**PROFESSIONAL ETHICS**

**CODE OF PROFESSIONAL ETHICS**

- Professionally accepted standards of personal and business behavior, values and guiding principles. Codes of professional ethics are often established by professional organizations to help to guide members in performing their job functions according to sound and consistent ethical principles. Professional ethics may be understood as professionally acknowledged measures of individual and business conduct, values, and guiding principles. Professional ethics is nothing but a code of conduct applicable to different professions and is set up by the expert members of such professions or professional organizations. The underlying philosophy of having professional ethics is to make the persons performing in such jobs follow sound, uniform ethical conduct. Some of the important components of professional ethics that professional organizations necessarily include in their code of conduct are integrity, honesty, transparency, respectfulness towards the job, confidentiality, objectivity etc.

**Need for Professional Ethics**

- Professional ethics are accepted standards of personal and business behavior, values and guiding principles. Codes of professional ethics are established by professional organizations to help to guide members in performing their job functions according to sound and consistent ethical principles. Professional ethics is set up by the expert members of such profession or professional organizations. The underlying philosophy of having professional ethics is to make the persons performing in such jobs follow sound, uniform ethical conduct. Professional organizations necessarily include components like integrity, honesty, transparency, respectfulness towards the job, confidentiality, objectivity etc. in their code of conduct.

**TEACHERS AND THEIR RESPONSIBILITIES: -**

- Whoever adopts teaching as a profession assumes the obligation to conduct himself / herself in accordance with the ideal of the profession. A teacher is constantly under the scrutiny of his / her students and the society at large. Therefore, every teacher should see that there is no incompatibility between his precepts
- and practice. The national ideals of education which have already been set forth and which he/she should seek to inculcate among students must be his/her own ideals. The profession further requires that the teachers should be calm, patient and communicative by temperament and amiable in disposition.
- Teachers should:
- Adhere to a responsible pattern of conduct and demeanor expected of them by the community.
- Manage their private affairs in a manner consistent with the dignity of the profession.
- Seek to make professional growth continuous through study and research.
- Express their views and frank opinion by participation at professional meetings, seminars, conferences, etc. towards the contribution of knowledge,

**TEACHERS AND NON-TEACHING STAFF**

- Teachers should treat the non-teaching staff as colleagues and equal partners in a cooperative undertaking, within every educational institution, and
- Teachers should help in the function in joint staff-councils covering both teachers and the non-teaching staff.

**TEACHERS AND GUARDIANS**

- Teachers should try to see through teachers' bodies and organizations, that institutions maintain contact with the guardians, their students, send reports of their performance to the guardians whenever necessary and meet the guardians in meetings convened for the purpose for mutual exchange of ideas and for the benefit of the institution.

**TEACHERS AND SOCIETY**

- Teachers should:
- Recognize that education is a public service and strive to keep the public informed of the educational programs which are being provided
- Work to improve education in the community and strengthen the community's moral and intellectual life.
- Be aware of social problems and take part in such activities as would be conducive to the progress of society and hence the country as a whole.
- Perform the duties of citizenship, participate in community activities and should not neglect their responsibilities of public offices.

### GENDER

- Gender sensitivity and gender sensitization is accomplished through amalgamation of theory and practice. There are many platforms for hands-on experiences related to gender sensitivity which enable students to interface with real life situations such as field work, community outreach, and gender sensitization activities under Women Development Cell(WDC)
- The cell aims to enable lady faculty and girl students to explore their imminent potential in all aspects, providing a congenial working environment for them.
- The events such as Quiz, Miss-Ethnic, Role-Play and Elocution Competitions on Women Empowerment and Great Women Personalities are conducted. The program on "Gender Sensitization and Social Responsibility" was conducted. Many programs like "Awareness on Sexual Harassment at Work Place", "Theme: Laws related to Women", "Cervical Cancer Awareness", "An Orientation on Behavior and Discipline of Girl Students", "Violence against Women-Safeguards-awareness of women laws" were conducted in last five years.

