UNIVERSITYOFMUMBAI

Revised Syllabus for Sem V and Sem VI

Program: B. A.

Course: History and Archaeology

(Choice Based Credit System with effect from the Academic year 2018-2019)

Revised Syallbus

Semester V and Semester VI
Programme: B.A.
Course: History and Archaeology

(Choice Based Credit System with effect from the Academic year 2018-2019)

As per University rules and guidelines for Faculty of Humanaities

Faculty of Humanities

TYBA
(Choice Based Credit System, CBCS)
Semester V and Semester VI
Guidelines
With Effect From 2018-2019

Syllabus Structure:

1. In TYBA (CBCS) in Sem V and Sem VI, the Core Courses will be Core Courses IV, V, VII and VIII.
2. The Elective Courses will be Elective Courses VI and IX which will be partially Project Based Courses. The Boards of Studies may offer choices in the Elective Courses VI and IX.
3. In Sem V and Sem VI, each Course namely Core Courses IV, V, VII and VIII and Elective Courses VI and IX will carry 4 Credits per Course per Semester.

Evaluation:

1. **Core Courses**: The Core Courses IV, V, VII and VIII will be theory based Core Courses. The University of Mumbai will conduct the Sem V and Sem VI examinations of 100 marks per Core Course. In Sem V and Sem VI for all the above Core Courses, the student will have to secure a minimum of 40% marks in aggregate per Core Course.
2. **Elective Courses**: The Elective Courses VI and IX will be Electives and Choices of Electives may be offered by the various Board of Studies. The University of Mumbai will conduct the Sem V and Sem VI examination for Elective Courses VI and IX of 80 marks per Elective Course. The Elective Courses namely Elective Courses VI and IX will be partially Project Based Courses. In Sem V and VI, for Elective Course VI and for Elective Course IX, the Colleges will conduct the evaluation of a Project of 20 marks

each and will send the marks to the University of Mumbai as per University of Mumbai guidelines.

3. The total marks of the Elective Course VI and Elective Course IX will be 100 marks each that is 80 marks for Theory Examination conducted by University of Mumbai and 20 marks for Project evaluated by the concerned college Faculty in the subject.
4. In Sem V and Sem VI, the student will have to submit a Project for Elective Course VI and Elective Course IX in the College before appearing for the University Examination. The last date of submission of the Project will be officially declared by the College.
5. In Sem V and Sem VI, the Project topic will be based on the Syllabus of the respective Elective Courses that is Elective Course VI and Elective Course IX. The students will be given the choice of choosing the topic of the project in consultation with the Faculty Member teaching the respective Elective Course. The list of students along with the topics chosen by the students will be displayed by the College in the beginning of the Semester.
6. The Project work will be carried out by the student with the guidance of the concerned Faculty Member who will be allotted to the student as the Guide for the Project.
7. In Sem V and Sem VI, for Elective Courses VI and IX, the student will have to secure a minimum of 40% marks in aggregate and a minimum of 40% in each component of assessment i.e. 08 out of 20 marks in Internal Evaluation of Project in Elective Course VI and Elective Course IX and 32 out of 80 marks in University Examination of Elective Course VI and Elective Course IX.

   Note: All other rules regarding Standard of Passing, ATKT, etc., will be as per those decided by the Faculty of Humanities passed by the Academic Council from time to time.

SEMESTER -V

Elective Course: Paper VI B –Media and Communication

Objectives:

1. To inform students about the Fundamentals of Communication.
2. To introduce students to Oral Traditions in Communication and the field of Journalism.
3. To familiarize students with the various types of Audio-Visual Media.

Module I: Fundamentals of Communication

(a) Definition, Evolution and Significance of Communication
(b) Process, Types, Importance and Need of Communication
(c) Barriers to Communication

Module II: **Oral Traditions in Communication**

(a) Folk Theatre – Importance, Marathi Theatre
(b) Major Dance Forms – Folk and Classical
(c) Folk Expression – Songs, Stories and Puppetry

Module III: Journalism

(a) Definition, Evolution and Types of Journalism
(b) Role and Functions of Reporters, Sub-Editor and Editor
(c) Freedom of Press – Importance, Ethics and Current Trends

Module IV: Audio-Visual Media

(a) Photography – Types, Scope and Limitations
(b) Cinema – Growth, Development and Technical Aspects
(c) Types of Films and Global Indian Cinema

T.Y.B.A. History

SEMESTER -V

Elective Course IX A - Research Methodology and Sources of History

Objectives:

1. To teach students basics of research methodology in history with a view to promote historical research.
2. To understand the various kinds of sources of history and its interpretation.
3. To acquaint students with the new trends and approaches in history writing.

Module I: History: Definition and Scope

(a) History: Meaning, Scope and Nature
(b) Importance of History
(c) History and Auxiliary Sciences

Module II: Sources of History

(a) Sources: Nature and Types
(b) Authenticity and Credibility of Sources
(c) Importance of Archival Sources

Module III: Research Methods in History

(a) Methods of Data Collection
(b) Interpretation and Generalisation of Sources
(c) Footnotes and Bibliography

Module IV: Sources for Writing Indian History

(a) Sources for Ancient Indian History
(b) Sources for Medieval Indian and Maratha History
(c) Sources for Modern and Contemporary Indian History

3.2 BhimraoRamjiAmbedkar (1891 – 1956)

Module 4 : Socialism **11**

4.1 Jawaharlal Nehru (1889 – 1964)
4.2 RammanoharLohia (1910 – 1967)

Rationale

TYBA Politics Paper V titled Political Thought is a compulsory paper consisting of Part I and II. The paper introduces students of politics to the political philosophy and ideas expounded by thinkers in their historical setting. The revised syllabus is a blend of Western and Indian political thought.

The syllabus for Semester V consists of four modules and focuses on Western Political Thought. New themes incorporated in Module III & IV to introduce the students to the writings on hegemony, feminism and multiculturalism. Module III includes the new theme viz. 'Theory of Hegemony' of Antonio Gramsci whereas Module IV covers feminist thought of Simone-de-Beauvoir and multiculturalism of Will Kymlicka . Antonio Gramsci rejected the crudest form of Marxist materialism. He stated that rule of one class over another was not just due to coercive state apparatus. It depended on hegemony. He stressed that the ruling party of a society uses cultural leadership and domination to establish their legitimacy. Simone-de-Beauvoir was a revolutionary feminist thinker of her times. She rejected the traditional role of a woman. She argued that femininity and domesticity are not natural and act as artificial barriers to prevent full expression of woman's personality. Modern political thinker Will Kymlicka insists that group-specific rights are consistent with liberalism and are particularly appropriate, if not outright demanded, in certain situations. He defines three such group-specific rights: special group representation rights, self-government rights, and polyethnic rights. It is believed that the new themes will help the students explore post Marxist thought and also provide glimpses of contemporary thought.

The syllabus for Semester VI consists of four modules and provides insight into Indian political thought. The Indian Political Thought has been dominated by a galaxy of renowned thinkers. The new themes included in Semester VI are 'Ideas on State' by MahadevGovindRanade [Module I], 'Nationalism' enunciated by Rabindranath Tagore and VinayakDamodarSavarkar [Module II], 'Rational Reform' of Agarkar [Module III], Democratic Socialism of Pandit Nehru and 'Socialism' of RammanoharLohia [Module IV]. MahadevGovindRanade held an organic conception of society and pleaded for social, economic, political and educational reform. He emphasized reorganization of rural credit, indigenous teachers, a school in every village, state support for higher education ,permanent settlement of land, reorganization of rural credit, new constitution for Bombay Legislative Council, raising the age of marriage, abolition of enforced widowhood and women's education. His phenomenal contribution to the PrarthanaSamajmoulded public opinion and awakened the body politic of Maharashtra that had gone in deep slumber. Tagore's doctrine of universal humanity was to spread spiritual values among people and create a new world culture out of multi-culturalism, diversity, and tolerance. He believed that the western concept of nation-state was coterminous with mechanical organisation of people in pursuit of material enhancement and hence aggressive and imperialist in character. The problem of the present age was whether different groups of people would go on fighting with one another or find true basis of reconciliation. Critical of the use of force he wanted man to discover his soul in the spiritual unity of human beings. India needed to discard evils of caste system, blind obedience to authority and tradition. He denounced the commercial civilization and made a fervent plea for freedom of mind. He opposed cultural nationalism and stressed that different cultures should be absorbed in constructive ways. Agarkarcriticised the prevalent method of social reform based on tradition, revivalism and social legislation. He advocated

the cause of reform based on enlightened reason. V.D Savarkar, one of the founders of the Hindu Mahasabha propounded the theory of Hindutva and advocated Hindu political and social unity. The ideology of Hindutva shaped the Hindu Nationalism in the 1920's and the term is widely employed today to describe various expressions of the Hindu nationalist movement. Pandit Nehru laid the foundation of nation-building by evolving a set of principles based on socialism, equality, freedom of the individual, secularism, scientific attitude towards life, industrialisation and piloting the much acclaimed Five Year Plans. RammanoharLohia's thought will acquaint the students with seven types of revolutions and his 'destroy caste' movement. His plea for social equality and preferential opportunity for backward classes, women, dalits, adivasis and backward amongst minorities is reflected in current political process. The new themes in Semester V and VI will provide an exposure to the rich treasure of both Western and Indian Political Thought.

4.3 Political Participation- Means and Levels	

Politics Paper VII (A): Political Sociology
Semester VI: Political Dynamism and Society

	No of Lectures
Module 1: Public Opinion	**12**
1.1 Concept	
1.2 Opinion Makers: a) Non-Political leaders b) Media	
1.3 Impact on Political Behavior	
Module 2: Institutional Impact	**10**
2.1 Political Parties	
2.2 Pressure groups	
Module 3: Social and Political Processes	**10**
3.1 Modernisation	
3.2 Development	
Module 4: Protest movements and change	**13**
4.1 Mainstream Liberal movements: Consumer and Anti-graft movements	
4.2 Social Movements: Old and New	

Rationale

In the revision of TYBA papers in Political Science, to be implemented from the Academic year 2013-14, Political Sociology (Paper VII of the earlier syllabus) is kept as it is. The Paper was introduced to make the students aware of society and political system. Political System is nothing else but a sub-system of the social system. By understanding the interactions between society and state, scientific political analysis is possible. State and Society are interrelated and interdependent. In fact, society is mirror of the Politics of the country. Both depend upon each other in every respect.

The paper covers theoretical concepts as well as the impact of society on Political system and vice versa. It would be useful for the students to have rational observation and logical approach towards society as well as the Political System. The syllabus is structured with a basic objective to make the students aware of the process of replacement of traditional values by modern values and the emerging conflicts between traditional institutions and their values with modern institutions and their values in the society.

Explanatory notes

Semester V
(Mainly focuses on basic concepts and approaches, social stratification)

Module 1: Understanding Political Sociology

Weberian, Marxian and Behavioral approaches may help the students understand the structural (Bureaucratic), economic and behavioral elements of the society over a Political System

Module 2 and 3: Basic Concepts and Stratification

These two modules are designed to acquaint students with different aspects and components of Society – traditional as well as modern. The social aspects of Power, Authority, Legitimacy and Hegemony, social strata like caste, Elite, class, and gender have a direct influence and impact, which determine political behavior and political culture of a society.

Module 4: Social and Political Dynamics

A study of various agents of Political Socialization help one to determine participation in the Political processes at different levels.

Semester VI

Module 1: Public Opinion

In a Democratic system, it is highly essential to know various political institutions and processes that create a long reaching impact on a society. In a dynamic social system of today, media plays a major role in forming public opinion of the people of a given society.

Module 2: Institutional Impact

In the last few decades, democracy is gaining strength across the world. Besides Elected Institutions of a state, Political Parties and Pressure Groups play a vital role in determining social and political currents of a state. Political Parties and Pressure groups effectively influence society as well as state.

Module 3: Social and Political Processes

The Modernization and development get inculcated in developing evolutionary transition from traditional to modern society. As modernization takes place within a society, change and development takes place in family and community also. Instead of being dominated by tradition, societies undergo the process of modernization and may lead to conflicts.

Module 4: Protest Movements and Change

This module deals with people's acceptance or non-acceptance of the modernization, modern trends, practices and values, that are manifested through various social movements. Old and New social movements aim at bringing change or aim at protesting against a new development.

4.2 Group of Eight (G- 8)

4.3 BRICS (**B**razil, **R**ussia, **I**ndia, **C**hina, **S**outh Africa)

Rationale

In the revision of TYBA Politics Papers to be implemented from 2013-2014 the paper on*International Politics* which was one of the options in paper VIII in the previous syllabus hasbeen shifted to paper VI as *International Relations*. Therefore a new paper- *International andRegional Organizations* is introduced as one of the options in Paper VIII. The other optionunder Paper VIII is *American Political System* which was an option in paper VII previously.

The paper *International and Regional Organizations* is introduced with a view to familiarising students with the recent activities of the UN and other organizations, particularly Inter Governmental Organizations (IGOs) that have acquired immense prominence in world politics vis-à-vis the forces of globalization in the past decade.

The United Nations appears to have reclaimed the ground which it had lost in the 1990s in the immediate aftermath of the cessation of the Cold War, disintegration of the Soviet Union and the emergence of unipolarity in world politics. Now its role in some of the recent conflicts, say, in the Arab World or partition of Sudan, among others, and its contribution to economic and social development with a view to strengthening human security through its various programmes has been widely acknowledged. Paper for Semester V will deal with the activities of the UN and international economic and financial organizations.

Regional and Transcontinental organizations and forums have grown not only in numbers but they have been also performing a wide range of functions from providing security to member states to increasing trade and commerce and cooperation among them. Paper for Semester VI will focus on some of the regional and also the transcontinental organizations spread across the world.

This Paper is also designed to help students preparing for civil services and other competitive examinations as these examinations include topics on international and regional organizations.

Explanatory notes

General

This paper, *International and Regional Organizations* will be taught at the information level. It aims at increasing students' familiarity with the functioning of the UN and regional organizations. Therefore questions set for examination will not expect critical and in-depth answers about the functioning of these organizations. The focus is more on the evolution, the expanding membership and the successes as well as the limitations of these organizations.

Study of this paper calls for familiarity with the world map for understanding locations of countries that are members of various organizations. Use of world atlas by students and world map by teachers in the classroom is therefore, desirable, especially in Semester VI.

Organizations covered in Paper VI- *International Relations*- ASEAN, EU, IMF, SAARC, WB, WTO - are not included in this paper to avoid repetition.

Semester V

Module 1

To be taught with reference to the issue of the place of state sovereignty in international politics and to the role of international organizations as transnational actors. A brief reference to the League of Nations would be adequate. No question need be asked on the League. Structure of the UN is to be taught briefly.

Module 2

To be taught with reference to the concept of National Security. Reference to Chapter VI and VII of the UN Charter is essential. Focus is expected to be on recent peacekeeping activities.

Module 3

To be taught in the context of Non-traditional Security. This module could be assigned for 10- mark assignment in Semester V

Semester VI

At the outset a brief introduction on the relationship between regionalism and Globalisation could be provided to stress the importance of regional organisations. The origin of various organizations is to be explained with a brief reference to the global/ regional situation prevalent at the time of their establishment. Attention could be drawn to the overlapping membership of the various regional organizations. Students may submit assignments on any organization of their choice from any module.

Recommended Reading

Module 4: Contemporary Issues **10**

4.1 Empowerment of women through political reservation

4.2 Issue of autonomy in Panchayati Raj institutions

Semester VI: Urban Local Government

No. of Lectures

Module 1: Democratic Decentralization 10

1.1 Meaning and Nature

1.2 Importance of Urban Local Government

1.3 74th Amendment and its Implementation

Module 2: Introduction to Urban Local Self Government 11

2.1 Municipal Council

2.2 Municipal Corporation

2.3 Cantonment Board

Module 3: Urban Development Schemes 12

3.1 Housing

3.2 Slum development and rehabilitation

3.3 Water and Sanitation

Module 4: Contemporary Issues 12

4.1 Migration and Urban Governance

4.2 Transportation

Rationale

The second optional paper for Paper VII, is Local Self Government with special reference to Maharashtra. This paper was optional paper in the earlier syllabus too. The new syllabus consists of some additions to the earlier syllabus.

This paper is mainly useful for students, wishing to appear in MPSC examinations, and also for other competitive examinations. The wide gap between rural and urban sectors, the growing urbanization have brought a number of problems and issues. Even in the present scenario of globalization, local self-institutions have their own significance.

Explanatory notes

Local self government is the management of local affairs, by the elected local people, to resolve local problems. In recent years, Local Self Government has played a vital role as an instrument of democratic self government. The Rural and Urban Local Self Governments have their own structures, functions, powers and issues. A reference of 73rd and 74th

Constitution Amendment Acts have led to decentralization of powers and a significant change is brought in the Local Self Governments. Rural Governance is based upon Panchayati Raj System – a three tier system with the ZillaParishad, Blocks and Village Council. Various Development Schemes and issues are embodied in the syllabus to know more about local governing as well as the new emerging problems. Urban Local Self Governments are broadly classified as Municipal Corporation and Municipal Population and also cantonment areas. The urban areas have distinct problems like infrastructure, housing, health , which are included in the syllabus.

3.3Electoral Surveys and Analysis

Module 4: Critique of Media in Elections **08**

4.1Objective Coverage and Paid News

4.2Accountability of Media

Rationale

Elections in India are considered to be the very backbone of Indian Democracy. Being a Parliamentary Republic, citizens of India are trusted with the responsibility to choose the head of the country as well as of the state. There are both General and State elections that are held in the country based on the Federal structure of the Indian Republic. The elections in India often transcend from being a mere political activity to a high publicized and often sensationalized national event, with clear cultural ramifications. The entire nation seems to suddenly come to life at the onset of the elections, particularly the General Elections. Even the Assembly elections, which determine the state government, are events of great significance. All state elections are closely observed throughout the nation. Often the results of the state elections are considered to be clear indications of the mood of the nation.

Elections are political events involving the behavior of politicians, ordinary people,media and pressure groups. Every election is a turning point in the history and it deserves full study to observe politicians, their party structure, their strategies, the influence of media and

involvement of voters. Elections are exciting, important and interesting. The biggest election in the world is India's Lok Sabha.

The election commission is the apex body that conducts the elections in India. Both the general and assembly elections in India are held in accordance with the clear rules laid down by the Election Commission of India. The Election Commission or the EC comprises high ranking Government officials and is formed under the guidelines of the Indian Constitution. The EC is a highly powerful body and is granted with a great degree of autonomous powers to successfully conduct the elections. Even the judiciary resists from intervening while the electoral process is on. The work of the Election Commission typically starts with the announcement of various important dates and deadlines related to the election, including the dates for voter registration, for filing of nominations, counting and results. Its activities continue throughout the time period, when the elections are conducted in the country.

The Political parties are commonly brought together by the EC to lay down the lines for the common conduct that is expected to be followed by all the relevant and participating parties. The code of conduct was brought about primarily to cut down on exorbitant amount spent on the elections in the previous versions of the Indian elections.

Presently, the Electronic Voting Machines or EVMs have replaced the traditional ballot boxes in most areas. This was done to counter the great degree of booth capturing and rigging that became a common feature of elections in certain parts of the country.

It is hoped that introduction of such a subject will not be of mere academic nature but it may generate employability for the students of the subject. This discipline of knowledge will be useful for the students. This specialization will help to have better jobs and career opportunities in media houses, market research companies, political parties and so on. Psephology as a subject and a career may help the students. That is how a knowledge society in 21st century should work.

Explanatory notes

Semester V

Module 1: Election Commission

Besides the composition and functions, the role of Election Commission is necessary to understand how free and fair elections are ensured by the Constitution and how it has been implemented in the actual practice by Election Commission. How Law, Order and Security is assured by the Election Commission through various arrangements.

Module 2: Electoral Process

Right to vote is the base of democratic system. This module covers details of all these. Electoral process takes a month by publishing electoral rolls. Generally, elections are conducted phase wise, from the date of announcement till the results are not out.

Module 3: History of General Elections

The mile stones in the history of General Elections, should be studied with its distinguishing features. 1951 - 1952, the First General Election was a new experiment. The 1977 Election was the defeat of the party led by Indira Gandhi, by a new coalition of all the major other parties, which protested against the imposition of controversial emergency from 1975-77. A similar coalition led by V.P.Singh, was swept to power in 1989. Since then, one party dominant politics gave way to coalition system, wherein no single party achieved a majority in the Parliament to form a government. Since then Coalition Governments have become a feature of Indian Democracy.

Module 4: Group and Electoral Participation

Women form a sizable percentage of population. However their participation is less at all the levels from voting till positioning at the top posts. The underrepresentation of women in elections is because of social and economic settings. A reservation for women in Policy is a significant measure in this regard.

The participation of Dalits and Tribals is not significant because of discrimination on the grounds of caste. Their political participation varies from state to state. The participation of Dalits and Tribals should increase for social equality and justice.

Political participation of minorities has been a foundational issue. They should have equal opportunity to participate freely and effectively in all aspects of governance. The effective participation in relation to the right to full and effective quality and meaningful engagement in national activities is necessary to make democracy meaningful.

Semester VI

Module 1: Election and Impact of Mass Media

It is the right of voters to full and accurate information. The media plays important and essential role to conduct elections in free and fair manner, by providing adequate information of parties, policies, candidates and about the election process itself. In the recent years, the term media has become more broad, encompassing the internet in its various forms and other new forms of electronic distribution of news. It is the media that determines the political agenda. Media should play a “watchdog” role, in this technological generation.

Module 2: Election Campaigning / Political Marketing

Election Campaigning can be termed as Political Marketing because election campaigning consists of all marketing concepts and techniques in all spheres of political activity including political parties, voter's behavior, local self governments, interests and pressure groups, media and so on. A study of Political Marketing helps students understand marketing activities in Politics and a holistic approach to understand the breadth and width of Politics. Political marketing describes certain political phenomena and as a Philosophy (Theory) pursues knowledge, understanding of exchanges and the process of enhancing values.

Election campaigning is a step by step process of planning, chalking out campaigning strategy, election manifesto, promises to be made to the voters, communication strategies,

support of opinion leaders, competing with the competitors and so on. The ultimate objective is to win the election.

Module 3: Psephology

Psephology in simple words can be defined as, "Computerized analysis of voting patterns", "a science of predicting voting patterns by conducting opinion polls and understanding the swings." Psephology is that branch of Political Science, which deals with the study of Statistical Analysis of Elections. Psephology has become a career opportunity, though a formal and institutional training is not yet given. Election Manifesto – Every Political party prepares election manifesto which is a strategy to win voter's mind by featuring prospective legislation after the election is over. Opinion Polls and Exit Polls – Opinion Poll is a survey of public opinion from a particular sample, consisting of a structured questionnaire and interviews. Some generalities come on the surface. Exit polls on the other hand, is a survey, held on the day of election with verbal communication with voters.

Electronic surveys and Analysis – With the advent of Science and Technology, methods and techniques of communication have changed effectively. From verbal to electronic telecommunication, communication, communication networks are established from grass root level to national levels. All the tools of communication can be widely used for surveys, systematics.

Module 4: Critique of Media in Elections

A Democratic Election with no freedom to media would be a contradiction in terms. However, in order to ensure that along with freedom, a degree of regulation is required. Government and Election Commissions regulations and other different models for regulations are necessary. Though media has a right to report freely and to scrutinize the whole election process, the scrutiny itself is additional safeguard. In this regard, electoral management body has a crucial role to play. Law or Regulations on Media during elections are necessary. The Media should be accountable to the Government and to the masses at large.

Semester V: -List of Projects

A field visit can be conducted in either Semester with a report on it

1. Role and Functions of Election Commission of India
2. Maintenance of law, order and security during the electoral process
3. Review the Representation of People Act, 1951 & others
4. Electoral Reforms by Election Commission / Citizens / NGOs / Parliamentary Reforms
5. Review of General Elections of 1952 / 1977 / 1989 / 1994 / 1999 / 2004 / 2009 / 2014
6. Participation of Women in elections
7. Participation of Scheduled Castes in elections
8. Participation of Scheduled Tribes in elections
9. Participation of Minorities in elections

Semester VI: List of Projects

1. Role of Print Media in elections
2. Role of Audio-Visual media in elections
3. Role of Digital Media / Social Networking sites in elections
4. Election campaigning by political parties
5. Comparative analysis of election manifestos of political parties
6. Public Relation campaigns of political parties
7. Advertising campaigns by political parties
8. Opinion Polls and Exit Polls in India
9. Conduct a survey of private channels and NGOs with reference to elections
10. Make a comparative analysis of various governments with reference to development
11. Paid news in India
12. The accountability of media

Syllabus for T.Y.B.A. English Paper IV

Semester: V & VI

Course: Core Paper

Course Title: 16th to 18th Century English Literature

(Choice Based Credit System with effect from the Academic Year 2018-19)

1.		Syllabus as per Choice Based Credit System	
	i)	Name of the Program :	T.Y.B.A. English
	ii)	Course Code :	UAENG501 & UAENG601
	iii)	Course Title :	16th to 18th Century English Literature
	iv)	Semester wise Course Contents:	Enclosed the copy of syllabus
	v)	References and Additional References :	Enclosed in the Syllabus
	vi)	Credit Structure : No. of Credits per Semester	04
	vii)	No. of lectures per Unit :	20
	viii)	No. of lectures per week :	04
	ix)	No. of Tutorials per week :	--
2.		Scheme of Examination :	5 Questions of 20 marks each.
3.		Special notes , if any :	No
4.		Eligibility , if any :	No
5.		Fee Structure :	As per University Structure
6.		Special Ordinances / Resolutions if any :	No

Syllabus for TYBA Paper IV

Course: 16th to 18th Century English Literature

Course Codes: UAENG501& UAENG601

Objectives of the Course:

1) To introduce students to English Literature of the 16th, 17th and 18thcenturies.
2) To show them how background influences shaped the writer's thinking.
3) To present them to the literary masters who dominated the scene
4) To familiarize students with different writing styles that each age adopted.

Outcome of the Course:

After completion of the course, students are expected to be able to:

1) To understand the distinctive features of English literature of the 16th, 17th and 18th centuries
2) To comprehend how background influences shaped the writer's thinking.
3) To recognize and appreciate the literary masters who dominated the scene.
4) To grasp the different writing styles that each age adopted.

Semester V: 16th to 18th Century English Literature –I		
Course code- UAENG501	**04Credits**	**Total Lectures: 60**

Unit 1: Important Concepts & Terms: **20 Lectures**

A. <u>The Elizabethan Age (1550-1603)</u>
   i) Renaissance, Humanism and Reformation.
   ii) Elizabethan Poetry – Sonnets, Epic and Pastoral
   iii) Elizabethan Drama
   iv) University Wits.

B. <u>The Jacobean Period (1603-1650)</u>
   i) Characteristics of the Jacobean Period
   (Major influences and its impact on literature)
   ii) Metaphysical Poetry
   iii) Jacobean Drama- (Revenge Tragedy and Comedy)

Unit 2: William Shakespeare: Hamlet **20 Lectures**

OR

William Shakespeare: Comedy of Errors

Unit 3: Selected Verse from the Elizabethan and Jacobean periods.**20 Lectures**

Elizabethan Period:

a. Sir Philip Sidney from Astrophel and Stella sonnet sequence.
   Sonnet 37 "My mouth doth water and my breast doth swell".
   39 "Come Sleep! O Sleep, the certain knot of peace".

b. Edmund Spenser: from The Shepheardes Calender
   "April Eclogue".
   "November Eclogue".

c. William Shakespeare:
   Sonnet 116 "Let me not to the marriage of true minds"
   Sonnet 138 "When my love swears that she is made of truth"

Jacobean Period:

a. John Donne:"A Valediction Forbidding Mourning".
   Holy Sonnet 10 –"Death Be Not Proud".
b. George Herbert: "The Pulley".
   "Love".
c. Andrew Marvell:"The Coronet".
   "On a Drop of Dew".

Semester VI: 16th to 18th Century English Literature –II
Course code- UAENG601 **04Credits** **Total Lectures: 60**

Unit 1: Background and Important Concepts: **20 Lectures**

A. The Restoration Period (1660-1700)
   i) Characteristics of Restoration Period
      (Major events of the age and their impact on literature)
   ii) Restoration Poetry- (Epic, Mock epic, Satire)
   iii) Restoration Drama- Comedy of Manners, Heroic Tragedy
   iv) Diary Writing

B. Neo-Classical Period (1700-1798)
   i) Neo-Classical/Augustan
   ii) Age of Satire
   iii) Rise of the Periodical Essay and the Novel

Unit 2: John Dryden: All for Love **20 Lectures**
OR
Oliver Goldsmith: She Stoops to Conquer

Unit 3: Selected Verse from the Puritan Era, the Restoration Period and the 18th Century **20 Lectures**

Restoration Period:

a. John Milton: from Paradise Lost Book I

(105-124) 105- And shook his throne. What though the field he lost?
124- Sole reigning holds the tyranny of Heaven.

(242-270) 242- Is this the region, this the soil, the clime
270- Regained in Heaven, or what more lost in Hell?

(315-356) 315- Of Hell resounded: 'Princes, Potentates.
356- Forthwith, from every squadron and each band.

b. Alexander Pope: The Rape of the Lock- Canto II Lines 1-54
(1) Not with more Glories, in th' Etherial Plain,
(54) Th' impending Woe sate heavy on his Breast

c. John Dryden: "The Fire of London"

Semester End Examination Pattern: 100 Marks 03 Hours

The Semester End Examination for 100 marks will have 5 questions (with internal choice) of 20 marks each.
Question 1: A. Essay or Question 1: B. Essay or Question 1.C. Short Notes (two out of four) - Unit I
Q.2 Essay Type Question (1 out of 2) - Unit 2
Q.3 Essay Type Question (1 out of 2) - Unit 3
Q.4 Short Notes (2 out of 4)- Unit 2
Q.5 Short Notes (2 out of 4)- Unit 3

Syllabus for TYBA

Course: Literary Criticism

Course Code: UAENG502 & UAENG602

Objectives of the Course:

1) To introduce the learners to important critical terms

2) To make them aware of the nature and function of literature and criticism

3) To impart the technique of close reading of literary texts

4) To enable them to understand various literary theories and critical approaches

5) To familiarize the learners with the tenets of practical criticism

Outcome of the Course:

After completion of the course, students are expected to be able to:

1) use some important critical terms

2) become aware the nature and function of literature and criticism

3) impart the technique of close reading of literary texts

4) understand the various literary theories and critical approaches

5) be familiar with the tenets of practical criticism

Semester V Paper V: Literary Criticism - I
Course Code: UAENG502 04 Credits Total Lectures: 60

UNIT I: Critical Terms (15 lectures)

(i) Simile, (ii) Imagery, (iii) Symbol, (iv) Paradox, (v) Ambiguity, (vi) Myth

UNIT II: Nature and Function of Literature (15 lectures)

i. Literature as Imitation (Plato-Aristotle debate)
ii. Literature and Imagination (the Romantic Idea of the Imagination)
iii. Literature as an expression of the writer's personality
iv. Function of Literature (aesthetic, moral and cognitive functions)

UNIT III: Nature and function of Literary Criticism (15 lectures)

i. Nature of Literary Criticism
ii. Functions of Literary Criticism (Explication, Analysis, Interpretation, Evaluation, Theorizing)
iii. A survey of the Role of a Critic

UNIT IV: Practical Criticism: Scansion (15 lectures)

Two short passages of poetry (6 to 10 lines each) will be set for scansion. Students should scan the poem, identify the base metre (iamb, trochee), variations (pyrrhic, spondee, anapaest, dactyl, cretic, amphibrach, etc.), rhyme scheme, stanza forms if any, and the metrical peculiarities such as end-stopped lines, run-on lines, elision, caesura and other basic concepts of versification.

(5 marks for scanning and identifying the base metre, 4 marks for identifying modulations and other metrical peculiarities and 1mark for rhyme scheme)

Semester End Examination Pattern 100 Marks 03 Hours

Semester End Examination for 100 marks will have 5 questions (with internal choice) of 20 marks each

Q.1 Short Notes (2 out of 4) – Unit I
Q.2 Essay type Question (1 out of 2) – Unit II
Q.3 Essay type Question (1 out of 2) – Unit III
Q.4 Short Notes: (2 out of 4) – Unit II and III
Q.5 Scansion of two extracts from poetry of about 6-10 lines each

Semester VI Paper V: Literary Criticism - II
Course Code: UAENG602 04 Credits Total Lectures: 60

UNIT I: Literary Movements (15 lectures)

i. Classicism, ii. Romanticism, iii. Realism, iv. Naturalism, v. Symbolism, vi. Aestheticism

UNIT II: Critical Approaches: (15 lectures)

i. New Criticism
ii. Structuralism
iii. Psychoanalytic Criticism
iv. Archetypal Criticism

UNIT III: Critical Approaches (15 lectures)

i. Marxist Criticism
ii. Feminist Criticism
iii. Postcolonial Criticism
iv. Eco Criticism

UNIT IV: Practical Criticism (15 lectures)

Critical Appreciation of an unseen poem: A short poem of about 20 lines will be set for appreciation. The title of the poem will be given. The unit will test the students' responsiveness to the poem and their linguistic ability in analysing the poem. Students are expected to mobilize the techniques of close reading and their understanding of literary devices like imagery, metaphor and other poetic devices while learning this unit.

Semester End Examination Pattern 100 Marks 3 Hours

Semester End Examination for 100 marks will have 5 questions (with internal choice) of 20 marks each
Q.1 Short Notes (2 out of 4) – Unit I
Q.2 Essay type Question (1 out of 2) – Unit II
Q.3 Essay type Question (1 out of 2) – Unit III
Q.4 Essay type Question (2 out of 4) – Unit II & III
Q.5 Critical Appreciation of an unseen poem

Syllabus for T.Y.B.A. English

Semester V & VI

Course: Elective Paper

Course Title: Grammar and the Art of Writing

(Choice Based Credit System with effect from the Academic Year 2018-19)

1. Syllabus as per Credit Based Semester and Grading System:

i)	Name of the Programme	:	T.Y.B.A. English
ii)	Course Code	:	UAENG503A & UAENG603A
iii)	Course Title	:	TYBA English Paper VI -- Grammar and the Art of Writing
iv)	Semester wise Course Contents	:	Enclosed the copy of syllabus
v)	References and Additional References:		Enclosed in the Syllabus
vi)	Credit Structure	:	
No. of Credits per Semester		:	03
vii)	No. of lectures per Unit	:	15
viii)	No. of lectures per week	:	03
2.	Scheme of Examination	:	4 Questions of 20 marks each and a project of 20 marks
3.	Special notes, if any	:	No
4.	Eligibility, if any	:	No
5.	Fee Structure	:	As per University Structure
6.	Special Ordinances / Resolutions if any:		No

Syllabus for TYBA
Course: GRAMMAR AND THE ART OF WRITING
Course Codes: UAENG503A & UAENG603A

Objectives:

1. To develop amongst learners an insight into the process of word formation and transformation
2. To develop amongst them an insight into the sounds, stress patterns and intonations in the English language to improve their speaking skills
3. To develop among them an insight into the structure of the English language and to provide knowledge of the rules of grammar
4. To help them learn grammatical analysis and description and the skills of sentence transformation
5. To introduce the mechanics of writing for effective writing for various domains

Outcome of the Course:

After the completion of the course, students are expected to be able to:

1. Gain a basic understanding of phonetics, morphology and word transformation
2. Have improved speaking skills
3. Have developed adequate knowledge of the rules of grammar, grammatical analysis and sentence transformation
4. Write effectively in various domains.

SEMESTER- V: Paper VI – Grammar and the Art of Writing – I		
Course Code: UAENG503a	**3 Credits**	**Total Lectures: 45**

Phonetics, Morphology, Grammar and the Art of Writing

Unit I: Phonetics and Morphology **15 lectures**

A. Phonetics

- Phoneme and its distinctive features
- English Vowels and Consonants (Difference between BRP and Indian English)
- Diphthongs
- Consonant Clusters

- Morph, Allomorph and Vowel Mutation
- Free and Bound Morphemes
- Root and stem
- Inflection and Derivation
- Morphological Analysis

Unit 2: Grammar: Words and Phrases **15 lectures**

- Open word classes: nouns, adjectives, verbs, adverbs
- Closed word classes: pronouns, determiners, operator verbs, prepositions, conjunctions, enumerators, interjections
- Noun Phrase, Genitive Phrase, Prepositional Phrase, Adjective Phrase and Adverb Phrase
- Verb Phrase

Unit 3: Art of Writing **15 lectures**

I. Discourse Analysis

- Tenor
- Mode
- Domain

Domain and language change – journalism, advertising and literature, scientific and technical writing

II. Mechanics of Writing

- Understanding paragraph divisions and topic sentences of paragraphs

III. Writing for Print Media

- Print – News Report

Evaluation Pattern:
1) Semester End Examination: 80 Marks - 2 1/2 Hours
2) Project: 20 Marks

1) Semester End Examination (80 marks):

Q.1	a. Phrase analysis	20 marks
Q.2	a. Verb Phrases	06 marks
	b. Morphological analysis	14 marks
Q.3	a. Stress Marking and Intonation	10 marks
	b. Transcription	10 marks
Q. 4.	Writing a news report on the basis of the facts given	20 marks

2) Project work (20 marks):

Students should be tested on –

1. Breaking a passage of about 250-300 words into appropriate paragraphs, picking up the topic statement of each paragraph 10 marks

AND

2. Identifying the register of a passage about 250-300 words 10 marks

SEMESTER- VI: Grammar and the Art of Writing – II		
Course Code: UAENG603A	**3 Credits**	**Total Lectures: 45**

Grammar and the Art of Writing

Unit I: Grammar **20 lectures**

I. Clauses:

- Clause elements and subject –verb concord
- Basic clause patterns
- Types of clauses : finite – non-finite (tensed – tenseless), independent – dependent (Main – Subordinated)
- Kinds of subordinate clause : Noun clause, Prepositional Clause , Relative clause , Adverb Clause, Comparative Clause

iii) Course Title	:	19th Century English Literature
iv) Semester wise Course Contents	:	Copy of the syllabus Enclosed
v) References and additional references	:	Enclosed in the Syllabus
vi) Credit structure	:	
No. of Credits per Semester	:	04
vii) No. of lectures per Unit	:	20
viii) No. of lectures per week	:	04
ix) No. of Tutorial per week	:	---
2 Scheme of Examination	:	5 Questions of 20 marks each
3 Special notes, if any	:	No
4 Eligibility, if any	:	No
5 Fee Structure	:	As per University Structure
6 Special Ordinances / Resolutions, if any	:	No

Syllabus for TYBA

Course: 19th Century English Literature

Course Codes: UAENG504 &UAENG604

Objectives of the Course:

1. To introduce to students the major trends and ideas in the literature and culture of the Romantic and Victorian Eras
2. To help students understand the texts in the context of prevailing socio-cultural conditions & their historical, political location
3. To impress upon students the characteristically rebellious/ radical nature of British Romanticism and the stupendous range of changes in the socio-political conditions of Early (1837-1851), Middle (1851-1870) and Late (1870-1901) Victorian Era
4. To familiarize and highlight major representative texts, genres, thematic concerns and select key concepts/terms pertaining to the respective periods
5. To help students apply a variety of critical, historical, and theoretical approaches to prescribed literary texts
6. To sensitize students to diverse sensibilities and humanitarian concerns through literature of the nineteenth century

Course Outcomes:

After completion of the course, students are expected to be able to:

1. To view literary works in their dynamic interface with the background
2. To understand the literature of the 19th century as a complex outcome of artistic, intellectual and socio-political cross-currents
3. To appreciate poetry as mirroring private personality, protest and subsequently, public concerns
4. To view the development of the Victorian Novel as informed by Victorian morality as well as by larger democratic processes
5. To contextualize the impulses behind the significant emergence of women writing in the 19th century

	iv)	Semester wise Course Contents:	Enclosed the copy of syllabus
	v)	References and Additional References :	Enclosed in the Syllabus
	vi)	Credit Structure : No. of Credits per Semester	04
	vii)	No. of lectures per Unit :	15
	viii)	No. of lectures per week :	03
	ix)	No. of Tutorials per week :	--
2.		Scheme of Examination :	4 Questions of 20 marks each, and a Project of 20 marks
3.		Special notes , if any :	No
4.		Eligibility , if any :	No
5.		Fee Structure :	As per University Structure
6.		Special Ordinances / Resolutions if any :	No

Syllabus for TYBA

Course: Literature of Protest

Course Codes: UAENG506D& UAENG606D

Objectives of the Course:

1. To explore voices of discord, rhetoric and cultural contexts.
2. To compare and contrast the artistic manoeuvres.
3. To examine the protest spectrum in literature.
4. To bring in panoramic understanding of global protest literature and ideologies.
5. To learn the historical links between forms of protest and meanings of literature

Outcome of the Course: After completion of the course, students are expected to be able to:

1. Read and interpret cross cultural texts.
2. Understand protest literature.
3. Get sensitized towards global issues.
4. Learn to look into past, correlate it to present and future.
5. Understand the historicity of protest literature.

Semester V: Literature of Protest– I		
Course code- UAENG506D	**04 Credits**	**Total Lectures: 45**

Unit 1: Background Topics: **15 Lectures**

1. Literature and Protest
2. Politics and Language of Protest
3. Translation and Literature of Protest
4. Concept of Caste, Varna Theory and Division of Labor
5. Concept of Race and Discrimination
6. Protest in African American, Dalit and Tribal Literature

Unit 2: Autobiography: 15 Lectures

I Want to Destroy Myself: A Memoir- Mallika Amar Shaikh Translated by Jerry Pinto

Or

Dreams from My Father- Barack Obama

Unit 3: Short Story 15 Lectures

1. Death of a Rich Man
2. When the Sun God Refused to Set
3. Loneliness of An Ex-soldier
4. Confessions of a Graveyard Keeper

(The stories are from *Desperate Men and Women: Ten Dalits Short Stories from India*, edited by Rangrao, B., Kalpaz Publications, 2013)

Semester End Examination Pattern: 80 Marks 3 Hours

Q 1. (a) Short notes on Unit I: Concepts (Two out of Four)	20
Q 2. (a) Essay type question on Unit II(One out of Two)	20
Q 3. (a) Essay type question on Unit III (One out of Two)	20
Q 4. (a) Short notes on Unit II (One out of Two)	10
(b) Short notes on Unit III (One out of Two)	10

Internal Assessment: 20 marks

A project of 20 marks/semester (1500-2000 words) to be undertaken by the students with particular focus on the protest literature in the writings such as Aboriginal literature, Dalit literature, Tribal Literature, African American literature. Students to analyse an autobiography or 5 short stories of their choice (not prescribed in the syllabus) through the lens of protest in Semester V)

Semester VI: Literature of Protest – II
Course code- UAENG606D **03 Credits** **Total Lectures: 45**

Unit I: Protest in Contemporary Regional Writings: **15 Lectures**

1. Marathi Literature
2. Tamil Literature
3. Gujrati Literature
4. Kannada Literature
5. Hindi Literature
6. Bengali Literature

Unit 2: Novel: **15 Lectures**

Uncle Tom's Cabin- Harriet Beecher Stowe

Or

My Father Baliah- Y.B.Satyanarayana

Unit 3: Poetry **15 Lectures**

Kamala Das: 1. *The Looking Glass 2. Forest Fire*

Meena Kandasamy: 1. Advaita: The Ultimate Question, 2. The Gods Wake Up

Jyoti Lanjewar: 1. The Nameless Ones (anamikas), 2. Caves,

Semester End Examination Pattern: 80 Marks 3 Hours

Q 1. (a) Short notes on Unit I: Concepts (Two out of Four)	20
Q 2. (a) Essay type question on Unit II (One out of Two)	20
Q 3. (a) Essay type question on Unit III (One out of Two)	20
Q 4. (a) Short notes on Unit II (One out of Two)	10
(b) Short notes on Unit III (One out of Two)	10

Internal Assessment: 20 marks

A project of 20 marks/semester (1500-2000 words) to be undertaken by the students with particular focus on the protest literature in the writings such as Aboriginal literature, Dalit literature, Tribal Literature, African American literature. Students to analyse a novel or 5 poems of their choice (not prescribed in the syllabus) through the lens of protest in Semester VI)

Course – ZOOLOGY

To be implemented from Academic year 2016-17

SEMESTER - III

COURSE CODE	UNIT	TOPIC	CREDITS	LECTURES/ WEEK
USZO301	I	Fundamentals of Genetics,	2	1
	II	Chromosomes and Heredity,		1
	III	Nucleic acids		1
USZO302	I	Study of Nutrition and Excretion	2	1
	II	Study Respiration and circulation,		1
	III	Control and coordination, Locomotion and Reproduction		1
USZO303	I	Ethology	2	1
	II	Parasitology		1
	III	Economic Zoology		1
USZOP3	Practical based on all three courses		03	**9**

SEMESTER - IV

COURSE CODE	UNIT	TOPIC	CREDITS	LECTURES/ WEEK
USZO401	I	Origin and evolution of Life,	2	1
	II	Population genetics and evolution,		1
	III	Scientific Attitude methodology , writing and ethics		1
USZO402	I	Cell Biology,	2	1
	II	Endo membrane System		1
	III	Biomolecules		1
USZO403	I	Comparative Embryology,	2	1
	II	Aspects of Human Reproduction,		1
	III	Pollution and its effect on organisms		1
USZOP4	Practical based on all three courses		03	**9**

S.Y.B.Sc SYLLABUS DRAFT

SEMESTER III

Sr. No	USZO301 COURSE-5	No of lect allotted	Learning pleasure
	Fundamentals of Genetics, Chromosomes and Heredity, Nucleic acids		
	Unit 1: Fundamentals of Genetics	**15L**	**25hrs**
	***Objectives* :** ➢ *To Introduce basic terms of genetics* ➢ *To study Mendelian principles of inheritance and other forms pattern of inheritance*		
.	**Desired *outcomes :*** ➢ *Understand and apply the principles of inheritance.* ➢ *Understand the concept of multiple alleles, linkage and crossing over.*		
1.1	**Introduction to genetics** ➢ Definition, scope and importance of genetics. ➢ Classical and Modern concept of Gene (Cistron, muton, recon). ➢ Brief explanation of the following terms: Allele, wild type and mutant alleles, locus, dominant and recessive traits, homozygous and heterozygous, genotype and phenotype, genome.	**2L**	**2hrs**
1.2	**Mendelian Genetics** ➢ Mendelian Genetics**:** Monohybrid cross, Dihybrid cross, test cross, back cross, Mendel's laws of Inheritance, Mendelian traits in man. ➢ Exceptions to Mendelian Inheritance: Incomplete dominance, Co-dominance, Lethal alleles, Epistasis - Recessive, Double recessive, dominant and double dominant. ➢ Chromosome theory of inheritance. ➢ Pedigree analysis-Autosomal dominant and autosomal recessive, X-linked dominant, and X-linked recessive	**8L**	**12hrs**
1.3	**Multiple Alleles and Multiple Genes** ➢ Concept of multiple alleles, Coat colour in rabbit, ABO and Rh blood group systems ➢ Polygenic inheritance with reference to skin colour and eye colour in man. ➢ Concept of pleiotropy.	**3L**	**06hrs**
1.4	**Linkage and Crossing Over** ➢ Linkage and crossing over, types of crossing over, cytological basis of crossing over.	**2L**	**05hrs**
	Unit: 2: Chromosomes and Heredity	**15 L**	**26hrs**
	Learning objectives:		

	➢ *To familiarize the learners with the structure, types and classification of chromosomes.* ➢ *To introduce the concept of sex determination and its types, sex influenced and sex limited genes.*		
	Desired Outcomes: ➢ *Learners would understand the structure and types of chromosomes.* ➢ *Learners would understand mechanisms of sex determination.* ➢ *Learners would be able to correlate the disorders linked to a particular sex chromosome.*		
2.1	**Chromosomes** ➢ Types of chromosomes–Autosomes and Sex chromosomes ➢ Chromosome structure - Heterochromatin, Euchromatin ➢ Classification based on the position of centromere ➢ Endomitosis, Giant chromosomes- Polytene and Lamp brush chromosomes and significance of Balbiani rings.	**4L**	**8hrs**
2.2	**Sex- determination** ➢ Chromosomal Mechanisms: XX-XO, XX-XY, ZZ-ZW. ➢ Sex determination in honey bees- Haplodiploidy, ➢ Sex determination in *Drosophila*-Genic balance theory, intersex, gynandromorphs. ➢ Parthenogenesis. ➢ Hormonal influence on sex determination-Freemartin and sex reversal. ➢ Role of environmental factors- Bonellia and Crocodile ➢ Barr bodies and Lyon hypothesis	**7L**	**10hrs**
2.3	**Sex linked, sex influenced and sex limited inheritance.** ➢ X-Linked: Colourblindness, Haemophilia ➢ Y-linked: Hypertrichosis ➢ Sex-influenced genes ➢ Sex limited genes	**4L**	**8hrs**
	Unit: 3 Nucleic acids	**15 L**	**30hrs**
	***Objectives*:** ➢ *To introduce to the learners the classical experiments proving DNA as the genetic material.* ➢ *To make the learner understand the structure of nucleic acids and the concept of central dogma of molecular biology.* ➢ *To familiarize the learner with the concept of gene regulation.*		
	Desired Outcomes: ➢ *Learner would understand the importance of nucleic acids as genetic material.* ➢ *The learners would understand and appreciate the regulation of gene expressions.*		

3.1	**Genetic material** ➢ Griffith's transformation experiments, Avery-Macleod and McCarty, Hershey Chase experiment of Bacteriophage infection ➢ Chemical composition and structure of nucleic acids. ➢ Double helix nature of DNA, Solenoid model of DNA. ➢ Types of DNA – A, B, Z & H forms. ➢ DNA in Prokaryotes -chromosomal and plasmid. ➢ Extra nuclear DNA -mitochondria and chloroplast. ➢ RNA as a genetic material in viruses. ➢ Types of RNA: Structure and function.	**7L**	**14hrs**
3.2	**Flow of genetic information in a Eukaryotic cell** ➢ DNA Replication ➢ Transcription of mRNA ➢ Translation ➢ Genetic code	**5L**	**08hrs**
3.3	**Gene Expressions and regulation** ➢ One gene-one enzyme hypothesis /one polypeptide hypothesis ➢ Concept of operon ➢ Lac operon	**3L**	**08hrs**

Sr. No	**USZO302 COURSE-6**	**No of lect allotted**	**Learning pleasure**
	Study of Nutrition and Excretion , Respiration and circulation, Control and coordination, Locomotion and Reproduction		
	Unit: 1 Study of Nutrition and Excretion	**15L**	**23hrs**
	Objective : ➢ *To introduce the concepts of physiology* of nutrition, excretion and osmoregulation. ➢ *To expose the learners to various nutritional apparatus, excretory and osmoregulatory structures in different classes of organisms.*		
	Desired Outcome : ➢ *Learners would understand the increasing complexity of nutritional, excretory and osmoregulatory physiology in evolutionary hierarchy.* ➢ *Learners would be able to correlate the habit and habitat with nutritional, excretory and osmoregulatory structures.*		
1.1	➢ Comparative study of Nutritional Apparatus (structure and function): Amoeba, Hydra, Earthworm, Cockroach, Bivalve, Amphioxus, Pigeon, Ruminants.	5L	06hrs
1.2	➢ Physiology of digestion in man	2L	04hrs

1.3	➢ Comparative study of Excretory and Osmoregulatory structures and function a. Amoeba -contractile vacuoles b. Planaria -Flame cells c. Earthworm -Nephridia d. Cockroach-Malphigian tubules and green gland e. Bivalve -Organ of Bojanus	5L	08hrs
1.4	➢ Categorization of animals based on principle nitrogenous excretory products	1L	01hrs
1.5	➢ Structure of kidney, Uriniferous tubule and physiology of urine formation in man.	2L	04hrs
	Unit: 2 Study of Respiration and circulation	**15L**	**27hrs**
	***Objective* :** ➢ *To introduce the concepts of physiology of respiration and circulation* ➢ *To expose the learners to various respiratory and circulatory structures in different classes of organisms.*		
	Desired Outcome: ➢ *Learners would understand the increasing complexity of respiratory and circulatory physiology in evolutionary hierarchy.* ➢ *Learners would be able to correlate the habit and habitat with respiratory and circulatory structures.*		
2.1	➢ Comparative study of Respiratory organs (structure and function) Earthworm, Spider, Rohu, Frog and Pigeon.	**3L**	**06hrs**
2.2	➢ Accessory respiratory structures: Anabas /Clarius	**1L**	**02hrs**
2.3	➢ Structure of lungs and physiology of respiration in man	**2L**	**04hrs**
2.4	➢ Comparative study of circulation: Open and closed - single and double .	**1L**	**02hrs**
2.5	➢ Types of circulating fluids- Water, coelomic fluid, haemolymph, lymph and blood.	**2L**	**02hrs**
2.6	➢ Comparative study of Hearts (Structure and function) Earthworm, Cockroach, Shark, Frog, Crocodile and Pigeon.	**4L**	**07hrs**
2.7	➢ Structure and mechanism of working of heart in man	**2L**	**04hrs**
	Unit: 3 Control and coordination, Locomotion and Reproduction	**15L**	**25hrs**
	***Objective* :** ➢ *To introduce the concepts of physiology of control and coordination and locomotion and reproduction* ➢ *To expose the learners to various locomotory and reproductive structures in different classes of organisms*		
	***Desired Outcome**:*		

