A teaching plan is a document that outlines the structure and details of a single session. A good teaching plan is a comprehensive write-up of the step-by-step teaching methods, the estimated duration of each segment of teaching, and the materials and resources needed for the session.

LEARNING OBJECTIVE/S:

By the end of the session Students will be able to:

The general education curriculum will enable students to acquire skills, knowledge, and experience for living in interconnected context so they can contribute to making life better for others, themselves and the larger world.

(For a detailed description of each component see Appendix A).

SUBJECT: **BASICS OF POST PRODUCTION**

LEARNING OBJECTIVE/S: An editor's job is to decide, 24/25/30 times a second, where the audience needs to be. Do we
stay in a shot or transition to another, and if so, what shot and how do we get there? Working side-by-side with the director to craft the movie that ultimately hits the screen – or your phone – editing is really about manipulating the audience, in the best possible way, all in the service of storytelling.
In this class, we will study terminology and concepts, learning both the rules and how to break them, as we look at the aesthetics choices and the technological workflow for both picture and sound editing. We will examine the historical role of editing, from the earliest silent film through the digital revolution that has transformed moviemaking today.
INTRO TO EDITING THEORY
Introduction to the history of film editing. Lumiere Brothers, Thomas Edison, Edwin Porter, DW Griffith); the manipulation of editing; Lev Kuleshov's experiment; the language of cinema;
introduction to the editor as storyteller and understanding the narrative structure.
INTRO TO PREMIERE PRO

SUBJECT: **HISTORY OF NON- FICTION FILM**

LEARNING OBJECTIVE/S: This course explores the history and theory of non-fiction film and video, with an emphasis on
work that falls under the rubric of "documentary."
Documentary is a unique form of non-fiction moving image media that claims a special relationship to reality and truth. Through screenings, readings and class discussion, we will explore such questions as:
• How does documentary relate to narrative fiction filmmaking? To other non-fiction forms of television like reality TV or news reports?
• How "real" are documentary representations, and how much does it matter?
• What are some different formal approaches documentary, and how does each mediate the representation of real life it offers?
• How has documentary image-making changed over time? What can we learn from this history that is relevant to media-making today?
• What are the particular ethics of representing others in a medium like video or film?
• What responsibility do documentarians have to their subjects, to the form, and to society at large?
• How do people watch documentaries, and what is the impact of these films on the world they aim to represent?
Be familiar with efforts to create more democratic systems of media production and distribution.
Learn how to watch earlier films both as an audience THEN (with understanding of the film's social, cultural, historical context), and NOW (with understanding of your own future goals and
with critical, analytical eyes to study history).
Be able to think – and write — critically about non-fiction media.

SEMESTER: **IV**
ACADEMIC YEAR: **2022- 2023**
SUBJECT: **DRAMA PRODUCTION**

LEARNING OBJECTIVE/S: The module is intended to provide an introduction to the process of digital short film
production for the purpose of making works of drama and fiction. The focus will therefore be on enabling the development of the practical and theoretical skills in pitching, planning, writing,
shooting and editing necessary to produce a coherent and competent fictional moving image project.

The module will seek to introduce the student to a range of creative and scheduling skills which will assist them in the production of their projects. It will foreground the inherently collaborative and collective aspects of the production process by aiding the student to refine a range of communication and inter-personal skills to accomplish a broad range of tasks, including identification and planning of a suitable production idea; Allocation of roles for the pre-production, shooting and editing phases, as well as encouraging collective responsibility and accountability which is absolutely essential to the completion of any professional or team production. The module will also build upon the more technical grounding offered in Techniques 2 in order to develop the practical vocabulary and skills required to produce moving
image projects. Students will be encouraged to investigate and undertake a role throughout their productions. In crews, they will produce two shorts for inclusion in their personal practice portfolio.

SUBJECT: **BASICS OF POST PRODUCTION**

LEARNING OBJECTIVE/S: An editor's job is to decide, 24/25/30 times a second, where the audience needs to be. Do we
stay in a shot or transition to another, and if so, what shot and how do we get there? Working side-by-side with the director to craft the movie that ultimately hits the screen – or your phone – editing is really about manipulating the audience, in the best possible way, all in the service of storytelling.
In this class, we will study terminology and concepts, learning both the rules and how to break them, as we look at the aesthetics choices and the technological workflow for both picture and sound editing. We will examine the historical role of editing, from the earliest silent film through the digital revolution that has transformed moviemaking today.
INTRO TO EDITING THEORY
Introduction to the history of film editing. Lumiere Brothers, Thomas Edison, Edwin Porter, DW Griffith); the manipulation of editing; Lev Kuleshov's experiment; the language of cinema;
introduction to the editor as storyteller and understanding the narrative structure.