### HUMAN VALUES

- Human values refer to those values which are at the core of being human. The values which are considered basic inherent values in humans include truth, honesty, loyalty, love, peace, etc. because they bring out the fundamental goodness of human beings and society at large.
- Importance of Human Values Provides: -understanding of the attitudes, motivation and behaviors. Influences our perception of the world around us. Represents interpretation of "right and wrong". Provides a way to understand humans and organization.
- The five human values which are expected in all human beings, irrespective of whether they are employees or not in whichever profession or service, are: Right Conduct – Contains values like self-help skills (modesty, self-reliance, hygiene etc.), social skills (good behavior, good manners, environment awareness etc.), ethical skills (courage, efficiency, initiative, punctuality etc.) and Ownership. Peace – Contains values like equality, focus, humility, optimism, patience, self-confidence, self-control, self-esteem etc. Truth – Contains values like accuracy, fairness, honesty, justice, quest for knowledge, determination etc. Peaceful co-existence – Contains values like psychological (benevolence, compassion, consideration, morality, forgiveness etc.) and social (brotherhood, equality, perseverance, respect for others, environmental awareness etc.) Discipline – Contains values like regulation, direction, order etc.

**Brief report of programme (in 250 -300 words)**

The Department of History had organized a trip down memory lane for their History students by taking them on a Study Tour to Chhatrapati Shivaji Maharaj Vastu Sangrahalaya on 17th February 2023.

As Museology is a part of the TYBA curriculum, the trip to the museum was a great learning experience as the students were shown first hand conservation and preservation techniques. Around 120 students attended this study tour along with 8 faculty members.

The CSMVS is a National History Museum which houses artifacts right from the Indus Valley Civilization to the British Era. The Museum also has a Natural History Gallery which has excellent

**Brief report of programme (in 250 -300 words)**

Program started sharp at 10:15 am with the welcome speech and introduction of Women Development Cell by Dr. Dipali Chaudhari & initiated with Saraswati Poojan by Convener of the Program Mrs. Praktana Kore, V.P. Dr. Prajakta Paranjape and Principal Dr. V.S. Adigal. After that V.P. Dr. Prajakta Paranjape gave her best wishes for the program and also wish all the participants on the occasion of Women’s Day Celebration. Brief introduction of Resource Person-Principal Dr. V.S. Adigal was given by Ms. Manisha Bhosale. After introductory session Principal took the charge of program and wish all participants with warm wishes on the occasion of Women’s Day.in his talk he covered following topics at length-

- Importance of UGC Approval and the required eligibility
- Importance of Orientation program for Faculty, Refresher Coerces, FDP, Short term courses, and PhD.
- Importance Paper Presentation and Publication
- Stages of Promotion

The information on above mentioned topic would definitely helpful for faculties to plan their Career Path.

All Committee Members shouldered the given responsibility enthusiastically. At the end Mr. Komal Patil delivered the Vote of Thanks to Trustees and Management, all participants, Dignitaries on dais, Organizing Committee and Volunteers for their efforts which made program successful and interesting. Program wind-up on 11:45am.

**Brief report of programme (in 150 -200 words)**

It was a 2 day-1 night Excursion for FY, SY and TY students from the Department of Botany, Biotech and Biochem where students have 2 Industrial Visits.

On the first day, i.e. 15/02/2023, First we visited Sahyadri Farms which was located in Mohadi, Nashik. There Ms. Archana Patil and her team gave all the product information to students along with that they also provided a small tour in their manufacturing units. It is India's largest integrated platform for fruits and vegetables.

They have shown that the industry has a large association with farmers of different states of Maharashtra. The industry has occupied more than 30,000 acres of land, where they not only manufacture the different organic products but also they organically cultivate different varieties of fruits and vegetables.

On Second day, i.e. 16/02/2023, we visited another industry, The Grover's Zampa Vineyards. There Mr. Sushant Soni had explained the entire process of grape cultivation and selection for wine preparation. He also gave a nice tour of the entire vineyard along with their testing labs. He had also shown the farms and explained about the varieties of grapes, selection criteria, cleaning and segregation process. Also shown the traditional and modern methods of wine production, their manufacturing and storage areas.

He also provided the correct knowledge about the purchasing of wine according to its aging period to students.