	➢ *Learners would understand the process of control and coordination by nervous and endocrine regulation.* ➢ *Learners would be fascinated by various locomotory structures found in the animal kingdom.* ➢ *Learners would be acquainted with various reproductive strategies present in animals.*		
3.1	**Control and coordination** ➢ Irritability –Paramoecium , Nerve net in Hydra, Nerve ring and nerve cord in earthworm ➢ Types of neurons on the basis of structure and function ➢ Conduction of nerve impulse: Resting potential, action potential and refractory period ➢ Synaptic transmission ➢ Endocrine regulation: Hormones as chemical messengers, feedback mechanisms	**5L**	**08hrs**
3.2	**Movement and Locomotion** ➢ Locomotory organs -structures and functions a. Pseudopodia in Amoeba (sol gel theory), Cilia in Paramecium b. Wings and legs in Cockroach c. Tube feet in Starfish d. Fins of fish	**4L**	**08hrs**
3.3	➢ Structure of Striated muscle fibre in human and Sliding filament theory	**2L**	**02 hrs**
3.4	**Reproduction** a. Asexual Reproduction- Fission, fragmentation, gemmule formation, budding b. Sexual reproduction i. Gametogenesis ii. Structure of male and female gametes in human iii. Types of fertilization iv. Oviparity, viviparity, ovo-viviparity	**4L**	**07hrs**
	USZO 303 COURSE-7		
	Ethology , Parasitology, Economic Zoology	**15L**	**26hrs**
	Unit: 1 Ethology		
	Objective: ➢ *To equip learners with a sound knowledge of how animals interact with one another and their environment.* ➢ *To enable the learners to understand different behavioural patterns.*		
	Desired Outcome: ➢ *Learners would gain an insight into different types of animal behaviour and their role in biological adaptations.* ➢ *Learners would be sensitized to the feelings instrumental in social behavior.*		

1.1	**Introduction to Ethology** ➢ Definition, History and Scope of Ethology ➢ Animal behaviour - Innate and Learned behaviour ➢ Types of learning -Habituation, Imprinting and types of imprinting -filial and sexual, Classical conditioning, Instrumental learning and insight learning.	**4L**	**06hrs**
1.2	**Aspects of animal behaviour** ➢ Communication in Bees and Ants ➢ Mimicry and colouration ➢ Role of hormones and pheromones in sexual behaviour ➢ Displacement activities, Ritualization ➢ Migration in fish, schooling behaviour ➢ Habitat selection, territorial behaviour, food selection and foraging behaviour in African ungulates	**6L**	**12hrs**
1.3	**Social behaviour** ➢ Social behaviour in primates -Hanuman langur ➢ Elements of Socio-biology: Selfishness, cooperation, altruism, kinship and inclusive fitness	**5L**	**08hrs**
	Unit: 2 Parasitology	**15L**	**27hrs**
	Objective: ➢ *To acquaint learners with the concepts of parasitism, their relationship with environment.* ➢ *To make learners aware about the modes of transmission of parasites.*		
	Desired Outcome: ➢ *Learners would understand the general epidemiological aspects of parasites that affect humans and apply simple preventive measures for the same.* ➢ *Learners would comprehend the life cycle of specific parasites, the symptoms of the disease and its treatment.*		
2.1	**Introduction to Parasitology and types of parasites** ➢ Definitions: parasitism, host, parasite, vector-biological and mechanical ➢ **Types of parasites-** Ectoparasites, Endoparasite and their subtypes ➢ Parasitic adaptations in Ectoparasites and Endoparasites ➢ Types of hosts: intermediate and definitive, reservoir	**2L**	**06hrs**
2.2	**Host-parasite relationship-Host specificity** ➢ Definition, structural specificity, physiological specificity and ecological specificity.	**2L**	**06hrs**
2.3	**Life cycle, pathogenicity, control measures and treatment** ➢ *Entamoeba histolytica, Fasciola hepatica, Taenia solium, Wuchereria bancrofti*	**5L**	**06hrs**

2.4	**Morphology, life cycle, pathogenicity, control measures and treatment** ➢ Head louse (*Pediculus humanus capitis*), Mite (*Sarcoptes scabei),* Bed bug (*Cimex lectularis)*	**2L**	**06hrs**
2.5	**Parasitological significance** ➢ Zoonosis- Bird flu, Anthrax, Rabies and Toxoplasmosis	**4L**	**03hrs**
	Unit 3 Economic Zoology	**15L**	**24hrs**
	Objective*:* ➢ *To disseminate information on economic aspects of zoology like apiculture, vermiculture, dairy science.* ➢ *To encourage young learners for self employment.*		
	Desired Outcome: ➢ *Learners would gain knowledge on animals useful to mankind and the means to make the most of it.* ➢ *Learners would learn the modern techniques in animal husbandry.* ➢ *Learners would be pursuing entrepreneurship as careers*		
3.1	**APICULTURE**	**5L**	**08hrs**
3.1.1	**Methods of bee keeping and management** ➢ An introduction to different species of honey bees used in apiculture. ➢ Selection of flora and bees for apiculture. ➢ Advantages and disadvantages of traditional and modern methods of apiculture. ➢ Pests and Bee enemies- Wax moth, wasp, black ants, bee eaters , king crow and disease control ➢ Bee keeping industry- Present status and recent efforts to improve and boost the industry		
3.1.2	**Economic importance** ➢ Honey- Production, Chemical composition and economic importance ➢ Bees wax- Economic importance. ➢ Role of honey bees in pollination.		
3.2	**VERMICULTURE**	**4L**	**08hrs**
3.2.1	**Rearing methods, management and economic importance** ➢ An introduction to different species of earthworms used in vermiculture. ➢ Methods of vermiculture. ➢ Maintenance and harvesting ➢ Economic importance: advantages of vermiculture, demands for worms; market for vermicompost and entrepreneurship.		
3.3	**DAIRY SCIENCE**	**6L**	**08hrs**

3.3.1	**Dairy development in India** ➢ Role of dairy development in rural economy, employment opportunities		
3.3.2	**Dairy Processing** ➢ Filtration, cooling, chilling, clarification, pasteurization, freezing		
3.3.3	**Milk and milk products** ➢ Composition of milk ➢ Types of milk: Recombined milk, Soft curd milk, Skimmed and toned milk, Artificial milk. ➢ Milk products		

	SEMESTER III
	Practical USZOP3 (Course V)
1	Extraction and detection of DNA
2	Extraction and detection of RNA.
3	Mounting of Barr bodies.
4	Study of polytene chromosome.
5	Study of mitosis- temporary squash preparation of Onion root tip
6	Detection of blood groups and Rh factor.
7	Problems in genetics a. Monohybrid/ Dihybrid cross b. X- linked inheritance c. Multiple alleles
8	Chromosome morphology: Metaphase spreadsheet (photograph to be provided)
9	Pedigree analysis
10	Problems on molecular biology
	Practical USZOP3 (Course VI)
1	Urine analysis—Normal and abnormal constituents
2	Detection of ammonia in water excreted by fish
3	Detection of uric acid from excreta of Birds
4	Study of striated and non- striated muscle fibre
5	Study of nutritional Apparatus (Amoeba, Hydra, Earthworm, Pigeon, Ruminant stomach)
6	Study of respiratory structures: a. Gills of Bony fish and Cartilaginous fish. b. Lungs of Frog c. Lungs of Mammal. d. Accessory respiratory structure in Anabas (Labyrinthine organ) e. Air sacs of Pigeon.
7	Study of locomotory organs (*Amoeba*, *Unio*, Cockroach, Starfish, Fish, and Birds)

8	Study of hearts (Cockroach, Shark, Frog, *Calotes*, Crocodile, Mammal)
9	Study of permanent slides on topic of Reproduction a. Sponge gemmules b. Hydra budding c. T.S. of mammalian testis d. T.S. of mammalian ovary
	Practical USZOP3 (Course VII)
1	Extraction of Casein from Milk and its qualitative estimation
2	Preparation of paneer from given milk sample
3	Measurement of density of milk using different samples by Lactometer
4	Study of Honey Bee : a) Life Cycle of Honey Bee and Bee Hive b) Mouthparts of Honey Bee c) Legs of Honey Bee d) Sting Apparatus of Honey Bee
5	Study of ethological aspects: a) Warning Colouration b) Instincts c) Imprinting d) Communication in animals: Chemical signals and sound signals e) Displacement activities in animals: Courtship and mating behavior in animals and ritualization
6	Study of Protozoan parasites: a. *Trypanosoma gambiense* *b. Giardia intestinanalis*
7	Study of Helminth parasites: *a) Ancylostoma duodenale* *b) Dracunculus medenensis*
8	Parasitic adaptations: Scolex and mature proglottid of Tapeworm
9	Study of Ectoparasites: a. Leech b. Tick c. Mite
10	Project- Suggested topics on economic zoology (eg Apiculture, sericulture/ lac culture / vermicompost Technique / Construction of artificial beehives /Animal husbandry/ aquaculture etc)

Note -The practicals may be conducted by using specimens authorised by the wildlife and such other regulating authorities though it is strongly recommended that the same should be taught by using photographs/audio-visual aids/ simulations / models, etc. as recommended by the UGC and as envisaged in the regulations of the relevant monitoring bodies. No new specimens, however, shall be procured for the purpose of conducting practicals mentioned here-in-above.
#There shall be at least one excursion/field trip.

Semester –III

REFERENCE BOOKS AND ADDITIONAL READING

COURSE-V (USZO301)

1. Principles of Genetics. Gardner, E.J., Simmons, M.J and Snustad, D.P. John Wiley and Sons
2. Concepts of Genetics. Klug, W.S., Cummings M.R., Spencer, C.A. Benjamin Cummings.
3. Genetics- A Molecular Approach. Russell, P. J Benjamin Cummings.
4. Genetics: Analysis of Genes and Genomes. Daniel L., Hartl, Elizabeth W. Jones Jones & Bartlett Publishers
5. Introduction to Genetic Analysis. Griffiths, A.J.F., Wessler. S.R., Lewontin, R.C. and Carroll, S.B. W. H. Freeman and Co.
6. Cell Biology Genetics , Molecular Biology Evolution and Ecology Verma P.S. and Agrawal P.K., 9th edition, S. Chand Publication, New Delhi.
7. Principles of Genetics – Eight edition- Eldon john Gardner, Michael J. Simmons, D. Peter Snustad
8. Genetics- Weaver, Hedrick, third edition, Mc Graw Hill Education
9. Genetics A Mendelian approach Peter J.Russel, Pearson Benjamin Cummings
10. Genetics A conceptual approach, Benjamin A. Pierce, Southwestern University, W.H. Freeman and company, New York
11. Genetics, Third Edition, Monroe W. Strickberger
12. Genetics from gene to genome, third edition, Leeland H. Hartwell, Leeroy Hood, Michael 7. L. Goldberg, Ann E. Reynolds, Lee M. Silver, McGraw Hill Education

COURSE-VI (USZO302)

1. Vertebrate Zoology Volume I- Jordan and Verma , S. Chand and Co.
2. Invertebrate Zoology Volume II- Jordan and Verma , S. Chand and Co.
3. Invertebrate Zoology- Majupuria T. C., Nagin S.and Co.
4. Chordate Zoology- Dhami P. S. and Dhami J. K. , R. Chand and Co.
5. Invertebrate Zoology- Dhami P. S. and Dhami J. K., R. Chand and Co.
6. Introduction to Vertebrates- Moore Cambridge University- Low Priced Edition.
7. Zoology- Miller S. A. and Harley J. B., Tata McGraw Hill.
8. Modern Textbook of Zoology, Invertebrates, Kotpal R. L.
9. Biological Science, Taylor D.J., Stout G.W., Green N.P.O, Soper R.,Cambridge University Press.

COURSE-VII (USZO303)

1. Animal Behaviour- David Mc Farland
2. Animal Behaviour- Mohan Arora

3. Animal Behaviour- Reena Mathur
4. An introduction to Animal Behaviour- Dawkins
5. Animal Behaviour-Agarwal
6. Animal Behaviour- Tinbergen
7. Biology of Insects- 1992 Saxena S. C. Oxford and IBH Publishing Co New Delhi. Bombay. Calcutta
8. A Text Book of Entomology- 1974Mathur V. K. and Upadhayay K Goel Printing press, Barani.
9. Bee and Bee Keeping- Roger A. Morse, Conell University Press London
10. Vermiculture Technology - Clive A. Edwards, Norman Q. Arancon and Rhonda Sherman
11. Parasitology- Chatterjee K.D., Chatterjee Medical Publishers.
12. Medical Parasitology- Arora
13. Textbook of Medical Parasitology-. C.K Jayaram Paniker, Jaypee Brothers.
14. A text book of Parasitology- Kochhar S.K. Dominant Pub. & Dis, New Delhi.
15. Essentials of Parasitology- Gerald and Schmidt: Universal Bookstall, New Delhi.
16. Parasitology- Sharma P.N.and Ratnu L.N., Chand S & Co.Pvt.Ltd.
17. Introduction to Parasitology- Chandler and Read John Wiley & Sons
18. Economic Zoology- Biostatistics and Animal behaviour – S.Mathur, Rastogi Publicatons.
19. Economic Zoology- Shukla G.S. & Upadhyay V.B., Rastogi Publications.
20. A handbook on Economic Zoology, S.Chand & Co.

SCHEME OF EXAMINATION (THEORY)

(a) Internal assessment of twenty five (25) marks per course per semester should be conducted according to the guidelines given by University of Mumbai vide circular number UG/04 of 2014 Dated 5th June 2014 to be implemented from academic year 2015-16.
(b) External assessment of seventy five (75) marks per course per semester should be conducted as per the following skeleton question paper pattern.
(c) One practical examination of fifty (50) marks per course each should be conducted at the end of every semester.

SKELETON- EXAMINATION PATTERN FOR THE ABOVE SYLLABUS

All Questions are compulsory
Figures to the right indicate full marks

Time: 2.5 hours **Total marks: 75**

Q.1.	UNIT 1 Answer any four out of eight (5 marks each)	20 marks
Q.2.	UNIT 2 a. Answer any one of the two (10 marks) b. Answer any two out of the four (5 marks each)	20 marks
Q.3.	UNIT 3 Answer any two out of four (10 marks each)	20 marks
Q.4.	a. Unit 1 - (One note of five marks OR objective type questions) b. Unit 2 - (One note of five marks OR objective type questions) c. Unit 3- (One note of five marks OR objective type questions)	15 marks

*For Question 4 it is recommended to have objective questions such as –

(a) Match the column (b) MCQ
(c) Give one word for (d) True and False
(e) Define the term (f) Answer in one sentence etc

MODEL QUESTION BANK SEMESTER III

USZO301(COURSE V)

Question bank is suggestive. The paper setters are free to modify the questions or include new questions to the best of their perception

Unit :1 (10 Marks)

1. Define genetics and explain its scope and importance.
2. Explain Mendel's laws of inheritance.
3. Describe in detail the monohybrid cross and state the Mendelian principle of inheritance derived from it. Add a note on Co-dominance.
4. Describe in detail dihybrid cross and state the Mendelian principles of inheritance derived from it.
5. Discuss in brief inheritance of Mendelian phenotypic traits in humans.
6. Describe incomplete dominance with a suitable example.
7. Describe Co-dominance with a suitable example.
8. What is epistasis? Give a detailed account of double dominant epistasis.
9. What is epistasis? Give a detailed account of recessive epistasis.
10. What is epistasis? Give a detailed account of dominant epistasis
11. What is epistasis? Give a detailed account of double recessive epistasis.
12. Explain the pattern of inheritance of recessive and dominant lethal alleles.
13. Explain the inheritance of multiple alleles with the help of a suitable example.
14. Describe polygenic inheritance with reference to skin colour and eye colour in man.
15. Compare and contrast pleiotropy and polygenic inheritance.
16. Explain the phenomenon of linkage with respect to Morgan's Experiment. Add a note on the differences between complete and incomplete linkage.
17. Describe the pattern of inheritance of blood group and Rh factor in man.
18. Explain the cytological basis and molecular mechanisms of crossing over.
19. Explain pedigree analysis of X-linked recessive traits.

Unit :1 (5 Marks)

1. Describe the classical concept of gene.
2. Explain the modern concept of gene.
3. Differentiate between (Any two):
   (a) Genotype and phenotype of an organism
   (b) Dominant and recessive traits

(c) Gene and genome
(d) Homozygous and heterozygous
(e) Monohybrid and dihybrid cross
(f) Incomplete Dominance and co-dominance
(g) Multiple alleles and polygenes
(h) Test cross and backcross

4. Explain how probability is used to predict the results of genetic crosses.
5. Write a note on the chromosome theory of inheritance.
6. Describe co-dominance with a suitable example.
7. Give an account of the symbols used in human Pedigree analysis
8. Characteristics of autosomal dominant traits
9. Characteristics of X-linked recessive traits
10. Characteristics of autosomal recessive traits
11. Characteristics of X-linked dominant traits
12. Intermediate lethal alleles
13. Phenylketoneuria
14. Albinism
15. Explain the inheritance of skin colour in humans.
16. Write a note on pleiotropy.

Unit: 2 (10 Marks).

1. Explain the structure of eukaryotic Chromosome.
2. Classify chromosomes on the basis of position of centromere.
3. Explain any two mechanisms of chromosomal basis of sex determination.
4. Explain the inheritance of colour blindness in man.
5. Explain sex determination in man/ Honey bee/ Birds/ Drosophila.

Unit: 2 (05 Marks)

1. Describe the terms euchromatin and heterochromatin.
2. Write a note on polytene chromosomes.
3. Write a note on Lampbrush chromosomes.
4. Write a note on salivary gland chromosome of Drosophila,
5. Write a note on Balbiani rings.
6. Explain endomitosis.
7. Write a note on Gyanandromorphs
8. Explain the role of environment on sex determination.
9. Explain the role of hormones in sex determination.
10. Explain hypertrichosis.
11. Differentiate between sex linked and sex influenced genes.

12. Differentiate between human X and Y chromosome.
13. Differentiate between autosomes and sex chromosomes.
14. Write a note on Lyons hypothesis.
15. What are Barr bodies? Give a scientific reason that Barr bodies are present only in women and not in men.
16. Give a scientific reason that Y chromosome is a sex determining chromosome in man.
17. Explain parthenogenesis.
18. Give scientific reason that the X linked genes affect males more than females in human beings.
19. What is centromere? Explain its role during cell division.

Unit: 3 (10 marks)

1. Describe Griffith transformation experiment.
2. Explain Avery, Macleod, McCarty's experiment
3. Give an account of Hershey Chase experiment of bacteriophage infection.
4. Write a note on types of DNA.
5. Explain RNA as a genetic material.
6. Describe the process of DNA replication
7. Write in detail the process of transcription
8. Discuss the process of translation
9. What is gene expression? Describe the regulation of genes with Lac operon.

Unit 3: (5 Marks)

Write short notes on –

1. Chemical composition of nucleic acid
2. A and B DNA
3. Plasmid
4. Function of mRNA
5. Function of tRNA
6. Genetic code
7. One gene one enzyme hypothesis
8. Concept of operon
9. Z DNA
10. H DNA
11. Chromosomal DNA in prokaryotes
12. Mitochondrial DNA
13. DNA in chloroplast

MODEL QUESTION BANK SEMESTER III

USZO302 (COURSE VI)

Question bank is suggestive. The paper setters are free to modify the questions or include new questions to the best of their perception

Unit 1: (05 Marks)

1. Write a note on nutrition apparatus in amoeba.
2. Describe briefly gastro-vascular cavity in hydra.
3. Explain briefly digestive system of earthworm.
4. Explain briefly digestive system of cockroach.
5. Explain briefly digestive system in bivalve.
6. Write a note on Wheel organ of Amphioxus.
7. Explain briefly digestive system of pigeon.
8. Write a note on ruminant stomach.
9. Explain briefly physiology of digestion in cockroach.
10. Write short note on digestion of proteins with respect to man.
11. Write short note on digestion of carbohydrates with respect to man
12. Write short note on digestion lipids with respect to man
13. Give a brief account of enzymes involved in the process of digestion in cockroach
14. Write short note contractile vacuoles as excretory and osmoregulatory structures in protozoa.
15. Write a note on flame cells.
16. Describe the structure of septal nephridia with the help of a neat labeled diagram.
17. Write a note on nephridia as excretory organs in earthworm.
18. Describe briefly excretory and osmoregulatory structures in arthropods.
19. Write a note on Organ of Bojanus
20. Write a note on structure of kidney in fish.
21. Write a note on structure of amphibian kidney.
22. Write a note on structure of kidney in bird.
23. Write a note on structure of mammalian kidney.
24. Write a note on Ammonotelic organisms.
25. Write a note on Ureotelic organisms.
26. Write a note on Uricotelic organisms.
27. Write a note on ultrafiltration
28. Give a brief account of process of urine formation in man.

Unit 2: (10 Marks)

1. Describe briefly air sacs in pigeon.
2. Describe briefly the process of internal respiration with respect to man
3. Describe briefly the process of external respiration with respect to man
4. Give a brief account of types of circulating fluids present in animals.
5. Describe briefly mechanism of working of heart.
6. Describe briefly two chambered heart in shark.
7. Describe briefly structure of heart of frog.
8. Describe briefly heart of crocodile.
9. Give a brief account of heart of man.

Unit 2: (5 Mark)

1. Write short note on cutaneous respiration.
2. Write a note on Spiracle in cockroach.
3. Write a note on book lungs in spider.
4. Explain the structure of gills of bony fish
5. Explain the structure of gills of cartilaginous fish.
6. Describe briefly lungs as respiratory organs in frog.
7. Describe briefly lungs as respiratory organs in man.
8. Explain briefly accessory respiratory structure in *Anabas*.
9. Write short note on open circulation.
10. Write short note on closed circulation.
11. Write a note on heart of cockroach
12. Write a note on heart of earthworm.

Unit 3:(10 Marks)

1. Describe different types of neurons on the basis of structure and function.
2. Explain conduction of nerve impulse.
3. Briefly describe synaptic transmission.
4. Describe briefly hormones as chemical messenger.
5. Explain briefly feedback mechanism of hormone regulation.
6. Explain sol-gel theory of amoeboid movement.
7. Describe ciliary movement in *Paramecium*.
8. Give an account on types of wings in insects.
9. Explain types of fins in Pisces.
10. Describe sliding filament theory.
11. Describe briefly asexual reproduction in animals.
12. Describe the structure and function of tube feet.
13. Describe spermatogenesis.

14. Describe oogenesis.
15. Describe briefly the structure of mammalian gametes.
16. Give an account on types of fertilization.

Unit 3: (5 Marks)

1. Write a note on irritability in *Paramecium*
2. Write a note on resting potential of nerve membrane.
3. Write a note on action potential of nerve membrane.
4. Describe different types of neurons on the basis of structure.
5. Describe briefly different types of neurons on the basis of functions.
6. Describe the structure of synapse.
7. Write a note on striated muscle fibre.
8. Describe the structure of cilia.
9. Give an account on types of legs in insects.
10. Write a note on ovo-viviparity.
11. Write a note on viviparity.
12. Write a note on oviparity.
13. Describe the structure of mammalian egg.
14. Describe the structure of mammalian sperm.
15. Describe the formation of gemmule in sponges.
16. Write a note on budding as asexual reproduction in mammals

MODEL QUESTION BANK SEMESTER III

USZO303 (COURSE VII)

Question bank is suggestive. The paper setters are free to modify the questions or include new questions to the best of their perception

Unit 1: (5 Marks)

1. How do honey bees communicate for foraging?
2. What is classical conditioning? Explain with an example.
3. What is imprinting? Explain different types of imprinting.
4. What do you mean by learning? Describe any two types of learning.
5. Describe the various ways in which ants communicate.
6. What is the significance of mimicry and warning coloration?
7. What is mimicry? Explain different types of mimicry with examples.
8. What is displacement activity? In what situations do displacement activities occur? Explain with examples.
9. Write notes on:

i. Migration in Fish
ii. Territorial behavior
iii. Schooling behavior in fish
iv. Altruism and kinship

10. Which are the different types of social groups seen in non human primates?
11. Comment on any two aspects of non human primate social behavior.

Unit 2: (10 Marks)

1. Give an account of the life history and pathogencity of the parasite causing amoebic dysentery.
2. Describe in detail part of life cycle of *P.vivax* in mosquito.
3. Give an account of asexual cycle of *P.vivax* in man.
4. Describe the life history of *Taenia solium*.
5. Give an account of parasitic adaptive features of *Taenia solium*.
6. Give an account of the life history of *Fasciola hepatica.*
7. Give an account of the life history of filarial worm and discuss its pathogenic effects.
8. Describe the life history of bedbug and suggest some control measures.
9. Give an account of the life history of *Sarcoptes scabiei.*
10. Give an account of the life history of head louse *Pediculus.*
11. What is bird flu? How is it spread and what are its symptoms?
12. How would you control the transmission of anthrax among humans?
13. How is anthrax transmitted to man?

Unit 2: (5 Marks)

1. Describe the structure of *E. histolytica.*
2. Where is *E. histolytica* found and what disease does it cause?
3. Write a short note on pathogenecity of *E. histolytica*.
4. Briefly describe the life cycle of *E. histolytica*.
5. What are the symptoms of malaria? Write its control measures.
6. Give an account of symptoms and pathogenecity of *Plasmodium vivax.*
7. Illustrate the complete life history of *T. solium* with the help of diagram only.
8. What is the effect of *Fasciola* on the hosts?
9. What are the primary and secondary hosts of *Wuchereria bancrofti*? Which stage of *Wuchereria* is infective for man?
10. What is host specificity?
11. What are the signs and symptoms of bird flu?
12. How is rabies transmitted?
13. What are the preventive measures to be taken to prevent infection of rabies virus?
14. What is toxoplasmosis and what are its causes?
15. Write notes on:
    i. Parasitic adaptations in endoparasites

ii. Cysticercus or bladder worm.
iii. Pathogenecity of *Wuchereria*
iv. Control measures of bedbug.
v. Types of hosts

Unit 3: (10 Marks)

1. What does the modern method of apiculture include? Explain in brief.
2. How is an artificial bee hive constructed?
3. How do you select the flora and bee species for apiculture?
4. What are the benefits of vermiculture?
5. Describe any two methods of vermiculture.
6. How is raw milk processed?
7. What are the common adulterants of milk in India?

Unit 3: (5 Marks)

1. State the economic importance of honey and beeswax.
2. What are the disadvantages of the indigenous method of apiculture?
3. How does the wax moth cause damage to the honey comb?
4. Name any two bee enemies and explain how they harm the bees.
5. Give an account of the commonly found species of honey bee in India.
6. What are the advantages of the modern method of apiculture?
7. Which type of flora is beneficial for apiculture?
8. Which type of bee is suitable for apiculture?
9. What is the chemical composition of honey?
10. What is the suitable material for culturing earthworms?
11. What are the advantages of processing dairy products?
12. What is skimmed milk and toned milk? How are they prepared?
13. How is recombined milk prepared?

PRACTICAL
USZOP3 (Course V)
Skeleton-Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Major Question 15 marks

Q1. Extraction and detection of DNA
OR
Q1. Extraction and detection of RNA

Minor Question 07 marks

Q2. Mounting of Barr bodies
OR
Q2. Study of mitosis-Temporary squash preparation of Onion root tip
OR
Q2. Detection of blood groups and Rh factor

Q3. Problems on Genetics and Molecular biology (Transcription /Genetic code) 10 marks
(01 problem each)

Q4. Identification 08 marks
a. Chromosome morphology
b. Pedigree analysis

Q5. Viva and Journal 10 marks

PRACTICAL
USZOP3 (Course VI)
Skeleton-Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Major Question 15 marks

Q1. Urine analysis—Normal and abnormal constituents

Minor Question 10 marks

Q2. Detection of ammonia in water excreted by fish
OR
Q2. Detection of uric acid from excreta of Birds

Q3. Identification 15 marks
- c. Nutritional apparatus
- d. Respiratory structures
- e. Locomotory organs
- f. Study of hearts
- g. Permanent slides on reproduction

Q4. Viva 05 marks

Q5. Journal 05 marks

PRACTICAL
USZOP3 (Course VII)
Skeleton -Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Major Question 12 marks

Q1. Extraction of Casein from Milk and its qualitative estimation

OR

Q1. Preparation of paneer from the given milk sample.

OR

Q1. Measurement of density of milk using different samples by lactometer

Minor Question 08 marks

Q2. Life Cycle of Honey Bee and Bee Hive

OR

Q2. Mouthparts of Honey Bee

OR

Q2. Legs of Honey Bee

OR

Q2. Sting Apparatus of Honey Bee

Q3. Identifiy and describe as per instructions 15 marks

a. Ethology
b. Protozoan parasites
c. Helminth parasites
d. Ectoparasites
e. Parasitic adaptations

Q4. Project submission and Viva based on project 10 marks

Q5. Journal 05 marks

	SEMESTER IV		
	USZO401 COURSE-8		
	Origin and evolution of Life, Population genetics and evolution, Scientific Attitude methodology , writing and ethics		
	Unit 1 : Origin and evolution of Life	**15L**	**30hrs**
	Objective : ➢ *To impart scientific knowledge to the learner about how life originated and evolved on our planet.*		
	Desired Outcomes : ➢ *Learner will gain insight about origin of life.* ➢ *Learner will know about the different theories of evolution.*		
1.1	**Introduction.** ➢ Origin of universe ➢ Chemical evolution - Miller-Urey experiment, Haldane and Oparin theory ➢ Origin of life ➢ Origin of eukaryotic cell.	**5L**	**10hrs**
1.2	**Evidences in favour of organic evolution** ➢ Evidences from: Geographical distribution, Paleontology Anatomy, Embryology, Physiology and Genetics.	**4L**	**8hrs**
1.3	**Theories of organic evolution** ➢ Theory of Lamarck. ➢ Theory of Darwin and Neo Darwinism ➢ Mutation Theory ➢ Modern Synthetic theory ➢ Weismans germplasm theory ➢ Neutral theory of molecular evolution	**6L**	**12hrs**
	Unit 2: Population genetics and evolution	**15L**	**28hrs**
	Objective: ➢ *To develop learner's knowledge and understanding of genetic variability within a population and how the change in the gene pool leads to evolution of species.*		
	Desired Outcomes: ➢ *Learner would understand the forces that cause evolutionary changes in natural populations.* ➢ *Learner would comprehend the mechanisms of speciation*		

	➢ *Learner will be able to distinguish between microevolution, macroevolution and megaevolution*		
2.1	**Introduction to population genetics**	**1L**	**3hrs**
	➢ Definition		
2.1.1	**Brief explanation of the following terms:** ➢ Population, gene pool, Allele frequency, genotype frequency, phenotype frequency, microevolution		
2.2	**Population genetics**	**6L**	**10hrs**
2.2.1	➢ Hardy-Weinberg Law		
2.2.2	➢ Factors that disrupt Hardy Weinberg equilibrium- ➢ Mutation, ➢ Migration (Gene flow), ➢ Non-random mating (Inbreeding, inbreeding depression, Assortative mating-Positive and Negative, Disassortative mating), ➢ Genetic drift (Sampling error, fixation, Bottleneck effect and Founder effect) ➢ Natural Selection.		
2.2.3	**Patterns of Natural Selection** ➢ Stabilizing selection, ➢ Directional Selection (Examples: Peppered moth, Antibiotic resistance in bacteria, Pesticide resistance) ➢ Disruptive selection		
2.3	**Evolutionary genetics** ➢ **Genetic variation:** Genetic basis of variation-Mutations and Recombination (crossing over during meiosis, independent assortment of chromosomes during meiosis and random union of gametes during fertilization). ➢ Nature of genetic variations- Genetic polymorphism, Balanced polymorphism, Mechanisms that preserve balanced polymorphism-Heterozygote advantage and frequency dependent selection, ➢ Neutral variations. ➢ Geographic variation (Cline).	**8L**	**15hrs**
2.3.1	➢ **Species Concept:** Biological species concept and evolutionary species concept		

2.3.2	**Speciation and Isolating mechanisms**: ➢ Definition and Modes of speciation (Allopatric, Sympatric , Parapatric and Peripatric) ➢ Geographical isolation ➢ Reproductive isolation and its isolating mechanisms (Prezygotic and Postzygotic)		
2.3.3	**Macroevolution and Megaevolution :** ➢ Concept and Patterns of macroevolution (Stasis, Preadaptation /Exaptation, Mass extinctions, Adaptive radiation and Coevolution), ➢ Megaevolution		
	Unit 3: Scientific Attitude methodology , writing and ethics	**15L**	**32hrs**
	***Objective*:** ➢ *To inculcate scientific temperament in the learner.*		
	Desired outcome: ➢ *The learner will develop qualities such as critical thinking and analysis.* ➢ *The learner will develop the skills of scientific communication.* ➢ *Learner will understand the ethical aspects of research*		
3.1	**Process of science: A dynamic approach to investigation**	**4L**	**10hrs**
	The Scientific method ➢ Deductive reasoning and inductive reasoning, Critical thinking, Role of chance in scientific discovery		
	Scientific Research ➢ Definition, difference between method and methodology characteristics, types		
	Steps in the Scientific Method ➢ Identification of research problem, Formulation of research hypothesis, Testing the hypothesis using experiments or surveys, Preparing research/study design including methodology and execution (Appropriate controls, sample size, technically sound, free from bias, repeat experiments for consistency), Documentation of data, Data analysis and interpretation, Results and Conclusions		
	Dissemination of data ➢ Reporting results to scientific community (Publication in peer-reviewed journals, thesis, dissertation, reports, oral presentation, poster presentation)		
	Application of knowledge ➢ Basic research, Applied research, Translational research,		

	Patent		
3.2	**Scientific writing**	**4L**	**10hrs**
	Structure and components of a research paper ➢ (Preparation of manuscript for publication of research paper)- Title, Authors and their affiliations, Abstract, Keywords and Abbreviations, Introduction, Material and Methods, Results, Discussion, Conclusions, Acknowledgement, Bibliography; Figures, Tables and their legends		
3.3	**Writing a review paper**	**3L**	**5hrs**
	Structure and components of research report: ➢ Report writing, Types of report		
	Computer application ➢ Plotting of graphs, Statistical analysis of data. Internet and its application in research-Literature survey, Online submission of manuscript for publication		
3.4	**Ethics**	**3L**	**5hrs**
	Ethics in animal research ➢ The ethical and sensitive care and use of animals in research, teaching and testing, Approval from Institutional animal ethics Committee.		
	Ethics in clinical research ➢ Approval from Clinical Research Ethics Committee ➢ Informed consent		
	Approval from concerned/ appropriate authorities : ➢ National Biodiversity Authority ➢ State Biodiversity Board ➢ Forest Department		
	Conflict of interest		
3.5	**Plagiarism**	**1L**	**2hrs**
	USZO402 COURSE-9		
	Cell Biology, Endo membrane System and Biomolecules		
	Unit 1 : Cell Biology	**15L**	**26hrs**
	***Objective* :** ➢ *To study the structural and functional organization of cell with an emphasis on nucleus, plasma membrane and cytoskeleton.*		
	***Desired outcome* :** ➢ *Learner would acquire insight of transport mechanisms*		

	for maintenance and composition of cell		
1.1	**Introduction to cell biology** ➢ Definition and scope ➢ Cell theory ➢ Generalized prokaryotic , eukaryotic cell: size, shape and structure	**2L**	**4hrs**
1.2	**Nucleus** ➢ Size, shape, number and position ➢ Structure and functions of interphase nucleus ➢ Ultrastructure of nuclear membrane and pore complex ➢ Nucleolus: general organization, chemical composition and functions ➢ Nuclear sap/ nuclear matrix ➢ Nucleocytoplasmic interactions	**5L**	**6hrs**
1.3	**Plasma membrane** a. Fluid Mosaic Model b. Junctional complexes c. Membrane receptors d. Modifications: Microvilli, Desmosomes and Plasmodesmata.	**4L**	**8hrs**
1.4	**Transport across membrane** **a.** Diffusion and Osmosis **b.** Transport: Passive and Active **c.** Endocytosis and Exocytosis	**2L**	**4hrs**
1.5	**Cytoskeletal structures** ➢ Microtubules: Composition and functions ➢ Microfilaments: Composition and functions	**2L**	**4hrs**
	Unit 2 Endomembrane System	**15L**	**25hrs**
	Objective **:** ➢ *To acquaint the learner with Ultrastructure of cell organelles and their functions.*		
	Desired outcome: ➢ *Learner would appreciate the intricacy of endomembrane system.* ➢ *Learner would understand the interlinking of endomembrane system for functioning of cell.*		
2.1	**Endoplasmic reticulum** ➢ Discovery, occurrence and Types ➢ Ultrastructure and Functions	**3L**	**5hrs**

2.2	**Golgi complex** ➢ Origin, occurrence and morphology ➢ Ultra structure and functions	**3L**	**4hrs**
2.3	**Lysosomes** ➢ Origin, occurrence and polymorphism ➢ Ultrastructure and Functions	**3L**	**4hr**
2.4	**Mitochondria** ➢ Origin, occurrence and morphology ➢ Ultrastructure and functions ➢ Marker enzymes, Mitochondrial biogenesis, Semiautonomous nature of mitochondria	**6L**	**12hrs**
	Unit 3: Biomolecules	**15L**	**30hrs**
	***Objective* :** ➢ *To give learner insight into the structure of biomolecules, and their role in sustenance of life.*		
	Desired outcome: ➢ *The learner will realize the importance of biomolecules and their clinical significance.*		
3.1	**Biomolecules** ➢ Concept of Micromolecules and Macromolecules**.**	2L	5hrs
3.2	**Carbohydrates** ➢ Definition Classification, Properties and Isomerism, Glycosidic bond ➢ Structure of a. Monosaccharides- Glucose and Fructose b. Disaccharides - Lactose and Sucrose c. Polysaccharides - Cellulose, Starch, Glycogen and Chitin ➢ Biological role and their Clinical significance	4L	8hrs
3.3	**Amino Acids and Proteins** ➢ Basic structure of amino acid, classification of amino acids , Essential and Non-essential amino acids, Peptide bond ➢ Protein conformation : Primary, Secondary, Tertiary, Quaternary ➢ Types of proteins – Structural (Keratin, Collagen) and functional proteins (Hemoglobin) ➢ Biological role and their Clinical significance	5L	8hrs

3.4	**Lipids** ➢ Definition, classification of lipids with examples, Ester linkage ➢ Physical and Chemical properties of lipids ➢ Saturated and Unsaturated fatty acids , Essential fatty acids ➢ Triacylglycerols, Phospholipids (Lecithin and Cephalin) and Steroids (Cholesterol). ➢ Biological role and their Clinical significance	4L	5hrs
3.5	**Vitamins** ➢ Water soluble vitamins(e.g. Vit C, Vit B12) ➢ Lipid soluble vitamins (e.g. Vit A, Vit D) ➢ Biological role and their Clinical significance	2L	4hrs
	USZO403 COURSE-10		
	Comparative Embryology, Aspects of Human Reproduction, Pollution and its effect on organisms		
	UNIT 1: Comparative Embryology	**15L**	**25hrs**
	Objective: ➢ *To acquaint the learner with key concepts of embryology.*		
	Desired Outcomes: ➢ *Learner will be able to understand and compare the different pre- embryonic stages* ➢ *Learner will be able to appreciate the functional aspects of extra embryonic membranes and classify the different types of placentae.*		
1.1	➢ Types of Eggs- Based on amount and distribution of yolk	2L	4hrs
1.2	➢ Structure and Types of Sperms	1L	1hr
1.3	➢ Types of Cleavages.- Holoblastic and Meroblastic	1L	3hrs
1.4	➢ Types of Blastulae	1L	3hrs
1.5	➢ Gastrulation	2L	4hrs
1.6	➢ Coelom -Formation and types	2L	3hrs
1.7	➢ Extra embryonic membranes ➢ Types of Placentae -Based on histology, morphology and implantation	6L	10hrs
	UNIT 2: Aspects of Human Reproduction	**15L**	**30 hrs**
	Objectives: ➢ *To acquaint the learners with different aspects of human reproduction.* ➢ *To make them aware of the causes of infertility, techniques to overcome infertility and the concept of birth control*		
	Desired Outcome:		

	➢ *Learners will able to understand human reproductive physiology* ➢ *Learners will become familiar with advances in ART and related ethical issues.*		
2.1	**Human Reproductive system and Hormonal regulation** ➢ Anatomy of human male and female reproductive system ➢ Hormonal regulation of Reproduction and Impact of age on reproduction-Menopause and Andropause	2L	4hrs
2.2	**Contraception & birth control** ➢ Difference between contraception and birth control ➢ Natural Methods: Abstinence , Rhythm method, Temperature method, cervical mucus or Billings method, Coitus interruptus, Lactation amenorrhea ➢ Artificial methods **:** Barrier methods, Hormonal methods, Intrauterine contraceptives, Sterilization, Termination , Abortion	2L	4hrs
2.3	**Infertility** **Female infertility** ➢ **Causes -** Failure to ovulate; production of infertile eggs ; damage to oviducts (oviduct scarring and PID or Pelvic inflammatory disease, TB of oviduct), Uterus (T. B. of uterus and cervix) ➢ **Infertility associated disorders (**Endometriosis, Polycystic Ovarian syndrome (PCOS), POF (Primary ovarian failure) STDs (Gonorrhea, Chlamydia, Syphilis and Genital Herpes); Antibodies to sperm; Genetic causes-Recurrent abortions; Role of endocrine disruptors	4L	8hrs
	Male infertility **Causes :** Testicular failure, infections of epididymis, seminal vesicles or prostate, hypogonadism, cryptorchidism , congenital abnormalities ,Varicocele , Blockage, Azoospermia, Oligospermia, abnormal sperms, autoimmunity, ejaculatory disorders and Idiopathic infertility.		
2.5	**Treatment of Infertility** ➢ Removal /reduction of causative environmental factors ➢ Surgical treatment ➢ Hormonal treatment- Fertility drugs ➢ Assisted Reproductive Technology ➢ Sperm banks, cryopreservation of gametes and embryos ➢ Surrogacy	4L	8hrs

2.6	**Techniques and Ethical considerations of ART** ➢ In vitro fertilization, Embryo transfer (ET), Intra-fallopian transfer (IFT), Intrauterine transfer (IUT), Gamete intra-fallopian transfer (GIFT), intra-zygote transfer (ZIFT), Intracytoplasmic sperm injection (ICSI) with ejaculated sperm and sperm retrieved from testicular biopsies – Testicular sperm extraction (TESE), Pronuclear stage transfer (PROST).	3L	6hrs
	UNIT3: Pollution and its effect on organisms	**15L**	**27hrs**
	***Objective*:** ➢ *To provide a panoramic view of impact of human activities leading to pollution and its implications.*		
	Desired Outcome : ➢ *The learners will be sensitized about the adverse effects of pollution and measures to control it.*		
3.1	**Air Pollution** ➢ Types and sources of air pollutants ➢ Effects and control measures	3L	6hrs
3.2	**Water Pollution** ➢ Types and sources of water pollutants ➢ Effects and control measures	3L	6hrs
3.3	**Soil Pollution** ➢ Types and sources of soil pollutants ➢ Effects and control measures	3L	4hrs
3.4	**Noise pollution** ➢ Different means of noise pollution ➢ Effects and control measures	1L	3hrs
3.5	**Radioactive pollution**	1L	2hrs
3.6	**Solid waste Pollution** ➢ Types and sources, ➢ Effects and control	2L	4hrs
3.7	**Pollution – Climate change and Global warming**	2L	2hrs

	SEMESTER IV
	Practical USZOP4 (Course VIII)
1	Study of population density by Line transect method & Quadrant method and calculate different diversity indices. a. Index of Dominance. b. Index of frequency. c. Rarity Index. d. Shannon Index. e. Index of species diversity
2	Study of Prokaryotic cells (bacteria) by Crystal violet staining technique.
3	Study of Eukaryotic cells (WBCs) from blood smear by Leishman's stain.
4	Identification and study of fossils a. Arthropods : Trilobite b. Mollusca: Ammonite c. Aves : Archaeopteryx
5	Identification of a) Allopatric speciation (Cyprinodon species) b) Sympatric speciation.(hawthorn fly and apple maggot fly) c) Parapatric speciation. (Snail)
6	Bibliography/ Abstract writing.
7	Preparation of Power point presentation
	Practical USZOP4 (Course IX)
1	Study of permeability of cell through plasma membrane (Osmosis in blood cells).
2	Measurement of cell diameter by occulometer (by using permanent slide)
3	Qualitative tests for carbohydrates (Molisch's test, Benedicts test, Barfoed's test, Anthrone test)
4	Qualitative tests for protein (Ninhydrin test, Biuret test, Millon's test, Xanthoproteic test)
5	Qualitative test for lipids (solubility test, Sudan III test)
6	Study of rancidity of lipid by titrimetric method.
7	Ultra structure of cell organelles – (Electron micrographs) a. Nucleus

	b. Endoplasmic reticulum (Smooth and rough) c. Mitochondria. d. Golgi apparatus e. Lysosomes
8	Study of clinical disorders due to carbohydrates, proteins and lipids imbalance.(photograph to be provided / significance to given and disorder to be identified) a. Hyperglycemia , Hypoglycemia. b. Thalessemia, Kwashiorkar c. Obesity, Atherosclerosis
	Practical USZOP4 (Course X)
1	Estimation of Dissolved oxygen from the given water sample .
2	Estimation of Salinity by refractometer from the given water sample.
3	Estimation of conductivity by conductometer from the given water sample .
4	Determination of blood pressure by spyghmomanometer.
5	Detection of Creatinine in urine.
6	Determination of blood sugar by GOD and POD method
7	Study of bleeding time and clotting time.
8	Study of the following permanent slides, museum specimens and materials. a. Mammalian sperm and ovum. b. Egg types –Fish eggs, Frog eggs , Hen's egg. c. Cleavage , blastula and gastrula (Amphioxus, Frog and Bird).
9	Study of commercially important fishery (Catla, Rohu, Catfish, Mackerel, Pomfret, Bombay duck, Prawn/ Shrimp, Crab, Lobster, Edible oyster)
10	Review writing based on programmes telecast by Doordarshan, Discovery channel, Gyandarshan, UGC programmes, Animal planet
11	Study of natural ecosystem and field report of the visit

Note -The practicals may be conducted by using specimens authorised by the wildlife and such other regulating authorities though it is strongly recommended that the same should be taught by using photographs/audio-visual aids/ simulations / models, etc. as recommended by the UGC and as envisaged in the regulations of the relevant monitoring bodies. No new specimens, however, shall be procured for the purpose of conducting practicals mentioned here-in-above.
#There shall be at least one excursion/field trip

Semester IV

REFERENCE AND ADDITIONAL READING

COURSE-VIII (USZO401)

1. Theory of Evolution- Smith, Cambridge Press, and Low price Ed.
2. Evolution - Strickberger, CBS publication
3. Evolution- P.S.Verma and Agarwal
4. Introduction to Evolution by Moody
5. Biology. E. P. Solomon, L. R. Berg, D. W. Martin, Thompson Brooks/Cole
6. Biology -The Unity and Diversity of Life**.** C. Starr, R. Taggart, C. Evers, L. Starr, Brooks/Cole Cengage learning International Edition
7. Research Methodology, Methods and Techniques- by C.R. Kothari, Wiley Eastern Ltd. Mumbai
8. Practical research planning and design 2nd edition- Paul D Leedy, Macmilan Publication

COURSE-IX (USZO402)

1. Cell Biology by Singh and Tomoar Rastogi Publication..
2. Cell and molecular Biology E.D.P De Robertis and E.M.R Robertis ,CBS Publishers and Distributors
3. The cell A molecular Approach Goeffrey M.Coper ASM Press Washington D.C.
4. A textbook of cytology Suruchi Tyagi Dominant Publishers and Distributors New Delhi.
5. Cell and molecular biology Gupta P.K , Rastogi Publication, India.
6. Cell Biology Pawar C.B. Himalaya publication
7. Molecular Biology of the cell (6th ed) by the Insertus
8. Campbell Biology (9th Ed.)
9. Principles of Biochemistry, 2005, 2nd and 3rd edn. Lehninger A.L. Nelson D.L. and Cox M.M ,
10. Biochemistry, Dushyant Kumar Shrma, 2010, Narosa Publishing house PVT.Ltd.
11. Fundamentals of Biochemistry, Dr AC Deb, 1983, New Central Book Agency Ltd.
12. A Textbook of Biochemistry, 9th edition , Dr. Rama Rao A.V.S.S and Dr A Suryalakshmi.
13. Biochemistry-G Zubay , Addison Wesley, 1983
14. Biochemistry, L Stryer, 3rd/4th/5th ed, 1989 , Freeman and Co. NY
15. Harper's Biochemistry,1996, 26th edition, Murray R.K. Granner D.K. Mayes P.A. Rodwell V.M. Hall international USA
16. Outline of Biochemistry, 1976, E.E. Conn and P.K. Stumpf. John Wiley and Sons USA

COURSE-X (USZO403)

1. Developmental Biology- 5th Edition, Scot F. Gilbert, Sinauer Associates Inc.
2. Developmental Biology- Subramoniam T., Narosa Publishers.
3. Developmental Biology- Berril N.J., Tata Mc Graw –Hill Publication.
4. Essential Reproduction-Martin H. Johnson, Wiley-Blackwell Publication.
5. Chick Embryology- Bradley M. Pattern.
6. Embryology- Mohan P. Arora.
7. Chordate Embryology- Dalela,Verma and Tyagi
8. Human Anatomy and Physiology. E. L. Marieb, Pearson Education Low Price Edition
9. Biological Science. Taylor, Green and Stout. Cambridge Publication
10. Biology. E. P. Solomon, L. R. Berg, D. W. Martin, Thompson Brooks/Cole
11. Human Biology-Daniel D Chiras Jones and Bartlett
12. The Physiology of Reproduction Vol I & II - E.K .Nobil and JU. D.Neil, Raven Press, New York.
12. Air Pollution, Kudesia V.P. Pragati Prakasan, Meerut
13. Fundamentals of Air Pollution Daniel A. Vallero,Academic press 5th Edition
14. Principles and Practices of Air Pollution Control and Analysis J.R. Mudakani I K International Pub. House Pvt. Ltd.
15. Text Book of Air Pollution and its Control, S.C.Bhatia Atlantic
16. Water Pollution, Kudesia V.P., Pragati Prakasan, Meerut
17. A text book of Environmental Chemistry and Pollution Control, S.S.Dogra, Swastic Pub, New Delhi
18. Practical Methods for water and Air Pollution Monitoring,S.K.Bhargava,New Age International
19. Hand Book of Water and waste water Analysis, Kanwaljit Kaur, Atlantic
20. Aquatic Pollution by Edward A. Laws
21. Environmental Science and Technology, Stanely E.Manahan
22. Environmental Chemistry, A.K. De, New Age International
23. A Text Book of Environmental Studies, Gurdeep R.Chatwal, Harish Sharma, Madhu Arora, Himalaya

SCHEME OF EXAMINATION (THEORY)

(a) Internal assessment of twenty five (25) marks per course per semester should be conducted according to the guidelines given by University of Mumbai vide circular number UG/04 of 2014 Dated 5th June 2014 to be implemented from academic year 2015-16.
(b) External assessment of seventy five (75) marks per course per semester should be conducted as per the following skeleton question paper pattern.
(c) One practical examination of fifty (50) marks per course each should be conducted at the end of every semester.

SKELETON- EXAMINATION PATTERN FOR THE ABOVE SYLLABUS

All Questions are compulsory
Figures to the right indicate full marks

Time: 2.5 hours **Total marks: 75**

Q.1.	UNIT 1 Answer any four out of eight (5 marks each)	20 marks
Q.2.	UNIT 2 a. Answer any one of the two (10 marks) b. Answer any two out of the four (5 marks each)	20 marks
Q.3.	UNIT 3 Answer any two out of four (10 marks each)	20 marks
Q.4.	a. Unit 1 - (One note of five marks OR objective type questions) b. Unit 2 - (One note of five marks OR objective type questions) c. Unit 3- (One note of five marks OR objective type questions)	15 marks

*For Question 4 it is recommended to have objective questions such as –

(a) Match the column (b) MCQ
(c) Give one word for (d) True and False
(e) Define the term (f) Answer in one sentence etc

MODEL QUESTION BANK SEMESTER IV

USZO401(COURSE VIII)

Question bank is suggestive. The paper setters are free to modify the questions or include new questions to the best of their perception

Unit 1: (10 Marks)

1. Write explanatory notes on;
    1. Lamarckism. 2. Darwinism and Neo Darwinism.
    3. Mutation Theory 4. Modern Synthetic theory.5.Weismans germplasm theory
2. Neutral theory of molecular evolution. (Some of them can be asked as short notes as well)
3. Discuss evidences in favor of organic evolution by giving examples of geographical distribution.
4. Discuss evidences in favor of organic evolution by giving examples of genetics, and molecular biology.
5. Discuss evidences in favor of organic evolution by giving examples of physiology and biochemistry.
6. Discuss brief account of Origin of eukaryotic cell.

Unit 1: (5 Marks)

1. Describe chemical evolution with Miller-Urey experiment.
2. Describe chemical evolution with Haldane and Oparin theory.
3. Write short notes on: 1. Mutation Theory 2. Modern Synthetic theory

Unit 2: (10 Marks)

2. Define the term ‘population genetics’. Describe in brief the various evolutionary forces that tend to disturb genetic equilibrium and introduce changes in the gene pool of a population.
3. State Hardy Weinberg’s law of equilibrium and discuss its salient features.
4. Give an account of the different factors involved in speciation.
5. Describe the different types of speciation.
6. Explain the role of geographic isolation in the development of new species.
7. Explain the role of reproductive isolation in the development of new species.
8. Discuss the pre-zygotic barriers responsible for reproductive isolation.
9. Discuss the post-zygotic barriers which lead to reproductive isolation.
10. Describe the sources of genetic variation in natural populations.
11. Explain the nature and extent of genetic variation within populations.
12. Describe the mechanisms that preserve balanced polymorphisms.

13. Describe the salient features of microevoluion.
14. Compare and contrast microevolution and macroevolution.
15. Explain the salient features of macroevolution.
16. Give an account of the different patterns of macroevolution.
17. Elaborate on the role of adaptive radiation and extinction in macroevolution.
18. What do you understand by the term natural selection? Describe the different types of natural selection with suitable examples.
19. What is megaevolution? Explain the mechanism of megaevolution using a suitable example.

