions and apply it in assembly language programming.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 MPA Unit 1	**Microprocessor, microcomputers, and Assembly Language:** Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	4	Microprocessors Architecture, Programming and Applications with the 8085.	Black board & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Ramesh Gaonkar PENRAM Fifth 2012	
	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
Paper-02 MPA Unit 2	**Interfacing of I/O Devices** : Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Instructions:	4	Microprocessors Architecture,	Black board & Chalk

	Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program		Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	

PAPER-02 MPA UNIT-3	**Programming Techniques With Additional Instructions:** Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	4		Blackboard, Chalk
	Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		Blackboard, Chalk
Paper 02 MPA UNIT-4	**Code Conversion, BCD Arithmetic, and 16-Bit Data Operations:** BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-toSeven-Segment-LED Code Conversion, Binary-to-ASCII and ASCIIto-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Software Development System and Assemblers: Microprocessors-Based Software Development system,	4		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.			
	Interrupts: The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		Blackboard, Chalk
Paper-02 MPA UNIT-5	**The Pentium and Pentium Pro microprocessors:** Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor, Special Pentium Pro features.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Blackboard, Chalk
	Core 2 and later Microprocessors: Introduction, Pentium II software changes, Pentium IV and Core 2, i3, i5 and i7.	4		Blackboard, Chalk
	SUN SPARC Microprocessor: Architecture, Register file, data types and instruction format	4		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYIT-C SEMESTER: SEM-2 MONTH: FEB-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

- Perform object oriented programming to develop solution to problems demonstrating usage of control structures, modularity, I/O and other standard language constructs.
- Demonstrate adeptness of object oriented programming to develop solution to problem demonstration usage of data abstraction, encapsulation, and inheritance.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
1 OBJECT ORIENTED PROGRAMMING UNIT 4	**Program development using Inheritance:** Introduction, understanding inheritance, Advantages provided by inheritance, choosing the access specifier, Derived class declaration,	3	Object Oriented Programming with C++ by E.Balagurusamy	BLACK BOARD AND CHALK
	derived class constructors, class hierarchies, multiple inheritance,	3		
	Multilevel inheritance, Containership, hybrid inheritance. Exception Handling: Introduction,	3		
	Exception Handling Mechanism, Concept of throw & catch with example	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 5	**Templates:** Introduction, Function Template and examples,	3	Object Oriented Programming with C++ by E.Balagurusamy	BLACK BOARD AND CHALK
	Class Template and examples.	3		
	Working with Files: Introduction, File Operations, Various File Modes,	4		
	File Pointer and their Manipulation	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: CS

CLASS:FYIT-DIV C SEMESTER: SEM-II MONTH: FEB-APR ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to: To apply fundamental programming constructs. To illustrate the concept of classes and objects, Data Abstraction and Data Encapsulation. To implement the concept of Pointer, friend function , Virtual Functions, Constructor& Destructors.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-1, OOPS, UNIT 1	**Object Oriented Methodology:** Introduction, Advantages and Disadvantages of Procedure Oriented Languages, what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	4	Object Oriented Programming with C++ -by E. Balagurusamy	PPT, GoogleMeet, ,Slido.
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation	3		
	Inheritance, Polymorphism, Dynamic Binding, Message Passing	5		
UNIT 2	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions	4	Object Oriented Programming with C++ -by E. Balagurusamy	PPT, Projector, Blackboard & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	4		
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors.	2		
UNIT 3	**Polymorphism:** Concept of function overloading, overloaded operators, overloading unary and binary operators	4	Object Oriented Programming with C++ -by E. Balagurusamy	PPT, Projector, Blackboard & Chalk
	overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types.	5		
	Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors.	4

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT:CS

CLASS: FY BSc IT DIV C(WEB) SEMESTER:SEM -2 MONTH: DEC-MAR ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand how server-side programming works on the web.
- PHP Basic syntax for variable types and calculations.
- Creating conditional structures
- Storing data in arrays
- Using PHP built-in functions and creating custom functions
- Understanding POST and GET in form submission.
- How to receive and process form submission data.
- Reading and writing cookies.
- Security tips (i.e. SQL Injection)
- Create a database in phpMyAdmin.
- Read and process data in a MySQL database. Students will learn JavaScript's role in websites and web apps.
- Students will be introduced to basic CS concepts
- Students will learn basic programming structures such as: variables, functions arrays etc.
- Students will learn how JavaScript works with HTML and CSS.

NAME OF THE STAFF: Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: S.Y.I.T.-A (Core Java)

SEMESTER: IV

MONTH: January - March

ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S :
The learners will be able to :

-Understand basics of Java programming language .

-Learn to control the flow of execution of the program.

-Understand of to create java classes and objects and using them to make java application

-Learn the concepts of multi threading and exception handling.

-Learn to use streams for reading and writing data to and from files.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

TEACHING PLAN (UNIT PLAN)-CORE JAVA

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: SYIT (A)

SEMESTER: IV MONTH: JAN-MARCH ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to:

- Acquire knowledge of programming language java.
- Understand data types, control flow statements, iterations and classes.
- Gain proficiency in inheritance and packages.
- Understand enumeration, arrays, exceptions and byte stream.
- Acquire knowledge of event handling and layouts.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT401, Core Java, Unit III	**Inheritance:** Derived Class Objects, Inheritance and Access Control, Default Base Class Constructors, this and super keywords.	04	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Abstract Classes And Interfaces, Abstract Classes, Abstract Methods, Interfaces, What Is An Interface? How Is An Interface Different From An Abstract Class?, Multiple Inheritance, Default Implementation, Adding New Functionality, Method Implementation, Classes V/s Interfaces, Defining An Interface, Implementing Interfaces.	05	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint

	Packages: Creating Packages, Default Package, Importing Packages, Using A Package.	03	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
USIT401, Core Java, Unit V	**Event Handling:** Delegation Event Model, Events, Event classes, Event listener interfaces, Using delegation event model, adapter classes and inner classes.	03	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Abstract Window Toolkit: Window Fundamentals, Component, Container, Panel, Window, Frame, Canvas. Components – Labels, Buttons, Check Boxes, Radio Buttons, Choice Menus, Text Fields, Text, Scrolling List, Scrollbars, Panels, Frames	07	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Layouts: Flow Layout, Grid Layout, Border Layout, Card Layout.	02	Core Java 8 for Beginners by Vaishali Shah, Sharnam Shah, SPD,1st, 2015	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ____ HEMANT WANI__ DEPARTMENT: _____BSC-IT___ CLASS: __SYIT___ SEMESTER: ___IV

MONTH: ____December to March_____ ACADEMIC YEAR: ____2021-22__

LEARNING OBJECTIVE/S:
The learners will be able to:

To adhere to the highest standards of ethics, including relevant industry and organizational codes of conduct. To be capable of managing complex IT projects with consideration of the human, financial and environmental factors. To work effectively as a part of a team to achieve a common stated goal.

Software Engineering USIT404 Unit - 3	**Architectural Design:** Architectural Design Decisions, System Organisation, Modular Decomposition Styles, Control Styles, Reference Architectures. User Interface Design: Need of UI design, Design issues, The UI design Process, User analysis, User Interface Prototyping, Interface Evaluation. Project Management Software Project Management, Management activities, Project Planning, Project Scheduling, Risk Management. Quality Management: Process and Product Quality, Quality assurance and Standards, Quality Planning, Quality Control, Software Measurement and Metrics.	2 3 2 2 3	Ian Somerville Roger Pressman	Chalk, Blackboard

Software Engineering USIT404 Unit - 4	**Verification and Validation:** Planning Verification and Validation, Software Inspections, Automated Static Analysis, Verification and Formal Methods. Software Testing: System Testing, Component Testing, Test Case Design, Test Automation. Software Measurement: Size-Oriented Metrics, Function-Oriented Metrics, Extended Function Point Metrics **Software Cost Estimation:** Software Productivity, Estimation Techniques, Algorithmic Cost Modelling, Project Duration and Staffing.	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard
Software Engineering USIT404 Unit - 5	**Process Improvement:** Process and product quality, Process Classification, Process Measurement, Process Analysis and Modeling, Process Change. The CMMI Process Improvement Framework. Service Oriented Software Engineering: Services as reusable components, Service Engineering. Software Development with Services. Software reuse: The reuse landscape, Application frameworks, Software product lines, COTS product reuse. Distributed software engineering: Distributed systems issues, Client–server computing, Architectural patterns for distributed systems, Software as a service.	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ____ HEMANT WANI__ DEPARTMENT: _____BSC-IT___ CLASS: __SYIT___ SEMESTER: ___IV

MONTH: ____December to March_____ ACADEMIC YEAR: ____2021-22__

LEARNING OBJECTIVE/S:
The learners will be able to:

To adhere to the highest standards of ethics, including relevant industry and organizational codes of conduct. To be capable of managing complex IT projects with consideration of the human, financial and environmental factors. To work effectively as a part of a team to achieve a common stated goal.

TITLE PAPER, UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Software Engineering USIT404 Unit - 1	**Introduction**: What is software engineering? Software Development Life Cycle, Requirements Analysis, Software Design, Coding, Testing, Maintenance etc. Software Requirements: Functional and Non-functional requirements, User Requirements, System Requirements, Interface Specification, Documentation of the software requirements. Software Processes: Process and Project, Component Software Processes. Software Development Process Models. Waterfall Model. Prototyping. Iterative	3 4 3	Ian Somerville Roger Pressman	Chalk, Blackboard

	Development. Rational Unified Process. The RAD Model Time boxing Model. Agile software development: Agile methods. Plan-driven and agile development, Extreme programming, Agile project management methods.	2		
Software Engineering USIT404 Unit - 2	**Socio-technical system:** Essential characteristics of socio technical systems, Emergent System Properties, Systems Engineering. Components of system such as organization, people and computers, Dealing Legacy Systems. Critical system: Types of critical system. A simple safety critical system, Dependability of a system, Availability and Reliability, Safety and Security of Software systems. Requirements Engineering Processes: Feasibility study, Requirements elicitation and analysis, Requirements Validations, Requirements Management	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard
Software Engineering USIT404 Unit - 3	**Architectural Design:** Architectural Design Decisions, System Organisation, Modular Decomposition Styles, Control Styles, Reference Architectures. User Interface Design: Need of UI design, Design issues, The UI design Process, User analysis, User Interface Prototyping, Interface Evaluation. Project Management	2 3 2	Ian Somerville Roger Pressman	Chalk, Blackboard

	Software Project Management, Management activities, Project Planning, Project Scheduling, Risk Management. Quality Management: Process and Product Quality, Quality assurance and Standards, Quality Planning, Quality Control, Software Measurement and Metrics.	2 3		
Software Engineering USIT404 Unit - 4	**Verification and Validation:** Planning Verification and Validation, Software Inspections, Automated Static Analysis, Verification and Formal Methods. Software Testing: System Testing, Component Testing, Test Case Design, Test Automation. Software Measurement: Size-Oriented Metrics, Function-Oriented Metrics, Extended Function Point Metrics **Software Cost Estimation:** Software Productivity, Estimation Techniques, Algorithmic Cost Modelling, Project Duration and Staffing.	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard
Software Engineering USIT404 Unit - 5	**Process Improvement:** Process and product quality, Process Classification, Process Measurement, Process Analysis and Modeling, Process Change. The CMMI Process Improvement Framework. Service Oriented Software Engineering: Services as reusable components, Service Engineering. Software Development with Services. Software reuse: The reuse landscape, Application frameworks, Software product lines, COTS product reuse. Distributed software engineering: Distributed systems issues, Client–server computing, Architectural patterns for distributed systems, Software as a service.	3 3 3 3	Ian Somerville Roger Pressman	Chalk, Blackboard

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**SY.B S C(IT)-C**_____ SEMESTER: ____**IV**_____ MONTH: _____**NOVEMBER-MARCH**_____ ACADEMIC YEAR: _____**2021-2022**_____

LEARNING OBJECTIVE/S:
The learners will be able to :

Understand the concept of transformations and its types in 2D and 3D in computer graphics and how those can be implemented in variation of applications including Animation. Understanding the representation of matrices, projection in CG and its usage. To implement concepts, creation and how it works with different types of animation. To make understand what is image , how it is created and how it is used in varieties of processing, To make understand the concept of image enhancement, compression, filtering and histogram of image to study subjective improvisation of image in applications to reduce the noise

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:S.Y.BSC(I.T) Div-C SEMESTER: **IV** MONTH: NOVEMBER-MARCH ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to : To list the basic concepts used in computer graphics

To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping.

To describe the importance of viewing and projections.

To define the fundamentals of animation, virtual reality and its related technologies.

To understand a typical graphics pipeline

To design an application with the principles of virtual reality

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS: SY BSc IT-SEM-IV-EMBEDDED SYSTEM MONTH: NOV-MAR ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

The learners will be able to :

1. Understand what is a microcontroller, microcomputer, embedded system.
2. Understand different components of a micro-controller and their interactions.
3. Become familiar with programming environment used to develop embedded systems .
4. Understand key concepts of embedded systems like IO, timers, interrupts, interaction with peripheral devices .
5. Learn debugging techniques for an embedded system.

NAME OF THE STAFF: Shweta Kiran Yande DEPARTMENT: Computer Science

CLASS: T.Y.I.T SEMESTER: VI

MONTH: Dec - March ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to :

Student will able to understand the importance of software quality.
Aspects that the related to software quality.
Stakeholders and their relationship.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCSIT601 Software Quality Assurance UNIT - I	**Introduction to Quality:** Historical Perspective of Quality, What is Quality? (Is it a fact or perception?), Definitions of Quality, Core Components of Quality, Quality View, Financial Aspect of Quality, Customers, Suppliers and Processes, Total Quality Management (TQM), Quality Principles of Total Quality Management, Quality Management Through Statistical Process Control, Quality Management Through Cultural Changes, Continual (Continuous) Improvement Cycle, Quality in Different Areas, Benchmarking and Metrics, Problem Solving Techniques, Problem Solving Software Tools.	6	Software Testing and Continuous Quality Improvement Software Testing: Principles, Techniques and Tools	PPT
	Software Quality: Introduction, Constraints of Software Product Quality Assessment, Customer is a King, Quality and Productivity Relationship, Requirements of a Product, Organisation Culture,	6		PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Characteristics of Software, Software Development Process, Types of Products, Schemes of Criticality Definitions, Problematic Areas of Software Development Life Cycle, Software Quality Management, Why Software Has Defects? Processes Related to Software Quality, Quality Management System Structure, Pillars of Quality Management System, Important Aspects of Quality Management.

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)** _____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**T.Y.B.SC (IT)-A**_____ SEMESTER: ____**VI**_____ MONTH: _____ _____**NOVEMBER-MARCH** _____ ACADEMIC YEAR: **2021-2022**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the Geographical Information System for processing standard geographic data.
- Make you understand where GIS system can be applied. Learning about different applications (example: GPS).
- How geographic data are capture, updated, profiled, stored and represented in the system.
- Enable to understand software and hardware trends, DBMS and varieties of Models.
- To understand how geographic data can be display with help of Maps and to understand the making of Maps.
- Studying about spatial referencing and positioning of data in system.
- To understand different operations and functions on data and to analyze and explore information in the system.
- To provide better visualization of data both in vector and raster manner.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-04 (USIT604) **Principles of**	**A Gentle Introduction to GIS** **The nature of GIS:** Some fundamental observations, Defining GIS, GISystems, GIScience and GIApplications, Spatial data and Geoinformation.	04	Principles of Geographic Information Systems- An	Online Google Meet. TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. **Security In Computing** DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: VI MONTH: Dec to March ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S: To provide security against users, software, devices, operating systems, networks, cloud and data.

The learners will be able to :

- To understand the concept of Information Security.
- To know how to use Security Methodology, Strategy and Tactics.
- To analyze Risk by identifying possible Threat, Types of Attacks.
- To learn about Secure Design Principles like the CIA Triad and Other Models, Defense Models.
- To know Intrusion Detection and Prevention Systems.
- To learn Voice over IP (VoIP) and PBX Security, TEM (Telecom Expense Management).
- To understand Operating System Security Models, International Standards for Operating System Security.
- To have information related to Virtual Machines and Cloud Computing.
- To study Secure Application Design in Web Application Security, Client Application Security, Remote Administration Security.
- To know how to implement Physical Security by Choosing Site Location for Security, Securing Assets - Locks and Entry Controls, Physical Intrusion Detection.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT602 **Security In Computing**	**Information Security Overview**: The Importance of Information Protection, The Evolution of Information Security, Justifying Security Investment, Security Methodology, How to Build a Security	12	1. The Complete Reference: Information Security 2. Essential	Black Board, Projector, Google Meet PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT-1	Program, The Impossible Job, The Weakest Link, Strategy and Tactics, Business Processes vs. Technical Controls. **Risk Analysis**: Threat Definition, Types of Attacks, Risk Analysis. **Secure Design Principles**: The CIA Triad and Other Models, Defense Models, Zones of Trust, Best Practices for Network Defense.		Cybersecurity Science 3. Principles of Computer Security: CompTIA Security+ and Beyond	
USIT603 **Security In Computing** UNIT-4	**Intrusion Detection and Prevention Systems**: IDS Concepts, IDS Types and Detection Models, IDS Features, IDS Deployment Considerations, Security Information and Event Management (SIEM). **Voice over IP (VoIP) and PBX Security**: Background, VoIP Components,VoIP Vulnerabilities and Countermeasures, PBX, TEM: Telecom Expense Management. **Operating System Security Models**: Operating System Models, Classic Security Models, Reference Monitor, Trustworthy Computing, International Standards for Operating System Security.	12	1. The Complete Reference: Information Security 2. Essential Cybersecurity Science 3. Principles of Computer Security: CompTIA Security+ and Beyond	Black Board, Projector, Google Meet PPT

CLASS: TYIT SEMESTER: VI MONTH: NOV to MARCH ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

To develop the understanding of relationship between commerce and cyberspace

To enable learner to understand, explore, and acquire a critical understanding Cyber Law.

To give learners in depth knowledge of Information Technology Act and legal frame work of Right to Privacy, Data Security and Data Protection

To make learner conversant with the social and intellectual property issues emerging from 'Cyberspace

NAAC accredited "B" Grade, 2.69 CGPA

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-07 Cyber Law Unit 3	**Battling Cyber Squatters and Copyright Protection in the Cyber World:** Concept of Domain Name and Reply to Cyber Squatters, Meta-Tagging, Legislative and Other Innovative Moves Against Cyber Squatting, The Battle Between Freedom and Control on the Internet, Works in Which Copyright Subsists and meaning of Copyright, Copyright Ownership and Assignment, License of Copyright, Copyright Terms and Respect for Foreign Works, Copyright Infringement, Remedies and Offences, Copyright Protection of Content on the Internet; Copyright Notice, Disclaimer and Acknowledgement, Downloading for Viewing Content on the Internet, Hyper-Linking and Framing, Liability of ISPs for Copyright Violation in the Cyber World: Legal Developments in the US, Napster and its Cousins: A Revolution on the Internet but a Crisis for Copyright Owners, Computer Software Piracy.	12	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
Paper-07 Cyber Law Unit 4	**E-Commerce Taxation:** Real Problems in the Virtual World: A Tug of War on the Concept of „Permanent Establishment", Finding the PE in Cross Border E-Commerce, The United Nations Model Tax Treaty, The Law of Double Taxation Avoidance Agreements and Taxable Jurisdiction Over Non-Residents, Under the Income Tax Act, 1961, Tax Agents of Non-Residents under the Income Tax Act,1961 and the Relevance to E-Commerce, Source versus Residence and Classification between Business Income and Royalty, The Impact of the Internet on Customer Duties, Taxation Policies in India: At a Glance.	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Digital Signature, Certifying Authorities and E-Governance: Digital Signatures, Digital Signature Certificate, Certifying Authorities and Liability in the Event of Digital Signature Compromise, E-Governance in India: A Warning to Babudom!	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
Paper-07 Cyber Law Unit 5	**The Indian Evidence Act of 1872 v. Information Technology Act, 2000:** Status of Electronic Records as Evidence, Proof and Management of Electronic Records; Relevancy, Admissibility and Probative Value of E-Evidence, Proving Digital Signatures, Proof of Electronic Agreements, Proving Electronic Messages, Other Amendments in the Indian Evidence Act by the IT Act, Amendments to the Bankers Books Evidence Act, 1891 and Reserve Bank of India Act, 1934.	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk
	Protection of Cyber Consumers in India: Are Cyber Consumers Covered Under the Consumer Protection Act? Goods and Services, Consumer Complaint, Defect in Goods and Deficiency in Services, Restrictive and Unfair Trade Practices, Instances of Unfair Trade Practices, Reliefs Under CPA, Beware Consumers, Consumer Foras, Jurisdiction and Implications on cyber Consumers in India, Applicability of CPA to Manufacturers, Distributors, Retailers and Service Providers Based in Foreign Lands Whose Goods are Sold or Services Provided to a Consumer in India. Amendments in Indian IT Act 2000	6	Cyber Law Simplified Vivek Sood TMH Education	Projector, Laptop, Black board & Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Pranali Dayanand Thakare

DEPARTMENT: IT

CLASS: T.Y.I.T.-B (Principles of Geographic Information Systems)

SEMESTER: VI

MONTH: Nov - March

ACADEMIC YEAR: 2021 -2022

LEARNING OBJECTIVE/S :
The learners will be able to :

- Understand the basics of geographic information system.
- Learn GIS Models.
- Understand different types of GIS Data.
- Analyze data, explore issues, problem solve, and evaluate situations in a geographic and spatial context.
- Explore mapped data
- Relate GIS with remote sensing technologies
- Create maps ans images to communicate spatial data in a meaningful way to others.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

USIT604, Unit 1, Principles of Geographic Information Systems.	**A Gentle Introduction to GIS** **The nature of GIS:** Some fundamental observations, Defining GIS, GISystems, GIScience and GIApplications, Spatial data and Geoinformation. **The real world and representations of it:** Models and modelling, Maps, Databases, Spatial databases and spatial analysis.	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet, Quizze.
	Models and Representations of the real world Geographic Phenomena: Defining geographic phenomena, types of geographic phenomena, Geographic fields, Geographic objects, Boundaries	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet.
	Computer Representations of Geographic Information: Regular tessellations, irregular tessellations, Vector representations, Topology and Spatial relationships, Scale and Resolution, Representation of Geographic fields, Representation of Geographic objects , Organizing and Managing Spatial Data ,The Temporal Dimension	06	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT604, Unit 3, Principles of Geographic Information Systems.	**Spatial Referencing and Positioning** **Spatial Referencing:** Reference surfaces for mapping, Coordinate Systems, Map Projections, Coordinate Transformations .	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet.
	Satellite-based Positioning: Absolute positioning, Errors in absolute positioning, Relative positioning, Network positioning, code versus phase measurements, Positioning technology	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet.
	Data Entry and Preparation **Spatial Data Input:** Direct spatial data capture, Indirect spatial data captiure, Obtaining spatial data elsewhere **Data Quality:** Accuracy and Positioning, Positional accuracy, Attribute accuracy, Temporal accuracy, Lineage, Completeness, Logical consistency	03	Principles of Geographic Information Systems An Introductory Text Book	Power Point , Google meet.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			- Otto Huisman and Rolf A.	
	Data Preparation: Data checks and repairs, Combining data from multiple sources ,**Point Data Transformation:** Interpolating discrete data, Interpolating continuous data.	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT604, Unit 4, Principles of Geographic Information Systems.	. **Spatial Data Analysis** **Classification of analytical GIS Capabilities** **Retrieval, classification and measurement:** Measurement, Spatial selection queries, Classification	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet.
	Overlay functions: Vector overlay operators,Raster overlay operators **Neighbourhood functions:** Proximity computations, Computation of diffusion, Flow computation, Raster based surface analysis **Analysis:** Network analysis, interpolation, terrain modeling	06	Principles of Geographic Information Systems An Introductory Text Book	Power Point , Google meet.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			- Otto Huisman and Rolf A.	
	GIS and Application models:GPS, Open GIS Standards, GIS Applications and Advances **Error Propagation in spatial data processing:** How Errors propagate, Quantifying error propagation.	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT604, Unit 5, Principles of Geographic Information Systems.	**Data Visualization** **GIS and Maps, The Visualization Process** **Visualization Strategies: Present or explore?**	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet.
	The cartographic toolbox: What kind of data do I have?, How can I map my data?	06	Principles of Geographic	Power Point , Google meet,YouTube video.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	How to map?: How to map qualitative data, How to map quantitative data, How to map the terrain elevation, How to map time series		Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	
	Map Cosmetics, Map Dissemination	03	Principles of Geographic Information Systems An Introductory Text Book - Otto Huisman and Rolf A.	Power Point , Google meet,YouTube video.

TEACHING PLAN (UNIT PLAN)- BUSINESS INTELLIGENCE

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: TYIT (C)

SEMESTER: VI MONTH: DEC-MARCH ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the use of business intelligence in real life.
- Describe the different mathematical models to develop decision making systems.
- Get the difference between supervised learning and unsupervised learning techniques.
- Understand the use of mathematical models in relational marketing, support chain optimization, CCR model.
- Familiar with knowledge management and Artificial intelligence and expert systems.

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:T.Y.BSC(I.T) DIV-C SEMESTER: **VI** MONTH:NOVEMBER-MARCH ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to : To create more awareness about cyber legal issues and challenges.

To provide advice, inputs as also guidance to students on their day-to-day legal issues concerning the use of cyberspace.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Cyber Laws Elective I USIT607 Unit-1	**Power of Arrest Without Warrant Under the IT Act, 2000:** A Critique, Crimes of this Millennium, Section 80 of the IT Act, 2000 – A Weapon or a Farce?	1	Cyber Law Simplified - Vivek Sood	Powerpoint Presentation, Blackboard,projector
	Forgetting the Line Between Cognizable and Non-Cognizable Offences.	2		
	Necessity of Arrest without Warrant from Any Place, Public or Otherwise.	2		
	Check and Balances Against Arbitrary Arrests,Arrest for "About to Commit" an Offence Under the IT Act: A Tribute to Draco, Arrest, But NO Punishment!	2		
	Cyber Crime and Criminal Justice: Penalties, Adjudication and Appeals Under the IT Act,2000: Concept of "Cyber Crime " and the IT Act , 2000, Hacking.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Teenage Web Vandals, Cyber Fraud and Cyber Cheating, Virus on the Internet,Defamation, Harassment and Email Abuse, Cyber Pornography, Other IT Act Offences	2		
	. Monetary Penalties, Adjudication and Appeals Under IT Act , 2000, Network Service Providers, Jurisdiction and Cyber Crime.	2		
	Nature of Cyber Criminality, Strategies to Tackle Cyber Crime and Trends, Criminal Justice in India and Implications on Cyber Crime.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	15		
Cyber Laws Elective I USIT607 Unit-2	**Contracts in the Infotech World:** Contracts in the Infotech World, Click-Wrap and Shrink-Wrap Contract: Status under the Indian Contract Act, 1872.	2	Cyber Law Simplified - Vivek Sood	Powerpoint Presentation, Blackboard,projector
	Contract Formation Under the Indian Contract Act, 1872, Contract Formation on the Internet.	2		
	Terms and Conditions of Contracts.	1		
	Jurisdiction in the Cyber World: Questioning the Jurisdiction and Validity of the Present Law of Jurisdiction,Civil Law of Jurisdiction in India.	2		
	Cause of Action, Jurisdiction and the Information Technology Act,2000.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Foreign Judgements in India, Place of Cause of Action in Contractual and IPR Disputes.	2		
	Exclusion Clauses in Contracts, Abuse of Exclusion Clauses, Objection of Lack of Jurisdiction, Misuse of the Law of Jurisdiction.	2		
	Legal Principles on Jurisdiction in the United State of America, Jurisdiction Disputes w.r.t. the Internet in the United State of America.	2

NAME OF THE STAFF: ___**MS. SHILPA RODRIGUES** _____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**T.Y.B.SC (IT)-C**_____ SEMESTER: ____**VI**_____ MONTH: _____ _____**NOVEMBER-MARCH** _____ ACADEMIC YEAR: **2021-2022**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the Geographical Information System for processing standard geographic data.
- Make you understand where GIS system can be applied. Learning about different applications (example: GPS).
- How geographic data are capture, updated, profiled, stored and represented in the system.
- Enable to understand software and hardware trends, DBMS and varieties of Models.
- To understand how geographic data can be display with help of Maps and to understand the making of Maps.
- Studying about spatial referencing and positioning of data in system.
- To understand different operations and functions on data and to analyze and explore information in the system.
- To provide better visualization of data both in vector and raster manner.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-04 (USIT604) **Principles of**	**A Gentle Introduction to GIS** **The nature of GIS:** Some fundamental observations, Defining GIS, GISystems, GIScience and GIApplications, Spatial data and Geoinformation.	04	Principles of Geographic Information Systems- An	Online Google Meet. PPTs. Blackboard, Chalk and Duster. Website.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Geographic Information Systems **Unit No -01**	**The real world and representations of it:** Models and modelling, Maps, Databases, Spatial databases and spatial analysis		Introductory Text Book By Editors: Otto Huisman and Rolf A. , The International Institute of Geoinformation Science and Earth Observation Introduction to Geographic Information Systems Chang Kang-tsung McGrawHill	
	Geographic Information and Spatial Database **Models and Representations of the real world** **Geographic Phenomena:** Defining geographic phenomena, types of geographic phenomena, Geographic fields, Geographic objects, Boundaries	03		
	Computer Representations of Geographic Information: Regular tessellations, irregular tessellations, Vector representations, Topology and Spatial relationships, Scale and Resolution, Representation of Geographic fields, Representation of Geographic objects	03		
	Organizing and Managing Spatial Data **The Temporal Dimension**	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -02	**Data Management and Processing Systems** **Hardware and Software Trends** **Geographic Information Systems:** GIS Software, GIS Architecture and functionality, Spatial Data Infrastructure (SDI)	04	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto	Online Google Meet. PPTs. Blackboard, Chalk and Duster. Website.
	Stages of Spatial Data handling: Spatial data handling and preparation, Spatial Data Storage and maintenance, Spatial Query and Analysis, Spatial Data Presentation.	03		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Database management Systems: Reasons for using a DBMS, Alternatives for data management, The relational data model, Querying the relational database.	03	Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	
	GIS and Spatial Databases: Linking GIS and DBMS, Spatial database functionality.	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -03	**Spatial Referencing and Positioning** **Spatial Referencing:** Reference surfaces for mapping, Coordinate Systems, Map Projections, Coordinate Transformations	03	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Online Google Meet. PPTs. Blackboard, Chalk and Duster. Website.
	Satellite-based Positioning: Absolute positioning, Errors in absolute positioning, Relative positioning, Network positioning, code versus phase measurements, Positioning technology	03		
	Data Entry and Preparation **Spatial Data Input:** Direct spatial data capture, Indirect spatial data captiure, Obtaining spatial data elsewhere	02		
	Data Quality: Accuracy and Positioning, Positional accuracy, Attribute accuracy, Temporal accuracy, Lineage, Completeness, Logical consistency	02		
	Data Preparation: Data checks and repairs, Combining data from multiple sources	01		
	Point Data Transformation: Interpolating discrete data, Interpolating continuous data	01		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -04	**Spatial Data Analysis** **Classification of analytical GIS Capabilities** **Retrieval, classification and measurement:** Measurement, Spatial selection queries, Classification	03	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Online Google Meet. PPTs. Blackboard, Chalk and Duster. Website.
	Overlay functions: Vector overlay operators,Raster overlay operators	01		
	Neighbourhood functions: Proximity computations, Computation of diffusion, Flow computation, Raster based surface analysis	03		
	Analysis: Network analysis, interpolation, terrain modelling	01		
	GIS and Application models: GPS, Open GIS Standards, GIS Applications and Advances	02		
	Error Propagation in spatial data processing: How Errors propagate, Quantifying error propagation	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -05	**Data Visualization** **GIS and Maps, The Visualization Process** **Visualization Strategies: Present or explore?**	04	Principles of Geographic Information	Online Google Meet. PPTs. Blackboard, Chalk and Duster.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	The cartographic toolbox: What kind of data do I have?, How can I map my data?	03	Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Website.
	How to map?: How to map qualitative data, How to map quantitative data, How to map the terrain elevation, How to map time series	03		
	Map Cosmetics, Map Dissemination	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS: M.Sc.(IT) Part -1 SEMESTER:SEM -1 MONTH: SEP-DEC ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to :

- To learn how to use Cloud Services.
- To implement Virtualization.
- To implement Task Scheduling algorithms.
- Apply Map-Reduce concept to applications.
- To build Private Cloud.
- Broadly educate to know the impact of engineering on legal and societal issues involved.

PSIT103 Cloud Computing ● UNIT 1	**Introduction to Cloud Computing**: Introduction, Historical developments, Building Cloud Computing Environments,	3	Mastering Cloud Computing Foundations and Applications Programming Rajkumar Buyya, Christian Vecchiola, S. Thamarai Selvi Elsevier – 2013	Laptop, power point, jamboard
	Principles of Parallel and Distributed Computing: Eras of Computing, Parallel v/s distributed computing, Elements of Parallel Computing, Elements of distributed computing, Technologies for distributed computing. Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	5		
	Virtualization: Introduction, Characteristics of virtualized environments, Taxonomy of virtualization techniques, Virtualization and cloud computing, Pros	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	and cons of virtualization, Technology examples. Logical Network Perimeter, Virtual Server, Cloud Storage Device, Cloud usage monitor, Resource replication, Ready-made environment.			
PSIT103 Cloud Computing UNIT 2	**Cloud Computing Architecture:** Introduction, Fundamental concepts and models, Roles and boundaries, Cloud Characteristics, Cloud Delivery models, Cloud Deployment models, Economics of the cloud, Open challenges.	4	Mastering Cloud Computing Foundations and Applications Programming Rajkumar Buyya, Christian Vecchiola, S. Thamarai Selvi Elsevier – 2013	Laptop, power point, jamboard
	Fundamental Cloud Security: Basics, Threat agents, Cloud security threats, additional considerations	4		
	Platforms and New Developments: Amazon Web Services, Google App Engine, Microsoft Azure	4		
PSIT103 Cloud Computing UNIT 3	**Specialized Cloud Mechanisms:** Automated Scaling listener, Load Balancer, SLA monitor, Pay-per-use monitor, Audit monitor, fail over system, Hypervisor, Resource Centre, Multidevice broker, State Management Database.	5	Mastering Cloud Computing Foundati and Applications Programming Rajku Buyya, Christian Vecchiola, S. Thama Selvi Elsevier –2013	Laptop, power point, jamboard
	Cloud Management Mechanisms: Remote administration system, Resource Management System, SLA Management System, Billing Management System	3		
	Cloud Security Mechanisms: Encryption, Hashing, Digital Signature, Public Key Infrastructure (PKI), Identity and Access Management (IAM), Single 12 11 Sign-On (SSO), Cloud-Based Security Groups, Hardened Virtual	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Server Images			
PSIT103 Cloud Computing UNIT 4	**Fundamental Cloud Architectures:** Workload Distribution Architecture, Resource Pooling Architecture, Dynamic Scalability Architecture, Elastic Resource Capacity Architecture, Service Load Balancing Architecture, Cloud Bursting Architecture, Elastic Disk Provisioning Architecture, Redundant Storage Architecture	6	Mastering Cloud Computing Foundati and Applications Programming Rajku Buyya, Christian Vecchiola, S. Thama Selvi Elsevier –2013	Laptop, power point, jamboard
	Advanced Cloud Architectures: Hypervisor Clustering Architecture, Load Balanced Virtual Server Instances Architecture, Non-Disruptive Service Relocation Architecture, Zero Downtime Architecture, Cloud Balancing Architecture, Resource Reservation Architecture, Dynamic Failure Detection and Recovery Architecture, Bare-Metal Provisioning Architecture, Rapid Provisioning Architecture, Storage Workload Management Architecture	6		
PSIT103 Cloud Computing UNIT 5	**Cloud Delivery Model Considerations:** Cloud Delivery Models: The Cloud Provider Perspective, Cloud Delivery Models: The Cloud Consumer Perspective	5	Mastering Cloud Computing Foundati and Applications Programming Rajku Buyya, Christian Vecchiola, S. Thama Selvi Elsevier –2013	Laptop, power point, jamboard
	Cost Metrics and Pricing Models: Business Cost Metrics, Cloud Usage Cost Metrics, Cost Management Considerations,.	4		
	Service Quality Metrics and SLAs: Service Quality Metrics, SLA Guidelines	3

LEARNING OBJECTIVE/S:

The learners will be able to :

- Understanding Human learning aspects.
- Understanding primitives in learning process by computer.
- Understanding nature of problems solved with Machine Learning
- Understand the key issues in Machine Learning and its associated applications inintelligent business and scientific computing.
- Acquire the knowledge about classification and regression techniques where a learnerwill be able to explore his skill to generate data base knowledge using the prescribed techniques.
- Understand and implement the techniques for extracting the knowledge using machinelearning methods.
- Achieve adequate perspectives of big data analytics in various applications likerecommender systems, social media applications etc.
- Understand the statistical approach related to machine learning. He will also Apply the algorithms to a real-world problem, optimize the models learned and report on the expected accuracy that can be achieved by applying the models.

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**MSC(IT)**_____ SEMESTER: ____**II**_____ MONTH: _____ **FEBRUARY-APRIL** _____ ACADEMIC YEAR: _____**2021-2022**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

- **Review the fundamental concepts of a digital image processing system.**
- **Analyze images in the frequency domain using various transforms.**
- **Evaluate the techniques for image enhancement and image restoration.**
- **Categorize various compression techniques.**
- **Interpret Image compression standards.**
- **Interpret image segmentation and representation techniques.**
- **Understand the relevant aspects of digital image representation and their practical implications.**
- **Have the ability to design pointwise intensity transformations to meet stated specifications and understand 2-D convolution, the 2-D DFT, and have the abitilty to design systems using these concepts.**
- **Have a command of basic image restoration techniques. Understand the role of alternative color spaces, and the design requirements leading to choices of color space.**
- **Appreciate the utility of wavelet decompositions and their role in image processing systems. Have an understanding of the underlying mechanisms of image compression, and the ability to design systems using standard algorithms to meet design specifications.**

PSIT203 Microservices Architecture Unit-3	**Building Microservices with ASP.NET Core:** Introduction, Installing .NET Core, Building a Console App, Building ASP.NET Core App. **Delivering Continuously:** Introduction to Docker, Continuous integration with Wercker, Continuous Integration with Circle CI, Deploying to Dicker Hub. **Building Microservice with ASP.NET Core:** Microservice, Team Service, API First Development, Test First Controller, Creating a CI pipeline, Integration Testing, Running the team service Docker Image. **Backing Services:** Microservices Ecosystems, Building the location Service, Enhancing Team Service.			

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PSIT203 Microservices Architecture Unit-3	**Creating Data Service:** Choosing a Data Store**,** Building a Postgres Repository, Databases are Backing Services, Integration Testing Real Repositories, Exercise the Data Service. **Event Sourcing and CQRS:** Event Sourcing, CQRS pattern, Event Sourcing and CQRS, Running the samples. **Building an ASP.NET Core Web Application:** ASP.NET Core Basics, Building Cloud-Native Web Applications. **Service Discovery:** Cloud Native Factors, Netflix Eureka, Discovering and Advertising ASP.NET Core Services. DNS and Platform Supported Discovery.			
PSIT203 Microservices Architecture Unit-3	**Configuring Microservice Ecosystems:** Using Environment Variables with Docker, Using Spring Cloud Config Server, Configuring Microservices with etcd, **Securing Applications and Microservices:** Security in the Cloud, Securing ASP.NET Core Web Apps, Securing ASP.NET Core Microservices. **Building Real-Time Apps and Services:** Real-Time Applications Defined, Websockets in the Cloud, Using a Cloud Messaging Provider, Building the Proximity Monitor. **Putting It All Together:** Identifying and Fixing Anti-Patterns, Continuing the Debate over Composite Microservices, The Future.

TEACHING PLAN (UNIT 1 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: II MONTH: JANUARY ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the concept of limit, continuity and derivative of a function.
- Check the continuity of the function at the given point.
- Find the derivatives of functions of various functions
- Use derivatives in various applications like concavity, maxima/minima, increasing/decreasing functions etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CALCULUS Unit 1 Derivatives & its applications	➢ Limit, continuity and derivative of a function ➢ Asymptotes, increasing/decreasing functions, concavity. ➢ Absolute and relative maxima and minima ➢ Graphing of polynomials and Newton's method	3 3 3 3	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTURE METHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Powerpoint presentation, laptop, pentab

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYCS SEMESTER: SEM-1 MONTH: SEP-DEC ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

- Develop their soft skills and develop their personality together with their technical skills.
- Understand various issues in personal and Profession communication and learn to overcome them.
- Know about various aspects of soft skills and learn ways to develop personality
- Understand the importance and type of communication in personal and professional environment.
- Learn about Leadership, team building, decision making and stress management

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
7 SOFT SKILLS DEVELOPMENT UNIT 1	**Introduction to Soft Skills** **Soft Skills: An Introduction –** Definition and Significance of Soft Skills; Process, Importance and Measurement of Soft Skill Development.	2	**Soft Skills: an Integrated Approach to Maximise Personality** by Gajendra S. Chauhan, Sangeeta Sharma, Wiley India	GOOGLE MEET AND PPT
	Personality Development: Knowing Yourself, Positive Thinking, Johari's Window, Physical Fitness	2		
	Emotional Intelligence: Meaning and Definition, Need for Emotional Intelligence, Intelligence Quotient versus Emotional Intelligence Quotient, Components of Emotional Intelligence, Competencies of Emotional Intelligence, Skills to Develop Emotional Intelligence	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Positivity and Motivation: Developing Positive Thinking and Attitude; Driving out Negativity; Meaning and Theories of Motivation; Enhancing Motivation Levels	2		
	Etiquette and Mannerism: Introduction, Professional Etiquette, Technology Etiquette	2		
	Ethical Values: Ethics and Society, Theories of Ethics, Correlation between Values and Behavior, Nurturing Ethics, Importance of Work Ethics, Problems in the Absence of Work Ethics	3		
UNIT 2	**Basic Skills in Communication:** **Components of effective communication:** Communication process and handling them, Composing effective messages, Non – Verbal Communication: its importance and nuances: Facial Expression, Posture, Gesture, Eye contact, appearance (dress code).	3	**Soft Skills: an Integrated Approach to Maximise Personality** by Gajendra S. Chauhan, Sangeeta Sharma, Wiley India	GOOGLE MEET AND PPT
	Communication Skills: Spoken English, Phonetics, Accent, Intonation	2		
	Employment Communication: Introduction, Resume, Curriculum Vitae, Scannable Resume, Developing an Impressive Resume, Formats of Resume, Job Application or Cover Letter	3		
	Job Interviews: Introduction, Importance of Resume, Definition of Interview, Background Information, Types of Interviews, Preparatory Steps for Job Interviews, Interview Skill Tips, Changes in the Interview Process, FAQ During Interviews	3		
	Group Discussion: Introduction, Ambience/Seating Arrangement for Group Discussion, Importance of Group Discussions, Difference between Group Discussion, Panel Discussion and Debate, Traits,	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Types of Group Discussions, topic based and Case based Group Discussion, Individual Traits			
UNIT 3	**Academic and Professional Skills:** **Professional Presentation:** Nature of Oral Presentation, planning a Presentation, Preparing the Presentation, Delivering the Presentation	3	**Soft Skills: an Integrated Approach to Maximise Personality** by Gajendra S. Chauhan, Sangeeta Sharma, Wiley India	GOOGLE MEET AND PPT
	Creativity at Workplace: Introduction, Current Workplaces, Creativity, Motivation, Nurturing Hobbies at Work, The Six Thinking Hat Method.	3		
	Capacity Building: Learn, Unlearn and Relearn*:* Capacity Building, Elements of Capacity Building, Zones of Learning, Ideas for Learning, Strategies for Capacity Building	3		
	Leadership and Team Building*:* Leader and Leadership, Leadership Traits, Culture and Leadership, Leadership Styles and Trends, Team Building, Types of Teams,	3		
	Decision Making and Negotiation: Introduction to Decision Making, Steps for Decision Making, Decision Making Techniques, Negotiation Fundamentals, Negotiation Styles, Major Negotiation Concepts	3		
	Stress and Time Management*:* Stress, Sources of Stress, Ways to Cope with Stress	2

Teaching plan for FYCS sem 1 2021-22

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: Computer Science

CLASS: Fybsc(CS)

SEMESTER: 1

MONTH: September to December

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:

The learners would be able to

- Organize, manage and present data.
- Analyse statistical data using measures of central tendency and dispersion.
- Apply basics concepts of moments.
- Use various techniques to calculate Skewness and Kurtosis.
- Analyse the correlation and extent of correlation between variables.
- Use the techniques of Regression analysis.
- Analyse Statistical data using basics techniques of R

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	Reference /s	Teaching method Ict tool used
Paper:	**a) Data types and Data Presentation**: ● Data types: ➢ Attribute and variable ➢ discrete and continuous variable ➢ Different types	**5**	**(Gupta & Kapoor: Chp 2: 2.1 - 2.2 and Schaum Series: Chp 1 & 2)**	

	of Scale: Nominal, Ordinal , Interval and Ratio ➢ Univariate and Bivariate Distribution ➢ Types of Classification			

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

Descriptive statistics **<u>Unit 1</u>**	● Data presentation: frequency distribution,histogram, O give curves,			
	b) Introduction to R: ● Data input, Arithmetic operators, vector operations, Matrix operations, Data frames, Built-in Functions (e. g : seq(), round(), rep(), sort(), cut() , etc.) ● Frequency Distribution, Grouped frequency Distribution, Diagrams and Graphs, Summary Statistics for raw data and grouped frequency distribution.	**5**	(Statistics Using R by Purohit,S.G. , GoreS.D., Deshmukh S. R. (2008), Narosa Publishing House, New Delhi)	Power Point Presentation

	Measures of Central Tendency: ● Concept of Average /Central tendency ● Characteristics of good measure of central tendency ● Arithmetic mean , Median , Mode – Definition and example for ungrouped and grouped data, effect of shift of origin and change of scale, Merits and Demerits, Combined Arithmetic mean ● Partition values : Quartiles , Deciles and Percentiles – examples for ungrouped and grouped data	**5**	Gupta & Kapoor: Chp 2 and Schaum Series: Chp 3)	Power Point Presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

	b) Moments: ● Concept of Moments, ● Raw moments, Central moments, ● Relation between raw and central moments.	3	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power Point Presentation

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

	c) Measures of Skewness and Kurtosis: • Concept of Skewness and Kurtosis, • Measures based on moments, quartiles.	5	Gupta & Kapoor: Chp 3 and Schaum Series: Chp 5)	Power Point Presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

Unit 3	**Correlation:** • Concept of correlation, Types and interpretation, • **Measure of Correlation:** ➢ Scatter diagram and interpretation; ➢ Karl Pearson's coefficient of correlation (r): Definition, examples for ungrouped and grouped data, effect of shift of origin and change of scale, properties; ➢ Spearman's rank correlation coefficient: Definition, examples of with and without repetition. ➢ Concept of Multiple correlation.	8	Gupta & Kapoor: Chp 10 and Schaum Series: Chp 14 & 15	Power Point Presentation

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

	b) Regression: ● Concept of dependent (response) and independent (predictor) variables, ● Concept of regression, Types and prediction, ● Difference between correlation and regression, Relation between correlation and regression. ● Linear Regression - Definition, examples using least square method and regression coefficient, coefficient of determination, properties. ● Concept of Multiple regression and Logistic regression.	7	Gupta & Kapoor: Chp 10 and Schaum Series: Chp 14 & 15)

CLASS: _FYCS SEMESTER: 1 MONTH: Sep. To Dec. ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

Open Source has acquired a prominent place in software industry. Having knowledge of Open Source and its related technologies is an essential for Computer Science student. This course introduces Open Source methodologies and ecosystem to students.

Expected Learning Outcome:

1) Upon completion of this course, students should have a good working knowledge of Open Source ecosystem, its use, impact and importance.