### Introduction:

Herbarium, collection of dried plant specimens mounted on sheets of paper. The plants are usually collected in situ (e.g., where they were growing in nature), identified by experts, pressed, and then carefully mounted to archival paper in such a way that all major morphological characteristics are visible (i.e., both sides of the leaves and the floral structures). The mounted plants are labelled with their proper scientific names, the name of the collector, and, usually, information about where they were collected and how they grew and general observations. The specimens are commonly filed in cases according to families and genera and are available for ready reference.

Herbarium collections are often housed in botanical gardens, arboretums, natural history museums, and universities. The largest herbaria, many of which are in Europe, contain several million specimens, some of which date back hundreds of years. Herbaria are the “dictionaries” of the plant kingdom and provide comparative material that is indispensable for studies in plant taxonomy and systematics. Given that nearly every plant species has a dried “type specimen” on which its description and Latin name are based, taxonomic disputes are commonly resolved by referencing type specimens in herbaria. The collections are also essential to the proper naming of unknown plants and to the identification of new species.

**Blatter Herbarium:** The Blatter Herbarium is an internationally recognized herbarium for Taxonomic studies and allied branches in Botany. It was established in 1906 in St. Xavier's College, Bombay, by the Jesuit Priest - Rev. Fr. E. Blatter. In 1941, it was renamed, "The Blatter Herbarium" by Rev. Fr. H. Santapau, who served as its director for many years. Fr. Santapau later became the Director of the Botanical Survey of India at Calcutta. He was awarded the 'Padmashri' by the Government of India and the 'Birbal Sahani Medal' by the Indian Botanical Society in 1964 for his services to Indian botany. BLAT is listed in the Index Herbariorum published from KEW - Royal Botanic Gardens.

- The students were taken in two different batches on two different days to the two known herbaria's in Mumbai namely, Blatter herbarium and R. D. National College Herbarium

#### **Minutes of the visit:**

- **At Blatter herbarium** the students were guided by **Mr. Praveen Kale, Assistant curator**. He explained the history and importance of Blatter herbarium
- the students were first taken to the library of Blatter herbarium and were shown old literatures of India like the **Hortus Malabaricus by Van Rheedee (1600), Linnaeus Species Plantarum (1753), Fl. Maharashtra by M.R. Almeida (2000's)**. They were explained the importance of Botanical illustrations in plant taxonomy through Van Rheedee's illustrations and also how to interpret taxonomic data through Linnaeus Species Plantarum.
- Students were exposed to the variety of taxonomic literature which dates back to the 17<sup>th</sup> Century, floras, journals, field books etc.
- They were then taken into the Herbarium section, where the importance of herbarium sheet was made known. they were briefed about how to make an herbarium sheet and what are the criteria's required to make a sheet. Various algal, pteridophytes and angiosperm specimens were shown along with Type specimens
- Students then seen the collection of Blatter herbarium which included, plant-based products, lichens, double coconut, Entada Fruit lomentum, various wood types, etc.
- Finally, there was a good interaction, as the students posed their questions regarding herbarium and their doubts.

- The sessions ended by the students paying their feedback on the book of Blatter herbarium.

**TYBZ students learning about Herbarium library and literature**

**TYBZ students observing specimens of wet & Dry preservation and plant based products**

**At the corridor of Blatter Herbarium, students were shown the founder of Blatter Herbarium Fr. Santapau**

**Ms. Zeba (TY botany) interacting with Mr. Praveen Kale, Assistant Curator**

### **RDNCP Herbarium:**

The Herbarium was inaugurated By Dr. K. N. Gandhi, Senior Nomenclatural Registrar Harvard, University. The Herbarium was single handedly initiated by Dr. Suchandra Dutta in which the concept of Undergraduate research is very vastly promoted. The Herbarium has discovered a few new species and varieties, conducted nomenclatural corrections for various plant taxa's and many more taxonomic researches. It consists of Type specimens, and specimens from throughout India. with special collections from North India (including certain parts of the Himalayan ranges) and Maharashtra. Special emphasis is given to plant-based products and a good collection is instilled at the herbarium. The Herbarium also takes in projects and conducts courses on Herbarium. The Herbaria is recognised internationally by organisations like tropicos.org, ipni.org and has got permission for digitalization of the specimens.