Unit 2: (5 Marks)

1. Explain the term 'gene pool'. How does evolution operate via the gene pools of populations?
2. Differentiate between:
    i. Allopatric and Sympatric speciation
    ii. Biological and evolutionary species
    iii. Microevolution and macroevolution
    iv. Stabilizing selection and disruptive selection
    v. Convergent and divergent evolution
3. Explain stabilizing selection with the help of a suitable example.
4. How does the example of sickle cell allele illustrate heterozygote advantage?
5. How does frequency-dependent selection affect genetic variation within a population over time?
6. Write short notes on:
    i. Role of mutations in evolution
    ii. Role of migration in evolution
    iii. Non-random mating
    iv. Role of natural selection in evolution
    v. Genetic drift
    vi. Bottleneck effect
    vii. Founder effect
    viii. Directional evolution in peppered moth
    ix. Evolution of Antibiotic resistance in bacteria
    x. Geographic variation
    xi. Genetic polymorphism
    xii. Parapatric speciation
    xiii. Adaptive radiation
7. What is the biological species concept? What are its limitations? How does it differ from the evolutionary species concept?
8. Explain the concept of co evolution using suitable examples

Unit 3: (10 Marks)

1. Describe briefly, the steps towards preparing a research design.
2. Describe literature survey, collection of data and its analysis.
3. What is a patent and how is it obtained?
4. Write an account on application of statistics in research.

Unit 3: (5 Marks)

1. Define research. State the difference between research method and research methodology.
2. Write a note on computer application in research.
3. Describe briefly identification of research problem and formulation of research hypothesis.
4. What is abstract writing?
5. What is plagiarism?
6. What is bibliography?
7. Write a short note on ethics in animal research.
8. Write a short note on ethics in clinical research.

MODEL QUESTION BANK SEMESTER IV

USZO402(COURSE IX)

Question bank is suggestive. The paper setters are free to modify the questions or include new questions to the best of their perception

Unit 1: (10 marks)

1. Explain prokaryotic cell
2. Explain Eukaryotic cell
3. Give an account of cell theory
4. Describe ultrastructure of nuclear membrane
5. State chemical composition and functions of nucleolus
6. Describe nucleocytoplasmic reactions
7. Explain r RNA processing
8. Describe fluid mosaic model of plasma membrane
9. Give an account of active and passive transport
10. Describe various modifications of plasma membrane
11. Explain pinacocytosis, phagocytosis and secretion
12. Give an account of cell permeability
13. Differentiate prokaryotic and eukaryotic cell

Unit 1: (5 Marks)

1. Virus
2. Nuclear matrix
3. Number ad position of nucleus
4. Molecular organization of chromatin
5. Unit membrane concept
6. Nucleolus
7. Membrane receptors
8. Sandwich model
9. Cell coat
10. Cell recognition

Unit 2: (10 Marks)

1. Describe Ultrastructure of Endoplasmic Reticulum
2. Describe types of Endoplasmic Reticulum and add a note on their functions
3. Give an account of Ultrastructure and functions of Golgi complex
4. Explain Ultrastructure and morphology of lysosomes
5. Comment on Semiautonomous nature of mitochondria
6. Describe ultrastructure and function of mitochondria
7. Explain protein import in mitochondria
8. Explain ultrastructure of microtubules
9. Describe chemical composition and functions of microfilaments
10. Give an account of biochemical composition and functions of microtubules.

Unit 2: (5 Marks)

1. Occurrence of Endoplasmic Reticulum
2. Significance of Endoplasmic Reticulum
3. Occurrence and morphology of golgi complex
4. Polymorphism in lysosomes
5. Significance of lysosomes
6. Occurrence and morphology of lysosomes
7. Marker enzymes in mitochondria
8. Significance of mitochondria
9. Location and significance of microfilaments
10. Significance of microtubules.

Unit 3 : (10 Marks)

1. Discuss the chemical behavior of carbon and a note on variety of functional groups of biomolecules.
2. Explain the concept of micromolecules and macromolecules.

3. Describe the structure of water. Add a note on physic-chemical properties of water.
4. Define carbohydrate. Add a note on its classification.
5. What are carbohydrates? Explain the classification of carbohydrate with suitable examples.
6. Define and explain the classification of carbohydrates.
7. Explain with suitable example monosaccharide and disssacharide.
8. Discuss the properties of carbohydrates.
9. What are disaccharides? Draw the structures of maltose and sucrose.
10. What are polysaccharides? How are they classified. Write the structures of glycogen and heparin/ chitin and heparin.
11. Discuss about chemical structure of the monosaccharides/ disaccharides
12. What are amino acids? Discuss classification of amino acids based on R group.
13. Give an account of primary and secondary structure of proteins.
14. Write an account on tertiary and quarternary structure of proteins.
15. Describe the structure of saturated and unsaturated fatty acids.
16. Define essential fatty acids. Add a note on it.
17. Define lipids. Write a note on mono, di and triglcrides/ phospholipids
18. What are fatty acids? Add a note on types of fatty acids.
19. Structure and functions of water soluble vitamins
20. Structure and functions of lipid soluble vitamins

Unit 3: (5mks)

1. Write a short note on - monomers and polymers.
2. Write note on properties of carbohydrates.
3. Give an account of polysaccharides.
4. With suitable example explain glycosidic bond.
5. Explain the linkage in lactose and sucrose.
6. Give the biological importance of carbohydrates.
7. What are essential and nonessential amino acids?
8. Give an account of properties of amino acids.
9. Define and explain peptide bond with suitable example.
10. Types of proteins with suitable examples
11. Biological roles of proteins.
12. Peptide bond
13. Types of fatty acids.
14. Biological role of lipids
15. Properties of fatty acid
16. Sterol and waxes
17. Describe properties of fatty acid/lipids

18. Discuss the clinical significance of protein / carbohydrate /lipids/
19. write short note on clinical significance of lipids
20. Write a note on - isomerism in carbohydrates and amino acids?
21. Structure and functions of vitamin A/ vitamin B/ vitamin C/ vitamin D

MODEL QUESTION BANK SEMESTER IV

USZO403(COURSE X)

Question bank is suggestive. The paper setters are free to modify the questions or include new questions to the best of their perception

Unit-1: (10 Marks)

1) Classify the different types of eggs..
2) Briefly explain types and structure of sperms (any two animals).
3) Define cleavage Explain types of cleavages.
4) Give brief account on various types of blastulae.
5) What is gastrulation ? Explain gastrulation in frog.
6) Give an account of process of coelom formation and its types.
7) Explain various types of placentae in mammals.
8) Give an account of extra embryonic membranes.
9) Describe briefly the types of eggs on the basis of amount and distribution of yolk.
10) Describe the early development of mammalian egg upto gastrulation.
11) Give a brief note on different types of sperms.
12) Write a note on blastula and explain its types.
13) Explain the comparative process of embryo formation**.**

Unit-1: (5-Marks)

1) Draw neat labeled diagram and explain any one of the following:
   (Microlecithal, ,Alecithal, Homolecithal, Heterolecithal, Isolecithal, Telolecithal, Centrolecithal, Discoidal).
2) Explain structure of sperms of frog/ reptiles/ birds/ mammals.
3) Short note on Holoblastic cleavage. Or Meroblastic cleavage.
4) Short note on equal or unequal cleavage.
5) Short note on Discoblastula or Coeloblastula.
6) Short note on centroblastula or amphiblastula or stereoblaastula,
7) Explain the process of coelom formation in process of gastrulation.
8) Short notes on : Amnion /Chorion/Allantois/Yolk sac.
9) Explain the function of Amnion /Chorion/Allantois/Yolk sac/.

10) Short note on Yolk sac placenta or Synsesmochorial placenta/Discoidal placenta/Cotyledonary placenta/Hemo-chorial placenta/Zonary placenta/Diffuse placenta
11) Short note on Deciduous or non-deciduous placenta
12) Write the functions of placenta.
13) What are the roles of Embryonic membranes and extra embryonic membranes

Unit 2: (10 Marks)

1. Describe male reproductive system and its hormonal regulation.
2. Describe female reproductive system and its hormonal regulation.
3. Define reproduction. Explain the hormonal regulation of reproduction.
4. What is contraception? Explain different methods of contraception.
5. How is contraception different from birth control?
6. Define infertility and explain the causes of female infertility.
7. What are the causes of male infertility?
8. Explain the hormonal treatment for infertility using drugs.
9. Describe the methods of treatment of infertility.
10. Give a brief account of infertility related disorders.
11. What are sperm banks? Add a note on cryopreservation of sperms.
12. What is testicular biopsy? Explain Testicular sperm extraction (TESE), Pronuclear stage transfer (PROST).
13. What are the steps involved in Embryo transfer (ET) and / Intra-fallopian transfer (IFT)?
14. What is ART technique? Add a note on IVF (steps, success and ethical considerations).

Unit 2: (5 Marks)

1. Write a note on impact of age on reproductive stage –
    a. Menopause
    b. Andropause
2. What is amenorrhea?
3. What are IUD's? How do they work as barriers for fertilization?
4. How does sterilization act as a method of contraception?
5. Write a note on birth control.
6. What is the difference between natural and artificial methods of contraception?
7. How is T.B. a cause of female infertility?
8. What are the genetic causes of infertility?
9. Write a note on STD's as infertility related disorders?
10. Explain briefly:
    a. Impotency
    b. Surrogacy

c. Endometriosis
d. Idiopathic infertility

11. What are the roles of endocrine disruptions in infertility?
12. Explain the role of the following in infertility:
    a. Gonorrhea
    b. Syphilis
    c. Genital Herpes
    d. Chlamydia
13. Write a note on treatment of infertility by removal of causative environmental factors.
14. Write a note on Ethical considerations of ART.

Unit 3: (10 Marks)

1. What are the causes, effects and control measures for air pollution?
2. What are the causes, effects and control measures for water pollution?
3. What are the causes, effects and control measures for soil pollution?
4. What are the causes, effects and control measures for noise pollution?
5. Define air pollution and give an account of hazardous air pollutants.
6. Explain the causes of nutrient pollution and its control measures.
7. What is ocean littering? Explain in details the causes and control measures for ocean littering?
8. Describe the alteration of metabolism of micro-organisms due to soil pollution.
9. Explain noise pollution along with its measurement and permissible limits.
10. Give a brief account of methods to control gaseous / particulate matters.
11. What is pollution? Add notes on:
    a. Effect of air pollution on vegetation.
    b. Effect of noise pollution on animals.
12. How can the people be made aware of pollution and its effects?

Unit 3: (5 Marks)

1. Explain the effects of air pollution on human beings.
2. What are different types of pollutants that cause air pollution?
3. Write short notes on:
    a. Ozone depletion
    b. Green house gases
    c. Global warming
    d. Acid rain
    e. Sonic boom
    f. Acoustic zoning
4. Explain the effect of thermal pollution on biodiversity.

5. Write a note on solar radiation.
6. Write a note on ionizing radiation
7. How are heavy metals responsible for nutrient pollution? Cite some examples of effects of heavy metal pollution on human health.
8. How is oil spills a cause of water pollution / ocean littering?
9. How do pesticides and fertilizers contaminate water?
10. How can oil be retracted back from sea / ocean?
11. What are the effects of soil pollution on food chain?
12. How are POP's and ordinary salts responsible for nutrient pollution?
13. What are the auditory / non – auditory effects of noise pollution.
14. Why is the necessity to save drinking water?

PRACTICAL
USZOP4 (Course VIII)
Skeleton -Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Major Question 12 marks

Q1. Study Population density by Line transect or Quadrant method and calculate biodiversity indices (any 2)

Minor Question 08 marks

Q2. Prepare a smear to show prokaryotic cell.

OR

Q2. Prepare a smear to show eukaryotic cell.

Q3. Identify and describe as per instructions 08 marks

a. Fossils
b. Speciation

Q4. From the given article prepare the bibliography/ abstract 06 marks

Q5. Power point presentation 06 marks

Q6. Viva and Journal 10 marks

PRACTICAL
USZOP4 (Course IX)
Skeleton -Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Major Question 15 marks

Q1. Study of permeability of cell through plasma membrane (Osmosis in blood cells).

OR

Q1. Measurement of cell diameter by occulometer (by using permanent slide)

Minor Question 10 marks

Q2. Qualitative tests for carbohydrates (Molisch's test, Benedicts test, Barfoed's test, Anthrone test)

OR

Q2. Qualitative tests for proteins (Ninhydrin test, Biuret test, Millon's test, Xanthoproteic test)

OR

Q2. Qualitative test for lipids (Solubility test, Sudan III test)

OR

Q2. Study of rancidity of lipids by titrimetric method

Q3. Identify and describe as per instructions 15 marks

1. Ultra structure of cell organelles (a, b & c)
2. Clinical disorders (d & e)

Q4. Viva 05 marks

Q5. Journal 05 marks

PRACTICAL

USZOP4 (Course X)

Skeleton -Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Major Question 12 marks

Q1. Estimation of Dissolved oxygen from the given water sample

OR

Q1. Detection of Creatinine in urine

OR

Q1. Determination of blood sugar by GOD and POD method

Minor Question 08 marks

Q2. Estimation of Salinity by refractometer from the given water sample

OR

Q2. Estimation of conductivity by conductometer from the given water sample

OR

Q2. Determination of blood pressure by using spyghmomanometer

OR

Q2. Study of bleeding time and clotting time

Q3. Identifiy and describe as per instructions 15 marks

1. Permanent slides (a &b)
2. Fishery (c ,d & e)

Q4. Field Report and viva based on it. 10 marks

Q5. Journal 05 marks

UNIVERSITY OF MUMBAI
No. UG/ /56 of 2016-17

CIRCULAR:-

A reference is invited to the Syllabi relating to the B.Sc. degree course , **vide** this office Circular No. UG/98 of 2015-16, dated 13th October, 2016 and the Principals of affiliated Colleges in Science are hereby informed that the recommendation made by the Ad-hoc Board of Studies in Chemistry at its meeting held on 7th July, 2016 has been accepted by the Academic Council meeting held on 14th July, 2016 **vide** item No. 4.13 and that in accordance therewith, the revised syllabus as per the Choice Based Credit System for T.Y. B.Sc. programme in Chemistry (Sem. V & VI), which are available on the University's web site (www.mu.ac.in) and that the same has been brought into force with effect from the academic year 2016-17.

16/11/16

UNIVERSITY OF MUMBAI

Syllabus for sem V & VI
Program: B.Sc.
Course: CHEMISTRY

(Credit Based Semester and Grading System with effect from the academic year 2016–2017)

T.Y.B.Sc.
CHEMISTRY
Credit Based Semester and Grading System
To be implemented from the Academic year 2016-2017

SEMESTER V
Theory

Course	UNIT	TOPICS	Credits	L / Week
USCH501	**I**	**1.1 Colligative Properties of Dilute Solutions (8L)** **1.1.1** Dilute solution, colligate properties, Raoult's law, relative lowering of vapour pressure. **1.1.2** Elevation in boiling point of a solution, thermodynamic derivation relating elevation in the boiling point of a solution and the molar mass of the non-volatile solute. **1.1.3** Depression in freezing point of a solution, thermodynamic derivation relating the depression in the freezing point of a solution and the molar mass of the non-volatile solute. **1.1.4** Osmotic pressure, van't Hoff's equation for osmotic pressure, (derivation is expected) and determination of molar mass of the solute. Abnormal molar masses of solutes and van't Hoff factor (calculation of Degree of Association and Degree of Dissociation.) **1.2 Phase Rule (7L)** **1.2.1** Gibb's phase rule and terms involved in the equation. **1.2.2** Application of phase rule to ONE component systems (i) water system, (ii) sulphur system **1.2.3** Application of phase rule to TWO component systems, condensed systems, condensed phase rule, eutectic systems (Lead-Silver system), desilverisation of lead. **1.2.4** Introduction to three component system, explanation of phase diagram for three liquids forming one immiscible pair.	**2.5**	**1**

	II	**2.1 Surface Chemistry & Catalysis (9L)** **2.1.1 Adsorption:** Physical and Chemical Adsorption, types of adsorption isotherms **.** Langmuir's adsorption isotherm (Postulates and derivation expected). B.E.T. equation for multilayer adsorption, (derivation not expected). significance of the terms involved in the equation is expected.),determination of surface area of an adsorbent using B.E.T. equation. Numericals on surface area determination are expected. **2.1.2 Catalysis:** Homogeneous and heterogeneous catalysis, catalytic activity and selectivity, promoters, inhibitors, catalyst poisoning and deactivation, **2.1.3 Acid-Base catalysis**, mechanism and kinetics of acid-base catalyzed reactions, effect of pH on acid-base catalyzed reactions. Mechanism and kinetics of enzyme catalyzed reaction (Michaelis-Menten equation). **2.2 Colloids (6L)** **2.2.1** Introduction to colloidal state of matter. **2.2.2** Origin of charge on colloidal particles. Concept of electrical double layer, zeta potential, Helmholtz and Stern model, Electro-kinetic phenomena:1.Electrophoresis, 2.Electrophoresis , 3. Streaming potential 4. Sedimentation potential . **2.2.3** Colloidal electrolytes. **2.2.4** Donnan Membrane Equilibrium. **2.2.5** Surfactants, micelle formation, applications of surfactants in detergents, food industry, in pesticide formulations.		
	III	**3.1 Electrochemistry – Electrochemical cells (15L)** **3.1.1** Lewis concept of Activity and Activity coefficient, Mean ionic activity and mean ionic activity coefficient γ_{+-} of an electrolyte, expression for activities of electrolytes of different valence type, ionic strength		

		3.1.2 Classification of cells: 1.chemical cells without transference 2.Concentration cells with and without transference (derivations of expression for concentration cell EMF are expected) Origin of liquid-liquid junction potential and its elimination using a salt bridge. **3.1.3** Applications of EMF .measurements in the determination of **1.** pH of a solution using quinhydrone and glass electrode. **2** solubility and solubility product of sparingly soluble salts using chemical cell and concentration cell method **3**. determination of liquid-liquid junction potential .		
	IV	**4.1 Introduction to Polymers (8L)** **4.1.1 Basic terms** : macromolecule, monomer, repeat unit, degree of polymerization. **4.1.2. Classification of polymers** based on (i) source, (ii) structure, (iii) thermal response, (iv) physical properties. **4.1.3. Molar masses of polymers**: 1. Number average molar mass, 2.Weight average molar mass, 3. Viscosity average molar mass, monodispersity, polydispersity. **4.1.4. Methods of determining molar masses of polymers** : 1. Ultrcentrifuge method (Limiting velocity method only). Viscosity method (Mark-Houwink equation). **4.1.5. Introduction to light emmiting polymers** (characteristics, method of preparation and it's application are expected). **4.2 Crystalline State (7L)** **4.2.1. Laws of Crystallography** **4.2.2**. Characteristics of simple cubic, face centered and body centered cubic system, inter planar distance in cubic lattices (only expressions for ratios of inter planar distances are expected). **4.2.3.** Use of X- rays in the study of crystal structure, Bragg's equation (derivation expected), X- ray diffraction method of studying crystal lattices, structure of NaCl and KCl,		**1**

		determination of Avagadro number. **4.2.4.** Elementary idea of defects in crystals- Frenkel defect and Schottky defect.		
USCH502	**I**	**1. Chemical Bonding And Solid State Chemistry (15L)** **1.1 Molecular Symmetry (7L)** **1.1.1** Introduction and Importance. **1.1.2** Symmetry elements and symmetry operations. **1.1.3** Concept of a Point Group with illustrations using the following point gro ups: (i) $C_{\alpha v}$ (HCl), (ii) $D_{\alpha h}$ (H_2), (iii) C2v (H_2O), (iv) C_{3v} (NH_3), (v) C_{2h} (trans – trichloroethylene), and (vi) D_{3h} (BCl_3). **1.2 Molecular Orbital Theory for Polyatomic Species (5L)** **1.2.1** Simple triatomic species: H_3^+ and H_3 (correlation between bond angle and Molecular orbitals). Term such as Walsh correlation diagram, Symmetry Adapted Linear Combinations (SALCs), Ligand Group orbitals (LGOs), transformation of atomic orbitals into appropriate symmetry types, expected to be discussed **1.3 (3L)** Other molecules (considering only σ-bonding): i) BeH_2, ii) H_2O, Explanation of terms viz.crystal lattice, lattice points, unit cells and lattice constants.	**2.5**	**1**

	II	**2. Solid Materials (15L)** **2.1 Structures of Solids (10L)** **2.1.1** Importance of solid state chemistry. **2.1.2** Classification of solids on the basis of bonding. **2.1.3** Closest packing of rigid spheres (hcp, ccp), packing density in simple cubic, bcc, fcc and hcp lattices (numerical problems expected). Point defects with respect to Frenkel and Schottky defects expected. **2.1.4** Structure metallic solids. **2.1.5** Tetrahedral and octahedral interstitial voids in ccp lattice, tetrahedral holes,limiting radius ratios for different coordination numbers and their significance, calculation of limiting radius ratio for coordination number 4. **2.1.7** Structures of sodium chloride and cesium chloride. **2.2 Superconductivity (05L)** **2.2.1** Superconductivity, Meissner effect. **2.2.2** Different superconducting materials viz,convential superconductors, organic superconductors, alkali metal fullerides (A_3C_{60}) and high temperature Superconductors. **2.2.3** Applications of superconducting materials.		**1**
	III	**3. Chemistry of elements (15L)** **3.1 Inner transition elements (3L)** **3.1.1** Introduction: position of f-block elements and comparison between lanthanides and actinides **3.1.2** The shapes of *f*-orbitals. **3.1 Lanthanides Series (10L)** **3.2.1** Chemistry of lanthanides with reference to (i) lanthanide contraction, (ii) Oxidation states (iii) magnetic and spectral properties, **3.2.2** Occurrence, extraction and separation of lanthanides by Solvent extraction. **3.2.3** Applications of lanthanides.		**1**

		3.3 Actinides Series (2L) **3.3.1 Chemistry** of Uranium and with reference to occurrence, extraction (solvent extraction method), **3.3.2** Properties and applications.		
	IV	**4. Solution Chemistry** **4.1 Acid-base Chemistry in Aqueous Medium (8L)** **4.1.1 Acidity** of mono- and polyatomic cations. **4.1.2** Basicity of mono- and polyatomic anions (discussion for 4.1.1 as well as 4.1.2 to Include Latimer equation and predominance diagrams). **4.2 Chemistry in Non-aqueous Solvents (7L)** **4.2.1** Classification of solvents and importance of non-aqueous solvents. **4.2.2** Characteristics and study of liquid ammonia, dinitrogen tetraoxide and acetic acid as non-aqueous solvents with respect to (i) acid-base reactions and (ii) redox reactions.		**1**
USCH503	**I**	**1.1. Mechanism of Organic Reactions (15L)** 1.1.1 Thermodynamic and Kinetic control of organic reactions: Concept with mechanisms of the following reactions: addition of HX to butadiene; sulfonation of naphthalene. Nucleophilicity/ electrophilicity vs Basicity/acidity. 1.1.2 Mechanism of elimination reactions, with stereochemistry: E1 and E2 reactions: regioselectivity (Saytzeff and Hofmann rules). 1.1.3 Mechanism of reactions of carbonyl compounds with nucleophiles: 1.1.3.1 Formation of acetals/ketals from aldehydes and ketones. 1.1.3.2 Reaction of aldehydes and ketones with primary and secondary amines. 1.1.3.3 Acyl nucleophilic substitution (tetrahedral mechanism): Acid catalysed esterification of Carboxylic acids and base promoted hydrolysis of esters. 1.1.4 Mechanism of rearrangements with examples and stereochemistry wherever applicable. 1.1.4.1 Migration to electron deficient carbon: Pinacol,	**2.5**	**1**

		Benzylic acid. 1.1.4.2 Migration to electron deficient nitrogen: Beckmann, Hofmann. 1.1.5 Mechanism of the following reactons with synthetic application: Claisen condensation, Michael addition.		
	II	**2. Stereochemistry (15L)** 2.1.1 Molecular chirality and element of symmetry: Mirror Plane symmetry (inversion centre), rotation-reflection (alternating) axis, Chirality of compounds without stereogenic centre: cummulenes, spirans and biphenyls. 2.1.2 Stability ofcycloalkanes: Strains in cycloalkanes-angle,eclipising, transannular (3 to 8 membered). Conformations of cyclohexane, mono- and di- alkyl cyclohexanes and their relative stabilities. 2.1.3 Stereo selectivity and Stereo specificity: Idea of enantioselectivity (ee) and diastereoselectivity (de).Topicity-enantiotopic and diastereotopic atoms, groups and faces. **Stereochemistry of-** (1) Substitution reactions- S_N1, S_N2, S_Ni (reaction of alcohol with thionyl chloride). (2) E_2-anti-elimination-Base induced dehydrohalogenation of 1-bromo-1,2- diphenylpropane. (3) Addition reactions to olefins-i) catalytic hydrogenation ii) bromination (electrophilic anti addition) (iii)syn-hydroxylation (molecular addition) with OsO_4 and $KMnO_4$.		**1**
	III	**3.1 Carbohydrates (10L)** 3.1.1 Introduction: Classification, Sources, Reducing and non-reducing sugars DL notation. 3.1.2 Structures of monosaccharides: Fischer projection (4-6 carbon monosaccharides and Haworth formula-Furanose and pyranose forms of pentoses and hexoses. Interconversion :open and Haworth forms of monosaccharides with 5 and 6 carbons. Chair conformation with stereochemistry of D-glucose and D-fructose. Stability of chair forms of D-		**1**

		glucose. 3.1.3 Determination of open chain configuration- of D-glucose assuming the configuration of D-arabinose; and of D-fructose assuming the configuration of D-glucose. 3.1.4 Anomers and epimers of monosaccharides. Enantiomers and diastereomers of glucose. Mutarotation (with mechanism) in D-glucose. 3.1.5 Chain lengthening and shortening reaction: Modified kiliani-fischer synthesis. Wohl method. 3.1.6 Reactions of D-glucose and D-fructose: (a) osazone formation (b) reduction- H_2/Ni, $NaBH_4$ c)oxidation- bromine water, HNO_3, HIO_4. D) interconversion of D-glucose and D-fructose e) acetylation f) methylation [e and f with cyclic pyranose form]. 3.1.7 Commercial importance of carbohydrates in pharmaceutical, paper,food and Textile industries. **3.2. IUPAC Nomenclature (5L)** IUPAC systematic and accepted trivial nomenclature of the following classes of compounds, including substituted ones (up to 2 substituents/ functional groups): **3.2.1** (a)Bicyclic compounds- spiro-,fused, and bridged (upto 11carbon atoms)-saturated and unsaturated compounds. **3.2.2** (b) Biphenyls. **3.2.3** (c) Cummulenes upto 3 double bonds (d) Monocyclic (5 and 6 membered) aromatic and non-aromatic heterocyclic compounds containing a maximum of two hetero atoms among N,O,S. **3.1.1**Introduction:Classification, Sources, Reducing and non-reducing sugars DL notation. **3.1.2** Structures of monosaccharides: Fischer projection (4- 6 carbon monosaccharides and Haworth formula-Furanose and pyranose forms of pentoses and hexoses. Interconversion :open and Haworth forms of monosaccharides with 5 and 6 carbons. Chair conformation with		

		stereochemistry of D-glucose and D-fructose. Stability of chair forms of D-glucose. **3.1.3** Determination of open chain configuration- of D-glucose assuming the configuration of D-arabinose; and of D-fructose assuming the configuration of D-glucose. **3.1.4** Anomers and epimers of monosaccharides. Enantiomers and diastereomers glucose. Mutarotation (with mechanism) in D-glucose. **3.1.5** Chain lengthening and shortening reaction: Modified kiliani-fischer synthesis. Wohl method. **3.1.6** Reactions of D-glucose and D-fructose: (a) osazone formation (b) reduction- H_2/Ni, $NaBH_4$ c)oxidation-bromine water, HNO_3, HIO_4. D) interconversion of D-glucose and D-fructose e) acetylation f) methylation [e and f with cyclic pyranose form]. **3.2. IUPAC Nomenclature (5L)** IUPAC systematic and accepted trivial nomenclature of the following classes of compounds, including substituted ones (up to 2 substituents/functional groups): **3.2.1** (a)Bicyclic compounds- spiro-,fused, and bridged (upto 11carbon atoms)-saturated and unsaturated compounds. **3.2.2** (b) Biphenyls. **3.2.3** (c) Cummulenes upto 3 double bonds (d) Monocyclic (5 and 6 membered) aromatic and non-aromatic heterocyclic compounds containing a maximum of two hetero atoms among N,O,S.		
	IV	**4.1. Heterocyclic Chemistry (8L)** **4.1.1** Introduction: Electronic structure and aromaticity of furan, pyrrole,thiophene and pyridine. **4.1.2** Synthesis: Synthesis of furans, pyrroles, and thiophenes by Paal-Knor synthesis. Pyridines by Hantzsch synthesis and from 1,5-diketones. **4.1.3** Reactivity: Reactivity towards electrophilic substitution reactions- of furan, pyrrole and thiophene on basis		**1**

		of stability of intermediate; and of pyridine on the basis of electron distribution.Nucleophilic substitution reaction of pyridine on the basis of electron distribution. **4.1.4** Reactions of heterocycles: The following reactions of furan, pyrrole and thiophene: Halogenation , Nitration, Sulphonation, Vilsmeir formylation reaction, Friedel-Crafts reaction. Furan: Diels-Alder reaction. Ring opening of furan. Pyrrole: Acidity and basicity of pyrrole -Comparison of basicity of pyrrole and pyrrolidine, Acid catalyzed polymerization of pyrrole. Pyridine: Basicity. Comparison of basicity of pyridine, pyrrole and piperidine. Sulphonation of pyridine, with and without catalyst. Reduction.Oxidation of alkyl pyridines and action of sodamide (Chichibabin reaction).N-methylation of pyridine. Quaternization of piperdine, pyrrolidine and Hofmann elimination of the quaternary salts. **4.2. Organic Synthesis (7L)** **4.2.1** Introduction: Criteria for ideal organic synthesis. Yield and selectivity. Multi- component synthesis – with examples, Mannich reaction, Hanztsch synthesis of pyridines (without mechanism). **4.2.2** Illustrative synthesis of industrially important compounds: Ibuprofen (chiral synthesis), paracetamol (green synthesis), L-ascorbic acid (from D-glucose), norfloxacin, thyroxine, vanillin, methyl dihydrojasmonate (Hedione), Bifenox-I, pigment red 242, indigo, 2-hydroxy-3-amino-5-nitrobenzene sulphonic acid. **4.2.3** Newer methods of organic synthesis: Introduction to the use of the following in organic synthesis: Ultrasound, microwaves, PTC. **4.1.1** Introduction: aromaticity of furan,pyrrole,thiophene and pyridine. **4.1.2** Synthesis: Synthesis of furans, pyrroles, and thiophenes by Paal-Knor synthesis. Pyridines by Hantzsch		

		synthesis and from 1,5-diketones. **4.1.3** Reactivity: Reactivity towards electrophilic substitution reactions- of furan, pyrrole and thiophene on basis of stability of intermediate; and of pyridine on the basis of electron distribution. Nucleophilic substitution reaction of pyridine on the basis of electron distribution. **4.1.4** Reactions of heterocycles: The following reactions of furan, pyrrole and thiophene: Vilsmeir formylation reaction, Friedel-Crafts reaction. Furan: Diels-Alder reaction. Ring opening of furan. Pyrrole: Acidity and basicity of pyrrole-Comparison of basicity of pyrrole and pyrrolidine, Acid catalyzed polymerization of pyrrole. Pyridine: Basicity. Comparison of basicity of pyridine, pyrrole and piperidine. Sulphonation of pyridine, with and without catalyst. Reduction.Oxidation of alkyl pyridines and action of sodamide (Chichibabin reaction). N-methylation of pyridine.Quaternization of piperdine, pyrrolidine and Hofmann elimination of the quaternary salts. **4.2. Organic Synthesis (7L)** **4.2.1** Introduction: Criteria for ideal organic synthesis. Yield and selectivity. Multi- component synthesis – with examples, Mannich reaction, Hanztsch synthesis of pyridines (without mechanism). **4.2.2** Illustrative synthesis of industrially important compounds: Ibuprofen (chiral synthesis), paracetamol (green synthesis), L-ascorbic acid (from D-glucose), norfloxacin, nalidixic acid, vanillin, methyl dihydrojasmonate (Hedione), Bifenox-I, pigment red 242, 2-hydroxy-3-amino-5-nitrobenzene sulphonic acid. **4.2.3** Newer methods of organic synthesis: Introduction to the use of the following in organic synthesis: Ultrasound, microwaves, PTC.		

USCH504	**I**	**1. Treatment of analytical data-I and sampling (15 L)** **1.1 Treatment of Analytical Data (7L)** Types of errors, determinate and indeterminate errors, minimization of errors, constant and proportionate errors, accuracy and precision, measures of dispersion and central tendency: mean, median, average deviation, relative average deviation, standard deviation, variance, coefficient of variation.[Numerical problems expected] **1.2 Sampling (8L)** Terms involved, importance of sampling, sampling techniques, sampling of gases, ambient and stack sampling, equipment used, sampling of homogeneous and heterogeneous liquids, sampling of static and flowing liquids, methods and equipments used, sampling of solids, importance of particle size and sample size, samples used, need for the reduction in the sample size, methods of reduction in sample size, collection, preservation and dissolution of the sample.	**2.5**	**1**
	II	**2. Titrimetric analysis-I and UV-Visible spectroscopy. (15L)** **2.1 Acid-base Titrations (5L)** Construction of titration curves and choice of indicators in the titration of [1] strong acid and strong base, [2] strong acid and weak base, [3] weak acid and strong base, [4] weak acid and weak base. **2.2 Precipitation titrations (4L)** Argentimetric titrations, construction of the titration curve, Volhard's method, Mohr's method, adsorption indicators, theory and applications**.** **2.3 U.V. Visible Spectroscopy (4L)** Photometers and spectrophotometers, Instrumentation in the case of single and double beam spectrophotometers, Qualitative and quantitative analysis, calibration cure method.		**1**

	III	**3. Methods of separation-I (15L)** **3.1 Solvent Extraction (8L)** Partition coefficient and distribution ratio, extraction efficiency, separation factor, role of complexing agents in solvent extraction, chelation, ion pair formation, solvation, types of solvent extraction: batch, continuous. [Numerical problems expected] **3.2 Chromatography (2L)** Introduction to chromatographic techniques, classification of chromatographic techniques. **3.3 Planar Chromatography (5L)** Principle, techniques and applications of [1] Paper chromatography [2] Thin layer chromatography		**1**
	IV	**4. Optical methods (15L)** **4.1 Atomic Spectroscopy (7L)** Absorption and emission spectra, energy level diagrams, process involved in atomization, flame photometry, flame atomizer, types of burners, monochromators and detectors, atomic absorption spectroscopy; flame and electrothermal atomizer, sources, instrumentation, quantitative applications of atomic absorption and flame photometry, calibration curve method, standard addition and internal standard method. **4.2 Molecular Fluorescence and Phosphorescence Spectroscopy (4L)** Theory, instrumentation and applications **4.3 Turbidimetry and Nephelometry (4L)** Scattering of light, effect of concentration, particle size and wavelength on light scattering, instrumentation and applications.		**1**

Practicals

USCHP05	**Practicals of Course USCH501** **<u>Physical Practicals</u>** **Chemical Kinetics –** To determine the order between $K_2S_2O_8$ & KI by fractional change method. **Viscosity** – To determine the molecular weight of high polymer polyvinyl alcohol (PVA) by viscosity measurement. **OR** To determine the radius of a glycerol molecule by viscosity measurement. **Potentiometry** – 1. To determine the amount of Fe(II) in the given solution by titration with a standard $K_2Cr_2O_7$ solution and hence to find the formal redox potential of Fe^{3+}/Fe^{2+} 2. To determine the solubility product and solubility of AgCl potentiometrically using chemical cell. **OR** 3. To determine the solubility product and solubility of AgCl potentiometrically using concentration cell. **Colorimetry –** To determine the amount of Fe(III) present in the given solution by using salicylic acid by colorimetric titration.(static method) (=525 nm) **pH –Metry –** To determine acidic and basic dissociation constants of amino acid hence to calculate isoelectric point. **Course USCH502** **<u>Inorganic Practicals</u>** **Inorganic preparations** 1. Potassium diaquo bis-(oxalate)cuprate (II)$K_2[Cu(C_2O_4)_2.(H_2O]$	**3**	**8**

	2. CuCl2-2DMSO 3. Bis(ethylene diamine)iron(II)sulphate[$C_2H_4(NH_2)_2FeSO_4.4H_2O$]. 4. Skill based Qualitative preparation of Chromium (II)acetate $Cr(OAc)_2$ so that the following outcomes are achieved: • Setting up reactor for Cr(II) ions • Identification of oxidation states of Chromium • Preparation of chromium(II)acetate • Isolation of the product		

	Volumetric analysis 1. Determination of magnesium from the supplied commercial sample of Milk of magnesia tablet 2. Estimation of Nickel(II)complexometrically using murexide indicator (Students are expected to standardize supplied EDTA solution using $ZnSO_4.7H_20$)		
USCHP06	**Practicals of Course USCH503** **Organic Practicals** i. Separation of binary (solid-slid) mixture.(Weights and physical constant of both crude components of the mixture are to be reported. (Minimum 4 mixtures) ii. Identification of an organic compound of known chemical type. (Minimum 4 mixtures) Syllabus for Organic Chemistry Sem-VI **Organic preparations** i. Acetylation of hydroquinone. ii. Nitration of nitrobenzene. iii. Hydrolysis of ethyl benzoate. iv. Bromination of acetanilide. **Course USCH504** **Analytical Practicals** 1. Estimation of persulphate in the given sample by the method of back titration. 2. Determination of the calcium and the magnesium content of a dolomite sample. 3. Determination of glucose content of a honey sample by Wilstater's method. 4. Determination of the amount of fluoride in the given solution colorimetrically. 5. Determination of Vitamin C content of a given tablet by titration with sodium hydroxide pH metrically	**3**	**8**

T.Y.B.Sc.
Chemistry
Credit Based Semester and Grading System
To be implemented from the Academic year 2016-2017

SEMESTER VI
Theory

Course	UNIT		Credits	L / Week
USCH601	I	**1.1 Molecular Spectroscopy –I (15L)** **1.1.1** Dipole moment: Dipole moment, polarization of a bond, bond moment, dipole moment and molecular structure. **1.1.2 Rotational Spectrum:** Rotational spectrum of a diatomic molecule, rigid rotor, moment of inertia, energy levels, conditions for obtaining pure rotational spectrum, selection rule, nature of spectrum, determination of inter nuclear distance and isotopic shift. **1.1.3 Vibration (IR) spectrum:** Vibrational motion, degrees of freedom, modes of vibration, vibrational spectrum of a diatomic molecule, simple harmonic oscillator, energy levels, zero point energy, conditions for obtaining vibrational spectrum, selection rule, nature of spectrum. **1.1.4 Vibration-Rotation spectrum of diatomic molecule v**ibrating rotor, energy levels, selection rule, nature of spectrum, R and P branches, anharmonic oscillator : energy levels, selection rule, fundamental band, overtones . Application of vibration-rotation spectrum in determining Force constant, determination and significance. Introduction to infrared spectra of simple molecules like H_2O and CO_2 **1.1.5 Raman Spectroscopy :** Scattering of electromagnetic radiation, Rayleigh scattering, Raman scattering, nature of Raman spectrum , Stoke's lines,anti-Stoke's lines, Raman shift, quantum theory of Raman spectrum, comparative study of IR and Raman spectra, rule of mutual exclusion.(example of CO_2molecule).	**2.5**	**1**
	II	**2.1 Basics of Quantum Chemistry (10L)** **2.1.1** Classical mechanics, limitations of classical mechanics, Black body radiation, photoelectric effect, Compton effect. **2.1.2** Introduction to quantum mechanics,		**1**

		Planck's theory of quantization, wave particle duality, de-Broglie equation, Heisenberg's uncertainty principle. **2.1.3** Progressive and standing waves, boundary conditions, Schrodinger's time independent wave equation(derivation not expected)., interpretation and properties of wave function. **2.1.4** Postulates of quantum mechanics (following are to be considered),1. state function and it's significance2. Concept of operators : definition, addition, subtraction and multiplication of operators, commutative and non- commutative operators, linear operator, Hamiltonian operator, 3. Eigen function and eigen value, eigen value equation. **2.2 Applied Electrochemistry (5L)** **2.2.1** Polarization, concentration polarization and it's elimination **2.2.2** Decomposition potential, experimental determination of decomposition potential, factors affecting decomposition potential (nature of electrolyte, nature of electrodes and temperature) Tafel's equation for hydrogen overvoltage, Overvoltage, experimental determination of over-voltage, **2.2.3** Electroplating ---objectives and procedures		
	III	**3.1 Renewable Energy Sources (5L)** **3.1.1.** Lithium ion cell. **3.1.2**. Fuel cells; Choice of fuel and oxidant, Bacon's H_2 and O_2 fuel cell. **3.1.3**. Solar cells, solar energy, photovoltaic effect, semiconductors as solar energy converters, silicon solar cell **3.1.4**. Hydrogen : Fuel of the future, production of hydrogen by direct electrolysis of water, advantages of hydrogen as a universal energy medium. **3.2 Nuclear Magnetic Resonance Spectroscopy (6L)** **3.2.1**. Nuclear spin, magnetic moment, nuclear 'g' factor, energy levels, Larmor precession, Relaxation processes in n.m.r. (spin-spin relaxation and spin-lattice relaxation). **3.2.2**. NMR Spectrometer, chemical shift, shielding and deshielding of protons, low resolution n.m.r. spectrum of methanol and ethanol.		**1**

		3.3 Chemical Kinetics (4 L) **3.3.1** Collision theory of reaction rates, application of collision theory to 1. uni-molecular reaction and 2. bimolecular reaction (Lindemann theory, derivation expected). Merits and drawbacks of collision theory. **3.3.2** Classification of reactions as slow, fast and ultra-fast. study of kinetics of fast reactions by Stop flow method.		
	IV	**4.1 Nuclear Chemistry** **4.1.1** Types of nuclear radiations and their characteristics, behaviour of ion pairs in electric field, detecton and measurement of nuclear radiations using G. M. Counter and Scintillation Counter. **4.1.2** Kinetics of radioactive decay, units of radioactivity (Curie, Bequerel, Rutherford) **4.1.3** Radioactive equilibrium (secular and transient), determination of radioactive constants for radio-elements having 1. moderate half life, 2. long half life 3.extremely long or short half life. **4.1.4** Use of radioisotpes as tracers in 1. chemical investigations- reaction mechanism, 2. age determination- dating by carbon-14 **4.1.5** Nuclear reactions – nuclear transmutation, artificial radioactivity Q-value of nuclear reaction, threshold energy. **4.1.6** Fissile and fertile material, nuclear fission, chain reaction, factor controlling fission process. (multiplication factor and critical size or mass of fissionable material)., nuclear power reactor and breeder reactor.		**1**
USCH602	**I**	**Coordination Chemistry (15L)** **1.1 Crystal Field Theory (CFT)** **1.1.1** Basic tenets of Crystal field theory and effect of crystal field on central metal valence orbitals. **1.1.2** Splitting of *d* orbitals in octahedral, tetrahedral and square planar complexes. **1.1.3** Crystal field splitting energy ($10Dq$ or Δ_o) for octahedral complexes and factors affecting the magnitude of Δ_o. **1.1.4** Crystal field stabilization energy (CFSE), calculation of CFSE, for octahedral and tetrahedral complexes with	**2.5**	**1**

		d^1 to d^{10} metal ion configurations. **1.1.5** Effect of crystal field splitting on i) Ionic radius and ii) Lattice energy. **1.1.6** Theoretical failure of the CFT model. **1.1.7** Experimental evidence for co-valence in co-ordination compounds.(i) ESR spectrum of $[IrCl_6]^{2-}$ (ii) NMR spectrum of tris (acetyl acetanato) vanadium complex, (iii) Intensities of *d-d* transitions, and (iv) Nephelauxetic effect. Consequences of crystal field splitting on various properties such as ionic radii, hydration energy, lattice energy, enthalpies of formation, colour and magnetic properties. **1.2 Molecular Orbital Theory (MOT) of Coordination Complexes** **1.2.1** Application to octahedral complexes in case of (i) $[Ti(H_2O)]^{3+}$, (ii) Fluoro complexes of Fe(II) and Fe (III) and (iii) Cyano complexes of Fe(II) and Fe (III). **1.2.2** Effect of pi-bonding an ligand field splitting parameter in M→L and L→M interactions. **1.3 Electronic States and Terms for Polyelectronic Atoms** **1.3.1** Introduction: electronic configuration and electronic states, Term symbols, coupling of spin momenta (M_S),orbital momenta (M_l)and spin- orbit coupling or Russell-Saunders coupling. **1.3.2** Determination of Terms for p^2 electronic configuration (as in a carbon atom). **1.3.3** Terms and micro-states for transition metal atoms/ions.		
	II	**2. Properties of Coordination compounds (15L)** **2.1 Stability of Complexes (5L)** **2.1.1** Thermodynamic stability and kinetic stability of complexes with examples. **2.1.2** Stability constants: Stepwise and overall constants and their inter-relationship. **2.1.3** Factors affecting thermodynamic stability. **2.1.4** Potentiometric method of determination of stability constants with example of silver-ammonia complex. **2.2 Substitution Reactions in Octahedral Complexes (5L)**		**1**

2.2.1 Introduction, types of reactions in complexes.
2.2.2 Ligand substitution reactions: basic mechanisms.
2.2.3 Inert and labile complexes and

		electronic configurations and lability of complexes. **2.2.4** Acid hydrolysis, base hydrolysis and anation reactions. **2.3 Electronic Spectra (5L)** **2.3.1** Types of electronic transitions like intra –ligand transitions, charge transfer transitions and intra-metal transitions and (*d-d* or ligand field transitions for transition metals). **2.3.2** Rules for electronic transitions: Spin and Orbital or Laporte selection rules. Orgel Diagrams for D Terms (i.e,d^1 , d^4 and d^6 .d^9 electronic configurations) and its use in interpretation of visible electronic absorption spectra of these configurations.		
	III	**Organometallic Chemistry (15L)** **3.1 Organometallic Compounds of main group metals (6L)** **3.1.1** Introduction: General synthetic methods: (i) Oxidative addition, (ii) Metal-Metal exchange (Transmetallation), (iii) Carbanion-Halide exchange, (iv) Metal Hydrogen exchange and (v) Methylene insertion reactions. **3.1.2** Chemical rections: (i) Reactions with oxygen, (ii) Alkylation and arylation reactions (iii) Reactions with protic reagents and (iv) Complex formation reactions. **3.2 Organometallic compounds of transition metals (9L)** **3.2.1** Synthesis , structure, reactions and of ferrocene. **3.2.2** Bonding in ferrocene on the basis of VBT. **3.2.3** Bonding in Re and Mo halide complexes.		**1**
	IV	**Some Selected Topics (15L)** **4.1 Inorganic Polymers (3L)** 4.1.1Various methods of classification with examples. **4.1.2** Chemistry of borazine with reference to preparation , properties, structures, bonding and applications. **4.2 Characteristics and Treatment**		**1**

		of Liquid Effluent (06L) **4.2.2** Characterization of waste: biochemical oxygen demand (BOD), chemical oxygen demand (COD), total organic carbon (TOC), aerobic and anaerobic processes. **4.2.3** Removing of solid contaminants, physical and chemical principles such as coagulation, flocculation and sedimentation. **4.2.4** Primary,secondary and tertiary of liquid effluents. **4.3 Nanomaterials(04L)** **4.3.2** Introduction and importance of nanomaterials. **4.3.3** Properties (Comparison between bulk and nanomaterials): (i) Optical properties, (ii) Electrical conductivity, and (iii) Mechanical properties. **4.3.4** Forms of nanomaterials: nanofilms, nanolayers, nanotubes, nanowires, and nanoparticles. **4.3.5** Chemical methods of preparation: (i) Colloidal route, and (ii) Sol-gel method. **4.5 Inorganic Pharmaceuticals (2L)** **4.4.2** Gastrointestinal agents viz., (i) antacids (aluminium hydroxide, milk of magnesia, sodium bicarbonate and (ii) cathartics (magnesium sulphate and sodium phosphate). Topical agents viz., (i) protectives and adsorbents (talc, calamine), (ii) antimicrobial agents (potassium permanganate, tincture iodine, boric acid) and astringents (alum).		
USCH603	**I**	**1.1 Spectroscopy** (15L) 1.1.1 Introduction : Electromagnetic spectrum, units of wavelength and frequency. 1.1.2 UV- Visible Spectroscopy: Basic theory, solvents, nature of UV-VIS spectrum, concept of Chromophore, auxochrome,bathochromic shift,Hypsochromic shift hyperchromic	**2.5**	**1**

		effect and chromophore-auxochrome interactions. 1.1.3 IR Spectrocopy: Basic theory, nature of IR spectrum, selection rule , fingerprint region. 1.1.4 PMR Spectroscopy: Basic theory of NMR, nature of PMR spectrum, chemical shift (∂ unit), standard for PMR, solvents used. Factors affecting chemical shift: (1) inductive effect (2) anisotropic effect (with reference to C=C, CΞC, C=O and benzene ring). Spin- spin coupling and coupling constant. Proton exchange-application of deuterium exchange ,Application of PMR in structure determination. 1.1.5 Spectral characteristics of following classes of organic compounds, including benzene and monosubstituted benzenes, with respect to UV-VIS, IR,PMR: (1)alkanes (2)alkenes and polyenes (3) alkynes (4) haloalkanes (5) alcohols (6) carbonyl compounds (7) ethers (8) carboxylic acids (9) esters (10)amines (11) amides (broad regions characteristic of different groups are expected). 1.1.6 Mass Spectrometry: Basic theory.Nature of mass spectrum. General rules of fragmentation. Importance of - molecular ion peak, isotopic peaks, basepeak, Nitrogen rule.Illustrative fragmentation of alkanes and aliphatic carbonyl compounds (No Mclafferty rearrangement). 1.1.7 Problems of structure elucidation of simple organic compounds using individual or combined use of the above spectroscopic technique are expected.(index of hydrogen deficiency should be the first step in solving the problems).		
	II	**2.1 Polymers (11L)** 2.1.1 Introduction: General idea of monomers, polymers, and polymerization, natural and synthetic polymers. Homoplymers and copolymers. Classification of polymers- Plastic, fibres, resins, elastomers. Thermoplastics and thermosets. Copolymers-alternating, block, random, graft. 2.1.2 Mechanism of free radical addition		**1**

		polymerization. 2.1.3 Elastomers: Natural and synthetic rubbers. Diene polymerization: 1,2- and 1,4- addition (cis and trans) polymerization of isoprene. 1,3-Butadiene-styrene copolymer. 2.1.4 Stereochemistry of polymers: Tacticity. Role of Ziegler-Natta catalyst (co- ordination polymerization) in directing the tacticity in polypropylene (no mechanism). 2.1.5 Preparation & use of polymers: (1) Addition polymers: (a) polyethylene (b)polypropylene (c) PVC (d) polystyrene (e) polyacrylonitrile (f) polyvinylalcohol (g) Teflon. (2) Condensation Polymers: (a) Polyesters (b) polyamides (c) polyurethans (d)phenol-formaldehyde resin (e) epoxy resin (f) polycarbonates. 2.1.6 Recyclable polymers. Biodegradable polymers and their uses. Biomedical use of polymers. 2.1.7 Additives to polymers: Plasticizers ,stabilizers and fillers.(The students are expected to identify monomers in a given polymer and draw the structure of a polymer from a given set of monomers). **2.2 Photochemistry** 2.2.1 Introduction: Difference between thermal and photochemical reactions. Jablonski diagram, singlet and triple states, allowed and forbidden transitions, fate of excited molecules, photosensitization. 2.2.2 Photochemical reactions of olefins: photoisomerisation, photochemical rearrangement of 1,4-dienes (di π methane) 2.2.3 Photochemistry of carbonyl compounds: Norrish I, Norrish II cleavages, Photo reduction (e.g. benzophenone to benzpinacol).		
	III	**3.1 Catalysts and Reagents (5L)** Study of the following catalysts and reagents with respect to functional group transformations and selectivity (no mechanism). 3.1.1 **Catalysts** : Catalysts for **1** hydrogenation: Raney Ni,Pt and PtO_2: C=C, CN, NO_2, aromatic ring; Pd/C: C=C, COCl→CHO (Rosenmund); Lindlar catalyst: alkynes; Wilkinson's catalyst for		

		stereo selective reduction of olefins. 3.1.2 **Reagents**: (1)$LiAlH_4$ and Red-Al: reduction of CO,COOR, CN, NO_2. (2) $NaBH_4$: reduction of CO (3) SeO_2: hydroxylation of allylic and benzylic positions,oxidation of CH_2, alpha to CO to CO.(5)mCPBA and R-OOH/H_2O_2 for epoxidation of C=C. (6) NBS: allylic and benzylic bromination of position alpha to CO. **3.2 Natural Products (10L)** 3.2.1 Introduction: Primary and secondary metabolites. Introduction to the following natural products with respect to the sources and classes. (Structures of the compounds specified below are expected). (a) Terpene: Isoprene and special isoprene rule.α-terpeniol, citral,camphor, α-pinene. (b) Alkaloids: nicotine,atropine. (c) Vitamins: Vitamins A and C. (d) Hormones: adrenaline, thyroxine. (e) Steroids: cholesterol, progesterone. 3.2.2 Structure determination of natural products: 3.2.2.1 Ozonolysis in terpenoids-Examples of open chain and monocyclic monoterpenes. 3.2.2.2 Hofmann exhaustive methylation and degradation in alkaloids – simple open chain and monocyclic amines.3.2.2.3 Structure determination of citral and nicotine through degradation studies. Total synthesis of degradation studies. Total synthesis of (i) Citral from 3-methylbutan-1-ol (ii) Nicotine from nicotinic acid. 3.2.4 Commercial importance of terpenoids and alkaloids: Synthesis of camphor from α-pinene, α and β ionones, geraniol and nerol from citral. 3.2.5		
	IV	**4.1 Organometallic Chemistry (5L)** 4.1.1 Intoduction: Carbon-metal bond-Nature, types reactivity. 4.1.2 **Organo magnesium Compounds**: Grignard reagent :Preparation, structure, and stability, Reaction with compounds containing acidic hydrogen,carbonyl compounds, cyanides and CO_2. 4.1.3 **Organolithium Compounds** : Preparation using alkyl/aryl halides. Reactions with compounds containing		**1**

		acidic hydrogen, alkyl halides, carbonyl compounds, cyanides and CO_2. Lithium dialkyl cuprates: Preparation and reactions with aliphatic /aromatic/vinylic halides. 4.1.4 **Organozinc compounds**: Preparation of dialkyl zinc. Reaction with water, acid chlorides and alkyl halides. Reformatsky reaction (with mechanism). **4.2 Chemistry of some Important Biomolecules: (10L)** 4.2.1 α-Amino acids: Structure,configuration,Essential amino acids and their abbreviations, classification, Properties: pH dependency of ionic structure and isoelectric point. Methods of preparations: Strecker synthesis, amidomalonate synthesis, Erlenmeyer azalactone synthesis. 4.2.2 Polypeptides and Proteins: Polypeptides: Peptide bond. Nomenclature and representation of polypeptides. Merrifields solid phase peptide synthesis (example of di- and tri- peptides for nomenclature and synthesis). Proteins: Sources, types,functions,colloidal nature, separation based on isoelectric point, denaturation and functions. Partial and total hydrolysis. General idea of primary, secondary, tertiary and quartenary structures. 4.2.3 Nucleic acids: Selective hydrolysis of nucleic acids.Sugars and bases in nucleic acids. Stuctures of nucleosides an nucleotides in DNA and RNA. Structure of nucleic acids (DNA and RNA): Base pairing in nucleic acids. Importance of nucleic acids-self duplication, protein synthesis.		
USCH604	**I**	**Electroanalytical methods. (15L)** **1.1** D.C. Polaroghraphy (11L): Polarizable and nonpolarizable electrodes, basic principles, residual current, diffusion current, limiting current, dropping mercury electrode, supporting electrolyte half wave potential, derivation of the polarographic wave equation for a reversible reaction. Ilkovic equation, oxygen interference and its removal, maxima and maxima suppressors, polarographic cell, qualitative	**2.5**	**1**

		and quantitativeanalysis, calibration curve and standard addition method, applications. [Numerical problems expected] **1.2** Amperometric Titrations: Basic principles, rotating platinum electrode and nature of the titration curves, applications, advantages and limitations.		
	II	**Methods of separation-II (15L)** **2.1** Gas chromatography (6L): Gas liquid chromatography, basic principles retention time, retention volume, resolution, peak width theoretical plates. HETP, instrumentation, columns, detectors, applications. **2.2** High Performance Liquid Chromatography (4L): Instrumentation, types of elution, U.V. and I.R. detector and applications **2.3** Ion Exchange Chromatography (5L): Types of ion exchangers, mechanism of ion exchange, selectivity coefficients and separation factors, capacity and its determination, factors affecting the separation of ions, applications.		**1**
	III	**Treatment of analytical data-II and Titrimetric analysis-II (15L)** **3.1** Treatment of Analytical Data (6L): Distribution of random errors, Gaussian curve, students' t, confidence limits and confidence interval, criteria for rejection of result: 2.5d rule,4.0 rule and Q test, F teset, testing for significance, null hypothesis, method of averages, least squares method. Numerical problems expected] **3.2** Complexometric Titrations (5L): General introduction, EDTA titrations, advantages and limitations of EDTA as the titrant, absolute and conditional formation constants of metal EDTA complexes, construction of titration curves, types of EDTA titrations,methods of increasing the selectivity of EDTA as a titrant, metallochromic indicators, theory and applications. **3.3** Redox Titrations (4L): General introduction, theory of redox indicators, criterion for choosing an indicator for a redox titration, construction of the titration curves in the case of (1) Fe (II) Vs. Ce(IV)		**1**

		(2) Fe (II) Vs. dichromate, use of diphenyl amine and ferroin as redox indicators.		
	IV	**Concepts in Quality and miscellaneous methods (15L)** **4.1** Total quality management (5L) : concept of quality, quality control, quality assurance total quality management, ISO series, Good laboratory practices **4.2** Mass Spectrometry (2L): Basic principles, introduction of components only **4.3** Thermal Methods (5L): Classification of thermal methods, thermogravimetric analysis,basic principles, instrumentation factors affecting the TG curve, applications **4.4** Introduction to Radio Analytical Techniques (3L): Classification of the techniques, introduction to neutron activation analysis and its applications.		**1**

Practicals

USCHP07	**Practicals of Course USCH601** **<u>Physical Practicals</u>** **Chemical Kinetics –** To determine the energy of activation for the acid catalysed hydrolysis of methyl acetate. **Partition coefficient** To determine the equilibrium constant for the reaction$KI + I_2 \rightleftharpoons KI_3$ by partition method. (Partion coefficient of I_2 between CCl_4 and water is to be given) **Potentiometry –** 1. To determine the strength of the given strong acid (HCl) by potentiometric titration using quinhydrone electrode (Calculation of pH from E_{cell} and the plot of (a) $\frac{\Delta E}{\Delta V}$ against V (b) pH against V graphs are expected). **OR** To determine pKa value of the given weak monobasic acid (CH_3COOH) by e.m.f. measurements. 2. To determine E_{cal} at room temperature	**3**	**8**

	and using this value, determine standard reduction potential of Ag/Ag^+ electrode at room temperature. **Conductometry –** To determine the amount of dibasic acid (Oxalic acid) by conductometric titration against strong base. **OR** To determine the relative strength of monochloroacetic acid and acetic acid conductometrically. **Course USCH602** **<u>Inorganic Practicals</u>** **Inorganic preparations** 1. Mercury tetrathiocyanato Cobaltate (II) $Hg[Co(SCN)_4]$ 2. Magnesium oxinate$[Mg(Ox)_2]$ 3. Tris-acetyl acetonato iron(III) $[Fe(AcAc)_3]$ 4. Tetrammine copper(II) sulphate. $[Cu(NH_3)_4]SO_4.H_2O$ **Inorganic estimations/ Analysis** 1. Estimation of copper iodometrically using sodium thiosulphate. (Students are expected to standardize supplied sodium thiosulphate solution using potassium dichromate) 2. Estimation of lead by complexomety using EDTA solution. (Students are expected to standardize the supplied EDTA solution. Suggested standard for standardization: $ZnSO_4.7H_2O$)		
USCHP08	**Practicals of Course USCH603** **<u>Organic Practicals</u>** **Binary Mixture Separation** Seperation of mixture containing (VL + NVL) & (S + VL) components. **Organic Preparations** 1. Aniline/p-toluidine → N-Acetyl derivative 2. Salicylic acid/nitrobenzene/ Acetanilide → Nitro derivative	**3**	**8**

	3. β- naphthol → Methyl Ether derivative (Using dimethyl sulphate) 4. Acetanilide → p-bromoacetanilide derivative 5. Aniline/ p-toluidine → Schiff base with benzaldehyde 6. Hydroquinone/beta naphthol → Acetyl derivative 7. Methyl salicylate/ethyl benzoate → Acid derivative (Hydrolysis) 8. Benzaldehyde/p-nitrobenzaldehyde → Acid (Oxidation) **Course USCH604** **<u>Analytical Practicals</u>** 1. Determination of chemical oxygen demand of a water sample. 2. Determination of percentage purity of a sample of common salt using a cation exchanger. 3. Determination of potassium content of a commercial salt sample by flame photometry. 4. Determination of acetic acid content of a vinegar sample by potentiometric titration with sodium hydroxide using quinhydrone. **5.** Determination of Cr (VI) in the given solution as dichromate by the method of least squares, spectrophotometrically

UNIVERSITY OF MUMBAI
No. UG/86 of 2016-17

CIRCULAR:-

A reference is invited to the Syllabi relating to the B. A. degree course **vide** this office Circular No.UG/159 of 2011 dated 20th June, 2011 and the Principals of affiliated Colleges in Arts Colleges are hereby informed that the recommendation made by Board of Studies in History & Archaeology at its meeting held on 25th May, 2016 has been accepted by the Academic Council at its meeting held on 24th June, 2016 **vide** item No. 4.21 and that in accordance therewith, the revised syllabus as per the Choice Based Credit System for the F.Y.B.A. in History & Archaeology (Sem.I & II), which is available on the University's web site (www.mu.ac.in) and that the same has been brought into force with effect from the academic year 2016-17.