2) This course shall help student to learn Open Source methodologies, case studies with real life examples

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: FYCS

SEMESTER: I MONTH: SEPTEMBER- DECEMBER ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the concepts of programming before actually starting to write programs.
- Develop logic for Problem Solving.
- Be familiar about the basic constructs of programming such as data, operations, conditions, loops, functions etc.
- Apply the problem solving skills using syntactically simple language i.e. Python (version: 3.X or higher)

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS102, Unit 1, **Introduction to Programming with Python**	**Overview of Python:** History & Versions, Features of Python, Execution of a Python Program, Flavours of Python, Innards of Python, Python Interpreter, Memory Management in Python, Garbage Collection in Python, Comparison of Python with C and Java, Installing Python, Writing and Executing First Python Program, Getting Help, IDLE	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	Data Types, Variables and Other Basic Elements: Comments, Docstrings, Data types- Numeric Data type, Compound Data Type, Boolean Data type, Dictionary, Sets, Mapping, Basic Elements of Python, Variables	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	.	02	Paul Gries, Programming:	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Input and Output Operations: Input Function, Output Statements, The print() function, The print("string") function, The print(variables list) function, , The print(object) function, The print(formatted string) function, Command Line Arguments		An Introduction to Computer Science Using Python 3	
	Control Statements: The if statement, The if … else Statement, The 'if … elif … else' Statement, Loop Statement- while loop, for loop, Infinite loop, Nested loop,	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	The else suite, break statement, continue statement, pass statement, assert statement, return statement	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
USCS102, Unit 2, **Introduction to Programming with Python**	**Operators:** Arithmetic operators, Assignment operators, Unary minus operator, Relational operators, Logical operators, Bitwise operators, Membership operators, Identity operators, Precedence of Operators, Associativity of Operators	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	Arrays: Creating Arrays, Indexing and Slicing of Arrays, Basic Array Operations, Arrays Processing, Mathematical Operations on Array, Aliasing Arrays, Slicing and Indexing in NumPy Arrays, Basic slicing, Advanced Indexing, Dimensions of Arrays, Attributes of an Array, The ndim Attribute, The shape Attribute, The size Attribute, The itemsize Attribute	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Functions: Function definition and call, Returning Results, Returning Multiple Values from a Function, Built-in Functions, Difference between a Function and a Method, Pass Value by Object Reference, Parameters and Arguments, Formal and Actual Arguments, Positional Arguments, Keyword Arguments, Default Arguments, Arbitrary Arguments, Recursive Functions, Anonymous or Lambda Functions, Using Lambda with the filter() Function, Using Lambda with the map() Function, Using Lambda with the reduce() Function	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	Modules:Introduction to Modules in Python	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
USCS102, Unit 3, **Introduction to Programming with Python**	**Strings:** Creating Strings, Functions of Strings, Working with Strings, Length of a String, Indexing and Slicing, Repeating and Concatenating Strings, Checking Membership, Comparing Strings, Removing Spaces, Finding Substrings, Counting Substrings, Immutability, Splitting and Joining Strings, Changing Case, Checking Starting and Ending of a String, Sorting Strings, Searching in the Strings, Testing Methods, Formatting Strings, Finding the Number of Characters and Words, Inserting Substrings into a String	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	List and Tuples: Lists, List Functions and Methods, List Operations, List Slices, Nested Lists, Tuples, Functions in Tuple	05	Paul Gries, Programming: An Introduction to Computer	Power Point Presentation

			Science Using Python 3	
	Dictionaries: Creating a Dictionary, Operators in Dictionary, Dictionary Methods, Using for Loop with Dictionaries, Operations on Dictionaries, Converting Lists into Dictionary, Converting Strings into Dictionary, Passing Dictionaries to Functions, Sorting the Elements of a Dictionary using Lambda, Ordered Dictionaries	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: FYCS SEMESTER: I MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S: The learners will be able to : Students will learn basic skills and increase their sustainable interest in the Linux Operating System. It will also assist you build a Linux solution for real world problems and increase the knowledge required to comprehend the Linux operating system and its practical application.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS103, LINUX Operating System, UNIT-I	**Linux operating system and Basics**: History, GNU Info and Utilities, Various Linux Distributions, The Unix/Linux architecture, Features of Unix/Linux, Starting the shell, Shell prompt, Command structure, File Systems and Directory Structure, man pages, more documentation pages	04	"Linux Command line and Shell Scripting Bible", Richard Blum, Wiley India. "Unix: Concepts and Applications", Sumitabha Das, 4th Edition, McGraw Hill.	Meet, PPT
	Basic Bash shell commands: General purpose utility Commands, basic commands, Various file types, attributes and File handling Commands, Handling Ordinary Files. More file attributes	03		Meet, PPT
	Advanced Bash shell commands: Simple Filters, Filters using regular expressions.	04		Meet, PPT
	The Linux environment variable: Setting, Locating and removing environment variables like PATH etc, Default shell environment variables, Using command aliases.	04		Meet, PPT
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**15**		Meet, PPT
	Understanding Linux file permission: Linux security, Using Linux groups, Decoding file permissions, Changing security setting, Sharing files.	04	"Linux Command line and Shell	Meet, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS103, LINUX Operating System, UNIT-II	**Linux Security:** Understanding Linux Security, uses of root, sudo command, working with passwords, Understanding ssh.	04	Scripting Bible", Richard Blum, Wiley India. "Unix: Concepts and Applications", Sumitabha Das, 4th Edition, McGraw Hill.	Meet, PPT
	Networking: TCP/IP Basics, TCP/IP Model, Resolving IP addresses, Applications, ping, telnet, ftp, DNS	04		Meet, PPT
	Working withEditors: awk, sed and Introduction to vi	03		Meet, PPT
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**15**		Meet, PPT Meet, PPT
USCS103, LINUX Operating System, UNIT-III	**Basic script building:** Using multiple commands, Creating script files, Displaying messages, Using variables, Redirecting Input and Output, Pipes performing math, Exiting the script.	05	"Linux Command line and Shell Scripting Bible", Richard Blum, Wiley India. "Unix: Concepts and Applications", Sumitabha Das, 4th Edition, McGraw Hill. "Official Ubuntu Book", Matthew Helmke& Elizabeth K. Joseph with Jose	Meet, PPT
	Using structured commands: Working with if-then, if-then-else and nested if statements, test command, Compound condition testing, while command, until command, case command.	04		Meet, PPT
	Script and Process control: Handling signals, Running scripts in background mode, Running scripts without a console, Job control, Job scheduling commands: ps, nice, renice, at, batch, cron table, Running the script at boot	06		Meet, PPT
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**15**		Meet, PPT

Combinatorics and Graph Theory **<u>Unit 1:</u> Introduction to Combinatorics :**	• Strings, Sets, and Binomial Coefficients: Strings- A First Look, Combinations, Combinatorial, The Ubiquitous Nature of Binomial Coefficients, The Binomial, Multinomial Coefficients.			
	● Induction: Introduction, The Positive Integers are Well Ordered, The Meaning of Statements, Binomial Coefficients Revisited , Solving Combinatorial Problems Recursively,	6	Applied Combinatorics, M itchel T. Keller and William T. Trotter, 2016,	Power point presentation
	• Mathematical Induction, and Inductive Definitions Pro ofs by Induction. Strong Induction	4	Applied Combinatorics, M itchel T. Keller and William T. Trotter, 2016,	Power point presentation
<u>Unit 2</u> **<u>Graph Theory</u>**	**Graph Theory:** Basic Notation and Terminology, **Multigraphs**: Loops and Multiple Edges, Eulerian and Hamiltonian Graphs,	6	Applied Combinatorics, M itchel T. Keller and William T. Trotter, 2016,	Power point presentation
	• Graph Coloring, Planar Counting, Labeled Trees, A Digression	5	Applied Combinatorics, M itchel T. Keller	Power point presentation

	into Complexity Theory. Applying Probability to Combinatorics			

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

			and William T. Trotter, 2016,	
	• Small Ramsey Numbers, Estimating Ramsey Numbers, Applying Probability to Ramsey Theory, Ramsey's Theorem The Probabilistic Method	4	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation
Unit 3 **Network Flow**	• **Network Flows:** Basic Notation and Terminology, Flows and Cuts, • Augmenting Paths, The Ford-Fulkerson Labeling Algorithm,	6	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation
	• A Concrete Example, Integer Solutions of Linear Programming Problems. • Combinatorial Applications of Network Flows: Introduction, Matching in Bipartite Graphs, Chain partitioning	6	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation

	• Pólya's Enumeration Theorem: Coloring the Vertices of a Square.	3	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: CS CLASS: SYCS

SEMESTER: III MONTH: JULY- OCTOBER ACADEMIC YEAR: 202

LEARNING OBJECTIVE/S:
The learners will be able to:

- Write, compile and execute Java programs
- Build robust applications using Java's object-oriented features
- Create robust applications using Java class libraries
- Develop platform-independent GUIs
- Read and write data using Java streams

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS302, Core Java Unit 1	The Java Language: Features of Java, Java programming format, Java Tokens, Java Statements, Java Data Types, Typecasting, Arrays .	05	1) Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014 2) E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014 3) https://docs.oracle.com/javase/tutorial/	Black Board and chalk, Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	OOPS: Introduction, Class, Object, Static Keywords, Constructors, this Key Word, Inheritance, super Key Word, Polymorphism (overloading and overriding), Abstraction, Encapsulation, Abstract Classes, Interfaces	05	1. E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
	String Manipulations: String, String Buffer, String Tokenizer	01	https://docs.oracle.com/javase/tutorial/	Black Board and chalk, PowerPoint
	Packages: Introduction to predefined packages (java.lang, java.util,java.io,Java.sql, java.swing),User Defined Packages, Access specifiers	04	1. E. Balagurusamy, Programming with Java, Tata McGraw-Hill Education India, 2014	Black Board and chalk, PowerPoint
USCS302, Core Java Unit 2	Exception Handling: Introduction, Pre-Defined Exceptions, Try-Catch-Finally, Throws, throw, User Defined Exception examples.	05	1. Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	Black Board and chalk, PowerPoint
	Multithreading: Thread Creations, Thread Life Cycle, Life Cycle Methods, Synchronization, Wait() notify() notify all() methods I/O	04	1. Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	Black Board and chalk, PowerPoint
	Streams: Introduction, Byte-oriented streams, Character-oriented streams, File, Random access File, Serialization	03	1.Herbert Schildt, Java The Complete Reference, Ninth Edition, McGraw-Hill Education, 2014	PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:SYCS SEMESTER: SEM-III MONTH: JULY-OCTOBER ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to: Master concepts of stored procedure and triggers and its use. Learn about using PL/SQL for data management and understand concepts and implementations of transaction management and crash recovery.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-4 DBMS, UNIT-1	**Stored Procedures:** Types and benefits of stored procedures, creating stored procedures, executing stored procedures, altering stored procedures, viewing stored procedures.	4	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross , Database Management Systems by Ramakrishnam, Gehrke.	PPT, GoogleMeet, Jamboard , slido, SQL command line ,Google form.
	Triggers: Concept of triggers, Implementing triggers – creating triggers, Insert, delete, and update triggers, nested triggers, viewing, deleting and modifying triggers, and enforcing data integrity through triggers.	4		
	Sequences: creating sequences, referencing, altering and dropping a sequence.	2		
	File Organization and Indexing: Cluster, Primary and secondary indexing, Index data structure: hash and Tree based indexing	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Comparison of file organization: cost model, Heap files, sorted files, clustered files. Creating, dropping and maintaining indexes.	2		
UNIT-2	**Fundamentals of PL/SQL:** Defining variables and constants, PL/SQL expressions and comparisons: Logical Operators, Boolean Expressions, CASE Expressions Handling.	3	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross	PPT, GoogleMeet, Jamboard , slido, SQL command line , Google form..
	Null Values in Comparisons and Conditional Statements, PL/SQL Datatypes: Number Types, Character Types, Boolean Type, Datetime and Interval Types.	3		
	Overview of PL/SQL Control Structures: Conditional Control: IF and CASE Statements, IF-THEN Statement, IF-THEN-ELSE Statement,	5		
	CASE Statement, Iterative Control: LOOP and EXIT Statements, WHILE-LOOP, FOR-LOOP, Sequential Control: GOTO and NULL Statements	4		
UNIT 3	**Transaction Management:** ACID Properties, Serializability, Two-phase Commit Protocol, Concurrency Control, Lock Management	3	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross, Database Management Systems by	PPT, GoogleMeet,
	Lost Update Problem, Inconsistent Read Problem , Read-Write Locks, Deadlocks Handling, Two Phase Locking protocol	4		
	DCL Statements: Defining a transaction, Making Changes Permanent with COMMIT, Undoing Changes with ROLLBACK, Undoing Partial Changes with SAVEPOINT and ROLLBACK.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Crash Recovery: ARIES algorithm. The log based recovery, recovery related structures like transaction and dirty page table	4	Ramakrishnam, Gehrke	Jamboard , slido, SQL command line ,Google form.
	Write-ahead log protocol, check points, recovery from a system crash, Redo and Undo phases.	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT:CS

CLASS:SYCS SEMESTER: SEM-3 MONTH: JUL-OCT ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
physical interfaces and electronics of Raspberry Pi and program them using practical's
Learn how to make consumer grade IoT safe and secure with proper use of protocols.

PAPER, TITLE,UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper6,Physical computing and IOT programming, UNIT 1	**SoC and Raspberry Pi System on Chip**: What is System on chip? Structure of System on Chip. **SoC products:** FPGA, GPU, APU, Compute Units.	4	Physical computing IOT programming by Himalaya publication	GOOGLE SIDES, GOOGLE MEET,PPT
	ARM 8 Architecture: SoC on ARM 8. ARM 8 Architecture Introduction	4		
	Introduction to Raspberry Pi: Introduction to Raspberry Pi, Raspberry Pi Hardware, Preparing your raspberry Pi.	4		
	Raspberry Pi Boot: Learn how this small SoC boots without BIOS. Configuring boot sequences and hardware	3		
	Programming Raspberry Pi	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 2	**Raspberry Pi and Linux**: About Raspbian, Linux Commands, Configuring Raspberry Pi with Linux Commands		Physical computing IOT programming by Himalaya publication	GOOGLE SIDES, GOOGLE MEET,PPT
	Programing interfaces: Introduction to Node.js, Python.	4		
	Raspberry Pi Interfaces: UART, GPIO, I2C, SPI	4		
	Useful Implementations: Cross Compilation, Pulse Width Modulation, SPI for Camera.	4		
Unit 3	. **Introduction to IoT**: What is IoT? IoT examples, Simple IoT LED Program.	3	Physical computing IOT programming by Himalaya publication	GOOGLE SIDES, GOOGLE MEET,PPT
	IoT and Protocols **IoT Security**: HTTP, UPnp, CoAP, MQTT, XMPP.	4		
	IoT Security and Interoperability: Risks, Modes of Attacks, Tools forSecurity and Interoperability.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MONIKA MADHUKAR RAUT DEPARTMENT: IT/CS

CLASS: SYCS SEMESTER: III MONTH: JULY TO OCTOBER ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to design and develop state of - the art web applications using client-side scripting, server-side scripting, and database connectivity

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307) Unit I	**HTML5:** Fundamental Elements of HTML, Formatting Text in HTML, Organizing Text in HTML, Links and URLs in HTML, Tables in HTML, Images on a Web Page, Image Formats, Image Maps, Colours, FORMs in HTML, Interactive Elements, Working with Multimedia - Audio and Video File Formats, HTML elements for inserting Audio / Video on a web page	8	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and jQuery, 2ed, Dreamtech Press	PPT, Notepad, Paint, browser
	CSS: Understanding the Syntax of CSS, CSS Selectors, Inserting CSS in an HTML Document, CSS properties to work with background of a Page, CSS properties to work with Fonts and Text Styles, CSS properties for positioning an element	7		
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307)	**JavaScript:** Using JavaScript in an HTML Document, Programming Fundamentals of JavaScript – Variables, Operators, Control Flow Statements, Popup Boxes, Functions – Defining and Invoking a Function, Defining Function arguments, Defining a Return Statement, Calling Functions with Timer	6	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and	PPT, Jam board, Notepad, browser

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II	**JavaScript Objects** - String, RegExp, Math, Date, Browser Objects - Window, Navigator, History, Location, Document, Cookies, Document Object Model, Form Validation using JavaScript	2	jQuery, 2ed, Dreamtech Press	PPT, Notepad, browser
	XML: Comparing XML with HTML, Advantages and Disadvantages of XML, Structure of an XML Document, XML Entity References, DTD, XSLT: XSLT Elements and Attributes - xsl:template, xsl:apply-templates, xsl:import, xsl:call-template, xsl:include, xsl:element, xsl:attribute, xsl:attribute-set, xsl:value-of	7		PPT, Notepad, browser
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307) Unit III	**AJAX**: AJAX Web Application Model, How AJAX Works, XMLHttpRequest Object – Properties and Methods, Handling asynchronous requests using AJAX	4	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and jQuery, 2ed, Dreamtech Press, PHP: A Beginners Guide, Vikram Vaswani, TMH	PPT, Notepad, browser
	PHP: Variables and Operators, Program Flow, Arrays, Working with Files and Directories, Working with Databases, Working with Cookies, Sessions and Headers	7		PPT, Jam board, Notepad, Wamp server
	Introduction to jQuery: Fundamentals, Selectors, methods to access HTML attributes, methods for traversing, manipulators, events, effects	4		PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Mrs. Jagruti S. Raut** DEPARTMENT: **CS** CLASS: **T.Y.B.Sc.(CS)**

SEMESTER: **V** MONTH: **July - October** ACADEMIC YEAR: **2021-2022**

LEARNING OBJECTIVE/S:
The learners will be able:

- To get a clear understanding of AI and different search algorithms used for solving problems.
- To get acquainted with different learning algorithms and models used in machine learning.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS501 **Paper I** **Artificial Intelligence** **UNIT I**	**What Is AI:** Foundations, History and State of the Art of AI.	4	Artificial Intelligence: A Modern Approach, Stuart Russell and Peter Norvig,3rd Edition.	Google Meet and Microsoft PowerPoint Presentation
	Intelligent Agents: Agents and Environments, Nature of Environments, Structure of Agents.	3		
	Problem Solving by searching: Problem-Solving Agents, Example Problems, Searching for Solutions, Uninformed Search Strategies.	4		
	Informed (Heuristic) Search Strategies, Heuristic Functions.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **TYBSCCS** SEMESTER:**V**

MONTH: **July-OCT** ACADEMIC YEAR: **2021-22**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand computer Graphics programming using Directx or Opengl. Along with the VR and AR they should also aware of GPU, newer technologies and programming using most important API for windows.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS507 **Game Programming** Unit-1	**Cartesian Coordinate system:** The Cartesian XY-plane, Function Graphs, Geometric Shapes, Polygonal Shapes, Areas of Shapes, Theorem of Pythagoras in 2D, Coordinates, Theorem of Pythagoras in 3D, 3D Polygons, Euler's Rule	04	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Laptop,power point
	Vectors: Vector Manipulation, multiplying a Vector by a Scalar, Vector Addition and Subtraction, Position Vectors, Unit Vectors, Cartesian Vectors, Vector Multiplication, Scalar Product, Example of the Dot Product, The Dot Product in Lighting Calculations, The Dot Product in Back-Face Detection, The Vector Product, The Right-Hand Rule, deriving a Unit	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Laptop,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Normal Vector for a Triangle Areas, Calculating 2D Areas			
	Transformations: 2D Transformations, Matrices, Homogeneous Coordinates, 3D Transformations, Change of Axes, Direction Cosines, rotating a Point about an Arbitrary Axis, Transforming Vectors, Determinants, Perspective Projection, Interpolation	06	Computer Graphics, C Version, Donald Hern and Pauline Baker, Pearson Education, 2nd Edition, 1997	Laptop,power point jamboard
	DirectX: Understanding GPU and GPU architectures. How they are different from CPU Architectures? Understanding how to solve by GPU?	02	Introduction To 3D Game Programming With Directx® 11	Laptop,power point
USCS507 **Game Programming** Unit-2	**Introduction To DirectX 11:** COM, Textures and Resources Formats, The swap chain and Page flipping, Depth Buffering, Texture Resource Views, Multisampling Theory and MS in Direct3D, Feature Levels	03	Introduction To 3D Game Programming With Directx® 11	Laptop,power point
	Direct3D 11 Rendering Pipeline: Overview, Input Assembler Stage (IA), Vertex Shader Stage (VS), The Tessellation Stage (TS), Geometry Shader Stage (GS), Pixel Shader Stage (PS), Output merger Stage (OM) Understanding Meshes or Objects, Texturing, Lighting, Blending.	03	Introduction To 3D Game Programming With Directx® 11	Laptop,power point
	Trigonometry: The Trigonometric Ratios, Inverse Trigonometric Ratios, Trigonometric	03	Introduction To 3D Game Programming With Directx® 11	Laptop,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Relationships, The Sine Rule, The Cosine Rule, Compound Angles, Perimeter Relationships			
	Interpolation: Linear Interpolant, Non-Linear Interpolation, Trigonometric Interpolation, Cubic Interpolation, Interpolating Vectors, Interpolating Quaternions	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Laptop,power point
	Curves: Circle, Bezier, B-Splines **Analytic Geometry:** Review of Geometry, 2D Analytic Geometry, Intersection Points, Point in Triangle, and Intersection of circle with straight line.	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk,power point
USCS507 **Game Programming** Unit-3	**Introduction to Rendering Engines:** Understanding the current market Rendering Engines. Understanding AR, VR and MR.Depth Mappers, Mobile Phones, Smart Glasses, HMD's **Unity Engine: Multi-platform publishing, VR + AR:** Introduction and working in Unity, 2D, Graphics, Physics, Scripting, Animation, Timeline, Multiplayer and Networking, UI, Navigation and Pathfinding, XR, Publishing.	10	https://docs.unity3d.com/Manual/index.html	Laptop,power point
	Scripting: Scripting Overview, Scripting Tools and Event Overview **XR:** VR, AR, MR, Conceptual Differences. SDK, Devices	05	https://docs.unity3d.com/Manual/index.html	Laptop,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande

DEPARTMENT: Computer Science

CLASS: T.Y.C.S.

SEMESTER: V

MONTH: June - October

ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

Understand various software testing methods and strategies. Understand a variety of software metrics, and identify defects and managing those defects for improvement in quality for given software. Design SQA activities, SQA strategy, formal technical review report for software quality control and assurance.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS501 Software Testing and Quality Assurance UNIT : 01	**Software Testing and Introduction to quality :** Introduction, Nature of errors, an example for Testing, Definition of Quality , QA, QC, QM and SQA , Software Development Life Cycle, Software Quality Factors	05	Software Engineering for Students, A Programming Approach, Douglas Bell, 4th Edition,, Pearson Education, 2005	PPT
	Verification and Validation : Definition of V &V , Different types of V & V Mechanisms, Concepts of Software Reviews, Inspection and Walkthrough	05		PPT

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	Software Testing Techniques : Testing Fundamentals, Test Case Design, White Box Testing and its types, Black Box Testing and its types	05		PPT
USCS501 Software Testing and Quality Assurance UNIT : 02	**Software Testing Strategies :** Strategic Approach to Software Testing, Unit Testing, Integration Testing, Validation Testing, System Testing	05	Software Engineering – A Practitioners Approach, Roger S. Pressman, 5th Edition, Tata McGraw Hill, 2001	PPT
	Software Metrics : Concept and Developing Metrics, Different types of Metrics, Complexity metrics	05		PPT
	Defect Management: Definition of Defects, Defect Management Process, Defect Reporting, Metrics Related to Defects, Using Defects for Process Improvement.	05		PPT
USCS501 Software Testing and Quality Assurance UNIT : 03	**Software Quality Assurance :** Quality Concepts, Quality Movement, Background Issues, SQA activities, Software Reviews, Formal Technical Reviews, Formal approaches to SQA, Statistical Quality Assurance, Software Reliability, The ISO 9000 Quality Standards, , SQA Plan , Six sigma, Informal Reviews	07	Quality Management, Donna C. S. Summers, 5th Edition, Prentice-Hall, 2010. Total Quality Management, Dale H. Besterfield, 3rd Edition, Prentice Hall, 2003.	PPT
	Quality Improvement : Introduction, Pareto Diagrams, Cause-effect Diagrams, Scatter Diagrams, Run charts	03		PPT
	Quality Costs : Defining Quality Costs, Types of Quality Costs, Quality Cost Measurement, Utilizing Quality Costs for Decision-Making **Textbook**(s	05		PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: Information Technology CLASS: TYCS

SEMESTER: V MONTH: July-Oct ACADEMIC YEAR:2021-2022

LEARNING OBJECTIVE/S:

•To understand the details of web services technologies like SOAP, WSDL, and UDDI. To learn how to implement and deploy web service client and server.

•To understand the design principles and application of SOAP and REST based web services (JAX-Ws and JAX-RS).

•To understand WCF service. To design secure web services and QoS of Web Services

The learners will be able to:

•Emphasis on SOAP based web services and associated standards such as WSDL. Design SOAP based / RESTful / WCF services Deal with Security and QoS issues of Web Services

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Web Services Elective-II USCS506 Unit 1	**Web services basics:** What Are Web Services? Types of Web Services Distributed computing infrastructure, overview of XML, SOAP, Building Web Services with JAX-WS, Registering and Discovering Web Services, Service Oriented Architecture, Web Services Development Life Cycle, Developing and consuming simple Web Services across platform	15	Web Services: Principles and Technology,Michael P. Papazoglou, Pearson Education Limited, 2008	Laptop

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Web Services Elective-II USCS506 Unit 2	**The REST Architectural style:** Introducing HTTP, The core architectural elements of a RESTful system, Description and discovery of RESTful web services, Java tools and frameworks for building RESTful web services, JSON message format and tools and frameworks around JSON, Build RESTful web services with JAX-RS APIs, The Description and Discovery of RESTful Web Services, Design guidelines for building RESTful web services, Secure RESTful web services.	15	RESTful Java Web Services, Jobinesh Purushothaman, PACKT Publishing,2 nd Edition, 2015	Laptop
Web Services Elective-II USCS506 Unit 3	**Developing Service-Oriented Applications with WCF :** What Is Windows Communication Foundation, Fundamental Windows Communication Foundation Concepts, Windows Communication Foundation Architecture, WCF and .NET Framework Client Profile, Basic WCF Programming, WCF Feature Details. Web Service QoS	15	Developing Service-Oriented Applications with WCF, Microsoft, 2017 https://docs.microsoft.com/en-us/dotnet/framework/wcf/index	Laptop

TEACHING PLAN (UNIT 1 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: II MONTH: JANUARY ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the concept of limit, continuity and derivative of a function.
- Check the continuity of the function at the given point.
- Find the derivatives of functions of various functions
- Use derivatives in various applications like concavity, maxima/minima, increasing/decreasing functions etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CALCULUS Unit 1 Derivatives & its applications	➢ Limit, continuity and derivative of a function ➢ Asymptotes, increasing/decreasing functions, concavity. ➢ Absolute and relative maxima and minima ➢ Graphing of polynomials and Newton's method	3 3 3 3	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTURE METHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Powerpoint presentation, laptop, pentab

TEACHING PLAN (UNIT 3 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: II MONTH: FEBRUARY ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the concept of limits, continuity and derivatives of functions of two or more variables.
- Find the first and second order partial derivatives of functions of two variables.
- Find the linearization of the given function at the given point.
- Understand the concept of gradients and directional derivatives.
- Find the derivative of a function of two variable using chain rule.
- Find the relative extrema and saddle point of the given function of two variables using partial derivatives.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CALCULUS Unit 3 Partial Derivatives & its applications	➢ Limit, continuity and partial derivatives of functions of two or more variables ➢ Linearization and chain rule ➢ Directional derivatives and gradients ➢ Tangent planes and normal lines ➢ Maxima and minima of functions of two variables	2 2 2 2 2	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MONIKA MADHUKAR RAUT DEPARTMENT: IT/CS

CLASS: FYCS SEMESTER: II MONTH: FEBRUARY TO APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

- Students should be able to understand and evaluate efficiency of the programs that they write based on performance of the algorithms used.
- Students should be able to appreciate the use of various data structures as per need.
- To select, decide and apply appropriate design principle by understanding the requirements of any real-life problems

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Design & Analysis of Algorithms (USCS201) Unit I	**Introduction to algorithms** - What is algorithm, analysis of algorithm, Types of complexity, Running time analysis, How to Compare Algorithms, Rate of Growth, Types of Analysis, Asymptotic Notation, Big-O Notation, Omega-Ω Notation, Theta-Θ Notation, Asymptotic Analysis, Performance characteristics of algorithms, Estimating running time / number of steps of executions on paper, Idea of Computability	08	Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Google Jam board, Slides, Docs
	Introduction to Data Structures - What is data structure, types, Introduction to Array(1-d & 2-d), Stack and List data structures, operations on these data structures, advantages disadvantages and applications of these data structures like solving linear equations, Polynomial Representation, Infix-to-Postfix conversion	07		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Design & Analysis of Algorithms (USCS201) Unit II	**Recursion** - What is recursion, Recursion vs Iteration, recursion applications like Factorial of a number, Fibonacci series & their comparative analysis with respect to iterative version, Tower of Hanoi problem	04	"Data Structures and Algorithms Made Easy", NarasimhaKarumanchi, CareerMonk Publications, 2016	Chalk and black board
	Basic Sorting Techniques - Bubble, Selection and Insertion Sort & their comparative analysis Searching Techniques - Linear Search and its types, Binary Search and their comparative analysis	04		
	Selection Techniques - Selection by Sorting, Partition-based Selection Algorithm, Finding the Kth Smallest Elements in Sorted Order & their comparative analysis	04		
	String Algorithms - Pattern matching in strings, Brute Force Method & their comparative analysis	03		
Design & Analysis of Algorithms (USCS201) Unit III	**Algorithm Design Techniques** - Introduction to various types of classifications/design criteria and design techniques	03	"Data Structures and Algorithms Made Easy", NarasimhaKarumanchi, CareerMonk Publications, 2016	Chalk and black board
	Greedy Technique - Concept, Advantages & Disadvantages, Applications, Implementation using problems like - file merging problem	04		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Divide-n-Conquer - Concept, Advantages & Disadvantages, Applications, Implementation using problems like - merge sort, Strassen's Matrix Multiplication	04		
	Dynamic Programming - Concept, Advantages & Disadvantages, Applications, Implementation using problems like - Fibonacci series, Factorial of a number, Longest Common subsequence Backtracking Programming - Concept, Advantages & Disadvantages, Applications, Implementation using problems like N-Queen Problem	04

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: FYCS SEMESTER: I MONTH: FEB-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

- To make students aware fundamentals of database system.
- To give idea how ERD components helpful in database design and implementation.
- To experience the students working with database using MySQL.
- To familiarize the student with normalization, database protection and different DCL Statements.
- To make students aware about importance of protecting data from unauthorized users.
- To make students aware of granting and revoking rights of data manipulation.

.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS204, Database Systems, UNIT-I	**Introduction to DBMS** – Database, DBMS – Definition, Overview of DBMS, Advantages of DBMS, Levels of abstraction, Data independence, DBMS Architecture	03	Ramez Elmasri & ShamkantB.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010. 2. Joel Murach, Murach's MySQL, Murach, 2012.	Online Mode, Google Meet with Google Slides.
	Data models - Client/Server Architecture, Object Based Logical Model, Record Based Logical Model (relational, hierarchical, network)	02		Online Mode, Google Meet with Google Slides.
	Entity Relationship Model - Entities, attributes, entity sets, relations, relationship sets, Additional constraints (key constraints, participation constraints, weak entities, aggregation / generalization, Conceptual Design using ER (entities VS attributes, Entity Vs relationship, binary Vs ternary,	03		Online Mode, Google Meet with Google Slides.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	constraints beyond ER)			
	ER to Table- Entity to Table, Relationship to tables with and without key constraints.	01		Online Mode, Google Meet with Google Slides.
	DDL Statements - Creating Databases, Using Databases, datatypes, Creating Tables (with integrity constraints – primary key, default, check, not null), Altering Tables, Renaming Tables, Dropping Tables, Truncating Tables	03		Online Mode, Google Meet with Google Slides.
	DML Statements – Viewing the structure of a table insert, update, delete, Select all columns, specific columns, unique records, conditional select, in clause, between clause, limit, aggregate functions (count, min, max, avg, sum), group by clause, having clause	03		Online Mode, Google Meet with Google Slides.
USCS204, Database Systems, UNIT-II	**Relational data model–** Domains, attributes, Tuples and Relations, Relational Model Notation, Characteristics of Relations, Relational Constraints - primary key, referential integrity, unique constraint, Null constraint, Check constraint	03	1.Ramez Elmasri & ShamkantB.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010. 2. Joel Murach, Murach's MySQL, Murach, 2012	Online Mode, Google Meet with Google Slides.
	Relational Algebra operations (selection, projection, set operations union, intersection, difference, cross product, Joins –conditional, equi join and natural joins, division)	03		Online Mode, Google Meet with Google Slides.
	Functions – String Functions (concat, instr, left, right, mid, length, lcase/lower, ucase/upper, replace, strcmp, trim, ltrim, rtrim), Math Functions (abs, ceil, floor, mod, pow, sqrt, round, truncate) Date Functions (adddate, datediff, day, month, year, hour, min, sec, now, reverse)	03		Online Mode, Google Meet with Google Slides.
	Joining Tables – inner join, outer join (left outer, right outer, full outer)	03		Online Mode, Google Meet with Google Slides.
	Subqueries – subqueries with IN, EXISTS, subqueries restrictions, Nested subqueries, ANY/ALL clause, correlated subqueries	03		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS204, Database Systems, UNIT-III	**Schema refinement and Normal forms:** Functional dependencies, first, second, third, and BCNF normal forms based on primary keys, lossless join decomposition.	03	Joel Murach, Murach's MySQL, Murach, 2012	Blackboard, Chalk
	Database Protection: Security Issues, Threats to Databases, Security Mechanisms, Role of DBA, Discretionary Access Control, Backing Up and Restoring databases	03		Blackboard, Chalk
	Views (creating, altering dropping, renaming and manipulating views)	03		Blackboard, Chalk
	DCL Statements (creating/dropping users, privileges introduction, granting/revoking privileges, viewing privileges), Transaction control commands – Commit, Rollback	03		Blackboard, Chalk
	Index Structures of Files: Introduction, Primary index, Clustering Index, Multilevel indexes	03

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYCS SEMESTER: SEM-2 MONTH: FEB-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the core concepts of E-Commerce.
- Understand the various online payment techniques
- Understand the core concepts of digital marketing and the role of digital marketing in business.
- Apply digital marketing strategies to increase sales and growth of business
- Apply digital marketing through different channels and platforms
- Understand the significance of Web Analytics and Google Analytics and apply the same.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
7 E-COMMERCE & DIGITAL MARKETING UNIT 1	**Introduction to E-Commerce and E- Business:** Definition and competing in the digital economy, Impact of E-Commerce on Business Models, FactorsDriving e-commerce and e-Business Models, Economics and social impact of e-Business, opportunities and Challenges,	4	E-Commerce Strategy, Technologies and Applications, Whitley, David, Tata McGraw Hill, 2017 Digital Marketing, Seema Gupta, McGraw Hill Education, 2nd Edition	BLACK BOARD AND CHALK
	e-Commerce vs mCommerce, Different e-Commerce Models (B2B, B2C, C2B, C2C, B2E), e-Commerce Applications: e-Trading, e-Learning, e-Shopping, Virtual Reality & Consumer Experience, Legal and Ethical issues in e-Commerce	3		
	Overview of Electronic Payment systems: Types of Electronic payment schemes (Credit cards, Debit cards, Smartcards, Internet banking), Echecks, E-Cash Concepts and applications of EDI and	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Limitation			
	Introduction & origin of Digital Marketing: Traditional v/s Digital Marketing. Digital Marketing Strategy, The P-O-E-M Framework, Segmenting & Customizing Messages, The Digital landscape, Digital Advertising Market in India. Skills required in Digital Marketing. Digital Marketing Plan.	4		
UNIT 2	**Social Media Marketing**: Meaning, Purpose, types of social media websites, Social Media Engagement, Target audience, Facebook Marketing: Business through Facebook Marketing, Creating Advertising Campaigns, Adverts, Facebook Marketing Tools, LinkedIn Marketing: Importance of LinkedIn Marketing, Framing LinkedIn Strategy, Lead Generation through LinkedIn, Content Strategy, Analytics and Targeting, Twitter Marketing: Framing content strategy, Twitter Advertising Campaigns, YouTube Marketing: Video optimization, Promoting on YouTube, Monetization, YouTube Analytics	4	E-Commerce Strategy, Technologies and Applications, Whitley, David, Tata McGraw Hill, 2017 Digital Marketing, Seema Gupta, McGraw Hill Education, 2nd Edition	BLACK BOARD AND CHALK
	Email Marketing: Types of Emails, Mailing List, Email Marketing tools, Email Deliverability & Email Marketing automation	3		
	Mobile Marketing: Introduction, Mobile Usage, Mobile Advertising, Mobile Marketing Types, Mobile Marketing Features, Mobile Campaign Development, Mobile Advertising Analytics	4		
	Content Marketing: Introduction, Content marketing statistics, Types of Content, Types of Blog posts, Content Creation, Content optimization, Content Management & Distribution, Content Marketing Strategy, Content creation tools and apps, Challenges of Content Marketing.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	Search Engine Optimization: Meaning, Common SEO techniques, Understanding Search Engines, basics of Keyword search, Google rankings, Link Building, Steps to optimize website, On-page and off-page optimization	4	. E-Commerce Strategy, Technologies and Applications, Whitley, David, Tata McGraw Hill, 2017 Digital Marketing, Seema Gupta, McGraw Hill Education, 2nd Edition	BLACK BOARD AND CHALK
	Search Engine Marketing: Introduction to SEM, Introduction to Ad Words - Google Ad Words, Ad Words fundamentals, Ad Placement, Ad Ranks, Creating Ad Campaigns, Campaign Report Generation, Display marketing, Buying Models: Cost per Click (CPC), Cost per Milli (CPM), Cost per Lead (CPL), Cost per Acquisition (CPA).	4		
	Web Analytics: Purpose, History, Goals & objectives, Web Analytic tools & Methods. Web Analytics Mistakes and Pitfalls.	3		
	Google Analytics: Basics of Google Analytics, Installing Google Analytics in website, Parameters of Google Analytics, Reporting and Analysis	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: CS

CLASS:FYCS SEMESTER: SEM-II MONTH: FEB-APR ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
The course aims to introduce a new programming paradigm called Object Oriented Programming. This will be covered using C++ programming language. C++ is a versatile programming language, which supports a variety of programming styles, including procedural, object-oriented, and functional programming. This makes C++ powerful as well as flexible. It can be used to develop software such as operating systems, databases, and compilers.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-3 Introduction to OOPs using C++, UNIT 1	**Introduction to Programming Concepts**: Object oriented programming paradigm, basic concepts of object oriented programming, benefits of object oriented programming, object oriented languages, applications of object oriented programming.	2	Object Oriented Programming with C++, Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.
	Tokens-keywords, identifiers, constants-integer, real, character and string constants, backslash constants, features of C++ and its basic structure, simple C++ program without class, compiling and running C++ program..	1		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Data Types, Data Input Output and Operators: Basic data types, variables, rules for naming variables, programming constants, the type cast operator, implicit and explicit type casting, cout and cin statements ,operators, precedence of operators.	2		
	Decision Making, Loops, Arrays and Strings: Conditional statements-if, if...else, switch loops- while, do...while, for, types of arrays and string and string manipulations.	5		
	Unified Modeling Language (UML): Introduction to UML & class diagrams.	2		
	Classes, Abstraction & Encapsulation: Classes and objects, Dot Operator, data members, member functions, passing data to functions, scope and visibility of variables in function.	3		
UNIT-2	**Constructors and Destructors:** Default constructor, parameterized , constructor, copy constructor, private constructor, destructors.	3	Object Oriented Programming with C++, Balagurusamy , UML & C++:	PPT , Projector, Blackboard & Chalk,
	Working with objects: Accessor - mutator methods, static data and static function, access specifiers, array of objects**.**	4		
	Polymorphism - Binding-static binding & overloading, constructor overloading function overloading, operator overloading, overloading unary and binary operators.	5		
	Modelling Relationships in Class Diagrams: Association, Aggregation- Composition and examples covering these principles.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Inheritance:** Defining base class and its derived class, access specifiers, types of inheritance-single, multiple, hierarchical, multilevel, hybrid inheritance, friend function and friend class, constructors in derived classes**.**	4	Object Oriented Programming with C++, Balagurusamy, UML & C++	PPT, Projector, Blackboard & Chalk.
	Modelling Relationships: Generalization-Specialization and examples covering these principles.	2		
	Run time Polymorphism - Dynamic Binding, Function overriding, virtual function, pure virtual function, virtual base class, abstract class.	2		
	Pointers: Introduction to pointers, * and & operators, assigning addresses to pointer variables, accessing values using pointers, pointers to objects &this pointer, pointers to derived classes	3		
	File Handling: File Stream classes, opening and closing file-file opening modes, text file handling, binary file handling.	2		
	Applying OOP to solve real life applications: To cover case studies like library management, order management etc. to design classes covering all relationships.	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: Computer Science

CLASS: Fybsc(CS)

SEMESTER: 2

MONTH: February to April

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners would be able to

- Calculate probability, conditional probability and independence.
- Apply the given discrete and continuous distributions whenever necessary.
- Define null hypothesis, alternative hypothesis, level of significance, test statistic and pvalue.
- Perform Test of Hypothesis as well as calculate confidence interval for a population parameter for single sample and two sample cases.
- Apply non-parametric test whenever necessary.
- Conduct and interpret one-way and two-way ANOVA.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	Reference /s	Teaching method Ict tool used
Paper: Statistical Methods <u>**Unit 1**</u>	**Probability:** ➢ Random experiment, sample space, events types and ➢ operations of events, Probability definition: classical, axiomatic, ➢ Elementary Theorems of probability (without proof). ➢ Conditional probability, „Bayes" theorem,	**8**	Gupta, S.C. and Kapoor, V.K. (1987): Fundamentals of Mathematical Statistics,	Power Point Presentation

	independence, Examples on Probability.		S. Chand and Sons, New Delhi

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: computer science

CLASS: S.Y.B.Sc.(CS)

SEMESTER: 4

MONTH: November to March

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:

The learners will be able to :

- Appreciate the relevance of linear algebra in the field of computer science.
- Understand the concepts through program implementation
- Instill a computational thinking while learning linear algebra.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405 **Linear Algebra using python** **<u>Unit 1</u>**	Field: • Introduction to complex number,numbers in python,Abstracting over field • playing with GF(2),	4		Black board, chalk and duster
	Vector Space:	3		Black board, chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	• Vectors are functions, • Vector addition and scalar multiplication • Combining vector addition and scalar multiplication • Geometry of sets of vectors			
	• Dictionary based representation of vectors • Dot product	2		Black board, chalk and duster
	Linear system : • Homogeneous and non homogeneous equation • Solving triangular system of linear equations	3		Black board, chalk and duster
	• Linear combination and linear span	3		Black board, chalk and duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405 **Linear Algebra using python** **<u>Unit 2</u>**	Matrix: • Matrices as vectors, transpose • Matrix -vector and vector-matrix multiplication in terms of linear combination • Matrix -vector and vector-matrix multiplication in terms of dot-product	3		Black board,chalk and duster
	• Null space, computing Sparse matrix, vector product	3		Black board,chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	● Linear function ● Inner product and outer product ● From function inverse to matrix inverse			
	Basis: ● Coordinate system,Two greedy algorithm for finding set of generators ● Minimum spanning forest and GF(2) ● Linear dependence and independence	3		Black board,chalk and duster
	Basis: ● Basis, unique representation,change of basis ● Computational problems involving finding a basis	3		Black board,chalk and duster
	Dimensions: ● Dimension and rank, ● Direct sum ● Dimension and linear function ● The annihilator	3		Black board,chalk and duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405	Gaussian elimination: ● Row echelon form, Gaussian elimination over GF(2)	4		Black board, chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Linear Algebra using python **<u>Unit 3</u>**	• Solving matrix - vector equation using Gaussian distribution • Finding basis for null space • Factoring integers			
	Inner product: • The inner product for vectors over field • Orthogonality	2		Black board, chalk and duster
	Orthogonalisation: • Projection orthogonal to multiple vectors • Projecting orthogonal to mutually orthogonal vectors • Finding an orthogonal set of generators • Orthogonal complement	4		Black board, chalk and duster
	Eigen vectors: • Modeling discrete dynamic processes • Diagonalization of the Fibonacci matrix • Finding Eigen values and Eigen vectors • Coordinate representation in terms of Eigen vectors	3		Black board, chalk and duster
	• The internet worm • Markow chains • Modeling a web surfer-page rank	2		Black board, chalk and duster

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr. Priyanka Roshan Brid DEPARTMENT: Information Technology CLASS: TYCS SEMESTER: V

MONTH: December to March ACADEMIC YEAR:2021-2022

LEARNING OBJECTIVE/S:

- To understand the ethics, legality, methodologies and techniques of hacking.

The learners will be able to:

- Learner will know to identify security vulnerabilities and weaknesses in the target applications.
- They will also know to test and exploit systems using various tools and understand the impact of hacking in real time machines.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Ethical Hacking Elective-II USCS506 Unit 1	**Information Security : Attacks and Vulnerabilities** **Introduction to information security :** Asset, Access Control, CIA, Authentication, Authorization, Risk, Threat, Vulnerability, Attack, Attack Surface, Malware, Security-Functionality-Ease of Use Triangle	4	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND Internet	Projector, Laptop, Black board& Chalk
	Types of malware : Worms, viruses, Trojans, Spyware, Rootkits	2	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND	Projector, Laptop, Black board& Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Internet	
	Types of vulnerabilities : OWASP Top 10 : cross-site scripting (XSS), cross site request forgery (CSRF/XSRF), SQL injection, input parameter manipulation, broken authentication, sensitive information disclosure, XML External Entities, Broken access control, Security Misconfiguration, Using components with known vulnerabilities, Insufficient Logging and monitoring, OWASP Mobile Top 10, CVE Database	4	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND Internet	Projector, Laptop, Black board& Chalk
	Types of attacks and their common prevention mechanisms : Keystroke Logging, Denial of Service (DoS /DDoS), Waterhole attack, brute force, phishing and fake WAP, Eavesdropping, Man-in-the-middle, Session Hijacking, Clickjacking, Cookie Theft, URL Obfuscation, buffer overflow, DNS poisoning, ARP poisoning, Identity Theft, IoT Attacks, BOTs and BOTNETs	4	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND Internet	Projector, Laptop, Black board& Chalk
	Case-studies : Recent attacks – Yahoo, Adult Friend Finder, eBay, Equifax, WannaCry, Target Stores, Uber, JP Morgan Chase, Bad Rabbit	1	Internet	Projector, Laptop, Black board& Chalk
Ethical Hacking Elective-II USCS506 Unit 2	**Ethical Hacking – I (Introduction and pre-attack) Introduction:** Black Hat vs. Gray Hat vs. White Hat (Ethical) hacking, Why is Ethical hacking needed?, How is Ethical hacking different from security auditing and digital forensics?, Signing NDA, Compliance and Regulatory 15L concerns, Black box vs. White box vs. Black box, Vulnerability assessment and Penetration Testing.	5	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND Internet	Projector, Laptop, Black board& Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Approach : Planning - Threat Modeling, set up security verification standards, Set up security testing plan – When, which systems/apps, understanding functionality, black/gray/white, authenticated vs. unauthenticated, internal vs. external PT, Information gathering, Perform Manual and automated (Tools: WebInspect/Qualys, Nessus, Proxies, Metasploit) VA and PT, How WebInspect/Qualys tools work: Crawling/Spidering, requests forging, pattern matching to known vulnerability database and Analyzing results, Preparing report, Fixing security gaps following the report	5	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
	Enterprise strategy : Repeated PT, approval by security testing team, Continuous Application Security Testing,	3	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
	Phases: Reconnaissance/foot-printing/Enumeration, Scanning, Sniffing	2	CEH official Certified Ethical Hacking Review Guide, Wiley India Edition, 2007 AND INTERNET	Projector, Laptop, Black board& Chalk
Ethical Hacking Elective-II	**Ethical Hacking :**Enterprise Security Phases : Gaining and Maintaining Access : Systems hacking – Windows and Linux – Metasploit and Kali Linux, Keylogging, Buffer Overflows, Privilege Escalation, Network hacking - ARP Poisoning, Password Cracking, WEP Vulnerabilities, MAC Spoofing, MAC Flooding, IPSpoofing, SYN Flooding, Smurf attack,	5	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk
	Applications hacking : SMTP/Email-based attacks, VOIP vulnerabilities, Directory traversal, Input Manipulation, Brute force	5	Certified Ethical Hacker Study Guide v9, Sean-Philip	Projector, Laptop, Black board& Chalk

USCS506 Unit 3	attack, Unsecured login mechanisms, SQL injection, XSS, Mobile apps security,		Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	
	Malware analysis : Netcat Trojan, wrapping definition, reverse engineering	1	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk
	Phases : Covering your tracks : Steganography, Event Logs alteration	1	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk
	Additional Security Mechanisms : IDS/IPS, Honeypots and evasion techniques, Secure Code Reviews (Fortify tool, OWASP Secure Coding Guidelines)	3	Certified Ethical Hacker Study Guide v9, Sean-Philip Oriyano, Sybex; Study Guide Edition,2016 AND INTERNET	Projector, Laptop, Black board& Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GAYATREE KARNIK DEPARTMENT:IT SUBJECT:IR CLASS: TYCS SEM:VI

MONTH: November to March ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

The learners will be able to :

1. To provide a understanding of operating system, its structures and functioning
2. Develop and master understanding of algorithms used by operating systems for various purposes.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
604 UNIT I	**Introduction to Information Retrieval:** Introduction, History of IR, Components of IR, and Issues related to IR, Boolean retrieval, Dictionaries and tolerant retrieval.	15	1) Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008 2) Modern Information Retrieval: The Concepts and Technology behind Search, Ricardo Baeza - Yates and Berthier Ribeiro – Neto, 2 nd Edition, ACM Press Books 2011.	Computer, Power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

604 UNIT II	**Link Analysis and Specialized Search:** Link Analysis, hubs and authorities, Page Rank and HITS algorithms, Similarity, Hadoop & Map Reduce, Evaluation, Personalized search, Collaborative filtering and content-based recommendation of documents and products, handling "invisible" Web, Snippet generation, Summarization, Question and Answering, Cross-Lingual Retrieval	15	1) Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008 2) Modern Information Retrieval: The Concepts and Technology behind Search, Ricardo Baeza - Yates and Berthier Ribeiro – Neto, 2 nd Edition, ACM Press Books 2011.	Computer, Power point, Chalk and Black board
604 UNIT III	**Web Search Engine:** Web search overview, web structure, the user, paid placement, search engine optimization/spam, Web size measurement, search engine optimization/spam, Web Search Architectures. **XML retrieval:** Basic XML concepts, Challenges in XML retrieval, A vector space model for XML retrieval, Evaluation of XML retrieval, Text-centric versus data-centric XML retrieval.	15	1) Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008 2) Modern Information Retrieval: The Concepts and Technology behind Search, Ricardo Baeza - Yates and Berthier Ribeiro – Neto, 2 nd Edition, ACM Press Books 2011. TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande

DEPARTMENT: Computer Science

CLASS: T.Y.C.S.

SEMESTER: VI

MONTH: Dec - March

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to:

After completion of this course, learner should be able to list various applications of wireless sensor networks, describe the concepts, protocols, design, implementation and use of wireless sensor networks. Also implement and evaluate new ideas for solving wireless sensor network design issues.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 01	**Introduction:** Introduction to Sensor Networks, unique constraints and challenges. Advantage of Sensor Networks, Applications of Sensor Networks, Mobile Adhoc NETworks (MANETs) and Wireless Sensor Networks, Enabling technologies for Wireless Sensor Networks.	07	Protocols and Architectures for Wireless Sensor Network, Holger Kerl, Andreas Willig, John Wiley and Sons, 2005	PPT
	Sensor Node Hardware and Network Architecture: Single-node architecture, Hardware components & design constraints, Operating systems and execution environments, introduction to TinyOS and nesC. Network architecture, Optimization goals and figures of merit, Design principles for WSNs, Service interfaces of WSNs, Gateway concepts.	08		PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 02	**Medium Access Control Protocols:** Fundamentals of MAC Protocols, MAC Protocols for WSNs, Sensor-MAC Case Study.	05	Wireless Sensor Networks Technology, Protocols, and Applications ,Kazem Sohraby, Daniel Minoli and TaiebZnati, John Wiley & Sons, 2007	PPT
	Routing Protocols : Data Dissemination and Gathering, Routing Challenges and Design Issues in Wireless Sensor Networks, Routing Strategies in Wireless Sensor Networks.	05		PPT
	Transport Control Protocols : Traditional Transport Control Protocols, Transport Protocol Design Issues, Examples of Existing Transport Control Protocols, Performance of Transport Control Protocols.	05		PPT
USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 03	**Introduction, Wireless Transmission and Medium Access Control:** Applications, A short history of wireless communication.	02	Mobile communications, Jochen Schiller,2nd Edition, Addison wisely , Pearson Education,2012	PPT
	Wireless Transmission: Frequency for radio transmission, Signals, Antennas, Signal propagation, Multiplexing, Modulation, Spread spectrum, Cellular systems.	05		PPT
	Telecommunication, Satellite and Broadcast Systems: GSM: Mobile services, System architecture, Radio interface, Protocols, Localization And Calling, Handover, security, New data services; DECT: System architecture, Protocol architecture; ETRA, UMTS and IMT- 2000. Satellite Systems: History, Applications, Basics: GEO, LEO, MEO; Routing, Localization, Handover.	08		PPT

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: MSc.Cs(Part I)

SEMESTER: I MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVES:

- Learners will be able to explore XML, and Mobile databases.
- Learners will be able to deal with methods used for dealing with spatial and Temporal Databases.
- Learner will have a solid grasp on business intelligence tools and XML.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS401 Unit 1, **Advanced Database Techniques**	**Enhanced Database Models** Object–Oriented Databases: Need of Object-oriented databases, Complex Data Types, Structured Types and Inheritance, Object-Identity and Reference, ODL and OQL, Implementing O-R Features, Persistent Programming Languages, Object-Oriented versus Object-Relational, Example of Object oriented and object relational database implementation, comparison of RDBMS, OODBMS, ORDBMS XML Databases: Structured Semi structure and unstructured data, XML hierarchical tree data model, Documents DTD and XML schema, XML Documents & Database, XML query and transformation, Storage of XML data, Xpath. XQuery, Join and Nesting Queries, XML database applications	07	Database Management Systems by Raghu Ramakrishnan and Johannes Gehrke, McGraw Hill, 3rd Edition, 2014	Power Point Presentation
	Spatial Databases: Types of spatial data, Geographical Information Systems (GIS), Conceptual Data Models for spatial databases, Logical data models for spatial databases: Raster and vector model. Physical data models for spatial databases: Clustering methods (space filling curves), Storage methods (R-tree). Query processing. Temporal Databases: Time ontology,	08	Database Management Systems by Raghu Ramakrishnan and Johannes	Power Point Presentation

	structure, and granularity, Temporal data models, Temporal relational algebra.		Gehrke, McGraw Hill, 3rd Edition, 2014	
PSCS401 Unit 3, **Advanced Database Techniques**	**Learning the NoSQL Basics** Introduction to NoSQL: Characteristics of NoSQL, NoSQL Storage types, Advantages and Drawbacks, NoSQL Products Interfacing and interacting with NoSQL: Storing Data In and Accessing Data from MongoDB, Redis, HBase and Apache Cassandra, Language Bindings for NoSQL Data Stores	07	Getting Started with NoSQL, Gaurav Vaish, Packt Publishing Ltd, 2013	Power Point Presentation
	Understanding the storage architecture: Working with Column-Oriented Databases, HBase Distributed Storage Architecture, Document Store Internals, Understanding Key/Value Stores in Memcached and Redis, Eventually Consistent Non-relational Databases Performing CRUD operations: Creating Records, Accessing Data, Updating and Deleting Data	08	Getting Started with NoSQL, Gaurav Vaish, Packt Publishing Ltd, 2013	Power Point Presentation
PSCS401 Unit 4, **Advanced Database Techniques**	**Gaining Proficiency With NoSQL** Querying NoSQL Stores: Similarities Between SQL and MongoDB Query Features, Accessing Data from Column-Oriented Databases Like HBase, Querying Redis Data Stores Indexing And Ordering Data Sets: Essential Concepts Behind a Database Index, Indexing and Ordering in MongoDB, ouchDB and Apache Cassandra	07	Getting Started with NoSQL, Gaurav Vaish, Packt Publishing Ltd, 2013	Power Point Presentation
	Managing Transactions And Data Integrity: RDBMS and ACID, Distributed ACID Systems, Upholding CAP, Consistency Implementations Using NoSQL in The Cloud: Google App Engine Data Store, Amazon SimpleDB	08	Getting Started with NoSQL, Gaurav Vaish, Packt Publishing Ltd, 2013	Power Point Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **Mrs. Jagruti S. Raut** DEPARTMENT: **CS** CLASS: **M.Sc. (CS)**

SEMESTER: **III** MONTH: **September - December** ACADEMIC YEAR: **2021-2022**

LEARNING OBJECTIVE/S:
The learners will be able:

- Understand the key issues in big data management and its associated applications in intelligent business and scientific computing.
- Achieve adequate perspectives of big data analytics in various applications like recommender systems, social media applications.
- Explain data mining, neural networks, text analytics, text mining, sentiment analysis, web mining, web analytics, social analytics, social network analysis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS3033 **Paper IV** **Business Intelligence and Big Data Analytics –II (Mining Massive Data sets)** **UNIT III**	**Unit III: SHINGLING OF DOCUMENTS** Finding Similar Items, Applications of Near-Neighbor Search, Jaccard similarity of sets, Similarity of documents, Collaborative filtering as a similar-sets problem, Documents, k-Shingles, Choosing the Shingle Size, Hashing Shingles, Shingles built from Words. Similarity-Preserving Summaries of Sets, Locality-Sensitive hashing for documents. The Theory of Locality-Sensitive functions. Methods for high degrees of similarity.	15	Mining of Massive Datasets, Anand Rajaraman and Jeffrey David Ullman, Cambridge University Press, 2012.	Google Meet Microsoft PowerPoint Presentation

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand the concept of Image Processing, its elements and application.