### **Minutes of the visit.**

- In the afternoon the students assembled at **R. D. National College**. Here the students were guided by **Dr. Suchandra Dutta Assist. Prof. Dept. of Botany**, who gave emphasis on how to develop an Herbarium.
- The students were given pointer on how to makes their own herbarium for the college, as RDNCP is a developing herbarium, it was the best place to visit to enhance the students interest in making an herbarium

- Here they were made aware on the importance of making an herbarium for the college, and how every student can help in some way or the other to contribute to the development of the Herbarium
- They were also shown how to apply basic knowledge to interpret taxonomic problems with an example of *Hibiscus lilliflorus*
- The students were then shown the Isotype of *Hibiscus hirtus L. var. inarticulatus S. Dutta, H. Rodrigues et. K. Chakral.*, deposited at RDNCP, and were told about the weightage and importance of Type specimens at an Herbaria.
- They were also explained how simple basic knowledge of Graduation in Botany can help discover new species.
- Our college also **deposited about 40 herbarium specimens of SY 2018-19** batch to create ties and increase interdepartmental connections for future Taxonomic studies for the students.

TY Botany students were given insight on how to develop an Herbarium by Dr. Suchandra Dutta

TY Botany Students were shown The importance of critical taxonomic characters and the Type specimen

**TYBZ students were made aware about the allied themes to an Herbarium**      **TYBZ student were shown Isotype specimen**

**Activity conducted w.r.t. syllabus – Edible plants in relation to Plant Taxonomy:**

This activity has been implemented to make the students aware of the plant families of which the students of third year study as part of their curriculum. An innovative way to give the students insight into the importance of plant names and their parts used along with uses. It makes a connection of studies and food we consume in our everyday life. This activity keeps the students updated with botanical names of the plants they studied, and is a unique aid to memorise the same.

The activity is conducted weekly on Saturdays. The students are given a Theme of any plant family a few days prior, and are advised to bring dishes made from the members of the said family. On the activity day the students along with the teacher open up their lunch boxes together and study the plants brought, by explaining their scientific name, common name, part used and uses, which makes them aware of the plants they are consuming. The studied plants are then documented by the students photographically and also, they also bring forth the information through WhatsApp group.

**Introduction:** A field trip was conducted specially for the students of Third year Botany and Botany-Zoology to understand the importance of wild vegetables for consumption and its health benefits. Considering the present-day situation in which the world resorts to fast food because of its ever increasing craze and taste, which leads to various illnesses and disorders like obesity, fatigue, improper bowel movements, intestinal problems and many more to add. As botany students we need to know the plants around us and their uses, in Viva college we make sure to consider this as a prime responsibility to bring this to the students' knowledge which will in turn make them keener and more interested in botany and plant taxonomy.

The field visit was conducted to a nearby accessible place to all students i.e. Virar station west market. This market is visited by almost all the people resident in Virar and surrounding areas. The beauty of this market is that the main non-conventional vegetables come early at the break of dawn when the vendors assemble at that very spot no sooner than 5-6am in the morning and the market gets almost empty of their vegetables by the end of the hour itself. The vendors bring vegetables collected from cultivated areas and from wild areas of Virar - Palghar region. Boarding the very first train, these vendors arrive to make their income for the day by 5am. The vegetables brought here are fresh and unpolluted by chemical treatment which make them healthier than the ones purchased from super markets and big bazaars. With a little bit of bargaining skills one can get vegetables at prices appealing to one's fancies.

The students were taught about the taxonomical aspect of the plants sold in the market ranging from its characters to botanical names, families and nomenclatural dilemmas. They were also made aware about the use of the vegetables and the importance of consuming wild monsoon vegetables during this season. The vendors were also questioned for the recipes of

preparation. Furthermore, the students and the accompanying professors ended up purchasing quite a number of non-conventional wild vegetables for their home table.

