NAME OF THE STAFF: **MISS.NIYANTA DAVE** DEPARTMENT: **PHYSICS** CLASS: **T.Y.B.Sc.**

SEMESTER: **V** MONTH: **- June - September** ACADEMIC YEAR: **2021-22**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Apply theory of quantum physics in atomic physics.
- Understand importance of electron spins, symmetric & antisymmetric wave functions & vector atom model.
- Learn the Effect of magnetic field on atoms & its application.
- Learn molecular physics & its application.
- This course will be useful to get an insight into spectroscopy.
- Get the insight of the modern medical instruments in principle, which are used in day to day life.
- From this course, the students are expected to learn some mathematical techniques required to understand the physical phenomena at the undergraduate level and get exposure to important ideas of statistical mechanics.
- The units on statistical mechanics would introduce the students to the concept of microstates, Boltzmann distribution and statistical origins of entropy.
- It is also expected that the student will understand the difference between different statistics, classical as well as quantum.

SEMESTER: **III** MONTH: **June-September** ACADEMIC YEAR: **2021-22**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Comprehend the basic concepts of thermodynamics & its applications in physical situation.
- Learn about situations in low temperature.
- Demonstrate tentative problem solving skills in all above areas.
- Students will be exposed to contextual real life situations.
- Students will appreciate the role of Physics in 'interdisciplinary areas related to Acoustics.
- The learner will understand the scope of the subject in Industry & Research.

NAME OF THE STAFF: **MISS.NIYANTA DAVE** DEPARTMENT: **PHYSICS** CLASS: **T.Y.B.Sc.**

SEMESTER: **V** MONTH: **September-December** ACADEMIC YEAR: **2020-21**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Apply theory of quantum physics in atomic physics.
- Understand importance of electron spins, symmetric & antisymmetric wave functions & vector atom model.
- Learn the Effect of magnetic field on atoms & its application.
- Learn molecular physics & its application.
- This course will be useful to get an insight into spectroscopy.
- Get the insight of the modern medical instruments in principle, which are used in day to day life.
- From this course, the students are expected to learn some mathematical techniques required to understand the physical phenomena at the undergraduate level and get exposure to important ideas of statistical mechanics.
- The units on statistical mechanics would introduce the students to the concept of microstates, Boltzmann distribution and statistical origins of entropy.
- It is also expected that the student will understand the difference between different statistics, classical as well as quantum.

NAME OF THE STAFF: **MISS.NIYANTA DAVE** DEPARTMENT: **PHYSICS** CLASS: **S.Y.B.Sc.**

SEMESTER: **III** MONTH: **September-December** ACADEMIC YEAR: **2020-21**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Comprehend the basic concepts of thermodynamics & its applications in physical situation.
- Learn about situations in low temperature.
- Demonstrate tentative problem solving skills in all above areas.
- Students will be exposed to contextual real life situations.
- Students will appreciate the role of Physics in 'interdisciplinary areas related to Acoustics.
- The learner will understand the scope of the subject in Industry & Research.

NAME OF THE STAFF: **MISS.NIYANTA DAVE** DEPARTMENT: **PHYSICS** CLASS: **T.Y.B.Sc.**

SEMESTER: **V** MONTH: **June-September** ACADEMIC YEAR: **2018-19**

LEARNING OBJECTIVE/S:
The learners will be able to:

- Apply theory of quantum physics in atomic physics.
- Understand importance of electron spins, symmetric & antisymmetric wave functions & vector atom model.
- Learn the Effect of magnetic field on atoms & its application.
- Learn molecular physics & its application.
- This course will be useful to get an insight into spectroscopy.
- Get the insight of the modern medical instruments in principle, which are used in day to day life.