To make understand the concept of image enhancement techniques, filtering, colour processing, compression techniques, segmentation, morphology, representation and description of image and image recognition.

To make understand what is image, how it is created and how it is used in varieties of processing.

To study subjective improvisation of image in applications to reduce the noise.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. **Social Network Analysis** DEPARTMENT: Computer Science.

CLASS: M.Sc. CS SEMESTER: III MONTH: September To December ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

- To understand social network and analyze the communication and predict the relationship between those actors.
- To understand Graph theory and network centrality and page rank for accessing webpages.
- To understand network structures.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS302 Social Network Analysis Unit-1	**Introduction to social network analysis (SNA)** Introduction to networks and relations- analyzing relationships to understand people and groups, binary and valued relationships, symmetric and asymmetric relationships, multimode relationships, Using graph theory for social networks analysis- adjacency matrices, edge-lists, adjacency lists, graph traversals and distances, depth-first traversal, breadth-first traversal paths and walks, Dijkstra's algorithm, graph distance and graph diameter, social networks vs. link analysis, ego-centric and socio-centric density.	12	1. Social Network Analysis for Startups- Finding connections on the social web 2. Social Network Analysis- 3rd edition	Blackboard Projector, PPT.
PSCS302 Social Network Analysis	**Networks, Centrality and centralization in SNA** Understanding networks- density, reachability, connectivity, reciprocity, group-external and group-internal ties in networks, ego networks, extracting and	12	1. Social Network Analysis for Startups- Finding connections on the social web	Blackboard Projector,

Unit-2	visualizing ego networks, structural holes, Centrality- degree of centrality, closeness and betweenness centrality, local and global centrality, centralization and graph centers, notion of importance within network, Google pagerank algorithm, Analyzing network structure- bottom-up approaches using cliques, N-cliques, N-clans, K-plexes, K-cores, F-groups and top-down.		2. Social Network Analysis- 3rd edition	PPT

CLASS: ____**MSC (CS)** ___ SEMESTER: ____**I**_____ MONTH: **SEPTEMBER-DECEMBER** ACADEMIC YEAR: **2021-2022**

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Review the fundamental concepts of a digital image processing system.**
- **Analyze images in the frequency domain using various transforms.**
- **Interpret image segmentation and representation techniques.**
- **Understand the relevant aspects of digital image representation and their practical implications.**
- **Have the ability to design pointwise intensity transformations to meet stated specifications and understand 2-D convolution, the 2-D DFT, and have the ability to design systems using these concepts.**
- **Knowledge of Perform frequency domain operations on images.**
- **Ability to apply image segmentation and extract image features.**
- **Apply image processing algorithms in practical applications.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: M.Sc.CS

SEMESTER: IV MONTH: Feb to April ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to:

- To understand basics of Cryptography and Network Security.
- To be able to secure a message over insecure channel by various means.
- To learn about how to maintain the Confidentiality, Integrity and Availability of a data.
- To understand various protocols for network security to protect against the threats in the networks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS4022 Cyber and Information Security (Cryptography and Crypt Analysis) **UNIT 1**	: Introduction to Number Theory Topics in Elementary Number Theory: O and notations, time estimates for doing arithmetic-divisibility and the Euclidean algorithm, Congruence: Definitions and properties, linear congruence, residue classes, Euler's phi function, Fermat's Little Theorem, Chinese Reminder Theorem, Applications to factoring, finite fields, quadratic residues and reciprocity: Quadratic residues, Legendre symbol, Jacobi Symbol. (proofs of the theorems are not expected to cover).	10	Discrete Mathematics and Its Applications, Kenneth H. Rosen, 7 th Edition, McGraw Hill, 2012. Cryptography Theory and Practice, 3rd Edition, Douglas R. Stinson, 2005	Powerpoint,Black Board and chalk

PSCS4022 Cyber and Information Security (Cryptography and Crypt Analysis) **UNIT 3**	RSA Cryptosystem The RSA Algorithm, Primarily Testing, Legendre and Jacobi Symbols, The SolovayStrassen Algorithm, The Miller-Rabin Algorithm, Factoring Algorithm: The pollard p-1 Algorithm, Dixon's Random Squares Algorithm, Attacks on RSA, The Rabin Cryptosystem. Public Key Cryptosystems: The idea of public key Cryptography, The Diffie-Hellman Key Agreement, ElGamal Cryptosystem, The Pollard Rho Discrete Logarithm Algorithm, Elliptic Curves, Knapsack problem.	10	Discrete Mathematics and Its Applications, Kenneth H. Rosen, 7 th Edition, McGraw Hill, 2012. Cryptography Theory and Practice, 3rd Edition, Douglas R. Stinson, 2005. Network Security and Cryptography, Atul Kahate, McGraw Hill, 2003. Cryptography and Network Security: Principles and Practices, William Stalling, Fourth Edition, Prentice Hall, 2013.	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: CS CLASS: M.Sc.CS

SEMESTER: II MONTH: Feb to April ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners will be able to:

- To Understand the difference between Web Mining and Data mining.
- To Understand the Basics and Needs of Web Mining.
- To Understand Web-based Data.
- To Understand Opinion Mining and Sentiment classification.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS203 Web Mining UNIT 2	Opinion Mining and Web Usage Mining Web Information Retrieval, Sentiment Classification, Feature based Opinion Mining and Summarization, Comparative Sentence and Relation Mining, Opinion Search and Opinion Spam. Web Usage Mining.	15	Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data by Bing Liu (Springer Publications) 2017 publication	Powerpoint,Black Board and chalk

PSCS203 Web Mining UNIT 3	Social Network & Link Analysis Link Analysis, Scrapy using python (without pipelining), Social Network Analysis, Co-Citation and Bibliographic Coupling, PageRank, HITS, Community Discovery	15	Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data by Bing Liu (Springer Publications) 2017 publication	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. **Natural Language Processing** DEPARTMENT: Computer Science.

CLASS: M.Sc. SEMESTER: II MONTH: February To April ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

- Understanding the importance and concepts of Natural Language Processing (NLP)
- Applying algorithms available for the processing of linguistic information and computational properties of natural languages.
- Knowledge on various morphological, syntactic, and semantic NLP tasks.
- Introducing various NLP software libraries and data sets publicly available.
- Designing and developing practical NLP based applications

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS202 Natural Language Processing UNIT-I	Introduction to Natural Language Processing (NLP) and Language Modelling Introduction to NLP: Introduction and applications, NLP phases, Difficulty of NLP including ambiguity; Spelling error and Noisy Channel Model; Concepts of Parts-of speech and Formal Grammar of English. Language Modelling: N-gram and Neural Language Models Language Modelling with N-gram, Simple N-gram models, smoothing (basic techniques), Evaluating language models; Neural Network basics, Training; Neural Language Model, Case study: application of neural language model in NLP system development Python Libraries for NLP: Using Python libraries/packages such as NaturalLanguage Toolkit (NLTK), spaCy, genism	15	1. —Speech and Language Processing 2. —Natural Language Processing with Python	Blackboard, Projector, PPT.

PSCS202 Natural Language Processing UNIT-II	Morphology & Parsing in NLP Computational morphology & Parts-of-speech Tagging: basic concepts; Tagset; Lemmatization, Early approaches: Rule-based and TBL; POS tagging using HMM, Introduction to POS Tagging using Neural Model. Parsing Basic concepts: top-down and bottom-up parsing, treebank; Syntactic parsing: CKY parsing; Statistical Parsing basics: Probabilistic Context-Free Grammar (PCFG); Probabilistic CKY Parsing of PCFGs.	15	1. —Speech and Language Processing 2. —Natural Language Processing with Python	Blackboard, Projector, PPT.
PSCS202 Natural Language Processing UNIT-III	Semantics and Word Embedding Semantics Vector Semantics: Words and Vector; Measuring Similarity; Semantics with dense vectors; SVD and Latent Semantic Analysis Embeddings from prediction: Skip-gram and Continuous Bag of words; Concept of Word Sense; Introduction to WordNet	15	1. —Speech and Language Processing 2. —Natural Language Processing with Python	Blackboard, Projector, PPT.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande

DEPARTMENT: Computer Science

CLASS: F.Y.D.S.

SEMESTER: I

MONTH: October-December

ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:
To discuss various components of communication, explain how non-verbal communication techniques enhance communication and explain the barriers to communication.
To discuss various business activities which are essential at workplace. To explain business communication covering the structure and layout of a letter, planning of a letter and use of language.
To explain the use of agenda and minutes for effective functioning of any organisation.
To direct the learners' attention to the significance of effective writing and the importance and structure of reports.
To explain to interpret information ethics (IE) as the branch of the philosophy of information that investigates, in a broad sense, the ethical impact of Information and Communication Technologies (ICTs) on human life and society.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USDS104 Business Communication and Information Ethics	Business communication at workplace Letter components and layout, Planning a letter, Process of letter writing.	06	Professional Communication, Aruna Koneru	PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: **SUJITHA MOHAN** DEPARTMENT: **Data Science**

CLASS: **FYDS** SEMESTER: **I** MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: **2021-2022**

LEARNING OBJECTIVES:
The learners will be able to :

- Learn Programming fundamentals using Python
- Understand the concepts and usage data types, variables and other basic elements
- Learn about using operators and control statements in Python
- Learn about using arrays and strings in Python.
- Learn about using IPython architecture for Python.
- Introduce data Science Tools and plot data using appropriate Python visualization libraries.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II, 3, Introduction to Programming	Lists and Tuples: Lists, List Functions and Methods, List Operations, Tuples	3	Let Us Python by Y. Kanetkar	Meet, PPT
	Dictionaries: Creating a Dictionary, Operators in Dictionary, Dictionary Methods, Using for Loop with Dictionaries, Operations on Dictionaries, Ordered Dictionaries	3	Let Us Python by Y. Kanetkar	Meet, PPT

	Regular Expressions: What is a Regular Expression? Sequence Characters in Regular Expressions, Quantifiers in Regular Expressions, Special Characters in Regular Expressions, Using Regular Expression on Files, Retrieving Information from an HTML File.	3	Let Us Python by Y. Kanetkar	Meet, PPT
	Date and Time in Python: Date and Time, Date and Time Now, Combining Date and Time, Formatting Dates and Times, Finding Durations using "timedelta", Comparing Two Dates, Sorting Dates, Stopping Execution Temporarily, Knowing the Time taken by a Program, Working with Calendar Module.	3	Let Us Python by Y. Kanetkar	Meet, PPT
II, 3, Introduction to Programming	IPython: Beyond Normal Python, Help and Documentation in IPython, Keyboard Shortcuts in the IPython Shell, IPython Magic Commands, Input and Output History, IPython and Shell Commands, Errors and Debugging, Profiling and Timing Code	6	Python Data Science Handbook by Jake VanderPlas	Meet, PPT
	Introduction to NumPy: Understanding Data Types in Python, The Basics of NumPy Arrays, Computation on NumPy Arrays: Universal Functions, Aggregations: Min, Max, and Everything In Between, Computation on Arrays: Broadcasting, Comparisons, Masks, and Boolean Logic, Fancy Indexing, Sorting Arrays, Structured Data: NumPy's Structured Arrays	6	Python Data Science Handbook by Jake VanderPlas	Meet, PPT

II, 3, Introduction to Programming	Data Manipulation with Pandas: Introducing Pandas Objects, Data Indexing and Selection, Operating on Data in Pandas, Handling Missing Data, Hierarchical Indexing, Combining Datasets: Concat and Append, Combining Datasets: Merge and Join, Aggregation and Grouping, Pivot Tables, Vectorized String Operations, Working with Time Series. High-Performance Pandas: eval( ) and query( )	6	Python Data Science Handbook by Jake VanderPlas	Meet, PPT
	Visualization with Matplotlib: Simple Line Plots, Simple Scatter Plots, Visualizing Errors, Density and Contour Plots, Histograms, Binnings, and Density, Customizing Plot Legends, Customizing Colorbars, Multiple Subplots, Text and Annotation, Customizing Ticks, Customizing Matplotlib: Configurations and Stylesheets, Three-Dimensional Plotting in Matplotlib, Geographic Data with Basemap, Visualization with Seaborn.	6	Python Data Science Handbook by Jake VanderPlas	Meet, PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: Data Science

CLASS: Fybsc(DS)

SEMESTER: 1

MONTH: September to December

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners would be able to

- Calculate probability, conditional probability and independence.
- Apply the given discrete and continuous distributions whenever necessary.
- Define null hypothesis, alternative hypothesis, level of significance, test statistic and pvalue.
- Perform Test of Hypothesis as well as calculate confidence interval for a population parameter for single sample and two sample cases.
- Apply non-parametric test whenever necessary.
- Conduct and interpret one-way and two-way ANOVA.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	Reference /s	Teaching method Ict tool used
Paper: Statistical Methods **<u>Unit 1</u>**	**Introduction to Statistics and Use in Business:** ➢ Meaning of Statistics as a Science, Importance of Statistics, ➢ Scope of Statistics : In the field of Industry, Biological Sciences,Medical Sciences, Economics Sciences, Social, Sciences,Management	**5**	Statistical Methods and introductory text, Medhi J.,New Age International ltd, Second edition	Power Point Presentation

	Sciences, Agriculture, Insurance, InformationTechnology, Education and Psychology. ➢ Statistical organizations in India and their functions: CSO, ISI,NSS, IIPS (Devnar, Mumbai), Bureau of Economics andstatistics. ➢ Case Study.			

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

	Types of Data and Data Condensation: ➢ Method of sampling: Concept of population and sample. Finite Infinite population ,Notion ofSRS,SRSWOR and SRSWR ➢ Types of Characteristics, Different types of scales: nominal,ordinal, interval and ratio scale. Linear and circular scale. ➢ Types of Data: Primary data, Secondary data, Collection of data and concept of questionnaire and a schedule, Cross-sectional data,time series data, failure data, industrial data, and directional data. ➢ Tabulation. ➢ Dichotomous classification- for two and three attributes,	4	Statistical Methods and introductory text, Medhi J.,New Age International ltd, Second edition	Power Point Presentation

	Verification for consistency. ➢ Association of attributes: Yule's coefficient of association Q. ➢ Yule's coefficient of Colligation, ➢ Notion of a statistical population: Finite population infinite ➢ population,homogeneous population and heterogeneous population. Notion of sample, random sample and non-random sample.			
	Presentation of Data ➢ Univariate frequency distribution of discrete and continuous variables. ➢ Cumulative frequency distribution and relative frequencydistribution. ➢ Graphical representation of frequency distribution by Histogram,frequency polygon, Cumulative frequency curve. Stem and leafdiagram ➢ Check sheet, Parato diagram	3	Statistical Methods and introductory text, Medhi J.,New Age International ltd, Second edition	Power Point Presentation

<u>Unit 2</u>	**Measures of central tendencies** ➢ Concept of central tendency of data. Requirements of good measure ➢ Locational averages: Median, Mode, and Partition Values: Quartiles,Deciles, and	6	Statistical Methods, An n itroductory Text,Medhi J. New Age Internation alLtd. Second Edition	Power Point Presentation

	Percentiles, Box Plot, Percentile ranks ➢ Mathematical averages Arithmetic mean (Simple, weighted mean, combinedmean), Geometricmean, Harmonic mean ➢ Empirical relation between mean, median and mode ➢ Merits and demerits of using different measures &their applicability ➢ Partition Values : Quartiles, Deciles and Percentiles, Box Plot, ➢ Percentile ranks			

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12 lectures

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

	Measures of Dispersion, Skewness & Kurtosis ➢ **Concept of dispersion. Requirements of good measure.** ➢ **Absolute and Relative measures of dispersion: Range, Quartile Deviation, Mean absolute deviation, Standard deviation.** ➢ **Variance and Combined variance, raw moments and central moments and relations between them. Their properties**	6	Statistical Methods and introductory text, Medhi J.,New Age International ltd, Second edition	Power Point Presentation

	➢ **Concept of Skewness and Kurtosis: Measures of Skewness: KarlPearson's, Bowley's and Coefficient of skewness based on moments. Measure of Kurtosis**			

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12 lectures

<u>Unit 3</u>	**Mean square deviation:** ➢ **Definition, minimality property of mean square deviation (with proof),** ➢ **Variance and standard deviation: Definition, merits and demerits, effect of change of origin and scale, combined variance (derivation for 2 groups), combined standard deviation, generalization for n groups.**	7	Statistical Methods And itroductoryText,Medhi J. New Age InternationalLtd. Second Edition	Power Point Presentation

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

	➢ **Measures of dispersion for comparison: coefficient of range, coefficient of quartile deviation and coefficient of mean deviation,coefficient of variation (C.V.).**	5	Statistical Methods, And itroductoryText,Medhi J. New Age International Ltd. Second Edition	Power Point Presentation

NAME OF THE STAFF: AVINASH DILIP SONAWNAE **DEPARTMENT**: ____IT____

CLASS: FYDS **SEMESTER**: 1 **MONTH**: Sep-Dec **ACADEMIC YEAR:** 2021-2022

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand HTML**
- **Understand JavaScript**
- **Understand how server-side programming works on the web.**
- **PHP Basic syntax for variable types and calculations.**
- **Creating conditional structures**
- **Storing data in arrays**
- **Using PHP built-in functions and creating custom functions**
- **Understanding POST and GET in form submission.**
- **How to receive and process form submission data.**
- **Reading and writing cookies.**
- **Security tips (i.e. SQL Injection)**
- **Create a database in phpMyAdmin.**
- **Read and process data in a MySQL database. Students will learn JavaScript's role in websites and web apps.**
- **Students will be introduced to basic CS concepts**
- **Students will learn basic programming structures such as: variables, functions arrays etc.**
- **Students will learn how JavaScript works with HTML and CSS.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: FYDS SEMESTER: II MONTH: FEB-APRIL ACADEMIC YEAR: 2021-2022

LEARNING OBJECTIVE/S:

The course concentrates on the concept of the DBMS with respect to principles, design and implementation of DBMS. It aims to specify the functional and data requirements for a typical database application and to understand creation, manipulation and querying of data in databases. To understand SQL to retrieve data and to get through the concept of redundancy. To specify the functional and data requirements for a typical database.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS201, Introduction to Database Management Systems, UNIT-I	**Introduction & DBMS Architecture:** Why Databases? Data versus Information, Introducing the Database, Role and Advantages of the DBMS, Types of Databases, Why Database Design Is Important, Evolution of File System Data Processing, Problems with File System Data Processing, Database Systems	03	1. Ramez Elmasri & ShamkantB.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010. 2. Database System Concepts by Silberschatz, Korth, Sudarshan, McGraw Hill, 5 Edition, 2006.	Online Mode, Google Meet with Google Slides.
	Data Models – Data Modeling and Data Models, The Importance of Data Models, Data Model Basic Building Blocks, Business Rules, The Evolution of Data Models, Degrees of Data Abstraction	03		Online Mode, Google Meet with Google Slides.
	Entity Relationship Model: Entities, attributes, Relationships, Connectivity and Cardinality, Existence Dependence, Relationship Strength, Weak Entities, Relationship Participation, Relationship Degree, Recursive Relationships, Associative (Composite) Entities, Developing an ER Diagram, Database Design Challenges: Conflicting Goals.	06		Online Mode, Google Meet with Google Slides.

USCS201, Introduction to Database Management Systems, UNIT-II	**Advanced Data Modeling:** The Extended Entity Relationship Model, Entity Clustering, Entity Integrity: Selecting Primary Keys, Design Cases: Learning Flexible Database Design	06	1. Ramez Elmasri & ShamkantB.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010. 2. Database System Concepts by Silberschatz, Korth, Sudarshan, McGraw Hill, 5 Edition, 2006.	Online Mode, Google Meet with Google Slides.
	Normalization of Database Tables: Database Tables and Normalization, The Need for Normalization, The Normalization: Process, Improving the Design, Surrogate Key Considerations, Higher-Level Normal Forms, Normalization and Database Design, Denormalization, Data-Modeling Checklist	06		Online Mode, Google Meet with Google Slides.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: Data Science

CLASS: Fybsc(DS)

SEMESTER: 2

MONTH: February to April

ACADEMIC YEAR: 2021-22

LEARNING OBJECTIVE/S:
The learners would be able to

- To explore about random variables and implement various distribution functions
- To familiarize with concepts of probability and learn implementation of different types of probabilities.
- Learn and implement the concept of expectation, related theorems and generating functions
- To know the concept and implementation of discrete distributions including Bernoulli, Binomial and power series distributions
- To get acquainted with theory and practical implementation of concepts of continuous distributions

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	Reference/s	Teaching method Ict tool used
Paper: Probability and distribution **<u>Unit 1</u>**	➢ **Theory of Probability:** Introduction, history, different terms, ➢ mathematical tools, Axiomatic approach to probability, Mathematical notation,	7	Fundamentals of Mathematical statistics, S. C, Gupta and V. K. Kapoor, S. Chand and Sons,Tenth Edition, 2002	Power Point Presentation

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

	➢ Multiplication Law and conditional probability, Bayes theorem, ➢ Geometric probability.	5	Fundamentals of Mathematical statistics, S. C, Gupta and V. K. Kapoor, S. Chand and Sons,Tenth Edition, 2002	Power Point Presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12 lectures

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

Unit 2	➢ Random Variables and Distribution Functions: Random Variable, Distribution function, discrete random variable, continuous random variable, ➢ joint probability law, transformation of one-dimensional random variable, ➢ transformation of two-dimensional random variable	12	Fundamentals of Mathematical statistics, S. C, Gupta and V. K. Kapoor, S. Chand and Sons,Tenth Edition, 2002	Power Point Presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12 lectures

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayaand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12 lectures
SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

Unit 3	**Mathematical Expectation and Generating Functions:** ➢ Mathematical expectation, Expectation of a Function of a Random Variable, ➢ Addition Theorem of Expectation, Multiplication Theorem of Expectation, Expectation of a Linear Combination of Random Variables, ➢ Covariance, Variance of a Linear Combination of RandomVariables,	7	Fundamentals of Mathematical statistics, S. C, Gupta and V. K. Kapoor, S. Chand and Sons,Tenth Edition, 2002	Power Point Presentation

SIGNATURE OF THE STAFF SIGNATURE OF THE H.O.D.

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

	➢ Moments of Bivariate Probability Distributions, ConditionalExpectation and Conditional Variance, ➢ Moment Generating Function, Cumulants, Characteristic Function, ➢ Chebychev's Inequality, ➢ Convergence in- Probability,	5	Fundamentals of Mathematical statistics, S. C, Gupta and V. K. Kapoor, S. Chand and Sons,Tenth Edition, 2002	Power Point Presentation

	➢ Weak Law of Large Numbers, Borel Canteli Lemma, Probability Generating Function			

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12 lecture

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: INFORMATION TECHNOLOGY CLASS: TYIT-C

SEMESTER: VI MONTH: JANUARY-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of information security, Risk Analysis.
- Understand various security areas such as storage, database, Physical, application, operating system.
- Be familiar about the basic designing of secure network.
- Detect intrusion and how to prevent it, introduction to virtual machines and cloud computing.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT602, Unit 1, Security in Computing	Information Security Overview: The Importance of Information Protection, The Evolution of Information Security, Justifying Security Investment, Security Methodology, How to Build a Security Program, The Impossible Job, The Weakest Link, Strategy and Tactics, Business Processes vs. Technical Controls.	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Risk Analysis: Threat Definition, Types of Attacks, Risk Analysis	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Secure Design Principles: The CIA Triad and Other Models, Defense Models, Zones of Trust, Best Practices for Network Defense.	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT602, Unit 2, Security in Computing	Authentication and Authorization: Authentication, Authorization	03	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Encryption: A Brief History of Encryption, Symmetric-Key Cryptography, Public Key Cryptography, Public Key Infrastructure.	03	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Storage Security: Storage Security Evolution, Modern Storage Security, Risk Remediation, Best Practices.	03	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Database Security: General Database Security Concepts, Understanding Database Security Layers, Understanding DatabaseLevel Security, Using Application Security, Database Backup and Recovery, Keeping Your Servers Up to Date, Database Auditing and Monitoring.	03	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
USIT602, Unit 3, Security in Computing	Secure Network Design: Introduction to Secure Network Design, Performance, Availability, Security.	03	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Network Device Security: Switch and Router Basics, Network Hardening.	03	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Firewalls: Overview, The Evolution of Firewalls, Core Firewall 12 38 Functions, Additional Firewall Capabilities, Firewall Design.	03	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Wireless Network Security: Radio Frequency Security Basics, DataLink Layer Wireless Security Features, Flaws, and Threats, Wireless Vulnerabilities and Mitigations, Wireless Network Hardening Practices and Recommendations, Wireless Intrusion Detection and Prevention, Wireless Network Positioning and Secure Gateways	03	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
USIT602, Unit 4, Security in Computing	Intrusion Detection and Prevention Systems: IDS Concepts, IDS Types and Detection Models, IDS Features, IDS Deployment Considerations, Security Information and Event Management (SIEM).	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Voice over IP (VoIP) and PBX Security: Background, VoIP Components,VoIP Vulnerabilities and Countermeasures, PBX, TEM: Telecom Expense Management	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Operating System Security Models: Operating System Models, Classic Security Models, Reference Monitor, Trustworthy Computing, International Standards for Operating System Security.	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
USIT602, Unit 5, Security in Computing	Virtual Machines and Cloud Computing: Virtual Machines, Cloud Computing.	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Secure Application Design: Secure Development Lifecycle, Application Security Practices, Web Application Security, Client Application Security, Remote Administration Security	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation
	Physical Security: Classification of Assets, Physical Vulnerability Assessment, Choosing Site Location for Security, Securing Assets: Locks and Entry Controls, Physical Intrusion Detection.	04	The Complete Reference: Information Security by Mark Rhodes Ousley	PowerPoint Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: TYIT

SEMESTER: VI MONTH: JAN-MARCH ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the use of business intelligence in real life.
- Describe the different mathematical models to develop decision making systems.
- Get the difference between supervised learning and unsupervised learning techniques.
- Understand the use of mathematical models in relational marketing, support chain optimization, CCR model.
- Familiar with knowledge management and Artificial intelligence and expert systems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT603, Business Intelligence Unit I	**Business intelligence:** Effective and timely decisions, Data, information and knowledge, The role of mathematical models, Business intelligence architectures, Ethics and business intelligence	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Decision support systems: Definition of system, Representation of the decision-making process, Evolution of information systems, Definition of decision support system, Development of a decision support system	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT603, Business Intelligence Unit II	**Mathematical models for decision making:** Structure of mathematical models, Development of a model, Classes of models	05	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Data mining: Definition of data mining, Representation of input data , Data mining process, Analysis methodologies	04	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Data preparation: Data validation, Data transformation, Data reduction	03	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
USIT603, Business Intelligence Unit III	**Classification**: Classification problems, Evaluation of classification models, Bayesian methods, Logistic regression, Neural networks, Support vector machines	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Clustering: Clustering methods, Partition methods, Hierarchical methods, Evaluation of clustering models	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
USIT603, Business Intelligence Unit IV	**Marketing models**: Relational marketing, Sales force management,	04	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Logistic and production models: Supply chain optimization, Optimization models for logistics planning, Revenue management systems.	04	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Data envelopment analysis: Efficiency measures, Efficient frontier, The CCR model, Identification of good operating practices	04	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo	Desktop and Laptop,Digital cameras,Microphone,Mobile,P

			Vercellis, Wiley, First, 2009	owerpoint
USIT603, Business Intelligence Unit V	**Knowledge Management:** Introduction to Knowledge Management, Organizational Learning and Transformation, Knowledge Management Activities, Approaches to Knowledge Management, Information Technology (IT) In Knowledge Management, Knowledge Management Systems Implementation, Roles of People in Knowledge Management	06	Decision support and Business Intelligence Systems by Efraim Turban, Ramesh Sharda, Dursun Delen , Pearson,Ninth,2011	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Artificial Intelligence and Expert Systems: Concepts and Definitions of Artificial Intelligence, Artificial Intelligence Versus Natural Intelligence, Basic Concepts of Expert Systems, Applications of Expert Systems, Structure of Expert Systems, Knowledge Engineering, Development of Expert Systems	06	Decision support and Business Intelligence Systems by Efraim Turban, Ramesh Sharda, Dursun Delen , Pearson,Ninth,2011	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: TYIT-DIV A SEMESTER: VI MONTH: JAN-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- The learners will be able to: know fundamentals of Testing, the idea of Test Policy, Test Strategy & Test Planning. Also they will learn different methods of Unit Testing, Verification, Validation, Acceptance Testing, how to use various Special Tests and understand different Risk Associated with New Technologies and how to overcome. Eventually learners will be able to use the knowledge in their future project.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT601 Software Quality Assurance III	**Unit Testing: Boundary Value Testing:** Normal Boundary Value Testing, Robust Boundary Value Testing, Worst-Case Boundary Value Testing, Special Value Testing, Examples, Random Testing, Guidelines for Boundary Value Testing.	3	Software Testing: A Craftsman's Approach By Paul C. Jorgenson	Google Meet and PowerPoint Presentation
	Equivalence Class Testing: Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations.	3		
	Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations.	2		
	Path Testing: Program Graphs, DD-Paths, Test Coverage Metrics, Basis Path Testing, Guidelines and Observations, **Data Flow Testing:** Define/Use Testing, Slice-Based Testing, Program Slicing Tools.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

V	**Levels of Testing:** Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich Testing, Critical Path First, Sub System Testing, System Testing, Testing Stages.	4	Software Testing: Principles, Techniques and Tools By M. G. Limaye	Google Meet and PowerPoint Presentation
	Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing, Regression Testing, Error Handling Testing, Manual Support Testing, Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing, Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing, Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph,	4		
	Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage, Object Oriented Application Testing, Testing of Internal Controls, COTS Testing, Client Server Testing, Web Application Testing, Mobile Application Testing, eBusiness/eCommerce Testing, Agile Development Testing, Data Warehousing Testing.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: TYIT DIV-C

SEMESTER: VI MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Make Learner Conversant With The Social And Intellectual Property Issues Emerging From 'Cyberspace.
- Explore The Legal And Policy Developments In Various Countries To Regulate Cyberspace;
- Develop The Understanding Of Relationship Between Commerce And Cyberspace
- Give Learners In Depth Knowledge Of Information Technology Act And Legal Frame Work Of Right To Privacy, Data Security And Data Protection.
- Make Study On Various Case Studies On Real Time Crimes.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT607, Cyber Laws Unit 1	Power of Arrest Without Warrant Under the IT Act, 2000: A Critique, Crimes of this Millennium, Section 80 of the IT Act, 2000 – A Weapon or a Farce? Forgetting the Line Between Cognizable and Non-Cognizable Offences, Necessity of Arrest without Warrant from Any Place, Public or Otherwise, Check and Balances Against Arbitrary Arrests,Arrest for "About to Commit" an Offence Under the IT Act: A Tribute to Draco, Arrest, But NO Punishment!	05	1. Cyber Law Simplified VivekSood TMH Education 2001 2. Cybersecurity Law Jeff Kosseff Wiley 2017	Powerpoint
	Cyber Crime and Criminal Justice: Penalties, Adjudication and Appeals Under the IT Act,2000: Concept of "Cyber Crime " and the IT Act , 2000, Hacking, Teenage Web Vandals, Cyber Fraud and Cyber Cheating, Virus on the Internet, Defamation, Harassment and Email Abuse, Cyber Pornography, Other IT Act Offences, Monetary Penalties, Adjudication and Appeals Under IT Act , 2000, Network Service Providers, Jurisdiction and Cyber Crime,	05	Cyber Law Simplified VivekSood TMH Education 2001 Cybersecurity Law Jeff Kosseff Wiley	PowerPoint

NAME OF THE STAFF: Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: T.Y.I.T.-C (Principles of Geographic Information Systems)

SEMESTER: VI

MONTH: January - March

ACADEMIC YEAR: 2020 -2021

LEARNING OBJECTIVE/S :
The learners will be able to :

- Understand the basics of geographic information system.
- Learn GIS Models.
- Understand different types of GIS Data.
- Analyze data, explore issues, problem solve, and evaluate situations in a geographic and spatial context.
- Explore mapped data
- Relate GIS with remote sensing technologies
- Analyze spatial data, using GIS analysis tools
- Develop and manage geodatabases
- Create maps ans images to communicate spatial data in a meaningful way to others.

CLASS: FYIT SEMESTER: II MONTH: December to March ACADEMIC YEAR: 2020-2021
LEARNING OBJECTIVE/S:
The learners will be able to :

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
NSM Unit -II Solutions of Algebraic and Transcendental Equations: Interpolation:	Solutions of Algebraic and Transcendental Equations: The Bisection Method, The Newton-Raphson Method, The Regula-falsi method, The Secant Method. Interpolation: Forward Difference, Backward Difference, Newton's Forward Difference Interpolation, Newton's Backward Difference Interpolation, Lagrange's Interpolation.	12	Fundamentals of Mathematical Statistics S. C. Gupta, V. K. Kapoor	ONLINE (GOOGLE CLASSROOM)

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

NAME OF THE STAFF: Archana Malpathak DEPARTMENT: Mathematics
CLASS: FYIT
SEMESTER: II MONTH: December to March ACADEMIC YEAR: 2020-2021
LEARNING OBJECTIVE/S:
.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
NSM Unit -III Solution of simultaneous algebraic equations (linear) using iterative methods: Numerical differentiation and Integration:	Solution of simultaneous algebraic equations (linear) using iterative methods: Gauss-Jordan Method, Gauss-Seidel Method. Numerical differentiation and Integration: Numberical differentiation, Numerical integration using Trapezoidal Rule, Simpson's 1/3rd and 3/8th rules. Numerical solution of 1st and 2nd order differential equations: Taylor series, Euler's Method, Modified Euler's Method, Runge-Kutta Method for 1st and 2 nd Order Differential Equations.	12	Fundamentals of Mathematical Statistics S. C. Gupta, V. K. Kapoor	ONLINE (GOOGLE CLASSROOM)

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:Anuja Patil DEPARTMENT: IT-CS CLASS:FYIT-DIV A

SEMESTER: SEM-II MONTH: JAN-MAR ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: To apply fundamental programming constructs. To illustrate the concept of classes and objects, Data Abstraction and Data Encapsulation. To implement the concept of Pointer, friend function , Virtual Functions, Constructor& Destructors.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-1, OOPS, UNIT 1	**Object Oriented Methodology:** Introduction, Advantages and Disadvantages of Procedure Oriented Languages, what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	4	Object Oriented Programming with C++ -by E. Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation	3		
	Inheritance, Polymorphism, Dynamic Binding, Message Passing	5		
	Classes and Objects: Simple classes (Class specification, class members accessing), Defining member functions	4	Object Oriented Programming with C++ -by	PPT, GoogleMeet,

UNIT 2			E. Balagurusamy	Jamboard ,Slido.
	passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	4		
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors.	2		
UNIT 3	**Polymorphism:** Concept of function overloading, overloaded operators, overloading unary and binary operators	4	Object Oriented Programming with C++ -by E. Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.
	overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types.	5		
	Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors.	4		
UNIT 4	**Program development using Inheritance:** Introduction, understanding inheritance, Advantages provided by inheritance, choosing the access specifier, *Derived class declaration,*	3	Object Oriented Programming with C++ by E.Balagurusamy	GOOGLE MEET AND PPT
	Multilevel inheritance, Containership, hybrid inheritance. Exception Handling: Introduction,	3		

	Exception Handling Mechanism, Concept of throw & catch with example	3		
	File Pointer and their Manipulation	2		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 36

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYIT-A SEMESTER: SEM-2 MONTH: JAN-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- To gain an understanding why the green computing is instrumental for the environment.
- Identify key issues relevant to green computing and evaluate different approaches to these problems.
- Study of designing, engineering, manufacturing, using and disposing of computing devices in a way that reduces their environmental impact.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
5 GREEN COMPUTING UNIT 2	Minimizing Power Usage: Power Problems, Monitoring Power Usage, Servers, Low-Cost Options, Reducing Power Use, Data De-Duplication, Virtualization, Management, Bigger Drives, Involving the Utility Company,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	GOOGLE MEET AND PPT
	Low Power Computers, PCs, Linux, Components, Servers, Computer Settings, Storage, Monitors, Power Supplies, Wireless Devices, Software.	3		
	Cooling: Cooling Costs, Power Cost, Causes of Cost, Calculating Cooling Needs, Reducing Cooling Costs, Economizers, On-Demand Cooling, HP's Solution, Optimizing Airflow, Hot Aisle/Cold Aisle, Raised Floors, Cable Management, Vapour Seal,	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Prevent Recirculation of Equipment Exhaust, Supply Air Directly to Heat Sources, Fans, Humidity, Adding Cooling, Fluid Considerations, System Design, Datacentre Design, Centralized Control, Design for Your Needs, Put Everything Together.	3		
UNIT 3	**Changing the Way of Work:** Old Behaviours, starting at the Top, Process Reengineering with Greening Mind, Analysing the Global Impact of Local Actions,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	GOOGLE MEET AND PPT
	Steps: Water, Recycling, Energy, Pollutants, Teleworkers and Outsourcing, Telecommuting, Outsourcing, how to Outsource.	3		
	Going Paperless: Paper Problems, The Environment, Costs: Paper and Office, Practicality, Storage, Destruction, Going Paperless, Organizational Realities, Changing Over, Paperless Billing, Handheld Computers vs. the Clipboard,	3		
	Unified Communications, Intranets, What to Include, Building an Intranet, Microsoft Office SharePoint Server 2007, Electronic Data Interchange (EDI), Nuts and Bolts, Value Added Networks, Advantages, Obstacles.	3		
UNIT 5	**Greening Your Information Systems:** Initial Improvement Calculations, Selecting Metrics, Tracking Progress, Change Business Processes, Customer Interaction, Paper Reduction,	3	Green IT by Toby Velte, Anthony Velte, Robert Elsenpeter	GOOGLE MEET AND PPT
	Green Supply Chain, Improve Technology Infrastructure, Reduce PCs and Servers, Shared Services, Hardware Costs,	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Cooling.			
	Staying Green: Organizational Check-ups, Chief Green Officer, Evolution, Sell the CEO, SMART Goals, Equipment Check-ups, Gather Data, Tracking the data,	3		
	Baseline Data, Benchmarking, Analyse Data, Conduct Audits, Certifications, Benefits, Realities, Helpful Organizations.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: FYIT SEMESTER: II MONTH: DECE to MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

To become familiar with the architecture and the instruction set of an Intel microprocessor

To study the Assembly language programming as well as the design of various types of digital and analog interfaces

To understand the architecture of 8085 and 8051

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 MPA Unit 1	**Microprocessor, microcomputers, and Assembly Language:** Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	4	Microprocessors Architecture, Programming and Applications with the 8085.	Black board & Chalk

			Ramesh Gaonkar PENRAM Fifth 2012	
	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
Paper-02 MPA Unit 2	**Interfacing of I/O Devices** : Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Black board & Chalk
	Introduction to 8085 Instructions:	4	Microprocessors Architecture,	Black board & Chalk

	Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program		Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.IT SEMESTER: II MONTH: JANUARY-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand and realize the Interfacing of memory & various I/O devices with 8085 microprocessors.
- Understand and classify the instruction set of 8085 microprocessor and distinguish the use of different instructions and apply it in assembly language programming.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Unit-III Microprocessor Architecture	**Programming Techniques With Additional Instructions:** Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Google Meet, ppt
	Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	4		Google Meet, ppt
	Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		Google Meet, ppt

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper-II UNIT-IV Microprocessor Architecture	**Code Conversion, BCD Arithmetic, and 16-Bit Data Operations:** BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-toSeven-Segment-LED Code Conversion, Binary-to-ASCII and ASCIIto-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	5	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Google Meet, ppt
	Software Development System and Assemblers: Microprocessors-Based Software Development system, Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	4		Google Meet, ppt
	Interrupts: The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		Google Meet, ppt
Paper-II UNIT-V Microprocessor Architecture	**The Pentium and Pentium Pro microprocessors:** Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor, Special Pentium Pro features.	4	Microprocessors Architecture, Programming and Applications with the 8085. Ramesh Gaonkar PENRAM Fifth 2012	Google Meet, ppt
	Core 2 and later Microprocessors: Introduction, Pentium II software changes, Pentium IV and Core 2, i3, i5 and i7.	4		Google Meet, ppt
	SUN SPARC Microprocessor: Architecture, Register file, data types and instruction format	4		Google Meet, ppt

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: AVINASH DILIP SONAWNAE **DEPARTMENT**: ____IT____

CLASS: FYIT_A DIV **SEMESTER**: 2 **MONTH**: Jan to March **ACADEMIC YEAR:** 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand HTML**
- **Understand JavaScript**
- **Understand how server-side programming works on the web.**
- **PHP Basic syntax for variable types and calculations.**
- **Creating conditional structures**
- **Storing data in arrays**
- **Using PHP built-in functions and creating custom functions**
- **Understanding POST and GET in form submission.**
- **How to receive and process form submission data.**
- **Reading and writing cookies.**
- **Security tips (i.e. SQL Injection)**
- **Create a database in phpMyAdmin.**
- **Read and process data in a MySQL database. Students will learn JavaScript's role in websites and web apps.**
- **Students will be introduced to basic CS concepts**
- **Students will learn basic programming structures such as: variables, functions arrays etc.**
- **Students will learn how JavaScript works with HTML and CSS.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT203 Web Programming	**Internet and the World Wide Web:** What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers – internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. search engine, web saver – apache, IIS, proxy server, HTTP protocol	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	GOOGLE MEET AND GOOGLE CLASSROOM

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit I	**HTML5:** Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.	6		
Unit II	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to anotherURL, creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions	6	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	GOOGLE MEET AND GOOGLE CLASSROOM
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout, formatting tables: applying table borders, applying background and foreground fills, changing cell padding,	6		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	spacing and alignment, creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page			
UNIT III	Java Script: Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	2	JavaScript 2.0: The Complete Reference BY Thomas Powell and Fritz Schneider	GOOGLE MEET AND GOOGLE CLASSROOM
	Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	3		
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with	2		
	.Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp	3		
UNIT IV	PHP: Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types,	3	PHP Project for Beginners BY SharanamShah, Vaishali	GOOGLE MEET AND GOOGLE CLASSROOM
	control structures, branching, looping, termination, functions, passing information with PHP, GET, POST,	3		
	formatting form variables, superglobal arrays, strings and string functions	3		
	regular expressions, arrays, number handling, basic PHP errors/problems	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT V	Advanced PHP and MySQL : PHP/MySQL Functions, Integrating web forms and databases,	3	PHP Project for Beginners BY SharanamShah, Vaishaliz	GOOGLE MEET AND GOOGLE CLASSROOM
	Displaying queries in tables, Building Forms from queries,	3		
	String and Regular Expressions, Sessions,	3		
	Cookies and HTTP, E-Mail	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: FY BSc IT SEMESTER:II MONTH: JAN-MAR ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

The learners will be able to:

1. To learn about how computer systems work and underlying principles.
2. To understand the basics of digital electronics needed for computers.
3. To understand the basics of instruction set architecture for reduced and complex instruction sets.
4. To understand the basics of processor structure and operation.
5. To understand how data is transferred between the processor and I/O devices.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
UNIT 1	Microprocessor, microcomputers, and Assembly Language: Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Microcontrollers, Applications.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	POWER POINT PRESENTATION
	Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.	5		

	8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Interfacing the 8155 Memory Segment, Illustrative Example: Designing Memory for the MCTS Project, Testing and Troubleshooting Memory Interfacing Circuit, 8085-Based Single-Board microcomputer.	4		
UNIT 2	Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	POWER POINT PRESENTATION
	The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple Program.	3		
	Overview of 8085 Instruction Set, Writing and Assembling Program, Data Transfer Operations.	2		
	Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program.	4		
UNIT 3	Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	POWER POINT PRESENTATION

	Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging, Counters and Time Delays.	3		
	Illustrative Program: Hexadecimal Counter, zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.	3		
	Stack Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.	3		
UNIT 4	BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-to-Seven-Segment-LED Code Conversion, Binary-to-ASCII and ASCII-to-Binary Code Conversion,	4	Microprocessors Architecture, Programming and Applications with t 8085 by Ramesh Gaonkar	POWER POINT PRESENTATION
	BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry.	2		
	Microprocessors-Based Software Development system, OS and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers.	3		
	The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes.	3		
UNIT 5	Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor.	3	Microprocessors Architecture, Programming and Applications with the 8085 by Ramesh Gaonkar	POWER POINT PRESENTATION
	Special Pentium Pro features, Introduction, Pentium II software changes.	3		
	Pentium IV and Core 2, i3, i5 and i7.	3		

	Architecture, Register file, data types and instruction format	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT: CS

CLASS: FYIT-DIV B SEMESTER: SEM-2 MONTH: JAN-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- Perform object oriented programming to develop solution to problems demonstrating usage of control structures, modularity, I/O and other standard language constructs.
- Demonstrate adeptness of object oriented programming to develop solution to problem demonstration usage of data abstraction, encapsulation, and inheritance.

PAPER, TITLE,UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 1,Object oriented programming ,UNIT 2	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions, passing object as an argument	4	Object Oriented Programming with C++ by E.Balagurusamy	PPT AND PDF
	Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	4		
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructor	4		

UNIT 5	**Templates:** Introduction, Function Template and examples,	3	Object Oriented Programming with C++ by E.Balagurusamy	PPT AND PDF
	Class Template and examples.	3		
	Working with Files: Introduction, File Operations, Various File Modes,	4		
	File Pointer and their Manipulation	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.IT SEMESTER: II MONTH: JANUARY-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

- design dynamic websites that meet specified needs and interests.
- write well-structured, easily maintained, standards-compliant, accessible HTML code.
- use JavaScript to add dynamic content to pages.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-III UNIT-II WEB PROGRAMMING	**HTML5 Page layout and navigation:** Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to another URL,	3	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Google Meet, ppt
	creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions.	2		Google Meet, ppt
	HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout,	2		Google Meet, ppt

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment,	2		Google Meet, ppt
	creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page	3		Google Meet, ppt
PAPER-III UNIT-III WEB PROGRAMMING	**Java Script:** Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	1	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Google Meet, ppt
	Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	2		Google Meet, ppt
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with	2		Google Meet, ppt
	Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp	2		Google Meet, ppt
	Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer	2		Google Meet, ppt
	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad,	3		Google Meet, ppt

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp, onMove, onReset, onResize, onSelect, onSubmit, onUnload			
PAPER-III UNIT-V WEB PROGRAMMING	**Advanced PHP and MySQL :** PHP/MySQL Functions, Integrating web forms and databases,	5	Web Design The Complete Reference Thomas Powell Tata McGraw Hill	Google Meet, ppt
	Displaying queries in tables, Building Forms from queries, String and	3		Google Meet, ppt
	Regular Expressions, Sessions, Cookies and HTTP, E-Mail	4		Google Meet, ppt

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:FYIT-DIV C SEMESTER: SEM-II MONTH: JAN-MAR ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: To apply fundamental programming constructs. To illustrate the concept of classes and objects, Data Abstraction and Data Encapsulation. To implement the concept of Pointer, friend function , Virtual Functions, Constructor& Destructors.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-1, OOPS, UNIT 1	**Object Oriented Methodology:** Introduction, Advantages and Disadvantages of Procedure Oriented Languages, what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS.	4	Object Oriented Programming with C++ -by E. Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.
	Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation	3		
	Inheritance, Polymorphism, Dynamic Binding, Message Passing	5		
UNIT 2	**Classes and Objects:** Simple classes (Class specification, class members accessing), Defining member functions	4	Object Oriented Programming with C++ -by E. Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.

	passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object.	4		
	Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors.	2		
UNIT 3	**Polymorphism:** Concept of function overloading, overloaded operators, overloading unary and binary operators	4	Object Oriented Programming with C++ -by E. Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.
	overloading comparison operator, overloading arithmetic assignment operator, Data Conversion between objects and basic types.	5		
	Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT:CS

CLASS: FY BSc IT DIV C(WEB) SEMESTER:SEM -2 MONTH: JAN-MAR ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand how server-side programming works on the web.
- PHP Basic syntax for variable types and calculations.
- Creating conditional structures
- Storing data in arrays
- Using PHP built-in functions and creating custom functions
- Understanding POST and GET in form submission.
- How to receive and process form submission data.
- Reading and writing cookies.
- Security tips (i.e. SQL Injection)
- Create a database in phpMyAdmin.
- Read and process data in a MySQL database. Students will learn JavaScript's role in websites and web apps.
- Students will be introduced to basic CS concepts
- Students will learn basic programming structures such as: variables, functions arrays etc.
- Students will learn how JavaScript works with HTML and CSS.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3	**Java Script:** Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security,	2	JavaScript 2.0: The Complete	PPT

WEB PROGRAMMING UNIT 3	**Operators**: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void	3	Reference BY Thomas Powell and Fritz Schneider	
	Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with,	2		
	Core JavaScript (Properties and Methods of Each) : Array, Boolean, Date, Function, Math, Number, Object, String, regExp **Document and its associated objects:** document, Link, Area, Anchor, Image, Applet, Layer	2		
	Events and Event Handlers : General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDblClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp,	3		
UNIT 4	**PHP:** Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types,	3	PHP Project for Beginners BY SharanamShah, Vaishali	PPT
	control structures, branching, looping, termination, functions, passing information with PHP, GET, POST,	3		
	formatting form variables, superglobal arrays, strings and string functions,	3		

	regular expressions, arrays, number handling, basic PHP errors/problems	3		
UNIT 5	**Advanced PHP and MySQL :** PHP/MySQL Functions, Integrating web forms and databases,	3	PHP Project for Beginners BY SharanamShah, Vaishali	PPT
	Displaying queries in tables, Building Forms from queries,	3		
	String and Regular Expressions, Sessions,	3		
	Cookies and HTTP, E-Mail	3

NAME OF THE STAFF: Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: S.Y.I.T.-A (Core Java)

SEMESTER: IV

MONTH: January - March

ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S :
The learners will be able to :

-Understand basics of Java programming language .

-Learn to control the flow of execution of the program.

-Understand of to create java classes and objects and using them to make java application

-Learn the concepts of multi threading and exception handling.

-Learn to use streams for reading and writing data to and from files.

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:S.Y.BSC(I.T) Div-B & C SEMESTER: **IV** MONTH:JANUARY ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to : To list the basic concepts used in computer graphics

To implement various algorithms to scan, convert the basic geometrical primitives, transformations, Area filling, clipping.

To describe the importance of viewing and projections.

To define the fundamentals of animation, virtual reality and its related technologies.