## Short excursion – Kanheri caves (2019-20)

<b>Date</b>	<b>During monsoon</b>
<b>Venue</b>	<b>Kanheri caves, SGNP, Borivili (E)</b>
<b>Target students</b>	<b>SYBSc BZ &amp; SYBSc CB, TYBSc Botany &amp; TYBSc BZ</b>
<b>Professor as field guide</b>	<b>Mr. Hensal Rodrigues, Mr. Kiran Chakral</b>

### Introduction to Kanheri caves:

The Sanjay Gandhi National Park (SGNP) is situated between 72° 53' to 72° 58' East longitude and 19° 88' to 19° 21' North latitude and lies within the city limits of Mumbai. The total area of the National Park is currently 103.09 km<sup>2</sup>. Sanjay Gandhi National Park (SGNP) which consists mainly of basic lava flows. Basic lava flows consist of basalt and are called basic since they contain less than 45 percent of free silica. This type of geology gives the park's terrain an undulating topography of hills, valleys, lakes and open areas. The undulating scenery forms ideal catchments for the Powai, Vihar and Tulsi lakes. The Bassein (Vasai) Creek divides SGNP into the northern (Nagla) and southern blocks.

The word Kanheri comes from the Sanskrit word Krishnagiri which means 'Black Mountain'. They are maintained by the Archeological Survey of India. These caves are a major point of interest in the park as they are Buddhist Caves that date back from the 1st Century BC to the 9th Century AD. There are around 109 caves that have been discovered so far and they are all made out of volcanic rock

### Minutes of the Excursion:

- The students assembled at the Gate of Kanheri caves on the 10<sup>th</sup> of August 2018 at 8:30am and were taken up to kanheri caves.
- The place was introduced to the students as a historical Buddhist cave governed by the archeological survey of India and the Forest department of Sanjay Gandhi National Park.
- Then the crowd was split into two groups, each group headed by a field guide and two teachers accompanying them, and set off to two different locations on the kanheri plateaus.
- Amidst the rain the students were made aware about the flora and fauna, along with plant animal interactions at kanheri caves, importance was given to endemic plants, type localities, forest types, evolution, and various types of habits. The students were also given a brief history of how the caves we formed and how it supports various endemic life forms due to its lateritic plateau and seasonal water pools and falls.
- Surveying throughout the forest of kanheri caves the students documented the plants explained by the field guides and were also given live examples to the plant families incorporated in their syllabus making study of plants little more interesting.
- The Field study ended in the afternoon around 2pm. The students departed with good memories and ample knowledge.

## Long Excursion – Pachmari\_Kanha excursion (2019-20)

<b>On field dates</b>	<b>20<sup>th</sup> -23<sup>rd</sup> February 2019</b>
<b>Venue</b>	<b>Pachmari, Kanha</b>
<b>Target students</b>	<b>TYBSc Botany, TYBSc BZ &amp; TYBSc Zoology</b>
<b>Professor as field guide</b>	<b>Mr. Hensal Rodrigues (for botanical knowledge)</b>
<b>Accompanied professors</b>	<b>Mr. Johnson Varkey, Ms. Sonal Salvi, Ms. Pradnya Salvankar</b>

### Minutes of the Trip:

- *Drosera burmannii*, *Utricularia* sp., were the highlights of the trip. These are insectivorous plants growing in Nitrogen deficient environments, as compared to other regions this sanctuary had a dense population of *Drosera burmannii* flourishing on and above the rocks. alongside these a rather common yet vivid insectivorous plant also was sited, *Drosera indica*.
- Plants were sold at the Temple including *Crinum* bulbs, *Amorphophallus* corm, *Pinus* female cone, at different prices and are used medicinally for various purposes. People from the entire area come to worship this temple and
- Horticulture aspects were explained including, Hedge, edge, lawn, Focal Point through live explanation at the garden (Observe image - Garden Landscape).
- Another important noticeable was the flowering of Bamboo which is very rare to observe. Students were privileged to observe it in mass flowering enroute Kanha safari.
- A Good quantity of Bryophytes were observed, with reproductive structures like gemma cups which was news to the students as, learning its was a live experience of learning such aspects which were only taught in class syllabus

- More than 100 plant species were documented throughout the journey.