(Dr.M.A.Khan)
REGISTRAR

MUMBAI – 400 032
October, 2016

To,

The Principals of affiliated Colleges in Arts.

Item no.4.21

UNIVERSITY OF MUMBAI

Revised syllabus for Sem I and II

Program: B. A.

Course: History & Archaeology

(Choice Based Credit System with effect from the Academic year 2016-17)

F.Y.B.A. (History)

History of Modern India (1857-1947)

Semester - I

Objectives:-

The course is designed to make the student aware about the making of modern India and the struggle for independence.

Module I: Growth of Political Awakening

(a) Revolt of 1857 – Causes and Consequences

(b) Contribution of the Provincial Associations

(c) Foundation of Indian National Congress.

Module II: Trends in Indian Nationalism

(a) Moderates

(b) Extremists

(c) Revolutionary Nationalists

Module III: Gandhian Movements

(a) Non Co-operation Movement

(b) Civil Disobedience Movement

(c) Quit India Movement

Module IV: Towards Independence and Partition

(a) The Indian Act of 1935

(b) Attempts to Resolve the Constitutional Deadlock -The Cripps Mission, The Cabinet Mission and the Mountbatten Plan

(c) Indian Independence Act and Partition

Semester –II
History of Modern India: Society and Economy.

Module I: Socio Religious Reform Movements: Reforms and Revival

(a) Brahmo Samaj, Arya Samaj and Ramakrishna Mission
(b) Satyashodhak Samaj, Aligarh movement and Singh Sabha Movement.
(c) Impact of Reform Movements

Module II: Education, Press and Transport

(a) Introduction of Western Education and its Impact
(b) Development of Press
(c) Transport and Communications

Module III: Impact of the British Rule on Indian Economy.

(a) Revenue Settlements, Commercialisation of Agriculture
(b) Drain Theory
(c) Deindustrialisation and Growth of Large Scale Industry

Module IV: Nationalism and Social Groups: interfaces.

(a) Women
(b) Dalits
(c) Peasants and Tribals

HISTORY

Question Paper Pattern For F.Y.B.A. History
Semester I & II

As per University rules and guidelines.

University of Mumbai

No. UG/31 of 2020-21

CIRCULAR:-

Attention of the Principals of the Affiliated Colleges and Directors of the recognized Institutions in Humanities Faculty is invited to this office circular No.UG/69 of 2018-19, dated 6th July, 2018 relating to the revised syllabus as per (CBCS) for the T.Y.B.A. in Psychology Sem.V & VI.

They are hereby informed that the recommendations made by the Board of Studies in Psychology at its meeting held on 13th March, 2020 vide Item No.2 and subsequently made by the Board of Deans at its meeting held on 26th June, 2020 vide item No. 11 (1) have been accepted by the Academic Council at its meeting held on 23rd July, 2020 vide item No.4.21 and that in accordance therewith, the revised syllabus as per the (CBCS) of T.Y.B.A. Sem – V &VI in Psychology has been brought into force with effect from the academic year 2020 -21 accordingly. (The same is available on the University's website www.mu.ac.in).

MUMBAI – 400 032
11th November, 2020

(Dr. Vinod Patil)
I/c REGISTRAR

To

The Principals of the affiliated Colleges and Directors of the recognized Institutions in Humanities Faculty. (Circular No. UG/334 of 2017-18 dated 9th January, 2018.)

A.C/4.21/23/07/2020

****

No. UG/ 31 -A of 2020-21 MUMBAI-400 032 11th November, 2020

Copy forwarded with Compliments for information to:-

1) The Dean, Faculty of Humanities,
2) The Chairman, Board of Studies in Psychology,
3) The Director, Board of Examinations and Evaluation,
4) The Director, Board of Students Development,
5) The Co-ordinator, University Computerization Centre,

(Dr. Vinod Patil)
I/c REGISTRAR

Copy to :-

1. **The Director of Board of Student Development.,**
2. **The Deputy Registrar (Eligibility and Migration Section)**
3. **The Director of Students Welfare,**
4. **The Executive Secretary to the to the Vice-Chancellor,**
5. **The Pro-Vice-Chancellor**
6. **The Registrar and**
7. **The Assistant Registrar, Administrative sub-centers, Ratnagiri, Thane & Kalyan, for information.**

1. **The Director of Board of Examinations and Evaluation**
2. **The Finance and Accounts Officers**
3. **Record Section**
4. **Publications Section**
5. **The Deputy Registrar, Enrolment, Eligibility and Migration Section**
6. **The Deputy Registrar (Accounts Section), Vidyanagari**
7. **The Deputy Registrar, Affiliation Section**
8. **The Professor-cum- Director, Institute of Distance and Open Learning Education,**
9. **The Director University Computer Center (IDE Building), Vidyanagari,**
10. **The Deputy Registrar (Special Cell),**
11. **The Deputy Registrar, (PRO)**
12. **The Deputy Registrar, Academic Authorities Unit (1 copies) and**
13. **The Assistant Registrar, Executive Authorities Unit**

They are requested to treat this as action taken report on the concerned resolution adopted by the Academic Council referred to in the above circular and that on separate Action Taken Report will be sent in this connection.

1. **The Assistant Registrar Constituent Colleges Unit**
2. **BUCTU**
3. **The Deputy Accountant, Unit V**
4. **The In-charge Director, Centralize Computing Facility**
5. **The Receptionist**
6. **The Telephone Operator**
7. **The Secretary MUASA**
8. **The Superintendent, Post-Graduate Section**
9. **The Superintendent, Thesis Section**

for information.

Choice Based Credit System (CBCS)
T.Y.B.A. Psychology Syllabi to be implemented from 2020-2021

Paper IV: Psychological Testing and Statistics: Parts I and II

Code	Sem.	Course Title	Credits	Marks
UAPS501	5	Psychological Testing and Statistics: Part I	4	100
UAPS601	6	Psychological Testing and Statistics: Part II	4	100

Learning Objectives -

1) To have students build knowledge and understanding of the nature, uses, technical features, and the process of construction of psychological tests
2) To create awareness among students about measurement of intelligence and assessment of personality
3) To have students build knowledge and understanding of the concepts in Statistics and the various measures of Descriptive Statistics - their characteristics, methods of calculation, uses and applications
4) To create a foundation in students for advanced learning of Psychological Testing, Assessment and Statistics

Semester 5

Psychological Testing and Statistics: Part I (Credits = 4) 4 lectures per week

Unit 1. Psychological Testing, Assessment and Norms

a) Definition of testing and assessment; the process and tools of assessment
b) The parties and types of settings involved
c) What is a 'Good Test'; Norms – sampling to develop norms, types of norms, fixed reference group scoring systems, norm-referenced versus criterion-referenced evaluation; culture and inference

Unit 2. Reliability

a) The concept of Reliability; sources of error variance
b) Reliability estimates: Test-Retest, Parallel and Alternate Forms, Split-Half, Inter-Item Consistency – Kuder-Richardson, Cronbach's Coefficient Alpha; Inter-Scorer Reliability
c) Using and interpreting a coefficient of Reliability – purpose of the Reliability coefficient, nature of the test, the true score model of measurement and alternatives to it
d) Reliability and individual scores: SEM and SE-Difference

Unit 3. Validity and Measures of central tendency

a) The concept of validity; Face and Content validity
b) Criterion-related validity and Construct validity
c) Validity, bias and fairness
d) Calculation of mean, median and mode of a frequency distribution; the assumed mean method for calculating the mean
e) Comparison of measures of central tendency: Merits, limitations, and uses of mean, median and mode

Unit 4. Types of scores, Types of scales, Frequency distribution, Graphical representations

a) Continuous and discrete scores – meaning and difference; Nominal, ordinal, interval and ratio scales of measurement
b) Preparing a Frequency Distribution; advantages and disadvantages of preparing a frequency distribution; smoothed frequencies: method of running averages
c) Graphical representations: Frequency polygon, histogram, cumulative frequency curve, ogive, polygon of smoothed frequencies.

Semester 6

Psychological Testing and Statistics: Part II (Credits = 4) 4 lectures per week

Unit 1. Test Development and Correlation

a) Test conceptualization and Test construction
b) Test tryout and Item analysis
c) Test revision
d) Meaning and types of correlation – positive, negative and zero; Graphic representations of correlation - Scatterplots
e) The steps involved in calculation of Pearson's product-moment correlation coefficient
f) Calculation of rho by Spearman's rank-difference method; Uses and limitations of correlation coefficient
g) Simple Regression and Multiple Regression

(Unit 1-e is only for theoretical understanding and questions, not for calculation in the exam.)

Unit 2. Measurement of Intelligence, Intelligence Scales, Probability, Normal Probability Curve and Standard scores

a) What is Intelligence? - Definitions and theories; measuring Intelligence
b) The Stanford-Binet Intelligence Scales and the Wechsler Scales
c) The concept of Probability; laws of Probability; Characteristics, importance and applications of the Normal Probability Curve; Area under the Normal Curve
d) Skewness- positive and negative, causes of skewness, formula for calculation; Kurtosis - meaning and formula for calculation
e) Standard scores – z, t, Stanine; Linear and non-linear transformation; Normalized Standard scores

Unit 3. Assessment of Personality

a) Personality Assessment – some basic questions: who, what, where, how; Developing instruments to assess personality – logic and reason, theory, data reduction methods, criterion groups; personality assessment and culture
b) Objective methods of personality assessment
c) Projective methods of personality assessment - Inkblots as Projective stimuli - the Rorschach; Pictures as Projective stimuli – Thematic Apperception Test; Projective methods in perspective

Unit 4. Measures of Variability, Percentiles, and Percentile Ranks

a) Calculation of measures of variability: Range, Quartile Deviation and Standard Deviation
b) Comparison of measures of variability: Merits, limitations, and uses .
c) Calculation of Percentile ranks and Percentile Scores.
d) Percentiles – nature, merits, limitations, and uses.

Learning Outcomes-

a) The learner will -
   1. develop knowledge and understanding of the nature, uses, technical features, and the process of construction of psychological tests.
   2. develop awareness about measurement of intelligence and assessment of personality.
   3. be equipped with the knowledge about the concepts in Statistics and the various measures of Descriptive Statistics - their characteristics, uses, applications and methods of calculation.

b) The learner will build a firm foundation, which will be helpful for advanced learning of Psychological Testing, Assessment and Statistics in postgraduate studies.

Question Paper Pattern for T.Y.B.A (CBCS)
for Core Course IV Psychological Testing and Statistics.
With Effect From 2020-2021

Duration: 3 hrs **Total marks: 100**

Note: **1.** Attempt **all** questions
2. All questions carry **equal** marks

Q.1 (Based on Module I) (20 marks)
a.
or
b.

Q.2 (Based on Module II) (20 marks)
a.
or
b.

Q.3 (Based on Module III) (20 marks)
a.
or
b.

Q.4 (Based on Module IV) (20 marks)
a.
or
b.

Q.5 Attempt **any two** (Based on Module I, II, III and IV) (20 marks)
a.
b.
c.
d.

Semester 5 – sample question paper pattern

Q.1	Unit 1 A **OR** B	20
Q.2	Unit 2 A **OR** B	20
Q.3	Unit 3 A – Validity **OR** B – Calculation of the mean ,median and mode (17 marks and Theory question 03 marks)	20
Q.4	Unit 4 A- Theory Question on Continuous and discrete scores – meaning and difference; Nominal, ordinal, interval and ratio scales of measurement, steps in preparing a frequency distribution table, advantages and disadvantages of preparing a frequency distribution; smoothed frequencies: method of running averages. **OR** B - being a question based on tabulation of scores into a frequency distribution table, Calculation of range, justifying the choice of the length of class Interval.	20
Q5	any two (each question of 10 marks) A unit 1 B unit 2 C unit 3 D unit 4 Graph 5 marks theory question on graphical representations 5 marks.	20

Semester 6 - sample question paper pattern

Q.1	Unit 1 test development A **OR** B calculation of correlation using rank order method 15 marks theory 5 marks	20
Q.2	Unit 2 A unit 2 a and b **OR** B unit 2 c, d and e	20
Q.3	Unit 3 A	20

	OR B	
Q.4	Unit 4 A-Theory question on Measures of variability **OR** B - Calculation of QD or SD	20
Q5	any two (each question of 10 marks) A unit 1 B unit 2 C unit 3 D unit 4 - Calculation of Percentiles and Percentile Ranks	

Paper V: Abnormal Psychology: Part I and Part II

Code	Sem	Course Title	Credits	Marks
UAPS502	5	Abnormal Psychology: Part I	4	100
UAPS602	6	Abnormal Psychology: Part II	4	100

Learning Objectives -

1) To have students build knowledge and understanding of the basic concepts in Abnormal Psychology and the theories of Abnormality
2) To have students build knowledge and understanding of the different Psychological Disorders – their symptoms, diagnosis, causes and treatment
3) To create awareness among students about Mental Health problems in society
4) To create a foundation in students for higher education and a professional career in Clinical Psychology

Semester 5

Abnormal Psychology: Part I (Credits = 4) 4 lectures per week

Unit 1: Understanding Abnormal Behavior: Clinical Assessment and Diagnosis

a) What do we mean by Abnormality? - The DSM 5 and the Definition of Mental Disorders.
b) Historical views of Abnormal Behaviour - The Emergence of Contemporary views of Abnormal Behaviour.
c) The Basic elements in Assessment - Physical Assessment and Psychosocial Assessment.
d) Classifying Abnormal Behaviour.

Unit 2: Causal factors and Viewpoints

a) Causes and Risk factors for Abnormal Behaviour.
b) Viewpoints for Understanding the Causes of Abnormal Behaviour: The Biological viewpoint, The Psychological viewpoints.
c) Psychological Factors, The Sociocultural Viewpoints.

Unit 3: Panic, Anxiety, Obsessions and Their Disorders

a) The Fear and Anxiety Response Patterns - Specific Phobias, Social Phobias, Panic Disorder and Agoraphobia.
b) Generalised Anxiety Disorder.
c) Obsessive-compulsive and Related Disorders.

Unit 4: Somatic Symptom and Dissociative Disorders

a) Somatic Symptom and Related Disorders - Hypochondriasis, Somatisation Disorder, Pain Disorder, Illness anxiety disorder.
b) Conversion Disorder - Distinguishing Somatic Symptom Disorders from Malingering and Factitious Disorder.
c) Dissociative disorders - Depersonalisation/Derealisation Disorder, Dissociative Amnesia and Dissociative Fugue, Dissociative Identity Disorder.

Semester 6

Abnormal Psychology: Part II (Credits = 4) 4 lectures per week

Unit 1: Schizophrenia and other Psychotic Disorders

a) Clinical Picture and Subtypes of Schizophrenia.
b) Other Psychotic Disorders: Schizoaffective Disorder, Schizophreniform Disorder, Delusional disorder and Brief Psychotic Disorder.
c) Risk and Causal factors: Genetic Factors, Neurodevelopmental Perspective, Neurochemistry, Psychosocial and CulturalFactors.

Unit 2: Mood Disorders and Suicide

a) Unipolar Depressive Disorders: Dysthymia Disorder, Major Depressive Disorder.
b) Causal Factors in Unipolar Mood Disorders - Biological Causal Factors, Psychological Causal Disorders
c) Bipolar and Related Disorders: Cyclothymic Disorder, Bipolar Disorder (I and II) and Causal Factors in Bipolar Disorders: Biological and Psychological Causal Factors.
d) Sociocultural Factors Affecting Unipolar and Bipolar Disorders, Treatment and Outcomes.
e) Suicide: The Clinical Picture and the Causal Pattern.

Unit 3: Personality Disorders

a) Clinical features of Personality Disorders.
b) Cluster A, Cluster B and Cluster C Personality Disorders.
c) General Sociocultural Causal factors, Treatments for Personality Disorders.

Unit 4: Sexual Variants, Abuse and Dysfunctions

a) Sociocultural Influence on Sexual Practises and Standards.
b) The Paraphilias: Causal Factors and Treatment for Paraphilias.
c) Gender Dysphoria, Sexual Abuse.
d) Sexual Dysfunctions: Forms and Treatment.

Learning Outcomes:

a). The learner will
1. Develop an understanding of the basic concepts and theories of Abnormal Psychology.
2. develop insight into various forms of Psychological Disorders – their symptoms, causes, along with the process of diagnosis and treatment.
3. become more sensitised and equipped to deal with various issues related to Mental Health in society.

b). The learner will build foundational knowledge of Abnormal Psychology which will help the learner for higher education and also to pursue a professional career in Clinical Psychology.

Paper VI: Industrial/Organizational Psychology: Part I and Part II
(Major Elective; Applied Component)

Code	Sem	Course Title	Credits	Marks
UAPS503	**V**	**Industrial/Organizational Psychology: Part I**	**3.5**	**100 (80+20)**
UAPS603	**VI**	**Industrial/Organizational Psychology: Part II**	**3.5**	**100 (80+20)**

Learning Objectives -

1. To help learners understand and build knowledge about the basic concepts in the field of Industrial/Organizational Psychology.
2. To help learners learn about the role and importance of psychological factors and processes in the world of work.
3. To facilitate in learners a foundation for higher education and a professional career in Industrial Psychology and Organizational Behaviour.

Semester 5

Industrial/Organizational Psychology: Part I (Credits = 3.5) (3 lectures per week)

Unit 1: Introduction to Industrial/Organizational Psychology & Job Analysis

A: Introduction to Industrial/Organizational Psychology

a) What Is I/O Psychology?
b) I/O Psychology as a profession & as a science
c) History of the field of I/O Psychology

B: Job Analysis

a) What is job analysis: The job-oriented approach & the person-oriented approach.
b) Purposes of job analysis.
c) How job analysis information is collected; approaches to collecting job analysis information
d) Methods of job analysis
e) Job evaluation: setting salary levels

Unit 2.Performance Appraisal

a) Why do we appraise employees?
b) Performance criteria
c) Methods for assessing job performance: Objective and subjective methods for assessing job performance; 360-degree feedback

Unit 3: Assessment Methods for Selection and Placement & Recruitment

A: Assessment Methods for Selection and Placement

a) Job-Related characteristics.
b) Different types of psychological tests based on format: group vs. individual, close-ended vs. open-ended; paper-and-pencil vs. performance; power vs. speed
c) Different types of psychological tests based on what is measured: cognitive ability tests, psychomotor ability tests, knowledge and skills tests, personality tests, emotional intelligence tests, integrity tests, vocational interest tests
d) Biographical information, interviews, work samples, assessment centers & electronic assessment.

B. Recruitment

a) Recruiting applicants
b) Getting applicants to accept and keep jobs offered
c) Policies and issues with regard to selection: Reservation policy; gender and disability status of applicant

Unit 4. **Training**

a) Needs assessment
b) Objectives
c) Training design: trainee characteristics; design factors; work environment
d) Training methods: Audiovisual instruction, autoinstruction, conference/lecture, on-the-job training, modeling/role-playing/simulation, e-learning, mentoring/executive coaching
e) Brief overview of delivery and evaluation of a training program

Semester 6

Industrial/Organizational Psychology: Part II (Credits = 3.5) (3 lectures per week)

Unit 1. Theories of Employee Motivation

a) What is motivation?
b) Work motivation theories& need theories
c) Other Theories: Reinforcement theory, expectancy theory and self-efficacy theory; justicetheories; goal-setting theory, control theory and action theory

Unit 2: Job Satisfaction & Productive and Counterproductive Employee Behaviour

A. Job Satisfaction

a) The nature of job satisfaction; how people feel about their jobs
b) Assessment of job satisfaction
c) Antecedents of job satisfaction
d) Potential effects of job satisfaction

B. Productive and Counterproductive Employee Behaviour

a) Organizational Citizenship Behaviour (OCB)
b) Counterproductive work behaviour (CWB): Withdrawal
c) Counterproductive work behaviour: Aggression, sabotage, and theft; labour unrest and strikes

Unit 3: Work Groups, Work Teams & Leadership and Power in Organizations

A. Work Groups and Work Teams

a) Difference between work groups and work teams
b) Important group and team concepts

B. Leadership and Power in Organizations

a) What is leadership?
b) Sources of influence and power; abuse of supervisory power: sexual and ethnic harassment
c) Approaches to the understanding of leadership
d) Women in leadership positions; gender differences in leadership style; cross-cultural differences in leadership

Unit 4. Organizational Development and Theory

a) Organizational Development
b) Organizational Theories

Learning Outcomes:

1. Learners will be able to
   a) describe the scope of I/O Psychology and careers related to I/O Psychology.
   b) list and describe the basic concepts of I/O Psychology.
   c) critically discuss issues related to I/O Psychology.
2. Learners will have built a sufficient foundation in I/O Psychology to pursue postgraduate studies and/or careers related to I/O Psychology.

a.
or
b.

Q.4 (Based on Unit IV) (20 marks)

a.
or
b.

Project Work (Total = 20 marks)

Guidelines for Project Work TYBA – Psychology Paper VI

As per the above guidelines given by the University, the students have to submit a project for each of the elective courses VI and IX for every semester V and VI. The College has to declare the final date of submission.

Types of projects that can be done –

1. Small survey (using interviews/questionnaires)
2. Presentation in class
3. Conduct a workshop for a small group
4. Field visit
5. Literature review
6. Preparation of charts/posters (educational aids and class presentation/exhibition)
7. Case studies - 3 to 4

The topic of the Project may be from the syllabus of the respective papers or closely related to it. For I/O Psychology, students can get ideas for their project from the "**Learning by Doing**" section at the end of each chapter in the prescribed textbook.

Project report:

1. Word Limit – 1000 to 2000 words, A-4 size paper
2. Page limit – 8 - 10 pages of actual report. (Title page, index, Bibliography, List of tables and figures, Appendix etc are not included)
3. Project report may be typed or handwritten.

Marks for passing 7 out of 20

Project of high quality may be given maximum 18-19 marks out of 20.

Paper VII: Cognitive Psychology: Parts I and Part II

Code	Sem.	Course Title	Credits	Marks
UAPS504	**5**	**Cognitive Psychology: Part I**	**4**	**100**
UAPS604	**6**	**Cognitive Psychology: Part II**	**4**	**100**

Learning Objectives:

1. To have students build knowledge and understanding of the fundamental concepts of Cognitive Psychology and the basic Cognitive processes
2. To create awareness among students about the various applications of Cognitive processes in everyday life and a foundation to enable understanding of their applications in other fields - Social, Educational, Industrial, Abnormal, Counselling, Sports, Health, Education, and Neuro-Psychology
3. To have students understand the theoretical orientation and background for the courses on Practicum in Cognitive Processes
4. To create a foundation in students for higher education and a career in the field of Cognitive Psychology

Semester 5

Cognitive Psychology: Part I (Credits = 4) 4 lectures per week

Unit I: Perception: Recognizing Patterns and Objects

a) Introduction & Fundamental Concepts
b) Human Perceptual Systems
c) Recognition

d) Social Perception

Unit II: Attention and Consciousness

a) Introduction
b) Attention
c) Consciousness

Unit III. Sensory, Short Term and Working Memory

a) Introduction
b) Sensory Memory
c) Short Term Memory
d) Working Memory

Unit IV: Long-Term Memory

a) Introduction
b) Memory and amnesia
c) The structure of LTM
d) Non-declarative memory
e) Declarative memory

Semester 6.

Cognitive Psychology: Part II (Credits = 4) 4 lectures per week

Unit I. Learning, Forgetting and Imagery

a) Introduction
b) Learning: Encoding, storage and retrieval
c) Forgetting
d) Everyday/ Real world memory
e) Imagery and Concepts

Unit II. Problem Solving

a) Introduction
b) Problems and problems types
c) Brief history and background
d) Insight revisited
e) Knowledge rich (expert) problem solving
f) Creative problem solving

Unit III: Decision Making

a) Introduction
b) Expected value theory
c) Utility and prospect theory
d) Subjective probability and prospect theory
e) Making probability judgments
f) The affect heuristic
g) Decision processes for multi-attribute alternatives
h) Two-system approaches to decision making
i) Fast and frugal heuristic: the adaptive toolbox
j) Naturalistic decision making
k) Neuroeconomics: Neuroscience approaches to decision making

Unit IV: Reasoning

a) Introduction
b) Deductive reasoning
c) Inductive reasoning: Testing and generating hypotheses

Note – As an Orientation to this course, the following sub-topics should be taught in brief in 2 or 3 lectures (questions will not be set on these sub-topics in the semester-end examination)

1. Cognitive psychology: History, approaches, and cognitive neuroscience

Learning Outcomes:

a). The learner will

1. develop understanding of the basic concepts and theories of Cognitive Psychology.
2. develop insight into theoretical aspects of cognitive processes

b). The learner will build foundational knowledge of Cognitive Psychology which will help the learner for higher education and also to pursue a professional career in any of the several areas of Psychology.

Paper VIII: Practicals in Cognitive Processes and Psychological Testing

Code	Sem	Course Title	Credits	Marks
UAPS505	**5**	**Practicals in Cognitive processes and psychological Testing: Part I**	**4**	**100**
UAPS605	**6**	**Practicals in Cognitive processes and psychological Testing : Part II**	**4**	**100**

Learning Objectives-

To facilitate the understanding of theoretical concepts of experimental psychology through experiential learning, learn the processes involved in scientific inquiry, develop critical approach and understand use of statistical analysis in psychological research by

a) introducing the students to Practicals in Cognitive Processes and Psychological Testing: through practice and conduct of experiments, use of statistical analysis, interpretation and discussion of data, using APA format for report writing.
b) introducing the students to Psychological Testing: administration, scoring and interpretation of the psychological tests, understanding the concepts of reliability and validity and nuances of procedures and ethical issues.
c) orienting the students to computer-based experiments (Coglab) and sensitize them to methodological issues, strengths and limitations of use of computers for conducting experiments in psychology.
d) Helping students develop skills for evaluation of a research paper and write a research report.

Semester 5

Part I: Practicals in Cognitive Processes and Psychological Testing (Credits =4) (6 lectures per week per Batch of 8 students)

A. Introduction to Experimental Psychology and Statistics in Psychological Research

1. Variables – Types, Operational definition
2. Designs – Types (one IV and two IV), Sampling, Randomization and Counterbalancing
3. Hypotheses – Types – Null and Alternative
4. Statistical Analysis –Inferential statistics - t test, F Test, statistical significance
5. Introduction to Scales of Measurement
6. Report writing – APA format

B. Practice Exercises – Two exercises

1. Experimental Situation given – Discuss design, hypothesis, IV, DV, Control Variables, Statistical Analysis, Ethical Issues.
2. Variables given – Design experiment, frame hypothesis, discuss Statistical Analysis, Ethical Issues.

C. Practice Experiment – One

1. Conduct the experiment

2. Review Original Article
3. Write result and discussion of group data using APA format

D. Two Experiments in Cognitive Processes

1. Conduct the experiments
2. Pool group data
3. Use appropriate statistics
4. Write report – abstract, introduction, method, result (Individual and group), discussion, conclusion

E. **One Psychological Test**

1. Administration, Scoring and Interpretation of the Test
2. Writing report on the findings of the test
3. Calculate Reliability / Validity of the test

Part II: Practicals in Cognitive Processes and Psychological Testing (Credits =4) (6 lectures per week per Batch of 8 students)

A. Introduction to Experimental Psychology and Statistics in Psychological Research

1 Designs - Complex (Mixed)
2. Statistical Analysis – Inferential statistics – ANOVA, Chi Square

B. Review a research paper

C. Two Experiments in Cognitive Processes

1. Conduct the experiments
2. Pool group data
3. Use appropriate statistics
4. Write report – abstract, introduction, method, result (Individual and group), discussion, conclusion

D. One Psychological Test

1. Conducting and debriefing
2. Write report

E. One Computer-based Experiment (Coglab)

F. Use of Excel

1. Introduction to Excel
2. Statistical Analysis of both the experiments

Learning Outcomes –

After studying this paper, students will able to…

1. Translate theoretical concepts into application-based experiments.
2. Conduct experiments following standardized procedure.
3. Apply statistical tests and analyze the data collected.
4. Write reports on research conducted using APA format.
5. Make sense of the research papers on any given topic

Distribution of Marks

Internal 40 marks Practical examination of 2 hours 60 marks

Distribution of Marks		
Internal marks		
1	Checklist for Instructions	10
2	Checklist for Conduct	10
3	Report Writing	10
4	Attendance	05
5	Journal	05
Examination Practical		
	Instructions, Conduct, report	40

	Viva	20

The teacher has to give marks for each report. The final marks will be the average marks obtained for each point as mentioned above.

During Examination, checklists for Instructions, Conduct and report. In viva 6 questions of 3 marks and one question of 2 marks will be asked.

Paper IX: Counselling Psychology: Part I and Part II
(Major Elective; Applied Component)

Code	Sem	Course Title	Credits	Marks
UAPS506	**V**	**Counselling Psychology : Part I**	**3.5**	**100 (80+20)**
UAPS606	**VI**	**Counselling Psychology: Part II**	**3.5**	**100 (80+20)**

Learning Objectives –

1. To have students develop an interest in and an understanding of Counselling concepts
2. To have students understand counsellor's roles and responsibilities in practice environments
3. To have students build knowledge and understanding of the basic skills in practice
4. To help students understand the theoretical foundations underlying different counselling and psychotherapeutic approaches
5. To create a foundation in students for higher education in Counselling and a career as a professional counselor

Semester 5

Counselling Psychology:

Part I- Introduction and Approaches to counselling (Credits = 3.5) (3 lectures per week)

Unit 1: Introduction to Counselling: (***Egan & Resse, Chapters 1 and 3***)

a) Role of formal and informal helpers, key ingredients of successful helping, focus on client and context- what client brings in sessions, defining **s**uccess in terms of outcomes with life-enhancing impact for the client, qualities of effective helper.

b) Role of beliefs, values, norms, and moral principles in the helping process. Helping clients redo poor decisions and make and execute life-enhancing decisions.

c) Developing working alliance, key values that drive the working alliance, behaviours showing disrespect & respect.

d) Appreciating the role of culture, personal culture, and values, competencies related to client diversity and culture, promoting self-responsibility by helping clients develop and use self- efficacy.

Unit 2. Psychoanalytic, Adlerian, Humanistic, Behavioral, Cognitive Theories of Counselling (***Gladding , chapters 9&10)***

a) Psychoanalytic theories, Adlerian theory, Humanistic theories

b) Behavioural counselling, Cognitive and Cognitive-Behavioural Counselling

Unit 3. Systemic, Brief, Crisis Theories and Group Counselling ***(Gladding, chapters10 &11)***

a) Systems theories, brief counselling approaches, Crisis and trauma counselling approaches.

b) A brief history of groups, benefits, drawbacks and types of groups. Theoretical approaches in conducting groups, stages in groups.

Unit 4. Counselling in Diverse Groups (*Gladding, Chapters 5 & 19)*

a) Counselling aged populations, gender-based counselling, counselling and sexual orientation.

b) Abuse & Addiction Counselling

Semester 6

Counselling Psychology:

Part II- Micro skills in Counselling practice (Credits = 3.5) (3 lectures per week

Unit 1. Therapeutic Presence: Importance of Listening

a) Dialogue as the second nature to interactions with clients, basic guidelines for visibly tuning in to clients. Nonverbal behaviour as a channel of communication. Active listening as the foundation of understanding.
b) Forms of poor listening, processing information from client in a thoughtful search for meaning.
c) Importance of listening to helpers own internal conversation, key ingredients of successful therapy, dealing with distorted listening.

Unit 2. Empathic Responding (*Egan & Resse, Chapter 5*)

a) Importance of responding skills in developing relationships with clients-empathy as a communication skill to develop relationships, wider view of empathy
b) Three dimensions of responding skills- perceptiveness as the foundation of responding skills, basic know-how of responding well, assertiveness in responding to clients
c) Basic formula for communicating empathy- responding accurately to clients' feelings, emotions, and moods, responding accurately to the key experiences, thoughts, and behaviours in clients' stories, tactics for responding with empathy, responding to the context, using empathy to achieve therapeutic goals

Unit 3. Other Skills (*Egan & Resse, Chapters 6,7,8)*

A. Art of Probing , Summarizing

a) Probing, verbal and nonverbal prompts, types of probing, guidelines for using probes, probes with empathic response.
b) Using Summaries: Use summaries when they add value, get clients to provide summaries, use of summaries and probes in the case of Marcus and Andréa.

B. Challenging &Self disclosure

a) Challenging: concept of self-challenge, targets of self challenge, identifying blind spots, skills to challenge blind spots.
b) Helpers self - disclosure

C. Dealing with Resistance: identifying and dealing with reluctance and resistance

Unit 4. The stages and tasks of problem management (*Egan & Resse, Chapters 9, 10, 11*)

A. Tasks of Stage I- Challenges clients face in talking about themselves, Case illustration, principles that can guide to help clients tell their stories- feel safe, styles of storytelling, starting where the client starts, assessing severity of problems, helping clients identify and clarify key issues, exploring context of key issues.

B. Help clients tell their real stories, case illustration, help clients challenge the quality of their participation. Help clients focus on the right story, choosing issues that will make a difference in their lives , challenging to make right decisions.

C. Tasks of Stage II- Help clients determine what kind of change they need or want, help clients distinguish needs from wants, continuum between first-order and second-order change, power of goal setting guidelines to help clients set goals, helping clients commit themselves to their goals.

D. Tasks of Stage III-Help clients develop strategies for accomplishing their goals – brainstorming, frameworks, finding social support, skills, strategies. Choosing goal-accomplishing strategies, balance-sheet method for choosing strategies, choosing evidence-based treatments.

Learning Outcomes:

Student will able to…

1. identify unique features of Counselling as a profession.
2. understand the process to be followed while helping people and roles and responsibilities of the counselor.
3. identify key ingredients necessary for successful helping.

4. understand micro-skills required to practice Counselling.
5. understand theoretical foundations underlying different counselling and psychotherapeutic approaches and critically evaluate the strengths, limitations associated with each of them.
6. feel motivated to seek further training to practice Counselling.

Question Paper Pattern for T.Y.B.A (CBCS)

for Major Elective; Applied Component (Counselling Psychology: Part I and Part II)

Note: 1. Attempt **all** questions (Total = 80 marks)
2. All questions carry **equal** marks

Q.1 (Based on Unit I) (20 marks)
a.
or
b.

Q.2 (Based on Unit II) (20 marks)
a.
or
b.

Q.3 (Based on Unit III) (20 marks)
a.
or
b.

Q.4 (Based on Unit IV) (20 marks)
a.
or
b.

Project Work (Total = 20 marks)

Guidelines for Project Work TYBA – Psychology Paper IX

As per the above guidelines given by the University, the students have to submit a project for each of the elective courses VI and IX for every semester V and VI. The College has to declare the final date of submission.

Types of projects that can be done –

1. Small survey (using interviews/questionnaires)
2. Presentation in class
3. Conduct a workshop for a small group
4. Field visit
5. Literature review
6. Preparation of charts/posters (educational aids and class presentation/exhibition)
7. Case studies - 3 to 4

The topic of the Project may be from the syllabus of the respective papers or closely related to it.

Project report:

4. Word Limit – 1000 to 2000 words, A-4 size paper
5. Page limit – 8 - 10 pages of actual report. (Title page, index, Bibliography, List of tables and figures, Appendix etc are not included)
6. Project report may be typed or handwritten.

Marks for passing 7 out of 20

Project of high quality may be given maximum 18-19 marks out of 20

REVISED SYLLABUS
AS PER CHOICE BASED CREDIT SYSTEM (CBCS)
(TO BE IMPLEMENTED FROM THE ACADEMIC YEAR 2016-17)

FYBA
POLITICS PAPER I

SEMESTER I
TITLE: INDIAN POLITICAL SYSTEM

SUB-TITLE: THE CONSTITUTIONAL FRAMEWORK

1. INTRODUCTION TO THE CONSTITUTION (12)
- 1.1 BRIEF HISTORY OF THE MAKING OF CONSTITUTION
- 1.2 PREMABLE
- 1.3 BASIC FEATURES

2. CITIZENS AND THE CONSTITUTION (11)
- 2.1 FUNDAMENTAL RIGHTS – ARTS 14 TO 19
- 2.2 FUNDAMENTAL RIGHTS –ARTS- 20 TO 32
- 2.3 DIRECTIVE PRINCIPLES OF STATE POLICY

3. LEGISLATURE AND JUDICIARY (11)
- 3.1 PARLIAMENT
- 3.2 JUDICIAL SYSTEM – ORIGINAL AND WRIT JURISDICTION
- 3.3 JUDICIAL ACTIVISM

4. EXECUTIVE (11)
- 4.1 UNION EXECUTIVE - THE PRESIDENT
- 4.2 PRIME MINISTER AND COUNCIL OF MINISTERS
- 4.3 LOCAL SELF-GOVERNMENT – 73rd,74th, AMENDMENTS AND THEIR IMPLEMENTATION

SUGGESTED READINGS:

1. Basu, Durga Das, Introduction to the Constitution of India, Lexis Nexis, 2012.
2. Laxmikant, M, Indian Polity, TMH, 2015.
3. Laxmikant, M., Governance in India, TMH, 2015.
4. Pylee, M. V., An Introduction to the Constitution of India, Vikas Publishing, 2008.
5. Sharma, Brij Kishore, Introduction to the Constitution of India, PHI Learning, 2009.
6. क्षीरसागर, के. श्री., भारतीयराज्यव्यवस्था, विद्याप्रकाशन.
7. घांग्रेकर, चिं. ग., भारतीयराज्यघटना, श्रीमंगेशप्रकाशन, २००१.
8. जाधव, तुकाराम, आणिशिरापूरकर, महेश, भारतीयराज्यघटनावघटनात्मकप्रक्रिया, युनिकअकादमी, २०१४.

SEMESTER II
SUB-TITLE: INDIAN POLITICAL PROCESS

1. **CHANGING NATURE OF FEDERAL SYSTEM** (11)
   - 1.1 CENTRE-STATE RELATIONS WITH REFERENCE TO FISCAL AND EMERGNCY POWERS.
   - 1.2 DEMAND FOR GREATER AUTONOMY
   - 1.3 CHANGING DYNAMICS OF CENTRE-STATE RELATIONS

2. **PARTY POLITICS AND ELECTIONS**
   - 2.1 NATIONAL PARTIES - FEATURES
   - 2.2 REGIONAL PARTIES – CHARACTERISTICS
   - 2.3 ANALYSIS OF ELECTORAL PERFORANCE OF NATIONAL AND REGIONAL PARTIES SINCE 1989.

3. **SOCIAL DYNAMICS** (11)
   - 3.1 CASTE (WITH REFERENCE TO RESERVATION)
   - 3.2 RELIGION (WITH REFERENCE TO COMMUNALISM)
   - 3.3 GENDER (WITH REFERENCE TO POLITICAL PARTICIPATION)

4. **CHALLENGES TO NATIONAL SECURITY** (12)
   - 4.1 CRIMINALISATION OF POLITICS
   - 4.2 INTERNAL THREATS TO SECURITY (WITH REFERENCE TO NAXALISM AND INSURGENCY)
   - 4.3 GLOBAL TERRORISM

SUGGESTED READINGS:

मुंबई विश्वविद्यालय, मुंबई

SEMESTER – I

NAME OF PROGRAM : B.A.

NAME OF THE COURSE : F.Y.B.A. Compulsory Hindi (अनिवार्य हिन्दी)
COURSECODE : UAHINCOM 101
TOTAL LECTURES : 60
CREDITS : 3

Aims and Objectives:

१.विद्यार्थियों को कविता और कहानी विधाओं के अतिरिक्त हिन्दी के प्रमुख साहित्यकारों से परिचित कराना।
२.अनुवाद और पत्र लेखन की कला का ज्ञान देना।
३.विद्यार्थियों की भाषा को समृद्ध करना।

निर्धारित पाठ्य पुस्तकें :

1. काव्य सरिता: संपादन: हिंदी अध्ययन मंडल, मुंबई विश्वविद्यालय, मुंबई
परिदृश्य प्रकाशन, मरीन लाईन्स,मुंबई-400002

१.भारत माता का मंदिर	- मैथिलीशरण गुप्त
२.सब जीवन बीता जाता है	- जयशंकर प्रसाद
३.भर देते हो	- सूर्यकांत त्रिपाठी निराला
४.बापू के प्रति	- सुमित्रानंदन पंत
५.यह मंदिर का दीप	- महादेवी वर्मा
६. शक्ति और क्षमा	- रामधारी सिंह दिनकर
७.पुष्प की अभिलाषा	- माखनलाल चतुर्वेदी
८.वे और तुम	- नागार्जुन
९.रीढ़ की हड्डी	- हरिवंश राय बच्चन
१०.आज का दैनिक	- भवानी प्रसाद मिश्र

2. कथा दर्पण: संपादन:हिंदी अध्ययन मंडल, मुंबई विश्वविद्यालय, मुंबई

अमन प्रकशन,रामबाग,कानपुर -208012

१.मनोवृत्ति	- प्रेमचंद
२.व्रत भंग	- जयशंकर प्रसाद
३.प्रलय की रात्रि	- सुदर्शन
४.इनाम	- जैनेंद्रकुमार
५.महादान	- यशपाल
६.प्रायश्चित	- भगवतीचरण वर्मा
७. ठेस	- फणीश्वरनाथ रेणु
८.निष्कासित	- गोविंद मिश्र

- **पत्र लेखन -**

  अनौपचारिक : बधाई,निमंत्रण,क्षमा याचना पत्र

  औपचारिक : आवेदन,सुझाव, संपादक के नाम (शिकायती एवं सुझाव पत्र)

- **भाषा ज्ञान -**

  वर्तनी की शुद्धता, संज्ञा, सर्वनाम, विशेषण, क्रिया शब्दों को वाक्य में पहचानना

- **अनुवाद** (अंग्रेजी से हिन्दी में)

प्रथम सत्र यूनिट विभाजन

1) काव्य सरिता :

यूनिट १ - व्याख्यान ११	- १ से ५ तक कविताएँ
यूनिट २–व्याख्यान११	- ६ से १० तक कविताएँ

2) कथा दर्पण :

यूनिट ३ - व्याख्यान ११	- १ से ४ तक कहानियाँ
यूनिट ४ - व्याख्यान ११	- ५ से ८ तक कहानियाँ
यूनिट ५ - **क** - व्याख्यान ८	- पत्र लेखन
ख- व्याख्यान ८	- भाषा ज्ञान तथा अनुवाद

प्रथम सत्रांत परीक्षा के प्रश्न पत्र का प्रारूप

कुल अंक : १०० **समय : ३ घंटे**

प्रश्न १. संदर्भ सहित व्याख्या (कविता और कहानी में दोनों से विकल्प सहित) २० अंक

प्रश्न २. दीर्घोत्तरी प्रश्न (कविता और कहानी दोनों में से विकल्प सहित) ३० अंक

प्रश्न ३. टिप्पणियाँ (कविता और कहानी दोनों में से विकल्प सहित) १० अंक

प्रश्न ४. वस्तुनिष्ठ प्रश्न १० (कविता और कहानी दोनों में से) १० अंक

प्रश्न ५. पत्र लेखन (दो में से एक) १० अंक

प्रश्न६. **(अ)भाषा ज्ञान** १० अंक

१. वर्तनी की शुद्धता
२. संज्ञा
३. सर्वनाम
४. विशेषण
५. क्रिया

(आ) अनुवाद (अंग्रेजी से हिन्दी में) १० अंक

----------*******----------

SEMESTER – II

NAME OF PROGRAM : B.A.

NAME OF THE COURSE : F.Y.B.A. Compulsory Hindi (अनिवार्य हिन्दी)

COURSECODE : UAHINCOM 201

TOTAL LECTURES : 60

CREDITS : 3

Aims and Objectives:

१. निबंध लेखन और संवाद लेखन द्वारा भावों एवं विचारों की अभिव्यक्ति में सक्षम बनाना।
२. मुहावरों और व्याकरण के माध्यम से विद्यार्थियों की भाषाको समृद्ध करना।
३. विद्यार्थियों में लेखन के दौरान होने वाली अशुद्धियों को दूर करना।

निर्धारित पाठ्य पुस्तकें :

1. काव्य सरिता : संपादन: हिंदी अध्ययन मंडल, मुंबई विश्वविद्यालय, मुंबई
परिदृश्य प्रकाशन, मरीन लाईन्स,मुंबई-400002

११ .मेरा नया बचपन - सुभद्रा कुमारी चौहान
१२.आया बसंत - सोहनलाल द्विवेदी
१३.हम ज़रूर जीतेंगे - अज्ञेय
१४.हम पंछी उन्मुक्त गगन के - शिवमंगल सिंह 'सुमन'
१५.कहीं पे धूप की चादर - दुष्यन्त कुमार
१६.काग़ज़ क़लम और स्याही - कुँवर नारायण
१७.जड़ें - सर्वेश्वर दयाल सक्सेना
१८.स्त्री - सुशीला टाकभोरे
१९.अपने घर की तलाश - निर्मला पुतुल
२०.मन कितना अभिनय शेष रहा - भारत भूषण

2. कथा दर्पण: संपादन: हिंदी अध्ययन मंडल, मुंबई विश्वविद्यालय, मुंबई
अमन प्रकशन,रामबाग,कानपुर-208012

९ .ताई	- विश्वंभरनाथ शर्मा 'कौशिक'
१०.सज़ा	- मन्नू भंडारी
११.माता-विमाता	- भीष्म साहनी
१२.पिता	- ज्ञानरंजन
१३ .वे तीन घर	- काशीनाथ सिंह
१४.दादी अम्मा	- कृष्णा सोबती
१५.हैरिटेज	- मोहनदास नैमिशराय
१६.पाँचवां बेटा	- नासिरा शर्मा

- **निबंध लेखन –**
  सामाजिक, समसामयिक, शैक्षणिक, वैचारिक, आत्मकथात्मक निबंध

- भाषा ज्ञान –
  लिंग,वचन,पर्यायवाची शब्द,विलोमार्थी शब्द, मुहावरों का वाक्य में प्रयोग
- संवाद लेखन / अपठित गद्यांश

द्वितीय सत्र यूनिट विभाजन

1. काव्य सरिता :

यूनिट १. व्याख्यान ११ - ११ से १५ तक कविताएँ
यूनिट २. व्याख्यान ११ - १६ से २० तक कविताएँ

2. कथा दर्पण :

यूनिट ३. व्याख्यान ११ - ९ से १२ तक कहानियाँ

यूनिट ४. व्याख्यान ११ - १३ से १६ तक कहानियाँ

यूनिट ५ - **क** - व्याख्यान ८ - निबंध लेखन

ख - व्याख्यान ८ - भाषा ज्ञान तथा संवाद लेखन / अपठित गद्यांश

द्वितीय सत्रांत परीक्षा के प्रश्न पत्र का प्रारूप

कुल अंक : १०० **समय : ३घंटे**

प्रश्न १. संदर्भ सहित व्याख्या (कविता और कहानी में दोनों से विकल्प सहित) २० अंक

प्रश्न २. दीर्घोत्तरी प्रश्न (कविता और कहानी दोनों में से विकल्प सहित) ३० अंक

प्रश्न ३. टिप्पणियाँ(कविता और कहानी दोनों में से विकल्प सहित) १० अंक

प्रश्न ४. वस्तुनिष्ठ प्रश्न १०(कविता और कहानी दोनों में से) १० अंक

प्रश्न ५. निबंध लेखन (चार में से एक) १० अंक

प्रश्न६. (**अ**) भाषा ज्ञान १० अंक

१. लिंग
२. वचन
३. पर्यायवाची शब्द
४. विलोमार्थी शब्द
५. मुहावरों का वाक्य में प्रयोग

(**आ**) संवाद लेखन (सामान्य वार्तालाप) / अपठित गद्यांश १० अंक

University of Mumbai

No. UG/ 36 of 2019-20

CIRCULAR:-

Attention of the Principals of the Affiliated Colleges and Directors of the recognized Institutions in Science & Technology Faculty is invited to this office Circular No. UG/95 of 2015-16, dated 5th October, 2015 relating to the revised syllabus as per (CBSGS) for the T.Y.B..Sc. Botany (Sem. V & VI).