To understand a typical graphics pipeline

To design an application with the principles of virtual reality

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Computer Graphics and Animation USIT405 Unit-1	**Introduction to Computer Graphics:** Overview of Computer Graphics, Computer Graphics Application andSoftware, Description of some graphics devices, Input Devices forOperator Interaction, Active and Passive Graphics Devices, DisplayTechnologies, Storage Tube Graphics Displays, Calligraphic Refresh Graphics Displays, Raster Refresh (Raster-Scan) Graphics Displays,Cathode Ray Tube Basics, Color CRT Raster Scan Basics, VideoBasics, The Video Controller, Random-Scan Display Processor, LCD displays.	5	Computer Graphics -Hearn, Baker Computer Graphics-Rajesh.k.Mourya	Powerpoint Presentation, Google classroom, Google Meet

VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: SYIT-DIV C SEMESTER: IV MONTH: JAN - MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: Develop logics to write programs, build application using Core Java. This will also help them to understand some basic concepts of object-oriented programming like class, inheritance, polymorphism, message passing. Also they will get to know the idea of multithreading, package, exception-handling.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT401 Core Java II	**Control Flow Statements:** The If…Else If…Else Statement, The Switch…Case Statement	3	Core Java 8 for Beginners By Vaishali Shah, Sharnam Shah	Google Meet and PowerPoint Presentation
	Iterations: The While Loop, The Do … While Loop, The For Loop, The Foreach Loop, Labeled Statements, The Break And Continue Statements, The Return Statement	3		
	Classes: Types of Classes, Scope Rules, Access Modifier, Instantiating Objects From A Class, Initializing The Class Object And Its Attributes, Class Methods, Accessing A Method, Method Returning A Value, Method's Arguments, Method Overloading	3		
	Variable Arguments [Varargs], Constructors, this Instance, super Instance, Characteristics Of Members Of A Class, constants, this instance, static fields of a class, static methods of a class, garbage collection.	3		
	Inheritance: Derived Class Objects, Inheritance and Access Control, Default Base Class Constructors, this and super keywords.	3	Core Java 8 for	Google Meet and PowerPoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

III	Abstract Classes And Interfaces, Abstract Classes, Abstract Methods, Interfaces, What Is An Interface? How Is An Interface Different From An Abstract Class?	3	Beginners By Vaishali Shah, Sharnam Shah	
	Multiple Inheritance, Default Implementation, Adding New Functionality, Method Implementation, Classes V/s Interfaces, Defining An Interface, Implementing Interfaces.	4		
	Packages: Creating Packages, Default Package, Importing Packages, Using A Package.	2		
IV	**Enumerations, Arrays:** Two Dimensional Arrays, Multi-Dimensional Arrays, Vectors, Adding Elements To A Vector, Accessing Vector Elements, Searching For Elements In A Vector, Working With The Size of The Vector.	3	Core Java 8 for Beginners By Vaishali Shah, Sharnam Shah	Google Meet and PowerPoint Presentation
	Multithreading: the thread control methods, thread life cycle, the main thread, creating a thread, extending the thread class.	3		
	Exceptions: Catching Java Exceptions, Catching Run-Time Exceptions, Handling Multiple Exceptions, The finally Clause, The throws Clause	3		
	Byte streams: reading console input, writing console output, reading file, writing file, writing binary data, reading binary data, getting started with character streams, writing file, reading file	3		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 36

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT:CS

CLASS: SY BSc IT DIV-C(CJ) SEMESTER:SEM-4 MONTH:JAN-MAR ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

The learners will be able to :

- To learn why Java is useful for the design of desktop and web applications.
- To learn how to implement object-oriented designs with Java.
- To identify Java language components and how they work together in applications.
- To design and program stand-alone Java applications.
- To learn how to design a graphical user interface (GUI) .
- To understand how to use Java APIs for program development.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CORE JAVA PAPER-1 Unit 1	**Introduction:**History, architecture and its components,Java Class File, Java Runtime Environment, The Java Virtual Machine, JVM Components, The Java API, java platform, java development kit,	2	Core Java 8 for Beginners BY Vaishali Shah, Sharnam Shah	PPT
	Lambda Expressions, Methods References, Type Annotations, Method Parameter Reflection, setting the path environment variable, Java Compiler And Interpreter, java programs, java applications,	2		
	main(), public, static, void, string[] args, statements, white space, case sensitivity, identifiers, keywords, comments, braces and code blocks, variables, variable name	2		
	Data types: primitive data types, Object Reference Types, Strings, Auto boxing, operators and properties of operator	4		

Unit 5	Arithmetic operators, assignment operators, increment and decrement operator, relational operator, logical operator,		Core Java 8 for Beginners BY Vaishali Shah, Sharnam Shah	PPT
	bitwise operator, conditional operator.	2		
	Event Handling: Delegation Event Model, Events, Event classes, Event listener interfaces, Using delegation event model, adapter classes and inner classes.	3		
	Abstract Window Toolkit: Window Fundamentals, Component, Container, Panel, Window, Frame, Canvas	3		
	.Components – Labels, Buttons, Check Boxes, Radio Buttons, Choice Menus, Text Fields, Text, Scrolling List, Scrollbars, Panels, Frames	3		
	Layouts: Flow Layout, Grid Layout, Border Layout, Card Layout.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: SYIT SEMESTER: IV MONTH: JAN-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S: To provide a understanding of software engineering, its basic concepts and functioning. Develop and master understanding of various models used by software industries for various purposes. Also conceptual learning of various aspects of it such as cost estimation techniques, project management, quality assurance etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT404, Software Engineering Unit-I	Introduction: What is software engineering? Software Development Life Cycle, Requirements Analysis, Software Design, Coding, Testing, Maintenance etc. Agile software development: Agile methods, Plan-driven and agile development, Extreme programming, Agile project management, Scaling agile methods.	03	Software Engineering, Ian Somerville Pearson Education. Ninth edition, Software Engineering Pankaj Jalote Narosa Publication , Software engineering, a practitioner's approach Roger Pressman Tata Mcgraw-hill Seventh edition	Blackboard, Chalk
	Software Requirements: Functional and Non-functional requirements, User Requirements, System Requirements, Interface Specification, Documentation of the software requirements.	02		Blackboard, Chalk
	Software Processes: Process and Project, Component Software Processes. Software Development Process Models. • Waterfall Model. • Prototyping. • Iterative Development. • Rational Unified Process. • The RAD Model • Time boxing Model.	04		Blackboard, Chalk
	Agile software development: Agile methods, Plan-driven and agile development, Extreme programming, Agile project management, Scaling agile methods.	03		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT404, Software Engineering Unit-II	Socio-technical system:Essential characteristics of socio technical systems, Emergent System Properties, Systems Engineering, Components of system such as organization, people and computers, Dealing Legacy Systems.	03	Software Engineering, Ian Somerville Pearson Education. Ninth edition, Software Engineering Pankaj Jalote Narosa Publication , Software engineering, a practitioner's approach Roger Pressman Tata Mcgraw-hill Seventh edition	Blackboard, Chalk
	Critical system: Types of critical system, A simple safety critical system, Dependability of a system, Availability and Reliability, Safety and Security of Software systems.	03		Blackboard, Chalk
	Requirements Engineering Processes: Feasibility study, Requirementselicitation and analysis, Requirements Validations, Requirements Management.	03		Blackboard, Chalk
	System Models: Models and its types, Context Models, Behavioural Models, Data Models, Object Models, Structured Methods	03		Blackboard, Chalk
USIT404, Software Engineering Unit-III	Architectural Design: Architectural Design Decisions, System Organisation, Modular Decomposition Styles, Control Styles, Reference Architectures.	03	Software Engineering, Ian Somerville Pearson Education. Ninth edition, Software Engineering Pankaj Jalote Narosa Publication , Software engineering, a practitioner's approach Roger Pressman Tata Mcgraw-hill Seventh	Blackboard, Chalk
	User Interface Design: Need of UI design, Design issues, The UI design Process, User analysis, User Interface Prototyping, Interface Evaluation	03		Blackboard, Chalk
	Project Management Software Project Management, Management activities, Project Planning, Project Scheduling, Risk Management.	03		Blackboard, Chalk
	Quality Management: Process and Product Quality, Quality assurance and Standards, Quality Planning, Quality Control, Software Measurement and Metrics	03		Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			edition	
USIT404, Software Engineering Unit-IV	Verification and Validation: Planning Verification and Validation, Software Inspections, Automated Static Analysis, Verification and Formal Methods.	04	Software Engineering, Ian Somerville Pearson Education. Ninth edition, Software Engineering Pankaj Jalote Narosa Publication , Software engineering, a practitioner's approach Roger Pressman Tata Mcgraw-hill Seventh edition	Blackboard, Chalk
	Software Testing: System Testing, Component Testing, Test Case Design, Test Automation. Software Measurement: Size-Oriented Metrics, Function-Oriented Metrics, Extended Function Point Metrics	04		Blackboard, Chalk
	Software Cost Estimation:Software Productivity, Estimation Techniques, Algorithmic Cost Modelling, Project Duration and Staffing	04		Blackboard, Chalk
USIT404, Software Engineering Unit-V	Process Improvement: Process and product quality, Process Classification, Process Measurement, Process Analysis and Modeling, Process Change, The CMMI Process Improvement Framework.	03	Software Engineering, Ian Somerville Pearson Education. Ninth edition, Software Engineering Pankaj Jalote Narosa Publication , Software engineering, a practitioner's	Blackboard, Chalk
	Service Oriented Software Engineering: Services as reusable components, Service Engineering, Software Development with Services.	03		Blackboard, Chalk
	Software reuse: The reuse landscape, Application frameworks, Software product lines, COTS product reuse.	03		Blackboard, Chalk
	Distributed software engineering: Distributed systems issues, Client–server computing, Architectural patterns for distributed	03		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: TYIT-DIV C SEMESTER: VI MONTH: JAN-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- The learners will be able to: know fundamentals of Testing, the idea of Test Policy, Test Strategy & Test Planning. Also they will learn different methods of Unit Testing, Verification, Validation, Acceptance Testing, how to use various Special Tests and understand different Risk Associated with New Technologies and how to overcome. Eventually learners will be able to use the knowledge in their future project.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT601 Software Quality Assurance II	**Fundamentals of testing:** Introduction, Necessity of testing, What is testing? Fundamental test process, The psychology of testing, Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During Development Life Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench, Important Features of Testing Process, Misconceptions About Testing.	3	Software Testing: Principles, Techniques and Tools By M. G. Limaye	Google Meet and PowerPoint Presentation
	Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning, Testing Process and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges in Testing, Test Team Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy, Methods, Structured Approach to Testing,	3		
	Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	(Test Plan), Testing Process, Attitude Towards Testing(Common People Issues), Test Methodologies/ Approaches.			
	People Challenges in Software Testing, Raising Management Awareness for Testing, Skills Required by Tester, Testing throughout the software life cycle, Software development models, Test levels, Test types, the targets of testing, Maintenance testing.	3		
III	**Unit Testing: Boundary Value Testing:** Normal Boundary Value Testing, Robust Boundary Value Testing, Worst-Case Boundary Value Testing, Special Value Testing, Examples, Random Testing, Guidelines for Boundary Value Testing.	3	Software Testing: A Craftsman's Approach By Paul C. Jorgenson	Google Meet and PowerPoint Presentation
	Equivalence Class Testing: Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations.	3		
	Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations.	2		
	Path Testing: Program Graphs, DD-Paths, Test Coverage Metrics, Basis Path Testing, Guidelines and Observations, **Data Flow Testing:** Define/Use Testing, Slice-Based Testing, Program Slicing Tools.	4		
IV	**Software Verification and Validation:** Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews on the basis of Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification.	4	Software Testing: Principles, Techniques and Tools	Google Meet and PowerPoint Presentation
	Validation, Validation Workbench, Levels of Validation, Coverage in Validation, Acceptance Testing, Management of Verification and Validation, Software development verification and validation activities.	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	V-test Model: Introduction, V-model for software, Testing during Proposal stage, Testing during requirement stage, Testing during test planning phase, Testing during design phase, Testing during coding, VV Model, Critical Roles and Responsibilities.	4	By M. G. Limaye	
V	**Levels of Testing:** Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich Testing, Critical Path First, Sub System Testing, System Testing, Testing Stages.	4	Software Testing: Principles, Techniques and Tools By M. G. Limaye	Google Meet and PowerPoint Presentation
	Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing, Regression Testing, Error Handling Testing, Manual Support Testing, Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing, Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing, Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph,	4		
	Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage, Object Oriented Application Testing, Testing of Internal Controls, COTS Testing, Client Server Testing, Web Application Testing, Mobile Application Testing, eBusiness/eCommerce Testing, Agile Development Testing, Data Warehousing Testing.	4

NAME OF THE STAFF: MR. BRIJESH Y. JOSHI DEPARTMENT: IT CLASS: TYIT

SEMESTER: VI MONTH: JAN-MARCH ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the use of business intelligence in real life.
- Describe the different mathematical models to develop decision making systems.
- Get the difference between supervised learning and unsupervised learning techniques.
- Understand the use of mathematical models in relational marketing, support chain optimization, CCR model.
- Familiar with knowledge management and Artificial intelligence and expert systems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT603, Business Intelligence Unit I	**Business intelligence:** Effective and timely decisions, Data, information and knowledge, The role of mathematical models, Business intelligence architectures, Ethics and business intelligence	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Decision support systems: Definition of system, Representation of the decision-making process, Evolution of information systems, Definition of decision support system, Development of a decision support system	06	Business Intelligence: Data Mining and Optimization for Decision Making by Carlo Vercellis, Wiley, First, 2009	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)** _____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**T.Y.B.SC(IT)-A**_____ SEMESTER: ____**VI**_____ MONTH: _____ _____**DECEMBER-MARCH** _____ ACADEMIC YEAR: _____**2020-2021**_____

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the Geographical Information System for processing standard geographic data.
- Make you understand where GIS system can be applied. Learning about different applications (example: GPS).
- How geographic data are capture, updated, profiled, stored and represented in the system.
- Enable to understand software and hardware trends, DBMS and varieties of Models.
- To understand how geographic data can be display with help of Maps and to understand the making of Maps.
- Studying about spatial referencing and positioning of data in system.
- To understand different operations and functions on data and to analyze and explore information in the system.
- To provide better visualization of data both in vector and raster manner.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-04 (USIT604) **Principles of**	**A Gentle Introduction to GIS** **The nature of GIS:** Some fundamental observations, Defining GIS, GISystems, GIScience and GIApplications, Spatial data and Geoinformation.	04	Principles of Geographic Information Systems- An	Online Google Meet PPTs.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Geographic Information Systems **Unit No -01**	**The real world and representations of it:** Models and modelling, Maps, Databases, Spatial databases and spatial analysis		Introductory Text Book By Editors: Otto Huisman and Rolf A. , The International Institute of Geoinformation Science and Earth Observation Introduction to Geographic Information Systems Chang Kang-tsung McGrawHill	
	Geographic Information and Spatial Database **Models and Representations of the real world** **Geographic Phenomena:** Defining geographic phenomena, types of geographic phenomena, Geographic fields, Geographic objects, Boundaries	03		
	Computer Representations of Geographic Information: Regular tessellations, irregular tessellations, Vector representations, Topology and Spatial relationships, Scale and Resolution, Representation of Geographic fields, Representation of Geographic objects	03		
	Organizing and Managing Spatial Data **The Temporal Dimension**	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -02	**Data Management and Processing Systems** **Hardware and Software Trends** **Geographic Information Systems:** GIS Software, GIS Architecture and functionality, Spatial Data Infrastructure (SDI)	04	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto	Online Google Meet PPTs.
	Stages of Spatial Data handling: Spatial data handling and preparation, Spatial Data Storage and maintenance, Spatial Query and Analysis, Spatial Data Presentation.	03		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Database management Systems: Reasons for using a DBMS, Alternatives for data management, The relational data model, Querying the relational database.	03	Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	
	GIS and Spatial Databases: Linking GIS and DBMS, Spatial database functionality.	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -03	**Spatial Referencing and Positioning** **Spatial Referencing:** Reference surfaces for mapping, Coordinate Systems, Map Projections, Coordinate Transformations	03	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Online Google Meet PPTs.
	Satellite-based Positioning: Absolute positioning, Errors in absolute positioning, Relative positioning, Network positioning, code versus phase measurements, Positioning technology	03		
	Data Entry and Preparation **Spatial Data Input:** Direct spatial data capture, Indirect spatial data captiure, Obtaining spatial data elsewhere	02		
	Data Quality: Accuracy and Positioning, Positional accuracy, Attribute accuracy, Temporal accuracy, Lineage, Completeness, Logical consistency	02		
	Data Preparation: Data checks and repairs, Combining data from multiple sources	01		
	Point Data Transformation: Interpolating discrete data, Interpolating continuous data	01		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -04	**Spatial Data Analysis** **Classification of analytical GIS Capabilities** **Retrieval, classification and measurement:** Measurement, Spatial selection queries, Classification	03	Principles of Geographic Information Systems- An Introductory Text Book By Editors: Otto Huisman and Rolf A. The International Institute of Geoinformation Science and Earth Observation	Online Google Meet PPTs.
	Overlay functions: Vector overlay operators,Raster overlay operators	01		
	Neighbourhood functions: Proximity computations, Computation of diffusion, Flow computation, Raster based surface analysis	03		
	Analysis: Network analysis, interpolation, terrain modelling	01		
	GIS and Application models: GPS, Open GIS Standards, GIS Applications and Advances	02		
	Error Propagation in spatial data processing: How Errors propagate, Quantifying error propagation	02		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:12			
Unit No -05	**Data Visualization** **GIS and Maps, The Visualization Process** **Visualization Strategies: Present or explore?**	04	Principles of Geographic Information	Online Google Meet PPTs.

NAME OF THE STAFF: Pranali Dayanand Thakare **DEPARTMENT**: IT

CLASS: T.Y.I.T.-B (Principles of Geographic Information Systems) **SEMESTER**: VI

MONTH: January - March **ACADEMIC YEAR**: 2020 -2021

LEARNING OBJECTIVE/S :
The learners will be able to :

- Understand the basics of geographic information system.
- Learn GIS Models.
- Understand different types of GIS Data.
- Analyze data, explore issues, problem solve, and evaluate situations in a geographic and spatial context.
- Explore mapped data
- Relate GIS with remote sensing technologies
- Create maps ans images to communicate spatial data in a meaningful way to others.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **TYBSCIT** SEMESTER:**VI**

MONTH: **JAN-MARCH** ACADEMIC YEAR:**2020-21**

LEARNING OBJECTIVE/S:

The learners will be able to :

Understanding the customers priority for **quality assurance** while developing ...
that **will** be created by the organization, The scope of **Software** Testing applies to ... improvements of the processes through **learning** & innovation
Understand Manual and automated testing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT601 Software Quality Assurance UNIT-1	**Introduction to Quality:** Historical Perspective of Quality, What isQuality? (Is it a fact or perception?), Definitions of Quality, Core Components of Quality, Quality View, Financial Aspect of Quality, Customers, Suppliers and Processes, Total Quality Management (TQM), Quality Principles of Total Quality Management, Quality Management Through Statistical Process Control, Quality Management Through Cultural Changes, Continual (Continuous) Improvement Cycle, Quality in Different Areas, Benchmarking and Metrics, Problem Solving Techniques, Problem Solving Software Tools.	07	Software Testing: Principles, Techniques and Tools M. G. Limaye	power point,google meet
	Software Quality: Introduction, Constraints of Software Product Quality Assessment, Customer is a King, Quality and Productivity Relationship, Requirements of a Product, Organisation Culture, Characteristics of Software, Software Development Process, Types of Products, Schemes of Criticality Definitions, Problematic Areas of Software Development Life	05	Software Testing: Principles, Techniques and Tools M. G. Limaye	power point,google meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Cycle, Software Quality Management, Why Software Has Defects?Processes Related to Software Quality, Quality Management System Structure, Pillars of Quality Management System, Important Aspects of Quality Management..			
USIT601 Software Quality Assurance UNIT-2	**Fundamentals of testing:** Introduction, Necessity of testing, What is testing? Fundamental test process, The psychology of testing,Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During Development Life Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench,Important Features of Testing Process, Misconceptions About Testing,Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning, Testing Process and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges in Testing, Test Team Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy, Methods	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	power point,google meet
	Structured Approach to Testing, Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies (Test Plan), Testing Process, Attitude Towards Testing (Common People Issues), Test Methodologies/Approaches, People Challenges in Software Testing, Raising Management Awareness for Testing, Skills Required by Tester, Testing throughout the software life cycle, Software development models, Test levels, Test types, the targets of testing, Maintenance testing	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	power point,google meet
USIT601 Software Quality	**Unit Testing: Boundary Value Testing:** Normal Boundary ValueTesting, Robust Boundary Value Testing, Worst-Case Boundary ValueTesting, Special Value Testing, Examples,	05	Software Testing: Principles,	power point,google meet

Assurance UNIT-3	Random Testing, Guidelines for Boundary Value Testing, **Equivalence Class Testing:** Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations.		Techniques and Tools M. G. Limaye	
	Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations, **Path Testing:** Program Graphs, DD-Paths, Test Coverage Metrics, Basis Path Testing, Guidelines and Observations,**Data Flow Testing:** Define/Use Testing, Slice-Based Testing,Program Slicing Tools.	07	Software Testing: Principles, Techniques and Tools M. G. Limaye	power point,google meet
USIT601 Software Quality Assurance UNIT-4	**Software Verification and Validation:**Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews on the basis od Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification, Validation, Validation Workbench, Levels of Validation,Coverage in Validation, Acceptance Testing, Management of Verification and Validation, Software development verification and validation activities	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	power point,google meet
	V-test Model: Introduction, V-model for software, Testing during Proposal stage, Testing during requirement stage, Testing during test planning phase, Testing during design phase, Testing during coding,VV Model, Critical Roles and Responsibilities.	06	Software Testing: Principles, Techniques and Tools M. G. Limaye	power point,google meet
USIT601 Software Quality Assurance	**Levels of Testing:** Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich Testing, Critical Path First, Sub System Testing, System Testing,	04	Software Testing: Principles, Techniques	power point,google meet

UNIT-5	Testing Stages.		and Tools M. G. Limaye	
	Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing,Regression Testing, Error Handling Testing, Manual Support Testing,Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing,Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing, Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph,Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage,Object Oriented Application Testing, Testing of Internal Controls COTS Testing, Client Server Testing, Web Application Testing,Mobile Application Testing, eBusiness eCommerce Testing, Agile Development Testing, Data Warehousing Testing.	08	Software Testing: Principles, Techniques and Tools M. G. Limaye	power point,google meet

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:T.Y.BSC(I.T) DIV-B SEMESTER: **VI** MONTH: JANUARY ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to : To create more awareness about cyber legal issues and challenges.

To provide advice, inputs as also guidance to students on their day-to-day legal issues concerning the use of cyberspace.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Cyber Laws Elective I USIT607 Unit-1	**Power of Arrest Without Warrant Under the IT Act, 2000:** A Critique, Crimes of this Millennium, Section 80 of the IT Act, 2000 – A Weapon or a Farce?	1	Cyber Law Simplified - Vivek Sood	Powerpoint Presentation, Google classroom, Google Meet
	Forgetting the Line Between Cognizable and Non-Cognizable Offences.	2		
	Necessity of Arrest without Warrant from Any Place, Public or Otherwise.	2		
	Check and Balances Against Arbitrary Arrests,Arrest for "About to Commit" an Offence Under the IT Act: A Tribute to Draco, Arrest, But NO Punishment!	2		
	Cyber Crime and Criminal Justice: Penalties, Adjudication and Appeals Under the IT Act,2000: Concept of "Cyber Crime " and the IT Act , 2000, Hacking.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Teenage Web Vandals, Cyber Fraud and Cyber Cheating, Virus on the Internet,Defamation, Harassment and Email Abuse, Cyber Pornography, Other IT Act Offences	2		
	. Monetary Penalties, Adjudication and Appeals Under IT Act , 2000, Network Service Providers, Jurisdiction and Cyber Crime.	2		
	Nature of Cyber Criminality, Strategies to Tackle Cyber Crime and Trends, Criminal Justice in India and Implications on Cyber Crime.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	15		
Cyber Laws Elective I USIT607 Unit-2	**Contracts in the Infotech World:** Contracts in the Infotech World, Click-Wrap and Shrink-Wrap Contract: Status under the Indian Contract Act, 1872.	2	Cyber Law Simplified - Vivek Sood	Powerpoint Presentation, Google classroom, Google Meet
	Contract Formation Under the Indian Contract Act, 1872, Contract Formation on the Internet.	2		
	Terms and Conditions of Contracts.	1		
	Jurisdiction in the Cyber World: Questioning the Jurisdiction and Validity of the Present Law of Jurisdiction, Civil Law of Jurisdiction in India.	2		
	Cause of Action, Jurisdiction and the Information Technology Act,2000.	2		
	Foreign Judgements in India, Place of Cause of Action in	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Contractual and IPR Disputes.			
	Exclusion Clauses in Contracts, Abuse of Exclusion Clauses, Objection of Lack of Jurisdiction, Misuse of the Law of Jurisdiction.	2		
	Legal Principles on Jurisdiction in the United State of America, Jurisdiction Disputes w.r.t. the Internet in the United State of America.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS: T.Y. BSc (IT) DIV-C SEMESTER:SEM -5 MONTH: JUN-SEPT ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:

The learners will be able to :

- Understand what is a The Internet of Things and its applications .
- Introduction of Prototyping the Physical Design and online design.
- Understand different techniques of Prototyping.
- Learn the concept of automation.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT502 Internet Of Things UNIT 1	**The Internet of Things:** An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	Laptop, power point, jamboard
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	4		
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses,	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols.			
USIT502 Internet Of Things UNIT 2	**Thinking About Prototyping**: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation	4	1.Designing the Internetof Things Adrian McEwen, Hakim Cassimally WILEY First 2014 , 2.Internet of Things – Architecture and Design Raj Kamal McGraw Hill First 201	Laptop, power point, jamboard
	Climbing into the Cloud Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community	4		
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness	4		
USIT502 Internet Of Things	**Prototyping the Physical Design:** Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling.	5	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Prototyping Online Components**: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further	3		Laptop, power point, jamboard
	Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol.	4		
USIT502 Internet Of Things UNIT 4	**Techniques for Writing Embedded Code:** Memory Management,Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging.	5	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	Laptop, power point, jamboard
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models	3		
	Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	4		
USIT502	**Moving to Manufacture:** What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design	5	1.DesigningtheInternetof Things Adrian McEwen, Hakim Cassimally WILEY First 2014 ,	

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Internet Of Things UNIT 5	Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures.		2.Getting Started with Raspberry Pi Matt Richardson and Shawn Wallace SPD Third 2016	Laptop, power point, jamboard
	Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	3		
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control, Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SURBHI SHAH DEPARTMENT: IT-CS CLASS:FYIT-DIV B SEMESTER: SEM-1

MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S: The learners will be able to learn and understand the basic concepts of digital electronics with its applications and various laws to be implemented in area of electronics.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper no :2 Title of paper: - Digital Electronics UNIT 1	**Number System:** Analog System, digital system, numbering system, binary number system, octal number system, hexadecimal number system, conversion from one number system to another, floating point numbers	4	Digital Electronics and Logic Design By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC, JAMBOARD,
	weighted codes binary coded decimal, non-weighted codes Excess – 3 code, Gray code, Alphanumeric codes – ASCII Code, EBCDIC, ISCII Code, Hollerith Code, Morse Code, Teletypewriter (TTY)	3		
	Error detection and correction, Universal Product Code, Code conversion.	1		
	Binary Arithmetic Binary addition, Binary subtraction, Negative number representation, Subtraction using 1's complement and 2's complement	2		
	Binary multiplication and division, Arithmetic in octal number system, Arithmetic in hexadecimal number system BCD and Excess – 3 arithmetic	2		
UNIT 2	**Boolean Algebra and Logic Gates:-**Introduction, Logic (AND OR NOT), Boolean theorems, Boolean Laws, De Morgan's Theorem,	3	Digital Electronics and Logic Design	POWERPOINT PRESENTATION,

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Perfect Induction, Reduction of Logic expression using BooleanAlgebra,		By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	GOOGLE MEET,LAPTOP OR PC, JAMBOARD,
	Deriving Boolean expression from given circuit, exclusive OR and Exclusive NOR gates, Universal Logic gates,	2		
	Implementation of other gates using universal gates, Input bubbled logic, Assertion level	1		
	Minterm, Maxterm and Karnaugh Maps: Introduction, minterms and sum of minterm form, maxterm and Product of maxterm form, Reduction technique using Karnaugh maps – 2/3/4/5/6 variable K-maps Grouping of variables in K-maps, K-maps for product of sum form, minimize Boolean expression using K-map and obtain K-map from Boolean expression, Quine Mc Cluskey Method.	6		
UNIT 3	**Combinational Logic Circuits:** Introduction, Multi-input, multi-output Combinational circuits, Code converters design and implementations	4	Digital Electronics: Principles, Devices and Applications by Anil K. Maini	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC, JAMBOARD,
	Arithmetic Circuits: Introduction, Adder, BCD Adder, Excess – 3 Adder, Binary Subtractors, BCD Subtractor, Multiplier, Comparator.	4		
Unit 4	**Multiplexer, Demultiplexer, ALU, Encoder and Decoder:** Introduction, Multiplexer, Demultiplexer, Decoder, ALU, Encoders.	4	Modern Digital Electronics - R. P. Jain	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC, JAMBOARD,
	Sequential Circuits: Flip-Flop: Introduction, Terminologies used, S-R flip-flop, D flip-fop, JK flip-flop, Race-around condition, Master – slave JK flip-flop, T flip-flop	4		
	conversion from one type of flip-flop to another, Application of flip-flops	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 5	**Counters:** Introduction, Asynchronous counter, Terms related to counters, IC 7493 (4-bit binary counter), Synchronous counter,	3	Modern Digital Electronics - R. P. Jain	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC, JAMBOARD,
	Bushing, Type T Design, Type JK Design, Presettable counter, IC 7490, IC 7492, Synchronous counter ICs, Analysis of counter circuits	4		
	Shift Register: Introduction, parallel and shift registers, serial shifting, serial–in serial–out, serial–in parallel–out , parallel–in parallel–out,	3		
	Ring counter, Johnson counter, Applications of shift registers,	1		
	Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters.	1

NAME OF THE STAFF: ____ HEMANT WANI_ DEPARTMENT: _____BSC-IT___ CLASS: __FYIT (C)__ SEMESTER: ___I_____

MONTH: ____October_____ ACADEMIC YEAR: ____2020-21__

LEARNING OBJECTIVE/S: The learners will be able to: Think analytically, creatively and critically in developing robust, extensible and highly maintainable technological solutions to simple and complex problems. To apply their knowledge and skills to be employed and excel in IT professional careers and/or to continue their education in IT and/or related post graduate programs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Imperative Programming USIT101 Unit 1	**Introduction**: Types of Programming languages, History, features and application. Simple program logic, program development cycle, pseudocode statements and flowchart symbols sentinel value to end a program, evolution of programming models., desirable program characteristics. **Fundamentals**: Structure of a program. Compilation and Execution of a Program, Character Set, identifiers and keywords. Data types, constants, variables and arrays, declarations, expressions, statements, Variable definition, symbolic constants	3 3 3 3	Yashwant Kanetkar 'Let us C'	Google Meet and Power point

Imperative Programming USIT101 Unit 2	**Operators and Expressions:** Arithmetic operators, unary operators, relational and logical operators, assignment operators, assignment operators, the conditional operator, library functions. **Data Input and output:** Single character input and output, entering input data, scanf function, printf function, gets and puts functions, interactive programming.	4 4 2 2	Yashwant Kanetkar 'Let us C'	Google Meet and Power point

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: __12_____

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: ARPITA BANERJEE DEPARTMENT: IT-CS

CLASS: FYIT-DIV A SEMESTER: I MONTH: OCT-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: Develop basic understanding of Operating System, the concept of Memory management, File System, I/O System, Deadlock. Also they will be able to know new concepts like virtualization and cloud computing. Finally through case studies they can have practical knowledge on different types of OS.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT103 Operating Systems I	**Introduction:** What is an operating system? History of operating system, computer hardware .	3	Modern Operating Systems by Andrew S. Tanenbaum	GoogleMeet & PowerPoint Presentation
	Different operating systems, operating system concepts, system calls, operating system structure.	3		
	Processes and Threads: Processes, Threads, Interprocess-communication.	3		
	Scheduling, IPC problems.	3		
II	**Memory Management**: No memory abstraction, memory abstraction: address spaces, virtual memory.	3	Modern Operating Systems by Andrew S. Tanenbaum	GoogleMeet & PowerPoint Presentation
	Page Replacement Algorithms, design issues for paging systems, implementation issues and segmentation.	3		
	File Systems: Files, directories, file system implementation, file-system management and optimization.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	MS-DOS file system, UNIX V7 file system, CD ROM file system.	3		
III	**Input-Output:** Principles of I/O hardware, Principles of I/O software, I/O software layers.	3	Modern Operating Systems by Andrew S. Tanenbaum	GoogleMeet & PowerPoint Presentation
	disks, clocks, user interfaces: keyboard, mouse, monitor, thin clients, power management Resources.	3		
	Deadlocks: Introduction to deadlocks, the ostrich algorithm, deadlock detection and recovery.	3		
	Deadlock avoidance, deadlock prevention, issues.	3		
IV	**Virtualization and cloud**: History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization.	2	Modern Operating Systems by Andrew S. Tanenbaum	GoogleMeet & PowerPoint Presentation
	Hypervisor microkernels, memory virtualization, I/O virtualization, Virtual appliances.	3		
	Virtual machines on multicore CPUs, Clouds.	2		
	Multiple Processor System: Multiprocessors, multicomputer, distributed systems.	5		
V	**Case Study on LINUX and ANDROID:** History of Unix and Linux, Linux Overview, Processes in Linux, Memory management in Linux, I/O in Linux, Linux file system, security in Linux.	4	Modern Operating Systems by Andrew S. Tanenbaum	GoogleMeet & PowerPoint Presentation
	Android	2		
	Case Study on Windows: History of windows through Windows 10, programming windows, system structure, processes and threads in windows.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Memory management, caching in windows, I/O in windows, Windows NT file system, Windows power management, Security in windows.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: FYIT SEMESTER: I MONTH: SEPT to DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

To understand the structure and operation of modern processors and their instruction sets.

To understand the basic of digital electronics needed for computers

To understand the basics of instruction set architecture for reduced and complex instruction sets.

To understand how data is transferred between the processor and I/O devices.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 Digital Electronics Unit 1	**Number System:** Analog System, digital system, numbering system, binary number system, octal number system, hexadecimal number system, conversion from one number system to another floating point numbers, weighted codes binary coded decimal, non-weighted codes Excess – 3 code, Gray code, Alphanumeric codes – ASCII Code EBCDIC, ISCII Code, Hollerith Code, Morse Code, Teletypewriter (TTY), Error detection and correction, Universal Product Code, Code conversion	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Laptop, PPT, Google Meet
	Binary Arithmetic: Binary addition, Binary subtraction, Negative number	6	Digital Electronics and	Laptop, PPT, Google Meet

	representation, Subtraction using 1's complement and 2's complement, Binary multiplication and division, Arithmetic in octal number system, Arithmetic in hexadecimal number system, BCD and Excess – 3 arithmetic		Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	
Paper-02 Digital Electronics Unit 2	**Boolean Algebra and Logic Gates:** Introduction, Logic (AND OR NOT), Boolean theorems, Boolean Laws, De Morgan's Theorem, Perfect Induction, Reduction of Logic expression using Boolean Algebra, Deriving Boolean expression from given circuit, exclusive OR and Exclusive NOR gates, Universal Logic gates, Implementation of other gates using universal gates, Input bubbled logic, Assertion level.	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Laptop, PPT, Google Meet
	Minterm, Maxterm and Karnaugh Maps: Introduction, minterms and sum of minterm form, maxterm and Product of maxterm form, Reduction technique using Karnaugh maps – 2/3/4/5/6 variable K-maps, Grouping of variables in K-maps, K-maps for product of sum form, minimize Boolean expression using K-map and obtain K-map from Boolean expression, Quine Mc Cluskey Method	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Laptop, PPT, Google Meet

Paper-02 Digital Electronics Unit 3	**Combinational Logic Circuits:** Introduction, Multi-input, multi-output Combinational circuits, Code converters design and implementations **Arithmetic Circuits:** Introduction, Adder, BCD Adder, Excess – 3 Adder, Binary Subtractors, BCD Subtractor, Multiplier, Comparator	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Laptop, PPT, Google Meet
Paper-02 Digital Electronics Unit 4	**Multiplexer, Demultiplexer, ALU, Encoder and Decoder:** Introduction, Multiplexer, Demultiplexer, Decoder, ALU, Encoders.	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Laptop, PPT, Google Meet
	Sequential Circuits: Flip-Flop: Introduction, Terminologies used, S-R flip-flop, D flip-fop, JK flipflop, Race-around condition, Master – slave JK flip-flop, T flip-flop, conversion from one type of flip-flop to another, Application of flipflops.	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain	Laptop, PPT, Google Meet

			Tata McGraw Hill	
Paper-02 Digital Electronics Unit 5	**Counters:** Introduction, Asynchronous counter, Terms related to counters, IC 7493 (4-bit binary counter), Synchronous counter, Bushing, Type T Design, Type JK Design, Preset table counter, IC 7490, IC 7492, Synchronous counter ICs, Analysis of counter circuits.	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Laptop, PPT, Google Meet
	Shift Register: Introduction, parallel and shift registers, serial shifting, serial–in serial– out, serial–in parallel–out , parallel–in parallel–out, Ring counter, Johnson counter, Applications of shift registers, Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters	6	Digital Electronics and Logic Design N.G. Palan Technova, and Modern Digital Electronics R.P.Jain Tata McGraw Hill	Laptop, PPT, Google Meet

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:FYIT-DIV B SEMESTER: SEM-I MONTH: SEP-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: Understand role of Operating System in terms of process, memory, file and I/O management. Apply and analysis the concept of a process, thread, mutual exclusion and deadlock. Evaluate performance of process scheduling algorithms and IPC. Apply and analysis the concepts of memory management techniques. Apply and analyze different techniques of file and I/O management.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-3, OS, UNIT-1	**Introduction:** What is an operating system? History of operating system, computer hardware, different operating systems, operating system concepts, system calls, operating system structure.	4	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	PPT, GoogleMeet, Jamboard ,slido.
	Processes and Threads: Processes, threads	4		
	Interprocess communication, scheduling, IPC problems.	4		
UNIT-2	**Memory Management**: No memory abstraction, memory abstraction: address spaces, virtual memory	3	Modern Operating Systems-by Andrew S.	PPT, GoogleMeet,
	page replacement algorithms, design issues for paging systems, implementation issues, segmentation.	3		

	File Systems: Files, directories, file system implementation, file-system management and optimization	4	Tanenbaum, Herbert Bos	Jamboard , Slido.
	MS-DOS file system, UNIX V7 file system, CD ROM file system.	2		
UNIT-3	**Input-Output:** Principles of I/O hardware, Principles of I/O software	4	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	PPT, GoogleMeet, Jamboard , Google form.
	I/O software layers, disks, clocks, user interfaces: keyboard, mouse, monitor, thin clients, power management	3		
	Deadlocks: Resources, introduction to deadlocks, the ostrich algorithm,	2		
	deadlock detection and recovery, deadlock avoidance, deadlock prevention, issues.	3		
UNIT-4	**Virtualization and Cloud**: History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization, hypervisor microkernels	2	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	PPT, GoogleMeet, Jamboard .
	memory virtualization, I/O virtualization, Virtual appliances, virtual machines on multicore CPUs, Clouds.	2		
	Multiple Processor Systems : Multiprocessors	3		
	Multicomputers, Distributed systems.	5		

UNIT 5	**Case Study on LINUX and ANDROID:** History of Unix and Linux, Linux Overview, Processes in Linux	3	Modern Operating Systems-by Andrew S. Tanenbaum, Herbert Bos	PPT, GoogleMeet, Jamboard .
	Memory management in Linux, I/O in Linux, Linux file system, security in Linux. Android.	3		
	Case Study on Windows: History of windows through Windows 10, programming windows, system structure, processes and threads in windows	3		
	memory management, caching in windows, I/O in windows, Windows NT file system, Windows power management, Security in windows.	3

5 COMMUNICATION SKILLS UNIT 2	**Writing Business Messages and Documents:** Business writing, Business Correspondence,	3	Business Communication Edited by Meenakshi Raman and Prakash Singh	GOOGLE MEET AND PPT
	Instructions Business Reports and Proposals, Career building and	4		
	Resume writing. **Developing Oral Communication Skills for Business:** Effective Listening, Business Presentations and	3		
	Public Speaking ,Conversations, Interviews	3		
UNIT 3	**Developing Oral Communication Skills for Business:** Meetings and Conferences,	3	Business Communication Edited by Meenakshi Raman and Prakash Singh	BLACK BOARD AND CHALK
	Group Discussions *and*	2		
	Team Presentations, Team Briefing,	3		
	Understanding Specific Communication Needs: Communication across Functional Areas	3		
UNIT 4	**Understanding Specific Communication Needs:** Corporate Communication,	2	Business Communication Edited by Meenakshi Raman and	GOOGLE MEET AND PPT
	Persuasive Strategies in Business Communication,	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Ethics in Business Communication, Business Communication Aids	3	Prakash Singh	
UNIT 5	**Presentation Process:** Planning the presentations, executing the presentations, Impressing the audience by performing,	3	Business Communication Edited by Meenakshi Raman and Prakash Singh	GOOGLE MEET AND PPT
	Planning stage: Brainstorming, mind maps / concept maps,	3		
	executing stage: chunking theory, creating outlines, Use of templates	3		
	Adding graphics to your presentation: Visual communication, Impress stage: use of font, colour, layout, Importance of practice and performance.	2

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS:FYIT-DIV C SEMESTER: SEM-1 MONTH: SEP-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- To able to learn and understand the basic concepts of digital electronics with its applications and various laws to be implemented in area of electronics.
- To think analytically, creatively and critically in developing robust, extensible and highly maintainable technological solutions to simple and complex problems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT102 Digital Electronics UNIT 1	**Number System:** Analog System, digital system, numbering system, binary number system, octal number system, hexadecimal number system, conversion from one number system to another, floating point numbers	4	Digital Electronics and Logic Design By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	Laptop, power point, jamboard
	weighted codes binary coded decimal, non-weighted codes Excess – 3 code, Gray code, Alphanumeric codes – ASCII Code, EBCDIC, ISCII Code, Hollerith Code, Morse Code, Teletypewriter (TTY) Error detection and correction, Universal Product Code, Code conversion	4		
	Binary Arithmetic Binary addition, Binary subtraction, Negative number representation, Subtraction using 1's complement and 2's complement	2		
	Binary multiplication and division, Arithmetic in octal number system, Arithmetic in hexadecimal number system BCD and Excess – 3 arithmetic	2		
USIT102	**Boolean Algebra and Logic Gates:-**Introduction, Logic (AND OR NOT), Boolean theorems, Boolean Laws, De Morgan's Theorem,	3	Digital Electronics and Logic Design	

Digital Electronics UNIT 2	Perfect Induction, Reduction of Logic expression using Boolean Algebra,		By N. G. Palan And Digital Electronics: Principles, Devices and Applications by Anil K. Maini	Laptop, power point, jamboard
	Deriving Boolean expression from given circuit, exclusive OR and Exclusive NOR gates, Universal Logic gates, Implementation of other gates using universal gates, Input bubbled logic, Assertion level, Implementation of other gates using universal gates, Input bubbled logic, Assertion level	3		
	Minterm, Maxterm and Karnaugh Maps: Introduction, minterms and sum of minterm form, maxterm and Product of maxterm form, Reduction technique using Karnaugh maps – 2/3/4/5/6 variable K-maps Grouping of variables in K-maps, K-maps for product of sum form, minimize Boolean expression using K-map and obtain K-map from Boolean expression, Quine Mc Cluskey Method.	6		
USIT102 Digital Electronics UNIT 3	**Combinational Logic Circuits:** Introduction, Multi-input, multi-output Combinational circuits, Code converters design and implementations	6	Digital Electronics: Principles, Devices and Applications by Anil K. Maini	Laptop, power point, jamboard
	Arithmetic Circuits: Introduction, Adder, BCD Adder, Excess – 3 Adder, Binary Subtractors, BCD Subtractor, Multiplier, Comparator.	6

NAME OF THE STAFF: **SUJITHA MOHAN** DEPARTMENT: **B.Sc.I.T**

CLASS: **FYIT C** SEMESTER: **I** MONTH: **Sep-Dec** ACADEMIC YEAR: **2020-2021**

LEARNING OBJECTIVES:
The learners will be able to :

- Understand the basics concept of Digital circuit which includes MUX, DEMUX, Flip flops, counters etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
II,4, Digital Electronics	Multiplexer, Demultiplexer, ALU, Encoder and Decoder: Introduction, Multiplexer, Demultiplexer, Decoder, ALU, Encoders	4	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Meet, PPT
	Sequential Circuits: Flip-Flop: Introduction, Terminologies used, S-R flip-flop, D flip-fop	4	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Meet, PPT
	JK flipflop, Race-around condition, Master – slave JK flip-flop, T flip-flop, conversion from one type of flip-flop to another, Application of flipflops.	4	Digital Principles and Applications Malvino and Leach Tata McGraw Hill	Meet, PPT
II,5, Digital Electronics	Counters: Introduction, Asynchronous counter, Terms related to counters, IC7493	3	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Meet, PPT

	(4-bit binary counter),			
	Synchronous counter, Bushing, Type T Design, Type JK Design, Presettable counter, IC 7490, IC 7492, Synchronous counter ICs, Analysis of counter circuits.	3	Digital Principles and Applications Malvino and Leach Tata McGraw Hill	Meet, PPT
	Shift Register: Introduction, parallel and shift registers, serial shifting, serial–in serial–out, serial–in parallel–out , parallel–in parallel–out,	2	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Meet, PPT
	Ring counter, Johnson counter, Applications of shift registers, Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters.	2	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Meet, PPT
	Pseudo-random binary sequence generator, IC7495, Seven Segment displays, analysis of shift counters.	2	Modern Digital Electronics R. P. Jain Tata McGraw Hill 3rd	Meet, PPT

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: FY BSC IT SEMESTER: I MONTH: SEP-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

The learners will be able to:

1. Learners must understand proper working of operating system.
2. To provide a sound understanding of Computer operating system, its structures, functioning and algorithms.
3. To provide a understanding of operating system, its structures and functioning.
4. Develop and master understanding of algorithms used by operating systems for various purposes.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 3 OS UNIT 1	What is an operating system? History of operating system, computer hardware, different operating systems	2	Modern Operating Systems by Andrew S. Tanenbaum, Herbert Bos	Power Point Presentation
	Operating system concepts, system calls, operating system structure	3		
	Processes, threads	4		
	Interprocess communication, scheduling, IPC problem	4		

UNIT 4	History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization.	3	Modern Operating Systems by Andrew S. Tanenbaum, Herbert Bos	PowerPoint Presentation
	Hypervisor microkernels, memory virtualization, I/O virtualization, Virtual appliances.	3		
	Virtual machines on multicore CPUs, Clouds.	2		
	Multiprocessors, multicomputer, distributed systems.	4		
UNIT 5	History of Unix and Linux, Linux Overview, Processes in Linux, Memory management in Linux, I/O in Linux.	3	Modern Operating Systems by Andrew S. Tanenbaum, Herbert Bos	PowerPoint Presentation
	Linux file system, security in Linux. Android, History of windows through Windows 10, programming windows.	3		
	System structure, processes and threads in windows, Memory management, caching in windows, I/O in windows.	3		
	Windows NT file system, Windows power management, Security in windows.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MONIKA MADHUKAR RAUT DEPARTMENT: IT/CS

CLASS: SYIT-A SEMESTER: III MONTH: AUGUST TO DECEMBER ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to learn different structures of data, their operations and algorithms.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
DATA STRUCTURES (USIT302) Unit II	**Linked List:** Introduction to Subject, Syllabus, Linked List, One-way Linked List, Traversal of Linked List, Searching, Memory Allocation and De-allocation, Insertion in Linked List, Deletion from Linked List, Copying a List into Other List, Merging Two Linked Lists, Splitting a List into Two Lists, Reversing One way linked List, Circular Linked List, Applications of Circular Linked List	6	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	PPT
	Two way Linked List, Traversing a Two way Linked List, Searching in a Two way linked List, Insertion of an element in Two way Linked List, Deleting a node from Two way Linked List, Header Linked List, Applications of the Linked list, Representation of Polynomials, Storage of Sparse Arrays, Implementing other Data Structures	6	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	PPT
DATA STRUCTURES (USIT302) Unit IV	**Sorting and Searching Techniques:** Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, Binary, Indexed Sequential Searches, Binary Search.	3	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	PPT
	Tree: Tree, Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary	6		PPT

	Tree, Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort			
	Advanced Tree Structures: Red Black Tree, Operations Performed on Red Black Tree, AVL Tree, and Operations performed on AVL Tree, 23 Tree, B-Tree.	3		PPT
DATA STRUCTURES (USIT302) Unit V	**Hashing Techniques** Hash function, Address calculation techniques, Common hashing functions Collision resolution, Linear probing, Quadratic, Double hashing, Bucket hashing, Deletion and rehashing	6	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	PPT, Table-Top
	Graph: Introduction, Graph, Graph Terminology, Memory Representation of Graph, Adjacency Matrix Representation of Graph, Adjacency List or Linked Representation of Graph, Operations Performed on Graph, Graph Traversal, Applications of the Graph, Reachability, Shortest Path Problems, Spanning Trees	6		PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: SYIT

SEMESTER: III MONTH: SEPT-DEC ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Get deep knowledge about different types of data structures and also the importance of algorithm and its complexity.
- Understand the use of array and different types of linked list.
- Learn about stack, stack operations, queue and different types of it.
- Understand the use of different sorting and searching techniques.
- Learn about graph theory and different types of hashing techniques.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT302, Data Structures, Unit I	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Array: Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General MultiDimensional Arrays, Sparse Arrays, Sparse Matrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

USIT302, Data Structures, Unit III	**Stack**: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue, Some special kinds of queues, Deque, Priority Queue, Application of Priority Queue, Applications of Queues.	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
USIT302, Data Structures, Unit V	**Sorting and Searching Techniques** Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, Binary, Indexed Sequential Searches, Binary Search.	04	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Tree: Tree, Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary Tree, Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort.	05	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Advanced Tree Structures: Red Black Tree, Operations Performed on Red Black Tree, AVL Tree, Operations performed on AVL Tree, 23 Tree, B-Tree	03	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHARVARI PATIL DEPARTMENT: IT CLASS: S.Y.I.T SEMESTER: III

MONTH: JUNE TO SEPTEMBER ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the importance of python programming.
- Gain knowledge about function declaration and function call.
- Learn about various data structures used in python.
- Understand the use of regular expressions.
- Learn GUI development using python programming.