## Short excursion - Gorai & VIVA college wetland

<b>On field dates</b>	<b>October 2019</b>
<b>Venue</b>	<b>Gorai Khadi, VIVA wetland</b>
<b>Target students</b>	<b>TYBSc Botany &amp; TYBSc BZ</b>
<b>Accompanied professors</b>	<b>Mr. Johnson Varkey, Mr. Kiran Chakral</b>

### Minutes of the excursion

Gorai is a place known for its eastern Indian community and the mangroves it upholds. the students of TY batch 2019-20 were taken to this place to make aware about the importance of mangrove forest and how it holds a vast diversity of ecosystems intact along with keeping our lands safe from floods.

The students were made acquainted with many true mangrove plants and how they have adapted to saline habitat with modifications in certain characteristics. Mangrove associates and invaders were also studied during this visit. plants related to families of Angiosperm syllabus were explained on field to give the students a live experience of these families and their habitats.

Students were also shown Gorai as the type locality of two plants which were recently described namely, *Cistanche tubulosa* subsp. *palustris* S. Dutta, H. Rodrigues & K. Chakral, and *Avicennia marina* var. *acutissima* f. *pumila* S. Dutta, K. Chakral, & H. Rodrigues. The importance of Type locality in botany and taxonomy were explained to the students.

VIVA college has a beautiful wetland behind it, wetlands hold the excess of water which floods the mainland during monsoon and this becomes important to know about. Hence the students of TY were taken to the wetland to make them aware of the wetland for our

community and how the plants growing in such wetlands are important to keep the wetland alive.

A walk around the periphery of the wetland was conducted and students were shown many wetland dwellers which inhabit these areas. Students were exposed to various aspects of plant morphology with examples from the wetland flora.

about 40 species of plants were studied during this visit

## Herbarium making & College Herbarium establishment – VIVA college Herbarium (2019-20)

On field dates	2019
Venue	VIVA college
Target students	TYBSc Botany & TYBSc BZ, SYBZ, SYCB

As part of the curriculum students of SY have herbarium making, dept. of Botany has taken a leap ahead to instil in students the importance of Plant taxonomy by making them stitch herbarium sheets on their own.

Students were told to collect a plant from their respective locality and were explained the entire protocol of plant collection to pressing along with importance of herbarium and type specimens

students were also excited in up taking such practical based learning of herbarium and enthusiastically stitched their herbarium and submitted them.

Furthermore, we have started to establish a Departmental herbarium for the benefit of students and the people in and around Vasai - Virar who deal with plant studies and research and who have to go long distances to get their plants identified. On complete establishment of this herbaria the college and the students will benefit a lot.

currently under process we have about 300 prepared specimens and about 600 unstitched collected specimens from various areas namely from various parts of Maharashtra, specifically Mumbai Vasai - Virar, and also specimens from Himalayas

The herbarium holds two Isotypes of *Cistanche tubulosa* subsp. *palustris* S. Dutta, H. Rodrigues & K. Chakral, and *Avicennia marina* var. *acutissima* f. *pumila* S. Dutta, K. Chakral, & H. Rodrigues. which has been accepted internationally (ipni.org) which gives gravity to the taxonomic research conducted here.

Furthermore, the herbarium has also been mentioned on an international scale under the website ipni.org organised and maintained by the Harward university herbaria.

<b>Brief report of programme (in 250 -300 words)</b>		<p>Gorai is a place known for its eastern Indian community and the mangroves it upholds. The students of TY batch 2019-20 were taken to this place to make aware about the importance of mangrove forest and how it holds a vast diversity of ecosystems</p>		