They are hereby informed that the recommendations made by the Board of Studies in Botany at its meeting held on 18th March, 2019 have been accepted by the Academic Council at its meeting held on 10th May, 2019 **vide** item No. 4.26 and that in accordance therewith, the revised syllabus as per the (CBCS) for the T. Y .B.Sc. Botany in (Sem. V & VI) has been brought into force with effect from the academic year 2019-20, accordingly. (The same is available on the University's website www.mu.ac.in).

			16	**32 + 8 (3 Units)**

BSc BOTANY: PROGRAM OUTCOMES

Specific core discipline knowledge

- Students can recall details and information about the evolution, anatomy, morphology, systematics, genetics, physiology, ecology, and conservation of plants and all other forms of life.
- Students can recall details of the unique ecological and evolutionary features of the local and Indian flora.

Communication skills

- Students can communicate effectively using oral and written communication skills

Problem solving and research skills

- Students can generate and test hypotheses, make observations, collect data, analyze and interpret results, derive conclusions, and evaluate their significance within a broad scientific context

BSc BOTANY: PROGRAM SPECIFIC OUTCOMES

- To recognize and identify major groups of non-vascular and vascular plants and their phylogenetic relationships.
- To understand the phylogeny of plants and study various systems of classification.
- To explore the morphological, anatomical, embryological details as well as economic importance of algae, fungi, bryophytes, pteridophytes, gymnosperms and angiosperms.
- To understand physiological processes and adaptations of plants.
- To provide knowledge about environmental factors and natural resources and their importance in sustainable development.
- To be able to carry out phytochemical analysis of plant extracts and application of the isolated compounds for treatment of diseases.
- To be able to deal with all microbes and the technologies for their effective uses in industry and mitigation of environmental concerns.
- To explain how current medicinal practices are often based on indigenous plant knowledge and to get introduced to different perspectives on treating ailments according to ethnomedicinal principles.
- To understand patterns of heredity and variation among individuals, species and populations and apply principles for improvement of quality and yield.
- To be able to apply statistical tools to gain insights into significantly different data from different sources.
- To acquire recently published knowledge in molecular biology, such as rDNA technology; PTC and bioinformatics and their applications.

SEMESTER V
THEORY

Course Code	Title	Credits
USBO501	**PLANT DIVERSITY – III**	**2.5 Credits (60 Lectures)**

Course outcomes:

The students would be able :

- To gain knowledge about microbial diversity and techniques for culturing and visualization.
- To understand the salient features of three major groups of algae, their life cycle patterns with a suitable example; to be able to identify them.
- To learn the general characteristics and classification of two major groups of fungi along with life cycles of each group; to be able to identify them.
- To understand the scope and importance of Plant Pathology and apply the concepts of various control measures of commonly widespread plant diseases.

Unit I: Microbiology • **Types of Microbes:** Viruses, Bacteria, Algae, Fungi, Protozoa, Mycoplasma and Actinomycetes. • **Culturing:** Sterilization, media, staining, colony characters. • Pure cultures	**(15 lectures)**
Unit –II: Algae (G.M. Smith Classification System to be followed) • Division Rhodophyta: Classification and General Characters: Distribution, Cell structure, pigments, reserve food, range of thallus, reproduction: asexual and sexual, Alternation of Generations, Economic Importance. • Structure, life cycle and systematic position of *Polysiphonia, Batrachospermum.* • Classification and General Characters of Xanthophyta: Distribution, Cell structure, pigments, reserve food, range of thallus, Reproduction: asexual and sexual, Alternation of Generations, Economic Importance. • Structure, life cycle and systematic position of *Vaucheria.* • Classification and General Characters of Bacillariophyta: Distribution, Cell structure, pigments, reserve food, range of thallus, Reproduction: asexual and sexual, Alternation of Generations, Economic Importance. • Structure, life cycle and systematic position of *Pinnularia.*	**(15 lectures)**
Unit III: Fungi (G.M. Smith Classification System to be followed) • Basidiomycetes: Classification and General characters ➢ Life cycle of *Agaricus* ➢ Life cycle of *Puccinia* • Deuteromycetae: Classification and General Characters • Life cycle of *Alternaria*	**(15 lectures)**

Unit IV: Plant Pathology • **Study of plant diseases:** Causative organism, symptoms, predisposing factors, disease cycle and control measures of the following. ➢ White Rust –*Albugo candida* ➢ Tikka disease of ground nut: *Cercospora* ➢ Damping off disease: *Pythium* ➢ Citrus canker –*Xanthomonas axonopodis* pv. citri ➢ Leaf curl – leaf curl virus in *Papaya.* • Study of Physical, chemical and biological control methods of plant diseases.	**(15 lectures)**

Course Code	Title	Credits
USBO502	**PLANT DIVERSITY – IV**	**2.5 Credits (60 lectures)**

Course outcomes:

The students would be able :

- To acquire knowledge of different fossil forms and understand their role in evolution.
- To provide plant description, describe the morphological and reproductive structures of seven families and also identify and classify according to Bentham and Hooker's system.
- To gain proficiency in the use of keys and identification manuals for identifying any unknown plants to species level.
- To relate anomalies in internal stem structure with function and appreciate the salient features of the root stem transition zone.
- To get exposure to pollen study and learn to apply it in various fields.

Unit I: Paleobotany • *Lepidodendron*– All form genera root, stem, bark, leaf, male and female fructification. • *Lyginopteris*– All form genera root, stem, leaf, male and female fructification. • *Pentoxylon*– All form genera. • Contribution of Birbal Sahni, Birbal Sahni Institute of Paleobotany, Lucknow	**(15 lectures)**
Unit II: Angiosperms I • Morphology of flower – All Parts of Flower. • Complete classification of Bentham and Hooker (only for prescribed families), Merits and demerits • Bentham and Hooker's system of classification for flowering plants up to family with respect to the following prescribed families and economic and medicinal importance for members of the families. (Special stress on fruit morphology to be given) ➢ Capparidaceae ➢ Umbelliferae ➢ Cucurbitaceae ➢ Rubiaceae ➢ Solanaceae ➢ Commelinaceae ➢ Graminae	**(15 lectures)**
Unit III: Anatomy I • **Anomalous secondary growth** in the Stems of *Bignonia*, *Salvadora*, *Achyranthes*, *Dracaena*. Storage roots of Beet, Radish • **Root stem transition** • **Types of Stomata**– Anomocytic, Anisocytic, Diacytic, Paracytic, and Graminaceous	**(15 lectures)**

Unit IV: Palynology ● **Pollen Morphology** ● **Pollen viability**–storage ● Germination and growth of pollen ● Application of Palynology in honey industry, coal and oil exploration, Aerobiology and pollen allergies, forensic science	**(15 lectures)**

Course Code	Title	Credits
USBO503	**FORM AND FUNCTIONS- II**	**2.5 Credits (60 Lectures)**

Course outcomes:

The students would be able :

- To acquire knowledge about two important organelles and molecular mechanisms of translation
- To understand water relations of plants, inorganic and organic solute transport, and apply the knowledge to manage mineral nutrition and survival in challenging abiotic stresses.
- To understand succession in plant communities and study remediation technologies in order to apply knowledge acquired for cleanup of polluted sites.
- To get exposure to principles and techniques of plant tissue culture and apply these studies for improving agriculture and horticulture and to become an entrepreneur.

Unit I: Cytology and Molecular Biology • Structure and function of nucleus • Structure and function of vacuole • Structure and function of giant chromosomes • The genetic code: Characteristics of the genetic code • Translation in Prokaryotes and Eukaryotes.	**(15 lectures)**
Unit II: Plant Physiology I • **Water relations:** Potential, osmosis, transpiration, imbibition, • **Solute transport:** Transport of ions across cell membranes, active and passive transport, carriers, channels and pumps. • **Translocation of solutes:** Composition of phloem sap, girdling experiment. • **Pressure flow model (Munch's hypothesis):**Phloem loading and unloading, anatomy of sieve tube elements and mechanisms of sieve tube translocation. • **Mineral Nutrition:** Role of Macro and Micro nutrients, physiological functions and deficiency symptoms.	**(15 lectures)**
Unit III: Environmental Botany • **Bioremediation:** Principles, factors responsible and microbial population in bioremediation. • **Phytoremediation**: Metals, Organic pollutants • **Plant succession**: Hydrosere and Xerosere – Formation of Barren Space, Succession on the Land Citing Different Seres leading up to the Climax, Succession in Water, Ecesis, Poly and Mono-climax theories.	**(15 lectures)**
Unit IV: Plant Tissue Culture • **Aspects of Micro-propagation with reference to Floriculture:** Detailed study of Orchid Cultivation • **Plant cell suspension cultures for the production of secondary metabolites:** With special reference to Shikonin production. • Somatic Embryogenesis and Artificial Seeds. • **Protoplast Fusion and Somatic Hybridization:** i) Concept, Definition, and various methods of Protoplast Fusion ii) Applications of Somatic Hybridization in Agriculture	**(15 lectures)**

Course Code	Title	Credits
USBO504	**CURRENT TRENDS IN PLANT SCIENCES – II**	**2.5 Credits (60 Lectures)**

Course outcomes:

The students would be able :

- To get exposure to the technique of mushroom cultivation and explore the possibility of entrepreneurship in the same.
- To learn ethnobotanical principles, applications and utilize indigenous plant knowledge for the cure of common human diseases and improvement of agriculture.
- To gain knowledge about the latest molecular biology techniques for isolation and characterization of genes.
- To learn principles and application of commonly used techniques in instrumentation.
- To gain proficiency in the monograph study and pharmacognostic analysis of six medicinal plants.

Unit I: Ethnobotany and Mushroom Industry • **Ethnobotany**- Definition, history, sources of data and methods of study. • **Applications of ethnobotany:** ➢ Ethno-medicines. ➢ Agriculture. ➢ Edible plants. • **Traditional medicines** used by tribals in Maharashtra towards ➢ Skin ailments: *Rubia cordfolia, Sandalwood* ➢ Liver ailments: *Phyllanthus, Andrographis* ➢ Wound healing and ageing: *Centella, Typha, Terminalia, Tridax.* ➢ Fever: *Vitex negundo*, *Tinospora cordifolia* leaves ➢ Diabetes: *Momordica charantia, Syzygium cuminii* • **Mushroom industry:** ➢ Detail general account of production of mushrooms with respect to methods of Composting, spawning, casing, harvesting of mushroom. Cultivation of *Pleurotus, Agaricus, Volvariella* mushroom. ➢ General account of mushrooms: Nutritional value, picking and packaging, economic importance.	**(15 lectures)**
Unit II: Plant Biotechnology I • Construction of genomic DNA libraries, Chromosome libraries and c- DNA libraries. • Identification of specific cloned sequences in c-DNA libraries and Genomic libraries • **Analysis of genes and gene transcripts –**Restriction enzyme, analysis of cloned DNA sequences. Hybridization(Southern Hybridization)	**(15 lectures)**
Unit III: Instrumentation • **Colorimetry and Spectrophotometry** (Visible, UV and IR) – Instrumentation, working, principle and applications. • **Chromatography:** General account of Column chromatography. Principle and bedding material involved in adsorption and partition chromatography, ion exchange chromatography, molecular sieve chromatography.	**(15 lectures)**

Unit IV: Pharmacognosy and Medicinal Botany • Monographs of drugs with reference to biological sources, geographical distribution, common varieties, macro and microscopic characters, chemical constituents, therapeutic uses, adulterants- *Strychnos* seeds, *Senna* leaves, Clove buds, *Allium sativum, Acorus calamus* and *Curcuma longa*	**(15 lectures)**

SEMESTER V
PRACTICAL

Minimum marks for passing: 20

Semester V USBOP5 – For 6 Units	**Cr**
PRACTICAL PAPER I–PLANT DIVERSITY III – USBOP 501 (For 6 Units)	**1.5**
Microbiology • Study of aeromicrobiota by petriplate exposed method: Fungal culture, Bacterial culture. • Determination of Minimum Inhibitory Concentration (MIC) of sucrose against selected microorganism. • Study of antimicrobial activity by the disc diffusion method.	
Algae (G.M. Smith Classification System to be followed) • Study of stages in the life cycle of the following Algae from fresh / preserved material and permanent slides. ➢ *Polysiphonia* ➢ *Batrachospermum* ➢ *Vaucheria* ➢ *Pinnularia*	
Fungi (G.M. Smith Classification System to be followed) • Study of stages in the life cycle of the following Fungi from fresh / preserved material and permanent slides ➢ *Agaricus* ➢ *Puccinia* ➢ *Alternaria*	
Plant Pathology • Study of the following fungal diseases: ➢ White rust in Cruciferae (Brassicaceae) ➢ Tikka disease in Groundnut ➢ Damping off disease ➢ Citrus canker ➢ Leaf curl in *Papaya Leaf*	
Semester V USBOP7 – For 3 Units	
PRACTICAL PAPER II–PLANT DIVERSITY IV USBOP 502 (For 3 & 6 Units)	**Cr**
Paleobotany • Study of the following form genera with the help of permanent slides/ photomicrographs. ➢ *Lepidodendron* ➢ *Lyginopteris* ➢ *Pentoxylon*	**1.5**
Angiosperms I • Morphology of Flower – All Parts of Flower • Study of one plant from each of the following Angiosperm families as per Bentham and Hooker's system of classification. ➢ Capparidaceae ➢ Umbelliferae ➢ Cucurbitaceae	

➢ Rubiaceae ➢ Solanaceae ➢ Commelinaceae ➢ Graminae • Morphological peculiarities and economic importance of the members of the above-mentioned Angiosperm families • Identifying the genus and species of a plant with the help of Flora	
Anatomy I • Study of anomalous secondary growth in the stems of the following plants using double staining technique. *1) Bignonia* *2) Salvadora* *3) Achyranthes* *4) Dracaena* • Study of anomalous secondary growth in the roots of 1) Beet 2) Radish • Types of Stomata 1) Anomocytic 2) Anisocytic 3) Diacytic 4) Paracytic 5) Graminaceous	
Palynology I • Study of pollen morphology (NPC Analysis) of the following by Chitale's Method ➢ *Hibiscus* ➢ *Datura* ➢ *Ocimum* ➢ *Crinum* ➢ *Pancratium* ➢ *Canna* • Determination of pollen viability • Pollen analysis from honey sample – unifloral and multifloral honey • Effect of varying concentration of sucrose on *In vitro* Pollen germination	
Total Credit	**3**

Semester V USBOP6 – For 6Units **Semester V USBOP7 – For 3Units**	**Cr**
PRACTICAL –PAPER III FORM AND FUNCTION II USBOP 503 (For 3 & 6 Units)	**1.5**
Cytology and Molecular Biology • Mounting of Giant chromosomes from *Chironomous* larva • Smear preparation from *Tradescantia* buds • Predicting the sequence of amino acids in the polypeptide chain that will be formed following translation(Eukaryotic)	
Plant Physiology I • Estimation of Phosphate phosphorus (Plant acid extract) • Estimation of Iron (Plant acid extract) Note: Preparation of a standard graph and determination of the multiplication factor for Phosphate / Iron estimation using a given standard phosphate / Standard Iron solution should be done in regular practical as this will also be put as a question in practical exam	
Environmental Botany • Estimation of the following in given water sample ➢ Dissolved oxygen demand ➢ Biological oxygen demand ➢ Hardness ➢ Salinity and Chlorinity	
Micropropogation • Plant Tissue culture: • Identification – Multiple shoot culture, hairy root culture, somatic embryogenesis • Preparation of stock solutions for preparation of MS medium (Note: Concept of preparation of specified molar solutions should be taught and problems based on preparation of stock solutions for tissue culture media will be given).	
Semester V USBOP6 – For 6 Units	
PRACTICAL – PAPER IV CURRENT TRENDS IN PLANT SCIENCES II USBOP 504 (For 6 Units)	**Cr**
Ethnobotany and mushroom industry • Study of plants mentioned in theory for Ethnobotany • Mushroom cultivation (To be demonstrated) • Identification of various stages involved in mushroom cultivation – spawn, pin head stage, mature/ harvest stage of *Agaricus, Pleurotus, Volvariella*	**1.5**
Biotechnology I • Growth curve of E. coli • Plasmid DNA isolation and Separation of DNA using AGE • Restriction mapping (problems), Southern blotting	
Instrumentation • Demonstration of Beer Lambert's Law • Experiment based on ion exchange chromatography for demonstration • Experiment based on separation of dyes/ plant pigments using silica gel column.	

Pharmacognosy • Macroscopic/ Microscopic characters and Chemical tests for active constituents of the following plants. ➢ *Allium sativum* ➢ *Acorus calamus* ➢ *Curcuma longa* ➢ *Senna angustifolia* ➢ *Strychnos nux-vomica* ➢ *Eugenia caryophyllata*	
Total Credit	**3**

Course Code	Title	Credits
USBO601	**PLANT DIVERSITY – III**	**2.5 Credits (60 Lectures)**

Course outcomes:

The students would be able :

- To identify, describe and study in detail the life cycles of three Bryophytes.
- To and study in detail classification and general characters of three classes of Pteridophytes and identify as well as describe the life cycles of one example from each class.
- To study evolutionary aspects and economic utilization of Bryophytes and Pteridophytes.
- To identify, describe and study in detail the life cycles of three Gymnosperms.

Unit I: Bryophyta (G. M. Smith Classification system to be followed) • Life cycle of *Marchantia* • Life cycle of *Pelia* • Life cycle of *Sphagnum*	**(15 lectures)**
Unit II: Pteridophyta (G. M. Smith Classification System to be followed) • Lepidophyta – Classification, general characters; Life cycle of • *Lycopodium* • Calamophyta – Classification, general characters; Life cycle of • *Equisetum* • Pterophyta - Classification, general characters; Life cycle of *Adiantum* and *Marselia*	**(15 lectures)**
Unit III: Bryophytes and Pteridophytes: Applied aspects • Ecology of Bryophytes. • Economic importance of Bryophytes. • Bryophytes as Indicators. • Evolution of Sporophyte and Gametophyte in Bryophytes. • Economic importance of Pteridophytes • Diversity and distribution of Indian Pteridophytes • Types of Sori and Evolution of Sori in Pteridophytes.	**(15 lectures)**
Unit IV: Gymnosperms (Chamberlain's Classification System to be followed) • Life cycle of *Thuja*, • Life cycle of *Gnetum* • Life cycle of *Ephedra*. • Economic importance of Gymnosperms	**(15 lectures)**

Course Code	Title	Credits
USBO602	**PLANT DIVERSITY – IV**	**2.5 Credits (60 Lectures)**

Course outcomes:

The students would be able :

- To study contribution of Botanical gardens, BSI to Angiosperm study and provide plant description, describe the morphological and reproductive structures of seven families.
- To gain exposure to a phylognetic system of classification.
- To gain insight into the anatomical adaptations of different ecological plant groups.
- To understand development plant of male and female gametophytes, embryonic structure and development.
- To understand the different aspects and importance of Biodiversity and utilize them for conservation of species so as to prevent further loss or extinction of Biodiversity and preserve the existing for future generations.

Unit I: Angiosperms II — **(15 lectures)**

- **Major Botanic gardens of India**– Indian Botanic Garden, Howrah; National Botanic Garden (NBRI) Lucknow; Lloyd Botanic Garden, Darjeeling; Lalbaugh Botanic Garden, Bangaluru.
- Botanical survey of India and regional branches of India
- Bentham and Hooker's system of classification for flowering plants up to family with respect to the following prescribed families and economic importance, medicinal importance and fruit morphology for members of the families
  - Rhamnaceae
  - Combretaceae
  - Asclepiadaceae
  - Labiatae
  - Euphorbiaceae
  - Cannaceae
- Hutchinson's classification system of Angiosperms Brief Introduction, Merits and Demerits of Hutchinson's Classification System

Unit II: Anatomy II — **(15 lectures)**

- **Ecological anatomy**
  - Hydrophytes – submerged, floating, rooted
  - Hygrophytes -*Typha*
  - Mesophytes
  - Sciophytes
  - Halophytes
  - Epiphytes
  - Xerophytes

Unit III: Embryology — **(15 lectures)**

- **Microsporogenesis**
- **Megasporogenesis**- Development of monosporic type, examples of all embryo sacs
- Types of ovules
- Double fertilization
- Development of embryo–*Capsella*

Unit IV: Plant Geography (Shifted from Paper – IV) • **Phytogeographical regions of India**. • **Biodiversity**: ➢ Definition, diversity of flora found in various forest types of India ➢ Levels of biodiversity ➢ Importance and status of biodiversity ➢ Loss of biodiversity ➢ Conservation of biodiversity ➢ Genetic diversity- Molecular characteristics	**(15 lectures)**

Course Code	Title	Credits
USBO603	**FORMS AND FUNCTION – III**	**2.5 Credits 60 Lectures)**

Course outcomes:

The students would be able :

- To study various plant biomolecular structures and appreciate the structures, role, functions and applications of enzymes.
- To gain insight into the Nitrogen and plant hormone metabolism with applications of the same in agriculture and horticulture.
- To understand principles of genetic mapping , mutations and solve problems based on them, gain knowledge of various metabolic disorders and their implications.
- To generate and test hypotheses, make observations, collect data, analyze and interpret results, derive conclusions, and evaluate their significance within a broad scientific context, using suitable statistical techniques.

Unit I: Plant Biochemistry • **Structure of biomolecules:** Carbohydrates (sugars, starch, cellulose, pectin, lipids (fatty acids and glycerol), proteins (amino acids) • **Enzymes:** Nomenclature, classification, mode of action, Enzyme kinetics, Michaelis-Menten equation, competitive, non-competitive and un-competitive inhibitors.	**(15 lectures)**
Unit II: Plant Physiology II • **Nitrogen Metabolism:** Nitrogen cycle, root nodule formation, and leghaemoglobin, nitrogenase activity, assimilation of nitrates, (NR, NiR activity), assimilation of ammonia, (amination and transamination reactions), nitrogen assimilation and carbohydrate utilization. • Physiological effects and commercial applications of Auxins, Gibberillins, Cytokinins and Abscisic acid	**(15 lectures)**
Unit III: Genetics • **Genetic mapping in eukaryotes:** discovery of genetic linkage, gene recombination, construction of genetic maps, three- point crosses and mapping chromosomes, problems based on the same • **Gene mutations:** definition, types of mutations, causes of mutations, induced mutations, the Ame's test • **Metabolic disorders**– enzymatic and non-enzymatic: Gene control of enzyme structure Garrod's hypothesis of inborn errors of metabolism, Phenyl ketone urea.	**(15 lectures)**
Unit IV: Biostatistics (Shifted from Paper – II) • Test of significance student's *t*-test – Paired and Unpaired. • Regression. • ANOVA (one way).	**(15 lectures)**

Course Code	Title	Credits
USBO604	**Current Trends in Plant Science – II**	**2.5 Credits (60 Lectures)**

Course outcomes:

The students would be able :

- To gain insight into recent molecular biology techniques for DNA analysis and amplification and Barcoding techniques and applications therein.
- To understand and apply tools of Bioinformatics for data retrieval and phylogenetic analysis.
- To learn about the sources of economically important plants in the field of fats and oils and apply it for extraction, dealing with entrepreneurship in the field.
- To gain knowledge and proficiency in preservation of post harvest produce and explore the possibility of entrepreneurship in the field.

Unit I: Plant Biotechnology II • **DNA sequence analysis**– Maxam – Gilbert Method and Sanger's method, Pyro Sequencing. • Polymerase Chain Reaction (PCR). • **DNA barcoding:** Basic features, nuclear genome sequence, chloroplast genome sequence, *rbc*L gene sequence, *mat* K gene sequence, present status of barcoding in plants.	**(15 lectures)**
Unit IV: Bioinformatics (Shifted from Paper – III) • Organization of biological data, databases • Exploration of data bases, retrieval of desired data, BLAST. • Protein structure analysis and application • Multiple sequence analysis and phylogenetic analysis	**(15 lectures)**
Unit III: Economic Botany • **Essential Oils:** Extraction, perfumes, perfume oils, oil of Rose, Sandalwood, *Patchouli*, *Champaca*, grass oils: *Citronella*, Vetiver. • **Fatty oils:** Drying oil (Linseed and Soyabean oil), semidrying oils (Cotton seed, Sesame oil) and non-drying oils (Olive oil and Peanut oil), • **Vegetable Fats**: Coconut and Palm oil	**(15 lectures)**
Unit IV : Post Harvest Technology • **Storage of Plant Produce –**Preservation of Fruits and Vegetables ➢ Drying (Dehydration) – Natural conditions – Sun drying, Artificial Drying – Hot Air Drying, Vacuum Drying, Osmotically Dried Fruits, Crystallized or Candied Fruits, Fruit Leather, Freeze Drying) ➢ Freezing (Cold Air Blast System, Liquid Immersion method, Plate Freezers, Cryogenic Freezing, Dehydro-Freezing, Freeze Drying), ➢ Canning ➢ Pickling (in Brine, in Vinegar, Indian Pickles) ➢ Sugar Concentrates (Jams, Jellies, Fruit juices) ➢ Food Preservatives ➢ Use of Antioxidants in Preservation	**(15 lectures)**

SEMEST ER VI
PRACTICAL

Minimum marks for passing: 20

SEMESTER VI USBOP8 – FOR 6 UNITS	**Cr**
PRACTICAL PAPER I–PLANT DIVERSITY III – USBOP 601(For 6 Units)	**1.5**
Bryophyta (G.M. Smith Classification System to be followed) • Study of stages in the life cycle of the following Bryophyta from fresh / preserved material and permanent slides ➢ *Marchantia* ➢ *Pelia* ➢ *Sphagnum*	
Pteridophyta (G.M. Smith Classification System to be followed) • Study of stages in the life cycles of the following Pteridophytes from fresh / preserved material and permanent slides ➢ *Lycopodium* ➢ *Equisetum* ➢ *Adiantum* ➢ *Marselia*	
Bryophytes and Pteridophytes: Applied aspects • Economic importance of Bryophyta • Economic importance of Pteridophyta • Types of Sporophytes in Bryophyta (from Permanent slides) • Types of Sori and Soral Arrangement in Pteridophytes	
Gymnosperms (Chamberlain's Classification System to be followed) • Study of stages in the life cycles of the following Gymnosperms from fresh / preserved material and permanent slides ➢ *Thuja* ➢ *Gnetum* ➢ *Ephedra* • Economic importance of Gymnosperms	
USBOP10 – FOR 3 UNITS	
PRACTICAL PAPER II–PLANT DIVERSITY IV USBOP602 (For 3 & 6 Units)	**1.5**
Angiosperms II • Study of one plant from each of the following Angiosperm families as per Bentham and Hooker's system of classification. ➢ Rhamnaceae ➢ Combretaceae ➢ Asclepiadaceae ➢ Labiatae ➢ Euphorbiaceae ➢ Cannaceae • Morphological peculiarities and economic importance of the members of the above-mentioned Angiosperm families • Identify the genus and species with the help of flora	

Anatomy II • Study of Ecological Anatomy of ➢ Hydrophytes: *Hydrilla* stem, *Nymphaea* petiole, *Eichhornia* offset ➢ Epiphytes: Orchid ➢ Sciophytes: *Peperomia* leaf ➢ Xerophytes: *Nerium* leaf, *Opuntia phylloclade* ➢ Halophytes: *Avicennia* leaf and pneumatophore, *Sesuvium* / *Sueda* leaf ➢ Mesophytes: *Vinca* leaf	
Embryology • Study of various stages of Microsporogenesis, Megasporogenesis and Embryo Development with the help of permanent slides / photomicrographs • Mounting of Monocot (Maize) and Dicot (Castor and Gram)embryo • *In vivo* growth of pollen tube in *Portulaca /Vinca*	
Plant Geography • Study of phytogeographic regions of India • Preparation of vegetation map using Garmin's GPS Instrument • Problems based on Simpson's diversity Index	
Total Credit	**3**
SEMESTER VI USBOP9 – FOR 6 UNITS	**Cr**
SEMESTER VI USBOP10 – FOR 3 UNITS	
PRACTICAL PAPER III–FORM AND FUNCTION III USBOP603 (For 3 & 6 Units)	**1.5**
Plant Biochemistry • Estimation of proteins by Biuret method • Effect of temperature on the activity of amylase • Effect of pH on the activity of amylase • Effect of substrate variation on the activity of amylase	
Plant Physiology II • Determination of alpha-amino nitrogen • Effect of GA on seed germination • Estimation of reducing sugars by DNSA method	
Genetics • Problems based on three-point crosses, construction of chromosome maps • Identification of types of mutations from given DNA sequences • Study of mitosis using pre-treated root tips of *Allium*	
Biostatistics • *t*-test (paired and unpaired) • Problems based on regression analysis • ANOVA (One Way)	
PRACTICAL PAPER IV CURRENT TRENDS IN PLANT SCIENCES USBOP 604 (For 6 Units)	
Plant Biotechnology II • DNA sequencing by Sanger's Method and Pyro Sequencing Method • DNA barcoding of plant material by using suitable data	

Bioinformatics • BLAST: nBLAST, pBLAST • Multiple sequence alignment • Phylogenetic analysis • RASMOL/SPDBV	
Economic Botany • Demonstration: Extraction of essential oil using Clevenger • Thin layer chromatography of essential oil of *Patchouli* and *Citronella* • Saponification value of Palm oil	
Post-Harvest Technology • Preparation of ➢ Squash ➢ Jam ➢ Jelly ➢ Pickle	
Total Credit	**3**

Scheme of Examinations:

Theory Course: Semester End Assessment	**100 Marks Each Theory Paper**
Practical Course	**50 Marks Each Practical Paper**

- **Students offering Double major (3 Units) will study Paper II and III**

Semester End Theory Examination Question Paper Pattern:

Q.1 – Four (4) Long Answer Questions on Unit – I out of which Two (2) to be solved.	**10 Marks Each**
Q.2 – Four (4) Long Answer Questions on Unit – II out of which Two (2) to be solved.	**10 Marks Each**
Q.3 – Four (4) Long Answer Questions on Unit – III out of which Two (2) to be solved.	**10 Marks Each**
Q.4 – Four (4) Long Answer Questions on Unit – IV out of which Two (2) to be solved.	**10 Marks Each**
Q.5 – Six (6) Short Answer Questions on all four (4) Units out of which Four (4) to be solved.	**05 Marks Each**

Note:

1. Minimum Marks of 20 are required in Every Practical Paper Examination in each semester.
2. A minimum of four field excursions (with at least one beyond the limits of Mumbai / Local area) for habitat studies are compulsory. Field work of not less than eight hours duration is equivalent to one period per week for a batch of fifteen students.
3. A candidate will be allowed to appear for the practical examinations only if he/she submits a certified journal of T.Y.B.Sc. Botany and the Field Report or a certificate from the Head of the Department/Institute to the effect that the candidate has completed the practical course of T.Y.B.Sc. Botany as per the minimum requirements. In case of loss of journal, a candidate must produce a certificate from the Head of the Department/ Institute that the practical for the academic year were completed by the student. However, such a candidate will be allowed to appear for the practical examination but the marks allotted for the journal will not be granted.

UNIVERSITY OF MUMBAI

T.Y.B.SC. BOTANY SEMESTER V (USBOP5)

Plant Diversity III (USBOP501)

Practical Paper – I

Duration: 9:00 am to 01:00 pm Max. Marks:50

Q.1	Perform the given Microbiological Experiment **'A'**	12
Q.2	Identify, Classify and Describe Specimens **B, C** and **D**. Sketch neat and labeled diagrams of Morphological / Microscopical structures seen in the specimens.	24
Q.3	Identify and describe slides / specimens **E, F** and **G**.	09
Q.4	Journal	05

KEY:

A– Any one experiment out of four as prescribed in syllabus.

B & **C**– Algae.

D– Fungi.

E, F & **G**– Plant Pathology, Algae or Fungi not asked above in random order.

UNIVERSITY OF MUMBAI

T.Y.B.SC. BOTANY SEMESTER V (USBOP5)

Plant Diversity IV (USBOP502)

Practical Paper – II

Duration: 9:00 am to 01:00 pm Max. Marks:50

Q. 1A. Classify specimen **'A'** up to their families giving reasons. Give floral formula. Sketch neat and labeled L. S. of flower and T.S. ovary. 10

Q. 1B. Identify genus and species of specimen **'B'** using flora. 05

Q.2 Make a temporary double stained preparation of T.S. specimen **'C'** and comment on the type of secondary growth. 06

Q.3 Perform the Palynology experiment **'D'** allotted to you. 07

Q.4 Identify and describe slide/ specimen **'E', 'F', 'G'** & **'H'**. 12

Q.5 Field report 05

Q.6 Viva voce (based on Paper I and Paper II). 05

KEY

A– Families of T.Y.B.Sc only

B– Plants from F.Y & S.Y. B. Sc Families to be included

C– Anatomy Anomalous Secondary Growth

D– As per slip

E, F, G & **H**– Fossils, Types of Stomata, Morphology of flower & Morphology of Fruits Studied in Theory – in random order

UNIVERSITY OF MUMBAI

T.Y.B.SC. BOTANY SEMESTER V (USBOP6)

FORMS AND FUNCTION III (USBOP503)

Practical Paper – III

Duration: 9:00 am to 01:00 pm Max. Marks:50

Q.1	Make a smear preparation of material **'A'** and show the slide to the Examiner. Comment on your observation / Expose the giant chromosomes from the salivary glands of *Chironomous* larva.	08
Q. 2	Perform the experiment **'B'** allotted to you (Physiology).	12
Q. 3	Perform the experiment **'C'** allotted to you (Ecology).	12
Q. 4.	Calculate the_____of the given solution **'D'** to prepare the required solution.	07
Q. 5.	Identify and describe slide/specimen **'E'** & **'F'**.	06
Q.6.	Journal.	05

KEY

B– Physiology experiment.

C– Ecology experiment.

D– Plant Tissue Culture.

E & **F**– Multiple shoot culture, Hairy root culture, Somatic embryogenesis, Amino acid sequencing.

UNIVERSITY OF MUMBAI

T.Y.B.SC. BOTANY SEMESTER V (USBOP6)

CURRENT TRENDS IN PLANT SCIENCE II (USBOP504)

Practical Paper – IV

Duration: 9:00 am to 01:00 pm Max. Marks:50

Q.1.	Perform the experiment **A**– growth curve of *E.coli* / Isolate plasmid DNA and separate using AGE.	12
Q.2.	Perform the experiment **'B'** allotted to you.	10
Q.3.	Describe macroscopical /microscopical character with the help of neat and labelled sketches of specimens **'C'** and **'D'**. Perform the chemical test / TLC to identify the active constituents.	14
Q. 4	Identify and explain the specimens/ photographs **'E', 'F'** and **'G'**.	09
Q. 5.	Journal.	05

KEY

B– Experiment based on Beer- Lambert's Law Experiment on separation of dyes/pigments using silica gel column chromatography

C & **D**–*Allium sativum, Acorus calamus, Curcuma longa, Senna angustifolia, Strychnos nux-vomica Eugenia caryophyllata*

E, F & **G**– any stage of mushroom cultivation, any Plant from ethnobotany, problems on restriction mapping

UNIVERSITY OF MUMBAI

T.Y.B.SC. BOTANY SEMESTER V (USBOP7)

Plant Diversity IV (USBOP502) (For 3 Units)

Practical Paper – II

Duration: 9:00 am to 01:00 pm Max. Marks:50

Q. 1A.	Classify specimen **'A'** up to their families giving reasons. Give floral formula. Sketch neat and labelled L.S. of flower and T.S. of ovary.	10
Q. 1B.	Identify genus and species of specimen **'B'** using flora.	05
Q.2	Make a temporary double stained preparation of T.S. specimen **'C'** and comment on the type of secondary growth.	06
Q.3	Perform the Palynology experiment **'D'** allotted to you.	07
Q.4	Identify and describe slide/ specimen **'E', 'F', 'G' & 'H'**.	12
Q.5	Field report	05
Q.6	Journal.	05

KEY

A– Families of T.Y.B.Sc only

B– Plants from F.Y & S.Y. B. Sc Families to be included

C– Anatomy Anomalous Secondary Growth

D– As per slip

E, F, G & **H**– Fossils, Types of Stomata, Morphology of flower & Morphology of Fruits Studied in Theory – in random order

UNIVERSITY OF MUMBAI

T.Y.B.SC. BOTANY SEMESTER V (USBOP7)

FORMS AND FUNCTION III (USBOP503) (For 3 Units)

Practical Paper – III

Duration: 9:00 am to 01:00 pm Max. Marks:50

Q.1	Make a smear preparation of material **'A'** and show the slide to the Examiner. Comment on your observation / Expose the giant Chromosomes from the salivary glands of *Chironomous* larva.	08
Q. 2	Perform the experiment **'B'** allotted to you (Physiology).	12
Q. 3	Perform the experiment **'C'** allotted to you (Ecology).	12
Q. 4	Calculate the_____of the given solution **'D'** to prepare the required solution.	07
Q. 5	Identify and describe slide/specimen **'E'**& **'F'**.	06
Q.6.	Viva voce (based on Paper II and Paper III).	05

KEY

B– Physiology experiment.

C– Ecology experiment.

D– Plant Tissue Culture.

E & **F**– Multiple shoot culture, Hairy root culture, Somatic embryogenesis, Amino acid sequencing.

UNIVERSITY OF MUMBAI

T.Y.B.SC. BOTANY SEMESTER VI

(USBOP8)

Plant Diversity III (USBOP601)

Practical Paper – I

Duration: 9:00 am to 01:00 pm Max. Marks:50

1	Identify, classify and describe specimen **'A'** and **'B'**. Sketch neat and labelled diagrams of Morphological/Microscopical structures seen in the specimens.	12
2	Identify, classify and describe specimen **'C'** and **'D'**. Sketch neat and labeled diagrams of Morphological/Microscopical structures seen in the specimens.	12
Q.3	Identify, classify and describe specimen **'E'**. Sketch neat and labeled diagrams of Morphological/Microscopical structures seen in the specimens.	06
Q.4	Identify and describe slides/specimen **'F', 'G' 'H', 'I'** & **'J'**.	15
Q.5	Journal.	05

KEY

A & **B**– Bryophytes: *Marchantia, Pellia & Sphagnum*

C & **D**– Pteridophytes: *Lycopodium, Equisetum, Adiantum* & *Marsilea*

E– Gymnosperm: *Thuja, Gnetum & Ephedra*

F, G, H, I & **J**– Economic importance of Bryophytes, Economic importance of Pteridophytes Types of Sporophytes in Bryophyta, Types of Sori in Pteridophytes, Soral arrangement in Pteridophytes, Economic importance of Gymnosperms. (In random order)

UNIVERSITY OF MUMBAI

T.Y.B.SC. BOTANY SEMESTER VI

(USBOP8)

Plant Diversity IV (USBOP602)

Practical Paper – II

Duration: 9:00 am to 01:00 pm Max. Marks:50

Q. 1 A.	Classify specimen **'A'** up to its family giving reasons. Give floral formula. Sketch neat and labeled L.S. of flower and T.S. ovary.	08
Q. 1.B.	Identify genus and species of specimen **'B'** using flora.	04
Q. 2	Make a stained preparation of specimen **'C'** and comment on its ecological anatomy.	06
Q.3.A	Calculate Simpson's Diversity Index from the given data **'D'**.	08
Q.3.B	Mark the Phytogeographic region **'E'** in the map of India and Comment on the same.	05
Q.4	Identify and describe slide/specimen **'F', 'G' & 'H'**.	09
Q.5	Field Report.	05
Q.6	Viva voce (based on Paper I and Paper II)	05

KEY

A– Families of T.Y.B.Sc Sem – VI only

B– Plants from F.Y., S.Y. & T.Y. B. Sc**.(**Sem – V Families to be included**)**.

C– Ecological anatomy.

F, G & **H**– Economic importance of specimen from prescribe families (Sem VI only)**,** Morphological Peculiarities of prescribed families (Sem – VI only), Embryology. (In random order)

UNIVERSITY OF MUMBAI

T.Y.B.Sc. BOTANY SEMESTER VI (USBOP9)

FORM AND FUNCTION III (USBOP603)

PRACTICAL III

Duration: 9:00 am to 01:00 pm Max. Marks:50

Q.1	Perform the experiment **'A'** allotted to you.	10
Q.2	Perform the experiment **'B'** allotted to you.	10
Q.3	Make a squash preparation to show the stage of mitosis from the pre-treated root tips **'C'**.	05
Q.4	Construct a chromosome map from the given data **'D'** / Identify the type of mutation and comment on them (any two types of mutations)	10
Q.5	From the given data/ material **'E'** determine test of significance using students t-test/ Regression Analysis /ANOVA	10
Q.6	Journal.	05

KEY

A– Plant Biochemistry Experiment.

B– Plant Physiology Experiment.

Program: B.A./B.Sc.

Course: Foundation Course

Semester III & IV

(As Per Credit Based Semester and Grading System

with effect from the academic year 2012–2013)

Foundation Course
Semester III and IV
B.A. and B.Sc Programme
From the academic year 2013-14

Objectives

- Develop a basic understanding about issues related to human rights violations, ecology and urban-rural disparities in access to health and education
- Gain an overview of significant skills required to address competition in career choices
- Appreciate the importance of developing a scientific temper towards technology and its use in everyday life

Semester III Total Marks: 100 Lectures: 45

Unit 1 Human Rights Violations and Redressal (10 lectures)

A. **Types and nature** of human rights violations faced by vulnerable groups, namely the Scheduled Castes, Scheduled tribes, Women, Children and Minority communities
(3 lectures)

B. **Human Rights violations** faced by People with Disabilities and by the Elderly population
(1 lecture)

C. **Constitutional provisions and laws** protecting the rights of vulnerable groups-***(4 lectures)***
Right to Equality, Right to Freedom, Right against Exploitation.
Salient features ofsome important Acts like
The Prevention of Atrocities (Against SC/ST) Act, 1989;
The Domestic Violence Act, 2005; Vishakha Guidelines for Preventing Sexual Harassment at Workplace, 1997;
The Child Labour (Prohibition and Regulation) Act, 1986;
The Persons With Disabilities (Equal Opportunities, Protection of Rights and Full Participation) Act, 1995;

D. **Redressal mechanisms at the National and State levels- (2 lectures)**
The National Human Rights Commission (NHRC), the SC/ST Commission, the National Commission for Women; the Minorities Commission

Unit 2 Dealing With Environmental Concerns (10 lectures)

A. Threats to the environment arising from extinction, loss of habitat, degradation of environment, pollution, climate change ***(2 lectures)***

B. Some locally relevant case studies of environmental disasters ***(3 lectures)***

C. Concept of Disaster and general effects of Disasters on human life- physical, psychological,economic and social ***(2 lectures)***

D. Dealing with Disasters - Factors to be considered in Prevention, Mitigation (Relief and Rehabilitation) and disaster Preparedness ***(2 lectures)***

E. Human Rights issues in addressing disasters- issues related to compensation , equitable and fair distribution of relief and humanitarian approach to resettlement and rehabilitation ***(1 lecture)***

Unit 3Science and Technology I (10 lectures)

A. Development of Science- the ancient cultures, the Classical era, the Middle Ages, the Renaissance, the Age of Reason and Enlightenment ***(2 lectures)***

B. Nature of science- its principles and characteristics; Science as empirical, practical, theoretical, validated knowledge ***(1 lecture)***

C. Science and scientific temper- significance of observation and experimentation, empirical explanation and objectivity; scientific temper as a fundamental duty of the Indian citizen ***(2 lectures)***

D. Science and Superstition- the role of science in exploding myths, blind beliefs and prejudices; role of science and scientific temper in promoting tolerance and harmony in social groups ***(3 lectures)***

E. **Science in everyday life**- technology, its meaning and role in development; Interrelation and distinction between science and technology ***(2 lectures)***

Unit 4 Soft Skills for Effective Interpersonal Communication (8 lectures)

A

I) Effective Listening- importance and features
II) Verbal and non-verbal communication; public-speaking and presentation skills
III) Barriers to effective communication; importance of self-awareness and body language

(3 lectures)

B

I) Formal and Informal communication- purpose and types
II) Writing formal applications, Statement of Purpose (SOP) and resume
III) Preparing for Group Discussions, Interviews and Presentations ***(3 lectures)***

C

I) Leadership Skills and Self-improvement- characteristics of effective leadership
II) Styles of leadership and team building ***(2 lectures)***

Unit 5 Understanding Issues of Right to Health and Education(7 lectures)

A

I) Concept and Determinants of Health- holistic health including physical and mental well-being;
food security, adequate nutrition, safe drinking water and sanitation, healthy environment and working conditions, availability of healthcare and medical services, gender equality
II) Right to Health- right to a system of health protection to all without discrimination; right to prevention, treatment and control of diseases; Access to essential medicines;
III) Issues of access, affordability and availability in promoting Right to Health***(4 lectures)***

B

I) Right to Education- universalization of education and obstacles to free and compulsory education for all
II) Issues of access, affordability and availability in the education sector
III) Contemporary challenges in the Education sector-increasing privatisation of education, decreasing fund allocation by Government ***(3 lectures)***

Unit 6 Projects/Assignments (15 lectures)

Projects/Assignments should be drawn for the component on Internal Assessment from the topics in **Unit 1 to Unit 5**. Students should be given a list of possible topics- at least 3 from each unit at the beginning of the semester. The project/assignment can take the form of street-

plays/power-point presentations/poster exhibitions and similar other modes of presentation appropriate to the topic; students can work in groups of not more than 8 per topic. Students must submit a hard/soft copy of the project/assignment before appearing for the semester end exam.

15 lectures will be assigned for project guidance.
Unit 6 will not be assessed in the semester end exam.

Assessment Pattern

The student will be assessed on the basis of Internal Assessment of 40 marks and a Semester End Exam of 60 marks. The student will have to secure a minimum of 40% marks in aggregate and a minimum of 40% in each component of assessment i.e. 16 out of 40 in Internal Assessment and 24 out of 60 in Semester End Exam.

Internal Assessment:

- There will **be one mid-semester test of 10 marks on Units 1 and 2;**
- The test will, as far as possible, comprise of objective questions and/or short notes.
- The student will have to submit **an assignment/project for 20 marks** before appearing for the Semester End Exam. This assignment/project will be **on any topic from Units 1 to 5** (as explained in Unit 6 in the syllabus) and can take the form of street-plays/exhibition/power-point presentations or similar other modes suitable to the topic selected; students can work in groups of not more than 8 for the purpose of this assignment. Students will have to **submit a hard/soft copy** of the assignment before appearing for the Semester End Exam. The assignment/project will be assessed **for 20 marks of which 10 marks will be allotted for the presentation OR a viva,** to assess the level of engagement of the student with the topic assigned.
- **10 marks will be allotted to the overall participation** in classroom learning, and skills of articulation, teamwork and leadership exhibited during the course in organizing related learning activities, as clarified in the University manual for Credit-Based Semester System.

Question Paper Pattern

There will be four questions in all with internal divisions as follows:

Question Number 1, 2 and 3 will be on Unit Numbers 1, 2 and 3 respectively each carrying 15 marks.

Each of these questions will be sub-divided into one long answer question for 9 marks, having internal choice; and one short answer question for 6 marks having internal choice.

Question number 4 will be on Unit Numbers 4 and 5 and will be short notes, each carrying 5 marks. Students will have a choice of answering 3 short notes out of 6.

The Question paper therefore will read as follows:

Question 1 (on unit 1) **15 marks**

1a) or 1b) long answer	**(9 marks)**
1c)or 1d) short answer	**(6 marks)**

Question 2 (on unit 2) **15 marks**

2a) or2b) long answer	**(9 marks)**
2c) or 2d) short answer	**(6 marks)**

Question 3 (on unit 3) **15 marks**

3a) or3b) long answer	**(9 marks)**
3c) or3d) short answer	**(6 marks)**

Question 4 (on units 4 and 5) **15 marks**

Any three short notes

4a, 4b, 4c, 4d, 4e, 4f, 4g	**(5 marks each)**

NOTE: All other rules regarding Standard of Passing, ATKT, etc., will be as per those decided by the Faculty of Arts and the Faculty of Science and passed by the Academic Council from time to time.

Semester IV **Total Marks: 100** **Lectures: 60**

Unit 1Significant Rights of Citizens (10lectures)

A. **Rights of Consumers**-right to safety, right to be informed, right to choose, right to be heard,right to seek redressal, right to consumer education;
Violations of consumer rights and important provisions of the Consumer Protection Act, 1986;
Other important laws to protect consumers, like- Indian Contract Act, 1872, Sale of Goods Act, 1930, The Essential Commodities Act, 1955, The Prevention of Food Adulteration Act, 1955, The Standards of Weights and Measures Act, 1976
Consumer courts and consumer movements ***(4 lectures)***

B. **Right to Information**- Genesis and relation with transparency and accountability; important provisions of the Right to Information Act, 2005; some success stories
(3 lectures)

C. **Protection of Citizens'/Public Interest**-Public Interest Litigation, need and procedure to file a PIL; some landmark cases. ***(3 lectures)***

Unit 2Ecology:Approaches, Ethics and Issues (9 lectures)

A. **Understanding approaches to ecology**- Anthropocentrism, Biocentrism and Eco centrism, Ecofeminism and Deep Ecology ***(3 lectures)***

B. **Environmental Ethics**- Libertarian ethics, Ecologic Extension and Conservation; concept of intrinsic and extrinsic value of human and non-human life; eco spirituality. ***(3 lectures)***

C. **Some significant principles and issues**- 'polluter pays' principle and global and local issues of fair share of carbon space ***(3 lectures)***

Unit 3Science and Technology II (10 lectures)

A. **Technology and Development**- the interconnectedness between growth of technology and development of societies ***(2 lectures)***

B. **Some significant modern technologies, their basic features and applications**:***(6 lectures)***

Laser Technology- Light Amplification by Stimulated Emission of Radiation"; use of laser in remote sensing, GIS/GPS mapping, medical use

Satellite Technology- various uses in satellite navigation systems, GPS, and inprecise climate and weather analyses

Information and Communication Technology- electronic systems such as telecommunication, radio, television, video and internet aided by computer-based information systems; convergence of various technologies like satellite, computer and digital in the information revolution of today's society

Biotechnology and Genetic engineeriong- applied biologyand uses in medicine, pharmaceuticals and agriculture; genetically modified plant, animal and human life**Nanotechnology**- definition: the study, control and application of phenomena and materials at length scales below 100 nm; uses in medicine, military intelligence and consumer products

C. Issues of Control, Access and Misuse of Technology ***(2 lectures)***

Unit 4 Introduction to Competitive Exams (9 lectures)

A. Basic information on Competitive Exams- the pattern, eligibility criteria and local centres:

Exams conducted for entry into professional courses- Graduate Record Examinations (GRE), Graduate Management Admission Test GMAT), Common Admission Test (CAT) and Scholastic Aptitude Test (SAT)

Exams conducted for entry into jobs by Union Public Service Commission, Staff Selection Commission (SSC), State Public Service Commissions, Banking and Insurance sectors, and the National and State Eligibility Tests (NET/SET) for entry into teaching profession

(3 lectures)

[NOTE: Students will not be tested on above topics]

B. Soft skills required for competitive exams-

i) Information on areas tested- Quantitative Ability, Data Interpretation, Verbal Ability and Logical Reasoning, Creativity and Lateral Thinking

ii) Motivation- concept, theories and types of motivation

iii) Goal-setting- types of goals, SMART goals, Stephen Covey's concept of human endowment

iv) Time Management- effective strategies for time management ***(6 lectures)***

Unit 5 Urban-Rural Disparities in Development (7 lectures)

A. Concept of 'rural', 'tribal', 'semi-urban' and ' urban'; disparity in availability of services like health, education, transport, electricity and employment ***(2 lectures)***

B. Distribution of natural resources like land, water and forests in rural and urban areas; changing land-use and impact on rural life ***(2 lectures)***

C. Increasing urbanisation and growth of megacities- issues of adequate water availability, affordable housing, transport/traffic congestion, waste management and social tension

(3 lectures)

Unit 6 Projects/Assignments (15 lectures)

Projects/Assignments should be drawn for the component on Internal Assessment from the topics in **Unit 1 to Unit 5**. Students should be given a list of possible topics- at least 3 from each unit at the beginning of the semester. The project/assignment can take the form of street-plays/power-point presentations/poster exhibitions and similar other modes of presentation appropriate to the topic; students can work in groups of not more than 8 per topic. Students must submit a hard/soft copy of the project/assignment before appearing for the semester end exam.

Unit 6 will not be assessed in the semester end exam.