Paper No.,Paper Title, Unit No.	**Sub Topics:**	**No.of Lectures**	**References**	**Teaching Method/ICT tools used**
USIT301 Python Programming Unit 1	Introduction:The Python Programming Language, History, features, Installing Python, Running Python program, Debugging : Syntax Errors, Runtime Errors, Semantic Errors, Experimental Debugging, Formal and Natural Languages, The Difference Between Brackets, Braces, and Parentheses	4	Reference book: "Think Python"	Google Meet, Google Classroom, Google Slides
	Variables and Expressions:Values and Types, Variables, Variable Names and Keywords, Type conversion, Operators and Operands, Expressions, Interactive Mode and Script Mode	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Conditional Statements:if, if-else, nested if –else	2		
	Looping:for, while, nested loops	1		
	Control statements: Terminating loops, skipping specific conditions	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming	Functions: Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions, Definitions and Uses, Flow of Execution, Parameters and Arguments, Variables and Parameters Are Local, Stack Diagrams, Fruitful Functions and Void Functions, Why Functions? Importing with from, Return Values, Incremental Development, Composition, Boolean Functions, More Recursion, Leap of Faith, Checking Types	4 4	Reference book: "Think Python"	Google Meet, Google Classroom, Google Slides
Unit 2	Strings: A String Is a Sequence, Traversal with a for Loop, String Slices, Strings Are Immutable, Searching, Looping and Counting, String Methods, The in Operator, String Comparison, String Operations.	2 2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301	Lists: Values and Accessing Elements, Lists are mutable, traversing a List, Deleting elements from List, Built-in List Operators, Concatenation, Repetition, In Operator, Built-in List functions and methods	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Python Programming Unit 3	Tuples and Dictionaries: Tuples, Accessing values in Tuples, Tuple Assignment, Tuples as return values, Variable-length argument tuples, Basic tuples operations, Concatenation, Repetition, in Operator, Iteration, Built-in Tuple Functions	3	Reference book: "Think Python"	Google Meet, Google Classroom, Google Slides
	Creating a Dictionary, Accessing Values in a dictionary, Updating Dictionary, Deleting Elements from Dictionary, Properties of Dictionary keys, Operations in Dictionary, Built-In Dictionary Functions, Built-in	3		
	Dictionary Methods Files: Text Files, The File Object Attributes, Directories	1		
	Exceptions: Built-in Exceptions, Handling Exceptions, Exception with Arguments, User-defined Exceptions	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming Unit 4	Regular Expressions – Concept of regular expression, various types of regular expressions, using match function.	4	Reference book: "Think Python"	Google Meet, Google Classroom, Google Slides
	Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding	4		
	Multithreaded Programming: Thread Module, creating a thread, synchronizing threads, multithreaded priority queue	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming Unit 5	Creating the GUI Form and Adding Widgets: Widgets: Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets.	4	Reference book: "Think Python"	Google Meet, Google Classroom, Google Slides
	Layout Management: Designing GUI applications with proper Layout Management features.	2		
	Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets.	2		
	Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database	4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**

NAME OF THE STAFF: NESSIE ROBERT COLACO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:S.Y.BSC(I.T) DIV-B SEMESTER: **III** MONTH:AUG-DEC ACADEMIC YEAR: 2020-2021

SUBJECT:COMPUTER NETWORKS

LEARNING OBJECTIVE/S:
The learners will be able to : The **course objectives** include **learning** about **computer network** organization and implementation, obtaining a theoretical understanding of data communication and **computer networks**, and gaining practical experience in installation, monitoring, and troubleshooting of current LAN systems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
COMPUTER NETWORKS USIT303 Unit-2	**Bandwidth Utilization:** Multiplexing and SpectrumSpreading: Multiplexing, Spread Spectrum	5	Data Communication and Networking Behrouz A. Forouzan Tata McGraw Hill	PowerPoint Presentation, google classroom, google meet
	Transmission media: Guided Media, Unguided Media	4		
	Switching: Introduction, circuit switched networks, packet switching, structure of a switch.	5		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction to the Data Link Layer:Link layer addressing, Data Link Layer Design Issues, Error detection and correction, block coding, cyclic codes, checksum, forward error correction, error correcting codes, error detecting codes.	5	Fifth Edition 2013	
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**19**		
COMPUTER NETWORKS USIT303 Unit-3	**Data Link Control:**DLC services, data link layer protocols, HDLC, Point-to-point protocol.	5	Data Communication and Networking Behrouz A. Forouzan Tata McGraw Hill Fifth Edition	PowerPoint Presentation, google classroom, google meet
	Media Access Control: Random access, controlled access, channelization, Wired LANs – Ethernet Protocol, standard ethernet, fast ethernet, gigabit ethernet, 10 gigabit ethernet,	5		
	Wireless LANs: Introduction, IEEE 802.11 project, Bluetooth, WiMAX, Cellular telephony, Satellite networks.	3		
	Connecting devices and Virtual LANs.	3		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**16**		
COMPUTER NETWORKS USIT303 Unit-4	**Introduction to the Network Layer:** Network layer services, packet switching, network layer performance, IPv4 addressing, forwarding of IP packets, Internet Protocol, ICMPv4, Mobile IP	5	Data Communication and Networking	

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Unicast Routing:Introduction, routing algorithms, unicast routing protocols.	4	Behrouz A. Forouzan Tata McGraw Hill Fifth Edition	
	Next generation IP: IPv6 addressing, IPv6 protocol, ICMPv6 protocol, transition from IPv4 to IPv6.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Dr.Sampada Deshmukh DEPARTMENT: Information Technology

CLASS:S.Y.B.Sc.(I.T) SEMESTER: III MONTH:AUGUST-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the basics of Data Communication and concept of networking
- Understand the concept of Analog and Digital Signal.
- Understand the Network Model and their working for data transmission.
- Learn conversion of digital to analog and vice-versa.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Computer Networks Unit 1	**Introduction**: Data communications, networks, network types, Internet history,standards and administration.	4	Data Communication and Networking By Behrouz A. Forouzan	PPT , Google Meet
	Network Models:Protocol layering, TCP/IP protocol suite, The OSI model.	2	Data Communication and Networking By Behrouz A. Forouzan	PPT , Google Meet
	Introduction to Physical layer:Data and signals, periodic analog signals, digital signals, transmission impairment, data rate limits, performance.	3	Data Communication and Networking By Behrouz A. Forouzan	PPT , Google Meet

	Digital and Analog transmission: Digital-to-digital conversion, analog-to-digital conversion, transmission modes, digital-to-analog conversion, analog-to-analog conversion.	3	Data Communication and Networking By Behrouz A. Forouzan	PPT , Google Meet

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT: CS

CLASS: SY BSc IT DIV-B(DBMS) SEMESTER:SEM 3 MONTH: AUG-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- The learners will be able to : have a broad understanding of database concepts and database management system software
- have a high-level understanding of major DBMS components and their function
- be able to model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
- be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
- be able to program a data-intensive application using DBMS APIs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 4 DBMS UNIT 1	Introduction to Databases and Transactions What is database system, purpose of database system, view of data, relationaldatabases, database architecture, transaction management	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	PPT ,GOOGLE MEET
	Data Models The importance of data models, Basic building blocks, Business rules, The evolutionof data models, Degrees of data abstraction.	4		
	Database Design,ER Diagram and Unified Modeling Language Database design and ER Model:overview, ERModel, Constraints, ERDiagrams, ERDIssues, weak entity sets, Codd's rules, Relational Schemas, Introduction to UML	4		
	Relational database model: Logical view of data, keys, integrity rules,	3		PPT ,GOOGLE MEET

UNIT 2	Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF, BCNF).	3	DATABASE SYSTEM AND CONCEPTS BY H KORTH	
	Relational Algebra and Calculus Relational algebra: introduction, Selection and projection, set operations, renaming,Joins, Division, syntax, semantics	3		
	. Operators, grouping and ungrouping,relationalcomparison	2		
	Calculus: Tuple relational calculus, Domain relational Calculus, calculus vsalgebra,computational capabilities	4		
UNIT 3	Constraints, Views and SQL Constraints, types of constrains, Integrity constraints,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	PPT ,GOOGLE MEET
	Views: Introduction to views, data independence, security, updates on views,comparison between tables and views	4		
	SQL: data definition, aggregate function, Null Values, nested sub queries, Joined relations. Triggers	4		
UNIT 4	Transaction management and Concurrency Control Transaction management: ACID properties, serializability and concurrency control,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	PPT ,GOOGLE MEET
	Lock based concurrency control (2PL, Deadlocks),Time stamping methods,	4		
	optimistic methods, database recovery management.	4		
UNIT 5	PL-SQL: Beginning with PL / SQL,Identifiers and Keywords, Operators, Expressions, Sequences	4	PROGRAMMING WITH PL/SQL FOR BEGINNERS BY H. DAND,R. PATIL	PPT ,GOOGLE MEET
	,Control Structures, Cursors and Transaction,	4		
	Collections and composite data types, Procedures and Functions, Exceptions Handling ,Packages,With Clause and Hierarchical Retrieval,Triggers.	4

NAME OF THE STAFF: Miss Shilpa James Rodrigues

DEPARTMENT: IT

CLASS: S.Y.I.T.-B (Python)

SEMESTER: III

MONTH: Aug - Dec

ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S :
The learners will be able to :

- Understand why Python is a useful scripting language for developers.
- Learn how to design and program Python applications.
- Learn how to use lists, tuples, and dictionaries in Python programs.
- Write functions and pass arguments in Python also to read and write files in Python.
- Learn how to design object-oriented programs with Python classes.
- Use exception handling in Python applications for error handling
- Understand the basics of python GUI component and be able to create GUI based application.
- Create Python application that will manage user data with the knowledge of DBMS.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHARVARI PATIL DEPARTMENT: IT CLASS: S.Y.I.T (B) SEMESTER: III

MONTH: AUGUST TO DECEMBER ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the use of regular expressions.
- Learn GUI development using python programming.

Paper No.,Paper Title, Unit No.	**Sub Topics:**	**No.of Lectures**	**References**	**Teaching Method/ICT tools used**
USIT301 Python Programming Unit 4	Regular Expressions – Concept of regular expression, various types of regular expressions, using match function.	4	Reference book: "Think Python"	Google Meet, Google Classroom, Google Slides
	Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding	4		
	Multithreaded Programming: Thread Module, creating a thread, synchronizing threads, multithreaded priority queue	4		
	Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT301	Creating the GUI Form and Adding Widgets: Widgets: Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets.	4	Reference book: "Think Python"	Google Meet, Google Classroom, Google Slides
Python Programming	Layout Management: Designing GUI applications with proper Layout Management features.	2		
Unit 5	Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets.	2		
	Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database	4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**

MONTH: AUGUST – NOVEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: to be capable of managing complex IT projects with consideration of the human, financial and environmental factors. to work effectively as a part of a team to achieve a common stated goal.to adhere to the highest standards of ethics, including relevant industry and organizational codes of conduct.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER:-III TITLE:-Computer Networks UNIT 1	**Introduction:** Data communications, networks, network types, Internet history, standards and administration.	3	Data Communication and Networking By Behrouz A. Forouzan	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC.
	Network Models: Protocol layering, TCP/IP protocol suite, The OSI model.	3		
	Introduction to Physical layer: Data and signals, periodic analog signals, digital signals, transmission impairment, data rate limits, performance.	3		
	Digital and Analog transmission: Digital-to-digital conversion, analog-to-digital conversion, transmission modes, digital-to-analog conversion, analog-to-analog conversion.	3		
UNIT 2	**Bandwidth Utilization: Multiplexing and Spectrum Spreading:** Multiplexing, Spread Spectrum	3	Data Communication and Networking By Behrouz A.	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC.
	Transmission media: Guided Media**,** Unguided Media	4		
	Switching: Introduction, circuit switched networks, packet switching, structure of a switch.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction to the Data Link Layer: Link layer addressing, Data Link Layer Design Issues, Error detection and correction, block coding, cyclic codes, checksum, forward error correction, error correcting codes, error detecting codes.	2/3	Forouzan	
UNIT 3	**Data Link Control:** DLC services, data link layer protocols, HDLC, Point-to-point protocol.	3	Data Communication and Networking By Behrouz A. Forouzan	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC.
	Media Access Control: Random access, controlled access, channelization, Wired LANs – Ethernet Protocol, standard ethernet, fast ethernet, gigabit ethernet, 10 gigabit ethernet,	3		
	Wireless LANs: Introduction, IEEE 802.11 project, Bluetooth, WiMAX, Cellular telephony, Satellite networks.	3		
	Connecting devices and Virtual LANs.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: SY BSc IT SEMESTER: SEM 3 MONTH: AUG-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

1. To have a broad understanding of database concepts and database management system software
2. To have a high-level understanding of major DBMS components and their function
3. To be able to model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
4. To be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
5. To be able to program a data-intensive application using DBMS APIs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 4 DBMS UNIT 1	Introduction to Databases and Transactions What is database system, purpose of database system, view of data, relational databases, database architecture, transaction management.	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Power Point Presentation
	Data Models The importance of data models, Basic building blocks, Business rules, The evolution of data models, Degrees of data abstraction.	4		
	Database Design, ER Diagram and Unified Modelling Language Database design and ER Model: overview, ER Model, Constraints, ER Diagrams, ERD Issues, weak entity sets, Codd's rules, Relational Schemas, Introduction to UML	4		
	Relational database model: Logical view of data, keys, integrity rules,	2		Power Point Presentation

UNIT 2	Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF, BCNF).	3	DATABASE SYSTEM AND CONCEPTS BY H KORTH	
	Relational Algebra and Calculus Relational algebra: introduction, Selection and projection, set operations, renaming, Joins, Division, syntax, semantics	3		
	Operators, grouping and ungrouping, relational comparison	2		
	Calculus: Tuple relational calculus, Domain relational Calculus, calculus vs algebra, computational capabilities	2		
UNIT 3	Constraints, Views and SQL Constraints, types of constrains, Integrity constraints,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Power Point Presentation
	Views: Introduction to views, data independence, security, updates on views, comparison between tables and views	4		
	SQL: data definition, aggregate function, Null Values, nested sub queries, Joined relations. Triggers	4		
UNIT 4	Transaction management and Concurrency Control Transaction management: ACID properties, serializability and concurrency control,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Power Point Presentation
	Lock based concurrency control (2PL, Deadlocks),Time stamping methods,	4		
	Optimistic methods, database recovery management.	4		
UNIT 5	PL-SQL: Beginning with PL / SQL, Identifiers and Keywords, Operators, Expressions, Sequences	4	PROGRAMMING WITH PL/SQL FOR BEGINNERS BY H. DAND,R. PATIL	Power Point Presentation
	,Control Structures, Cursors and Transaction,	4		
	Collections and composite data types, Procedures and Functions, Exceptions Handling, Packages with Clause and Hierarchical Retrieval, Triggers.	4

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**SY.B SC(IT)**_____ SEMESTER: ____**III**_____ MONTH: _____ **SEPTEMBER -DECEMBER** _____ ACADEMIC YEAR: _____**2020-2021**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand the concept of data structure and how it is stored. The varieties of symbols used to store data, analysis on data, algorithms used to reduced the complexity regarding time, space and programs. Understanding the concept of Arrays and operations on array, Stack and Queue and variation of operation on them. To make understand applications where it is used , advantages and disadvantages of operation. To enable to practically generate code for it and implement it for data storage.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 (USIT302) Data Structures **Unit No -01**	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Online Google Meet PPTs

Unit No -03	**Array**: Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General Multi-Dimensional Arrays, Sparse Arrays, SparseMatrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Online Google Meet PPTs Jamboard
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
	Stack: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Online Google Meet PPTs Jamboard
	Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue, Some special kinds of queues, Deque, Priority Queue, Application of Priority Queue, Applications of Queues.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Online Google Meet PPTs Jamboard

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: S.Y.B.Sc.IT SEMESTER: III MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

- Students should be able to understand the concepts of programming before actually starting to write programs.
- Students should be able to develop logic for Problem Solving.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-I Unit I Python Programming	**Introduction:** The Python Programming Language, History, features, Installing Python, Running Python program,	3	Think Python Allen Downey O'Reilly 1st2012	Google Meet, PPT
	Debugging : Syntax Errors, Runtime Errors, Semantic Errors, Experimental Debugging, Formal and Natural Languages, The Difference Between Brackets, Braces, and Parentheses,	3		Google Meet, PPT
	Variables and Expressions Values and Types, Variables, Variable Names and Keywords, Type conversion, Operators and Operands, Expressions, Interactive Mode and Script Mode, Order of Operations.	3		Google Meet, PPT
	Conditional Statements: if, if-else, nested if –else	1		Google Meet, PPT
	Looping: for, while, nested loops Control	1		Google Meet, PPT
	statements: Terminating loops, skipping specific conditions	1		Google Meet, PPT
Paper-I	**Functions:** Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions,	2	Think Python Allen Downey	Google Meet, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II Python Programming	Definitions and Uses, Flow of Execution, Parameters and Arguments, Variables and Parameters Are Local, Stack Diagrams, Fruitful Functions and Void Functions, Why Functions?	3	O'Reilly 1st2012	Google Meet, PPT
	Importing with from, Return Values, Incremental Development, Composition, Boolean Functions, More Recursion, Leap of Faith, Checking Types	3		Google Meet, PPT
	Strings: A String Is a Sequence, Traversal with a for Loop, String Slices, Strings Are Immutable, Searching, Looping and Counting, String Methods, The in Operator, String Comparison, String Operations	4		Google Meet, PPT
Paper-I Unit III Python Programming	**Lists:** Values and Accessing Elements, Lists are mutable, traversing a List, Deleting elements from List, Built-in List Operators, Concatenation, Repetition, In Operator, Built-in List functions and methods	4	Think Python Allen Downey O'Reilly 1st2012	Google Meet, PPT
	Tuples and Dictionaries: Tuples, Accessing values in Tuples, Tuple Assignment, Tuples as return values, Variable-length argument tuples, Basic tuples operations, Concatenation, Repetition, in Operator, Iteration, Built-in Tuple Functions Creating a Dictionary, Accessing Values in a dictionary, Updating Dictionary, Deleting Elements from Dictionary, Properties of Dictionary keys, Operations in Dictionary, Built-In Dictionary Functions, Built-in Dictionary Methods	4		Google Meet, PPT
	Files: Text Files, The File Object Attributes, Directories	2		Google Meet, PPT
	Exceptions: Built-in Exceptions, Handling Exceptions, Exception with Arguments, User-defined Exceptions	2		Google Meet, PPT
Paper-I Unit IV Python	**Regular Expressions –** Concept of regular expression, various types of regular expressions, using match function.	2	Think Python Allen Downey O'Reilly 1st2012	Google Meet, PPT
	Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding	4		Google Meet, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Programming	**Multithreaded Programming:** Thread Module, creating a thread, synchronizing threads, multithreaded priority queue	3		Blackboard, Chalk
	Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	3		Blackboard, Chalk
Paper-I Unit V Python Programming	**Creating the GUI Form and Adding Widgets:** **Widgets:** Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets.	4	Think Python Allen Downey O'Reilly 1st2012	Blackboard, Chalk
	Layout Management: Designing GUI applications with proper Layout Management features.	2		Blackboard, Chalk
	Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets.	2		Blackboard, Chalk
	Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database.	4		Blackboard, Chalk

NAME OF THE STAFF: DORIN REBELLO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: SYBSc(IT) DIV:B SEMESTER: III MONTH: AUGUST-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to : Understand the different types of data structures and develop programs to search and sort for elements.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: USIT302 unit:1, Title: Data Structures	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation.	5	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Array:Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General Multi-Dimensional Arrays, Sparse Arrays, SparseMatrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	7	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

Paper: USIT302 unit:2, Title: Data Structures	**Linked List:** Linked List, One-way Linked List, Traversal of Linked List, Searching, Memory Allocation and De-allocation, Insertion in Linked List, Deletion from Linked List, Copying a List into Other List, Merging Two Linked Lists, Splitting a List into Two Lists, Reversing One way linked List, Circular Linked List, Applications of Circular Linked List,	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Two way Linked List, Traversing a Two way Linked List, Searching in a Two way linked List, Insertion of an element in Two way Linked List, Deleting a node from Two way Linked List, Header Linked List, Applications of the Linked list, Representation of Polynomials, Storage of Sparse Arrays, Implementing other Data Structures.	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:3, Title: Data Structures	**Stack**: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	5	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue,Some special kinds of queues, Deque,Priority Queue, Application of Priority Queue, Applications of Queues.	7	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:4, Title:	**Sorting and Searching Techniques** Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, Binary, Indexed Sequential Searches, Binary Search.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

Data Structures	**Tree:**Tree,Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary Tree,Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Advanced Tree Structures: Red Black Tree, Operations Performed on Red Black Tree, AVL Tree, Operations performed on AVL Tree, 2-3 Tree, B-Tree.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:5, Title: Data Structures	**Hashing Techniques** Hash function, Address calculation techniques, Common hashing functions Collision resolution, Linear probing, Quadratic,Double hashing, Buckethashing, Deletion and rehashing	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Graph: Introduction, Graph, Graph Terminology, Memory Representation of Graph, Adjacency Matrix Representation of Graph, Adjacency List or Linked Representation of Graph, Operations Performed on Graph, GraphTraversal, Applications of the Graph, Reachability, Shortest Path Problems, Spanning Trees.	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DORIN REBELLO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: TYBSc(IT) Div:A SEMESTER: V MONTH: AUGUST-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to : Understand the importance of software project management, project evaluation and programme management was easy,to provide knowledge of step wise planning and monitoring, understand the importance of becoming a team and decision making and project closeout.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: USIT501 unit:1, Title: Software Project Management	**Introduction to Software Project Management**:Introduction, Why is Software Project Management Important? What is a Project? Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Success and Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus Modern Project Management Practices.	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
	Project Evaluation and Programme Management: Introduction,	4	Software Project Management	Online mode Google meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Business Case, Project Portfolio Management, Evaluation of Individual Projects, Cost–benefit Evaluation Techniques, Risk Evaluation, Programme Management, Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management.		Bob Hughes, Mike Cotterell, Rajib Mall	Google slides.
	An Overview of Project Planning:Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project Infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify Activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
Paper: USIT501 unit:4 Title: Software Project Management	**Monitoring and Control**: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM).	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance.	3	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
	Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns.	5	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
Paper: USIT501 unit:5, Title: Software Project Management	**Working in Teams:** Introduction, becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership.	4	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.
	Software Quality: Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability, Quality Plans.	5	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project Closeout Report.	3	Software Project Management Bob Hughes, Mike Cotterell, Rajib Mall	Online mode Google meet Google slides.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: August to December ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 Advance Web Programming UNIT-I	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning	PPT, Google meets.
	The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.	4		PPT, Google meets.
	Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types,	4		PPT, Google meets.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Understanding Namespaces and Assemblies, Advanced Class Programming.		Visual C# 2010	
USIT503 Advance Web Programming UNIT-II	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.	6	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	PPT, Google meets.
	Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	6		
USIT503 Advance Web Programming UNIT-IV	**ADO.NET Fundamentals**: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	PPT, Google meets.
	Data Binding: Introducing Data Binding, Using Single-Value Data Binding, Using Repeated-Value Data Binding, Working with Data Source Controls,	4		
	The Data Controls: The GridView, Formatting the GridView, selecting a GridView Row, Editing with the GridView, Sorting and Paging the GridView, Using GridView Templates, The DetailsView and FormView	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: TYIT

SEMESTER: V MONTH: AUG-DEC ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the Java EE Architecture, Server and Containers.
- Describe the different servlet API and lifecycle of servlet.
- Get the difference between cookies, session and request dispatcher.
- Understand the use of tag library, naming directory, interceptors.
- Familiar with java beans, JPA, hibernate and JSP.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506, Enterprise Java Unit I	**Understanding Java EE:** What is an Enterprise Application? What is java enterprise edition? Java EE Technologies, Java EE evolution, Glassfish server	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Java EE Architecture, Server and Containers: Types of System Architecture, Java EE Server, Java EE Containers.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Introduction to Java Servlets: The Need for Dynamic Content, Java Servlet Technology, Why Servlets? What can Servlets do?	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Shah, SPD, First, 2012	
	Servlet API and Lifecycle: Java Servlet API, The Servlet Skeleton, The Servlet Life Cycle, A Simple Welcome Servlet	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working With Servlets: Getting Started, Using Annotations Instead of Deployment Descriptor.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working with Databases: What Is JDBC? JDBC Architecture, Accessing Database, The Servlet GUI and Database Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
USIT506, Enterprise Java Unit II	**Request Dispatcher:** Resquestdispatcher Interface, Methods of Requestdispatcher, Requestdispatcher Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	COOKIES: Kinds Of Cookies, Where Cookies Are Used? Creating Cookies Using Servlet, Dynamically Changing The Colors Of A Page	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	SESSION: What Are Sessions? Lifecycle Of Http Session, Session Tracking With Servlet API, A Servlet Session Example	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working With Files: Uploading Files, Creating an Upload File Application, Downloading Files, Creating a Download File Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

	Working With Non-Blocking I/O: Creating a Non-Blocking Read Application, Creating The Web Application, Creating Java Class, Creating Servlets, Retrieving The File, Creating index.jsp	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
USIT506, Enterprise Java Unit III	**Introduction To Java Server Pages:** Why use Java Server Pages? Disadvantages Of JSP, JSP v\s Servlets, Life Cycle of a JSP Page, How does a JSP function? How does JSP execute? About Java Server Pages	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Getting Started With Java Server Pages: Comments, JSP Document, JSP Elements, JSP GUI Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Action Elements: Including other Files, Forwarding JSP Page to Another Page, Passing Parameters for other Actions, Loading a Javabean.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Implicit Objects, Scope And El Expressions: Implicit Objects, Character Quoting Conventions, Unified Expression Language [Unified El], Expression Language.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Java Server Pages Standard Tag Libraries: What is wrong in using JSP Scriptlet Tags? How JSTL Fixes JSP Scriptlet's Shortcomings? Disadvantages Of JSTL, Tag Libraries.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
USIT506, Enterprise Java Unit IV	**Introduction To Enterprise Javabeans:** Enterprise Bean Architecture, Benefits of Enterprise Bean, Types of Enterprise Bean, Accessing Enterprise Beans, Enterprise Bean Application, Packaging Enterprise Beans	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Working With Session Beans: When to use Session Beans? Types of Session Beans, Remote and Local Interfaces, Accessing	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali	Desktop and Laptop,Digital cameras,Microphone,Mobile

	Interfaces, Lifecycle of Enterprise Beans, Packaging Enterprise Beans, Example of Stateful Session Bean, Example of Stateless Session Bean, Example of Singleton Session Beans.		Shah, SPD, First, 2012	,Powerpoint
	Working with Message Driven Beans: Lifecycle of a Message Driven Bean, Uses of Message Driven Beans, The Message Driven Beans Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Interceptors: Request And Interceptor, Defining An Interceptor, AroundInvoke Method, Applying Interceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
USIT506, Enterprise Java Unit V	**Persistence, Object/Relational Mapping And JPA:** What is Persistence? Persistence in Java, Current Persistence Standards in Java, Why another Persistence Standards? Object/Relational Mapping,	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Introduction to Java Persistence API: The Java Persistence API, JPA, ORM, Database and the Application, Architecture of JPA, How JPA Works? JPA Specifications.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Writing JPA Application: Application Requirement Specifications, Software Requirements, The Application Development Approach, Creating Database And Tables in Mysql, Creating a Web Application, Adding the Required Library Files, Creating a Javabean Class, Creating Persistence Unit [Persistence.Xml], Creating JSPS, The JPA Application Structure, Running The JPA Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction to Hibernate: What is Hibernate? Why Hibernate? Hibernate, Database and The Application, Components of Hibernate, Architecture of Hibernate, How Hibernate Works?	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint
	Writing Hibernate Application: Application Requirement Specifications, Software Requirements, The Application Development Approach, Creating Database and Tables in Mysql, Creating a Web Application, Adding The Required Library Files, Creating a Javabean Class, Creating Hibernate Configuration File, Adding a Mapping Class, Creating JSPS, Running The Hibernate Application.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Desktop and Laptop,Digital cameras,Microphone,Mobile ,Powerpoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: TYIT SEMESTER: V MONTH: AUG to DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

To determine the market perspective of IoT

To compare and contrast the use of devices, gateways and Data management in IoT

To illustrate the applications of IoT in Industrial Automation and identify Real world design constraints.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 Internet Of Things Unit 3	**Prototyping the Physical Design:** Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling. Prototyping and Presence Protocol, Constrained Application Protocol.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet
	Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet
	Techniques for Writing Embedded Code: Memory	4	Designing the Internet of	Laptop, PPT, Google Meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper-02 Internet Of Things Unit 4	Management, 12 8 Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries, Debugging.		Things Adrian McEwen, Hakim Cassimally	
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	8	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet
Paper-02 Internet Of Things Unit 5	**Moving to Manufacture:** What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Laptop, PPT, Google Meet

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: INFORMATION TECHNOLOGY CLASS: TYIT-A

SEMESTER: V MONTH: AUGUST-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of open source operating system Linux, command line working, managing soft wares on Linux .
- Develop logic for connecting to network, giving permissions to users.
- Be familiar about the basic file sharing, setting iptables in linux .
- Apply the problem solving skills on high availability of cluster, installation of servers, bash shell scripting.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT505, Unit 1, Linux System Administration	Introduction to Red Hat Enterprise Linux: Linux, Open Source and Red Hat, Origins of Linux, Distributions, Duties of Linux System Administrator.	02	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Command Line: Working with the Bash Shell, Getting the Best of Bash, Useful Bash Key Sequences, Working with Bash History, Performing Basic File System Management Tasks, Working with Directories, Piping and Redirection, Finding Files.	03	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	System Administration Tasks: Performing Job Management Tasks, System and Process Monitoring and Management,	04	Red Hat Enterprise Linux6	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Managing Processes with ps, Sending Signals to Processes with the kill Command, using top to Show Current System Activity, Managing Process Niceness, Scheduling Jobs, Mounting Devices, Working with Links, Creating Backups, Managing Printers, Setting Up System Logging, Setting Up Rsyslog, Common Log Files, Setting Up Logrotate		Administration by Sander van Vugt	
	Managing Software: Understanding RPM, Understanding Meta Package Handlers, Creating Your Own Repositories, Managing Repositories,Installing Software with Yum, Querying Software, Extracting Files from RPM Packages	03	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
USIT505, Unit 2, Linux System Administration	Configuring and Managing Storage: Understanding Partitions and Logical Volumes, Creating Partitions, Creating File Systems, File Systems Overview, Creating File Systems, Changing File System Properties, Checking the File System Integrity, Mounting File Systems Automatically Through fstab, Working with Logical Volumes, Creating Logical Volumes, Resizing Logical Volumes, Working with Snapshots, Replacing Failing Storage Devices, Creating Swap Space, Working with Encrypted Volumes	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Connecting to the Network: Understanding NetworkManager, Working with Services and Runlevels, Configuring the Network with NetworkManager, Working with system-config-network, NetworkManager Configuration Files, Network Service Scripts, Networking from the Command Line, Troubleshooting Networking, Setting Up IPv6, Configuring SSH, Enabling the SSH Server, Using the SSH Client, Using PuTTY on Windows Machines, Configuring Key-Based SSH Authentication, Using Graphical Applications with SSH, Using SSH Port Forwarding, Configuring VNC Server Access	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Working with Users, Groups, and Permissions: Managing Users and Groups, Commands for User Management, Managing Passwords, Modifying and Deleting User Accounts, Configuration Files, Creating Groups, Using Graphical Tools for User, and Group Management, Using External Authentication Sources, the Authentication Process, sssd, nsswitch, Pluggable Authentication Modules, Managing Permissions, the Role of Ownership, Basic Permissions: Read, Write, and Execute, Advanced Permissions, Working with Access Control Lists, Setting Default Permissions with umask, Working with Attributes.	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
USIT505, Unit 3, Linux System Administration	Securing Server with iptables: Understanding Firewalls, Setting Up a Firewall with system-config-firewall, Allowing Services, Trusted Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule, Configuration Example, Advanced iptables Configuration, Configuring Logging, The Limit Module, Configuring NAT	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Setting Up Cryptographic Services: Introducing SSL, Proof of Authenticity: The Certificate Authority, Managing Certificates with openssl, Creating a Signing Request, Working with GNU Privacy Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys, Encrypting Files with GPG, GPG Signing, Signing RPM Files	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Configuring Server for File Sharing: What is NFS? Advantages and Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring Automount, Configuring Samba, Setting Up a Samba File Server, Samba Advanced Authentication Options, Accessing Samba Shares, Offering FTP Services	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT505, Unit 4, Linux System Administration	Configuring DNS and DHCP:Introduction to DNS, The DNS Hierarchy, DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, Configuring Dovecot for POP and IMAP	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	Configuring Apache on Red Hat Enterprise Linux: Configuring the Apache Web Server, creating a Basic Website, Understanding the Apache Configuration Files, Apache Log Files, Working with Virtual Hosts, Securing the Web Server with TLS Certificates, Configuring Authentication, Setting Up Authentication with .htpasswd, Configuring LDAP Authentication, Setting Up MySQL	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
USIT505, Unit 5, Linux System Administration	Introducing Bash Shell Scripting: Introduction, Elements of a Good Shell Script, Executing the Script, Working with Variables and Input, Understanding Variables, Variables, Subshells, and Sourcing, Working with Script Arguments, Asking for Input, Using Command Substitution, Substitution Operators, Changing Variable Content with Pattern Matching, Performing Calculations, Using Control Structures, Using if...then...else, Using case, Using while, Using until, Using for, Configuring booting with GRUB.	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation
	High-Availability Clustering: High-Availability Clustering, The Workings of High Availability, High-Availability Requirements, Red Hat High-Availability Add-on Software, Components,	04	Red Hat Enterprise Linux6	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Configuring Cluster-Based Services, Setting Up Bonding, Setting Up Shared Storage, Installing the Red Hat High Availability Add-On, Building the Initial State of the Cluster, Configuring Additional Cluster Properties, Configuring a Quorum Disk, Setting Up Fencing, Creating Resources and Services, Troubleshooting a Nonoperational Cluster, Configuring GFS2 File Systems		Administration by Sander van Vugt	
	Setting Up an Installation Server: Configuring a Network Server as an Installation Server, Setting Up a TFTP and DHCP Server for PXE Boot, Installing the TFTP Server, Configuring DHCP for PXE Boot, Creating the TFTP PXE Server Content, creating a Kickstart File, Using a Kickstart File to Perform an Automated, Installation, Modifying the Kickstart File with, system-config-kickstart, Making Manual Modifications to the Kickstart File	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Power Point Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SHARVARI PATIL DEPARTMENT: IT CLASS: T.Y.I.T SEMESTER: V

MONTH: AUGUST TO DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the concept of error handling and session management.
- Learn web designing using AJAX
- Gain knowledge about various security fundamentals.

Paper No.,Paper Title, Unit No.	**Sub Topics:**	**No.of Lectures**	**References**	**Teaching Method/ICT tools used**
USIT503 Advance Web Programming Unit 3	Error Handling, Logging, and Tracing : Avoiding Common Errors, Understanding Exception Handling, Handling Exceptions, Throwing Your Own Exceptions,	6	Reference book: Beginning ASP.NET 4.5 in C#"	Google Meet, Google Classroom, Google Slides
	Using Page Tracing State Management : Understanding the Problem of State, Using View State, Transferring Information Between Pages, Using Cookies, Managing Session State, Configuring Session State, Using Application State, Comparing State Management Options	4		
	Styles, Themes, and Master Pages : Styles, Themes, Master Page Basics, Advanced Master Pages,	1 4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**15**		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT503 Advance Web Programming Unit 5	XML: XML Explained, The XML Classes, XML Validation, XML Display and Transforms.	6	Reference book: Beginning ASP.NET 4.5 in C#""	Google Meet, Google Classroom, Google Slides
	Security Fundamentals: Understanding Security Requirements, Authentication and Authorization, Forms Authentication, Windows Authentication.	6		
	ASP.NET AJAX: Understanding Ajax, Using Partial Refreshes, Using Progress Notification, Implementing Timed Refreshes, Working with the ASP.NET AJAX Control Toolkit.	6		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**18**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SUVARNA S KANNAV DEPARTMENT: INFORMATION TECHNOLOGY

CLASS:T.Y.BSC(I.T) DIV-C SEMESTER: **V** MONTH:AUG-DEC ACADEMIC YEAR: 2020-2021

SUBJECT:SOFTWARE PROJECT MANAGEMENT

LEARNING OBJECTIVE/S:
The learners will be able to : Apply project management concepts and techniques to an IT project. Identify issues that could lead to IT project success or failure. Explain project management in terms of the software development process. Describe the responsibilities of IT project managers.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Software Project Management USIT501 Unit-2	**Selection of an Appropriate Project Approach:**Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model.	5	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation, google classroom, google meet
	Software Effort Estimation: Introduction, Where are the Estimates Done? Problems with Over- and Under-Estimates, The	5		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Basis for Software Estimating, Software Effort Estimation Techniques, Bottomup Estimating, The Top-down Approach and Parametric Models, Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II, COSMIC Full Function Points, COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb.			
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	10		
Software Project Management USIT501 Unit-3	**Activity Planning:** Introduction, Objectives of Activity Planning, When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating a Network Model, Adding the Time Dimension, The Forward Pass, Backward Pass, Identifying the Critical Path, Activity Float, Shortening the Project Duration, Identifying Critical Activities, Activity-on-Arrow Networks.	4	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation, google classroom, google meet
	Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for Dealing with Risk, Risk Identification, Risk Assessment, Risk Planning, Risk Management, Evaluating Risks to the Schedule, Boehm"s Top 10 Risks and Countermeasures, Applying the PERT Technique, Monte Carlo Simulation, Critical Chain Concepts.	4		
	Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence.	3

SEMESTER: V MONTH AUGUST-DECEMBER ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Able to understand the application areas of IOT ·
- Able to realize the revolution of Internet in Mobile Devices, Cloud & Sensor Networks ·
- Able to understand building blocks of Internet of Things and characteristics

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT502, Internet of Things Unit 1	The Internet of Things: An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	03	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, Powerpoint
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	04	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses, DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other	03	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols			
USIT502, Internet of Things **Unit 2**	Thinking About Prototyping: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation, climbing into the Cloud, Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
USIT502, Internet of Things **Unit 3**	Prototyping the Physical Design: Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Prototyping Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT502, Internet of Things **Unit 4**	Techniques for Writing Embedded Code: Memory Management, 12 8 Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging.	04	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	06	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
USIT502, Internet of Things **Unit 5**	Moving to Manufacture: What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

NAME OF THE STAFF: Miss Shilpa James Rodrigues **DEPARTMENT**: IT

CLASS: T.Y.I.T.-B (Enterprise Java) **SEMESTER**: V

MONTH: Aug - Dec **ACADEMIC YEAR**: 2020-21

LEARNING OBJECTIVE/S :
The learners will be able to :

- Learn advance technology of java programming.
- Develop web based java program.
- Create dynamic content providing java web application using servlets.
- Describe and explain various multi-tier software architecture framework using Java EE including the roles and responsibilities of each relevant tier
- Develop enterprise software applications using the Java EE framework.
- Understand and implements new technologies like JSP, Session, Cookies, JSTL, Hibernate etc.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 1, Enterprise Java.	**Understanding Java EE:** What is an Enterprise Application? What is java enterprise edition? Java EE Technologies, Java EE evolution, Glass fish server **JavaEE Architecture,Serverand Containers:** Types of System Architecture, Java EE Server, Java EE Containers.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction to Java Servlets: The Need for Dynamic Content, Java Servlet Technology, Why Servlets? What can Servlets do? **Servlet API and Lifecycle:** Java Servlet API, The Servlet Skeleton, The Servlet LifeCycle, A Simple WelcomeS ervlet.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	WorkingWithServlets: Getting Started, Using Annotations, Insteadof, Deployment Descriptor. **Working with Databases:** What Is JDBC? JDBC Architecture, Accessing Database, The Servlet GUI and Database Example.	04	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 2, Enterprise Java.	**Request Dispatcher:** Resquest dispatcher Interface, Methods of Request dispatcher, Request dispatcher Application.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	COOKIES: Kinds Of Cookies, Where Cookies Are Used? Creating Cookies.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	SESSION: What Are Sessions? Lifecycle Of HttpSession, Session Tracking With Servlet API, AServlet Session Example	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	WorkingWith Files: Uploading Files, Creatingan Upload File Application, Downloading Files, Creatinga Download File Application.	02	Java EE 7 For Beginners -Sharanam Shah,	Laptop, Google Meet, Power point presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			Vaishali Shah	
	Working With Non-Blocking I/O: Creatinga Non Blocking Read Application, Creating The Web Application, Creating Java Class, Creating Servlets, Retrieving The File, Creating index.jsp	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 , Unit 3 , Enterprise Java.	**Introduction To Java ServerPages:** Why use Java Server Pages? Disadvantages Of JSP, JSP v\s Servlets, Life Cycle of a JSP Page, How does a JSP function? How does JSP execute? About Java Server Pages **Getting Started With Java ServerPages:** Comments, JSP Document, JSP Elements, JSP GUI Example.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Action Elements: Including other Files, Forwarding JSP Page to Another Page, Passing Parameters for other Actions, Loadinga Javabean.	02	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation
	Implicit Objects, ScopeAnd ElExpressions: Implicit Objects, Character Quoting Conventions, Unified Expression Language[UnifiedEl], Expression Language.	03	Java EE 7 For Beginners -Sharanam Shah, Vaishali Shah	Laptop, Google Meet, Power point presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc.I.T. SEMESTER: V MONTH: August-December ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 Advance Web Programming UNIT-I	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning	Google Mett & PPT
	The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.	4		Google Mett & PPT
	Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types,	4		Google Mett & PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Understanding Namespaces and Assemblies, Advanced Class Programming.		Visual C# 2010	
USIT503 Advance Web Programming UNIT-II	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.	6	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Google Mett & PPT
	Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	6		
USIT503 Advance Web Programming UNIT- III	**Error Handling, Logging, and Tracing** : Avoiding Common Errors, Understanding Exception Handling, Handling Exceptions, Throwing Your Own Exceptions, Using Page Tracing	5	C# 2015 Murach"s ASP.NET 4.6 Web Programming in C#2015 Beginning Visual C# 2010	Google Mett & PPT
	State Management : Understanding the Problem of State, Using View State, Transferring Information Between Pages, Using Cookies, Managing Session State, Configuring Session State, Using Application State, Comparing State Management Options	4		Google Mett & PPT
	Styles, Themes, and Master Pages : Styles, Themes, Master Page Basics, Advanced Master Pages,	3		Google Mett & PPT

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: August to December ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- To support for many industry standards and continues simplification of enterprise ready APIs.

The learners will be able to :

- To understand Java Enterprise edition with its different technologies.
- To understand Java EE architectural server and contains.
- To understand server side technology like Java Servlets with its API and life cycle.
- To make data base connectivity using JDBC.
- To navigate using request dispatcher interface.
- To understand state management using cookies and session.
- To understand how to upload and download the file.
- To be able to work with non-blocking I/O resources.
- To understand server side technology like Java Server Pages.
- To make use of action elements, implicit objects, expression language and JSTL.
- To understand enterprise bill, architectural and its bill.
- To be able to working with session beans and message driven beans.
- To understand interceptors and JNDI.
- To make use of ORM and JPA with its API.
- To understand writing JPA application.
- To be able to understand hibernate architectural and components.
- To understand writing hibernate application.

Software Project Management USIT501 Unit-2	**Selection of an Appropriate Project Approach:** Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model.	5	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation, google classroom, google meet
	Software Effort Estimation: Introduction, Where are the Estimates Done? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottomup Estimating, The Top-down Approach and Parametric Models, Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II, COSMIC Full Function Points, COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb.	5		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	10		
Software Project Management USIT501 Unit-3	**Activity Planning:** Introduction, Objectives of Activity Planning, When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating a Network Model, Adding the Time Dimension, The Forward Pass, Backward Pass, Identifying the Critical Path, Activity Float, Shortening the Project Duration, Identifying Critical Activities, Activity-on-Arrow Networks.	4	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation, google classroom, google meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for Dealing with Risk, Risk Identification, Risk Assessment, Risk Planning, Risk Management, Evaluating Risks to the Schedule, Boehm‟s Top 10 Risks and Countermeasures, Applying the PERT Technique, Monte Carlo Simulation, Critical Chain Concepts.	4		
	Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence.	3		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	11		
Software Project Management USIT501 Unit-4	**Monitoring and Control**: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM).	3	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation, google classroom, google meet
	Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance	2		
	Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns	4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE	9		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	UNIT:			
Software Project Management USIT501 Unit-5	**Working in Teams:** Introduction, Becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres,Communication Plans, Leadership.	3	Software Project Management - Bob Hughes, Mike Cotterell, Rajib Mall TMH 6 th 2018	PowerPoint Presentation, google classroom, google meet
	Software Quality : Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability, Quality Plans.	5		
	Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project Closeout Report.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**10**

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: M.Sc. SEMESTER: III MONTH: August To December ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- To get the insight of the security loopholes in every aspect of computing.
- To understand the threats and different types of attacks that can be launched on computing systems.
- To know the countermeasures that can be taken to prevent attacks on computing systems.
- To test the software against the attacks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSIT302d: Security Breaches and Countermeasures UNIT-IV	**Compromising Web Servers:** Concepts, attacks, attack methodology, attack tools, countermeasures, patch management, web server security tools, penetration testing. **Compromising Web Applications:** Concepts, threats, methods, tools, countermeasures, testing tools, penetration testing.	6	1. CEHv10, Certified Ethical Hacker Study Guide 2. All in One, Certified Ethical Hacker	Projector, PPT.
	Performing SQL Injection: Concepts, types, methodology, tools, techniques, countermeasures. **Compromising Wireless Networks:** Concepts, wireless encryption, threats, methodology, tools, compromising Bluetooth, countermeasures, wireless security tools, penetration testing.	6		Projector, PPT.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

PSIT302d: Security Breaches and Countermeasures UNIT-V	**Compromising Mobile Platforms:** Attack vectors, Compromising Android OS, Compromising iOS, Mobile spyware, Mobile Device Management, Mobile security, penetration testing. **Compromising IoT:** Concepts, attacks, compromising methodology, tools, countermeasures, penetration testing.	6	1. CEHv10, Certified Ethical Hacker Study Guide 2. All in One, Certified Ethical Hacker	Projector, PPT.
	Cloud Security: Concepts, Security, threats, attacks, tools, penetration testing. **Cryptography:** Concepts, email encryption, algorithms, disk encryption, tools, cryptanalysis, Public key infrastructure, countermeasures.	6

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shilpa Rodrigues **DEPARTMENT**: Information Technology **CLASS**: MSc.IT(Part II)

SEMESTER: **III** **MONTH**: Aug - Dec **ACADEMIC YEAR**: 2020-21

LEARNING OBJECTIVES:
The learners will be able to:

- To make the students aware about the automation today in the industry.
- To make the students aware about the tools used for automation.
- To help the students automate a complete process

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSIT304a , Unit 2 , Robotic Process Automation.	**Sequence, Flowchart, and Control Flow:** Sequencing the workflow, Activities, Control flow, various types of loops, and decision making, Step-by-step example using Sequence and Flowchart, Step-by-step example using Sequence and Control flow	06	Learning Robotic Process Automation, Alok Mani Tripathi	Power Point Presentation, Google meet
	Data Manipulation: Variables and scope, Collections, Arguments – Purpose and use, Data table usage with examples, Clipboard management, File operation with step-by-step example, CSV/Excel to data table and vice versa (with a step-	06	Learning Robotic Process Automation,	Power Point Presentation, Google meet

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	by-step example)		Alok Mani TripathiA. Hanneman, Mark Riddle	
PSIT304a , Unit 4 , Robotic Process Automation.	**Handling User Events and Assistant Bots:** What are assistant bots?, Monitoring system event triggers, Hotkey trigger, Mouse trigger, System trigger ,Monitoring image and element triggers, An example of monitoring email, Example of monitoring a copying event and blocking it, Launching an assistant bot on a keyboard event	07	Learning Robotic Process Automation, Alok Mani Tripathi	Power Point Presentation, Google meet
	Exception Handling, Debugging, and Logging: Exception handling, Common exceptions and ways to handle them, Logging and taking screenshots, Debugging techniques, Collecting crash dumps, Error reporting	05	Learning Robotic Process Automation, Alok Mani Tripathi	Power Point Presentation, Google meet

LEARNING OBJECTIVE/S:

The learners will be able to :

- **Understand Soft computing concepts like fuzzy logic, neural networks and genetic algorithm, where Artificial Intelligence is mother branch of all.**
- **All these techniques will be more effective to solve the problem efficiently. Identify and describe soft computing techniques and their roles in building intelligent machines.**
- **Recognize the feasibility of applying a soft computing methodology or a particular problem**
- **Apply fuzzy logic and reasoning to handle uncertainty and solve engineering problems**
- **Apply genetic algorithms to combinatorial optimization problems**
- **Apply neural networks for classification and regression problems**
- **Effectively use existing software tools to solve real problems using a soft computing approach**
- **Evaluate and compare solutions by various soft computing approaches for a given problem.**

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**MSC(IT)**_____ SEMESTER: ____**III**_____ MONTH: _____ **AUGUST-DECEMBER** _____ ACADEMIC YEAR: _____**2020-2021**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

- Understanding Human learning aspects.
- Understanding primitives in learning process by computer.
- Understanding nature of problems solved with Machine Learning
- Understand the key issues in Machine Learning and its associated applications in intelligent business and scientific computing.
- Acquire the knowledge about classification and regression techniques where a learner will be able to explore his skill to generate data base knowledge using the prescribed techniques.
- Understand and implement the techniques for extracting the knowledge using machine learning methods.
- Achieve adequate perspectives of big data analytics in various applications like recommender systems, social media applications etc.
- Understand the statistical approach related to machine learning. He will also Apply the algorithms to a real-world problem, optimize the models learned and report on the expected accuracy that can be achieved by applying the models.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Ms. Shweta Kiran Yande DEPARTMENT: CS

CLASS: M. Sc. I.T. SEMESTER: II MONTH: February-April ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
To understand the state-of-the-art in network protocols, architectures and applications.
· Analyze existing network protocols and networks.
· Develop new protocols in networking
· To understand how networking research is done
· To investigate novel ideas in the area of Networking via term-long research projects.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: Information Technology CLASS:MScIT

SEMESTER: II MONTH:FEB to MAY ACADEMIC YEAR:2020-2021

LEARNING OBJECTIVE/S:

- Gain a thorough understanding of the philosophy and architecture of
- Web applications using ASP.NET Core MVC;
- Gain a practical understanding of.NET Core;
- Acquire a working knowledge of Web application development using ASP.NET Core MVC 6 and Visual Studio
- Persist data with XML Serialization and ADO.NET with SQL Server
- Create HTTP services using ASP.NET Core Web API;
- Deploy ASP.NET Core MVC applications to the Windows Azurecloud.
-

Unit Details Lectures

PAPER, UNIT, TITLE	SUBTOPICSS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSIT203 **Unit-1** **Microservice Architecture**	**Microservices:** Understanding Microservices, Adopting Microservices, The Microservices Way. **Microservices Valueproposition:** Deriving Business Value, defining a Goal-Oriented, Layered Approach, Applying the Goal-Oriented, Layered Approach. **Designing Microservice Systems:** The Systems Approach to Microservices, A Microservices Design Process, **Establishing a Foundation:** Goals and Principles, Platforms, Culture.	12	Microservice Architecture: Aligning Principles, Practices, and Culture	Laptop, PPT
PSIT203	**Service Design:** Microservice Boundaries, API design for	12	Microservice Architecture:	Laptop, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit-2 **Microservice Architecture**	Microservices, Data and Microservices, Distributed Transactions andsagas, Asynchronous Message-Passing and Microservices, dealingwith Dependencies, **System Design and Operations:** Independent Deployability, More Servers, Docker and Microservices, Role ofService Discovery, Need for an API Gateway, Monitoring and Alerting. **Adopting Microservices in Practice:** Solution Architecture Guidance,Organizational Guidance, Culture Guidance, Tools and Process Guidance, Services Guidance.		Aligning Principles, Practices, and Culture

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS: M.Sc. IT (Human Computer Interaction) SEMESTER:IV MONTH: FEB-APR ACADEMICYEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the important aspects of implementation of human-computer interfaces.
- Identify the various tools and techniques for interface analysis, design, and evaluation.
- Identify the impact of usable interfaces in the acceptance and performance utilization of information systems

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
UNIT 1 Human Computer Interaction	**The Interaction**: Models of interaction, Design Focus, Frameworks and HCI, Ergonomics, Interaction styles, **Elements of the WIMP interface,Interactivity** **Paradigms**: Introduction, Paradigms for interaction **Interaction design basics**: What is design?, The process of design, User focus, Cultural probes, Navigation design, the big button trap, Modes, Screen design and layout, Alignment and layout matters, Checking screen colors, Iteration and prototyping **HCI in the software process**: The software life cycle, Usability engineering , Iterative design and prototyping, Prototyping in practice, Design rationale	12	1.Human Computer Interaction-Alan Dix, Janet Finlay, Gregory Abowd, Russell Beale Pearson Education 3rd 2. Designing the User Interface -Shneiderman B., Plaisant C., Cohen M., Jacobs S. Pearson 5th 2013	POWER POINT PRESENTATION

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 2 Human Computer Interaction	**Design**: Principles to support usability, Standards, Guidelines, Golden rules and heuristics, HCI patterns **Implementation support**: Elements of windowing systems, Programming the application, Going with the grain, Using toolkits, User interface management **Systems Evaluation techniques:** What is evaluation?, Goals of evaluation, Evaluation through expert analysis,Evaluation through user participation, Choosing an evaluation method	12	1.Human Computer Interaction-Alan Dix, Janet Finlay, Gregory Abowd, Russell Beale Pearson Education 3rd 2. Designing the User Interface -Shneiderman B., Plaisant C., Cohen M., Jacobs S. Pearson 5th 2013	POWER POINT PRESENTATION
UNIT 3 Human Computer Interaction	**Design**: Principles to support usability, Standards, Guidelines, Golden rules and heuristics **HCI patterns Implementation support**: Elements of windowing systems, Programming the application, Going with the grain, Using toolkits, User interface management systems **Evaluation techniques**: What is evaluation?, Goals of evaluation, Evaluation through expert analysis, Evaluation through user participation, Choosing an evaluation method	12	1.Human Computer Interaction-Alan Dix, Janet Finlay, Gregory Abowd, Russell Beale Pearson Education 3rd 2. Designing the User Interface -Shneiderman B., Plaisant C., Cohen M., Jacobs S. Pearson 5th 2013	POWER POINT PRESENTATION

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Ms. Binita Thakkar DEPARTMENT: IT
CLASS: M. Sc. I. T SEMESTER: IV MONTH: February-April ACADEMIC YEAR: 2020-2021
LEARNING OBJECTIVE/S:
The learners will be able to:

a. Investigate the cyber forensics with standard operating procedures.
b. Recover the data from the hard disk with legal procedure.
c. To recover and analyse the data using forensics tool

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-II Cyber Forensics Unit -II	Setting up a lab for Computer Forensics: Budget allocation for a forensic lab, Physical location, General configuration , Equipment needs, Basic workstation requirements, Ambience, Physical security recommendations, Auditing, Forensics lab licensing requisite, Forensics lab staff responsibilities	3	EC-Council CHFIv10 Study Guide by EC-Council And The official CHFI Exam 312-49 study Guide by Dave Kleiman	PowerPoint presentation through Google Meet
	Hard Disks and File Systems: Understanding file systems, examining MS-DOS, Windows, Linux, NTFS, Understanding Disk Partitions	3		PowerPoint presentation through Google Meet
	Forensics on Windows Machine: Locating evidence on Windows systems, Gathering volatile evidence, Investigating Windows file slack, Examining file systems, Checking Registry, Importance of Memory dump, System state backup, Investigating Internet traces	3		PowerPoint presentation through Google Meet
	Acquire and Duplicate Data: Determining the best data acquisition methods, Understanding data recovery contingencies, Data preservation commands, The need for data duplication, Data duplication tools	3		PowerPoint presentation through Google Meet

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: M.Sc.IT

SEMESTER: II MONTH: FEB TO MAY ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:

The learners will be able to:

- Understand the key issues in big data management and its associated applications in intelligent business and scientific computing.
- Acquire fundamental enabling techniques and scalable algorithms like Hadoop, Map Reduce and NO SQL in big data analytics.
- Interpret business models and scientific computing paradigms, and apply software tools for big data analytics.
- Achieve adequate perspectives of big data analytics in various applications like recommender systems, social media applications etc..