	<p>intact along with keeping our lands safe from floods.</p> <p>The students were made acquainted with many true mangrove plants and how they have adapted to saline habitat with modifications in certain characteristics. Mangrove associates and invaders were also studied during this visit. plants related to families of Angiosperm syllabus were explained on field to give the students a live experience of these families and their habitats.</p> <p>Students were also shown Gorai as the type locality of two plants which were recently described namely, <i>Cistanche tubulosa</i> subsp. <i>palustris</i> S. Dutta, H. Rodrigues &amp; K. Chakral, and <i>Avicennia marina</i> var. <i>acutissima</i> f. <i>pumila</i> S. Dutta, K. Chakral, &amp; H. Rodrigues. The importance of Type locality in botany and taxonomy were explained to the students.</p> <p>VIVA college has a beautiful wetland behind it, wetlands hold the excess of water which floods the mainland during monsoon and this becomes important to know about. Hence the students of TY were taken to the wetland to make them aware of the wetland for our community and how the plants growing in such wetlands are important to keep the wetland alive.</p> <p>A walk around the periphery of the wetland was conducted and students were shown man wetland dwellers which inhabit these areas. students were exposed to various aspects of plant morphology with examples from the wetland flora.</p> <p>about 40 species of plants were studied during this visit</p>

### **Introduction to Kanheri caves:**

The Sanjay Gandhi National Park (SGNP) is situated between 72° 53' to 72° 58' East longitude and 19° 88' to 19° 21' North latitude and lies within the city limits of Mumbai. The total area of the National Park is currently 103.09 km<sup>2</sup>. Sanjay Gandhi National Park (SGNP) which consists mainly of basic lava flows. Basic lava flows consist of basalt and are called basic since they contain less than 45 percent of free silica. This type of geology gives the park's terrain an undulating topography of hills, valleys, lakes and open areas. The undulating scenery forms ideal catchments for the Powai, Vihar and Tulsi lakes. The Bassein (Vasai) Creek divides SGNP into the northern (Nagla) and southern blocks.

The word Kanheri comes from the Sanskrit word Krishnagiri which means 'Black Mountain'. They are maintained by the Archeological Survey of India. These caves are a major point of interest in the park as they are Buddhist Caves that date back from the 1st Century BC to the 9th Century AD. There are around 109 caves that have been discovered so far and they are all made out of volcanic rock

### **Minutes of the Excursion:**

- The students assembled at the Gate of Kanheri caves on the 10<sup>th</sup> of August 2018 at 8:30am and were taken up to Kanheri caves.
- The place was introduced to the students as a historical Buddhist caves governed by the archeological survey of India and the Forest department of Sanjay Gandhi National Park.
- Then the crowd was split into two groups, each group headed by a field guide and two teachers accompanying them, and set off to two different locations on the Kanheri plateaus.
- Amidst the rain the students were made aware about the flora and fauna, along with plant animal interactions at Kanheri caves, importance was given to endemic plants, type localities, forest types, evolution, and various types of habits. The students were also been given a brief history of how the caves were formed and how it supports

various endemic life forms due to its lateritic plateau and seasonal water pools and falls.

- surveying throughout the forest of Kanheri caves the students documented the plants explained by the field guides and were also given live examples to the plant families incorporated in their syllabus making study of plants little more interesting.
- The Field study ended in the afternoon around 2pm. The students departed with good memories and ample of knowledge.

**Brief report**

In the academic year 2022-23 Department of Botany and VIVA College Herbarium (VCH) introduced certificate courses for the students in addition to the curriculum. The course was successfully completed in the month of April. Duration of the course was 30 hours. Curriculum was set and delivered by the in-house faculty and an external resource person (Rupali Deshmukh). Mode of the delivery of the course was offline in the Old VIVA College laboratory. On the completion of the course evaluation test was conducted and certificate was issued.

## Memorandum of Understanding Between

### GreenLine (Party 1)

Concerning environmental activities with the students of

Vishnu Waman Thakur Charitable Trust's, Bhaskar Waman Thakur College of Science,  
Yashvant, Keshav Patil College of Commerce, Vidhya Dayanand Patil College of Arts,  
(VIVA College) (Party 2)

#### Description of organization

GreenLine is an environmental organization that works with citizens to help create awareness about environmental issues that affect our city and empower them to take proactive measures towards a healthier environment through our three Programmes:

1. Green Schools Campaign
2. Green Lead Volunteers
3. Green Lifestyle Initiative

The age of the target audience for each campaign differs.