Assessment Pattern

The student will be assessed on the basis of Internal Assessment of 40 marks and a Semester End Exam of 60 marks. The student will have to secure a minimum of 40% marks in aggregate and a minimum of 40% in each component of assessment i.e. 16 out of 40 in Internal Assessment and 24 out of 60 in Semester End Exam.

Internal Assessment:

- There will be **one mid-semester test of 10 marks on Units 1 and 2;**
- The test will, as far as possible, comprise of objective questions and/or short notes.
- The student will have to submit an **assignment/project for 20 marks** before appearing for the Semester End Exam. This assignment/project will be **on any topic from Units 1 to 5** (as explained in Unit 6 in the syllabus) and can take the form of street-plays/exhibition/power-point presentations or similar

other modes suitable to the topic selected; students can work in groups of not more than 8 for the purpose of this assignment. Students will have to submit a hard/soft copy of the assignment before appearing for the Semester End Exam. The assignment/project will be assessed **for 20 marks of which 10 marks will be allotted for a viva**, to assess the level of engagement of the student with the topic assigned.

 10 marks will be allotted to the overall participation in classroom learning, and skills of articulation, teamwork and leadership exhibited during the course in organizing related learning activities, as clarified in the University manual for Credit-Based Semester System.

Question Paper Pattern

There will be four questions in all with internal divisions as follows:

Question Number 1, 2 and 3 will be on Unit Numbers 1, 2 and 3 respectively each carrying 15 marks.

Each of these questions will be sub-divided into one long answer question for 9 marks, having internal choice; and one short answer question for 6 marks having internal choice.

Question number 4 will be on Unit Numbers 4 and 5 and will be short notes, each carrying 5 marks. Students will have a choice of answering 3 short notes out of 6.

The Question paper therefore will read as follows:

Question 1 (on unit 1) **15 marks**

1a) or 1b) long answer **(9 marks)**

1c) or 1d) short answer **(6 marks)**

Question 2 (on unit 2) **15 marks**

2a) or 2b) long answer **(9 marks)**

2c) or 2d) short answer **(6 marks)**

Question 3 (on unit 3) **15 marks**

3a) or 3b) long answer **(9 marks)**

3c) or 3d) short answer **(6 marks)**

Question 4 (on units 4 and 5) **15 marks**

Any three short notes

4a, 4b, 4c, 4d, 4e, 4f, 4g **(5 marks each)**

NOTE: All other rules regarding Standard of Passing, ATKT, etc., will be as per those decided by the Faculty of Arts and the Faculty of Science and passed by the Academic Council from time to time.

Suggested Readings for Foundation Course Semester III and IV

[Note: This is not an exhaustive or prescriptive list; it is merely suggested reading]

Unit 1 (Human Rights, Consumer Rights, Public Interest)

Shivananda, J. **Human Rights. Alfa Publications, New Delhi,. 2006**

Rajawat, M. **Human Rights and Dalits.Anmol Publications, New Delhi, 2005**

Kaushal, R. **Women & Human Rights in India; Kaveri Books, New Delhi, 2000**

Bajpai, A. **Child Rights in India; Oxford University Press; New Delhi; 2003**

Biju, M.R. **Human Rights in a Developing Society; Mittal Publications, New Delhi, 2005**

Prakash Kumar &Rai, K. B. **Right to Know; Vikas Publishing House, NOIDA, 2008**

Naib, Sudhir **The Right to Information Act,2005: A Handbook; OUP, New Delhi; 2011**

Sathe, S. P. **Judicial Activism in India; OUP; New Delhi, 2002**

Unit 2 (Ecology)

Satpathy, N. Sustainable Development (An Alternative Paradigm); Karnavati Publications, Ahmedabad,

Pachauri R.K & 1998Srivastava L. (eds.)Global Partners for Sustainable Development; Tata Energy Research Institute, New Delhi; 1994

Shiva, Vandana Ecology and the Politics of Survival: Conflict over Natural Resources in India; Sage Publications, California, 1991

Pereira, W Inhuman Rights: The Western System and Global Human Rights Abuse; Apex Press; 1997

Pereira, W & Seabrook J Asking the Earth: Farms, Forestry and Survival in India; Earthscan Publications; 1991

Goel, S.L. Encyclopedia of Disaster Management, Vol. I, II & III; Deep and Deep Publications Pvt. Ltd., New Delhi; 2006

Parasuraman S. & Unnikrishnan P.V: India Disasters Report; Oxford University Press, New Delhi, 2000

Unit 3 (Science and Technology)

Encyclopaedia of Science and Technology; McGraw - Hill Publication

J B S Haldane Science and Everyday Life ; Macmillan, 1941. Penguin, Ayer Co. 1975

reprint: ISBN 0-405-06595-7

Kleinman Daniel Lee Science and Technology in Society; John Wiley and Sons; 2005

Unit 4 (Effective Communications Skills)

Covey, Stephen 7 Habits of Highly Effective People; Free Press, 2004

Iyer, Prakash **The Habit of Winning; Penguin, India; 2011**

Goldratt, Eliyahu **The Goal; The Northriver Press; 3rd Edition; 2004**

Goldratt, Eliyahu **It's Not Luck; The Northriver Press; 1994**

Unit 5 (Health, Education, Urban-Rural Issues)

AzimPremji Foundation **The Social Context of Education in India;2004. www.azimpremjifoundation.org/;**

Higher Education in India; UGC Report; 2003

UNIVERSITY OF MUMBAI
No. UG/17 of 2018-19

CIRCULAR:-

Attention of the Principals of the affiliated Colleges and Directors of the recognized Institutions in Science & Technology Faculty is invited to this office Circular No. UG/153 of 2017-18, dated 3rd August, 2017 relating to syllabus of the Bachelor of Science (B.Sc.) degree course.

They are hereby informed that the recommendations made by the Board of Studies in Zoology at its meeting held on 9th April, 2018 have been accepted by the Academic Council at its meeting held on 5th May, 2018 **vide** item No. 4.32 and that in accordance therewith, the revised syllabus as per the (CBCS) for the T.Y.B.Sc. in Zoology (Sem -V & VI), has been brought into force with effect from the academic year 2018-19, accordingly. (The same is available on the University's website www.mu.ac.in).

(Dr. Dinesh Kamble)
I/c REGISTRAR

MUMBAI – 400 032
14th June, 2018

To

The Principals of the affiliated Colleges & Directors of the recognized Institutions in Science & Technology Faculty. (Circular No. UG/334 of 2017-18 dated 9th January, 2018.)

14. Skeleton Practical Exam Papers: Semester V and Semester VI

15. Add-on Project (Course codes: USZOR01 and USZOR02)

PREFACE

Revision of Syllabus, an integral part of educational institutions and one of the important functions of Board of Studies of any University, is an opportunity to revisit what is being taught and what ought to be taught to learners in the landscape of changing times.

A great initiative in the form of, prior to and during the process of curriculum design, involving various stakeholders has been a hallmark of the syllabus committee for Zoology in general and the committee for T. Y. B. Sc. Zoology, SEM V and SEM VI in particular. It is after a lot of hard work in a true team spirit that this syllabus has been prepared and presented for coming into force from the Academic Year 2018-2019.

Human beings are an intricate and unique entity of the 'Kingdom Animalia.' It is no wonder that students of yore and the present day are drawn to the subject of Zoology in all aspects of life and living, like iron to magnet. This poses a challenge while designing a curriculum since the young minds attracted to the subject, thought passionate about the subject may possess differential abilities to grasp the subject and may do so at their own pace.

The curriculum has thus to be designed not only to engage interest, to stimulate and inspire the learner but also to kindle the spirit of inquiry. The syllabus presented herewith for implementation with effect from the academic year 2018-19, in the subject of Zoology also is an instrument to inculcate in the learner the culture of critical thinking.

The scope of the curriculum therefore has to be wider incorporating elements of traditional as well as contemporary and even futuristic dimensions of the particular area of study. This aspect of curriculum design has been exemplarily met with by this syllabus in Zoology for SEM V and SEM VI at T. Y. B. Sc.

Another important consideration for the syllabus committee is to incorporate in the architectural design of the curriculum, the scope for teachers to use classical as well as contemporary technological tools of pedagogy with an aim to connect and cater to all types of learners including slow learners as well as the advanced ones. This syllabus with clearly stated objectives and outcomes, unit-wise, is one of the best examples of being an instrument of mixed pedagogy available to the teachers.

In spite of constraints in the form of having to teach curricula without including any dissection in the course of study, the syllabus committee has designed the syllabus keeping the classical flavour of the subject intact.

A unique feature of this syllabus is its unique blend of standardization and customization creating a vibrant ecosystem of teaching-learning for the teacher to function as a facilitator and mentor and for the student to take a few steps towards being a motivated student and an autonomous learner.

I place on record, appreciation for all members of the syllabus committee as well as the dynamic and visionary leader in the form of convenor of the syllabus committee, and congratulate them all, on behalf of faculty members and students of Zoology, for having designed this progressive syllabus for T. Y. B. Sc. (SEM V and SEM VI) in Zoology, to be implemented from the academic year 2018-19.

Dr. (Mrs.) V. I. Katchi
Convenor,
Interim BOS in Zoology.

PREAMBLE

Zoology has emerged as a progressive subject in the last decade with innovations in curricular designing and unique initiatives which attracted students, both from urban as well as rural colleges, in large numbers towards this subject. Experiments such as Need Based Flexi Syllabus, Open Unit to include latest topics any time before revision of syllabus, Pyramid Committee for continuity from Semester I to Semester VI, Workshop with Indian Merchants' Chamber for industry - academia interface, Workshop with the meritorious past students and current students for their inputs, uploading Draft Syllabus on the University website for Public Criticism, one month prior to BoS, etc., fetched rich dividends. The fundamental challenge however, was to design curricula without dissections, the backbone of the subject. We Zoologists though are firmly against cruelty to animals and practice conservation, had to take it with a pinch of salt that the dead table fish from the market and pests were also banned for dissection.

In keeping with the traditions this time the learners' space has been incorporated in the syllabus for the advanced learners and Research Based Pedagogical Tools (RBPT) are recommended for a unit after three days workshop organised by IISER and British Council Library, attended by good number of Zoology teachers from the rural area. Application of RBPT is optional. RBPT will be explained again in the post amendment workshop.

After conducting workshops for teachers and students, both in urban and rural areas, it was felt that the research project may be incorporated for additional credits only for the students who wish to pursue higher specialised studies and who may opt for a career in research oriented fields. Apart from a project in the Applied Component such students may present a research project under the guidance of a teacher from their college or any other college or from the industry or may do so on their own which shall be evaluated by the examiners at the time of the practical examinations and that the performance shall be considered separately as additional optional credits, based on the free choice of student and if permitted by the authorities then the same could be transferred to the other / higher programs if desired. It's a modest attempt of bringing choice based credit system with an option of transfer in the main stream academics of the University on the lines of the pioneering effort successfully launched in the subject of NCC, when introduced as an elective in academics.

Care has also been taken to include a unit on muscles which was much neglected so far in anatomy. Possibility cannot be ruled out that it may give further impetus to Zoology students to enter the career of Gym and Fitness. This niche of students shall have upper hand over other personnel in the fitness industry in passing international exams since they already have knowledge of physiology to a desired extent.

I am happy to present this syllabus for consideration of the authorities and I sincerely thank all the members who represented teachers, students, rank holders, people from the industry and interdisciplinary background, scientists from India and abroad, and a journalist from Sawantwadi who is an activist in biodiversity conservation. The draft was on University website for 2 months which gave ample opportunity to the society in general and teachers in particular to criticise. I thank all those who contributed suggestions. Lastly, on behalf of all the Zoologists, I thank the staff of Academic Authorities Unit who has blended so well with teachers that the product is innovations experimented successfully.

- Vinayak Dalvie
Convenor,
T. Y. B. Sc. Syllabus Committee in Zoology

PEDAGOGY

The syllabus framed by taking views of all the stakeholders, both from urban and rural areas into consideration and providing scope to the advanced learners without posing challenges before the average and above average students, certainly needs dynamic pedagogy with range of variations to deliver the objectives with desired outcome.

Course codes USZO501 and USZO601 attempt to make the learners understand the principles of taxonomy, levels of organisations, modern classification up to class and the evolutionary significance of various levels of organization like symmetry, coelom, segmentation, etc. It is desirable to take students in the field, rather than the classroom, and practice experiential learning making taxonomy live and interesting. It won't be an exaggeration if one feels that even protozoans could be observed from natural sample in the field by carrying a microscope. Ideally students should draw diagram of an organism / animal as they perceive through observation rather than copying a diagram from a book into the journal. Various schools of classification make it debatable. Care has been taken to adopt the latest approach and through appropriate pedagogical tools students should be able to attribute characters of a specimen up to specific class.

Course USZO502 introduces various aspects of human blood, clinical disorders and their diagnosis. The significance of the diagnostic tools must be stressed upon as they are relevant to human health. Teachers are expected to elucidate the scope of haematology and immunology as career options in the field of pathology. IISER, Pune in collaboration with British Council is advocating Research Based Pedagogical Tools through workshops sponsored by MHRD government of India. It is suggested that Unit II - Applied Haematology, of this course can also be taught, alternatively, using RBPT. The subtopics are in context to the real life and have a scope of research-based learning through actual laboratory work under the observation of their teachers. The knowledge base of blood and its components that the learners already have can be further enhanced through various activities that learners can undertake in order to relate the theory with the practicals and understand the clinical significance of various diagnostic tests. Course USZO602 includes enzymology, homeostasis and animal tissue culture. Documentaries based on nature and wild life can be effectively used to create interest in the learners about adaptive responses of animals to environment for their survival. Industrial visits, invited talks from industry persons will help in generating awareness about industrial significance of enzymes. Theory supplemented with hands-on practical on sterilization and culture techniques will help the learner to appreciate the importance of animal tissue culture. Visits to departments of microbiology and biotechnology in the institution may be encouraged to interact with teachers & students so as to create more interest. Student led seminars are a self-learning interactive method that may be encouraged.

The topics covered under course USZO503 includes Mammalian Histology, Basic Toxicology, General Pathology and Biostatistics. Microtomy, reintroduced, could be effectively used not only as a histo-pathological tool for clinical pathology but also to emphasize its applications in research. The toxicology studies can be made interesting by emphasizing its importance in pharmaceuticals and additionally the insights into regulatory aspect can be given to understand the practical difficulties and the norms associated with toxicity testing. Study visit to the pathological laboratory planned for unit II could also cover these aspects. Application of biostatistics in interpretation and validation of experimental data should be highlighted. The learners could be introduced to statistical software which have their applications in biostatistics. Course USZO603 includes Molecular Biology, Genetic Engineering, Human Genetics and Bioinformatics. Molecular biology and genetic engineering could be taught using ICT and videos available online. It is recommended to have an

industrial interface. Teachers are expected to explain the scope of gene manipulation techniques in medical science as well as industry. Through ICT, various concepts of bioinformatics such as protein sequencing, construction of evolutionary trees etc. can be taught. Use of available software in public domain to study human diseases could be focused on. The practical utilization of bioinformatics in preparing probes using database could be stressed.

A synergistic pedagogical approach between the theory and practical course of USZO504 could help in better understanding of the various subtopics such as integumentary system, osteology and the developmental stages of chick embryo. There is a scope for using ICT related teaching tools that would help in understanding the structural and the functional aspects of epidermal and dermal derivatives, various fore limb and hind limb muscles and their arrangement etc. Syllabus of the USZO604 deals with the various environmental issues and their management. Guest lectures could be arranged of the experts from such fields who can provide additional insights to these aspects. Informative documentaries based on wildlife conservation as well as human-animal conflict could make the topics relevant and interesting. Apart from formal teaching group discussion and experience sharing could be practiced for bioprospecting and zoopharmacognosy. Case studies could be supplemented with to understand the patterns of distribution of different animal species throughout the globe.

The learners' space provided in the syllabus is an effort to shift the pedagogy from being teacher-centric to learner-centric. It will be supportive to enthusiastic learners in gaining extra knowledge through various suggested activities to make their concepts impeccable and gain additional subject knowledge. Research project (USZOR01 and USZOR02), which is optional having additional credits could be mentored by the teachers encouraging more and more students to opt with a view to inculcate research culture.

T. Y. B. Sc. Zoology: Semester V (Theory)
Course Code: USZO501:
Taxonomy - Invertebrates and Type Study
Course 11

Unit I: Principles of Taxonomy (15L)

Objective:

- *To introduce the principles of taxonomy and modern system of classification in animal kingdom with evolution point of view.*

Desired outcome:

- *Learners will apprehend the basis of classification and modern classification up to class of the lower invertebrate animals.*

1.1: Levels of Organization:

1.1.1: Unicellularity, colonization of cells, multicellularity

1.1.2: Levels of Organization: Acellular, Cellular, Tissue level, Organ level and 'Organ-system' level

1.2: Symmetry

1.2.1: Basic concept and definition

1.2.2: Types:

a. Asymmetry: e.g. *Amoeba*
b. Radial symmetry: e.g. Starfish
c. Bi-lateral symmetry: e.g. Invertebrate - Planaria
Vertebrate - Man

1.2.3: Evolutionary significance of symmetry

1.3: Coelom

1.3.1: Basic concept and definition

1.3.2: Formation of coelom

1.3.3: Types:

a. Acoelomate: Platyhelminthes e.g. Liverfluke
b. Pseudocoelomate: Nematoda e.g. Roundworm
c. Coelomate: e.g. Frog

1.3.4: Evolutionary significance of coelom

1.4: Metamerism

1.4.1: Basic concept and definition

1.4.2: Types:

a. Pseudometamerism: e.g. Tapeworm

b. True metamerism:
   i. Homonomous - Annelida e.g. *Nereis*
   ii. Heteronomous - Cephalization - Insecta e.g. Dragonfly
   Cephalothorax - Crustacean e.g. Lobster

1.4.3: Evolutionary significance of metamerism

1.5: Taxonomy

1.5.1: Basic concept, definition and objectives

1.5.2: Linnaean Hierarchy, Binomial Nomenclature

1.5.3: Six Kingdom classification:

General characters of each Kingdom with examples:

- Kingdom Archaebacteria
- Kingdom Eubacteria
- Kingdom Protista
- Kingdom Fungi
- Kingdom Plantae
- Kingdom Animalia

1.6: Kingdom Protista: Animal like Protists: Protozoa

1.6.1: General characters of Protozoa

1.6.2: Classification of Protozoa with distinguishing features and suitable examples:

- Phylum Sarcomastigophora
  - Class Sarcodina e.g. *Amoeba*
  - Class Mastigophora e.g. *Trypanosoma*
- Phylum Ciliophora
  - Class Ciliata e.g. *Opalina*
  - Class Phyllopharyngea e.g. *Dysteria*
- Phylum Sporozoa
  - Class Aconoidasida e.g. *Plasmodium*
  - Class Conoidasida e.g. *Toxoplasma*

Unit II: Kingdom Animalia I **(15L)**

Objective:

- *To comprehend the general characters and classification of Kingdom Animalia from Porifera to Nematoda and specific characters of organisms belonging to these phyla.*

Desired outcome:

- *The learners will be familiarized with classification up to phylum Nematoda along with their examples.*

2.1: Phylum Porifera

a. General characters
b. Classification up to class with distinguishing features and suitable examples:
   - Class Calcarea e.g. *Leucosolenia (Branched sponge)*

- Class Hexactinellida e.g. *Hyalonema* (Glass-rope sponge)
- Class Demospongia e.g. *Euspongia* (Bath sponge)

2.2: Phylum Cnidaria

a. General characters
b. Classification up to class with distinguishing features and examples
   - Class Hydrozoa e.g. *Hydra*
   - Class Scyphozoa e.g. *Aurelia* (Jelly fish)
   - Class Anthozoa e.g. *Meandrina* (Maze Coral)

2.3: Phylum Platyhelminthes

a. General characters
b. Classification up to class with distinguishing features and examples
   - Class Turbellaria e.g. *Dugesia* (Planaria)
   - Class Trematoda e.g. *Schistosoma* (Blood-fluke)
   - Class Cestoda e.g. *Taenia* (Tapeworm)
c. Morphology, life cycle and pathogenicity of *Fasciola hepatica*

2.4: Phylum Nematoda

a. General characters
b. Classification up to class with distinguishing features and examples
   - Class: Aphasmida (Adenophorea) e.g. *Trichinella* (Trichina worm)
   - Class: Phasmida (Secernentea) e.g. *Ascaris* (Roundworm)

Unit III: Kingdom Animalia II **(15L)**

Objective:

- *To introduce basic concepts of classification up to class in animal kingdom from phylum Annelida to Hemichordata and to familiarize with their characters.*

Desired outcome:

- *Learners will get an idea of higher groups of invertebrate animal life, their classification and their peculiar aspects.*

3.1: Phylum Annelida

3.1.1: General characters

3.1.2: Classification up to class with distinguishing features and examples
   - Class Polychaeta e.g. *Neries* (Clamworm)
   - Class Oligochaeta e.g. *Pheretima* (Earthworm)
   - Class Hirudinea e.g. *Hirudinaria* (Leech)

3.2: Phylum Arthropoda

3.2.1: General characters

3.2.2: Classification up to class with distinguishing features and examples
   - Subphylum Chelicerata
     - Class Arachnida e.g. *Hottentotta* (Scorpion)
     - Class Merostomata e.g. *Limulus* (Horse-shoe crab)
     - Class Pycnogonida e.g. *Nymphon* (Sea spider)

- Subphylum Crustacea
  - Class Malacostraca e.g. *Scylla* (Crab)
  - Class Maxillipoda e.g. *Balanus* (Barnacle)
- Subphylum Uniramia
  - Class Chilopoda e.g. *Scolopendra* (Centipede)
  - Class Diplopoda e.g. *Xenobolus* (Millipede) ·

  Class Insecta e.g. *Attacus* (Moth)

3.3: Phylum Mollusca

3.3.1: General characters of the Phylum

3.3.2: Classification up to class with distinguishing features and examples

- Class Aplacophora e.g. *Chaetoderma* (Glisten worm solenogaster)
- Class Polyplycophora e.g. *Chiton* (Coat-of-mail shell)
- Class Monoplacophora e.g. *Neopilina*
- Class Gastropoda e.g. *Nerita* (Nerit)
- Class Pelecypoda e.g. *Solen* (Razor clam)
- Class Scaphopoda e.g. *Dentalium* (Tusk shell)
- Class Cephalopoda e.g. *Nautilus* (Pearly nautilus)

3.4: Phylum Echinodermata

3.4.1 General characters

3.4.2 Classification up to class with distinguishing features and examples

- Class Asteroidea e.g. *Protoreaster* (Starfish)
- Class Ophiuroidea e.g. *Ophiothrix* (Brittle star)
- Class Echinoidea e.g. *Clypeaster* (Sand dollar)
- Class Holothuroidea e.g. *Cucumaria* (Sea cucumber)
- Class Crinoidea e.g. *Antedon* (Sea lily)

3.5 Minor phyla

3.5.1: General characters along with examples of

- Phylum Acanthocephala e.g. *Moniliformis*
- Phylum Onychophora e.g. *Peripatus* (Velvet worm)
- Phylum Chaetognatha e.g. *Sagitta* (Arrow worm)

3.5.2: *Peripatus*, a connecting link - Affinities with Phylum Annelida, Arthropoda and Mollusca.

3.6 Phylum Hemichordata

3.6.1: General characters, classification with distinguishing features and examples

- Class Enteropneusta e.g. *Balanoglossus* (Acorn worm)
- Class Pterobranchia e.g. *Rhabdopleura*
- Class Planctosphaeroidea e.g. *Planctosphera*

3.7 Basic concepts of phylogeny: Phylogenetic tree of invertebrates

Unit IV: Type study: *Sepia* **(15L)**

Objective

- *To acquaint learners with the details of Sepia as a representative of invertebrate animals.*

***Desired* outcome**

- *Learners will get an idea of general characteristics and details of invertebrate animal systems.*

4.1: General characters and classification, Habit and habitat, External characters, mantle cavity, locomotion, economic importance

4.2: Digestive system, Respiratory system, Circulatory system, Excretory system, Nervous system and Sense organs, Reproductive system

Course Code: USZO502:
Haematology and Immunology
Course 12

Unit I: Basic Haematology (15L)

Objectives:

- *To introduce to the learner the composition of blood, haemorrhage and haematopoiesis.*
- *To acquaint the learner with the physiology of blood clotting and clinical aspects of haematology.*

Desired outcome:

- *The learner shall comprehend basic haematology.*
- *The learner will be able to identify various components of haemostatic systems.*

1.1: Composition of plasma: Water, respiratory gases, dissolved salts, plasma proteins, nutrients, enzymes, hormones, nitrogenous waste products

1.2: Haematopoiesis: Erythropoiesis, leucopoiesis and thrombopoiesis

1.3: Erythrocytes: Structure and functions, abnormalities in structure, total count, variation in number; ESR; types of anaemia

1.4: Haemoglobin: Structure, formation and degradation; variants of haemoglobin (foetal, adult), abnormalities in haemoglobin (sickle cell and thalassemia)

1.5: Leucocytes: Types and functions, total count and variation in number; leukaemia and its types

1.6: Thrombocytes: Structure, factors and mechanism of clotting, failure of clotting mechanism

1.7: Blood volume: Total quantity and regulation; haemorrhage

Unit II: Applied Haematology (15L)

Objective:

- *To introduce to the learner the basics of applied haematology and to impart knowledge of diagnostic techniques used in pathology.*

Desired outcome:

- *The learner will be familiar with the terminology used and diagnostic tests performed in a pathological laboratory.*
- *The learner shall be acquainted with diagnostic approaches in haematological disorders.*
- *The learner will be better equipped for further pathological course or working in a diagnostic laboratory.*

2.1: Introduction and scope of Applied Haematology: Clinical, microbiological, oncological and forensic haematology

2.2: Clinical significance of Diagnostic Techniques

2.2.1: Microscopic examination of blood:

- Blood cancer (lymphoma, myeloma),
- Infectious diseases (malaria, leishmaniasis),
- Haemoglobinopathies (sickle cell anaemia, thalassemia)

2.2.2**:** Coagulopathies: Haemophilia and purpura

2.2.3**:** Biochemical examination of blood:

- Liver function tests: AST, ALT, LDH, Alkaline phosphatase , Total and direct bilirubin
- Kidney function test**:** Serum creatinine, Blood Urea Nitrogen (BUN)
- Carbohydrate metabolism tests: Blood sugar, Glucose tolerance test, Glycosylated haemoglobin test
- Other biochemical tests: Blood hormones - TSH, FSH, LH.

Unit III: Basic Immunology (15L)

Objective:

- *To introduce the topic of immunology by emphasizing the basic concepts to build a strong foundation and to give an overview of the immune system that plays an important role in disease resistance.*

Desired outcome:

- *The learner shall comprehend the types of immunity and the components of immune system.*
- *The learner will realize the significant role of immune system in giving resistance against diseases.*

3.1: Overview of Immunology

3.1.1: Concept of immunity

3.1.2: Innate immunity - Definition, factors affecting innate immunity, Mechanisms of innate immunity - First line of defence - physical and chemical barriers; Second line of defence - phagocytosis, inflammatory responses and fever

3.1.3: Adaptive or Acquired immunity, Antibody mediated and cell mediated immunity; Active Acquired immunity - Natural and Artificial; Passive Acquired immunity - Natural and Artificial

3.2: Cells and Organs of immune system

3.2.1: Cells of immune system - B cells, T cells and null cells, macrophages, dendritic cells and mast cells

3.2.2: Organs of immune system

- Primary: Thymus and bone marrow
- Secondary: Lymph nodes and spleen

3.3: Antigens: Definition and properties; haptens

3.4: Antibodies: Definition, basic structure, classes of antibodies - IgG, IgA, IgM, IgD and IgE

3.5: Antigen processing and presentation

3.5.1: Endogenous antigens - cytosolic pathways

3.5.2: Exogenous antigens - endocytic pathways

Unit IV: Applied Immunology (15L)

Objectives:

- *To introduce immunopathology to the learner*
- *To introduce the concept of vaccines and vaccination.*
- *To familiarise the learner to immunological perspectives of organ transplantation.*

Desired outcome:

- *The learner shall understand immunopathology and the principles and applications of vaccines.*
- *The learner will develop basic understanding of immunology of organ transplantation.*

4.1: Antigen-Antibody interaction

4.1.1**:** General features of antigen-antibody interaction

4.1.2**:** Precipitation reaction - Definition, characteristics and mechanism.

- Precipitation in gels (slide test)
- Radial immunodiffusion (Mancini method)
- Double immunodiffusion (Ouchterlony method)

4.1.3**:** Immunoelectrophoresis - Counter-current and Laurel's Rocket electrophoresis

4.1.4**:** Agglutination reaction definition, characteristics and mechanism.

- Haemagglutination (slide and micro-tray agglutination)
- Passive agglutination
- Coomb's test

4.1.5**:** Immunoassay - ELISA

4.2: Vaccines and Vaccination

4.2.1**:** Principles of vaccines - active and passive immunization, Routes of vaccine administration

4.2.2**:** Classification of vaccines:

- Live attenuated
- Whole-Killed or inactivated
- Sub-unit vaccines: Toxoids, Protein vaccines, Viral-like particles, DNA vaccines

4.2.3**:** Adjuvants used for human vaccines:

- Virosomes and Liposomes
- Saponins

- Water-in-oil emulsions

4.2.4**:** Vaccines against human pathogens:

- Polio
- Hepatitis A and B
- Tuberculosis (BCG)

4.3: Transplantation Immunology: Introduction to transplantation; Types of grafts; Immunologic basis of graft rejection: MHC compatibility in organ transplantation, Lymphocyte and Antibody mediated graft rejection; Precautionary measures against graft rejection

Course Code: USZO503:
Histology, Toxicology, Pathology and Biostatistics
Course 13

Unit I: Mammalian Histology (15L)

Objectives:

- *To familiarize the learner with the cellular architecture of the various organs in the body.*
- *To make the learner understand the need and importance of different types of tissues in the vital organs and their functions.*

Desired outcome:

- *Learner would appreciate the well planned organization of tissues and cells in the organ systems.*

1.1: Vertical section (V.S.) of skin: Layers and cells of epidermis; papillary and reticular layers of dermis; sweat glands, sebaceous glands and skin receptors

1.2: Digestive System

1.2.1: Vertical section (V.S.) of tooth; hard tissue - dentine and enamel; soft tissue - dentinal pulp and periodontal ligaments

1.2.2: Transverse section (T.S.) of tongue - mucosal papillae and taste buds

1.2.3: Alimentary canal - Transverse section (T.S.) of stomach, small intestine, large intestine of mammal.

1.2.4: Glands associated with digestive system - Transverse section (T.S.) of salivary glands, liver.

Unit II: Toxicology (15 L)

Objectives:

- *To introduce the learner to the principles of toxicology with particular emphasis on toxic responses to chemical exposures, nature and effect of toxicity and toxicity testing.*
- *It also intends to develop amongst students an introductory understanding of regulatory affairs in toxicology.*

Desired outcome:

- *The course will prepare learner to develop broad understanding of the different areas of toxicology.*
- *It will also develop critical thinking and assist students in preparation for employment in pharmaceutical industry and related areas.*

2.1: Basic toxicology

2.1.1: Introduction to toxicology - brief history, different areas of toxicology, principles and scope of toxicology

2.1.2: Toxins and Toxicants - Phytotoxins (caffeine, nicotine), Mycotoxins (aflatoxins),

Zootoxins (cnidarian toxin, bee venom, scorpion venom, snake venom)

2.1.3: Characteristics of Exposure - Duration of exposure, Frequency of exposure, Site of exposure and Routes of exposure

2.1.4: Types of Toxicity - Acute toxicity, Sub-acute toxicity, Sub-chronic toxicity and Chronic toxicity

2.1.5: Concept of LD_{50}, $^{LC}_{50}$, $^{ED}_{50}$

2.1.6: Dose Response relationship - Individual / Graded dose response, Quantal dose response, shape of dose response curves, Therapeutic index, Margin of safety

2.1.7: Dose translation from animals to human - Concept of extrapolation of dose, NOAEL (No Observed Adverse Effect Level), Safety factor, ADI (Acceptable Daily Intake)

2.1.8: Target organ toxicity:
Hepatotoxicity: susceptibility of the liver, types of liver injury, examples of hepatotoxicants;
Neurotoxicity: vulnerability of nervous system, examples of neurotoxicants;
Nephrotoxicity: susceptibility of kidney, examples of nephrotoxicants

2.2: Regulatory toxicology

2.2.1: OECD guidelines for testing of chemicals (an overview)

2.2.2: CPCSEA guidelines for animal testing centre, ethical issues in animal studies

2.2.3: Animal models used in regulatory toxicology studies

2.2.4: Alternative methods in toxicology (*in vitro* tests)

Unit III: General Pathology (15L)

Objectives:

- *To introduce the learner to basics of general pathology.*
- *To impart knowledge of retrogressive, necrotic, pathological conditions in the body.*
- *To explain repair mechanism of the body.*

Desired outcome:

- *Learner will be familiar with various medical terminology pertaining to pathological condition of the body caused due to diseases.*

3.1: General Pathology: Introduction and scope

3.2: Cell injury: Mechanisms of cell injury: ischemic, hypoxic, free radical mediated and chemical

3.3: Retrogressive changes: Definition, cloudy swelling, degeneration: fatty, mucoid and amyloid (causes and effects)

3.4: Disorders of pigmentation: Endogenous: Brief ideas about normal process of pigmentation, melanosis, jaundice (causes and effects)

3.5: Necrosis: Definition and causes; nuclear and cytoplasmic changes; types: coagulative, liquefactive, caseous, fat and fibroid

3.6: Gangrene: Definition and types - dry, moist and gas gangrene

Unit IV: Biostatistics (15L)

Objective:

- *To make learner familiar with biostatistics as an important tool of analysis and its applications.*

Desired outcome:

- *The learner will be able to collect, organize and analyse data using parametric and non-parametric tests.*
- *They will also be able to set up a hypothesis and verify the same using limits of significance.*

4.1: Probability Distributions: Normal, Binomial, Poisson distribution, Z-transformation, p-value, Probability - Addition and multiplication rules and their applications

4.2: Measures of Variation: Variance, standard deviation, standard error

4.3: Testing of Hypothesis: Basic concepts, types of hypothesis: Null hypothesis and Alternate hypothesis, Levels of significance and testing of hypothesis

4.4: Parametric and non-parametric test: Parametric tests: two-tailed Z-test and t-test Non-parametric test: Chi-square test and its applications

4.5: Correlation: Correlation coefficient and its significance

Course Code: USZO504:
Anatomy and Developmental Biology
Course 14

Unit I: Integumentary system and derivatives (15L)

Objective:

- *To introduce the learner to understand different integumentary structures and derivatives in the vertebrates and to acquaint learners with special derivatives of integument.*

Desired outcome:

- *Learner will be able to understand the importance of various types of epidermal and dermal derivatives along with their functions.*

1.1: Basic structure of integument: Epidermis and dermis

1.2: Epidermal derivatives of Vertebrates

1.2.1: Hair, hoof, horn, claw, teeth, beak and epidermal scales (small scales, large scales, modified scales - spine)

1.2.2: Glands - types (mucous, serous, ceruminous, poison, uropygial and salt gland) and functions

1.2.3: Type of feathers

1.3: Dermal derivatives of Vertebrates: Scales in fish; scutes in reptiles and birds; dermal scales in mammals - Armadillo, Antler - Caribou

1.4: Special derivatives of integument: Wart in toad, rattle in snake, whale bone in baleen whale, kneepads in camel.

Unit II: Human Osteology (15L)

Objective:

- *To introduce the learner to different bones of human skeleton and their functional importance.*

Desired outcome:

- *Learner will be able to understand the structure, types and functions of human skeleton.*

2.1: Introduction: Bone structure (Histology), physical properties, chemical composition and general functions of bones.
Cartilage: General structure, functions

2.2: Axial skeleton

2.2.1: Skull: General characteristics of skull bones - Cranial and facial bones

2.2.2: Vertebral column: General characteristics of a vertebra, structure of different types of vertebrae (cervical, thoracic, lumbar, sacrum and coccyx)

2.2.3: Ribs and sternum: General skeleton of ribs and sternum

2.2.4: Hyoid bone: Structure and function.

2.3: Appendicular skeleton
2.3.1: Pectoral girdle and bones of forelimbs

2.3.2: Pelvic girdle and bones of hind limbs

Unit III: Muscles of long bones of Human limbs (15L)

Objectives:
- *To study long limb muscles involved in body movements.*
- *To identify various arrangements of the long limb muscles and to relate the arrangement with contraction and motion.*
- *To study muscle injuries and syndromes.*

Desired outcome:
- *Learner will be able to understand the types of long limb muscles, its arrangement and their role in body movements.*

3.1: Introduction and types of long limb muscles
3.1.1: Flexors, Extensor, Rotator, Abductors, Adductors

3.2: Muscles of forelimbs
3.2.1: Muscles that move the arm (Humerus) - *Triceps brachii, Biceps brachii, brachialis* and *brachioradialis*

3.2.2: Muscles that move the forearm (Radius-ulna) - *Flexor carpi radialis, Flexor carpi ulnaris* and *Extensor carpi ulnaris*

3.2.3: Muscles that move the wrist, hand and fingers - *Flexor digitorium superficialis, Extensor carpi radialis* and *Extensor digitorum*

3.3: Muscles of hindlimbs
3.3.1: Muscles that move the thigh (Femur) - Sartorius, Adductor group, Quadriceps group (*Rectus femoris, Vastus lateralis, Vastus medialis*), Hamstring group (*Biceps femoris, Semimembranosus, Semitendinosus*)

3.3.2: Muscles that move the lower leg (tibia-fibula) - *Fibularis longus, Gastrocnemius, Tibialis anterior, Soleus, Extensor digitorum longus* and *Fibularis tertius*

3.3.3: Muscles that move the ankle, foot and toes - *Tibialis anterior, Extensor digitorum, Longus* and *Fibularis* muscles

Unit IV: Developmental biology of Chick (15L)

Objective:

- *To introduce the learner to the basics of developmental biology with reference to chick as a model and also familiarize with experiments related to it.*

Desired outcome:

- *Learner will be able to understand the processes involved in embryonic development and practical applications of studying the chick embryology.*

4.1: Introduction to Developmental Biology: Basic concept and principles of developmental biology - morphogenesis, organogenesis, fate maps, cell adhesion, cell affinity and cell differentiation.

4.2: Development of Chick embryo

4.2.1: Structure of Hen's egg, physico-chemical nature and forms of yolk - granular, platelets and spheres; fertilization, cleavage, blastulation, gastrulation

4.2.2: Structure of chick embryo - 18hours, 24 hours, 33 hours, 48 hours and 72 hours

4.2.3: Extra embryonic membranes

4.2.4: Organizer: Introduction, Spemann Mangold experiment, Hensen's node as an organizer

Practical Syllabus for Semester V
Course code: USZOP05; Course 11

1. Classification of phyla up to class and study of the general characters up to class.
   Kingdom Protista - Animal-like Protists: Protozoa
   A. Phylum: Sarcomastigophora
      - Class Sarcodina e.g. *Amoeba*
      - Class Mastigophora e.g. *Euglena*

   B. Phylum: Ciliophora
      - Class Ciliata e.g. *Paramoecium*
      - Class Phyllopharyngea e.g. *Dysteria*

   C. Phylum: Sporozoa,
      - Class Aconoidasida e.g. *Eimeria*
      - Class Conoidasida e.g. *Sarcocystis*

   Kingdom Animalia

   D. Phylum: Porifera
      - Class Calcarea e.g. *Scypha* (Little vase sponge)
      - Class Hexactinellida e.g. *Hyalonemma* (Glass-rope sponge)
      - Class Demospongia e.g. *Spongilla* (Freshwater sponge)

   E. Phylum Cnidaria
      - Class Hydrozoa e.g. *Vellela* (By-the-wind sailor)
      - Class Scyphozoa e.g. *Rhizostoma* (Barrel jellyfish)
      - Class Anthozoa e.g. *Corallium* (Coral)

   F. Phylum Platyhelminthes
      - Class Turbellaria e.g. *Dugesia* (Planaria)
      - Class Trematoda e.g. *Fasciola* (Liverfluke)
      - Class Cestoda e.g. *Taenia* (Tapeworm)

   G. Phylum Nematoda
      - Class Aphasmida (Adenophorea) e.g. *Trichinella* (Trichina worm)
      - Class Phasmida (Secernentea) e.g. *Ascaris* (Roundworm)

   H. Phylum Annelida
      - Class Polychaeta e.g. *Arenicola* (Lugworm)
      - Class Oligochaeta e.g. *Tubifex* (Sludge worm)
      - Class Hirudinea e.g. *Pontobdella* (Marine leech)

   I. Phylum Arthropoda
   Subphylum Chelicerata
      - Class Arachnida e.g. *Hotentotta* (Scorpion)
      - Class Merostomata e.g. *Limulus* (Horseshoe crab)
      - Class Pycnogonida e.g. *Nymphon* (Sea spider)

Subphylum Crustacea

- Class Malacostraca e.g. *Panulirus* (Lobster)
- Class Maxillipoda e.g. Cyclops (Copepods)

Subphylum Uniramia

- Class Chilopoda e.g. *Scolopendra* (Centipedes)
- Class Diplopoda e.g. *Xenobolus* (Millipedes)

Class Insecta e.g. *Attacus* (Moth)

J. Phylum Mollusca

- Class Aplacophora e.g. *Chaetoderma* (Glisten worm solenogaster)
- Class Polyplacophora e.g. *Tonicella* (Lined Chiton)
- Class Monoplacophora e.g. *Neopilina*
- Class Gastropoda e.g. *Turbo* (Turban shell)
- Class Pelycypoda e.g. *Donax* (Wedge shell)
- Class Scaphopoda e.g. *Dentalium* (Tusk shell)
- Class Cephalopoda e.g. *Octopus*

K. Phylum Echinodermata

- Class Asteroidea e.g. *Asterias* (Starfish)
- Class Ophiuroidea e.g. *Ophiothrix* (Brittle star)
- Class Echinoidea e.g. *Echinus* (Sea urchin)
- Class Holothuroidea e.g. *Cucumaria* (Sea cucumber)
- Class Crinoidea e.g. *Crinoid* (Sea lily)

L. Phylum Hemichordata

- Class Enteropneusta e.g. *Saccoglossus*
- Class Pterobranchia e.g. *Rhabdopleura*
- Class Planctosphaeroidea e.g. *Planctosphaera*

2. Minor Phyla

Acoelomate

M. Phylum Acanthocephala e.g. *Echinorhynchus*

Coelomate

N. Phylum Chaetognatha e.g. *Sagitta*

O. Phylum Onychophora e.g. *Peripatus* (Velvet worm)

3. Study of *Sepia* with the help of diagram / Photograph / Simulation whichever possible. No animal shall be dissected.
   a) Digestive system,
   b) Reproductive system
   c) Nervous system
   d) Jaws
   e) Radula
   f) Chromatophores
   g) Spermatophores
   h) Statocyst

4. Study tour - Visit to fish market / Aquarium / Local Gardens / Local available niche / National Parks / Sanctuaries / and such other places to observe invertebrates with special emphasis on Western Ghats and coast of Maharashtra and submit a report. College may conduct more than one field visit for wide exposure, if feasible. However, at least one field visit should be such that it is affordable to every student.

Course code: USZOP05; Course 12

1. Enumeration of Erythrocytes - Total Count.
2. Enumeration of Leucocytes - Total Count.
3. Differential count of Leucocytes.
4. Erythrocyte Sedimentation Rate by suitable method - Westergren or Wintrobe method.
5. Estimation of haemoglobin by Sahli's acid haematin method.
6. Determination of serum LDH by using colorimeter / spectrophotometer.
7. Estimation of total serum/ plasma proteins by Folin's method.
8. Estimation of serum/ plasma total triglycerides by Phosphovanillin method.
9. Latex agglutination test - Rheumatoid Arthritis.
10. Determination of bleeding and clotting time.

Course code: USZOP05; Course 13

1. Study of mammalian tissues: V.S. of Tooth, T.S. of Stomach, T.S. of small intestine, T.S. of Liver.
2. Microtomy: Tissue preservation and fixation, dehydration, infiltration, paraffin embedding and block preparation, sectioning, staining.
3. Identification of diseases or conditions (from slides or pictures): Vitiligo, Psoriasis, Bed sores, Necrosis, Oedema
4. To study the effect of CCl_4 on the level of enzyme activity in liver on aspartate and alanine amino transferase, alkaline phosphatase (*in vitro* approach).
5. Study and interpretation of abnormal pathological reports: Blood (CBC), Urine (Routine) and Stool (Routine).
6. Following biostatistics practicals will be done using data analysis tool of Microsoft Excel (DEMONSTRATION in regular practicals) and manually:
   a. Problems based on Z-test
   b. Problems based on t-test
   c. Problems based on Chi-square test
   d. Correlation, regression analysis - demonstration only.
   e. Problems based on ANOVA - demonstration only.

(Learner is expected to identify appropriate test for the given problem)

Course code: USZOP05; Course 14

1. Study of integumentary systems - V. S. of Skin of Shark, Frog, *Calotes*, Pigeon and Human
2. Study of Human Axial Skeleton - Skull (whole) and Vertebral column (axis, atlas, typical cervical, typical thoracic, typical lumbar, sacrum, coccyx)
3. Study of Human Appendicular Skeleton - Pectoral and pelvic girdle with limb bones
4. Study of muscles of forelimbs - *Biceps brachii, Brachialis, Brachio radialis, Triceps brachii, Flexor carpi radialis, Flexor carpi ulnaris* and *Extensor carpi ulnaris*
5. Study of muscles of hind limbs - Sartorius, Adductor group, Quadriceps group *Rectus femoris, Vastus lateralis, Vastus medialis, Hamstring* group (*Biceps femoris, Semimembranosus, Semitendinosus*), *Fibularis longus, Gastrocnemius Tibialis anterior, Soleus, Extensor digitorum longus, Fibularis tertius*
6. Study of ontogeny of chick embryo using permanent slides - 18 hours, 24 hours, 33 hours, 48 hours and 72 hours.
7. Preparation of temporary mounting of chick embryo up to 48 hours of incubation.

LEARNERS' SPACE

Course 11

1. Learners can visit different websites to get information about the invertebrates discovered recently in Maharashtra as well as in the world.
2. Learners can play games to identify kingdom, phylum or class based on the characters of animals.
3. Investigate the process of formation of first life/cell on earth
4. List the names of places in India where corals are found.
5. Study the corals as an indicator of healthy ecosystem.
6. Enlist medicinal uses of leech.
7. State the differences between *Loligo* and *Sepia*.
8. Collect information on differences between minor phyla and major phyla.
9. Study the economic importance of molluscs.
10. Collect the information on torsion-detorsion in gastropods.

Course 12

1. Study the latest medical applications of haemopoietic cells.
2. Prepare a report on thrombosis, its causes, risk factors, symptoms and prevention.
3. Other than haemophilia, there are many more coagulation factor disorders. Explore this area.
4. Investigate the traditional and recent methods of grouping and cross matching of blood.
5. Compile information on Bombay blood group.
6. Study the recent advancements in organ transplantation.
7. Autoimmune diseases are on the rise. Explore the reasons, types as well as its mechanisms.
8. Distinguish different types of hypersensitivity.
9. Make a detailed report on bone marrow transplantation.
10. Explain the application of radiation technology in vaccine development.
11. Attempt to understand immune mechanisms in invertebrates.
12. Attempt to understand immune mechanisms in pets.

Course 13

1. Define- Histopathology. Name the cytological techniques used to stain DNA in the tissues.
2. Prepare a chart as follows

Sr. No.	Type of Embryonic origin	Tissues/Organ/Gland	Position in the body of vertebrates
1.	Ectoderm		
2.	Endoderm		
3.	Mesoderm		
4.	Dual origin		

3. From internet, survey types of stains used in temporary and permanent preparation of slides.
4. Find the ways to prevent post mortem changes in histological preparation of experimental animals.
5. Enumerate sub-lethal dose or sub-lethal concentration of a toxicant.
6. Give the significance of probit analysis and comment on Finney method of toxicity evaluation.

7. Find the differences between bioaccumulation, biotransformation and bio-magnification in the trophic levels. Do search for bioremediation against pollutants.
8. Discuss the various routes of intoxication in vertebrate animals.
9. Enlist the common inflammatory diseases.
10. Define - Metastasis and Neoplasia
11. Explain the procedure of biopsy. Give its significance.
12. Prepare a chart as follows:

Sr. No.	Samples	Types of pathological test conducted.	Confirmation of diseases
1.	Blood		
2.	Urine		
3.	Sputum		
4.	Semen		
5.	Root hair somatic cell		
6.	Bone marrow		
7.	Stool		

13. Give the use of standard error in biological research.
14. Explain various types of correlations possibilities in biological events.
15. Differentiate between primary and secondary data.
16. Study computer spreadsheet programme. Find software programmes for statistical tests used in biological research.

Course 14

1. Distinguish between holocrine, merocrine and apocrine glands.
2. Explain the difference between plastic and cosmetic surgery.
3. Comment on skin cancer and its preventive measures.
4. Find the ABCD rule for recognizing melanoma
5. Elaborate the term cyanosis.
6. Find the correlation between biological clock/rhythm melanin secretion and sleep.
7. List various applications of forensic osteology and human osteoarchaeology.
8. Role of osteology in understanding human evolution and taxonomy.
9. Give the correlation between age, nutrition and growth of bones.
10. Find out the following:
    a) Correlation between muscles and body building
    b) Smallest muscle, strongest muscle and the muscle that is never tired in our body.
    c) Number of muscles required for taking one step
11. Name three muscles or muscle groups used as sites for intramuscular injections especially used in babies.
12. Distinguish between the effect of exercises on muscles of a marathon runner and a weight lifter.
13. Describe different theories of experimental embryology.
14. Collect the brief information regarding the human embryogenesis.
15. Explain recapitulation theory.
16. Use of French flag model to understand developmental biology.
17. Complete the following table:

Drosophila body Patterning		
Category of genes	**Name of genes**	**Role of genes**
Egg-polarity genes	----------	Establish the Antero-posterior axis
Gap genes	----------	Establish 3 broad segments of the embryo
Pair-rule genes	----------	Establishes odd and even segments
Segment-polarity genes	----------	Establishes anterior posterior polarity of each segment
Homeotic genes	----------	Establishes segmental identity

T. Y. B. Sc. Zoology: Semester VI (Theory)
Course Code: USZO601:
Taxonomy - Chordates and Type Study
Course 15

Unit I: Phylum Chordata: Group Protochordata and Group Euchordata I (**15L**)

Objective:

- *To introduce basic concepts of modern Chordate classification with evolution point of view and to understand the concept of taxonomy in higher animal kingdom.*

Desired outcome:

- *Learners will get an idea of origin of Chordates, its taxonomy up to class with reference to phylogeny and their special features.*

1.1: General characters, Difference between non-chordates and chordates

Origin of chordates: Annelids as ancestors, Arachnids as ancestors and affinities with Echinodermata

1.2: **Protochordata**

1.2.1: General characters of Group Protochordata

1.2.2: Distinguishing characters of Subphylum Urochordata and Cephalochordata

1.2.3: Subphylum Urochordata

- Class Ascidiacea e.g. *Herdmania*
- Class Thaliacea e.g. *Salpa*
- Class Larvacea e.g. *Oikopleura*

1.2.4: Subphylum Cephalochordata

- Class Leptocardii e.g. *Branchiostoma* (*Amphioxus*)

1.3: Group Euchordata I

Group Euchordata: General characters

- Subphylum Vertebrata: General characters
- Division Agnatha and Gnathostomata: Distinguishing characters.

General characters with examples of:

- Class Ostracodermii e.g. *Cephalaspis*
- Class Cyclostomata e.g. *Petromyzon* (Lamprey)

Unit II: Group Euchordata II **(15L)**

2.2.1: Division: Gnathostomata

- Superclass: Pisces and Tetrapoda
- Superclass - Pisces: Distinguishing characters
  - Class Placodermi e.g. *Climatius*
  - Class Chondrichthyes e.g. *Rhinobatos* (Guitar fish)
  - Class Osteichthyes e.g. *Exocetus* (Flying fish)

2.2.2: Dipnoi (Lung fish): Distribution, habit and habitat, external and internal characters, affinities with super class Pisces, affinities and differences with class Amphibia

2.3: Superclass Tetrapoda

- Class Amphibia: General characters

  Examples:

  a. Limbless amphibian e.g. *Ichthyophis* (Caecilian)
  b. Tailed amphibian e.g. *Amphiuma*
  c. Tailless amphibian e.g. *Hyla* (Tree frog)

Unit III: Group Euchordata III **(15L)**

Objective:

- *To introduce the learners to the distinguishing characters of classes Reptilia, Aves and Mammalia and their adaptive features with reference to their habitat.*

Desired outcome:

- *Learners will understand the characteristic features and examples of class of Reptilia, Aves and Mammalia.*

3.1: Class Reptilia: General characters

Examples

a. Extinct reptile e.g. *Ichthyosaurus*
b. Living fossil e.g. *Sphenodon* (Tuatara)
c. Aquatic reptile e.g. *Chelonia* (*Sea turtle*)
d. Arboreal reptile e.g. *Chamaeleo* (Chamaeleon)

3.2: Class Aves: General Characters

Examples

a. Arboreal bird e.g. *Melanerpes* (Wood pecker)
b. Terrestrial bird e.g. *Gallus* (Fowl)
c. Swimming bird e.g. *Phalacrocorax* (Cormorant)
d. Wading bird e.gs. *Ardeola* (Heron)
e. Birds of prey e.g. *Tyto* (Owl)
f. Flightless birds e.g. *Dromaius* (Emu)

3.3: Class Mammalia: General characters

Examples

a. Egg-laying mammals e.g. *Ornithorhyncus* (Duck-billed platypus)
b. Pouched mammals e.g. *Macropus* (Kangaroo)
c. Insect eating mammals e.g. *Sorex* (Common shrew)
d. Toothless mammals e.g. *Bradypus* (Sloth)
e. Gnawing mammals e.g. *Funambulus* (Squirrel)
f. Primates e.g. *Macaca* (Monkey)

Unit IV: Type study: Shark (15L)

Objective:

- *To study in depth one vertebrate animal type i. e. general characteristics and salient features of animal type - shark.*

Desired outcome:

- *Learners will get an idea of vertebrate animal life after studying one representative animal - shark.*

4.1: Habit & habitat, distribution, external characters, classification and economic importance.