SUBJECT: **HISTORY OF NON- FICTION FILM**

LEARNING OBJECTIVE/S: This course explores the history and theory of non-fiction film and video, with an emphasis on
work that falls under the rubric of "documentary."
Documentary is a unique form of non-fiction moving image media that claims a special relationship to reality and truth. Through screenings, readings and class discussion, we will explore such questions as:
• How does documentary relate to narrative fiction filmmaking? To other non-fiction forms of television like reality TV or news reports?
• How "real" are documentary representations, and how much does it matter?
• What are some different formal approaches documentary, and how does each mediate the representation of real life it offers?
• How has documentary image-making changed over time? What can we learn from this history that is relevant to media-making today?
• What are the particular ethics of representing others in a medium like video or film?
• What responsibility do documentarians have to their subjects, to the form, and to society at large?
• How do people watch documentaries, and what is the impact of these films on the world they aim to represent?
Be familiar with efforts to create more democratic systems of media production and distribution.
Learn how to watch earlier films both as an audience THEN (with understanding of the film's social, cultural, historical context), and NOW (with understanding of your own future goals and
with critical, analytical eyes to study history).
Be able to think – and write — critically about non-fiction media.

SUBJECT**: PRACTICAL FILM MAKING 1 (ONLY NON-FICTION FILM)**

LEARNING OBJECTIVE/S: To understand the film making process for multiple locations in non-fiction films
To understand the entire workflow
To gain exposure on various cameras and software used for production
The students will undergo the process of making a non-fiction film.
The students will be exposed to Semi-professional camera cameras & software. The students will also undergo same basic exercises such as 3 shot and 6 shot to give them a basic sense of framing, composition, movement and editing. The final project will be a non-fiction film with the duration of 5-10 minutes.

SEMESTER: **IV**
ACADEMIC YEAR: **2021-2022**
SUBJECT: **DRAMA PRODUCTION**

LEARNING OBJECTIVE/S: The module is intended to provide an introduction to the process of digital short film
production for the purpose of making works of drama and fiction. The focus will therefore be on enabling the development of the practical and theoretical skills in pitching, planning, writing,
shooting and editing necessary to produce a coherent and competent fictional moving image project.

The module will seek to introduce the student to a range of creative and scheduling skills which will assist them in the production of their projects. It will foreground the inherently collaborative and collective aspects of the production process by aiding the student to refine a range of communication and inter-personal skills to accomplish a broad range of tasks, including identification and planning of a suitable production idea; Allocation of roles for the pre-production, shooting and editing phases, as well as encouraging collective responsibility and accountability which is absolutely essential to the completion of any professional or team production. The module will also build upon the more technical grounding offered in Techniques 2 in order to develop the practical vocabulary and skills required to produce moving
image projects. Students will be encouraged to investigate and undertake a role throughout their productions. In crews, they will produce two shorts for inclusion in their personal practice portfolio.

SEMESTER: **I**
ACADEMIC YEAR: **2020-2021**
SUBJECT: **BASICS OF POST PRODUCTION**

LEARNING OBJECTIVE/S: An editor's job is to decide, 24/25/30 times a second, where the audience needs to be. Do we
stay in a shot or transition to another, and if so, what shot and how do we get there? Working side-by-side with the director to craft the movie that ultimately hits the screen – or your phone – editing is really about manipulating the audience, in the best possible way, all in the service of storytelling.
In this class, we will study terminology and concepts, learning both the rules and how to break them, as we look at the aesthetics choices and the technological workflow for both picture and sound editing. We will examine the historical role of editing, from the earliest silent film through the digital revolution that has transformed moviemaking today.
INTRO TO EDITING THEORY
Introduction to the history of film editing. Lumiere Brothers, Thomas Edison, Edwin Porter, DW Griffith); the manipulation of editing; Lev Kuleshov's experiment; the language of cinema;
introduction to the editor as storyteller and understanding the narrative structure.
INTRO TO PREMIERE PRO
Screening of Examples. The Premiere Pro interface features and functions, how to import and organize footage, basic editing techniques
EDITING EXERCISE
Watch the work of a Master Editor, Basic Production techniques, Practicing/Reviewing skills