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)**_____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**MSC(IT)**_____ SEMESTER: ____**II**_____ MONTH: _____ **FEBRUARY-MAY** _____ ACADEMIC YEAR: _____**2020-2021**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

- **Review the fundamental concepts of a digital image processing system.**
- **Analyze images in the frequency domain using various transforms.**
- **Evaluate the techniques for image enhancement and image restoration.**
- **Categorize various compression techniques.**
- **Interpret Image compression standards.**
- **Interpret image segmentation and representation techniques.**
- **Understand the relevant aspects of digital image representation and their practical implications.**
- **Have the ability to design pointwise intensity transformations to meet stated specifications and understand 2-D convolution, the 2-D DFT, and have the abitilty to design systems using these concepts.**
- **Have a command of basic image restoration techniques. Understand the role of alternative color spaces, and the design requirements leading to choices of color space.**
- **Appreciate the utility of wavelet decompositions and their role in image processing systems. Have an understanding of the underlying mechanisms of image compression, and the ability to design systems using standard algorithms to meet design specifications.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: Information Technology CLASS:MScIT

SEMESTER: III MONTH:FEB to MAY ACADEMIC YEAR:2020-2021

LEARNING OBJECTIVE/S:

- Gain a thorough understanding of the philosophy and architecture of
- Web applications using ASP.NET Core MVC;
- Gain a practical understanding of.NET Core;
- Acquire a working knowledge of Web application development using ASP.NET Core MVC 6 and Visual Studio
- Persist data with XML Serialization and ADO.NET with SQL Server
- Create HTTP services using ASP.NET Core Web API;
- Deploy ASP.NET Core MVC applications to the Windows Azurecloud.
-

Unit Details Lectures

PAPER, UNIT, TITLE	SUBTOPICSS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSIT203 **Unit-1** **Microservice Architecture**	**Microservices:** Understanding Microservices, Adopting Microservices, The Microservices Way. **Microservices Valueproposition:** Deriving Business Value, defining a Goal-Oriented, Layered Approach, Applying the Goal-Oriented, Layered Approach. **Designing Microservice Systems:** The Systems Approach to Microservices, A Microservices Design Process, **Establishing a Foundation:** Goals and Principles, Platforms, Culture.	12	Microservice Architecture: Aligning Principles, Practices, and Culture	Laptop, PPT
PSIT203	**Service Design:** Microservice Boundaries, API design for	12	Microservice Architecture:	Laptop, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit-2 **Microservice Architecture**	Microservices, Data and Microservices, Distributed Transactions andsagas, Asynchronous Message-Passing and Microservices, dealingwith Dependencies, **System Design and Operations:** Independent Deployability, More Servers, Docker and Microservices, Role ofService Discovery, Need for an API Gateway, Monitoring and Alerting. **Adopting Microservices in Practice:** Solution Architecture Guidance,Organizational Guidance, Culture Guidance, Tools and Process Guidance, Services Guidance.		Aligning Principles, Practices, and Culture	
PSIT203 **Unit-3** **Microservice Architecture**	**Building Microservices with ASP.NET Core:** Introduction, Installing .NET Core, Building a Console App, Building ASP.NET Core App. **Delivering Continuously:** Introduction to Docker, Continuous integration with Wercker, Continuous Integration with Circle CI, Deploying to Dicker Hub. **Building Microservice with ASP.NET Core:** Microservice, Team Service, API First Development, Test First Controller, Creating a CI pipeline, Integration Testing, Running the team service Docker Image. 1224 Microservices Ecosystems, Building the location **Backing Services:** Service, Enhancing Team Service	12	Microservice Architecture: Aligning Principles, Practices, and Culture	Laptop, PPT

LEARNING OBJECTIVE/S:

The learners will be able to :

- To present the mathematical, statistical and computational challenges of building neural networks
- To study the concepts of deep learning
- To enable the students to know deep learning techniques to support real-time applications
- Describes basics of mathematical foundation that will help the learner to understand the concepts of Deep Learning.
- Understand and describe model of deep learning
- Design and implement various deep supervised learning architectures for text & image data.
- Design and implement various deep learning models and architectures.
- Apply various deep learning techniques to design efficient algorithms for real-world applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective 2 PSIT403a Deep Learning **Unit No -01**	**Applied Math and Machine Learning Basics:** Linear Algebra: Scalars, Vectors, Matrices and Tensors , Multiplying Matrices and Vectors , Identity and Inverse Matrices, Linear Dependence and Span , norms, special matrices and vectors, eigen decompositions. **Numerical Computation:** Overflow and under flow, poor	07	Deep Learning Ian Goodfellow, Yoshua Bengio, Aaron Courvile	Online Google Meet PPts.

TEACHING PLAN (UNIT 1 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: I MONTH: OCTOBER ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to :

- Define a function, its domain, co domain, range and bijective functions, composite and inverse functions
- Check whether a given relation is equivalence or partial order relation.
- Represent the given relation using diagraph, adjacency matrix and arrow diagram.
- Solve a recurrence relation using various methods like back tracking , generating function method etc.
- Explain and solve the tower of Hanoi puzzle.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
DISCRETE MATHEMATICS Unit 1 Recurrence relations	➢ Functions, its domain, co domain and range ➢ Bijective, composite and inverse functions ➢ Relations: definition, examples and properties ➢ Equivalence & partial order relation, Hasse diagram ➢ Recurrence relation: definition, formulation & solving ➢ Tower of Hanoi puzzle	1 1 2 2 2 1	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TEACHING PLAN (UNIT 2 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: I MONTH: NOVEMBER ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the concept of fundamental principle of counting, permutations and combinations.
- State and prove binomial theorem, Pascal's identity, Vandermonde's identity.
- Find the number of ways of doing a task using permutations and combinations.
- State and use Pigeonhole principle to solve the problems.
- Understand the concept of finite state automata and finite state machine.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
DISCRETE MATHEMATICS (Unit 2) Counting principles, Languages and Finite state machines	➢ FPC , permutations, combinations ➢ Binomial theorem, Pascal's & Vandermonde's identity ➢ Sum & product rule, pigeonhole principle ➢ Inclusion exclusion principle ➢ Languages, regular expression and regular grammar ➢ FSM, FSA, Godel numbers, turing machines	2 2 2 2 2 2	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TEACHING PLAN (UNIT 3 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: I MONTH: DECEMBER ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to :

- Define graph and its types, adjacency and incidence matrix.
- Draw adjacency and incidence matrix of the given graph and vice versa.
- Find out the shortest path of weighted graph using Warshall's algorithm.
- Traverse a tree using inorder, preorder and postorder algorithm.
- Draw a tree for algebraic expressions and vice versa.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
DISCRETE MATHEMATICS **(Unit 3)** Graphs & Trees	➢ Definition of Graphs and its types ➢ Diagraph, incidence and adjacency matrix ➢ Warshall's algorithm, BFS, DFS ➢ Trees : definition, types and properties ➢ Traversing binary trees ➢ Algorithms for searching, inserting and deleting in a binary tree	1 1 2 2 1 2	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 9

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: AVINASH DILIP SONAWNAE DEPARTMENT: ____IT____

CLASS: _FYCS SEMESTER: 1 MONTH: Sep.To Dec. ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to :

Open Source has acquired a prominent place in software industry. Having knowledge of Open Source and its related technologies is an essential for Computer Science student. This course introduces Open Source methodologies and ecosystem to students.

Expected Learning Outcome:

1) Upon completion of this course, students should have a good working knowledge of Open Source ecosystem, its use, impact and importance.

2) This course shall help student to learn Open Source methodologies, case studies with real life examples

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYCS SEMESTER: SEM-1 MONTH: SEP-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- Develop their soft skills and develop their personality together with their technical skills.
- Understand various issues in personal and Profession communication and learn to overcome them.
- Know about various aspects of soft skills and learn ways to develop personality
- Understand the importance and type of communication in personal and professional environment.
- Learn about Leadership, team building, decision making and stress management

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
7 SOFT SKILLS DEVELOPMENT UNIT 1	**Introduction to Soft Skills and Hard Skills** **Personality Development:** Knowing Yourself, Positive Thinking, Johari's Window, Communication Skills, Non-verbal Communication, Physical Fitness	3	**Soft Skills: an Integrated Approach to Maximise Personality** by Gajendra S. Chauhan, Sangeeta Sharma, Wiley India	GOOGLE MEET AND PPT
	Emotional Intelligence: Meaning and Definition, Need for Emotional Intelligence, Intelligence Quotient versus Emotional Intelligence Quotient, Components of Emotional Intelligence, Competencies of Emotional Intelligence, Skills to Develop Emotional Intelligence	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Etiquette and Mannerism: Introduction, Professional Etiquette, Technology Etiquette	3		
	Communication Today: Significance of Communication, GSC's 3M Model of Communication, Vitality of the Communication Process, Virtues of Listening, Fundamentals of Good Listening, Nature of Non-Verbal Communication, Need for Intercultural Communication, Communicating Digital World	4		
UNIT 2	**Academic Skills** **Employment Communication:** Introduction, Resume, Curriculum Vitae, Scannable Resume, Developing an Impressive Resume, Formats of Resume, Job Application or Cover Letteru	3	**Soft Skills: an Integrated Approach to Maximise Personality** by Gajendra S. Chauhan, Sangeeta Sharma, Wiley India	GOOGLE MEET AND PPT
	Professional Presentation: Nature of Oral Presentation, Planning a Presentation, Preparing the Presentation, Delivering the Presentation	3		
	Job Interviews: Introduction, Importance of Resume, Definition of Interview, Background Information, Types of Interviews, Preparatory Steps for Job Interviews, Interview Skill Tips, Changes in the Interview Process, FAQ During Interviews	4		
	Group Discussion: Introduction, Ambience/Seating Arrangement for Group Discussion, Importance of Group Discussions, Difference between Group Discussion, Panel Discussion and Debate, Traits, Types of Group Discussions, topic based and Case based Group Discussion, Individual Traits	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Professional Skills** **Creativity at Workplace:** Introduction, Current Workplaces, Creativity, Motivation, Nurturing Hobbies at Work, The Six Thinking Hat Method	3	**Soft Skills: an Integrated Approach to Maximise Personality** by Gajendra S. Chauhan, Sangeeta Sharma, Wiley India	GOOGLE MEET AND PPT
	Ethical Values: Ethics and Society, Theories of Ethics, Correlation between Values and Behaviour, Nurturing Ethics, Importance of Work Ethics, Problems in the Absence of Work Ethics	3		
	Capacity Building: Learn, Unlearn and Relearn*:* Capacity Building, Elements of Capacity Building, Zones of Learning, Ideas for Learning, Strategies for Capacity Building	3		
	Leadership and Team Building*:* Leader and Leadership, Leadership Traits, Culture and Leadership, Leadership Styles and Trends, Team Building, Types of Teams,	3		
	Decision Making and Negotiation: Introduction to Decision Making, Steps for Decision Making, Decision Making Techniques, Negotiation Fundamentals, Negotiation Styles, Major Negotiation Concepts	3		
	Stress and Time Management*:* Stress, Sources of Stress*,* Ways to Cope with Stress	2		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 45

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GARGEE JAGDISH MHATRE. DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: F.Y.B.Sc.CS SEMESTER: I MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the digital representation of data in a computer system.
- Understand the theory and architecture of central processing unit.
- Learn the concepts of parallel processing, pipelining and interprocessor communication.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-I Unit I Computer Organization and Design	**Computer Abstractions and Technology:** Basic structure and operation of a computer, functional units and their interaction.	1	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Google Meet, PPT
	Representation of numbers and characters.	3		Google Meet, PPT
	Logic circuits and functions: Combinational circuits and functions: Basic logic gates and functions, truth tables; logic circuits and functions.	1		Google Meet, PPT
	Minimization with Karnaugh maps.	3		Google Meet, PPT
	Synthesis of logic functions with and-or-not gates, nand gates, nor gates. Fan-in and fan-out requirements; tristate buffers.	2		Google Meet, PPT
	Half adder, full adder, ripple carry adder. (Flip flops) Gated S-R and D latches, edge-triggered D latch.	2		Google Meet, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Shift registers and registers. Decoders, multiplexers.	1		Google Meet, PPT
	Sequential circuits and functions: State diagram and state table; finite state machines and their synthesis.	2		Google Meet, PPT
Paper-I Unit II Computer Organization and Design	**Instruction set architectures:** Memory organization, addressing and operations; word size, big-endian and little-endian arrangements.	2	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Google Meet, PPT
	Instructions, sequencing. Instruction sets for RISC and CISC (examples Altera NIOS II and Freescale ColdFire).	3		Google Meet, PPT
	Operand addressing modes; pointers; indexing for arrays	3		Google Meet, PPT
	Machine language, assembly language, assembler directives. Function calls, processor runtime stack, stack frame.	3		Google Meet, PPT
	Types of machine instructions: arithmetic, logic, shift, etc.	2		Google Meet, PPT
	Instruction sets, RISC and CISC examples.	2		Google Meet, PPT
Paper-I Unit III Computer Organization and Design	**Basic Processor Unit:** Main components of a processor: registers and register files, ALU, control unit, instruction fetch unit, interfaces to instruction and data memories.	4	Carl Hamacher et al., Computer Organization and Embedded Systems, 6 ed., McGraw-Hill 2012	Google Meet, PPT
	Datapath. Instruction fetch and execute; executing arithmetic/logic, memory access and	3		Google Meet, PPT
	branch instructions; hardwired and microprogrammed control for RISC and CISC.	3		Google Meet, PPT
	Basic I/O: Accessing I/O devices, data transfers between processor and I/O devices.	3		Google Meet, PPT
	Interrupts and exceptions: interrupt requests and processing.	2		Google Meet, PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: FYCS

SEMESTER: I MONTH: SEPTEMBER- DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the concepts of programming before actually starting to write programs.
- Develop logic for Problem Solving.
- Be familiar about the basic constructs of programming such as data, operations, conditions, loops, functions etc.
- Apply the problem solving skills using syntactically simple language i.e. Python (version: 3.X or higher)

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS102, Unit 1, Programming with Python- I	Reasons for Python as the learner's first programming language. Introduction to the IDLE interpreter (shell) and its documentation. Expression evaluation: similarities and differences compared to a calculator; expressions and operators of types int, float, boolean. Built-in function type. Operator precedence.	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	Enumeration of simple and compound statements. The expression statement. The assert statement, whose operand is a boolean expression (values true or false). The assignment statement, dynamic binding of names to values, automatic and implicit declaration of variable names with the assignment statement; assigning the valueNone to a name.	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	The del (delete) statement. Input/output with print and input functions. A statement list as a single interpreter command.	02	Paul Gries, Programming:	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			An Introduction to Computer Science Using Python 3	
	The import statement for already-defined functions and constants. The augmented assignment statement. The built-in help() function. Interactive and script modes of IDLE, running a script, restarting the shell. The compound statement def to define functions; the role of indentation for delimiting the body of a compound statement; calling a previously defined function. Compound data types str, tuple and list	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	Indexing individual elements within these types. Strings and tuples are immutable, lists are mutable. Built-in functions min, max, sum. Interactive solution of model problems, by repeatedly executing the body of a loop.	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
USCS102, Unit 2, Programming with Python- I	Advantages of functions, function parameters, formal parameters, actual parameters, global and local variables..	03	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	The range function, the iterative for statement. The conditional statements if, if-else, if-elif-else. The iterative statements while, while-else, for-else	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	The continue statement to skip over one iteration of a loop, the break statement to exit the loop. Nested compound statements.	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	Dictionaries: concept of key-value pairs, techniques to create, update and delete dictionary items. Problem-solving using compound types and statements	04	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
USCS102, Unit 3, Programming with Python-I	Anonymous functions. List comprehensions.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	Gentle introduction to object-oriented programming; using the built-in dir() function, enumerate the methods of strings, tuples, lists, dictionaries	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation
	Using these methods for problem-solving with compound types.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	Power Point Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: Computer Science

CLASS: Fybsc(CS)

SEMESTER: 1

MONTH: September to December

ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:

- The learners will be able to know descriptive statistical concepts
- The learner will able to study probability concepts required for computer learners.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: Descriptive statistics and introduction to probability **<u>Unit 1</u>**	**Data Presentation**: ● Data types: attribute, variable , discrete and continuous variable ● Data presentation: frequency distribution, histogram, O give curves, stem and leaf display	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power point presentation, Laptop
	Data Aggregation: ● Measures of central tendency: mean , median, mode for raw data, discrete, grouped frequency distribution	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power point presentation, Laptop

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Measures of dispersion: ● Variance, standard deviation, coefficient of variation for raw data,discrete, grouped frequency distribution, quartiles, quantiles real life example	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power point presentation, Laptop
Unit 2	**Moments**: ● Raw moments, Central moments,relation between raw and central moment	3	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power point presentation, Laptop
	Measures of Skewness and kurtosis: ● Based on moments and quartiles ● Relation between mean , median and mode for symmetric and asymmetric frequency curve	3	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power point presentation, Laptop
	Correlation and regression: ● Bivariate data, scatter plot, correlation,nonscence correlation, karl-pearson's coefficient of correlation, independence	5	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power point presentation, Laptop
	Linear regression:	4	Gupta, S.C. and kapoor V.k.(1987): fundamental of	Power point presentation, Laptop

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	● Fitting of linear regression using least square method, coefficient of determination, properties of linear regression (only statement)		mathematical statistics	
Unit 3	**Probability:** ● Random experiment,sample space,events, types and operations of events ● Probability definition:classical, axiomatic ● Theorem of probability (without proof) -O<P(A)<1 - P(AUB)=P(A)+P(B)-P(AΔB) - P(A')=1-P(A) - P(A)<P(B) if A is subset of B	8	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power point presentation, Laptop
	Conditional probability,Baye's theorem, independence, examples of probability	7	Gupta, S.C. and kapoor V.k.(1987): fundamental of mathematical statistics	Power point presentation, Laptop

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: FYCS SEMESTER: I MONTH: SEPTEMBER-DECEMBER ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

The learners will be able to : Students should be able to evaluate business information problem and find the requirements of a problem in terms of data. Students should be able to design the database schema with the use of appropriate data types for storage of data in database. Students should be able to create, manipulate, query and back up the databases.

.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS201, Introduction to Database Management Systems, UNIT-I	**Introduction of DBMS** Database, DBMS – Definition, Overview of DBMS, Advantages of DBMS, Levels of abstraction, Data independence, DBMS Architecture	03	Ramez Elmasri & ShamkantB.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010.	Meet, PPT
	Data models – Client-Server Architecture,Object Based Logical Model, Record Based Logical Model (relational, hierarchical, network)	02		Meet, PPT
	Entity Relationship Model - Entities, attributes, entity sets, relations, relationship sets , Additional constraints (key constraints, participation constraints, weak entities, aggregation / generalization, Conceptual Design using ER (entities VS attributes, Entity Vs relationship, binary Vs ternary, constraints beyond ER)	04		Meet, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Relational data model– Domains, attributes, Tuples and Relations, Relational Model Notation, Characteristics of Relations, Relational Constraints - primary key, referential integrity, unique constraint, Null constraint, Check constraint	04		Meet, PPT
	Entity to Table, Relationship to tables with and without key constraints.	02		Meet, PPT
USCS201, Introduction to Database Management Systems, UNIT-II	**ER to The Relational Model** Schema Refinement and normal forms :Functional Dependencies and 1NF, 2NF, 3NF and BCNF normal forms based on primary keys, lossless join decomposition.	03	1.Ramez Elmasri & ShamkantB.Navathe, Fundamentals of Database Systems, Pearson Education, Sixth Edition, 2010. 2. Joel Murach, Murach's MySQL, Murach, 2012	Meet, PPT
	Relational Algebra operations (selection, projection, set operations union, intersection, difference, cross product, Joins –conditional, equi join and natural joins, division)	03		Meet, PPT
	DDL Statements - Creating Databases, Using Databases, datatypes, Creating Tables (with integrity constraints – primary key, default, check, not null), Altering Tables, Renaming Tables, Dropping Tables, Truncating Tables, Backing Up and Restoring databases	02		Meet, PPT
	DML Statements – Viewing the structure of a table insert, update, delete, Select – all columns, specific columns, unique records, conditional select, in clause, between clause, limit, aggregate functions (count, min, max, avg, sum), group by clause, having clause	03		Meet, PPT
	Functions – String Functions (concat, instr, left, right, mid, length, lcase/lower, ucase/upper, replace, strcmp, trim, ltrim, rtrim), Math Functions (abs, ceil, floor, mod, pow, sqrt, round, truncate) Date Functions (adddate, datediff, day, month, year, hour, min, sec, now, reverse)	02		Meet, PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Joining Tables – inner join, outer join (left outer, right outer, full outer)	02		Meet, PPT
USCS201, Introduction to Database Management Systems, UNIT-III	**Sub queries** Sub queries – sub queries with IN, EXISTS, sub queries restrictions, Nested sub queries, ANY/ALL clause, correlated sub queries	03	Joel Murach, Murach's MySQL, Murach, 2012	Meet, PPT
	Database Protection: Security Issues, Threats to Databases, Security Mechanisms, Role of DBA, Discretionary Access Control	03		Meet, PPT
	Views (creating, altering dropping, renaming and manipulating views)	03		Meet, PPT
	DCL Statements (creating/dropping users, privileges introduction, granting/revoking privileges, viewing privileges)	03		Meet, PPT

The learners will be able to design and develop state of - the art web applications using client-side scripting, server-side scripting, and database connectivity

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307) Unit I	**HTML5:** Fundamental Elements of HTML, Formatting Text in HTML, Organizing Text in HTML, Links and URLs in HTML, Tables in HTML, Images on a Web Page, Image Formats, Image Maps, Colours, FORMs in HTML, Interactive Elements, Working with Multimedia - Audio and Video File Formats, HTML elements for inserting Audio / Video on a web page	8	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and jQuery, 2ed, Dreamtech Press	PPT
	CSS: Understanding the Syntax of CSS, CSS Selectors, Inserting CSS in an HTML Document, CSS properties to work with background of a Page, CSS properties to work with Fonts and Text Styles, CSS properties for positioning an element	7		
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307)	**JavaScript:** Using JavaScript in an HTML Document, Programming Fundamentals of JavaScript – Variables, Operators, Control Flow Statements, Popup Boxes, Functions – Defining and Invoking a Function, Defining Function arguments, Defining a Return Statement, Calling Functions with Timer	6	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and	PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II	**JavaScript Objects** - String, RegExp, Math, Date, Browser Objects - Window, Navigator, History, Location, Document, Cookies, Document Object Model, Form Validation using JavaScript	2	jQuery, 2ed, Dreamtech Press	PPT
	XML: Comparing XML with HTML, Advantages and Disadvantages of XML, Structure of an XML Document, XML Entity References, DTD, XSLT: XSLT Elements and Attributes - xsl:template, xsl:apply-templates, xsl:import, xsl:call-template, xsl:include, xsl:element, xsl:attribute, xsl:attribute-set, xsl:value-of	7		PPT
SKILL ENHANCEMENT: WEB PROGRAMMING (USCS307) Unit III	**AJAX**: AJAX Web Application Model, How AJAX Works, XMLHttpRequest Object – Properties and Methods, Handling asynchronous requests using AJAX	4	HTML 5 Black Book, Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and jQuery, 2ed, Dreamtech Press, PHP: A Beginners Guide, Vikram Vaswani, TMH	PPT
	PHP: Variables and Operators, Program Flow, Arrays, Working with Files and Directories, Working with Databases, Working with Cookies, Sessions and Headers	7		PPT
	Introduction to jQuery: Fundamentals, Selectors, methods to access HTML attributes, methods for traversing, manipulators, events, effects	4		PPT

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:SYCS SEMESTER: SEM-III MONTH: AUG-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: Master concepts of stored procedure and triggers and its use. Learn about using PL/SQL for data management and understand concepts and implementations of transaction management and crash recovery.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-4 DBMS, UNIT-1	**Stored Procedures:** Types and benefits of stored procedures, creating stored procedures, executing stored procedures, altering stored procedures, viewing stored procedures.	5	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross , Database Management Systems by Ramakrishnam, Gehrke.	PPT, GoogleMeet, Jamboard ,Slido.
	Triggers: Concept of triggers, Implementing triggers – creating triggers, Insert, delete, and update triggers, nested triggers, viewing, deleting and modifying triggers, and enforcing data integrity through triggers.	4		
	Sequences: creating sequences, referencing, altering and dropping a sequence.	2		
	File Organization and Indexing: Cluster, Primary and secondary indexing, Index data structure: hash and Tree based indexing	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Comparison of file organization: cost model, Heap files, sorted files, clustered files. Creating, dropping and maintaining indexes.	2		
UNIT-2	**Fundamentals of PL/SQL:** Defining variables and constants, PL/SQL expressions and comparisons: Logical Operators, Boolean Expressions, CASE Expressions Handling.	3	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross	PPT, GoogleMeet, Jamboard ,Slido
	Null Values in Comparisons and Conditional Statements, PL/SQL Datatypes: Number Types, Character Types, Boolean Type, Datetime and Interval Types.	3		
	Overview of PL/SQL Control Structures: Conditional Control: IF and CASE Statements, IF-THEN Statement, IF-THEN-ELSE Statement,	5		
	CASE Statement, Iterative Control: LOOP and EXIT Statements, WHILE-LOOP, FOR-LOOP, Sequential Control: GOTO and NULL Statements	4		
UNIT 3	**Transaction Management:** ACID Properties, Serializability, Two-phase Commit Protocol, Concurrency Control, Lock Management	3	SQL,PL/SQL - The Programming language of Oracle by Ivan Bayross, Database Management Systems by	PPT, GoogleMeet, Jamboard , Slido.
	Lost Update Problem, Inconsistent Read Problem , Read-Write Locks, Deadlocks Handling, Two Phase Locking protocol	3		
	DCL Statements: Defining a transaction, Making Changes Permanent with COMMIT, Undoing Changes with ROLLBACK, Undoing Partial Changes with SAVEPOINT and ROLLBACK.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Crash Recovery: ARIES algorithm. The log based recovery, recovery related structures like transaction and dirty page table	3	Ramakrishnam, Gehrke	
	Write-ahead log protocol, check points, recovery from a system crash, Redo and Undo phases.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NEHA RAJENDRAKUMAR PATIL DEPARTMENT:CS

CLASS:SYCS SEMESTER: SEM-3 MONTH: AUG-DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
physical interfaces and electronics of Raspberry Pi and program them using practical's
Learn how to make consumer grade IoT safe and secure with proper use of protocols.

PAPER, TITLE,UNIT	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper6,Physical computing and IOT programming, UNIT 1	**SoC and Raspberry Pi System on Chip**: What is System on chip? Structure of System on Chip. **SoC products:** FPGA, GPU, APU, Compute Units.	4	Physical computing IOT programming by Himalaya publication	GOOGLE SIDES, GOOGLE MEET,PPT
	ARM 8 Architecture: SoC on ARM 8. ARM 8 Architecture Introduction	4		
	Introduction to Raspberry Pi: Introduction to Raspberry Pi, Raspberry Pi Hardware, Preparing your raspberry Pi.	4		
	Raspberry Pi Boot: Learn how this small SoC boots without BIOS. Configuring boot sequences and hardware	3		
	Programming Raspberry Pi	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 2	**Raspberry Pi and Linux**: About Raspbian, Linux Commands, Configuring Raspberry Pi with Linux Commands		Physical computing IOT programming by Himalaya publication	GOOGLE SIDES, GOOGLE MEET,PPT
	Programing interfaces: Introduction to Node.js, Python.	4		
	Raspberry Pi Interfaces: UART, GPIO, I2C, SPI	4		
	Useful Implementations: Cross Compilation, Pulse Width Modulation, SPI for Camera.	4		
Unit 3	. **Introduction to IoT**: What is IoT? IoT examples, Simple IoT LED Program.	3	Physical computing IOT programming by Himalaya publication	GOOGLE SIDES, GOOGLE MEET,PPT
	IoT and Protocols **IoT Security**: HTTP, UPnp, CoAP, MQTT, XMPP.	4		
	IoT Security and Interoperability: Risks, Modes of Attacks, Tools forSecurity and Interoperability.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: Computer Science

CLASS: Sybsc(CS)

SEMESTER: 3

MONTH:August to December

ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:

- To give the learner a broad exposure of combinatorial Mathematics through applications especially the Computer Science applications.
.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: Combinatorics and Graph Theory **<u>Unit 1:</u>**	**Introduction to Combinatorics:** ● Enumeration, Combinatorics and Graph Theory/ Number Theory/Geometry and Optimization, Sudoku Puzzles. ● Strings, Sets, and Binomial Coefficients: Strings- A First Look, Combinations, Combinatorial, The Ubiquitous Nature of Binomial Coefficients, The Binomial, Multinomial Coefficients.	5	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Introduction to Combinatorics:	• Induction: Introduction, The Positive Integers are Well Ordered, The Meaning of Statements, Binomial Coefficients Revisited, Solving Combinatorial Problems Recursively,	6	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop
	• Mathematical Induction, and Inductive Definitions Proofs by Induction. Strong Induction	4	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop
Unit 2 **Graph Theory**	• **Graph Theory:** Basic Notation and Terminology, Multigraphs: Loops and Multiple Edges, Eulerian and Hamiltonian Graphs,	6	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop
	• Graph Coloring, Planar Counting, Labeled Trees, A Digression into Complexity Theory. Applying Probability to Combinatorics	5	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop
	• Small Ramsey Numbers, Estimating Ramsey Numbers, Applying Probability to Ramsey Theory, Ramsey's Theorem The Probabilistic Method	4	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 3 **Network Flow**	• **Network Flows:** Basic Notation and Terminology, Flows and Cuts, • Augmenting Paths, The Ford-Fulkerson Labeling Algorithm,	6	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop
	• A Concrete Example, Integer Solutions of Linear Programming Problems. • Combinatorial Applications of Network Flows: Introduction, Matching in Bipartite Graphs, Chain partitioning	6	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop
	• Pólya's Enumeration Theorem: Coloring the Vertices of a Square.	3	Applied Combinatorics, Mitchel T. Keller and William T. Trotter, 2016,	Power point presentation, Laptop

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Gayatree Karnik DEPARTMENT: Information Technology

CLASS: S.YB.Sc.(C.S.) SEMESTER: III MONTH: AUG-SEPT ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to :

- To learn the role and functions of Operating System
- To Learn Operating System interfaces and structure of Operating System
- To learn how inter process communication takes place
- To learn how multiple threads can run simultaneously

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Operating Systems Unit 1	**Introduction and Operating-Systems Structures**: Definition of Operating system, Operating System's role, Operating-System Operations, Functions of Operating System, Computing Environments	4	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Operating-System Structures: Operating-System Services, User and Operating-System Interface, System Calls, Types of System Calls, Operating-System Structure	4	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Processes: Process Concept, Process Scheduling, Operations on Processes, Interprocess Communication	4	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint
	Threads: Overview, Multicore Programming, Multithreading Models	3	Abraham Silberschatz, Peter Galvin, Greg Gagne, Operating System Concepts, Wiley,8th Edition	Desktop and Laptop,Digital cameras,Microphone,Mobile,Powerpoint

NAME OF THE STAFF: **Mrs. Jagruti S. Raut** DEPARTMENT: **CS** CLASS: **S.Y.B.Sc.(CS)**

SEMESTER: **III** MONTH: **June - September** ACADEMIC YEAR: **2020-21**

LEARNING OBJECTIVE/S:
The learners will be able:

1. Understand Grammar and Languages.
2. Learn about Automata theory and its application in Language Design.
3. Learn about Turing Machines and Pushdown Automata.
4. Understand Linear Bound Automata and its applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS301 Paper I **Theory of Computation** **UNIT I**	**Automata Theory:** Defining Automaton, Finite Automaton, Transitions and Its properties, Acceptability by Finite Automaton	4	Theory of Computer Science, K. L. P Mishra, Chandrasekharan, PHI,3rd Edition. Introduction to Computer Theory, Daniel Cohen, Wiley,2nd Edition.	Chalk and Board
	Nondeterministic Finite State Machines, DFA and NDFA equivalence, Mealy and Moore Machines, Minimizing Automata.	4		
	Formal Languages: Defining Grammar, Derivations, Languges generated by Grammar	3		
	Chomsky Classification of Grammar and Languages, Recursive Enumerable Sets, Operations on Languages, Languages and Automata	4

NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **TYBSCCS** SEMESTER:**V**

MONTH: **AUGUST-DEC** ACADEMIC YEAR: **2020-21**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand computer Graphics programming using Directx or Opengl. Along with the VR and AR they should also aware of GPU, newer technologies and programming using most important API for windows.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS507 **Game Programming** Unit-1	**Cartesian Coordinate system:** The Cartesian XY-plane, Function Graphs, Geometric Shapes, Polygonal Shapes, Areas of Shapes, Theorem of Pythagoras in 2D, Coordinates, Theorem of Pythagoras in 3D, 3D Polygons, Euler's Rule	04	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Laptop,power point
	Vectors: Vector Manipulation, multiplying a Vector by a Scalar, Vector Addition and Subtraction, Position Vectors, Unit Vectors, Cartesian Vectors, Vector Multiplication, Scalar Product, Example of the Dot Product, The Dot Product in Lighting Calculations, The Dot Product in Back-Face Detection, The Vector Product, The Right-Hand Rule, deriving a Unit Normal Vector for a Triangle Areas,	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Laptop,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Calculating 2D Areas			
	Transformations: 2D Transformations, Matrices, Homogeneous Coordinates, 3D Transformations, Change of Axes, Direction Cosines, rotating a Point about an Arbitrary Axis, Transforming Vectors, Determinants, Perspective Projection, Interpolation	06	Computer Graphics, C Version, Donald Hern and Pauline Baker, Pearson Education, 2nd Edition, 1997	Laptop,power point jamboard
	DirectX: Understanding GPU and GPU architectures. How they are different from CPU Architectures? Understanding how to solve by GPU?	02	Introduction To 3D Game Programming With Directx® 11	Laptop,power point
USCS507 **Game Programming** Unit-2	**Introduction To DirectX 11:** COM, Textures and Resources Formats, The swap chain and Page flipping, Depth Buffering, Texture Resource Views, Multisampling Theory and MS in Direct3D, Feature Levels	03	Introduction To 3D Game Programming With Directx® 11	Laptop,power point
	Direct3D 11 Rendering Pipeline: Overview, Input Assembler Stage (IA), Vertex Shader Stage (VS), The Tessellation Stage (TS), Geometry Shader Stage (GS), Pixel Shader Stage (PS), Output merger Stage (OM) Understanding Meshes or Objects, Texturing, Lighting, Blending.	03	Introduction To 3D Game Programming With Directx® 11	Laptop,power point
	Trigonometry: The Trigonometric Ratios, Inverse Trigonometric Ratios, Trigonometric Relationships, The Sine Rule, The Cosine Rule, Compound Angles, Perimeter Relationships	03	Introduction To 3D Game Programming With Directx® 11	Laptop,power point

	Interpolation: Linear Interpolant, Non-Linear Interpolation, Trigonometric Interpolation, Cubic Interpolation, Interpolating Vectors, Interpolating Quaternions	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Laptop,power point
	Curves: Circle, Bezier, B-Splines **Analytic Geometry:** Review of Geometry, 2D Analytic Geometry, Intersection Points, Point in Triangle, and Intersection of circle with straight line.	03	Mathematics for Computer Graphics, John Vince, Springer-Verlag London, 5th Edition,2017	Black Board and chalk,power point
USCS507 **Game Programming** Unit-3	**Introduction to Rendering Engines:** Understanding the current market Rendering Engines. Understanding AR, VR and MR.Depth Mappers, Mobile Phones, Smart Glasses, HMD's **Unity Engine: Multi-platform publishing, VR + AR:** Introduction and working in Unity, 2D, Graphics, Physics, Scripting, Animation, Timeline, Multiplayer and Networking, UI, Navigation and Pathfinding, XR, Publishing.	10	https://docs.unity3d.com/Manual/index.html	Laptop,power point
	Scripting: Scripting Overview, Scripting Tools and Event Overview **XR:** VR, AR, MR, Conceptual Differences. SDK, Devices	05	https://docs.unity3d.com/Manual/index.html	Laptop,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: Information Technology CLASS: TYCS

SEMESTER: V MONTH: Aug to Sept ACADEMIC YEAR:2020-2021

LEARNING OBJECTIVE/S:

•To understand the details of web services technologies like SOAP, WSDL, and UDDI. To learn how to implement and deploy web service client and server.

•To understand the design principles and application of SOAP and REST based web services (JAX-Ws and JAX-RS).

•To understand WCF service. To design secure web services and QoS of Web Services

The learners will be able to:

•Emphasis on SOAP based web services and associated standards such as WSDL. Design SOAP based / RESTful / WCF services Deal with Security and QoS issues of Web Services

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Web Services Elective-II USCS506 Unit 1	**Web services basics:** What Are Web Services? Types of Web Services Distributed computing infrastructure, overview of XML, SOAP, Building Web Services with JAX-WS, Registering and Discovering Web Services, Service Oriented Architecture, Web Services Development Life Cycle, Developing and consuming simple Web Services across platform	15	Web Services: Principles and Technology,Michael P. Papazoglou, Pearson Education Limited, 2008	Laptop

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Web Services Elective-II USCS506 Unit 2	**The REST Architectural style:** Introducing HTTP, The core architectural elements of a RESTful system, Description and discovery of RESTful web services, Java tools and frameworks for building RESTful web services, JSON message format and tools and frameworks around JSON, Build RESTful web services with JAX-RS APIs, The Description and Discovery of RESTful Web Services, Design guidelines for building RESTful web services, Secure RESTful web services.	15	RESTful Java Web Services, Jobinesh Purushothaman, PACKT Publishing,2 nd Edition, 2015	Laptop
Web Services Elective-II USCS506 Unit 3	**Developing Service-Oriented Applications with WCF :** What Is Windows Communication Foundation, Fundamental Windows Communication Foundation Concepts, Windows Communication Foundation Architecture, WCF and .NET Framework Client Profile, Basic WCF Programming, WCF Feature Details. Web Service QoS	15	Developing Service-Oriented Applications with WCF, Microsoft, 2017 https://docs.microsoft.com/en-us/dotnet/framework/wcf/index	Laptop

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: Computer Science

CLASS: Fybsc(CS)

SEMESTER: 2

MONTH: January to March

ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- The learners will be able to know descriptive statistical concepts
- The learner will able to study probability concepts required for computer learners.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Statistical methods and testing of hypothesis **<u>Unit 1</u>**	Standard distribution: • Random variable, discrete random variable, continuous random variable, • Expectation and variance of discrete and continuous random variable	4	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Powerpoint Presentation
	• Pmf and Cdf for discrete random variable	2	Gupta ,S.C.and Kapoor,V.K.	Powerpoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			(2002): Fundamentals of Mathematical statistics	
	• PDF and Cdf for continuous random variable • Reliability	3	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Powerpoint Presentation
	Introduction and properties without proof for following distribution: • Binomial distribution • Normal distribution	3	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Powerpoint Presentation
	Introduction and properties without proof for following distribution: • Chi-square distribution • T- distribution • F- distribution	3	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Powerpoint Presentation

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Statistical methods	Hypothesis testing: • One sided and two sided hypothesis	3	Gupta ,S.C.and Kapoor,V.K.	Powerpoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

and testing of hypothesis **<u>Unit 2</u>**	• Critical region • P- value		(2002): Fundamentals of Mathematical statistics	
	• Test based on t distribution • Test based on normal distribution • Test based on f distribution	5	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Powerpoint Presentation
	• Confidence interval	1	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Powerpoint Presentation
	Analysis of Variance: • One -way ANOVA	3	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Powerpoint Presentation
	Analysis of Variance: • Two- way ANOVA	3	Gupta ,S.C.and Kapoor,V.K. (2002): Fundamentals of Mathematical statistics	Powerpoint Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF:SONALI DATTATRAY SALVANIKAR DEPARTMENT: IT-CS

CLASS:FYCS SEMESTER: SEM-II MONTH: JAN-MAR ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to: Develop logic which will help them to write, compile and debug programs in C language, able to use different data types in a computer program.Also by learning the design programs involving decision structures, loops and functions. It use different data structures and create/update basic data files.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER-1 PROGRAMMING WITH C, UNIT 1	**Structure of C program:** Header and body, Use of comments. Interpreters vs compilers, Python vs C. Compilation of a program. Formatted I/O: printf(), scanf().	1	Programming in ANSI C : E Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.
	Data: Variables, Constants, data types like: int, float char, double and void, short and long size qualifiers, signed and unsigned qualifiers. Compare with datatypes in Python. Compare static typing in C vs dynamic typing in Python .	2		
	Variables: Declaring variables, scope of the variables according to block, hierarchy of data types. Compare explicit declarations in C with implicit declarations in Python.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Types of operators: Arithmetic, relational, logical, compound assignment, increment and decrement, conditional or ternary, bitwise and comma operators. Precedence and order of evaluation, statements and Expressions. Automatic and explicit type conversion.	5		
	Iterations: Control statements for decision making: (i) Branching: if statement, else.. if statement, (does the writer mean if-else or nested ifs)switch statement. (ii) Looping: while loop, do.. while, for loop. (iii) Jump statements: break, continue and goto.	5		
UNIT-2	**Arrays**: (One and two dimensional), declaring array variables, initialization of arrays, accessing array elements. Compare array types of C with list and tuple types of Python.	5	Programming in ANSI C : E Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.
	Data Input and Output functions: Character I/O format: getch(), getche(), getchar(), getc(), gets(), putchar(), putc(), puts().	3		
	Manipulating Strings: Declaring and initializing String variables, Character and string handling functions. Compare with Python strings.	3		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Functions: Function declaration, function definition, Global and local variables, return statement, Calling a function by passing values.	3		
	Recursion: Definition, Recursive functions.	1		
UNIT 3	**Pointer**: Fundamentals, Pointer variables, Referencing and de-referencing, Pointer Arithmetic, Using Pointers with Arrays, Using Pointers with Strings, Array of Pointers, Pointers as function arguments, Functions returning pointers.	5	Programming in ANSI C : E Balagurusamy	PPT, GoogleMeet, Jamboard ,Slido.
	Dynamic Memory Allocation: malloc(), calloc(), realloc(), free() and sizeof operator. Compare with automatic garbage collection in Python.	2		
	Structure: Declaration of structure, reading and assignment of structure variables, Array of structures, arrays within structures, structures within structures. Compare C structures with Python tuples.	4		
	Unions: Defining and working with unions.	1		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	File handling: Different types of files like text and binary, Different types of functions: fopen(), fclose(), fgetc(), fputc(), fgets(), fputs(), fscanf(), fprintf(), getw(), putw(), fread(), fwrite(), fseek().	3		

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 45

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: FYCS

SEMESTER: II MONTH: JANUARY-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand how to read/write to files using python.
- Catch their own errors that happen during execution of programs.
- Get introductions to the concept of pattern matching.
- Be familiar with the concepts of GUI controls and designing GUI applications.
- Connect to the database to move the data to/from the application.
- Know how to connect to computers, read from URL and send email.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS202, Unit 1, Programming with Python- II	Python File Input-Output: Opening and closing files, various types of file modes, reading and writing to files, manipulating directories. Iterables, iterators and their problem solving applications.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation
	Exception handling: What is an exception, various keywords to handle exceptions such try, catch, except, else, finally, raise.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Regular Expressions: Concept of regular expression, various types of regular expressions, using match function.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation
USCS202, Unit 2, Programming with Python- II	GUI Programming in Python (using Tkinter/wxPython/Qt) What is GUI, Advantages of GUI	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation
	Introduction to GUI library. Layout management, events and bindings, fonts, colours, drawing on canvas (line, oval, rectangle, etc.)	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation
	Widgets such as : frame, label, button, checkbutton, entry, listbox, message, radiobutton, text, spinbox etc	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation
USCS202, Unit 3, Programming with Python-II	Database connectivity in Python: Installing mysql connector, accessing connector module module, using connect, cursor, execute & close functions.	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Reading single & multiple results of query execution, executing different types of statements, executing transactions, understanding exceptions in database connectivity	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation
	Network connectivity: Socket module, creating server-client programs, sending email, reading from URL	05	Paul Gries, Programming: An Introduction to Computer Science Using Python 3	PowerPoint Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MONIKA MADHUKAR RAUT DEPARTMENT: IT/CS

CLASS: FYCS SEMESTER: II MONTH: JANUARY TO MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
To explore and understand the concepts of Data Structures and its significance in programming. Provide and holistic approach to design, use and implement abstract data types. Understand the commonly used data structures and various forms of its implementation for different applications using Python.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Data Structures (USCS204) Unit I	Abstract Data Types: Introduction, The Date Abstract Data Type, Bags, Iterators. Application	02	Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Google Jam board, Slides, Docs
	Arrays: Array Structure, Python List, Two Dimensional Arrays, Matrix Abstract Data Type, Application	02		
	Sets and Maps: Sets-Set ADT, Selecting Data Structure, List based Implementation, Maps-Map ADT, List Based Implementation, Multi-Dimensional Arrays-Multi-Array ADT, Implementing Multiarray, Application	02		
	Algorithm Analysis: Complexity Analysis-Big-O Notation, Evaluating Python Code, Evaluating Python List, Amortized Cost, Evaluating Set ADT, Application	02		
	Searching and Sorting: Searching-Linear Search, Binary Search, Sorting-Bubble, Selection and Insertion Sort, Working with Sorted Lists-Maintaining Sorted List, Maintaining sorted Lists.	02		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Data Structures (USCS204) Unit II	Linked Structures: Introduction, Singly Linked List-Traversing, Searching, Prepending and Removing Nodes, Bag ADT-Linked List Implementation. Comparing Implementations, Linked List Iterators, More Ways to Build Kinked Lists, Applications-Polynomials	02	Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Google Jam board, Slides, Docs
	Stacks: Stack ADT, Implementing Stacks-Using Python List, Using Linked List, Stack Applications-Balanced Delimiters, Evaluating Postfix Expressions	02		
	Queues: Queue ADT, Implementing Queue-Using Python List, Circular Array, Using List, Priority Queues- Priority Queue ADT, Bounded and unbounded Priority Queues	02		
	Advanced Linked List: Doubly Linked Lists-Organization and Operation, Circular Linked List-Organization and Operation, Multi Lists	02		
Data Structures (USCS204) Unit III	Recursion: Recursive Functions, Properties of Recursion, Its working, Recursive Applications	02	Data Structure and algorithm Using Python, Rance D. Necaise, 2016 Wiley India Edition	Google Jam board, Slides, Docs
	Hash Table: Introduction, Hashing-Linear Probing, Clustering, Rehashing, Separate Chaining, Hash Functions	02		
	Advanced Sorting: Merge Sort, Quick Sort, Radix Sort, Sorting Linked List	02		
	Binary Trees: Tree Structure, Binary Tree-Properties, Implementation and Traversals, Expression Trees, Heaps and Heapsort, Search Trees	02

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DEVIKA VAMAN KENI DEPARTMENT: CS

CLASS: FYCS SEMESTER: SEM-2 MONTH: JAN-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- Familiarize with the concept of Green Computing and Green IT infrastructure for making computing and information system environment sustainable.
- Learn about green IT can be achieved in and by hardware, software, network communication and data center operations.
- Understand the strategies, frameworks, processes and management of green IT.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
7 GREEN TECHNOLOGY UNIT 1	**Green IT Overview:** Introduction , Environmental Concerns and Sustainable Development, Environmental Impacts of IT, Green I , Holistic Approach to Greening IT, Greening IT, Applying IT for Enhancing Environmental Sustainability, Green IT Standards and Eco-Labelling of IT , Enterprise Green IT Strategy, Green Washing, Green IT: Burden or Opportunity?	4	Harnessing Green IT: Principles and Practices by San Murugesan, G. R. Ganadharan, Wiley & IEEE.	GOOGLE MEET AND PPT
	Green Devices and Hardware: Introduction , Life Cycle of a Device or Hardware, Reuse, Recycle and Dispose	3		
	Green Software: Introduction , Processor Power States , Energy-Saving Software Techniques, Evaluating and Measuring Software Impact to Platform Power	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Sustainable Software Development: Introduction, Current Practices, Sustainable Software, Software Sustainability Attributes, Software Sustainability Metrics, Sustainable Software Methodology, Defining Actions	4		
UNIT 2	**Green Data Centres:** Data Centres and Associated Energy Challenges, Data Centre IT Infrastructure, Data Centre Facility Infrastructure: Implications for Energy Efficiency, IT Infrastructure Management, Green Data Centre Metrics	4	Harnessing Green IT: Principles and Practices by San Murugesan, G. R. Ganadharan, Wiley & IEEE.	GOOGLE MEET AND PPT
	Green Data Storage: Introduction , Storage Media Power Characteristics, Energy Management Techniques for Hard Disks, System-Level Energy Management	4		
	Green Networks and Communications: Introduction, Objectives of Green Network Protocols, Green Network Protocols and Standards	3		
	Enterprise Green IT Strategy: Introduction, Approaching Green IT Strategies, Business Drivers of Green IT Strategy, Business Dimensions for Green IT Transformation, Organizational Considerations in a Green IT Strategy, Steps in Developing a Green IT Strategy, Metrics and Measurements in Green Strategies.	4		
UNIT 3	**Sustainable Information Systems and Green Metrics:** Introduction, Multilevel Sustainable Information, Sustainability Hierarchy Models, Product Level Information, Individual Level Information, Functional Level Information, Organizational Level Information, Measuring the Maturity of Sustainable ICT	4	Harnessing Green IT: Principles and Practices by San Murugesan, G. R. Ganadharan, Wiley & IEEE.	GOOGLE MEET AND PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Enterprise Green IT Readiness: Introduction, Readiness and Capability, Development of the G-Readiness Framework, Measuring an Organization's G-Readiness	3		
	Sustainable IT Services: Creating a Framework for Service Innovation: Introduction, Factors Driving the Development of Sustainable IT, Sustainable IT Services (SITS), SITS Strategic Framework	4		
	Green Enterprises and the Role of IT: Introduction, Organizational and Enterprise Greening, Information Systems in Greening Enterprises, Greening the Enterprise: IT Usage and Hardware, Inter-organizational Enterprise Activities and Green Issues	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Suvarna S Kannav DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: FYCS SEMESTER: II MONTH: JAN-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S: Students should have a good working knowledge of Linux, from both a graphical and command line perspective, allowing them to easily use any Linux distribution.This course shall help student to learn advanced subjects in computer science practically. Student shall be able to progress as a Developer or Linux System Administrator using the acquired skill set.