4.2: Skin, exoskeleton, endoskeleton and systems

a) Digestive system
b) Respiratory system
c) Blood vascular system
d) Nervous system and receptor organs
e) Urinogenital system, copulation, fertilization and development

Course Code: USZO602:
Physiology and Tissue Culture
Course 16

Unit I: Enzymology **(15L)**

Objective:

- *To introduce to the learner the fundamental concepts of enzyme biochemistry and to enable the learner realize applications of enzymes in basic and applied sciences.*

Desired outcome:

- *The learner shall understand fundamentals of enzyme structure, action and kinetics.*
- *The learner shall appreciate the enzyme assay procedures and the therapeutic applications of enzymes.*

1.1: Introduction and Nomenclature: Definition; concept of activation energy; nomenclature and classification (based on IUB - Enzyme Commission) of enzymes; chemical nature of enzyme, co-factors and co-enzymes

1.2: Enzyme Action and Kinetics: Mechanism; Factors affecting enzyme activity - substrate, pH and temperature. Derivation of Michaelis-Menten equation and Lineweaver-Burk plot; Concept and significance of K_m, V_{max} and K_{cat}

1.3: Enzyme Inhibition: Competitive and non-competitive inhibitors and their kinetics; therapeutic applications of enzyme inhibitors

1.4: Regulation of Enzyme Activity: Allosteric regulation and regulation by covalent modification of enzymes; Isozymes (LDH)

1.5: **Industrial applications of enzymes**: Food and detergents

Unit II: Homeostasis **(15L)**

Objective:

- *To introduce to the learner the concept of homeostasis-thermoregulation and osmoregulation*

Desired outcome:

- *The learner shall comprehend the adaptive responses of animals to environmental changes for their survival.*

2.1: Homeostasis

2.1.1: External and internal environment; Acclimation and acclimatization

2.1.2: Body clock - Circadian & Diurnal rhythm

2.2: Thermoregulation

2.2.1: Endothermy and ectothermy

2.2.2: Temperature balance: Heat production - shivering and non-shivering thermogenesis; brown fat, mechanisms of heat loss

2.2.3: Adaptive response to temperature - daily torpor, hibernation, aestivation

2.3: Osmotic and Ionic Regulation

2.3.1: Living in hypo-osmotic, hyper-osmotic and terrestrial environment - Water absorption, salt water ingestion and salt excretion, salt glands, metabolic water

2.3.2: Role of kidney in ionic regulation

Unit III: Endocrinology (15L)

Objective:

- *To introduce to the learner the details of endocrine glands and its disorders.*

Desired outcome:

- *The learner shall understand the types and secretions of endocrine glands and their functions.*

3.1: General organization of mammalian endocrine system

3.2: Hormones: Classification, properties, mechanism of hormone action

3.3: Histology, functions and disorders of the following endocrine glands:

- Pituitary
- Thyroid
- Parathyroid
- Pancreas
- Adrenal

Unit IV: Animal Tissue Culture (15L)

Objective*:*

- To *introduce to the learner the fundamental concepts of tissue culture and guide them progressively to certain areas of animal tissue culture.*

Desired outcome*:*

- *The learner shall understand the significance of tissue culture as a tool in specialized areas of research.*
- *The learner will appreciate its applications in various industries.*

4.1: Aseptic techniques

4.1.1**:** Sterilization - basic principles of sterilization, importance of sterility in cell culture

4.1.2**:** Sterile handling - swabbing, capping, flaming, handling bottles and flasks, pipetting, pouring

4.2: Culture media

4.2.1: Types of media - Natural and Artificial media

4.2.2: Balanced Salt Solutions

4.2.3: Complete Media - amino acids, vitamins, salts, glucose, oxygen supplements, hormones and growth factors, antibiotics

4.2.4: Factors influencing cell culture - surface tension and foaming, viscosity, temperature, osmolality, pH, CO_2, bicarbonate and O_2

4.3: Advantages of tissue culture - control of the environment, *in vitro* modelling of *in vivo* conditions

4.4: Limitations of tissue culture

4.5: Culture techniques

4.5.1: Preparation of cells / organs for culture

4.5.2**:** Cover slip, Flask and Tube culture

4.5.3: Primary and established cell lines

4.5.4: Hybridoma technology

Course Code: USZO603:
Genetics and Bioinformatics
Course 17

Unit I: Molecular Biology **(15 L)**

Objectives:

- *To introduce learner to chemical and molecular processes that affect genetic material.*
- *To make learner understand the concept of DNA damage and repair, and how gene control is necessary for cell survival.*

Desired outcome:

- *Learner shall get an insight into the intricacies of chemical and molecular processes that affect genetic material.*
- *The course shall prepare learner to recognize the significance of molecular biology as a basis for the study of other areas of biology and biochemistry.*
- *Learner shall also understand related areas in relatively new fields of genetic engineering and biotechnology.*

1.1: Types of mutation

1.1.1**:** Point mutations - substitution, deletion and insertion mutations

Substitution mutations - silent, missense and nonsense mutations, transition and transversion

Deletion and Insertion mutations - frameshift mutations

1.1.2**:** Trinucleotide repeat expansions - fragile X syndrome, Huntington disease

1.1.3**:** Spontaneous mutation - tautomeric shifts, spontaneous lesions

1.2: Induced mutations

1.2.1**:** Physical agents:

- Ionizing radiation (X-rays, α, β and γ rays)
- Non-ionizing radiation (UV light)

1.2.2**:** Chemical agents:

- Base analogs (5-bromouracil)
- Intercalating agents (ethidium bromide)
- Deaminating agents (nitrous acid)
- Hydroxylating agents (hydroxylamine)
- Alkylating agents (mustard gas)
- Aflatoxin (aflatoxin B_1)

1.3: Preventative and repair mechanisms for DNA damage

1.3.1: Mechanisms that prevent DNA damage - superoxide dismutase and catalase

1.3.2: Mechanisms that repair damaged DNA - direct DNA repair (alkyl transferases, photoreactivation, excision repair)

1.3.3: Postreplication repair - recombination repair, mismatch repair, SOS repair

1.4: Eukaryotic gene expression

1.4.1: Regulatory protein domains - zinc fingers, helix-turn-helix domain and leucine zipper

1.4.2**:** DNA methylation

Unit II: Genetic Engineering (15 L)

Objective:

- *To introduce learner to a set of techniques to modify an organism's genome to produce improved or novel genes and organisms.*

Desired outcome:

- *The learner shall get acquainted with the vast array of techniques used to manipulate genes which can be applied in numerous fields like medicine, research, etc. for human benefit.*

2.1: Tools in Genetic Engineering

2.1.1: Enzymes involved in Genetic Engineering: Introduction, nomenclature and types of restriction enzymes with examples, Ligases - *E. coli* DNA ligase, T4 DNA ligase, polynucleotide kinase, phosphatases, DNA polymerases, reverse transcriptase, terminal transferase

2.1.2: Vectors for gene cloning: General properties, advantages and disadvantages of cloning vectors - plasmid vectors (pBR322), phage vectors (λ Phage), cosmid vectors (c2XB)

2.1.3**:** Cloning techniques: Cloning after restriction digestion - blunt and cohesive end ligation, creation of restriction sites using linkers and adapters, cloning after homopolymer tailing, cDNA synthesis (Reverse transcription), genomic and cDNA libraries

2.2: Techniques in Genetic Engineering

2.2.1**:** PCR techniques: Principle of polymerase chain reaction (PCR), Applications of PCR

2.2.2**:** Sequencing techniques: DNA sequencing: Maxam-Gilbert method, Sanger's method Protein sequencing: Sanger's method, Edman's method Applications of sequencing techniques

2.2.3**:** Detection techniques: Blotting techniques - Southern blotting, Northern blotting and Western blotting Applications of blotting techniques

Unit III: Human Genetics (15L)

Objective:

- *To introduce learner with genetic alterations in human genome and their diagnosis.*

Desired outcome:

- *The learner shall become aware of the impact of changes occurring at gene level on human health and its diagnosis.*

3.1: Non-disjunction during mitosis and meiosis

3.1.1**:** Chromosomal Aberrations: Structural: Deletion: types, effects and disorders;
Translocation: types: Robertsonian and non-Robertsonian disorders;
Inversion: types, effects and significance;
Duplication and their evolutionary significance (multigene families)
Numerical: Aneuploidy and Polyploidy (Autopolyploidy and Allopolyploidy)

3.2: Genetic Disorders

3.2.1**:** Inborn Errors of Metabolism: Phenylketonuria, G-6-PD deficiency, Alkaptonuria, Albinism

3.2.2**:** Single gene mutation: Cystic fibrosis

3.2.3**:** Multifactorial: Breast Cancer

3.2.4**:** Uniparental Disomy: Angelman Syndrome and Prader-Willi Syndrome

3.3: Diagnosis

3.3.1**:** Prenatal Diagnosis: Amniocentesis and Chorionic villus sampling, Banding techniques (G, C, Q), FISH, Protein truncation test (PTT)

3.3.2**:** Genetic counselling

Unit IV: Bioinformatics (15L)

Objective:

- *To introduce learner to bioinformatics - a computational approach to learning the structure and organization of genomes, phylogeny and metabolism.*

Desired outcome:

- *Learner shall become aware of the computational point of view of studying the genomes.*

4.1: Introduction

4.1.1**:** Introduction to Bioinformatics and Bioinformatics web resource (NCBI, EBI, OMIM, PubMed)

4.1.2**:** Applications of Bioinformatics

4.2: Databases - Tools and their uses

4.2.1**:** Biological databases;
Primary sequence databases: Nucleic acid sequence databases **(**GenBank, EMBLEBI, DDBJ) Protein sequence databases (UniProtKB, PIR)
Secondary sequence databases
Derived databases - PROSITE, BLOCKS
Structure databases and bibliographic databases

4.3: Sequence alignment methods

4.3.1**:** BLAST, FASTA

4.3.2: Types of sequence alignment (Pairwise & Multiple sequence alignment)

4.3.3: Significance of sequence alignment

4.4: Predictive applications using DNA and protein sequences
4.4.1: Evolutionary studies: Concept of phylogenetic tree, convergent and parallel evolution

4.4.2**:** Pharmacogenomics: Discovering a drug: Target identification

4.4.3**:** Protein Chips and Functional Proteomics: Different types of protein chip (detecting and quantifying), applications of Proteomics

4.4.4: Metabolomics: Concept and applications

Course Code: USZO604:
Environmental Biology and Zoopharmacognosy
Course 18

Unit I: Environment management (15L)

Objective:

- *Learner should understand different factors affecting the environment and various methods to improve environmental stewardship.*

Desired outcome:

- *Learner will understand the different factors affecting environment, its impact and environment management laws.*

1.1: Natural resources and their Classification

1.1.1: Forest resources, water resources (surface and ground) and mineral resources

1.1.2: Energy resources: renewable (solar, tidal, wind, biofuel) and non-renewable resources (coal, petroleum oil, natural gas)

1.2: Exploitation and Modification of Natural Resources: Impact on climate, flora and fauna

1.3: Waste Management

1.3.1: Technologies in solid waste management:

a) Traditional methods for solid waste management: Composting, Incineration, Landfill Recycling, Windrow composting

b) Modern methods for solid waste management: Anaerobic digestion, ethanol production, biodrying, pyrolysis, Upflow anaerobic sludge blanket (UASB) technology, waste autoclave

1.3.2: e-waste and hazardous waste (biological, chemical, medical and nuclear) management

1.4: Water management

1.4.1: Rainwater harvesting: Definition ways of harvesting, components, model of rain water harvesting: Rural and Urban, Advantages and disadvantages

1.4.2: Watershed management: Definition, need and objectives, classification (mini, micro, mili, sub-watershed, macro-watershed), Watershed management practices: Contour, gully control, stone bunds. Growing greenery and integrated watershed approach (IWA).

1.4.3: Case study: Ice-stupa artificial glaciers by Sonam Wangchuk

1.4.4: Effluent treatment, recycling plants, control and treatment of sewage water.

1.5: Acts and Rules of Environment Management

1.5.1: Environment Protection Act - 1986, Air (Prevention and Control of Pollution) Act - 1981, Water (Prevention and Control of Pollution) Act - 1974

1.5.2: Hazardous Wastes (Management and Handling) Rules - 1989

1.5.3: EIA (Environmental Impact Assessment)

1.5.4: Role of Central and State Government (Pollution Control Board) and NGOs

Unit II: Wildlife Management (15L)

Objectives:

- *To sensitize learner regarding the various threats to the wildlife*
- *To introduce learner various ways that can help in the protection, conservation, management, and enhancement of wildlife populations and habitat.*

Desired outcome:

- *Learner will be able to understand various methods for wildlife conservation.*
- *Learner will be able to apply knowledge to overcome the issues related to wildlife conservation and management.*

2.1: Habit, Habitat, Territory and Niche of Wild Animals: Herbivores, carnivores, solitary, social (flock, pod, community), pack and herd, types of habitats and territories, niche concept

2.2: Threats to Wildlife

2.2.1: Poaching and hunting, deforestation, encroachment, competition (intra-specific and inter-specific), overgrazing and climate change, diseases (zoonosis and reverse zoonosis)

2.2.2: Tourism and human animal conflict

2.3: Wildlife Conservation

2.3.1: Techniques and methods used for wildlife census: Aerial counts, camera trap, line transect census and track surveys, capture mark recapture method, wildlife radio telemetry

2.3.2: Forest management, policies and Acts:
Harvesting Trees, Thinning harvest, Clearcut Harvest, Shelterwood harvest, Seed tree harvest, Group selection harvest, Single-tree selection harvest, Prescribed burning, Reforestation
Forest policy 1894, 1952, 1988;
The Indian Forest Act, 1927; Forest (Conservation) Act, 1980

Unit III: Bioprospecting and Zoopharmacognosy (15L)

Objectives:

- *To introduce the learner to the concepts of bioprospecting and zoopharmacognosy.*
- *Learner will be made aware of the process of discovery and commercialization of new products based on biological resources.*
- *To introduce learner with various ethological aspects by which non-human animals apparently self-medicate themselves.*

Desired outcome:

- *Learner will understand the paradigms of discovery and commercialization of biological resources and knowledge gained from self-medication observed in animals.*

3.1: Bioprospecting

3.1.1: Traditional and modern bioprospecting, economic value of bioprospecting

3.1.2: Bioprospecting and conservation, advantages and disadvantages

3.2: Zoopharmacognosy

3.2.1: Definition and types

3.2.2: Self-medication and its mechanism

3.2.3: Methods of self-medication through:

a) Ingestion - ants and mammals
b) Geophagy - invertebrates and birds
c) Absorption and adsorption

3.2.4: Applications - Social and trans-generational aspects of insects, birds and mammals

3.2.5: Contribution to human medicines

Unit IV: Zoogeography (15L)

O*bjectives:*

- *To introduce learner to the geographic distribution (present and past) of animal species.*
- *To introduce learner to various ways of animal distribution.*

Desired outcome:

- *The learners will become acquainted with how and why different animal species are distributed around the globe.*

4.1: Introduction: Plate tectonics and continental drift theory

4.2: Animal Distribution and Barriers

4.2.1: Isolating Mechanisms

4.2.2: Patterns of animal distribution - continuous, discontinuous and bipolar

4.2.3: Barriers of distribution -Topographic, climatic, vegetative, large water masses, land mass, lack of salinity and special characteristic habit (homing instinct).

4.2.4: Means of dispersal - land bridges, natural rafts and drift wood, favouring gales, migration by host, accidental transportation and by human agencies

4.3: Zoogeographical Realms: Palearctic, Ethiopian, Oriental, Australian, Neotropical, Nearctic and Antarctic

Practical Syllabus for Semester VI
Course code: USZOP06: COURSE 15

1. Group Protochordata

- Subphylum Urochordata
  - Class Larvacea e.g. *Oikopleura* (Sea squirt)
  - Class Ascidiacea e.g. *Ciona* (Transparent Sea squirt)
  - Class Thaliacea e.g. *Salpa* (Common salp)

- Subphylum Cephalochordata
  - Class Leptocardii e.g. *Branchiostoma* (*Amphioxus*)

- Subphylum Vertebrata: Division Agnatha
  - Class Ostracodermi e.g. *Pharyngolepis*
  - Class Cyclostomata e.g. *Petromyzon* (Lamprey)

2. Division Gnathostomata

- Superclass Pisces:
  - Class Placodermi e.g. *Bothriolepis*
  - Class Chondrichthyes e.g. *Rhinobatos* (Guitar fish), *Chimaera* (Rabbitfish)
  - Class Osteichthyes e.g. *Protopterus, Clarius* (Catfish)
- Superclass Tetrapoda:
  - Class Amphibia e.g. *Alytes* (Midwife toad) and *Triton* (Salamander)
  - Class Reptilia e.g. *Varanus* (Monitor lizard) and *Crocodylus* (Crocodile)

3. Class Aves: Examples: *Eudyptes* (Penguin), *Phoenicopterus* (Flamingo) and *Gyps* (Vulture)

4. Class Mammalia: Examples: *Dasyurus* (Quoll), *Petaurista* (Flying squirrel) and *Macaca* (Monkey).

5. Study of Shark with the help of diagram / Photograph / Simulation whichever possible. No animal shall be dissected.

a) Digestive system
b) Heart and Aortic arches
c) Urinogenital System
d) Endoskeleton of shark:
   i. Axial - Skull and vertebral column
   ii. Appendicular - Pelvic and pectoral fins, pelvic and pectoral girdle

6. Visit to fish market / Aquarium / Zoo/ National Park / Local Gardens / Local available niche / Sanctuaries / and such other places in Maharashtra and / or India and / or abroad to observe chordates and prepare a report. College may conduct more than one field visit for wide exposure, if feasible. However, at least one field visit should be such that it is affordable to every student.

Course code: USZOP06: COURSE 16

1. Effect of varying pH on activity of enzyme Acid Phosphatase.
2. Effect of varying enzyme concentration on activity of enzyme Acid Phosphatase.
3. Effect of varying substrate concentration on activity of enzyme Acid Phosphatase.
4. Effect of inhibitor on the activity of enzyme Acid Phosphatase.
5. Separation of LDH isozymes by agarose / polyacrylamide gel electrophoresis.
6. Histology of endocrine glands: T.S. of pituitary, thyroid, parathyroid, pancreas, adrenal.
7. Instruments for tissue culture - Autoclave Millipore filter, CO_2 incubator, Laminar air-flow. (Principle and use).
8. Packaging of glassware for tissue culture.
9. Aseptic transfer techniques.
10. Trypsinization and vital staining using Trypan blue stain.

Course code: USZOP06: COURSE 17

1. Quantitative Estimation of RNA by Orcinol method.
2. Quantitative Estimation of DNA by Diphenylamine method.
3. Separation of Genomic DNA by Agarose gel electrophoresis.
4. Colorimetric estimation of proteins from given sample by Folin-Lowry's method.
5. Problems based on Restriction endonucleases.
6. Karyotype (Idiogram) analysis for the following syndromes with comments on numerical and / or structural variations in chromosomes (no cutting of chromosomes):
    a. Turner's syndrome
    b. Klinefelter's syndrome
    c. Down's syndrome
    d. Cri-du-chat syndrome
    e. D-G translocation
    f. Edward's syndrome
    g. Patau's syndrome

7. Interpretation of genetic formulae: Deletion, duplication, inversion and translocation.
8. Calculation of mitotic index from the photograph or stained preparation of onion root tip or cancer cells.
9. Explore BLAST for nucleotide sequence comparison.
10. Explore the databases (Nucleotide, Protein) at NCBI for querying a nucleotide or protein sequence.
11. Exploring bibliographic database PubMed for downloading a research paper on subject of interest with the use of operators.

Course code: USZOP06: Course 18

1. Estimation of phosphates from sample water.
2. Estimation of BOD from sample water.
3. Estimation of COD from sample water.
4. Estimation of Nitrates from sample water.
5. Estimation of acidity and alkalinity of sample water by methyl orange and phenolphthalein indicator.
6. Comparative study of sound intensity in different places by Decibel meter.
7. Study of bioprospecting:
   a. Tumour suppression compounds e.g. Sponge.
   b. Skin erythema treatment from gel - *Aloe vera, Aloe ferox.*
8. Study of Zoopharmacognosy in ants, cats, elephants and dogs.
9. Indicate the distribution of fauna in the world map with respect to its realm and comment on the pattern of distribution.
   a. Palearctic: Giant Panda and Japanese Macaque
   b. Ethiopian: Common ostrich and African bush elephant
   c. Oriental: Indian one-horned Rhinoceros and Gharial
   d. Australian: Platypus and Red Kangaroo
   e. Neotropical: Guanaco and South American Tapir
   f. Nearctic: Virginia opossum and Sea otter
   g. Antarctic: Emperor Penguin and Antarctic Minke Whale
10. Excursion (Study tour / Visit) to Zoo / Sanctuary / National park / Research institute, etc. and submit a report. College may conduct more than one field visit for wide exposure, if feasible. However, at least one field visit should be such that it is affordable to every student.

LEARNERS' SPACE

Course 15

1. Organize a lecture and interaction of an expert working in the field of vertebrate study like wild photography, research project etc.
2. Collect information on phylogeny and geological time scale.
3. Did you notice that the number of frogs or earthworms is decreasing? Find out the probable reasons.
4. Comprehend the benefits of frog to farmer.
5. Study the reasons of extinction of dinosaurs
6. Enlist names of extinct birds.
7. Find out the reasons the *Archaeopteryx* is a connecting link between reptiles and birds.
8. Name the largest terrestrial and aquatic mammal.
9. List the scientific names of sharks found in Indian Ocean.
10. Study how is the age of the fossil decided.

Course 16

1. Elucidate on the Nobel Prize winning research work in the field of enzymology.
2. Study Eadie-Augustinsson plot and Hanes-Woolf plot of enzyme kinetics.
3. Make a report of isoenzymes (other than LDH) and their role in human body.
4. Kangaroo rats do not need to drink water at all. Explore the reason.
5. Collect information on:
   - Allen's rule
   - Bergman's rule
   - Gloger's rule
   - Jordan's rule
   - Rensch's rule
6. Review the mechanism and role of hormones like ecdysone and juvenile hormone in invertebrates.
7. Pineal gland has received attention as a 'mystery gland'. Find the reasons for it.
8. Prepare a report on therapeutic applications of hormones.
9. Present an account on recent advances in animal tissue culture.
10. 'HeLa' cells make the oldest immortal human cell line. Trace its history and significance.
11. Compare mortal and immortal cell lines.

Course 17

1. Study various types of genetic recombination. Explain any one mechanism.
2. Enlist enzymes involved in the central dogma of molecular biology. Comment on the specific biochemical reaction they catalyze.
3. Collect the information on satellite DNA. Discuss several forms of DNAs.
4. Give significance of telomere.
5. Gain information on chimeric DNA. Give its applications.
6. Comment on gene splicing.
7. Explore DNA microarray applications.
8. Comment on role of transgenic bacteria in pharmaceuticals.
9. Give interesting output of HGP.
10. Give examples of lysosomal storage disorders.
11. Explore information on lethal genes and jumping genes.
12. Enlist the variations in BLAST and FASTA.
13. Find the structure of a protein of your choice using UNIPROT.
14. Give role of bioinformatics in clinical biology.

15. Browse through website OMIA.

Course 18

1. Find out the role of an ISO 14001 environmental management system.
2. Explain environmental audit and carbon footprint.
3. Collect information on life cycle assessment (LCA) as an environmental management tool.
4. Collect the information about institutes those provide environmental management education.
5. Find out the role of industries such as TATA steel in environmental management.
6. Explain the benefits of environmental monitoring for an industry.
7. Comment on ethics of Wildlife Management and Conservation.
8. Role of WTI in wildlife research and management.
9. Comment on Sustainable Wildlife Management (SWM).
10. Convention on Biological Diversity (CBD)
11. Find the following:
    - Bioprospecting and Maya ICBG controversy.
    - Contribution of Babu Kalunde in self-medication.
12. Link the study of human evolution with Zoopharmacognosy.
13. Explain Wallace's Line and Weber's line.
14. Role of zoogeography in speciation.
15. List the animal species which exhibit homing instincts.

***Note - The practicals may be conducted by using specimens authorized by the wild life and such other regulating authorities though it is strongly recommended that the same should be taught by using photographs/audio-visual aids/simulations/ models etc. as recommended by the UGC and as envisaged in the regulation of the relevant monitoring bodies. No new specimens, however, shall be procured for the purpose of conducting practicals mentioned here-in above.**

N.B:

I) It is pertinent to note that we have to adhere strictly to the directions as given in the UGC Circular F14-4/2006 (CPP-II).

II) Apart from the Institutional Animal Ethics Committee (IAEC) and any other Committee appointed by a Competent Authority / Body from time to time, every college should constitute the following Committees:

1) A Committee for the Purpose of Care and Supervision of Experimental Animals (CPCSEA) and
2) A Dissection Monitoring Committee (DMC) to ensure that no dissections are done.

Composition of DMC shall be as follows:

i) Head of the Concerned Department (Convener / Chairperson)
ii) Two Senior Faculty Members of the concerned Department
iii) One Faculty of related department from the same College
iv) One or two members of related department from neighbouring colleges.

Use of animals for any experiment / dissection /mounting is banned. Simulations, authorized permanent specimens / slides, charts, models and other innovative methods are encouraged.

Scheme of Examination (Theory and Practical)

(a) External assessment of one hundred (100) marks per course per semester should be conducted as per the following skeleton question paper pattern.

(c) One practical examination of fifty (50) marks per course each should be conducted at the end of every semester.

SKELETON- EXAMINATION PATTERN (THEORY)

Time: 3 hours **Total marks: 100**

Q1	Based on Unit 1	20 marks
Q.2.	Based on Unit 2	20 marks
Q.3.	Based on Unit 3	20 marks
Q.4.	Based on Unit 4	20 marks
Q.5.	Based on all four Units	20 marks

***Internal option scheme shall be followed from time to time as per university guidelines for T. Y. B. Sc.**

T. Y. B. Sc. Zoology: Semester V (Practical)
Course Code: USZOP05: Course 11

Skeleton of Practical Examination Question Paper

Time: 9.30 AM to 2.30 PM **Total Marks: 50**

Q.1	Sepia: Sketch and label _____ system. (Digestive / Reproductive system / Nervous system) **OR** Identify and Describe: a, b & c (Jaws / Radula / Chromatophores / Spermatophores / Statocyst) **OR** Perform virtual dissection of _____ system.	09
Q.2.	Identify and classify giving reasons: a) Protozoa / Porifera / Cnidaria b) Platyhelminthes / Nematoda c) Annelida / Arthropoda d) Mollusca / Echinodermata	12
Q.3	Identify, classify and describe a) Acanthocephala / Chaetognatha / Onychophora b) Hemichordata c) Observe the animal* (photo/existing preserved specimen) and identify phylum giving reasons. *A suitable animal which is not prescribed in the syllabus	09
Q.4	Field report - Submission and Discussion based on any one field visit which is attended by the student to avoid disparity due to financial constraints.	10
Q.5	Viva voce	05
Q.6	Journal	05

T. Y. B. Sc. Zoology: Semester V (Practical)
Course Code: USZOP05: Course 12

Skeleton of Practical Examination Question Paper

Time: 9.30 AM to 2.30 PM **Total Marks: 50**

Q.1 Enumerate erythrocytes in the given sample and comment on clinical condition. 15

OR

Q.1 Enumerate leucocytes in the given sample and comment on clinical condition.

OR

Q.1 Present a report on differential count of leucocytes and comment on clinical condition.

Q.2 Estimate total plasma proteins by Folin's method. 10

OR

Q.2 Estimate serum/plasma total triglycerides by Phosphovanillin method.

Q.3 Estimate haemoglobin by Sahli's acid haematin method. 10

OR

Q.3 Record Erythrocyte Sedimentation Rate by Westergren / Wintrobe method.

OR

Q.3 Determine serum LDH by colorimetric/spectrophotometric method.

Q.4 Perform Latex agglutination test - Rheumatoid Arthritis. 05

OR

Q.4 Record bleeding / clotting time and comment on clinical significance.

Q.5 Viva voce 05

Q.6 Journal 05

T. Y. B. Sc. Zoology: Semester V (Practical)
Course Code: USZOP05: Course 13

Skeleton of Practical Examination Question Paper

Time: 9.30 AM to 2.30 PM **Total Marks: 50**

Q.1	Demonstrate the effect of CCl_4 on the level of enzyme activity of aspartate/ alanine amino transferase / alkaline phosphatase in liver (*in vitro* approach)	10
Q.2	From the infiltrated tissue prepare block, trim and mount it on the block holder.	09
	OR	
Q.2	Mount the ribbon on slide from the given block.	
	OR	
Q.2	Stain the given histological slide and identify the tissue.	
Q.3	Identify and describe a, b, c, d. a) & b) based on study of mammalian tissues c) & d) based on diseases or conditions	08
Q.4	Interpret the pathological report - blood / urine / stool.	05
Q.5	Problems in Biostatistics (Any one)	08
Q.6	Viva voce	05
Q.7	Journal	05

T.Y.B. Sc. Zoology: Semester V (Practical)
Course Code: USZOP05: Course 14

Skeleton Question Paper for Practical Examination

Time: 9.30 AM to 2.30 PM **Total Marks: 50**

Q.1	Make a temporary mounting of chick embryo (up to 48 hours)	10
Q.2	Identify and describe a) and b) Based on integumentary system c) and d) Based on forelimb muscle e) and f) Based on hind limbs muscle g) and h) Based on osteology - human axial skeleton i) Based on osteology - human appendicular skeleton j) Chick embryo up to 72 hours	30
Q.3	Viva-voce	05
Q.4	Journal	05

T. Y. B. Sc. Zoology: Semester VI (Practical)
Course Code: USZOP06: Course 15

Skeleton of Practical Examination Question Paper

Time: 9.30 AM to 2.30 PM **Total Marks: 50**

Q.1	Identify, classify giving reasons a) Urochordata / Cephalochordata / Ostachodermi / Cyclostomata b) Observe the animal* (photo/existing preserved specimen) and state its class giving reasons. * The animal should be other than prescribed in the syllabus	06
Q.2.	Identify, classify and describe a) Pisces b) Amphibia c) Reptilia d) Aves e) Mammalia	15
Q.3	Study of shark with the help of Specimen / Photograph / Simulation (Digestive system / Urinogenital system / Heart and aortic arches)	06
Q.4	Identify, sketch and label / Identify and describe marked portion in given diagram Skull or vertebra of shark / Fin of shark (Pectoral / Pelvic) / Girdle of shark (Pectoral / Pelvic)	03
Q.5	Field report - Submission and Discussion based on any one field visit which is attended by the student to avoid disparity due to financial constraints.	10
Q. 6	Viva Voce	05
Q.7	Journal	05

T. Y. B. Sc. Zoology: Semester VI (Practical)
Course Code: USZOP06: Course 16

Skeleton of Practical Examination Question Paper

Time: 9.30 AM to 2.30 PM **Total Marks: 50**

Q.1 Demonstrate the effect of _____ on the activity of acid phosphatase (Substrate concentration / pH variation / Enzyme concentration / Inhibitor concentration) 15

OR

Q.1 Perform trypsinization and show the isolated cells using suitable vital stain.

Q.2 Separate LDH isozymes from the given sample by agarose / polyacrylamide gel electrophoresis 10

OR

Q.2 Demonstrate the packaging of glassware for tissue culture (any 3)

OR

Q.2 Demonstrate the technique of aseptic transfer.

Q.3 Identify and describe a, b, c, d, e 15

a to d: Slides / Photographs of based on histology of endocrine glands
e: Instruments for tissue culture (any one)

Q.4 Viva voce 05

Q.5 Journal 05

T. Y. B. Sc. Zoology: Semester VI (Practical)
Course Code: USZOP06: Course 17

Skeleton of Practical Examination Question Paper

Time: 9.30 AM to 2.30 PM **Total Marks: 50**

Q.1	Isolation & Estimation of RNA by Orcinol method.	15
	OR	
Q.1	Isolation & Estimation of DNA by Diphenylamine method.	
Q.2	Separation of Genomic DNA by Agarose gel electrophoresis.	09
	OR	
Q.2	Colorimetric estimation of proteins from given sample by Folin's method.	
Q.3	Problems based on Restriction endonucleases (any two).	08
	OR	
Q.3	Calculation of mitotic index from the photograph or stained preparation of onion root tip or cancer cells.	
	OR	
Q.3a	Analyse the given syndrome and comment on numerical and/or structural variations in chromosomes.	04
Q.3b	Interpretation of a genetic formula.	04
Q.4	Demonstrate the use of bioinformatics tool:	08
	BLAST for nucleotide sequence comparison.	
	OR	
	Databases at NCBI for querying a nucleotide / protein sequence with the help of suitable operator.	
	OR	
	PubMed for downloading a research paper of interest with the help of suitable operator.	
Q.5	Viva voce	05
Q.6	Journal	05

T.Y. B. Sc. Zoology: Semester VI (Practical)
Course Code: USZOP06: Course 18

Skeleton Question Paper for Practical Examination

Time: 9.30 AM to 2.30 PM **Total Marks: 50**

Q.1	Estimation of BOD / COD / nitrates from the given water sample	10
Q.2	Estimation of phosphates / acidity / alkalinity of sample water.	08
Q.3	Identification a) Based on bioprospecting (*Sponge / Aloe ferox / Aloe vera* - any one) b) Zoopharmacognosy (ants, cats, elephants and dogs - any one)	06
Q.4	Identify the given animals with respect to their realms and comment (any two).	06
Q.5	Study tour Visit Report - Submission and Discussion based on any one field visit which is attended by the student to avoid disparity due to financial constraints.	10
Q.7	Journal	05
Q.6	Viva voce	05

Research Project (Optional with Additional Credits)
Course Code: USZOR01 and USZOR02

There shall be a component of 'Research Project' which will be optional, catering to the needs of the advanced learners and those desirous of pursuing higher studies and / or career in research. Since Research Project is optional, its credits are in addition to the credits otherwise allotted to B.Sc. program in Zoology. The credits of Research Project shall therefore be considered as additional credits, performance of which shall be separately evaluated. Needless to say that the marks / GPA / grade obtained by the learner in the Research Project shall appear separately in the marksheet or shall be certified separately by the University of Mumbai in both the semesters viz. Semester V and Semester VI. These marks shall not be added to the total / grand total of the program and shall not be considered for class / Grade / GPA / merit / rank towards this program of the University of Mumbai. Research Project shall be evaluated by allotting duty to the examiners at a centre / centres in each district where the learners who have completed the projects shall be invited for assessment on a day scheduled for the purpose by the Chairman of Practical Examinations who would plan, coordinate and notify the same officially through the University. The remuneration for assessment of the Research Project shall be as decided by the University from time to time.

The learners may seek guidance for the research work from a mentor who could be a teacher from his/her college or any other college or from the industry; though it is not mandatory to have a mentor since Research Project can also be done independently, However no leniency will be shown during assessment to maintain quality defining the candidate as advanced learner. Assessment will be based on the spiral bound Proposal submitted in Semester V and Dissertation submitted in Semester VI along with *Viva voce* conducted by the examiner, details of which shall be as follows:

In semester V the learners will submit an outline / scheme / project proposal to be evaluated by the external examiner. Evaluation will be based on the following guidelines such as Literature Search / Survey, Objectives, Work plan, Materials and Methods, Rationale, Hypothesis, Expected Outcome, Relevance and Bibliography, etc., as presented in the spiral bound research proposal which shall carry 25 marks, in Semester V. *Viva voce* conducted by the concerned external examiner on the said proposal shall carry 25 marks. Learner may opt for PowerPoint presentation on the said research proposal, if desired. Thus Research Proposal shall carry total 50 marks with a credit of (01), in Semester V.

Actual execution / practical work of this project will be completed before the Semester VI examination. The external examiner will evaluate the 'Printed Dissertation' in Semester VI, carrying 25 marks based generally on guidelines such as Abstract / Synopsis, Materials and methods, Observations, Interpretations of Results, Discussion, Conclusion and Relevance of work, Recommendation, Future scope, etc., incorporated in the Dissertation. *Viva voce* conducted by the external examiner based on the dissertation presented with the PowerPoint presentation or otherwise shall carry 25 marks. Thus Research Project with dissertation shall carry 50 marks having credit of (01) in semester VI.

A list of the candidates offering the project and the titles of their respective project should be forwarded by the College along with the examination application form in SEM-V and SEM-VI.

The total credits (02) of Research Project in Semester V and Semester VI, are additional and may be transferred to the other relevant program and/or for post-graduation program, if desired by the learner, wherever applicable and if permitted by the ordinances of the University of Mumbai, as prescribed therein, if promulgated.

UNIVERSITY OF MUMBAI

No. UG/91 of 2018-19

CIRCULAR:-

Attention of the Principals of the affiliated Colleges and Directors of the recognized Institutions in Commerce & Management Faculty is invited to this office Circular No. UG/28 of 2015, dated 22nd July, 2015 relating to syllabus of Bachelor of Commerce (Accounting and Finance) degree programme.

Their attention is also invited to University Circular No. UG/106 of 2016-17 dated 25th October, 2016 for F.Y.B.Com. (Accounting & Finance) Sem. I & II and University Circular No. UG/166 of 2017-18 dated 8th August, 2017 for S.Y.B.Com. (Accounting & Finance) Sem. III & IV respectively.

They are hereby informed that the recommendations made by the Board of Studies in Accountancy at its meeting held on 28th February, 2018 have been accepted by the Academic Council at its meeting held on 5th May, 2018 **vide** item No. 4.42 and that in accordance therewith, the revised syllabus as per the (CBCS) for the T.Y.B.Com. in Accountancy (Accounting and Finance) (Sem. V & VI), has been brought into force with effect from the academic year 2018-19, accordingly. (The same is available on the University's website www.mu.ac.in).

(Dr. Dinesh Kamble)
I/c REGISTRAR

University of Mumbai

B.Com. (Accounting and Finance) Programme
Guidelines for Project Work
at
Third Year
Semester VI

Under Choice Based Credit, Grading and Semester System

(To be implemented from Academic Year 2018-2019)

Board of Studies-in-Accountancy

Introduction

Inclusion of project work in the course curriculum of the B.Com. (Accounting & Finance) programme is one of the ambitious aspects in the programme structure. The main objective of inclusion of project work is to inculcate the element of research analyse and scientific temperament challenging the potential of learner as regards to his/ her eager to enquire and ability to interpret particular aspect of the study. It is expected that the guiding teacher should undertake the counselling sessions and make the awareness among the learners about the methodology of formulation, preparation and evaluation pattern of the project work.

- There are two modes of preparation of project work
  1. Project work based on research methodology in the study area
  2. Project work based on internship in the study area

Guidelines for preparation of Project Work

1. General guidelines for preparation of project work based on Research Methodology

- The project topic may be undertaken in any area of Elective Courses.
- Each of the learner has to undertake a Project individually under the supervision of a teacher-guide.
- The learner shall decide the topic and title which should be specific, clear and with definite scope in consultation with the teacher-guide concerned.
- University/college shall allot a guiding teacher for guidance to the students based on her / his specialization.
- The project report shall be prepared as per the broad guidelines given below:
  - Font type: Times New Roman
  - Font size: 12-For content, 14-for Title
  - Line Space : 1.5-for content and 1-for in table work
  - Paper Size: A4
  - Margin : in Left-1.5, Up-Down-Right-1
  - The Project Report shall be bounded.
  - The project report should be 80 to 100 pages

Structure to be followed to maintain the uniformity in formulation and presentation of Project Work

(Model Structure of the Project Work)

- **Chapter No. 1: Introduction**

  In this chapter Selection and relevance of the problem, historical background of the problem, brief profile of the study area, definition/s of related aspects, characteristics, different concepts pertaining to the problem etc can be incorporated by the learner.

- **Chapter No. 2: Research Methodology**

  This chapter will include Objectives, Hypothesis, Scope of the study, limitations of the study, significance of the study, Selection of the problem, Sample size, Data collection, Tabulation of data, Techniques and tools to be used, etc can be incorporated by the learner.

- **Chapter No. 3: Literature Review**

  This chapter will provide information about studies done on the respective issue. This would specify how the study undertaken is relevant and contribute for value addition in information/ knowledge/ application of study area which ultimately helps the learner to undertake further study on same issue.

- **Chapter No. 4: Data Analysis, Interpretation and Presentation**

  This chapter is the core part of the study. The analysis pertaining to collected data will be done by the learner. The application of selected tools or techniques will be used to arrive at findings. In this, table of information's, presentation of graphs etc. can be provided with interpretation by the learner.

- **Chapter No. 5: Conclusions and Suggestions**

  In this chapter of project work, findings of work will be covered and suggestion will be enlisted to validate the objectives and hypotheses.

Note: If required more chapters of data analysis can be added.

Acknowledgment

(Model structure of the acknowledgement)

To list who all have helped me is difficult because they are so numerous and the depth is so enormous.

I would like to acknowledge the following as being idealistic channels and fresh dimensions in the completion of this project.

I take this opportunity to thank the **University of Mumbai** for giving me chance to do this project.

I would like to thank my **Principal, _____**for providing the necessary facilities required for completion of this project.

I take this opportunity to thank our **Coordinator_____**, for her moral support and guidance.

I would also like to express my sincere gratitude towards my project guide _____ whose guidance and care made the project successful.

I would like to thank my **College Library**, for having provided various reference books and magazines related to my project.

Lastly, I would like to thank each and every person who directly or indirectly helped me in the completion of the project especially **my Parents and Peers** who supported me throughout my project.

2. Guidelines for Internship based project work

- Minimum 20 days/ 100 hours of Internship with an Organisation/ NGO/ Charitable Organisation/ Private firm.
- The theme of the internship should be based on any study area of the elective courses
- Experience Certificate is Mandatory
- A project report has to be brief in content and must include the following aspects:
  - **Executive Summary:**

    A bird's eye view of your entire presentation has to be precisely offered under this category.
  - **Introduction on the Company:**

    A Concise representation of company/ organization defining its scope, products/ services and its SWOT analysis.
  - **Statement and Objectives:**

    The mission and vision of the organization need to be stated enshrining its broad strategies.
  - **Your Role in the Organisation during the internship:**

    The key aspects handled, the department under which you were deployed and brief summary report duly acknowledged by the reporting head.
  - **Challenges:**

    The challenges confronted while churning out theoretical knowledge into practical world.
  - **Conclusion:**

    A brief overview of your experience and suggestions to bridge the gap between theory and practice.
- The project report based on internship shall be prepared as per the broad guidelines given below:
  - Font type: Times New Roman
  - Font size: 12-For content, 14-for Title
  - Line Space : 1.5-for content and 1-for in table work
  - Paper Size: A4
  - Margin : in Left-1.5, Up-Down-Right-1
  - The Project Report shall be bounded.
  - The project report should be of minimum 50 pages

Evaluation pattern of the project work

The Project Report shall be evaluated in two stages viz.	
• **Evaluation of Project Report (Bound Copy)**	**60 Marks**
▪ Introduction and other areas covered	20 Marks
▪ Research Methodology, Presentation, Analysis and interpretation of data	30 Marks
▪ Conclusion & Recommendations	10 Marks
• **Conduct of Viva-voce**	**40 Marks**
▪ In the course of Viva-voce, the questions may be asked such as importance / relevance of the study, objective of the study, methodology of the study/ mode of Enquiry (question responses)	10 Marks
▪ Ability to explain the analysis, findings, concluding observations, recommendation, limitations of the Study	20 Marks
▪ Overall Impression (including Communication Skill)	10 Marks

Note:

- ***The guiding teacher along with the external evaluator appointed by the University/ College for the evaluation of project shall conduct the viva-voce examination as per the evaluation pattern***

Passing Standard

- Minimum of Grade E in the project component
- In case of failing in the project work, the same project can be revised for ATKT examination.
- Absence of student for viva voce: If any student fails to appear for the viva voce on the date and time fixed by the department such student shall appear for the viva voce on the date and time fixed by the Department, such student shall appear for the viva voce only along with students of the next batch.

Revised Syllabus of Courses of B.Com. (Accounting and Finance) Programme at Semester V and VI
with effect from the Academic Year 2018-2019

Scheme of Evaluation

The performance of the learners will be evaluated in two Components. One component will be the Internal Assessment component carrying 25% marks and the second component will be the Semester-wise End Examination component carrying 75% marks. The allocation of marks for the Internal Assessment and Semester End Examinations will be as shown below:-

A) Internal Assessment: 25 %

Question Paper Pattern
(Internal Assessment- Courses without Practical Courses)

Sr. No.	Particular	Marks
1	**One class test (20 Marks)**	
	Match the Column/ Fill in the Blanks/ Multiple Choice Questions ***(½ Mark each)***	05 Marks
	Answer in One or Two Lines (Concept based Questions) ***(01 Mark each)***	05 Marks
	Answer in Brief (Attempt Any Two of the Three) ***(05 Marks each)***	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

B) Semester End Examination: 75 %

i) Duration: The examination shall be of 2 ½ Hours duration

ii) Theory question paper pattern

- There shall be five questions each of 15 marks.
- All questions shall be compulsory with internal choice within the questions.
- Question may be subdivided into sub-questions a, b, c… and the allocation of marks depends on the weightage of the topic.

  (Detail question paper pattern has been given separately)

❖ **Passing Standard**

The learners to pass a course shall have to obtain a minimum of 40% marks in aggregate for each course where the course consists of Internal Assessment and Semester End Examination. The learners shall obtain minimum of 40% marks (i.e. 10 out of 25) in the Internal Assessment and 40% marks in Semester End Examination (i.e. 30 Out of 75) separately, to pass the course and minimum of Grade E to pass a particular semester A learner will be said to have passed the course if the learner passes the Internal Assessment and Semester End Examination together.

Question Paper Pattern

(Practical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 1/2 Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A. Sub Questions to be asked 10 and to be answered any 08 B. Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Practical question of 15 marks may be divided into two sub questions of 7/8 and 10/5Marks. If the topic demands, instead of practical questions, appropriate theory question may be asked.

Question Paper Pattern
(Theoretical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 1/2 Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks

01	Financial Reporting and Analysis(Corporate Banking & Insurance)
02	Auditing- I
03	Strategic Management
04	Financial Services Management
05	Business Ethics and Corporate Governance
06	Actuarial Analysis in Banking & Insurance

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester V with effect from the Academic Year 2018-2019

1. Elective Courses (EC)

1. Financial Reporting and Analysis (Corporate Banking & Insurance)

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Final Accounts of Banking Company	16
02	Final Accounts of Insurance Company	12
03	Preparation of Final Accounts of Companies	12
04	Cash Flow Analysis & Ethical Behavior and Implications for Accountants	12
05	Introduction to IFRS	08
	Total	**60**

Sr. No.	Modules / Units
1	**Final Accounts of Banking Company**
	Legal Provisions in Banking Regulation Act, 1949 relating to Accounts. Statutory Reserves including Cash Reserve and Statutory Liquidity Ratio. Bills Purchase and Discounted, Rebate on Bill Discounted. Final Accounts in Prescribed Form. Non – performing Assets and Income from Non – performing Assets. Classification of Advances: Standard, Sub – standard, Doubtful and Provisioning Requirement.
2	**Final Accounts of Insurance Company**
	(a) Preparation and Presentation of Corporate Final Accounts for Insurance Companies. (b) Final Accounts in accordance with Insurance Legislation (c) Study of Accounting Policies from Annual Reports of Listed Insurance Companies
3	**Preparation of Final Accounts of Companies**
	Relevant Provisions of Companies Act related to Preparation of Final Account (excluding cash flow statement) Preparation of Financial Statements as per Companies Act. (excluding cash flow statement) AS 1 in Relation to Final Accounts of Companies (Disclosure of Accounting Policies) Adjustment for – 1. Closing Stock 2. Depreciation 3. Outstanding expenses and income 4. Prepaid expenses and Pre received income 5. Proposed Dividend and Unclaimed Dividend 6. Provision for Tax and Advance Tax 7. Bill of exchange (Endorsement, Honour, Dishonour) 8. Capital Expenditure included in Revenue expenditure and vice versa eg- purchase of furniture included in purchases 9. Unrecorded Sales and Purchases 10. Good sold on sale or return basis 11. Managerial remuneration on Net Profit before tax 12. Transfer to Reserves 13. Bad debt and Provision for bad debts 14. Calls in Arrears 15. Loss by fire (Partly and fully insured goods) 16. Goods distributed as free samples. Any other adjustments as per the prevailing accounting standard.

Sr. No.	Modules / Units
4	**Cash Flow Analysis & Ethical Behaviour and Implications for Accountants**
	Cash Flow Analysis as per AS 3 (Indirect Method Only) **Ethical Behaviour and Implications for Accountants** Introduction, Meaning of Ethical Behaviour Financial Reports – Link between Law, Corporate Governance, Corporate Social Responsibility and Ethics. Importance and Relevance of Ethical Behavior in Accounting Profession. Implications of Ethical Values for the Principles Versus Rule Based Approaches to Accounting Standards The Principal Based Approach and Ethics The Accounting Standard Setting Process and Ethics The IFAC Code of Ethics for Professional Accountants Contents of Research Report in Ethical Practices Implications of Unethical Behavior on Financial Reports Company Codes of Ethics The increasing role of Whistle – Blowing Need to learn ethics.
5	**Introduction to IFRS**
	IFRS 1- First Time Adoption of International Financial Reporting Standards Objective, Scope, Definitions, First IFRS Financial Statements, Recognition and Measurement, Comparative Information, Explanation of Transition to IFRS, Reconciliations, Interim Financial Reports, Designation of Financial Assets or Financial Liabilities, Use of Fair Value as Deemed Cost, Use of Deemed Cost, Exceptions to Retrospective Application of other IFRS, Exemptions for Business Combination, Exemptions from other IFRS and Presentation and Disclosure. **IFRS 2**- Share Based Payment – Objective, Scope, Definitions, Recognition, Equity Settled Share Based Payment Transactions, Transactions in Which Services are Received, Treatment of Vesting Conditions, Expected Vesting Period, Determining the Fair Value of Equity Instruments granted, Modifications of terms and conditions, Cancellation, Cash Settled Share Based Payment Transactions, Share Based Payment Transactions in Which The Terms of The Arrangement Provide The Counterparty With A Choice of Settlement, Share Based Payment Transactions in which the Terms of the Arrangement Provide the Entity with a Choice of Settlement, Share Based Payment Transactions Among Group Entities (2009 Amendments) Disclosure.

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester V with effect from the Academic Year 2018-2019

1. Elective Courses (EC)

2. Auditing-I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Introduction to Auditing	15
02	Audit Planning, Procedures and Documentation	15
03	Auditing Techniques and Internal Audit Introduction	15
04	Auditing Techniques: Vouching	08
05	Auditing Techniques: Verification	07
	Total	**60**

Sr. No.	Modules / Units
1	**Introduction to Auditing**
	Basics–Financial Statements, Users of Information, Definition of Auditing, Objectives of Auditing – Primary and Secondary, Expression of Opinion, Detection of Frauds and Errors, Inherent limitations of Audit. Difference between Accounting and Auditing, Investigation and Auditing. **Errors & Frauds**–Definitions, Reasons and Circumstances, Types of Error – Commission, Omission, Compensating error. Types of frauds, Risk of Fraud and Error in Audit, Auditors Duties and Responsibilities in Case of Fraud **Principles of Audit** –Integrity, Objectivity, Independence, Skills, Competence, Work Performed by Others, Documentation, Planning, Audi Evidence, Accounting System and Internal Control, Audit Conclusions and Reporting **Types of Audit** – Meaning, Advantages and Disadvantages of Balance sheet Audit, Interim Audit, Continuous Audit, Concurrent Audit and Annual Audit.
2	**Audit Planning, Procedures and Documentation**
	Audit Planning –Meaning, Objectives, Factors to be Considered, Sources of Obtaining Information, Discussion with Client, Overall Audit Approach. **Audit Program** – Meaning, Factors, Advantages and Disadvantages, Overcoming Disadvantages, Methods of Work , Instruction before Commencing Work, Overall Audit Approach **Audit Working Papers** - Meaning, Importance, Factors Determining Form and Contents, Main Functions / Importance, Features, Contents of Permanent Audit File, Temporary Audit File, Ownership, Custody, Access of Other Parties to Audit Working Papers, Auditors Lien on Working Papers, Auditors Lien on Client's Books **Audit Notebook** – Meaning, Structure, Contents, General Information, Current Information, Importance.
3	**Auditing Techniques and Internal Audit Introduction**
	Test Check-Test Checking Vs Routing Checking, Test Check meaning, Features, Factors to be Considered, When Test Checks Can be Used, Advantages, Disadvantages and Precautions. **Audit Sampling** -Audit Sampling, Meaning, Purpose, Factors in Determining Sample Size -Sampling Risk, Tolerable Error and Expected Error, Methods of Selecting Sample Items, Evaluation of Sample Results, Auditors Liability in Conducting Audit Based on Sample. **Internal Control** -Meaning and Purpose, Review of Internal Control, Advantages, Auditors Duties, Review of Internal Control, Inherent Limitations of Internal Control, Internal Control Samples for Sales and Debtors, Purchases and Creditors, Wages and Salaries. Internal Checks Vs Internal Control, Internal Checks Vs Test Checks. **Internal Audit** -Meaning, Basic Principles of Establishing Internal Audit, Objectives, Evaluation of Internal Audit by Statutory Auditor, Usefulness of Internal Audit, Internal Audit Vs External Audit, Internal Checks Vs Internal Audit.