#### • Background

Through the Green Lead Volunteer Programme, Party 1 aims at working with motivated youth, training them to take up environmental leadership roles and providing them with field experience. Through activities like conducting surveys, awareness activities and clean-up drives we'd like to foster a sense of ownership that is taken up by college students of Party 2

#### Details

Party1 will be providing a structured framework for environmental activities which would be surveys, awareness-based activities as well as guidance and skill development workshops and volunteering opportunities which the students of Party 2 can take part in. Students will be asked to prepare reports of their work. GreenLine will be providing the students with a certificate of Completion on successfully completing the tasks.

#### • Outcome

The outcome of this partnership which is effective from 15th January 2022 to 31st March 2022 is to provide the youth with opportunities to learn and gain experience in the field of environment which will help shaping them into future environmental leaders while taking part in various environmental activities with quantifiable outcomes.

<p><b>Brief report of programme (in 250 -300 words)</b></p>	<p>The "Trees of Mumbai" project was an engaging and educational initiative organized by Greenline, aimed at encouraging students to actively participate in documenting the diverse tree species found in Mumbai. The primary objectives of the program were to raise awareness and document the various tree species present in Mumbai. Also to compile data for the creation of a comprehensive data on "Trees of Mumbai."</p> <p>Training Session: Mr. Kayden Anthony organized an online training session to equip students with the necessary knowledge and skills for documenting trees effectively. The session provided students with the knowledge on how to use the Google Form for data collection and fundamental understanding of tree identification and documentation procedures.</p> <p>Student Participation: Over the course of one month following the training session, students actively engaged in documenting trees in their respective localities. Each student was provided with a Google Form specifically designed for tree data collection. The form included fields for recording tree species, location (including GPS coordinates) and any notable characteristics of the tree.</p> <p>Results: The student-led documentation efforts yielded valuable data on a multitude of tree species across Mumbai. This data will be instrumental in the creation of the data on "Trees of Mumbai"</p> <p>Conclusion: The "Trees of Mumbai" documentation program, spearheaded by Greenline, successfully engaged students in a meaningful and educational project. It not only raised awareness about the importance of trees in urban environments but also empowered students to actively contribute to the documentation of Mumbai's rich tree biodiversity. The collected data will serve as a valuable resource for years to come, benefiting both the local community and environmental enthusiasts.</p>

**Brief report**

Orientation program was conducted for the students to make them aware about the activities the Nature club had conducted in the past and to introduce and discuss with the students about the future prospects that can be undertaken in the current academic year

The orientation began with veneration of the holy tulsi plant as Nature's representative followed by Nature club teachers' introduction and enlightening of the students about the past activities of Nature Club

An open and lucid discussion was taken with students and teachers alike and points we noted for the future activities of the academic year

The orientation ended on a positive note.

### Brief report

On the occasion of world wildlife week, Nature club directed its awareness campaign on social networking site: *Instagram*. Seven days featured different habitats of wildlife their importance and relevance via small reels. These reels were shared across various *WhatsApp* groups of the institutes departments and was also featured in the college official *Instagram* page (@vivacollegeofficial)

## Day 01

## Day 02

### **Brief report**

To appreciate and create awareness of the natural world around us Nature club in association with VIVA College Herbarium and Department of Botany organized Nature Trail and with the guest speaker as one of the students of MSc. Environmental science, Mr. Vaibhav Haldipur. The event was split into two days. On the first Day Mr. Vaibhav Delivered a talk on how to take a nature trail with an interactive session supported by interesting Q and A session. The second day was a nature trail which was taken by Mr. Vaibhav at the wetland present behind the new VIVA college. He delivered knowledge about how to identify birds, reptiles, butterflies and some plants. The entire event was a success by the positive feedback obtained by the students on the field.

## Brief report

A Talk on relevance and importance of tree phenology in climate change and other aspects. The guest speaker Ms. Sayee Girdhari enlightened the crowd with the use of an app “SeasonWatch” which can be used by anyone to track and record the phenology of any plant around them. This data can serve as consolidated information about the regions season and climate change pattern. The participants were really engrossed in this app, many students also started logging in data about the plants around them.