.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS203 Linux Unit I	Introduction History of Linux, Philosophy, Community, Terminology, Distributions, Linux kernel vs distribution. Why learn Linux? Importance of Linux in software ecosystem: web servers, supercomputers, mobile, servers.	05	Unix Concepts and Applications by Sumitabha Das., Official Ubuntu Book, 8th Edition, by Matthew Helmke & Elizabeth K. Joseph with Jose Antonio Rey and Philips Ballew, Prentice Hall	Blackboard, Chalk
	Installation Installation methods, Hands on Installation using CD/DVD or USB drive.	03		Blackboard, Chalk
	Linux Structure Linux Architecture, Filesystem basics, The boot process, init scripts, runlevels,shutdown process, Very basic introductions to Linux processes, Packaging methods:rpm/deb, Graphical Vs Command line.	07		Blackboard, Chalk
USCS203 Linux	Graphical Desktop: Session Management, Basic Desktop Operations, Network	07	Unix Concepts and Applications	Blackboard, Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit II	Management, Installing and Updating Software, Text editors: gedit, vi, vim, emacs, Graphics editors,Multimedia applications.		by Sumitabha Das., Official Ubuntu Book, 8th Edition, by Matthew Helmke & Elizabeth K. Joseph with Jose Antonio Rey and Philips Ballew, Prentice Hall	
	Command Line Command line mode options, Shells, Basic Commands, General Purpose Utilities,Installing Software, User management, Environment variables, Command aliases.	03		Blackboard, Chalk
	Linux Documentation: man pages, GNU info, help command, More documentation sources	02		Blackboard, Chalk
	File Operations Filesystem, Filesystem architecture, File types, File attributes, Working with files, Backup, compression	03		Blackboard, Chalk
USCS203 Linux UnitIII	Security Understanding Linux Security, Uses of root, sudo command, working with passwords, Bypassing user authentication, Understanding ssh	05	Unix Concepts and Applications by Sumitabha Das., Official Ubuntu Book, 8th Edition, by Matthew Helmke & Elizabeth K. Joseph with Jose Antonio Rey and Philips Ballew, Prentice Hall	Blackboard, Chalk
	Networking: Basic introduction to Networking, Network protocols: http, ftp etc., IP address, DNS,Browsers, Transferring files.ssh, telnet, ping, traceroute, route, hostname, networking GUI.	04		Blackboard, Chalk
	Basic Shell Scripting Features and capabilities, Syntax, Constructs, Modifying files, Sed, awk command,File manipulation utilities, Dealing with large files and Text, String manipulation,Boolean expressions, File tests, Case, Debugging, Regular expressions	06		Blackboard, Chalk

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: II MONTH: MARCH ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the concept of limits, continuity and derivatives of functions of two or more variables.
- Find the first and second order partial derivatives of functions of two variables.
- Find the linearization of the given function at the given point.
- Understand the concept of gradients and directional derivatives.
- Find the derivative of a function of two variable using chain rule.
- Find the relative extrema and saddle point of the given function of two variables using partial derivatives.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CALCULUS Unit 3 Partial Derivatives & its applications	➢ Limit, continuity and partial derivatives of functions of two or more variables ➢ Linearization and chain rule ➢ Directional derivatives and gradients ➢ Tangent planes and normal lines ➢ Maxima and minima of functions of two variables	2 1 1 2 2	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 8

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Late Shri. Vishnu Waman Thakur Charitable Trust
BhaskarWaman Thakur College of Science
YashvantKeshavPatil College of Commerce
VidhyaDayanandPatil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT 2 PLAN)

NAME OF THE STAFF: SHREYA TANEJA DEPARTMENT: MATHEMATICS

CLASS: FY B.SC COMPUTER SCIENCE SEMESTER: II MONTH: APRIL ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to :

- Evaluate indefinite integral using different methods like substitution, integration by parts etc.
- Evaluate definite integral using the properties of definite integration and by Simpson's rule
- Find the area bounded between curves and length of plane curve using integration.
- Solve the given differential equation using different methods

s

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
CALCULUS Unit 2 Integration & its applications	➢ Indefinite and definite integration ➢ Area between two curves ➢ Length of plane curve ➢ Simpson's rule ➢ Solving differential equations	2 2 1 1 2	CALCULUS & ANALYTIC GEOMETRY (THOMAS & FINNY)	LECTUREMETHOD, DISCUSSION METHOD, PROBLEM SOLVING METHOD TEACHING AIDS : Blackboard, Chalk & Duster

Teaching plan sycs sem 4 2020-21

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Manisha Machhindra Kotkar

DEPARTMENT: computer science

CLASS: S.Y.B.Sc.(CS)

SEMESTER: 4

MONTH: December to March ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:

The learners will be able to :

- Appreciate the relevance of linear algebra in the field of computer science.
- Understand the concepts through program implementation
- Instill a computational thinking while learning linear algebra.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405 **Linear Algebra using python** **<u>Unit 1</u>**	Field: • Introduction to complex number,numbers in python,Abstracting over field • playing with GF(2),	4		Black board, chalk and duster
	Vector Space: • Vectors are functions, • Vector addition and scalar multiplication	3		Black board, chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	• Combining vector addition and scalar multiplication • Geometry of sets of vectors			
	• Dictionary based representation of vectors • Dot product	2		Black board, chalk and duster
	Linear system : • Homogeneous and non homogeneous equation • Solving triangular system of linear equations	3		Black board, chalk and duster
	• Linear combination and linear span	3		Black board, chalk and duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405 **Linear Algebra using python** **<u>Unit 2</u>**	Matrix: • Matrices as vectors, transpose • Matrix -vector and vector-matrix multiplication in terms of linear combination • Matrix -vector and vector-matrix multiplication in terms of dot-product	3		Black board,chalk and duster
	• Null space, computing Sparse matrix, vector product • Linear function • Inner product and outer product	3		Black board,chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	• From function inverse to matrix inverse			
	Basis: • Coordinate system,Two greedy algorithm for finding set of generators • Minimum spanning forest and GF(2) • Linear dependence and independence	3		Black board,chalk and duster
	Basis: • Basis, unique representation,change of basis • Computational problems involving finding a basis	3		Black board,chalk and duster
	Dimensions: • Dimension and rank, • Direct sum • Dimension and linear function • The annihilator	3		Black board,chalk and duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15 lectures

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS405	Gaussian elimination: • Row echelon form, Gaussian elimination over GF(2)	4		Black board, chalk and duster

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Linear Algebra using python **<u>Unit 3</u>**	• Solving matrix - vector equation using Gaussian distribution • Finding basis for null space • Factoring integers			
	Inner product: • The inner product for vectors over field • Orthogonality	2		Black board, chalk and duster
	Orthogonalisation: • Projection orthogonal to multiple vectors • Projecting orthogonal to mutually orthogonal vectors • Finding an orthogonal set of generators • Orthogonal complement	4		Black board, chalk and duster
	Eigen vectors: • Modeling discrete dynamic processes • Diagonalization of the Fibonacci matrix • Finding Eigen values and Eigen vectors • Coordinate representation in terms of Eigen vectors	3		Black board, chalk and duster
	• The internet worm • Markow chains • Modeling a web surfer-page rank	2		Black board, chalk and duster

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande

DEPARTMENT: Computer Science

CLASS: S.Y.C.S.

SEMESTER: IV

MONTH: Jan - March

ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

Learner will able to understand the concept of networking.
Useful to proceed with industrial requirement and international vendor certification

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS403 Computer Networks UNIT - 1	Introduction to data communication, Components, Data Representation, Data Flow, Networks, Network Criteria, Physical Structures, Network types, Local Area Network, Wide Area Network, Switching, The Internet, Accessing the Internet, standards and administration Internet Standards.	02	Data Communication and Networking , Behrouz Forouzan	Google Mett PPT
	Network Models, Protocol layering, Scenarios, Principles of Protocol Layering, Logical Connections, TCP/IP Protocol Suite, Layered Architecture, Layers in the TCP/IP Protocol Suite, Encapsulation and Decapsulation, Addressing, Multiplexing and Demultiplexing. Detailed introduction to Physical Layer, Detailed	08		Google Mett PPT

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	introduction to Data-Link Layer, Detailed introduction to Network Layer, Detailed introduction to Transport Layer, Detailed introduction to Application Layer.			
	Data and Signals, Analog and Digital Data, Analog and Digital Signals, Sine Wave Phase, Wavelength, Time and Frequency Domains, Composite Signals, Bandwidth, Digital Signal, Bit Rate, Bit Length, Transmission of Digital Signals, Transmission Impairments, Attenuation, Distortion, Noise, Data Rate Limits, Performance, Bandwidth, Throughput, Latency (Delay)	05		Google Mett PPT
USCS403 Computer Networks UNIT - 2	Digital Transmission digital-to-digital conversion, Line Coding, Line Coding Schemes, analog-to-digital conversion, Pulse Code Modulation (PCM), Transmission Modes, Parallel Transmission, Serial Transmission. Analog Transmission, digital-to-analog Conversion, Aspects of Digital-to-Analog Conversion, Amplitude Shift Keying, Frequency Shift Keying, Phase Shift Keying, analog-to-analog Conversion, Amplitude Modulation (AM), Frequency Modulation (FM), Phase Modulation (PM), Multiplexing, Frequency-Division Multiplexing, Wavelength-Division Multiplexing, Time-Division Multiplexing. Transmission Media, Guided Media, Twisted-Pair Cable, Coaxial Cable, Fiber-Optic Cable. Switching, Three Methods of Switching , Circuit Switched Networks, Packet Switching,	09	Data Communication and Networking , Behrouz Forouzan	Google Mett PPT
	Introduction to Data-Link Layer, Nodes and Links, Services, Two Sub-layers, Three Types of addresses, Address Resolution Protocol (ARP). Error Detection and Correction, introduction, Types of Errors, Redundancy, Detection versus Correction,	06		Google Mett PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS403 Computer Networks UNIT - 3	Media Access Control (MAC), random access, CSMA, CSMA/CD, CSMA/CA, controlled access, Reservation, Polling, Token Passing, channelization, FDMA, TDMA, CDMA.	02	Data Communication and Networking , Behrouz Forouzan	Google Mett PPT
	Connecting Devices and Virtual LANs, connecting devices, Hubs, Link-Layer	02		
	Introduction to Network Layer, network layer services, Packetizing, Routing and Forwarding, Other Services, IPv4 addresses, Address Space, Classful Addressing.	03		
	Unicast Routing, General Idea, Least-Cost Routing, Routing Algorithms, Distance-Vector Routing, Link-State Routing, Path-Vector Routing, Introduction to Transport Layer, Transport-Layer Services, Connectionless and Connection-Oriented Protocols.	03		
	Transport-Layer Protocols, Service, Port Numbers, User Datagram Protocol, User Datagram, UDP Services, UDP Applications, Transmission Control Protocol, TCP Services, TCP Features, Segment.	03

NAME OF THE STAFF: DORIN REBELLO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: SYBSc(CS) SEMESTER: IV MONTH: JANUARY-MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to : To explore .NET technologies for designing and developing dynamic, interactive and responsive web applications.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper:USCS406 unit:1, Title: .Net Technologies	**The .NET Framework:**.NET Languages, Common Language Runtime, .NET Class Library	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	C# Language Basics: Comments, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods, Classes, Value Types and Reference Types, Namespaces and Assemblies, Inheritance, Static Members, Casting Objects, Partial Classes	3	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	ASP.NET: Creating Websites, Anatomy of a Web Form - Page Directive, Doctype, Writing Code - Code-Behind Class, Adding Event Handlers, Anatomy of an ASP.NET Application - ASP.NET File Types, ASP.NET Web Folders,	5	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	HTML Server Controls - View State, HTML Control Classes, HTML Control Events, HtmlControl Base Class,	5		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	HtmlContainerControl Class, HtmlInputControl Class, Page Class, global.asax File, web.config File		Beginning ASP.NET 4.5 in C#	
Paper:USCS406 unit:2, Title: .Net Technologies	**Web Controls:** Web Control Classes, WebControl Base Class, List Controls, Table Controls, Web Control Events and AutoPostBack, Page Life Cycle	3	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	State Management: ViewState, Cross-Page Posting, Query String, Cookies, Session State, Configuring Session State, Application State	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	Validation: Validation Controls, Server-Side Validation, Client-Side Validation, HTML5 Validation, Manual Validation, Validation with Regular Expressions	3	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	Rich Controls: Calendar Control, AdRotator Control, MultiView Control	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	Themes and Master Pages: How Themes Work, Applying a Simple Theme, Handling Theme Conflicts, Simple Master Page and Content Page, Connecting Master pages and Content Pages, Master Page with Multiple Content Regions, Master Pages and Relative Paths	3	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	Website Navigation: Site Maps, URL Mapping and Routing, SiteMapPath Control, TreeView Control, Menu Control	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper:USCS406 unit:3, Title: .Net Technologies	**ADO.NET:** Data Provider Model, Direct Data Access - Creating a Connection, Select Command, DataReader, Disconnected Data Access	3	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	Data Binding: Introduction, Single-Value Data Binding, Repeated-Value Data Binding, Data Source Controls – SqlDataSource	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	Data Controls: GridView, DetailsView, FormView	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	Working with XML: XML Classes – XMLTextWriter, XMLTextReader	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	Caching: When to Use Caching, Output Caching, Data Caching	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	LINQ: Understanding LINQ, LINQ Basics,	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.
	ASP.NET AJAX: ScriptManager, Partial Refreshes, Progress Notification, Timed Refreshes	2	Beginning ASP.NET 4.5 in C#	Online mode Google meet Google slides.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. HARSHALI SHAILESH MANKAR DEPARTMENT: CS CLASS: TYCS

SEMESTER: VI MONTH: DECEMBER-MARCH ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- Ability to use knowledge of data structures and indexing methods in information retrieval Systems·
- Understand the underlined problems related to IR
- Acquire the necessary experience to design, and implement real applications using Information Retrieval systems.

APER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS604, Information Retrieval Unit 1	Introduction to Information Retrieval: Introduction, History of IR, Components of IR, and Issues related to IR, Boolean retrieval, Dictionaries and tolerant retrieval.	07	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008 2. Modern Information Retrieval: The Concepts and Technology behind Search, Ricardo Baeza - Yates and Berthier Ribeiro – Neto, 2 nd Edition, ACM Press Books 2011.	Jamboard,Bamboo Paper PowerPoint
USCS604, Information Retrieval	Link Analysis and Specialized Search: Link Analysis, hubs and authorities, Page Rank and HITS algorithms, Similarity, Hadoop & Map	12	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and	Jamboard ,Bamboo Paper PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 2	Reduce, Evaluation, Personalized search, Collaborative filtering and content-based recommendation of documents and products, handling ―invisible‖ Web, Snippet generation, Summarization, Question Answering, Cross-Lingual Retrieval.		H. Schütze, Cambridge University Press, 2008	
USCS604, Information Retrieval Unit 3	Web Search Engine: Web search overview, web structure, the user, paid placement, search engine optimization/spam, Web size measurement, search engine optimization/spam, Web Search Architectures.	06	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008	Jamboard ,Bamboo Paper PowerPoint
	XML retrieval: Basic XML concepts, Challenges in XML retrieval, A vector space model for XML retrieval, Evaluation of XML retrieval, Text-centric versus data-centric XML retrieval.	06	1. Introduction to Information Retrieval, C. Manning, P. Raghavan, and H. Schütze, Cambridge University Press, 2008	Jamboard ,Bamboo Paper, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shweta Kiran Yande

DEPARTMENT: Computer Science

CLASS: T.Y.C.S.

SEMESTER: VI

MONTH: Jan - March

ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

After completion of this course, learner should be able to list various applications of wireless sensor networks, describe the concepts, protocols, design, implementation and use of wireless sensor networks. Also implement and evaluate new ideas for solving wireless sensor network design issues.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 01	**Introduction:** Introduction to Sensor Networks, unique constraints and challenges. Advantage of Sensor Networks, Applications of Sensor Networks, Mobile Adhoc NETworks (MANETs) and Wireless Sensor Networks, Enabling technologies for Wireless Sensor Networks.	07	Protocols and Architectures for Wireless Sensor Network, Holger Kerl, Andreas Willig, John Wiley and Sons, 2005	Google Mett PPT
	Sensor Node Hardware and Network Architecture: Single-node architecture, Hardware components & design constraints, Operating systems and execution environments, introduction to TinyOS and nesC. Network architecture, Optimization goals and figures of merit, Design principles for WSNs, Service interfaces of WSNs, Gateway concepts.	08		Google Mett PPT

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 02	**Medium Access Control Protocols:** Fundamentals of MAC Protocols, MAC Protocols for WSNs, Sensor-MAC Case Study.	05	Wireless Sensor Networks Technology, Protocols, and Applications ,Kazem Sohraby, Daniel Minoli and TaiebZnati, John Wiley & Sons, 2007	Google Mett PPT
	Routing Protocols : Data Dissemination and Gathering, Routing Challenges and Design Issues in Wireless Sensor Networks, Routing Strategies in Wireless Sensor Networks.	05		Google Mett PPT
	Transport Control Protocols : Traditional Transport Control Protocols, Transport Protocol Design Issues, Examples of Existing Transport Control Protocols, Performance of Transport Control Protocols.	05		Google Mett PPT
USCS601 **Wireless Sensor Networks and Mobile Communication** UNIT : 03	**Introduction, Wireless Transmission and Medium Access Control:** Applications, A short history of wireless communication.	02	Mobile communications, Jochen Schiller,2nd Edition, Addison wisely , Pearson Education,2012	Google Mett PPT
	Wireless Transmission: Frequency for radio transmission, Signals, Antennas, Signal propagation, Multiplexing, Modulation, Spread spectrum, Cellular systems.	05		Google Mett PPT
	Telecommunication, Satellite and Broadcast Systems: GSM: Mobile services, System architecture, Radio interface, Protocols, Localization And Calling, Handover, security, New data services; DECT: System architecture, Protocol architecture; ETRA, UMTS and IMT- 2000. Satellite Systems: History, Applications, Basics: GEO, LEO, MEO; Routing, Localization, Handover.	08		Google Mett PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: SAMPADA DESHMUKH DEPARTMENT: INFORMATION TECHNOLOGY CLASS: T.Y.C.S.

SEMESTER: VI MONTH: JAN - MARCH ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the procedures for identification, preservation, and extraction of electronic evidence
- Understand auditing and investigation of network and host system intrusions
- Learn analysis of documentation of information gathered
- Investigate various media to collect evidence, report them in a way that would be acceptable in the court of law
- Plan and prepare for all stages of an investigation - detection, initial response and management interaction

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: MSc.CS(Part 1)

SEMESTER: I MONTH: SEPTEMBER -JANUARY ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of Robotics and Artificial Intelligence.
- Develop logic for developing Robot.
- Be familiar about the basic concepts of Artificial Intelligence.
- Apply the problem solving skills on Artificial Intelligence Algorithms.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS104, Unit 1, Robotics and Artificial Intelligence.	What is a Robot? Definition, History of Robots: Control Theory, Cybernetics, Grey Walter Tortoise, Analog Electronic Circuit, Reactive Theory, Braitenberg's Vehicle, Artificial Intelligence, Vision Based Navigation, Types of Robot Control.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	Robot Components: Embodiment, Sensors, States, Action, Brains and Brawn, Autonomy, Arms, Legs, Wheels, Tracks, and What really drives them effectors and actuators: Effector, Actuator, Passive and Active Actuation, Types of Actuator, Motors, Degree of freedom Locomotion: Stability, Moving and Gaits, Wheels and Steering, Staying on the path.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation

	Manipulators: Endeffectors, Teleoperation, Why is manipulation hard? Sensors: Types of Sensors, Levels of Processing, Passive and Active sensors, Switches, Light sensors, Resistive position sensor.	05	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
PSCS104, Unit 2, Robotics and Artificial Intelligence.	Ultrasonic and Sonar sensing, Specular Reflection, Laser Sensing, Visual Sensing, Cameras, Edge Detection, Motion Vision, Stereo Vision, Biological Vision, Vision for Robots	07	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	Feedback or Closed Loop Control: Example of Feedback Control Robot, Types of feedback control, Feed forward or Open loop control.	08	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
PSCS104, Unit 3, Robotics and Artificial Intelligence.	Algorithm, Architecture, The many ways to make a map, What is planning, Cost of planning, Reactive systems, Action selection, Subsumption architecture.	07	The Robotics Primer by Maja J Matarić, MIT press Cambridge, Massachusetts, London, England (2007).	Power Point Presentation
	How to sequence behavior through world, hybrid control, Behavior based control and Behavior Coordination, Behavior Arbitration, Distributed mapping, Navigation and Path planning.	08	The Robotics Primer by Maja J Matarić, MIT press Cambridge,	Power Point Presentation

			Massachusetts, London, England (2007).	
PSCS104, Unit 4, Robotics and Artificial Intelligence.	Introduction, State space search: Generate and test, Simple search, Depth First Search (DFS), Breadth First Search (DFS), Comparison and quality of solutions.	07	Artificial Intelligence: A Modern Approach, 3e, Stuart Jonathan Russell, Peter Norvig, Prentice Hall Publications (2010)	Power Point Presentation
	Heuristic Search: Heuristic functions, Best First Search (BFS), Hill Climbing, Local Maxima, Beam search, Tabu search. Finding Optimum paths: Brute force, branch & bound, refine search, Dijkstra's algorithm, A* algorithm. Admissibility of A* algorithm.	08	Artificial Intelligence: A Modern Approach, 3e, Stuart Jonathan Russell, Peter Norvig, Prentice Hall Publications (2010)	Power Point Presentation

SEMESTER: **I** MONTH: **October-January** ACADEMIC YEAR: **2020-2021**

LEARNING OBJECTIVE/S:
The learners will be able:

- To acquire knowledge about how to execute queries on these fragments that will demonstrate distributed databases environment.
- To learn how to create temporal database
- To learn how to create XML database
- To understand multimedia database systems.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS103 **Paper III** **Advanced Database Systems** **UNIT I**	**Unit I: Distributed Database Concepts** Definition of Distributed databases and Distributed Database Management System (DDBMS), Distributed transparent system. DDBMS Architecture: DBMS standardization, Global, Local, External, and Internal Schemas, Architectural models for DDBMS. Distributed database design: Design problem of distributed systems, Design, strategies (top-down, bottom-up), Fragmentation, Allocation and replication of fragments. Query Processing Overview, Query Optimization.	15	Database Management Systems, 3rd edition, Raghu Ramakrishnan and Johannes Gehrke, McGraw-Hill (2002).	Microsoft PowerPoint Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: **MSCCS** SEMESTER:I

MONTH: **OCT-JAN** ACADEMIC YEAR: **2020-21**

LEARNING OBJECTIVE/S:

The learners will be able to :

understand basic principles of algorithm design and why algorithm analysis is important
understand how to implement algorithms in JAVA
understand how to transform new problems into algorithmic problems with efficient solutions
understand algorithm design techniques for solving different problems

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS101 Analysis of Algorithms and Researching Computing **Unit I: Design strategies**	The Role of Algorithms in Computing: Algorithms as a technology. Getting Started: Insertion sort, Analyzing algorithms, Designing algorithms. Growth of Functions: Asymptotic notation, Standard notations and common functions. Divide-and-Conquer: The maximum-subarray problem, Strassen's algorithm for matrix multiplication, The substitution method for solving recurrences. Probabilistic Analysis and Randomized Algorithms: The hiring problem, Indicator random variables, Randomized algorithms.	15	Introduction to Algorithm, Thomas H Cormen, PHI	power point

Late Shri. Vishnu Waman Thakur Charitable Trust
Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

PSCS101 **Unit II: Advanced Design and Analysis Techniques**	Dynamic Programming: Rod cutting, Elements of dynamic programming, longest common subsequence. Greedy Algorithms: An activity-selection problem, Elements of the greedy strategy, Huffman codes. Elementary Graph Algorithms: Representations of graphs, Breadth-first search, Depth-first search. Minimum Spanning Trees: Growing a minimum spanning tree, Algorithms of Kruskal and Prim. Single-Source Shortest Paths: The Bellman-Ford algorithm, Single-source shortest paths in directed acyclic graphs, Dijkstra's algorithm.	15	Introduction to Algorithm, Thomas H Cormen, PHI	power point
PSCS101 **Unit III: Number-Theoretic Algorithms and NP – Completeness**	Elementary number-theoretic notions, Greatest common divisor, Modular arithmetic, Solving modular linear equations, The Chinese remainder theorem, Powers of an element, The RSA public-key cryptosystem NP-Completeness: Polynomial time, Polynomial-time verification, NP-completeness and reducibility, NP-complete problems. Approximation Algorithms: The vertex-cover problem, The traveling-salesman problem, The set-covering problem, subset-sum problem.	15	Introduction to Algorithm, Thomas H Cormen, PHI	power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Ms. Shweta Kiran Yande DEPARTMENT: CS

CLASS: M. Sc. C.S SEMESTER: I MONTH: September-January ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:
The learners will be able to:
a. learn different networking protocols, virtualization technique, wireless sensor network.
b. working of wireless sensor network

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper II PSCS102 Advanced Networking Concepts Unit 1	Networking Internet and Intranet, Protocol layer and their services, Network Applications like Web, HTTP, FTP and Electronic Mail in the Internet, Domain Name System, Transport-Layer Services, Multiplexing and Demultiplexing, UDP, TCP, TCP Congestion Control, Network Layer, Virtual Circuit and Datagram Networks, Need of Router, The Internet Protocol (IP), Routing Algorithms, Routing in the Internet.	15	Computer Networking: A Top-Down Approach 6th edition, James F. Kurose, Keith W. Ross, Pearson (2012).	PowerPoint presentation

NAME OF THE STAFF: Mr. BRIJESH Y JOSHI DEPARTMENT: Computer Science

CLASS: M.Sc.C.S. SEMESTER: I MONTH: FEB TO APRIL ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- To be able to understand Big data platform, statistical concepts
- To understand the overview of Big data processing i.e. MapReduce Processing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence	**Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence** Operational and Decision Support System, Data-Information-Knowledge-Decision making-Action cycle. Basic definitions-Business Intelligence; Data warehousing, Business Intelligence architecture, Use and benefits of Business Intelligence. Knowledge Discovery in Databases: KDD process model, Data Pre-processing: Cleaning: Missing Values; Noisy Values; Inconsistent values; redundant values. Outliers, Integration, transformation, reduction, Discretization: Equal Width Binning; Equal Depth Binning, Normalization, Smoothing.	12	Business Intelligence (2nd Edition), Efraim Turban, Ramesh Sharda, Dursun Delen, David King, Pearson (2013)	Google meet, Laptop, PPT

Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence	**Unit II: Introduction to Business Data Warehouse** Definition of Data warehouse, Logical architecture of Data Warehouse, Data Warehouse model- Enterprise warehouse; Data Marts; Virtual warehouse. Populating business Data Warehousing: data integration and extract, transform, load (ETL).	12	Business Intelligence (2nd Edition), Efraim Turban, Ramesh Sharda, Dursun Delen, David King, Pearson (2013)	Google meet, Laptop, PPT
Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence)	**Unit III: Designing Business Data Warehouse** OLTP and OLAP systems, Designing business information warehouse: Principles of dimensional modeling, Data cubes, Data cube operations, data cube schemas.	12	Business Intelligence (2nd Edition), Efraim Turban, Ramesh Sharda, Dursun Delen, David King, Pearson (2013)	Google meet, Laptop, PPT
Elective II - Track C: Business Intelligence and Big Data Analytics (Business Intelligence)	**Unit IV: Introduction to Data Mining** Data mining definitions and process: business and data understanding. Association Analysis: Definition of association rule, General issues: Support; Confidence; Lift; Conviction, Frequent Item sets: APriori Algorithm; Issues with APriori Algorithm, Data structures: Hash tree and FP tree	12	Data Mining: Introductory and Advanced Topics, Dunham, Margaret H, Prentice Hall (2006)	Google meet, Laptop, PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Computer Science.

CLASS: M.Sc. SEMESTER: II MONTH: February To May ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- To understand structure of compiler.
- How to implement basic compiler.
- To understand Parser Implementation.
- To understand data flow analysis.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS202 Design and implementation of Modern Compilers UNIT-I	**Introduction to Compilers** The structure of a compiler, A simple approach to the design of lexical analyzers, Regular expressions, Finite automata, From regular expressions to finite automata, Minimizing the number of states of a DFA.	6	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
	Context-free grammars, Derivations and Parse trees, Parsers, Shift-reduce parsing, Operator-precedence parsing, Top- down parsing, Predictive parsers.	6		Projector, PPT.

PSCS202 Design and implementation of Modern Compilers UNIT-II	**Automatic Construction of Efficient Parsers** LR parsers, The canonical collection of LR(0) items, Constructing SLR parsing tables, Constructing canonical LR parsing tables, Constructing LALR parsing tables, Using ambiguous grammars,	6	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
	An automatic parser generator, Implementation of LR parsing tables, Constructing LALR sets of items.	6		
PSCS202 Design and implementation of Modern Compilers UNIT-III	**Advanced syntax analysis and basic semantic analysis** Syntax-directed translation schemes, Implementation of syntax-directed translators, Initial introduction to the ongoing Tiger compiler, bindings for the Tiger compiler, type-checking expressions, type-checking declarations, activation records, stack frames, frames in the Tiger compiler, translation to intermediate code, intermediate representation trees, translation into trees, declarations, basic blocks and traces, taming conditional branches, liveness analysis, solution of dataflow equations, liveness in the Tiger compiler, interference graph construction.	12	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.
PSCS202 Design and implementation of Modern Compilers UNIT-IV	**Dataflow analysis and loop optimization** The principle sources of optimization, Loop optimization: The DAG representation of basic blocks, Dominators, Reducible flow graphs, Depth-first search, Loop-invariant computations, Induction variable elimination, Some other loop optimizations. Dataflow Analysis: intermediate representation for flow analysis, various dataflow analyses, transformations using dataflow analysis, speeding up dataflow analysis, alias analysis.	12	1. Compilers: Principles, Techniques and Tools 2nd edition 2. Modern Compiler Implementation in Java, Second Edition	Projector, PPT.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Shilpa Rodrigues **DEPARTMENT**: COMPUTER SCIENCE **CLASS**: MSc.CS(Part II)

SEMESTER: **III** **MONTH**: Aug - Dec **ACADEMIC YEAR**: 2020-21

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the social networks in real world.
- Represtation of social networks in graph theory.
- Identifying equivalence classes and analysis of equivalence classes.
- Understanding one mode and two mode netwroks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS302 , Unit 3 , Social Network Analysis.	Approaches to network positions and social roles- defining equivalence or similarity, structural equivalence, automorphic equivalence, finding equivalence sets, brute force and Tabu search, regular equivalence,	07	Introduction to Social Network Methods: Robert A. Hanneman, Mark Riddle	Power Point Presentation
	equivalence of distances: Maxsim, regular equivalence, Measuring similarity/dissimilarity- valued relations, Pearson correlations covariance and cross-products, Understanding clustering- agglomerative and divisive clusters, Euclidean, Manhattan, and squared distances, binary relations, matches: exact, Jaccard, Hamming,	08	Introduction to Social Network Methods: Robert A. Hanneman, Mark Riddle	Power Point Presentation

PSCS302 , Unit 4 , Social Network Analysis.	Understanding mode networks- Bi-partite data structures, visualizing two-mode data, quantitative analysis using two-mode Singular value decomposition (SVD) analysis.	07		Power Point Presentation
	two-mode factor analysis, two-mode correspondence analysis, qualitative analysis using two-mode core-periphery analysis, two-mode factions analysis, affiliation and attribute networks.	08		Power Point Presentation

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: CS

CLASS:M.Sc(CS) Part-2 SEMESTER: SEM-3 MONTH:AUG-DEC ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:

- Design and develop location based messaging app
- Design and develop chat messaging app which is a location-based
- Design and develop app demonstrating Simple Downstream Messaging
- Design and develop app demonstrating Send Upstream Messages
- Implementing GCM Network Manager
- Demonstrate use of OpenGTS (Open Source GPS Tracking System)

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS301 Ubiquitous Computing UNIT 1	**Basics of Ubiquitous Computing :**Examples of Ubiquitous Computing Applications, Holistic Framework for UbiCom: Smart DEI, Modelling the Key Ubiquitous Computing Properties, Ubiquitous System Environment Interaction, Architectural Design for UbiCom Systems: Smart DEI Model, Smart Devices and Services, Service Architecture Models, Service Provision Life Cycle.	15	Ubiquitous Computing Smart Devices, Environments and Interactions, Stefan Poslad, Wiley, 2009.	Laptop, PPT

PSCS301 Ubiquitous Computing UNIT 2	**Smart Environments Tagging, Sensing and Controlling**, Tagging the Physical World, Sensors and Sensor Networks, Micro Actuation and Sensing: MEMS, Embedded Systems and Real Time Systems, Control Systems.	15	Ubiquitous Computing Smart Devices, Environments and Interactions, Stefan Poslad, Wiley, 2009.	Laptop ,PPT

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mr. BRIJESH Y JOSHI DEPARTMENT: Computer Science

CLASS: M.Sc.C.S. SEMESTER: I MONTH: OCT to DEC ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- To be able to understand Big data platform, statistical concepts
- To understand the overview of Big data processing i.e. MapReduce Processing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Elective I- Track C Business Intelligence and Big Data Analytics –II (Mining Massive Data sets)Unit-I	**Big data:** Introduction to Big data Platform, Traits of big data, Challenges of conventional systems, Web data, Analytic processes and tools, Analysis vs Reporting, Modern data analytic tools, Statistical concepts: Sampling distributions, Re-sampling, Statistical Inference, Prediction error. **Data Analysis:** Regression modeling, Analysis of time Series: Linear systems analysis, Nonlinear dynamics, Rule induction, Neural networks: Learning and Generalization, Competitive Learning, Principal Component Analysis and Neural Networks, Fuzzy Logic: Extracting Fuzzy Models from Data, Fuzzy Decision Trees, Stochastic Search Methods.	12	Mining of Massive Datasets, Anand Rajaraman and Jeffrey David Ullman, Cambridge University Press, 2012.	Laptop, PPT
Elective I- Track C Business Intelligence and Big Data Analytics –II	**Introduction to Map Reduce:** The map tasks, Grouping by key, The reduce tasks, Combiners, Details of MapReduce Execution, Coping with node failures. Algorithms Using **MapReduce:** Matrix-Vector Multiplication, Computing Selections and Projections, Union, Intersection, and		Mining of Massive Datasets, Anand Rajaraman and Jeffrey David Ullman, Cambridge University Press, 2012.	

(Mining Massive Data sets)Unit-II	Difference, Natural Join. Extensions to MapReduce: Workflow Systems, Recursive extensions to MapReduce, Common map reduce algorithms

NAME OF THE STAFF: Dr.(Mrs).Sampada Deshmukh DEPARTMENT:Computer Science

CLASS:M.Sc.(C.S) SEMESTER: III MONTH: August- December ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to :

- Learn basics of computer forensics fundamental, collection of evidences.
- Study different computer forensics methods and tools.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Cyber and Information Security Unit 1	**Computer Forensic Fundamentals:** Introduction to Computer Forensics and objective, the Computer Forensics Specialist, Use of Computer Forensic in Law Enforcement, Users of Computer Forensic Evidence, Case Studies, InformationSecurity Investigations. Types of Computer Forensics Technology: Types of Military Computer Forensic Technology	5	Computer Forensics Computer Crime Scene Investigation, John R. Vacca, Second Edition, 2005.	Power Point Presentation using Google Meet
	Types of Law Enforcement Computer Forensic Technology, Types of Business Computer Forensic Technology, Specialized Forensics Techniques, Hidden Data, Spyware and Adware, Encryption Methods andVulnerabilities, Protecting Data from Being Compromised	5	Computer Forensics Computer Crime Scene Investigation, John R. Vacca, Second Edition, 2005.	Power Point Presentation using Google Meet
	Internet Tracing Methods,Security and Wireless Technologies. Types of Computer Forensics Systems:	5	Computer Forensics Computer Crime Scene	Power Point Presentation using Google Meet

	Studydifferent Security System: Internet, Intrusion Detection, Firewall, Storage Area, Network Disaster Recovery, Public Key Infrastructure, Wireless Network, Satellite Encryption,Instant Messaging (IM), Net Privacy, Identity Management, Biometric, Identity Theft.		Investigation, John R. Vacca, Second Edition, 2005.	

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 15

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Computer Science.

CLASS: M.Sc. SEMESTER: III MONTH: August To December ACADEMIC YEAR: 2020-2021

LEARNING OBJECTIVE/S:

- To understand social network and analyze the communication and predict the relationship between those actors.
- To understand Graph theory and network centrality and page rank for accessing webpages.
- To understand network structures.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS302 Social Network Analysis UNIT-I	**Introduction to social network analysis (SNA)** Introduction to networks and relations- analyzing relationships to understand people and groups, binary and valued relationships, symmetric and asymmetric relationships, multimode relationships,	6	1. Social Network Analysis for Startups- Finding connections on the social web 2. Social Network Analysis- 3rd edition	Projector, PPT.
	Using graph theory for social networks analysis- adjacency matrices, edge-lists, adjacency lists, graph traversals and distances, depth-first traversal, breadth-first traversal paths and walks, Dijkstra's algorithm, graph distance and graph diameter, social networks vs. link analysis, ego-centric and socio-centric density.	6		Projector, PPT.
PSCS302 Social Network Analysis	**Networks, Centrality and centralization in SNA** Understanding networks- density, reachability, connectivity, reciprocity, group-external and group-internal ties in networks, ego	8	1. Social Network Analysis for	Projector, PPT.

UNIT-II	networks, extracting and visualizing ego networks, structural holes, Centrality- degree of centrality, closeness and betweenness centrality, local and global centrality, centralization and graph centers, notion of importance within network, Google pagerank algorithm,		Startups- Finding connections on the social web 2. Social Network Analysis- 3rd edition	
	Analyzing network structure- bottom-up approaches using cliques, N-cliques, N-clans, K-plexes, K-cores, F-groups and top-down approaches using components, blocks and cut-points, lambda sets and bridges, and factions.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: M.Sc.CS

SEMESTER: IV MONTH: FEB TO MAY ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVE/S:
The learners will be able to:

- To understand basics of Cryptography and Network Security.
- To be able to secure a message over insecure channel by various means.
- To learn about how to maintain the Confidentiality, Integrity and Availability of a data.
- To understand various protocols for network security to protect against the threats in the networks.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS4022 Cyber and Information Security (Cryptography and Crypt Analysis) **UNIT 1**	: Introduction to Number Theory Topics in Elementary Number Theory: O and notations, time estimates for doing arithmetic-divisibility and the Euclidean algorithm, Congruence: Definitions and properties, linear congruence, residue classes, Euler's phi function, Fermat's Little Theorem, Chinese Reminder Theorem, Applications to factoring, finite fields, quadratic residues and reciprocity: Quadratic residues, Legendre symbol, Jacobi Symbol. (proofs of the theorems are not expected to cover).	10	Discrete Mathematics and Its Applications, Kenneth H. Rosen, 7 th Edition, McGraw Hill, 2012. Cryptography Theory and Practice, 3rd Edition, Douglas R. Stinson, 2005	Powerpoint,Black Board and chalk

PSCS4022 Cyber and Information Security (Cryptography and Crypt Analysis) **UNIT 3**	RSA Cryptosystem The RSA Algorithm, Primarily Testing, Legendre and Jacobi Symbols, The SolovayStrassen Algorithm, The Miller-Rabin Algorithm, Factoring Algorithm: The pollard p-1 Algorithm, Dixon's Random Squares Algorithm, Attacks on RSA, The Rabin Cryptosystem. Public Key Cryptosystems: The idea of public key Cryptography, The Diffie-Hellman Key Agreement, ElGamal Cryptosystem, The Pollard Rho Discrete Logarithm Algorithm, Elliptic Curves, Knapsack problem.	10	Discrete Mathematics and Its Applications, Kenneth H. Rosen, 7 th Edition, McGraw Hill, 2012. Cryptography Theory and Practice, 3rd Edition, Douglas R. Stinson, 2005. Network Security and Cryptography, Atul Kahate, McGraw Hill, 2003. Cryptography and Network Security: Principles and Practices, William Stalling, Fourth Edition, Prentice Hall, 2013.	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: COMPUTER SCIENCE CLASS: MSc.CS(Part II)

SEMESTER: **IV** MONTH: FEBRUARY-MAY ACADEMIC YEAR: 2020-21

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of Simulation and Modeling.
- Develop logic for developing Simulation Scenarios.
- Be familiar about the basic concepts of Agent Based Modeling.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PSCS401 Unit 1, Simulation and Modeling	Introduction to Simulation, Need of Simulation, Time to simulate, Inside simulation software: Modeling the progress of Time, Modeling Variability, Conceptual Modeling: Introduction to Conceptual modelling.	07	Simulation: The Practice of Model Development and Use by Stewart Robinson, John Wiley and Sons, Ltd, 2004.	Power Point Presentation
	Defining conceptual model, Requirements of the conceptual model, Communicating the conceptual model, Developing the Conceptual Model: Introduction, A framework for conceptual modeling, methods of model simplification.	08	Simulation: The Practice of Model Development and Use by Stewart Robinson, John	Power Point Presentation

			Wiley and Sons, Ltd, 2004.	
PSCS401 Unit 3, Simulation and Modeling.	Types of models, Analytical vs Simulation modeling, Application of simulation modeling, Level of abstraction, Simulation Modeling. Methods, System Dynamics, Discrete Event Modeling, Agent Based modeling: Introduction to Agent, Agent-based modeling, Time in agent based models, Space in agent based models, Discrete space, Continuous space movement in continuous space, Communication between agents, Dynamic creation and destruction of agents, Statics on agent population, Condition triggered events and transition in agents.	07	The Big Book of Simulation Modeling: Multi Method Modeling by Andrei Borshchev, 2013.	Power Point Presentation
	Building agents based models: The problem statement, Phases of modeling, Assumptions, 3 D animation. Dynamics Systems: Stock and flow diagrams, examples of stock and flow diagrams. Multi-method modeling: Architecture, Technical aspects of combining modeling methods, Examples.	08	The Big Book of Simulation Modeling: Multi Method Modeling by Andrei Borshchev, 2013.	Power Point Presentation

NAAC accredited "B" Grade, 2.69 CGPA

UNIT 4	History, requirements for virtualization, type 1 and 2 hypervisors, techniques for efficient virtualization.	3	Modern Operating Systems by Andrew S. Tanenbaum, Herbert Bos	Black board , chalk & PowerPoint Presentation
	Hypervisor microkernels, memory virtualization, I/O virtualization, Virtual appliances.	3		
	Virtual machines on multicore CPUs, Clouds.	2		
	Multiprocessors, multicomputer, distributed systems.	4		
UNIT 5	History of Unix and Linux, Linux Overview, Processes in Linux, Memory management in Linux, I/O in Linux.	3	Modern Operating Systems by Andrew S. Tanenbaum, Herbert Bos	Black board and chalk
	Linux file system, security in Linux. Android, History of windows through Windows 10, programming windows.	3		
	System structure, processes and threads in windows, Memory management, caching in windows, I/O in windows.	3		
	Windows NT file system, Windows power management, Security in windows.	3

NAME OF THE STAFF: ___**MS. KSHITIJA. P. MANE (PALAV)** _____DEPARTMENT: _____**INFORMATION TECHNOLOGY**_____ CLASS: ____**SY.B SC (IT)-A**_____ SEMESTER: ____**III**_____ MONTH: _____**JUNE-SEPTEMBER**_____ ACADEMIC YEAR: _____**2019-2020**_____

LEARNING OBJECTIVE/S:

The learners will be able to :

- **Understand the concept of data structure and how it is stored.**
- **The varieties of symbols used to store data, analysis on data, algorithms used to reduced the complexity regarding time, space and programs.**
- **Understanding the concept of Arrays and operations on array, Stack and Queue and variation of operation on them.**
- **To make understand applications where it is used , advantages and disadvantages of operation.**
- **To enable to practically generate code for it and implement it for data storage.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 (USIT302) Data Structures **Unit No -01**	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Textbook, Chalk and Duster. Blackboard.

Unit No -03	**Array**: Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General Multi-Dimensional Arrays, Sparse Arrays, SparseMatrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Textbook, Laptop, Projector, Chalk and Duster. Blackboard.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
	Stack: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Textbook, Laptop, Projector, Chalk and Duster, Blackboard.
	Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue, Some special kinds of queues, Deque, Priority Queue, Application of Priority Queue, Applications of Queues.	06	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar SPD	Textbook, Laptop, Projector, Chalk and Duster, Blackboard.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MONIKA MADHUKAR RAUT DEPARTMENT: IT/CS

CLASS: SYIT-A SEMESTER: III MONTH: JUNE TO SEPTEMBER ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to learn different structures of data, their operations and algorithms.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
DATA STRUCTURES (USIT302) Unit II	**Linked List:** Introduction to Subject, Syllabus, Linked List, One-way Linked List, Traversal of Linked List, Searching, Memory Allocation and De-allocation, Insertion in Linked List, Deletion from Linked List, Copying a List into Other List, Merging Two Linked Lists, Splitting a List into Two Lists, Reversing One way linked List, Circular Linked List, Applications of Circular Linked List	6	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	Black Board and Chalk
	Two way Linked List, Traversing a Two way Linked List, Searching in a Two way linked List, Insertion of an element in Two way Linked List, Deleting a node from Two way Linked List, Header Linked List, Applications of the Linked list, Representation of Polynomials, Storage of Sparse Arrays, Implementing other Data Structures	6	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	Black Board and Chalk
DATA STRUCTURES (USIT302) Unit IV	**Sorting and Searching Techniques:** Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, Binary, Indexed Sequential Searches, Binary Search.	3	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	Black Board and Chalk
	Tree: Tree, Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary	6		Black Board and Chalk

	Tree, Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort			
	Advanced Tree Structures: Red Black Tree, Operations Performed on Red Black Tree, AVL Tree, and Operations performed on AVL Tree, 23 Tree, B-Tree.	3		Black Board and Chalk
DATA STRUCTURES (USIT302) Unit V	**Hashing Techniques** Hash function, Address calculation techniques, Common hashing functions Collision resolution, Linear probing, Quadratic, Double hashing, Bucket hashing, Deletion and rehashing	6	A Simplified Approach to Data Structures by Lalit Goyal, Vishal Goyal, Pawan Kumar	Black Board and Chalk
	Graph: Introduction, Graph, Graph Terminology, Memory Representation of Graph, Adjacency Matrix Representation of Graph, Adjacency List or Linked Representation of Graph, Operations Performed on Graph, Graph Traversal, Applications of the Graph, Reachability, Shortest Path Problems, Spanning Trees	6		Black Board and Chalk

Paper No.,Paper Title, Unit No.	**Sub Topics:**	**No.of Lectures**	**References**	**Teaching Method/ICT tools used**
USIT301 Python Programming Unit 1	Introduction:The Python Programming Language, History, features, Installing Python, Running Python program, Debugging : Syntax Errors, Runtime Errors, Semantic Errors, Experimental Debugging, Formal and Natural Languages, The Difference Between Brackets, Braces, and Parentheses Variables and Expressions:Values and Types, Variables, Variable Names and Keywords, Type conversion, Operators and Operands, Expressions, Interactive Mode and Script Mode Conditional Statements:if, if-else, nested if –else Looping:for, while, nested loops	4 3 2 1 2	Reference book: "Think Python"	Chalk, Blackboard

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	Control statements: Terminating loops, skipping specific conditions			
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming Unit 2	Functions: Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions, Definitions and Uses, Flow of Execution, Parameters and Arguments, Variables and Parameters Are Local, Stack Diagrams, Fruitful Functions and Void Functions, Why Functions? Importing with from, Return Values, Incremental Development, Composition, Boolean Functions, More Recursion, Leap of Faith, Checking Types Strings: A String Is a Sequence, Traversal with a for Loop, String Slices, Strings Are Immutable, Searching,	4 4 2	Reference book: "Think Python"	Chalk, Blackboard

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	Looping and Counting, String Methods, The in Operator, String Comparison, String Operations.	2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming Unit 3	Lists: Values and Accessing Elements, Lists are mutable, traversing a List, Deleting elements from List, Built-in List Operators, Concatenation, Repetition, In Operator, Built-in List functions and methods Tuples and Dictionaries: Tuples, Accessing values in Tuples, Tuple Assignment, Tuples as return values, Variable-length argument tuples, Basic tuples operations, Concatenation, Repetition, in Operator, Iteration, Built-in Tuple Functions Creating a Dictionary, Accessing Values in a dictionary, Updating Dictionary, Deleting Elements from Dictionary,	3 3 3	Reference book: "Think Python"	Chalk, Blackboard

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	Properties of Dictionary keys, Operations in Dictionary, Built-In Dictionary Functions, Built-in Dictionary Methods Files: Text Files, The File Object Attributes, Directories Exceptions: Built-in Exceptions, Handling Exceptions, Exception with Arguments, User-defined Exceptions	1 2		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming	Regular Expressions – Concept of regular expression, various types of regular expressions, using match function. Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class	4 4	Reference book: "Think Python"	Chalk, Blackboard

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

Unit 4	Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding Multithreaded Programming: Thread Module, creating a thread, synchronizing threads, multithreaded priority queue Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	4 4		
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

USIT301 Python Programming Unit 5	Creating the GUI Form and Adding Widgets: Widgets: Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets. Layout Management: Designing GUI applications with proper Layout Management features. Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets. Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command,	4 2 2	Reference book: "Think Python"	Chalk, Blackboard

NAME OF THE STAFF: Sampada Deshmukh DEPARTMENT: Information Technology

CLASS:S.Y.B.Sc.(I.T) SEMESTER: III MONTH:JUNE-JULY ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to :

- Understand the basics of Data Communication and concept of networking
- Understand the concept of Analog and Digital Signal.
- Understand the Network Model and their working for data transmission.
- Learn conversion of digital to analog and vice-versa.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 3 Computer Networks Unit 1	**Introduction**: Data communications, networks, network types, Internet history,standards and administration.	4	Data Communication and Networking By Behrouz A. Forouzan	Black Board and Chalk, Projector
	Network Models:Protocol layering, TCP/IP protocol suite, The OSI model.	2	Data Communication and Networking By Behrouz A. Forouzan	Black Board and Chalk, Projector
	Introduction to Physical layer:Data and signals, periodic analog signals, digital signals, transmission impairment, data rate limits, performance.	3	Data Communication and Networking By Behrouz A. Forouzan	Black Board and Chalk, Projector

	Digital and Analog transmission: Digital-to-digital conversion, analog-to-digital conversion, transmission modes, digital-to-analog conversion, analog-to-analog conversion.	3	Data Communication and Networking By Behrouz A. Forouzan	Black Board and Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: DORIN REBELLO DEPARTMENT: INFORMATION TECHNOLOGY

CLASS: SYBSc(IT) DIV:B SEMESTER: III MONTH: AUGUST-DECEMBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to : Understand the different types of data structures and develop programs to search and sort for elements.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper: USIT302 unit:1, Title: Data Structures	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation.	5	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Array:Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General Multi-Dimensional Arrays, Sparse Arrays, SparseMatrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	7	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

Paper: USIT302 unit:2, Title: Data Structures	**Linked List:** Linked List, One-way Linked List, Traversal of Linked List, Searching, Memory Allocation and De-allocation, Insertion in Linked List, Deletion from Linked List, Copying a List into Other List, Merging Two Linked Lists, Splitting a List into Two Lists, Reversing One way linked List, Circular Linked List, Applications of Circular Linked List,	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Two way Linked List, Traversing a Two way Linked List, Searching in a Two way linked List, Insertion of an element in Two way Linked List, Deleting a node from Two way Linked List, Header Linked List, Applications of the Linked list, Representation of Polynomials, Storage of Sparse Arrays, Implementing other Data Structures.	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:3, Title: Data Structures	**Stack**: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	5	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue,Some special kinds of queues, Deque,Priority Queue, Application of Priority Queue, Applications of Queues.	7	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:4, Title:	**Sorting and Searching Techniques** Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, Binary, Indexed Sequential Searches, Binary Search.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

Data Structures	**Tree:**Tree,Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary Tree,Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Advanced Tree Structures: Red Black Tree, Operations Performed on Red Black Tree, AVL Tree, Operations performed on AVL Tree, 2-3 Tree, B-Tree.	4	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
Paper: USIT302 unit:5, Title: Data Structures	**Hashing Techniques** Hash function, Address calculation techniques, Common hashing functions Collision resolution, Linear probing, Quadratic,Double hashing, Buckethashing, Deletion and rehashing	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.
	Graph: Introduction, Graph, Graph Terminology, Memory Representation of Graph, Adjacency Matrix Representation of Graph, Adjacency List or Linked Representation of Graph, Operations Performed on Graph, GraphTraversal, Applications of the Graph, Reachability, Shortest Path Problems, Spanning Trees.	6	A Simplified Approach to Data Structures	Online mode Google meet Google slides.

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: NAMITA NITIN RODE DEPARTMENT: CS

CLASS: SY BSc IT DIV-B(DBMS) SEMESTER:SEM 3 MONTH: JUN-SEP ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- The learners will be able to : have a broad understanding of database concepts and database management system software
- have a high-level understanding of major DBMS components and their function
- be able to model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
- be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
- be able to program a data-intensive application using DBMS APIs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
PAPER 4 DBMS UNIT 1	Introduction to Databases and Transactions What is database system, purpose of database system, view of data, relationaldatabases, database architecture, transaction management	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Data Models The importance of data models, Basic building blocks, Business rules, The evolutionof data models, Degrees of data abstraction.	4		
	Database Design,ER Diagram and Unified Modeling Language Database design and ER Model:overview, ERModel, Constraints, ERDiagrams, ERDIssues, weak entity sets, Codd's rules, Relational Schemas, Introduction to UML	4		
	Relational database model: Logical view of data, keys, integrity rules,	3		Black board and chalk

UNIT 2	Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF, BCNF).	3	DATABASE SYSTEM AND CONCEPTS BY H KORTH	
	Relational Algebra and Calculus Relational algebra: introduction, Selection and projection, set operations, renaming,Joins, Division, syntax, semantics	3		
	. Operators, grouping and ungrouping,relationalcomparison	2		
	Calculus: Tuple relational calculus, Domain relational Calculus, calculus vsalgebra,computational capabilities	4		
UNIT 3	Constraints, Views and SQL Constraints, types of constrains, Integrity constraints,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Views: Introduction to views, data independence, security, updates on views,comparison between tables and views	4		
	SQL: data definition, aggregate function, Null Values, nested sub queries, Joined relations. Triggers	4		
UNIT 4	Transaction management and Concurrency Control Transaction management: ACID properties, serializability and concurrency control,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Lock based concurrency control (2PL, Deadlocks),Time stamping methods,	4		
	optimistic methods, database recovery management.	4		
UNIT 5	PL-SQL: Beginning with PL / SQL,Identifiers and Keywords, Operators, Expressions, Sequences	4	PROGRAMMING WITH PL/SQL FOR BEGINNERS BY H. DAND,R. PATIL	Black board and chalk
	,Control Structures, Cursors and Transaction,	4		
	Collections and composite data types, Procedures and Functions, Exceptions Handling ,Packages,With Clause and Hierarchical Retrieval,Triggers.	4

NAME OF THE STAFF: SHARVARI PATIL DEPARTMENT: IT CLASS: S.Y.I.T (B) SEMESTER: III

MONTH: JUNE TO SEPTEMBER ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the use of regular expressions.
- Learn GUI development using python programming.

Paper No.,Paper Title, Unit No.	**Sub Topics:**	**No.of Lectures**	**References**	**Teaching Method/ICT tools used**
USIT301 Python Programming Unit 4	Regular Expressions – Concept of regular expression, various types of regular expressions, using match function. Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding Multithreaded Programming: Thread Module, creating a thread, synchronizing threads, multithreaded priority queue Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	4 4 4 4	Reference book: "Think Python"	Chalk, Blackboard

	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT:	**12**		
USIT301 Python Programming Unit 5	Creating the GUI Form and Adding Widgets: Widgets: Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets. Layout Management: Designing GUI applications with proper Layout Management features. Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets. Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database	4 2 2 4	Reference book: "Think Python"	Chalk, Blackboard

	Transmission media: Guided Media**,** Unguided Media	4		
	Switching: Introduction, circuit switched networks, packet switching, structure of a switch.	3		

	Introduction to the Data Link Layer: Link layer addressing, Data Link Layer Design Issues, Error detection and correction, block coding, cyclic codes, checksum, forward error correction, error correcting codes, error detecting codes.	2/3	Behrouz A. Forouzan	
UNIT 3	**Data Link Control:** DLC services, data link layer protocols, HDLC, Point-to-point protocol.	3	Data Communication and Networking By Behrouz A. Forouzan	POWERPOINT PRESENTATION, GOOGLE MEET,LAPTOP OR PC.
	Media Access Control: Random access, controlled access, channelization, Wired LANs – Ethernet Protocol, standard ethernet, fast ethernet, gigabit ethernet, 10 gigabit ethernet,	3		
	Wireless LANs: Introduction, IEEE 802.11 project, Bluetooth, WiMAX, Cellular telephony, Satellite networks.	3		
	Connecting devices and Virtual LANs.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: GAURI KETAN THAKUR DEPARTMENT: IT

CLASS: SY BSc IT SEMESTER: SEM 3 MONTH: JUN-SEP ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

1. To have a broad understanding of database concepts and database management system software
2. To have a high-level understanding of major DBMS components and their function
3. To be able to model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
4. To be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
5. To be able to program a data-intensive application using DBMS APIs.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper 4 DBMS UNIT 1	Introduction to Databases and Transactions What is database system, purpose of database system, view of data, relational databases, database architecture, transaction management.	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Data Models The importance of data models, Basic building blocks, Business rules, The evolution of data models, Degrees of data abstraction.	4		
	Database Design, ER Diagram and Unified Modelling Language Database design and ER Model: overview, ER Model, Constraints, ER Diagrams, ERD Issues, weak entity sets, Codd's rules, Relational Schemas, Introduction to UML	4		
	Relational database model: Logical view of data, keys, integrity rules,	2		Black board and chalk

UNIT 2	Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF, BCNF).	3	DATABASE SYSTEM AND CONCEPTS BY H KORTH	
	Relational Algebra and Calculus Relational algebra: introduction, Selection and projection, set operations, renaming, Joins, Division, syntax, semantics	3		
	Operators, grouping and ungrouping, relational comparison	2		
	Calculus: Tuple relational calculus, Domain relational Calculus, calculus vs algebra, computational capabilities	2		
UNIT 3	Constraints, Views and SQL Constraints, types of constrains, Integrity constraints,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Views: Introduction to views, data independence, security, updates on views, comparison between tables and views	4		
	SQL: data definition, aggregate function, Null Values, nested sub queries, Joined relations. Triggers	4		
UNIT 4	Transaction management and Concurrency Control Transaction management: ACID properties, serializability and concurrency control,	4	DATABASE SYSTEM AND CONCEPTS BY H KORTH	Black board and chalk
	Lock based concurrency control (2PL, Deadlocks),Time stamping methods,	4		
	Optimistic methods, database recovery management.	4		
UNIT 5	PL-SQL: Beginning with PL / SQL, Identifiers and Keywords, Operators, Expressions, Sequences	4	PROGRAMMING WITH PL/SQL FOR BEGINNERS BY H. DAND,R. PATIL	Black board and chalk
	,Control Structures, Cursors and Transaction,	4		
	Collections and composite data types, Procedures and Functions, Exceptions Handling, Packages with Clause and Hierarchical Retrieval, Triggers.	4

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: SYIT

SEMESTER: III MONTH: JUNE-SEPT ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Get deep knowledge about different types of data structures and also the importance of algorithm and its complexity.
- Understand the use of array and different types of linked list.
- Learn about stack, stack operations, queue and different types of it.
- Understand the use of different sorting and searching techniques.
- Learn about graph theory and different types of hashing techniques.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT302, Data Structures, Unit I	**Introduction:** Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
	Array: Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, Memory Representation of Two Dimensional Arrays, General MultiDimensional Arrays, Sparse Arrays, Sparse Matrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays.	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT302, Data Structures, Unit III	**Stack**: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion**.**	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
	Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue, Some special kinds of queues, Deque, Priority Queue, Application of Priority Queue, Applications of Queues.	06	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
USIT302, Data Structures, Unit IV	**Sorting and Searching Techniques** Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, Binary, Indexed Sequential Searches, Binary Search.	04	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
	Tree: Tree, Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary Tree, Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort.	05	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk
	Advanced Tree Structures: Red Black Tree, Operations Performed on Red Black Tree, AVL Tree, Operations performed on AVL Tree, 23 Tree, B-Tree	03	Data Structure by Lalit Goyal,Vishal Goyal and Pawan kumar, SPD, 1st , 2014	Black Board and chalk

Unit I Python Programming	**Debugging :** Syntax Errors, Runtime Errors, Semantic Errors, Experimental Debugging, Formal and Natural Languages, The Difference Between Brackets, Braces, and Parentheses,	3	O'Reilly 1st2012	Blackboard, Chalk
	Variables and Expressions Values and Types, Variables, Variable Names and Keywords, Type conversion, Operators and Operands, Expressions, Interactive Mode and Script Mode, Order of Operations.	3		Blackboard, Chalk
	Conditional Statements: if, if-else, nested if –else	1		Blackboard, Chalk
	Looping: for, while, nested loops Control	1		Blackboard, Chalk
	statements: Terminating loops, skipping specific conditions	1		Blackboard, Chalk
Paper-I	**Functions:** Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions,	2	Think Python Allen Downey	Blackboard, Chalk

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

Unit II Python Programming	Definitions and Uses, Flow of Execution, Parameters and Arguments, Variables and Parameters Are Local, Stack Diagrams, Fruitful Functions and Void Functions, Why Functions?	3	O'Reilly 1st2012	Blackboard, Chalk
	Importing with from, Return Values, Incremental Development, Composition, Boolean Functions, More Recursion, Leap of Faith, Checking Types	3		Blackboard, Chalk
	Strings: A String Is a Sequence, Traversal with a for Loop, String Slices, Strings Are Immutable, Searching, Looping and Counting, String Methods, The in Operator, String Comparison, String Operations	4		Blackboard, Chalk
Paper-I Unit III Python Programming	**Lists:** Values and Accessing Elements, Lists are mutable, traversing a List, Deleting elements from List, Built-in List Operators, Concatenation, Repetition, In Operator, Built-in List functions and methods	4	Think Python Allen Downey O'Reilly 1st2012	Blackboard, Chalk
	Tuples and Dictionaries: Tuples, Accessing values in Tuples, Tuple Assignment, Tuples as return values, Variable-length argument tuples, Basic tuples operations, Concatenation, Repetition, in Operator, Iteration, Built-in Tuple Functions Creating a Dictionary,	4		Blackboard, Chalk

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

	Accessing Values in a dictionary, Updating Dictionary, Deleting Elements from Dictionary, Properties of Dictionary keys, Operations in Dictionary, Built-In Dictionary Functions, Built-in Dictionary Methods			
	Files: Text Files, The File Object Attributes, Directories	2		Blackboard, Chalk
	Exceptions: Built-in Exceptions, Handling Exceptions, Exception with Arguments, User-defined Exceptions	2		Blackboard, Chalk
Paper-I Unit IV Python Programming	**Regular Expressions –** Concept of regular expression, various types of regular expressions, using match function.	2	Think Python Allen Downey O'Reilly 1st2012	Blackboard, Chalk
	Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding	4		Blackboard, Chalk
	Multithreaded Programming: Thread Module, creating a thread, synchronizing threads, multithreaded priority queue	3		Blackboard, Chalk
	Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module	3		Blackboard, Chalk

SIGNATURE OF THE STAFF

SIGNATURE OF THE H.O.D.

Paper-I Unit V Python Programming	**Creating the GUI Form and Adding Widgets:** **Widgets:** Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets.	4	Think Python Allen Downey O'Reilly 1st2012	Blackboard, Chalk
	Layout Management: Designing GUI applications with proper Layout Management features.	2		Blackboard, Chalk
	Look and Feel Customization: Enhancing Look and Feel of GUI using different appearances of widgets.	2		Blackboard, Chalk
	Storing Data in Our MySQL Database via Our GUI : Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database.	4		Blackboard, Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: June to Sept ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 Advance Web Programming UNIT-I	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in	Black Board, Projector, PPT.
	The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.	4		Black Board, Projector, PPT.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types, Understanding Namespaces and Assemblies, Advanced Class Programming.	4	C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
USIT503 Advance Web Programming UNIT-II	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.	6	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	6		
USIT503 Advance Web Programming UNIT-IV	**ADO.NET Fundamentals**: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in	Black Board, Projector, PPT.
	Data Binding: Introducing Data Binding, Using Single-Value Data Binding, Using Repeated-Value Data Binding, Working with Data Source Controls,	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	The Data Controls: The GridView, Formatting the GridView, selecting a GridView Row, Editing with the GridView, Sorting and Paging the GridView, Using GridView Templates, The DetailsView and FormView	4	C#2015 4. Beginning Visual C# 2010

NAME OF THE STAFF: MRS. ARCHANA SANTOSH RAUT DEPARTMENT: IT CLASS: TYIT

SEMESTER: V MONTH: JUNE-SEPT ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Understand the Java EE Architecture, Server and Containers.
- Describe the different servlet API and lifecycle of servlet.
- Get the difference between cookies, session and request dispatcher.
- Understand the use of tag library, naming directory, interceptors.
- Familiar with java beans, JPA, hibernate and JSP.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506, Enterprise Java Unit I	**Understanding Java EE:** What is an Enterprise Application? What is java enterprise edition? Java EE Technologies, Java EE evolution, Glassfish server	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, Powerpoint
	Java EE Architecture, Server and Containers: Types of System Architecture, Java EE Server, Java EE Containers.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Introduction to Java Servlets: The Need for Dynamic Content, Java Servlet Technology, Why Servlets? What can Servlets do?	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Servlet API and Lifecycle: Java Servlet API, The Servlet Skeleton, The Servlet Life Cycle, A Simple Welcome Servlet	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working With Servlets: Getting Started, Using Annotations Instead of Deployment Descriptor.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working with Databases: What Is JDBC? JDBC Architecture, Accessing Database, The Servlet GUI and Database Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
USIT506, Enterprise Java Unit II	**Request Dispatcher:** Resquestdispatcher Interface, Methods of Requestdispatcher, Requestdispatcher Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	COOKIES: Kinds Of Cookies, Where Cookies Are Used? Creating Cookies Using Servlet, Dynamically Changing The Colors Of A Page	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	SESSION: What Are Sessions? Lifecycle Of Http Session, Session Tracking With Servlet API, A Servlet Session Example	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Working With Files: Uploading Files, Creating an Upload File Application, Downloading Files, Creating a Download File Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working With Non-Blocking I/O: Creating a Non-Blocking Read Application, Creating The Web Application, Creating Java Class, Creating Servlets, Retrieving The File, Creating index.jsp	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
USIT506, Enterprise Java Unit III	**Introduction To Java Server Pages:** Why use Java Server Pages? Disadvantages Of JSP, JSP v\s Servlets, Life Cycle of a JSP Page, How does a JSP function? How does JSP execute? About Java Server Pages	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Getting Started With Java Server Pages: Comments, JSP Document, JSP Elements, JSP GUI Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Action Elements: Including other Files, Forwarding JSP Page to Another Page, Passing Parameters for other Actions, Loading a Javabean.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Implicit Objects, Scope And El Expressions: Implicit Objects, Character Quoting Conventions, Unified Expression Language [Unified El], Expression Language.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Java Server Pages Standard Tag Libraries: What is wrong in using JSP Scriptlet Tags? How JSTL Fixes JSP Scriptlet's Shortcomings? Disadvantages Of JSTL, Tag Libraries.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT506, Enterprise Java Unit IV	**Introduction To Enterprise Javabeans:** Enterprise Bean Architecture, Benefits of Enterprise Bean, Types of Enterprise Bean, Accessing Enterprise Beans, Enterprise Bean Application, Packaging Enterprise Beans	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working With Session Beans: When to use Session Beans? Types of Session Beans, Remote and Local Interfaces, Accessing Interfaces, Lifecycle of Enterprise Beans, Packaging Enterprise Beans, Example of Stateful Session Bean, Example of Stateless Session Bean, Example of Singleton Session Beans.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Working with Message Driven Beans: Lifecycle of a Message Driven Bean, Uses of Message Driven Beans, The Message Driven Beans Example.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Interceptors: Request And Interceptor, Defining An Interceptor, AroundInvoke Method, Applying Interceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
USIT506, Enterprise Java Unit V	**Persistence, Object/Relational Mapping And JPA:** What is Persistence? Persistence in Java, Current Persistence Standards in Java, Why another Persistence Standards? Object/Relational Mapping,	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Introduction to Java Persistence API: The Java Persistence API, JPA, ORM, Database and the Application, Architecture of JPA, How JPA Works? JPA Specifications.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Writing JPA Application: Application Requirement Specifications, Software Requirements, The Application Development Approach, Creating Database And Tables in Mysql, Creating a Web Application, Adding the Required Library Files, Creating a Javabean Class, Creating Persistence Unit [Persistence.Xml], Creating JSPS, The JPA Application Structure, Running The JPA Application.	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Introduction to Hibernate: What is Hibernate? Why Hibernate? Hibernate, Database and The Application, Components of Hibernate, Architecture of Hibernate, How Hibernate Works?	02	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint
	Writing Hibernate Application: Application Requirement Specifications, Software Requirements, The Application Development Approach, Creating Database and Tables in Mysql, Creating a Web Application, Adding The Required Library Files, Creating a Javabean Class, Creating Hibernate Configuration File, Adding a Mapping Class, Creating JSPS, Running The Hibernate Application.	03	Java EE 7 For Beginners by Sharanam Shah, Vaishali Shah, SPD, First, 2012	Black Board and chalk, PowerPoint

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Gauri Gaurav Vartak DEPARTMENT: Information Technology

CLASS: TYIT SEMESTER: V MONTH: JUNE to SEPT ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:
The learners will be able to :

To determine the market perspective of IoT

To compare and contrast the use of devices, gateways and Data management in IoT

To illustrate the applications of IoT in Industrial Automation and identify Real world design constraints.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-02 Internet Of Things Unit 3	**Prototyping the Physical Design:** Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling. Prototyping and Presence Protocol, Constrained Application Protocol.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board & Chalk
	Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board & Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Paper-02 Internet Of Things Unit 4	**Techniques for Writing Embedded Code:** Memory Management, 12 8 Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries, Debugging.	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board & Chalk
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	8	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board & Chalk
Paper-02 Internet Of Things Unit 5	**Moving to Manufacture:** What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board & Chalk
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board & Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Mrs. Priyanka Roshan Brid DEPARTMENT: IT CLASS:TYIT SYSEMESTER: 5 MONTH: JUNE -SEPT

ACADEMIC YEAR:2019-20

LEARNING OBJECTIVE/S:

- To determine the market perspective of IoT
- To compare and contrast the use of devices, gateways and Data management in IoT
- To illustrate the applications of IoT in Industrial Automation and identify Real world design constraints.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Internet Of Things Paper 2 Code: USIT502 Unit 1	**The Internet of Things: An Overview**: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses, DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other Common Ports,Application Layer Protocols, HTTP,HTTPS: Encrypted HTTP, Other Application Layer Protocols	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
Internet Of Things Paper 2 Code: USIT502 Unit 2	**Thinking About Prototyping:** Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation, climbing into the Cloud, Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community.	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing	6	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Projector, Laptop, Black board& Chalk

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRAJAKTA HATKAR DEPARTMENT: INFORMATION TECHNOLOGY CLASS: TYIT-A

SEMESTER: V MONTH: JUNE-SEPTEMBER ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVES:
The learners will be able to:

- Understand the concepts of open source operating system Linux, command line working, managing soft wares on Linux .
- Develop logic for connecting to network, giving permissions to users.
- Be familiar about the basic file sharing, setting iptables in linux .
- Apply the problem solving skills on high availability of cluster, installation of servers, bash shell scripting.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT505, Unit 1, Linux System Administration	Introduction to Red Hat Enterprise Linux: Linux, Open Source and Red Hat, Origins of Linux, Distributions, Duties of Linux System Administrator.	02	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Command Line: Working with the Bash Shell, Getting the Best of Bash, Useful Bash Key Sequences, Working with Bash History, Performing Basic File System Management Tasks, Working with Directories, Piping and Redirection, Finding Files.	03	Red Hat Enterprise Linux6 Administration	Black Board and chalk, powerpoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

			by Sander van Vugt	
	System Administration Tasks: Performing Job Management Tasks, System and Process Monitoring and Management, Managing Processes with ps, Sending Signals to Processes with the kill Command, using top to Show Current System Activity, Managing Process Niceness, Scheduling Jobs, Mounting Devices, Working with Links, Creating Backups, Managing Printers, Setting Up System Logging, Setting Up Rsyslog, Common Log Files, Setting Up Logrotate	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint t
	Managing Software: Understanding RPM, Understanding Meta Package Handlers, Creating Your Own Repositories, Managing Repositories,Installing Software with Yum, Querying Software, Extracting Files from RPM Packages	03	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
USIT505, Unit 2, Linux System Administration	Configuring and Managing Storage: Understanding Partitions and Logical Volumes, Creating Partitions, Creating File Systems, File Systems Overview, Creating File Systems, Changing File System Properties, Checking the File System Integrity, Mounting File Systems Automatically Through fstab, Working with Logical Volumes, Creating Logical Volumes, Resizing Logical Volumes, Working with Snapshots, Replacing Failing Storage Devices, Creating Swap Space, Working with Encrypted Volumes	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Connecting to the Network: Understanding NetworkManager, Working with Services and Runlevels, Configuring the Network with NetworkManager, Working with system-config-network,	04	Red Hat Enterprise Linux6	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	NetworkManager Configuration Files, Network Service Scripts, Networking from the Command Line, Troubleshooting Networking, Setting Up IPv6, Configuring SSH, Enabling the SSH Server, Using the SSH Client, Using PuTTY on Windows Machines, Configuring Key-Based SSH Authentication, Using Graphical Applications with SSH, Using SSH Port Forwarding, Configuring VNC Server Access		Administration by Sander van Vugt	
	Working with Users, Groups, and Permissions: Managing Users and Groups, Commands for User Management, Managing Passwords, Modifying and Deleting User Accounts, Configuration Files, Creating Groups, Using Graphical Tools for User, and Group Management, Using External Authentication Sources, the Authentication Process, sssd, nsswitch, Pluggable Authentication Modules, Managing Permissions, the Role of Ownership, Basic Permissions: Read, Write, and Execute, Advanced Permissions, Working with Access Control Lists, Setting Default Permissions with umask, Working with Attributes.	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
USIT505, Unit 3, Linux System Administration	Securing Server with iptables: Understanding Firewalls, Setting Up a Firewall with system-config-firewall, Allowing Services, Trusted Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule, Configuration Example, Advanced iptables Configuration, Configuring Logging, The Limit Module, Configuring NAT	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Setting Up Cryptographic Services: Introducing SSL, Proof of Authenticity: The Certificate Authority, Managing Certificates	04	Red Hat Enterprise	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	with openssl, Creating a Signing Request, Working with GNU Privacy Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys, Encrypting Files with GPG, GPG Signing, Signing RPM Files		Linux6 Administration by Sander van Vugt	
	Configuring Server for File Sharing: What is NFS? Advantages and Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring Automount, Configuring Samba, Setting Up a Samba File Server, Samba Advanced Authentication Options, Accessing Samba Shares, Offering FTP Services	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
USIT505, Unit 4, Linux System Administration	Configuring DNS and DHCP:Introduction to DNS, The DNS Hierarchy, DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, Configuring Dovecot for POP and IMAP	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Configuring Apache on Red Hat Enterprise Linux: Configuring the Apache Web Server, creating a Basic Website, Understanding the Apache Configuration Files, Apache Log Files, Working with Virtual Hosts, Securing the Web Server with TLS Certificates, Configuring Authentication, Setting Up Authentication with	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	.htpasswd, Configuring LDAP Authentication, Setting Up MySQL			
USIT505, Unit 5, Linux System Administration	Introducing Bash Shell Scripting: Introduction, Elements of a Good Shell Script, Executing the Script, Working with Variables and Input, Understanding Variables, Variables, Subshells, and Sourcing, Working with Script Arguments, Asking for Input, Using Command Substitution, Substitution Operators, Changing Variable Content with Pattern Matching, Performing Calculations, Using Control Structures, Using if...then...else, Using case, Using while, Using until, Using for, Configuring booting with GRUB.	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	High-Availability Clustering: High-Availability Clustering, The Workings of High Availability, High-Availability Requirements, Red Hat High-Availability Add-on Software, Components, Configuring Cluster-Based Services, Setting Up Bonding, Setting Up Shared Storage, Installing the Red Hat High Availability Add-On, Building the Initial State of the Cluster, Configuring Additional Cluster Properties, Configuring a Quorum Disk, Setting Up Fencing, Creating Resources and Services, Troubleshooting a Nonoperational Cluster, Configuring GFS2 File Systems	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint
	Setting Up an Installation Server: Configuring a Network Server as an Installation Server, Setting Up a TFTP and DHCP Server for PXE Boot, Installing the TFTP Server, Configuring DHCP for PXE Boot, Creating the TFTP PXE Server Content, creating a Kickstart File, Using a Kickstart File to Perform an Automated,	04	Red Hat Enterprise Linux6 Administration by Sander van Vugt	Black Board and chalk, PowerPoint

NAME OF THE STAFF: Shweta Kiran Yande. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc.I.T. SEMESTER: V MONTH: June to Sept ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S: To learn the fundamental aspects of the JavaScript programming language and how to program using document object model application programming

The learners will be able to :

- To understand .Net framework and its run time environment.
- To gain basic knowledge of C# language with its object oriented concept.
- To gain the knowledge of namespaces and assemblies.
- To understand fundamentals of web application development.
- To make use of different server controls like validation, navigation and rich server control.
- To understand back hand connectivity with SQL using ADO .Net Frame.
- To use data binding with data controls like grid view, details view and form view.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT503 Advance Web Programming UNIT-I	**Introducing .NET**: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015	Black Board, Projector, PPT.
	The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.	4		Black Board, Projector, PPT.
	Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types,	4		Black Board, Projector,

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Understanding Namespaces and Assemblies, Advanced Class Programming.		4. Beginning Visual C# 2010	PPT.
USIT503 Advance Web Programming UNIT-II	**Web Form Fundamentals**: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.	6	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The Menu Control.	6		
USIT503 Advance Web Programming UNIT- III	**Error Handling, Logging, and Tracing** : Avoiding Common Errors, Understanding Exception Handling, Handling Exceptions, Throwing Your Own Exceptions, Using Page Tracing	5	C# 2015 Murach"s ASP.NET 4.6 Web Programming in C#2015 Beginning Visual C# 2010	Black Board, Projector, PPT.
	State Management : Understanding the Problem of State, Using View State, Transferring Information Between Pages, Using Cookies, Managing Session State, Configuring Session State, Using Application State, Comparing State Management Options	4		Black Board, Projector, PPT.
	Styles, Themes, and Master Pages : Styles, Themes, Master Page Basics, Advanced Master Pages,	3		Black Board, Projector,

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT503 Advance Web Programming UNIT-IV	**ADO.NET Fundamentals**: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access.	4	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Data Binding: Introducing Data Binding, Using Single-Value Data Binding, Using Repeated-Value Data Binding, Working with Data Source Controls,	4		
	The Data Controls: The GridView, Formatting the GridView, selecting a GridView Row, Editing with the GridView, Sorting and Paging the GridView, Using GridView Templates, The DetailsView and FormView	4		
USIT503 Advance Web Programming UNIT - V	**XML**: XML Explained, The XML Classes, XML Validation, XML Display and Transforms. .	3	1. Beginning ASP.NET 4.5 in C# 2. C# 2015 3. Murach"s ASP.NET 4.6 Web Programming in C#2015 4. Beginning Visual C# 2010	Black Board, Projector, PPT.
	Security Fundamentals: Understanding Security Requirements, Authentication and Authorization, Forms Authentication, Windows Authentication.	4		Black Board, Projector, PPT.
	ASP.NET AJAX: Understanding Ajax, Using Partial Refreshes, Using Progress Notification, Implementing Timed Refreshes, Working with the ASP.NET AJAX Control Toolkit	5		Black Board, Projector, PPT.

NAME OF THE STAFF: -**MRS.JYOTI PRABHAKAR JADHAV**----DEPARTMENT: **IT** CLASS: TYBSCIT SEMESTER:V

MONTH: JUNE-SEPT ACADEMIC YEAR:2019-20

LEARNING OBJECTIVE/S:

The learners will be able to :

Understand fundanentals of project

Be familiar with diff methods and tools used for project management

Do the project planning,scheduling,costing

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT501 Software Project Management UNIT-1	**Introduction to Software Project Management**:Introduction, Whyis Software Project Management Important? What is a Project?Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies,Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Successand Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus Modern Project Management Practices.	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Project Evaluation and Programme Management: Introduction, Business Case, Project Portfolio Management, Evaluation of Individual Projects, Cost–benefit Evaluation	04	Bob Hughes, Mike	Black Board,and Chalk ,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Techniques, Risk Evaluation, Programme Management, Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management.		Cotterell, Rajib Mall	
	An Overview of Project Planning :Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project Infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify Activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning	03	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
USIT501 Software Project Management UNIT-2	**Selection of an Appropriate Project Approach:**Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model.	06	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Software Effort Estimation: Introduction, Where are the Estimates Done? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottomup Estimating, The Top-down Approach and Parametric Models,Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II,	06	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	COSMIC Full Function Points,COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb.			
USIT501 Software Project Management UNIT-3	**Activity Planning:** Introduction, Objectives of Activity Planning,When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating aNetwork Model, Adding the Time Dimension, The Forward Pass,Backward Pass, Identifying the Critical Path, Activity Float,Shortening the Project Duration, Identifying Critical Activities,Activity-on-Arrow Networks.	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for Dealing with Risk, RiskIdentification, Risk Assessment, Risk Planning, Risk Management,Evaluating Risks to the Schedule, Boehm"s Top 10 Risks and Counter Measures, Applying the PERT Technique, Monte Carlo Simulation,Critical Chain Concepts	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
USIT501 Software Project Management UNIT-4	**Monitoring and Control**: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM).	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance.	04	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns.	03	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
USIT501 Software Project Management UNIT-5	**Working in Teams:** Introduction, Becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Software Quality : Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability,Quality Plans.	05	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point
	Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project CloseoutReport	02	Bob Hughes, Mike Cotterell, Rajib Mall	Black Board,and Chalk ,power point

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: BRIJESH YATINDRA JOSHI **DEPARTMENT: INFORMATION TECHNOLOGY**

CLASS: TYIT DIV - A SEMESTER: V MONTH: June to September ACADEMIC YEAR: 2019-2020

Learning Objectives

1. **Understand .NET Framework, Learn C # language , implementation of object oriented programming concepts using C# language**
2. **Understand the fundamentals of web form, learn to develop the .net application.**
3. **Understand various GUI controls and their use .**
4. **Understand the concept and implementation of error handling ,logging and tracing .**
5. **Understand the concept and implementation of state management , styles, themes and master pages**
6. **Understand the basics of ADO.Net and basics of Data binding and data controls**
7. **Understand various concepts in XML ,security fundamentals and ASP.NET AJAX**

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Anuja Narottam Patil. DEPARTMENT: Information Technology.

CLASS: T.Y.B.Sc. SEMESTER: V MONTH: June To Sept ACADEMIC YEAR: 2019-2020

LEARNING OBJECTIVE/S:

- To support for many industry standards and continues simplification of enterprise ready APIs.

The learners will be able to :

- To understand Java Enterprise edition with its different technologies.
- To understand Java EE architectural server and contains.
- To understand server side technology like Java Servlets with its API and life cycle.
- To make data base connectivity using JDBC.
- To navigate using request dispatcher interface.
- To understand state management using cookies and session.
- To understand how to upload and download the file.
- To be able to work with non-blocking I/O resources.
- To understand server side technology like Java Server Pages.
- To make use of action elements, implicit objects, expression language and JSTL.
- To understand enterprise bill, architectural and its bill.
- To be able to working with session beans and message driven beans.
- To understand interceptors and JNDI.
- To make use of ORM and JPA with its API.
- To understand writing JPA application.
- To be able to understand hibernate architectural and components.
- To understand writing hibernate application.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT506 Enterprise Java UNIT-I	**Understanding Java EE:** WhatisanEnterpriseApplication? Whatisjavaenterpriseedition? JavaEETechnologies, JavaEEevolution,Glassfishserver.	2	1. Java EE 7 For Beginners 2. Java EE 8 Cookbook: Build reliable applications with the most robust and mature technology for enterprise development 3. Advanced Java Programming	Black Board, Projector, PPT.
	JavaEE Architecture,Serverand Containers: TypesofSystemArchitecture, JavaEEServer, JavaEEContainers.	2		Black Board, Projector, PPT.
	Introduction to Java Servlets: TheNeedforDynamicContent, JavaServletTechnology, WhyServlets? WhatcanServletsdo?	2		Black Board, Projector, PPT.
	Servlet API and Lifecycle: JavaServletAPI, TheServletSkeleton, TheServletLifeCycle, ASimpleWelcomeServlet	2		
	WorkingwithServlets: GettingStarted, UsingAnnotationsInsteadofDeploymentDescriptor.	2		
	Working with Databases: WhatIsJDBC? JDBCArchitecture, AccessingDatabase, TheServletGUI and DatabaseExample.	2		
USIT506 Enterprise Java	**Request Dispatcher:** Resquestdispatcher Interface, Methods of Requestdispatcher, Requestdispatcher Application	2	1. Java EE 7 For Beginners	Black Board, Projector,

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT-II	**COOKIES:** KindsofCookies, WhereCookiesAreUsed? CreatingCookiesUsingServlet, DynamicallyChangingtheColorsofAPage	3	2. Java EE 8 Cookbook: Build reliable applications with the most robust and mature technology for enterprise development 3. Advanced Java Programming	PPT.
	SESSION: WhatAreSessions? LifecycleofHttpSession, SessionTrackingWithServletAPI, AServlet Session Example	2		
	Workingwith Files: UploadingFiles, CreatinganUploadFileApplication, DownloadingFiles, CreatingaDownloadFileApplication.	2		
	Workingwith Non-Blocking I/O: CreatingaNon-BlockingReadApplication, CreatingTheWeb Application, CreatingJavaClass, Creating Servlets, Retrieving The File, Creating index.jsp	3		
USIT506 Enterprise Java UNIT-III	**Introduction To Java ServerPages:** WhyuseJava ServerPages? DisadvantagesOfJSP, JSPv\sServlets, LifeCycleofaJSPPage, HowdoesaJSPfunction? HowdoesJSPexecute? AboutJava ServerPages	3	1. Java EE 7 For Beginners 2. Java EE 8 Cookbook: Build reliable applications with the most robust and mature technology for enterprise development 3. Advanced Java Programming	Black Board, Projector, PPT.
	Getting Started With Java ServerPages: Comments, JSPDocument,JSPElements, JSPGUIExample	2		
	Action Elements: IncludingotherFiles, ForwardingJSPPagetoAnotherPage, PassingParametersforotherActions, LoadingaJavabean.	2		
	Implicit Objects, Scopeand ElExpressions: ImplicitObjects, CharacterQuotingConventions, UnifiedExpressionLanguage[UnifiedEl], ExpressionLanguage.	3		
	Java Server Pages Standard Tag Libraries: WhatiswronginusingJSPScriptletTags?	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	HowJSTLFixesJSPScriptlet'sShortcomings? DisadvantagesOfJSTL, TagLibraries.			
USIT506 Enterprise Java UNIT-IV	**Introduction To EnterpriseJavabeans:** EnterpriseBeanArchitecture, BenefitsofEnterpriseBean, TypesofEnterpriseBean, AccessingEnterpriseBeans, EnterpriseBeanApplication, PackagingEnterpriseBeans	2	1. Java EE 7 For Beginners 2. Java EE 8 Cookbook: Build reliable applications with the most robust and mature technology for enterprise development 3. Advanced Java Programming	Black Board, Projector, PPT.
	Workingwith Session Beans: WhentouseSessionBeans? TypesofSessionBeans, RemoteandLocalInterfaces, AccessingInterfaces, LifecycleofEnterpriseBeans, PackagingEnterpriseBeans, Exampleof StatefulSessionBean, Example ofStatelessSessionBean, Example of SingletonSessionBeans.	3		
	Working with Message DrivenBeans: LifecycleofaMessageDrivenBean, UsesofMessageDrivenBeans, TheMessage DrivenBeansExample.	2		
	Interceptors: Request andInterceptor, Defining An Interceptor, AroundInvokeMethod, ApplyingInterceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application.	2		
	Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and JNDI, Datasource Resource Definition in Java EE.	3		
USIT506 Enterprise Java UNIT-V	**Persistence, Object/Relational Mapping And JPA:** WhatisPersistence? PersistenceinJava,Current Persistence Standards in Java, Why an other Persistence Standards? Object/RelationalMapping,	2	1. Java EE 7 For Beginners 2. Java EE 8 Cookbook: Build reliable applications with the	Black Board, Projector, PPT.
	Introduction to JavaPersistence API: TheJavaPersistenceAPI, JPA,ORM,DatabaseandtheApplication, ArchitectureofJPA, HowJPAWorks? JPA Specifications.	2		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Writing JPA Application: ApplicationRequirementSpecifications, SoftwareRequirements, TheApplicationDevelopmentApproach, CreatingDatabaseandTablesinMysql, creatingaWebApplication, AddingtheRequiredLibraryFiles, creatingaJavabeanClass, CreatingPersistenceUnit[Persistence.Xml], CreatingJSPS, TheJPAApplicationStructure, RunningtheJPAApplication.	3	most robust and mature technology for enterprise development 3. Advanced Java Programming	
	Introduction to Hibernate: WhatisHibernate? WhyHibernate? Hibernate,DatabaseandTheApplication, ComponentsofHibernate, ArchitectureofHibernate, HowHibernateWorks?	2		
	WritingHibernateApplication: ApplicationRequirementSpecifications, SoftwareRequirements, TheApplicationDevelopmentApproach, CreatingDatabaseandTablesinMysql, creatingaWebApplication, AddingtheRequiredLibraryFiles, creatingaJavabeanClass, CreatingHibernateConfigurationFile, AddingaMappingClass, CreatingJSPS, RunningTheHibernateApplication.	3

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: PRANALI DAYANAND THAKARE DEPARTMENT: IT

CLASS: T.Y. BSc (IT) DIV-C SEMESTER:SEM -5 MONTH: JUN-SEPT ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:

The learners will be able to :

- Understand what is a The Internet of Things and its applications .
- Introduction of Prototyping the Physical Design and online design.
- Understand different techniques of Prototyping.
- Learn the concept of automation.

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT502 Internet Of Things UNIT 1	**The Internet of Things:** An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	4	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	Black board and chalk , Projector
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	4		
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses,	4		

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols.			
USIT502 Internet Of Things UNIT 2	**Thinking About Prototyping**: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation	4	1.Designing the Internetof Things Adrian McEwen, Hakim Cassimally WILEY First 2014 , 2.Internet of Things – Architecture and Design Raj Kamal McGraw Hill First 201	Black board and chalk, Projector
	Climbing into the Cloud Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community	4		
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness	4		
USIT502 Internet Of Things	**Prototyping the Physical Design:** Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling.	5	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014	Black board and chalk, Projector

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

UNIT 3	**Prototyping Online Components**: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further	3		
	Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol.	4		
USIT502 Internet Of Things UNIT 4	**Techniques for Writing Embedded Code:** Memory Management,Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging.	5	Designing the Internet of Things Adrian McEwen, Hakim Cassimally WILEY First 2014 www.tutorialspoint.com	Black board and chalk, Projector
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models	3		
	Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	4		
USIT502	**Moving to Manufacture:** What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design	5	1.DesigningtheInternetof Things Adrian McEwen, Hakim Cassimally WILEY First 2014 ,	Black board and chalk, Projector

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Internet Of Things	Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures.		2.Getting Started with Raspberry Pi Matt Richardson and Shawn Wallace SPD Third 2016	
UNIT 5	Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	3		
	Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control,Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition	4

LEARNING OBJECTIVE/S:
The learners will be able to :

- **Understand the background of Red Hat Linux administration as an operating system.**
- **How to work with various commands and their implementation in Linux bash shell system.**
- **To understand basic management tasks, administrative tasks and managing different services with RPM.**
- **Helps to make you configure and install the software, working with the networks and creation of users, groups and permissions in system.**
- **To make you understand the security concept of the system and cryptographic services.**
- **It also make you understand how to configure and to install different servers(FTP, Mail services, DHCP, Samba etc.) and to enable its services and to provide client server architecture working.**
- **Helps to create clusters and provide better understanding of shell scripting.**

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
Paper-04 (USIT505)	**Introduction to Red Hat Enterprise Linux:** Linux, Open Source and Red Hat, Origins of Linux, Distributions, Duties of Linux System Administrator.	01	Red Hat Enterprise Linux 6 Administration By	Textbook, Blackboard, Chalk and Duster.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Linux System Administration **Unit No -01**	**Command Line:** Working with the Bash Shell, Getting the Best of Bash, Useful Bash Key Sequences, Working with Bash History, Performing Basic File System Management Tasks, Working with Directories, Piping and Redirection, Finding Files	04	Sander van Vugt , John Wiley and Sons	Textbook, Blackboard, Chalk and Duster, Projector, Laptop, PPTs.
	System Administration Tasks: Performing Job Management Tasks, System and Process Monitoring and Management, Managing Processes with ps, Sending Signals to Processes with the kill Command, Using top to Show Current System Activity, Managing Process Niceness, Scheduling Jobs, Mounting Devices, Working with Links, Creating Backups, Managing Printers, Setting Up System Logging, Setting Up Rsyslog, Common Log Files, Setting Up Logrotate	04		Projector, Laptop, PPTs.
	Managing Software: Understanding RPM, Understanding Meta Package Handlers, Creating Your Own Repositories, Managing Repositories, Installing Software with Yum, Querying Software, Extracting Files from RPM Packages	03		Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -02	**Configuring and Managing Storage:** Understanding Partitions and Logical Volumes, Creating Partitions, Creating File Systems, File Systems Overview, Creating File Systems, Changing File System Properties, Checking the File System Integrity, Mounting File Systems Automatically Through fstab, Working with Logical Volumes, Creating Logical Volumes, Resizing Logical Volumes, Working with Snapshots, Replacing Failing Storage	04	Red Hat Enterprise Linux 6 Administration By Sander van Vugt ,	Projector, Laptop, PPTs.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Devices, Creating Swap Space, Working with Encrypted Volumes .		John Wiley and Sons	
	Connecting to the Network: Understanding NetworkManager, Working with Services and Runlevels, Configuring the Network with NetworkManager, Working with system-config-network, NetworkManager Configuration Files, Network Service Scripts, Networking from the Command Line, Troubleshooting Networking, Setting Up IPv6, Configuring SSH, Enabling the SSH Server, Using the SSH Client, Using PuTTY on Windows Machines, Configuring Key-Based SSH Authentication, Using Graphical Applications with SSH, Using SSH Port Forwarding, Configuring VNC Server Access	04		Projector, Laptop, PPTs.
	Working with Users, Groups, and Permissions: Managing Users and Groups, Commands for User Management, Managing Passwords, Modifying and Deleting User Accounts, Configuration Files, Creating Groups, Using Graphical Tools for User, and Group Management, Using External Authentication Sources, the Authentication Process, sssd, nsswitch, Pluggable Authentication Modules, Managing Permissions, the Role of Ownership, Basic Permissions: Read, Write, and Execute, Advanced Permissions, Working with Access Control Lists, Setting Default Permissions with umask, Working with Attributes	04		Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -03	**Securing Server with iptables:** Understanding Firewalls, Setting Up a Firewall with system-config-firewall, Allowing	04		Projector, Laptop,

	Services, Trusted Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule, Configuration Example, Advanced iptables Configuration, Configuring Logging, The Limit Module, Configuring NAT		Red Hat Enterprise Linux 6 Administration By Sander van Vugt , John Wiley and Sons	PPTs.
	Setting Up Cryptographic Services: Introducing SSL, Proof of Authenticity: the Certificate Authority, Managing Certificates with openssl, Creating a Signing Request, Working with GNU Privacy Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys, Encrypting Files with GPG, GPG Signing, Signing RPM Files	04		Projector, Laptop, PPTs.
	Configuring Server for File Sharing: What is NFS? Advantages and Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring Automount, Configuring Samba, Setting Up a Samba File Server, Samba Advanced Authentication Options, Accessing Samba Shares, Offering FTP Services.	04		Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -04	**Configuring DNS and DHCP:** Introduction to DNS, The DNS Hierarchy, DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server	04	Red Hat Enterprise Linux 6 Administration By Sander van Vugt ,	Projector, Laptop, PPTs.

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, Configuring Dovecot for POP and IMAP	03	John Wiley and Sons	Projector, Laptop, PPTs.
	Configuring Apache on Red Hat Enterprise Linux: Configuring the Apache Web Server, Creating a Basic Website, Understanding the Apache Configuration Files, Apache Log Files, Working with Virtual Hosts, Securing the Web Server with TLS Certificates, Configuring Authentication, Setting Up Authentication with .htpasswd, Configuring LDAP Authentication, Setting Up MySQL	05		Projector, Laptop, PPTs.
	TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12			
Unit No -05	**Introducing Bash Shell Scripting:** Introduction, Elements of a Good Shell Script, Executing the Script, Working with Variables and Input, Understanding Variables, Variables, Subshells, and Sourcing, Working with Script Arguments, Asking for Input, Using Command Substitution, Substitution Operators, Changing Variable Content with Pattern Matching, Performing Calculations, Using Control Structures, Using if...then...else, Using case, Using while, Using until, Using for, Configuring booting with GRUB.	03	Red Hat Enterprise Linux 6 Administration By Sander van Vugt , John Wiley and Sons	Textbook, Blackboard, Chalk and Duster, Projector, Laptop, PPTs.
	High-Availability Clustering: High-Availability Clustering, The Workings of High Availability, High-Availability Requirements, Red Hat High-Availability Add-on Software, Components, Configuring Cluster-Based Services, Setting Up Bonding, Setting Up Shared Storage, Installing the Red Hat High	05		Projector, Laptop, PPTs.

	Availability Add-On, Building the Initial State of the Cluster, Configuring Additional Cluster Properties, Configuring a Quorum Disk, Setting Up Fencing, Creating Resources and Services, Troubleshooting a Nonoperational Cluster, Configuring GFS2 File Systems			
	Setting Up an Installation Server: Configuring a Network Server as an Installation Server, Setting Up a TFTP and DHCP Server for PXE Boot, Installing the TFTP Server, Configuring DHCP for PXE Boot, Creating the TFTP PXE Server Content, Creating a Kickstart File, Using a Kickstart File to Perform an Automated, Installation, Modifying the Kickstart File with, system-config-kickstart, Making Manual Modifications to the Kickstart File	04		Projector, Laptop, PPTs.

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 12

Bhaskar Waman Thakur College of Science
Yashvant Keshav Patil College of Commerce
Vidhya Dayanand Patil College of Arts
VIVA COLLEGE, Virar (W)
NAAC accredited "B" Grade, 2.69 CGPA

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: Prof Sandesh Akre DEPARTMENT: Information technology CLASS: TYIT

SEMESTER: V MONTH: July ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Learn Software Development Methodology
- Conceptual Software development Approaches
- Different development techniques

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT501 Software Project Management Unit 1	Introduction to Software Project Management: Introduction, Whyis Software Project Management Important? What is a Project? Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Success and Failure, What is Management? Management Control,	12	Software Project Management Bob Hughes, MikeCotterell, Rajib Mall	Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 2	Project Management Life Cycle, Traditional versus Modern Project Management Practices. Project Evaluation and Programme Management: Introduction, Business Case, Project Portfolio Management, Evaluation of Individual Projects, Cost–benefit Evaluation Techniques, Programme Management, Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management. An Overview of Project Planning : Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: Identify Project Scope and Objectives, Step 2: Identify Project infrastructure, Step 3: Analyse Project Characteristics, Step 4: Identify Project Products and Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify activity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning			
	Selection of an Appropriate Project Approach: Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery,	12	Software Project Management Bob Hughes, MikeCotterell, Rajib Mall	Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

Unit 3	Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model. Software Effort Estimation: Introduction, Where are the EstimatesDone? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottom- up Estimating, The Top-down Approach and Parametric Models, Expert Judgement, Estimating by Analogy, Albrecht Function Point Analysis, Function Points Mark II, COSMIC Full Function Points, COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb.			
	Activity Planning: Introduction, Objectives of Activity Planning, When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating a Network Model, Adding the Time Dimension, The Forward Pass, Backward Pass, Identifying the Critical Path, Activity Float, Shortening the Project Duration, Identifying Critical Activities, Activity-on-Arrow Networks. Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for	12	Software Project Management Bob Hughes, MikeCotterell, Rajib Mall	Chalk and Board

Unit 4	Dealing with Risk, Risk Identification, Risk Assessment, Risk Planning, Risk Management, Evaluating Risks to the Schedule, Boehm's Top 10 Risks and Counter Measures, Applying the PERT Technique, Monte Carlo Simulation, Critical Chain Concepts. Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence.			
Unit 5	Monitoring and Control: Introduction, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM). Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms Management, Acceptance. Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns.	12	Software Project Management Bob Hughes, MikeCotterell, Rajib Mall	Chalk and Board
	Working in Teams: Introduction, Becoming a Team, Decision Making, Organization and Team Structures, Coordination	12	Software Project Management	Chalk and Board

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership. Software Quality : Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability, Quality Plans. Project Closeout: Introduction, Reasons for Project Closure, Project Closure Process, Performing a Financial Closure, Project Closeout Report.		Bob Hughes, MikeCotterell, Rajib Mall	

TOTAL NUMBER OF LECTURES ALLOCATED TO THE UNIT: 60

TEACHING PLAN (UNIT PLAN)

NAME OF THE STAFF: MRS.. HARSHALI SHAILESH MANKAR DEPARTMENT: IT CLASS: TYIT DIV-B

SEMESTER: V MONTH: JUNE- SEPTEMBER ACADEMIC YEAR: 2019-20

LEARNING OBJECTIVE/S:
The learners will be able to:

- Able to understand the application areas of IOT ·
- Able to realize the revolution of Internet in Mobile Devices, Cloud & Sensor Networks ·
- Able to understand building blocks of Internet of Things and characteristics

PAPER, UNIT, TITLE	SUBTOPICS	NO OF LECTURES ALLOTED	REFERENCE/S	TEACHING METHOD/ ICT TOOLS USED
USIT502, Internet of Things Unit 1	The Internet of Things: An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things?	03	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, Powerpoint
	Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.	04	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses, DNS, Static IP Address Assignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other	03	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

	Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols			
USIT502, Internet of Things **Unit 2**	Thinking About Prototyping: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation, climbing into the Cloud, Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
USIT502, Internet of Things **Unit 3**	Prototyping the Physical Design: Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Prototyping Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint

SIGNATURE OF THE STAFF **SIGNATURE OF THE H.O.D.**

USIT502, Internet of Things **Unit 4**	Techniques for Writing Embedded Code: Memory Management, 12 8 Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries,Debugging.	04	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
	Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	06	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
USIT502, Internet of Things **Unit 5**	Moving to Manufacture: What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.	05	Designing the Internet of Things Adrian McEwen, Hakim Cassimally	Black Board and chalk, PowerPoint