Sr. No.	Modules / Units
4	**Auditing Techniques: Vouching**
	Audit of Income - Cash Sales, Sales on Approval, Consignment Sales, Sales Returns Recovery of Bad Debts written off, Rental Receipts, Interest and Dividends Received, Royalties Received. **Audit of Expenditure** - Purchases, Purchase Returns, Salaries and Wages, Rent, Insurance Premium, Telephone Expenses, Postage and Courier, Petty Cash Expenses, Travelling Commission, Advertisement, Interest Expenses.
5	**Auditing Techniques: Verification**
	Audit of Assets Book Debts / Debtors, Stocks -Auditors General Duties; Patterns, Dies and Loose Tools, Spare Parts, Empties and Containers, Quoted Investments and Unquoted Investment, Trade Marks / Copyrights, Patents, Know-how, Plant and Machinery, Land and Buildings, Furniture and Fixtures. **Audit of Liabilities** - Outstanding Expenses, Bills Payable, Secured loans, Unsecured Loans, Contingent Liabilities.

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester V
with effect from the Academic Year 2018-2019

1. Elective Courses (EC)

3. Strategic Management

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Strategic Management an Overview	15
02	Strategic Management Environment	10
03	Levels of Strategies and Analysis	10
04	Activating Strategy and Implementation	15
05	Strategic Evaluation and Control	10
	Total	**60**

Sr. No.	Modules / Units
1	**Strategic Management an Overview**
	Definitions, Strategic Decision Making, Levels of Strategic Management, Process of Strategic Management, Principles of Good Strategy, Elements of Strategic Management, Models of Strategic Management.
2	**Strategic Management Environment:**
	Importance of Politics in Strategic Management, Social, Political, and Technological forces, Role of Competition, National and Global Business Environment. Components of Environment, Environmental Scanning, Analysis of Strategies and Choice of Strategy. Ethics, Social Responsibility, Impact of Legal Factors in Strategic Management, SWOT Analysis.
3	**Levels of Strategies and Analysis**
	Corporate Level Strategies- Concentration, Integration and Diversification, Internationalization, Digitization. Process of Strategic Choice, Factors of Strategic Choice, Strategic Analysis.
4	**Activating Strategy and Implementation**
	Process and Nature of Strategy implementation, Barriers, Model of Strategy Implementation- Structural, Behavioral and Functional.
5	**Strategic Evaluation and Control**
	Standards, Benchmarking, Gap Analysis. Features and Importance of Evaluation, Barriers in Evaluation, Types. Strategic Control- Setting Standards, Comparison, Control Process, Systems, Approaches, Techniques of Evaluation and Control. Role of Information System.

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester V with effect from the Academic Year 2018-2019

1. Elective Courses (EC)

4. Financial Services Management

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Introduction to Financial Services	12
02	Mutual Funds, Factoring and Forfeiting	12
03	Securitisation of Debts and Derivatives	12
04	Housing Finance and Consumer Finance	12
05	Depositories and Pledge	12
	Total	**60**

Sr. No.	Modules / Units
1	**Introduction to Financial Services**
	Financial Services Meaning, Classification, Scope, Fund Based Activities, Non Fund Based Activities, Modern Activities, Sources of Revenue, Need for Financial Innovation, New Financial Products & Services, Innovative Financial Instruments, Challenges Facing the Financial Sector. **Merchant Banking** Definition, Origin, Merchant Banking in India, Merchant Banks and Commercial Banks, Services of Merchant Banks, Qualities of Merchant Bankers in Market Making Process, Progress of Merchant Banking in India, Problems, Scope of Merchant Banking in India.
2	**Mutual Funds, Factoring and Forfeiting**
	Mutual Funds Introduction to Mutual Funds, Structure of Mutual Fund in India, Classification of Mutual Funds, AMFI Objectives, Advantages of Mutual Funds, Disadvantages of Mutual Funds, NAV Calculation and Pricing of Mutual Funds, Mutual Funds Abroad, Mutual Funds in India, Reasons for Slow growth, Future of Mutual Funds Industry. **Factoring and Forfeiting** Factoring, Meaning, Modus Operandi, Terms and Conditions, Functions, Types of Factoring, Factoring vs. Discounting, Cost of factoring, Benefits, Factoring in India, International Factoring, Definition, Types of Export Factoring, Factoring in Other Countries, EDI Factoring, Forfeiting- Definition, Factoring vs. Forfeiting, Working of Forfeiting, Cost of Forfeiting, Benefits of Forfeiting, Drawbacks of Forfeiting.
3	**Securitisation of Debts and Derivatives**
	Securitization of Debt Meaning & Definition of Securitization, Securitization vs. Factoring, Modus Operandi, Role of Merchant Banker, Role of Other Parties, Securitization Structure Securitisable assets, Benefits of Securitization, Conditions for Successful Securitization, Securitization Abroad, Securitization in India, Reasons for non popularity of Securitization, Future Prospects of Securitization. **Derivatives** Meaning, Types of Financial Derivatives, Options, Futures, Forwards, Swaps, Futures & Options Trading System, Clearing Entities &Their Role.

Sr. No.	Modules / Units
4	**Housing Finance and Consumer Finance**
	Housing Finance Introduction, Housing Finance Industry, Housing Finance Policy Aspect, Sources of Funds, Market of Housing Finance in India, Major Issues of Housing Finance in India, Growth Factors, Housing Finance Institutions in India, National Housing Bank(NHB), Guidelines for ALM System in Housing Finance Companies, Fair Trade Practice, Code for HFC's, Housing Finance Agencies. **Consumer Finance** Introduction, Sources, Types of Products, Consumer Finance Practice in India, Mechanics of Consumer Finance, Terms, Pricing, Marketing & Insurance of Consumer Finance, Consumer Credit Scoring.
5	**Depositories & Pledge**
	Overview of Depository, Key features of Depositories Systems in India, Depository- Bank Analogy, Legal Framework, Eligibility Criteria for A Depository, Agreement between Depository & Issuers, Rights & Obligation of Depositories, Records Maintained by Depository, Services of Depository & Functions of Depository, Organization & Functions of NSDL, Pledge & Hypothecation, Procedure for Pledge/Hypothecation, Procedure of Confirmation of Creation of Pledge/Hypothecations by Pledgee, Closure of A Pledge/Hypothecation by Pledgor, Invocation of Pledge by Pledgee.

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester V with effect from the Academic Year 2018-2019

1. Elective Courses (EC)

5. Business Ethics and Corporate Governance

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Introduction to Business Ethics	10
02	Application of Ethical Theories in Business	10
03	Introduction to Corporate Governance	15
04	Genesis and Implementation of Corporate Governance in India	15
05	Global Scenario	10
	Total	**60**

Sr. No.	Modules / Units
1	**Introduction to Business Ethics**
	Definition, Meaning, Nature of Ethics, Meaning of Moral & Ethics. Types of Ethics, Importance of Ethics, Business Ethics -Meaning and Nature. Importance of Ethics in Business, Areas of Business Ethics, Meaning of Functional Ethics, Types of Ethics According to Functions of Business- Marketing Ethics, Foreign Trade Ethics and Ethics Relating to Copyright. Ethics relating to Free and Perfect Competitive Market.
2	**Application of Ethical Theories in Business**
	Ethical Decision Making: Decision Making (Normal Dilemmas And Problems): (I) Utilitarianism (J. Bentham And J.S. Mill), (Ii) Deontology (I. Kant) Virtue Ethics (Aristotle). Gandhain Approach In Management And Trusteeship, Importance And Relevance of Trusteeship Principle in Modern Business. Ethical Issues in Functional Areas of Business. Ethics in Advertising (Truth In Advertising). Ethical Issues in Finance,
3	**Introduction to Corporate Governance**
	Definition & Conceptual Framework of Corporate Governance, Business Ethics - an important dimension to Corporate Governance, Fair and Unfair Business Practices. Theoretical Basis of Corporate Governance, Mechanism- Corporate Governance Systems, Indian Model of Governance, Good Corporate Governance, Obligations Towards Society and Stake holders. Theories underlying Corporate Governance (Stake holder's theory and Stewardship theory, Agency theory, Separation of Ownership and Control, Corporate Governance Mechanism: Process, Indian Model, OECD, and Emphasis on Corporate Governance, (Transparency Accountability and Empowerment).
4	**Genesis and Implementation of corporate Governance in India:**
	Introduction principles – Arthashastra and Good Governance in ancient India, Protection of Interest of Customer and Investors, Historical perspective of Corporate Governance and Issues in Corporate Governance. **Values:** Meaning, Types Teaching from Scriptures Like Gita, Quran, Bible Value Systems in Business. **Implementation of Corporate Governance** Role of Board of Directors and Board Structure, Role of the Non- executive Director, Role of Auditors, SEBI Growth of Corporate Governance. Role of Government, Corporate Governance in India. Accounting Standards and Accounting disclosures. Finance Reporting and Corporate Governance, Non Accounting Regulations in Corporate Governance, Corporate Governance &CSR, Family Owned Business - Background, Family Businesses in India, Need for Professionalization and Transparency in Family Business.
5	**Global Scenario**
	Business Ethics in Global Economy. Ethics in the Context of Global Economy, Relationship Between Business Ethics & Business Development, Role of Business Ethics in Building a Civilized Society. **Corporate Governance and Issues Related to Scams** Corruption: Meaning, Causes, Effects. Frauds and Scams in Banks, Insurance Companies, Financial Institutions, Measures to Overcome Fraud and Corruption, Zero Tolerance of Corruption.

1. Elective Courses (EC)

6. Actuarial Analysis in Banking and Insurance

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Probability & Mathematical Statistics	12
02	Models	12
03	Mortality Model	12
04	Contingencies	12
05	Statistical Methods	12
	Total	**60**

Sr. No.	Modules / Units
1	**Probability & Mathematical Statistics**
	Concepts of Probability, Bayes' Theorem, Concepts of Random Variable, Probability Distribution, Distribution Function, Expected Value, Variance and Higher Moments, Basic Discrete And Continuous Distributions, Central Limit Theorem, Statistical Inference And Sampling Distribution, Confidence Intervals For Unknown Parameters. Test Hypotheses, Concepts of Analysis of Variance
2	**Models**
	The Principles of Actuarial Modelling., General Principles of Stochastic Processes, Markov Chain, Markov Process, Concept of Survival Models., Estimation Procedures for Lifetime Distributions, Maximum Likelihood Estimators For The Transition Intensities in Models of Transfers Between States With Piecewise Constant Transition Intensities.
3	**Mortality Model**
	Binomial Model of Mortality, Derive A Maximum Likelihood Estimator for The Probability of Death, How to Estimate Transition Intensities Depending on Age, Exactly or Using The Census Approximation, How To Test Crude Estimates For Consistency With A Standard Table or a Set of Graduated Estimates, The Process of Graduation.
4	**Contingencies**
	Simple Assurance and Annuity Contracts, Means and Variances of the Present Values of the Payments Under These Contracts, Assuming Constant Deterministic Interest. Expressions in the Form of Sums for the Mean and Variance of the Present Value of Benefit Payments Under Each contract Above, in terms of the curtate random future lifetime, assuming that death benefits are payable at the end of the year of death and that annuities are paid annually in advance or in arrear, and, where appropriate, Obtain expressions in the form of integrals for the mean and variance of the present value of benefit payments under each contract above, in terms of the random future lifetime, assuming that death benefits are payable at the moment of death and that annuities are paid continuously, and, where appropriate.
5	**Statistical Method**
	Concepts of Decision Theory, Decision Function and a Risk Function. Apply Decision Criteria to Determine Which Decision Functions are Best with Respect to a Specified Criterion. In particular Consider the Minimax Criterion and the Bayes Criterion. Calculate Probabilities and Moments of Loss Distributions both with and without Limits and Risk-Sharing Arrangements. The properties of the Statistical Distributions which are Suitable for Modelling Individual and Aggregate Losses. Apply the Principles of Statistical Inference to Select Suitable Loss Distributions for Sets of Claims. Concepts of Excesses (deductibles), and Retention Limits. The Operation of Simple Forms of Proportional and Excess of Loss Reinsurance.

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester V with effect from the Academic Year 2018-2019

2. Core Course (CC)

1. International Banking and Finance

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Fundamentals of International Finance	12
02	International Capital Markets	12
03	Foreign Exchange Markets	12
04	Risk Management	12
05	International Banking Operations	12
	Total	**60**

Sr. No.	Modules / Units
1	**Fundamentals of International Finance**
	Meaning and Scope of International Finance, Balance of Payment, Components, Deficit in Balance of Payment, Concept of Currency Convertibility. International Monetary System, Gold Standard, Features, Bretton Wood System, Background and Features, Reasons for its Failure, Smithsonian Agreement, SDRs, European Monetary System. Current Exchange Rate Systems - Fixed and Flexible Exchange Rate, Merits Demerits, Types of Fixed Exchange Rate, Hard Pegs and Soft Pegs, Types of Flexible Exchange Rate, Managed and Free Float.
2	**International Capital Markets**
	Types of Capital Flows, FDI, FPI, FII Euro Currency Markets, Origin and Reasons of growth, a Brief Understanding of Eurocurrency Deposit, Loans Bonds and Notes Market ,Concept of Offshore Banking. International Equity Markets, Concept of Depository Receipts, GDR, Characteristics, Mechanism of Issue, Participants Involved, ADR, Types and Characteristics, Concept of IDR. International Bond Market, Concepts of Domestic Bond, Concept and Types of Foreign Bonds, Concept and Types of Euro Currency Bonds, Concepts of Foreign Currency Convertible and Foreign Currency Exchangeable Bonds, Participatory Notes.
3	**Foreign Exchange Markets**
	Introduction, Market and Market Participants, Foreign Exchange Management in India, Retail and Whole Sale Component of Indian Foreign Exchange Market, Role of FEDAI, FEMA and Regulatory Framework, Dealing Room Operations. Foreign Exchange Arithmetic, Exchange Rate Quotations, Direct, Indirect and Cross rate, Percentage Spread, Arbitrage, Geographical, Triangular and Interest Rate (formula method only), Calculation of Forward Rates using Schedule of Swap Points, AFM, Determinants of Exchange Rate – Purchasing Power and Interest Rate Parity.
4	**Risk Management**
	Risk Management and Derivatives, Transaction, Translation and Economic Risk Faced by Corporates, Transaction, Position, Settlement, Pre-settlement, Gap/Mismatch Risk faced by Banks, Internal and External Hedging, Foreign Currency Derivative Instruments for Risk Management, Forward, Futures, Swaps and Options, Country Risk Management.

Sr. No.	Modules / Units
5	**International Banking Operations**
	Introduction, Definition, Features of International Banking, Reasons for Growth of International Banking, Recent Trends in International Banking, Emergence of Crypto currency - Overview, Brief Overview of Bitcoin and other Crypto Currencies, Note on Mining and Crypto Currency Exchanges, Advantages, Disadvantages of Crypto Currency. Functions of International Banking, Correspondent Banking, International Payment Systems, NRI accounts, Export Finance, Import Finance, International Merchant Banking, Financing Project Exports, Derivative Offering, Remittances, Compliance related- Interbank Functions, Internal Functions, Letter of Credit and Bank Guarantees. International Lending Operation, Loan Syndication, Parties Involved, Phases /Stages in Loan Syndication, Types of Syndication, Role of LIBOR, Risk in International Lending, Role of International Credit Rating Agencies.

3. Ability Enhancement Course (AEC)

1. Research Methodology

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction to Research	10
2	Data Collection and Processing	15
3	Data Analysis and Interpretation	15
4	Advanced Statistical Techniques	15
5	Research Report	05
	Total	**60**

Sr. No.	Modules / Units
1	**Introduction to Research**
	• Meaning, Objectives and Importance o f Research • Types of Research • Research Process. • Characteristics of Good Research • Hypothesis-Meaning, Nature, Significance, Types and Sources. • Research Design– Meaning, Definition, Need and Importance, Steps, Scope and Essentials of a Good Research Design. • Sampling– a) Meaning of Sample and Sampling, b)Methods of Sampling i) Non-Probability Sampling–Convenient, Judgment, Quota, Snow ball ii) Probability– Simple Random, Stratified, Cluster, Multi Stage.
2	**Data Collection and Processing**
	• Types of Data and Sources-Primary and Secondary Data Sources • Methods of Collection of Primary data a. Observation- i) structured and unstructured, ii) disguised and undisguised, iii)mechanical observations (use of gadgets) b. Experimental i)Field ii) Laboratory c. Interview – i) Personal Interview ii) focused group, iii) in- depth interviews Method d. Survey– Telephonic survey, Mail, E-mail, Internet survey, Social media, and Media listening. e. Survey instrument– i) Questionnaire designing. a. Types of questions–i) structured/close ended and ii) unstructured/ open ended, iii) Dichotomous, iv) Multiple Choice Questions. b. Scaling techniques- i)Likert scale, ii) Semantic Differential scale.
3	**Data Analysis and Interpretation**
	• Processing of Data– Meaning & Essentials of i) Editing ii) Coding iii) Tabulation • Analysis of Data-Meaning, Purpose, Types. • Interpretation of Data-Essentials, Importance, Significance and Descriptive Analysis • Testing of hypothesis– One Sample T- Test, ANOVA, F- test, Chi Square and Paired Sample Test
4	**Advanced Statistical Techniques**
	Introduction, Characteristics and Application of • Correlation and Regression Analysis • Factor Analysis • Cluster Analysis • Discriminant Analysis • Multidimensional Scaling
5	**Research Report**
	• Report writing – i) Meaning, Importance, Structure, Types, Process and Essentials of a Good Report.

B.Com. (Banking and Insurance) Programme

Under Choice Based Credit, Grading and Semester System

Course Structure

(To be implemented from Academic Year 2018-2019)

Semester VI

No. of Courses	Semester VI	Credits
1	***Elective Courses (EC)***	
1,2,3 & 4	**Any four courses from the following list of the courses	**12**
2	***Core Courses (CC)***	
5	Central Banking	**04**
3	***Ability Enhancement Course***	
6	Project Work in Banking & Insurance	**04**
	Total Credits	**20**

****List of Elective Courses for Semester V (Any Four)***	
01	Security Analysis and Portfolio Management
02	Auditing - II
03	Human Resource Management
04	Turnaround Management
05	International Business
06	Marketing in Banking & Insurance

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester VI with effect from the Academic Year 2018- 2019

1. Elective Courses (EC)

1. Security Analysis and Portfolio Management

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Portfolio Management – An Introduction & Process	12
02	Portfolio Management – Valuation	12
03	Fundamental Analysis	12
04	Technical Analysis	12
05	Efficient Market Theory & CAPM	12
	Total	**60**

Sr. No.	Modules / Units
1	**Portfolio Management – An Introduction & Process**
	Investment, Meaning, Characteristics, Objectives, Investment V/s Speculation, Investment V/s Gambling and Types of Investors. Portfolio Management – Meaning, Evolution, Phases, Role of Portfolio Managers, Advantages of Portfolio Management. Investment Environment in India and Factors Conducive for Investment in India. Portfolio Analysis – Meaning and its Components, Calculation of Expected Return and Risk, Calculation of Covariance, Risk – Return Trade off. Portfolio Selection – Meaning, Feasible Set of Portfolios, Efficient Set of Portfolios, Selection of Optimal Portfolio, Markowitz Model, Limitations of Markowitz Model, Measuring Security Return and Portfolio Return and Risk under Single Index Model and Multi Index Model.
2	**Portfolio Management – Valuation**
	Portfolio Revision – Meaning, Need, Constraints and Strategies. Portfolio Evaluation – Meaning, Need, Measuring Returns (Sharpe, Treynor and Jensen Ratios) and Decomposition of Performance. Bond Valuation – Meaning, Measuring Bond Returns, Yield to Maturity, Yield to Call and Bond Pricing. Bond Pricing Theorems, Bond Risks and Bond Duration.
3	**Fundamental Analysis**
	Economy Analysis – Meaning, Framework, Economic Analysis, Forecasting, Barometric or Indicator Approach, Econometric Model Building and Opportunistic Model Building. Industry Analysis – Concept of Analysis, Industry Life Cycle, Industry Characteristics Company Analysis – Financial Statements, Analysis of Financial Statements, (Practical questions on Debt Equity Ratios, Total Debt Ratio, Proprietary ratios, interest coverage ratio, Profitability ratios related to sales, investment and equity shares Efficiency or Activity Ratios) and Assessment of Risk(Leverages)
4	**Technical Analysis**
	Dow Theory Meaning and Principles of Technical Analysis, Price Chart, Line Chart, Bar Chart, Japanese Candlestick Chart, Trends and Trend Reversals, Chart Patterns, Support and Resistance, Reversal Patterns, Continuation Patterns and Elliot Wave Theory Mathematical Indicators – Calculation of Moving Averages (Simple and Exponential Moving Average), Oscillators and Relative Strength Index Market Indicators Fundamental Analysis V/s Technical Analysis

Sr. No.	Modules / Units
5	**Efficient Market Theory & CAPM**
	Random Walk Theory The Efficient Market Hypothesis Forms of Market Efficiency Competitive Market Hypothesis CAPM – Fundamental Notions of Portfolio Theory, Assumption of CAPM, Efficient Frontier with Riskless Lending and Borrowing, Capital Market Line, Security Market Line and Pricing of Securities with CAPM. Arbitrage Pricing Theory (APT) – The Return Generating Model, Factors Affecting Stock Return, Expected Return on Stock, APT V/s CAPM.

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester VI with effect from the Academic Year 2018-2019

1. Elective Courses (EC)

2. Auditing - II

Modules at a Glance

Sr. No.	Modules	No. of Lectures
01	Audit of Limited Companies	15
02	Audit of Banking Companies	15
03	Audit of Insurance Companies	15
04	New Areas of Auditing	08
05	Professional Ethics and Misconduct	07
	Total	**60**

Sr. No.	Modules / Units
1	**Audit of Limited Companies**
	Qualifications, Disqualifications, Appointment, Removal, Remuneration of Auditors, Audit Ceiling, Status, Power, Duties and Liabilities of Auditors, Branch Audit, Joint Audit, Special Audit. Maintenance of Books of Account –Related Party Disclosures, Segment Reporting, Divisible Profit, Dividend and Depreciation (Companies Act, Standards on Accounting, Legal Decisions and Auditor's Responsibility), Representations by Management, Contents of Annual Report. University of Mumbai

B.Com. (Banking and Insurance) Programme
Guidelines for Project Work
at
Third Year
Semester VI

Under Choice Based Credit, Grading and Semester System

(To be implemented from Academic Year 2018-2019)

Board of Studies-in-Banking and Finance

Introduction

Inclusion of project work in the course curriculum of the B.Com. (Banking and Insurance) programme is one of the ambitious aspects in the programme structure. The main objective of inclusion of project work is to inculcate the element of research analyse and scientific temperament challenging the potential of learner as regards to his/ her eager to enquire and ability to interpret particular aspect of the study. It is expected that the guiding teacher should undertake the counselling sessions and make the awareness among the learners about the methodology of formulation, preparation and evaluation pattern of the project work.

- There are two modes of preparation of project work
  1. Project work based on research methodology in the study area
  2. Project work based on internship in the study area

Guidelines for preparation of Project Work

1. General guidelines for preparation of project work based on Research Methodology

- The project topic may be undertaken in any area of Elective Courses.
- Each of the learner has to undertake a Project individually under the supervision of a teacher-guide.
- The learner shall decide the topic and title which should be specific, clear and with definite scope in consultation with the teacher-guide concerned.
- University/college shall allot a guiding teacher for guidance to the students based on her / his specialization.
- The project report shall be prepared as per the broad guidelines given below:
  - Font type: Times New Roman
  - Font size: 12-For content, 14-for Title
  - Line Space : 1.5-for content and 1-for in table work
  - Paper Size: A4
  - Margin : in Left-1.5, Up-Down-Right-1
  - The Project Report shall be bounded.
  - The project report should be 80 to 100 pages

Structure to be followed to maintain the uniformity in formulation and presentation of Project Work

(Model Structure of the Project Work)

- **Chapter No. 1: Introduction**

  In this chapter Selection and relevance of the problem, historical background of the problem, brief profile of the study area, definition/s of related aspects, characteristics, different concepts pertaining to the problem etc can be incorporated by the learner.

- **Chapter No. 2: Research Methodology**

  This chapter will include Objectives, Hypothesis, Scope of the study, limitations of the study, significance of the study, Selection of the problem, Sample size, Data collection, Tabulation of data, Techniques and tools to be used, etc can be incorporated by the learner.

- **Chapter No. 3: Literature Review**

  This chapter will provide information about studies done on the respective issue. This would specify how the study undertaken is relevant and contribute for value addition in information/ knowledge/ application of study area which ultimately helps the learner to undertake further study on same issue.

- **Chapter No. 4: Data Analysis, Interpretation and Presentation**

  This chapter is the core part of the study. The analysis pertaining to collected data will be done by the learner. The application of selected tools or techniques will be used to arrive at findings. In this, table of information's, presentation of graphs etc. can be provided with interpretation by the learner.

- **Chapter No. 5: Conclusions and Suggestions**

  In this chapter of project work, findings of work will be covered and suggestion will be enlisted to validate the objectives and hypotheses.

Note: If required more chapters of data analysis can be added.

Acknowledgment

(Model structure of the acknowledgement)

To list who all have helped me is difficult because they are so numerous and the depth is so enormous.

I would like to acknowledge the following as being idealistic channels and fresh dimensions in the completion of this project.

I take this opportunity to thank the **University of Mumbai** for giving me chance to do this project.

I would like to thank my **Principal, _____**for providing the necessary facilities required for completion of this project.

I take this opportunity to thank our **Coordinator_____**, for her moral support and guidance.

I would also like to express my sincere gratitude towards my project guide _____ whose guidance and care made the project successful.

I would like to thank my **College Library**, for having provided various reference books and magazines related to my project.

Lastly, I would like to thank each and every person who directly or indirectly helped me in the completion of the project especially **myParents and Peers** who supported me throughout my project.

2. Guidelines for Internship based project work

- Minimum 20 days/ 100 hours of Internship with an Organisation/ NGO/ Charitable Organisation/ Private firm.
- The theme of the internship should be based on any study area of the elective courses
- Experience Certificate is Mandatory
- A project report has to be brief in content and must include the following aspects:
  - **Executive Summary:**

    A bird's eye view of your entire presentation has to be precisely offered under this category.
  - **Introduction on the Company:**

    A Concise representation of company/ organization defining its scope, products/ services and its SWOT analysis.
  - **Statement and Objectives:**

    The mission and vision of the organization need to be stated enshrining its broad strategies.
  - **Your Role in the Organisation during the internship:**

    The key aspects handled, the department under which you were deployed and brief summary report duly acknowledged by the reporting head.
  - **Challenges:**

    The challenges confronted while churning out theoretical knowledge into practical world.
  - **Conclusion:**

    A brief overview of your experience and suggestions to bridge the gap between theory and practice.
- The project report based on internship shall be prepared as per the broad guidelines given below:
  - Font type: Times New Roman
  - Font size: 12-For content, 14-for Title
  - Line Space : 1.5-for content and 1-for in table work
  - Paper Size: A4
  - Margin : in Left-1.5, Up-Down-Right-1
  - The Project Report shall be bounded.
  - The project report should be of minimum 50 pages

Evaluation pattern of the project work

The Project Report shall be evaluated in two stages viz.	
• **Evaluation of Project Report (Bound Copy)**	**60 Marks**
▪ Introduction and other areas covered	20 Marks
▪ Research Methodology, Presentation, Analysis and interpretation of data	30 Marks
▪ Conclusion& Recommendations	10 Marks
• **Conduct of Viva-voce**	**40 Marks**
▪ In the course of Viva-voce, the questions may be asked such as importance / relevance of the study, objective of the study, methodology of the study/ mode of Enquiry (question responses)	10 Marks
▪ Ability to explain the analysis, findings, concluding observations, recommendation, limitations of the Study	20 Marks
▪ Overall Impression (including Communication Skill)	10 Marks

Note:

- ***The guiding teacher along with the external evaluator appointed by the University/ College for the evaluation of project shall conduct the viva-voce examination as per the evaluation pattern***

Passing Standard

- Minimum of Grade E in the project component
- In case of failing in the project work, the same project can be revised for ATKT examination.
- Absence of student for viva voce: If any student fails to appear for the viva voce on the date and time fixed by the department such student shall appear for the viva voce on the date and time fixed by the Department, such student shall appear for the viva voce only along with students of the next batch.

Revised Syllabus of Courses of B.Com. (Banking and Insurance) Programme at Semester V and VI
with effect from the Academic Year 2018-2019

Scheme of Evaluation

The performance of the learners will be evaluated in two Components. One component will be the Internal Assessment component carrying 25% marks and the second component will be the Semester-wise End Examination component carrying 75% marks. The allocation of marks for the Internal Assessment and Semester End Examinations will be as shown below:-

A) Internal Assessment: 25 %

Question Paper Pattern
(Internal Assessment- Courses without Practical Courses)

Sr. No.	Particular	Marks
1	**One class test (20 Marks)**	
	Match the Column/ Fill in the Blanks/ Multiple Choice Questions ***(½ Mark each)***	05 Marks
	Answer in One or Two Lines (Concept based Questions) ***(01 Mark each)***	05 Marks
	Answer in Brief (Attempt Any Two of the Three) ***(05 Marks each)***	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

B) Semester End Examination: 75 %

i) Duration: The examination shall be of 2 ½ Hours duration

ii) Theory question paper pattern

- There shall be five questions each of 15 marks.
- All questions shall be compulsory with internal choice within the questions.
- Question may be subdivided into sub-questions a, b, c… and the allocation of marks depends on the weightage of the topic.

  (Detail question paper pattern has been given separately)

❖ **Passing Standard**

The learners to pass a course shall have to obtain a minimum of 40% marks in aggregate for each course where the course consists of Internal Assessment and Semester End Examination. The learners shall obtain minimum of 40% marks (i.e. 10 out of 25) in the Internal Assessment and 40% marks in Semester End Examination (i.e. 30 Out of 75) separately, to pass the course and minimum of Grade E to pass a particular semester A learner will be said to have passed the course if the learner passes the Internal Assessment and Semester End Examination together.

Question Paper Pattern

(Practical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 1/2 Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A. Sub Questions to be asked 10 and to be answered any 08 B. Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Practical question of 15 marks may be divided into two sub questions of 7/8 and 10/5Marks. If the topic demands, instead of practical questions, appropriate theory question may be asked.

Question Paper Pattern
(Theoretical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 1/2 Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Theory question of 15 marks may be divided into two sub questions of 7/8 and 10/5Marks.

SYBA

PAPER II- POLITICAL THEORY

Semester-III

SEMESTER III- PRINCIPLES AND CONCEPTS OF POLITICAL THEORY

Module 1 - Introduction to Political Theory [11 lectures]

1.1 Definition and Scope of Political Theory
1.2Approaches to the Study of Political Theory: Traditional
1.3 Approaches to the Study of Political Theory: Contemporary

Module 2 – State, Civil Society & Market [12 Lectures]

2.1 State: Concept and Perspectives

AC. 6.6.2012
Item No.4.49

UNIVERSITY OF MUMBAI

Revised Syllabus for the F.Y.B.A/F.Y.B.Sc.

Program: F.Y.B.A/F.Y.B.Sc.

Course: Foundation Course

(Semester I & II)

(As per Credit Based Semester and Grading System
with effect from the academic year 2012–2013)

Revised Syllabus (From 2012-13)
Foundation Course for F. Y. B A
Semester 1
Course Code: UA FC 1C1

Lectures 45
Marks 100

Unit 1
Overview of Indian Society:
Understand the multi-cultural diversity of Indian society through its demographic composition: population distribution according to religion, caste, and gender;
Appreciate the concept of linguistic diversity in relation to the Indian situation;
Understand regional variations according to rural, urban and tribal characteristics;
Understanding the concept of diversity as difference. ***(5 lectures)***

Unit 2
Concept of Disparity- 1:
Understand the concept of disparity as arising out of stratification and inequality;
Explore the disparities arising out of gender with special reference to violence against women, female foeticide (declining sex ratio), and portrayal of women in media;
Appreciate the inequalities faced by people with disabilities and understand the issues of people with physical and mental disabilities. ***(10 lectures)***

Unit 3
Concept of Disparity-2:
Examine inequalities manifested due to the caste system and inter-group conflicts arising thereof;
Understand inter-group conflicts arising out of communalism;
Examine the causes and effects of conflicts arising out of regionalism and linguistic differences. ***(10 lectures)***

Unit 4
The Indian Constitution:
Philosophy of the Constitution as set out in the Preamble;
The structure of the Constitution-the Preamble, Main Body and Schedules;
Fundamental Duties of the Indian Citizen; tolerance, peace and communal harmony as crucial values in strengthening the social fabric of Indian society;
Basic features of the Constitution. ***(10 lectures)***

Unit 5
Significant Aspects of Political Processes:
The party system in Indian politics;
Local self-government in urban and rural areas; the 73^{rd} and 74^{th} Amendments and their implications for inclusive politics;
Role and significance of women in politics. ***(10 lectures)***

Unit 6

Growing Social Problems in India:

a) Substance abuse- impact on youth & challenges for the future
b) HIV/AIDS- awareness, prevention, treatment and services
c) Problems of the elderly- causes, implications and response
d) Issue of child labour- magnitude, causes, effects and response
e) Child abuse- effects and ways to prevent
f) Trafficking of women- causes, effects and response

(15 lectures)

Note:

15 lectures will be allotted for project guidance

Unit Number 6 will not be assessed for the Semester End Exam

Revised Syllabus (From 2012-13)
Foundation Course for F. Y. B.A
Semester II
Course Code: UA FC 2C1

Lectures 45
Marks 100

Unit 1
Globalisation and Indian Society:
Understanding the concepts of liberalization, privatization and globalization;
Growth of information technology and communication and its impact manifested in everyday life;
Impact of globalization on industry: changes in employment and increasing migration;
Changes in agrarian sector due to globalization; rise in corporate farming and increase in farmers' suicides. (7 lectures)

Unit 2
Human Rights
Concept of Human Rights; origin and evolution of the concept;
The Universal Declaration of Human Rights;
Human Rights constituents with special reference to Fundamental Rights stated in the Constitution;
(10lectures)

Unit 3
Ecology
Importance of Environment Studies in the current developmental context;
Understanding concepts of Environment, Ecology and their interconnectedness;
Environment as natural capital and connection to quality of human life;
Environmental Degradation- causes and impact on human life;
Sustainable development- concept and components; poverty and environment
(10 lectures)

(15 lectures)

Note:
15 lectures will be allotted for project guidance
Unit Number 6 will not be assessed for the Semester End Exam

Internal Assessment and Question Paper Pattern for FC- Semester I & II Course At the F Y B A Examinations

The student will be assessed on the basis of Internal Assessment of 40 marks and a Semester End Exam of 60 marks. The student will have to secure a minimum of 40% marks in aggregate and a minimum of 40% in each component of assessment i.e. 16 out of 40 in Internal Assessment and 24 out of 60 in Semester End Exam.

Internal Assessment:
- There will be one mid-semester test of 10 marks on Units 1 and 2.
- The test will, as far as possible, comprise of objective questions and/or short notes.
- The student will have to submit an assignment/project for 20 marks before appearing for the Semester End Exam. This assignment/project will be entirely based on Unit 6 and can take the form of street-plays/exhibition/power-point presentations or similar other modes suitable to the topic selected; students can work in groups of not more than 8 for the purpose of this assignment. Students will have to submit a hard copy of the assignment before appearing for the Semester End Exam. The assignment will be assessed for 20 marks of which 10 marks may be allotted for a viva, to assess the level of engagement of the student with the topic assigned.
- Unit 6 will not be included in the Semester End Exam.
- 10 marks will be assigned to the participation of the student in class discussions and the projects undertaken along with the leadership skills and presentation skills exhibited during the class sessions.

Semester End Exam:

- There will be a Semester End Exam for 60 marks of 2 hours duration.
- This exam will comprise of four compulsory questions covering Units 1-5 of the syllabus.
- Question No. 1, 2 and 3 will be Full-length questions for 15 marks each; there will be an internal choice in each of these questions requiring the students to answer one of two questions asked.
- Full-length questions will be from Units 2, 3, 4 and 5 only.
- Question No. 4 will be of the Short Note type where each Short Note will be for 3 marks each. Students will be required to answer 5 out of 8 Short Notes.
- Short note questions will be from Units 1, 2, 3, 4 and 5.
- Unit 1 will not feature in the Full-length questions but will be asked only in the form of Short Note questions.

NOTE: All other rules regarding Standard of Passing, ATKT, etc., will be as per those decided by the Faculty of Arts passed by the Academic Council from time to time.

B.A. HISTORY

Question Paper Pattern for S.Y.B.A. History

Semester III and Semester IV

As per University rules and guidelines

AC 26/2/2015
Item No. 4.70

UNIVERSITY OF MUMBAI

Syllabus for F.Y.B.Sc.
Program BSc
Course: ZOOLOGY

Semester I and II

(Credit Based Semester and Grading System
with effect from the academic year 2015–2016)

Syllabus Committee Members

Dr. Anil S. Singh	-	Convenor
Dr. Manisha Kulkarni	-	Co-convenor
Dr. Jyotsna Mahale	-	Co-convenor
Dr. Meenakshi Sundaresan	-	Co-convenor
Prof. Lata Sardesai	-	Co-convenor
Prof. P.C. Mathew	-	Co-convenor
Dr. Dilip Kakavipure	-	Co-convenor
Dr. V.M. Patole	-	Co-convenor
Dr. Kantilal H. Nagare	-	Co-convenor
Prof. Shanta Janyani	-	Co-convenor
Dr. S. Rangoonwala	-	Co-convenor
Dr. Minakshi Gurav	-	Member (Teacher)
Dr. Shirley B. Agwuocha	-	Member (Teacher)
Dr. Vishakha Shingala	-	Member (Teacher)
Dr. Gayathri N.	-	Member (Teacher)
Dr. Ansariya Rana	-	Member (Teacher)
Dr. Aditya S. Akerkar	-	Member (Teacher)

Syllabus for
FYBSc
Course – ZOOLOGY

1. Preamble
2. Pedagogy
3. Syllabus Semester I & II
4. References and Additional Reading
5. Scheme of Examination and Paper Pattern
6. Distribution of periods
7. Model Question bank

Aims

- To nurture interest in the students for the subject of Zoology
- To create awareness of the basic and modern concepts of Zoology
- To orient students about the importance of abiotic and biotic factors of environment and their conservation.
- To provide an insight to the basic nutritional and health aspects of human life.
- To inculcate good laboratory practices in students and to train them about scientific handling of important instruments.

Preamble

While presenting this new syllabus to the teachers and students of Semester I and Semester II (F.Y.B.Sc.) Zoology, I am extremely happy to state that for the first time efforts have been made to seek inputs of all the stake holders to make it more relevant.

In the first meeting of the Board of Studies an apex committee was formed to study syllabi worldwide with a view to include modern modules and plan semesters at UG and PG programs in advance to avoid overlapping and duplication of topics in various courses.

Meeting with the industry at the Indian Merchants' Chamber and with the meritorious alumni helped adding need based components. For the first time students were a part of the syllabus committee and the process became participative when the draft was finalized in an open meeting with all the Zoology teachers after having sought democratic criticism on the proposed syllabus placed on the University website for about one month.

While following the guidelines of UGC, use of animals is excluded from the practicals, substituting the same with audiovisual, ICT and simulation aids and that the syllabus is made more interesting with new, innovative topics. Providing the pedagogy as also indicating objectives and desired outcome of every topic for the teachers, and question bank for the students apart from the question paper pattern became an integral part of the syllabus, therefore.

Care is taken to provide the drafts from time to time and declare the final syllabus well in advance enabling the teachers to make preparations before commencement of the academic year and facilitating students to execute their right to know the details before admissions.

The success of this revamped syllabus will depend totally on the enthusiasm of the teachers which is very high all throughout the process and their hands will be strengthened by publishing the University text books for the first time. This curriculum of the Zoologists, for the Zoologists and by the Zoologists developed with the united efforts will take our ever progressive subject to greater heights in the years to come.

- VINAYAK DALVIE, Chairman, BOS in Zoology

Syllabus for
FYBSc.
Course – ZOOLOGY
To be implemented from Academic year 2015-16
SEMESTER - I

COURSE CODE	UNIT	TOPICS	CREDITS	LECTURES/WEEK
USZO101	I	Wonders of animal world	2	1
	II	Biodiversity and its conservation		1
	III	Footsteps to follow		1
USZO102	I	Laboratory safety and Units of Measurement	2	1
	II	Animal Biotechnology		1
	III	Instrumentation		1
USZOP1	Practical based on both courses		2	6

SEMESTER - II

Unit 3 Footsteps to follow	Unit 3 Instrumentation	Unit 3 National Parks and Sanctuaries	Unit 3 Common Human Diseases
Practical (USZO P1)	Practical (USZO P1)	Practical (USZO P2)	Practical (USZO P2)

PEDAGOGY

F.Y.B.Sc. Syllabus

First year B.Sc. course is the entry point for the students to undergraduate classes which acts like a guiding force for them to make up their mind in selecting a subject they would wish to pursue their studies in future for carving their career in a particular field.

The syllabus committee in the subject of Zoology for F.Y.B.Sc. Class has designed this syllabus with a view that it is most appropriate time when we transform our traditional closed classroom teaching learning practices to more of field and activity based studies, the correct methodology for the study of Natural Sciences. It is recommended to orient the students about ecosystem, bio-diversity, wildlife conservation and management with the help of models, photographs, movies, documentaries, charts and use of ICT and then take learners to field to have realistic experiences. This will enable them to get true insight about endurance of animal life in relation to human activity inducing sentiment of love, care and protection in the young mind and heart leading to understand importance of co-existence and conservation of bio-diversity. An interaction with the officials of wildlife protection force should be allowed to get basic knowledge about the relevant acts through lectures which for creating awareness about these issues and also to make best use of the knowledge in their own interest as well as for the country. Instrumentation and Animal Biotechnology component would initiate academia- industry interface and should be edified in collaboration with expertise from relevant research institutes and industrial establishments and entrepreneurs by inviting them as guest speakers or through industrial visits, excursions for practical experience about the principle, working and application of the instruments for commercial use. Population ecology need to be explained in the context with census to enlighten pupils about the effect of diversity and dynamism of human population on socio economic status of India. Experts from the field of nutrition and health can be invited to enlighten learners on the topics of nutritional value of food, balanced diet, ill-effects of eating junk food and aerated drinks. Medical professionals, relevant NGO's maybe engaged to educate students regarding myth, precautionary measures, immunization drives of common diseases, ill-effects of self-medication and stress, significance of BMI through series of programmes. During medical emergencies it is of immense importance to provide first aid assistance to the diseased within the golden period i.e. of few minutes. This enhances the possibility to save life, thus it is strongly recommended to form a consortium of colleges to conduct training in rotation of first aid techniques for teachers and students both with the help of organizations like Red Cross Society, Health Department of Civic Bodies, Civil Defence Department and Local Self Government etc.

Dr. Anil S. Singh
Convenor

F.Y.B.Sc. ZOOLOGY

(THEORY)

SEMESTER I

USZO101 (Course 1)
Wonders of Animal World, Biodiversity and its Conservation

Unit 1: Wonders of Animal World (15 L)

Objective: *To take learners through a captivating journey of hoarded wealth of marvellous animal world.*

Desired Outcome*: Curiosity will be ignited in the mind of learners, to know more about the fascinating world of animals which would enhance their interest and love for the subject of Zoology.*

1.1**:** Echolocation in Bats and Cetaceans - Dolphins and Whales

1.2**:** Mechanism of Pearl formation in Mollusca

1.3**:** Bioluminescence in Animals: Noctiluca, Glow worm, Firefly, Angler Fish (Mechanism and use for the animal)

1.4**:** Regeneration in Animals - Earthworm (Annelida) and Lizard (Reptile)

1.5**:** Mimicry in Butterflies and its significance: Great Eggfly and Common Crow, Common Palmfly and Plain Tiger.

1.6**:** Mechanism of Coral formation and types of Coral reefs

1.7**:** Bird migration: Definition, types and factors inducing bird migration

1.8**:** Adaptive features of desert animals: Reptiles (Phrynosoma) and Mammals (Camel)

1.9**:** Breeding and Parental care in:

1.9.1**:** Pisces - Ovo-viviparous (Black Molly/Guppy), Mouth brooders (Tilapia), Brood pouches (Sea horse)

1.9.2**:** Amphibia - Mouth brooders (Darwin's Frog), Egg carriers (Midwife Toad)

1.9.3**:** Mammals - Egg-laying (Duck-billed Platypus), Marsupials (Kangaroo)

1.10**:** Aves: Brood Parasitism (Cuckoo)

Unit 2: Biodiversity and its Conservation (15 L)

Objective*: To orient learners about rich heritage of Biodiversity of India and make them understand significance of its conservation.*

Desired Outcome*: Learners would appreciate treasure of Biodiversity, its importance and hence would contribute their best for its conservation*.

2.1: Introduction to Biodiversity - Definition, Concepts, Scope and Significance

2.2: Levels of Biodiversity - Introduction to Genetic, Species and Ecosystem Biodiversity

2.3: Introduction of Biodiversity Hotspots- (Western Ghats and Indo-Burma Border)

2.4: Values of biodiversity - Direct and Indirect use value

2.5: Threats to Biodiversity - Habitat loss and Man-Wildlife conflict

2.6: Biodiversity conservation and management

2.6.1**:** Conservation strategies: *in situ*, ex-situ, National parks, Sanctuaries and Biosphere reserves.

2.6.2**:** Introduction to International efforts : Convention on Biological Diversity (CBD), International Union for Conservation of Nature and Natural Resources (IUCN), United Nations Environment Program - World Conservation Monitoring Centre (UNEP-WCMC)

2.6.3**:** National Biodiversity Action Plan, 2002

2.6.4**:** Introduction to Indian Wildlife (Protection) Act, 1972 and Convention for International Trade of endangered species

Unit 3: Footsteps to follow (15 L)

Objective*: To teach learners about innovative and novel work of scientists/philosopher/entrepreneurs in the field of biological sciences.*

Desired Outcome*: Minds of learners would be impulsed to think differently and would be encouraged ipso facto to their original crude ideas from the field of biological sciences.*

3.1**:** Dr. Hargobind Khorana (Genetic code)

3.2**:** Dr. Varghese Kurien (Amul –White revolution)

3.3**:** Dr. Salim Ali (Ornithologist)

3.4**:** Anna Hazare (Water Conservation-Ralegan Siddhi)

3.5**:** Baba Amte (Anandvan)

3.6**:** Kiran Mazumdar Shaw (Biocon)

3.7**:** Gadre Fisheries (Surimi)

Two cases preferably of local importance to the college be additionally taught.

USZO102 (Course 2)

INSTRUMENTATION and ANIMAL BIOTECHNOLOGY

Unit 1: Laboratory safety, Units and Measurement (15 L)

Objective: *To make learners aware of risks involved in handling of different hazardous chemicals, sensitive (electrical/electronic) instruments and infectious biological specimens especially during practical sessions in the laboratory and to train them to avoid mishap.*

Desired Outcome*: Learners would work safely in the laboratory and avoid occurrence of accidents (mishaps) which will boost their scholastic performance and economy in use of materials/chemicals during practical sessions.*

1.1: Introduction to good laboratory practices

1.2: **Use of safety symbols**: meaning, types of hazards and precautions

1.3: **Units of measurement**:

1.3.1**:** Calculations and related conversions of each: Metric system- length (meter to micrometer); weight (gram to microgram), Volumetric (Cubic measures)

1.3.2**:** Temperature: Celsius, Fahrenheit, Kelvin

1.3.3**:** Concentrations: Percent solutions, ppt, ppm, ppb dilutions, Normality, Molarity and Molality.

1.3.4**:** Biostatistics: Introduction and scope, Sampling and its types, Central Tendencies (mean, median, mode) Tabulation, Graphical representations (Histograms, bar diagrams, pie diagrams).

Unit 2: Animal Biotechnology (15 L)

Objective: *To acquaint learners to the modern developments and concepts of Zoology highlighting their applications aiming for the benefit of human being.*
Desired Outcome*: Learners would understand recent advances in the subject and their applications for the betterment of mankind; and that the young minds would be tuned to think out of the box.*

2.1: **Biotechnology**: Scope and achievements of Biotechnology (Fishery, Animal Husbandry, Medical, Industrial)

2.2: **Transgenesis**: Retro viral method, Nuclear transplantation method, DNA microinjection method and Embryonic stem cell method

2.3: Cloning (Dolly)

2.4: Ethical issues of transgenic and cloned animals

2.5: **Applications of Biotechnology**:

2.5.1**:** DNA fingerprinting: Technique in brief and its application in forensic science (Crime Investigation)

2.5.2**:** Recombinant DNA in medicines (recombinant insulin)

2.5.3**:** Gene therapy: Ex-vivo and *In vivo,* Severe Combined Immunodeficiency (SCID), Cystic Fibrosis

2.5.4**:** Green genes: Green Fluorescent Protein (GFP) from Jelly fish- valuable as reporter genes used to detect food poisoning.

Unit 3: Instrumentation (15 L)

Objective: *To provide all learners a complete insight about the structure and train them with operational skills of different instruments required in Zoology.*
Desired Outcome: *Students will be skilled to select and operate suitable instruments for the studies of different components of Zoology of this course and also of higher classes including research.*

3.1: Microscopy

3.1.1**:** Construction, principle and applications of dissecting and compound microscope.

3.2: Colorimetry and Spectroscopy - Principle and applications.

3.3: pH - Sorenson's pH scale, pH meter - principle and applications.

3.3: Centrifuge - Principle and applications (clinical and ultra centrifuges).

3.4: Chromatography - Principle and applications (Partition and Adsorption)

3.5: Electrophoresis - Principle and applications (AGE and PAGE)

SEMESTER I

Practical USZOP1 (Course I)

1. Mounting of foraminiferan shells from sand (any 3)
2. Study of types of Corals - Brain, Organ pipe, Stag Horn, Mushroom coral Study of

3Study of the following;

a. Symbiosis (Termite and Trychonympha, hermit crab and sea anemone)
b. Camouflage (leaf insect, chameleon)
c. Cannibalistic mate-eating animals (Spider and Praying Mantis)
d. Animal architects: Termites, Harvester ant and Baya weaver bird
e. Study of bioluminescent organisms – Noctiluca, glow worm, fire fly, angler fish.

4. Breeding and parental care in Amphibia- *Rhacophorus*, Midwife toad, Darwin's frog, Caecilian.
5. Mounting of scales of fish (placoid, cycloid and ctenoid)
6 a) Study of Adaptive radiation in Reptiles - Turtle, Tortoise, *Phrynosoma*, *Draco*)
   b) Identification and differentiation of venomous and non-venomous snakes (Scales, Fangs, Bite marks, etc.)
7. Study of Types of feathers(contour, filoplume, down), beaks(Nectar feeding , Insect catching, Fruit eating, Scavenging, Filter feeding), claws (perching, wading, swimming, hopping) in birds
8 a. Identification of birds - Coppersmith Barbet, Bulbul, Rose ringed Parakeet, Magpie Robin, two local birds.
   b. Field Report – To be done in a group of ten students (submission of written / typed report preferably along with photographs/ tables/ graphs.

Other Suggested topics for field observation/survey:

- Butterflies/ Fishes/ Migratory birds of local area.
- Variations in Human like Attached vs. Free Earlobes, Blood Groups, Eye colour, etc. using statistical method.

9. Observations of fauna in the field (with reference to theory syllabus).

***Note - The practicals may be conducted by using specimens authorised by the wild such other regulating authorities though it is strongly recommended that the same sh taught by using photographs/audio-visual aids/ simulations / models, etc. as recomme the UGC and as envisaged in the regulations of the relevant monitoring bodies. specimens, however, shall be procured for the purpose of conducting practicals me here-in-above.**

#There shall be at least one excursion/field trip

SEMESTER I

Practical USZOP1 (Course II)

1. Interpretation of safety symbols (toxic, corrosive, explosive, flammable, skin ritant, oxidizing, compressed gases, aspiration hazards and Biohazardous fectious material.)
   b) Study of Central tendencies and plotting of Bar diagram, histogram and pie diagram.
2. Identification of transgenic fish (Trout and Salmon) / cloned animals (Dolly sheep, cc cat and Snuppy dog) from photograph.
3. Extraction of fruit juice with pectinase from apple/guava/or any other suitable fruit
4. Calculation of pH of three different samples (one each acidic, alkaline and neutral) using pH paper/Universal Indicator and confirming the result with pH meter.
   Application of DNA Fingerprinting in criminology (photograph of electrophoretic pattern to be given for interpretation by the students)
5. a) Study of parts of microscope and their functions.
   b) Technique of focussing a permanent slide under 10x and 45x (objectives).
6. a) Dilution of given sample and estimation of OD by using colorimeter.
   b) Calculation of concentration from the given OD using formula.
7. Calculation of pH of three different samples (one each acidic, alkaline and neutral) using pH paper/universal indicator/pH indicator from red cabbage and confirming the result with pH meter.
8. a) Seperation of amino acids from the mixture by paper chromatography.
   b) Calculation of Rf value of separated pigments/amino acids from given chromatogram and their identification from standard chart.
9. a) Seperation of pigments by adsorption chromatography using chalk.
   b) Seperation of lipids by TLC,

***Note - The practicals may be conducted by using specimens authorised by the wildlife and such other regulating authorities though it is strongly recommended that the same should be taught by using photographs/audio-visual aids/ simulations / models, etc. as recommended by the UGC and as envisaged in the regulations of the relevant monitoring bodies. No new specimens, however, shall be procured for the purpose of conducting practicals mentioned here-in-above.**

SCHEME OF EXAMINATION (THEORY)

(a) Internal assessment of twenty five (25) marks per course per semester should be conducted according to the guidelines given by University of Mumbai vide circular number UG/04 of 2014 Dated 5th June 2014 to be implemented from academic year 2014-15.

(b) External assessment of seventy five (75) marks per course per semester should be conducted as per the following skeleton question paper pattern.

(c) One practical examination of fifty (50) marks per course each should be conducted at the end of every semester.

SKELETON- EXAMINATION PATTERN FOR THE ABOVE SYLLABUS

All Questions are compulsory

Figures to the right indicate full marks

Time: 2.5 hours **Total marks: 75**

Q.1.	UNIT 1 Answer any four out of eight (5 marks each)	20 marks
Q.2.	UNIT 2 a. Answer any one of the two (10 marks) b. Answer any two out of the four (5 marks each)	20 marks
Q.3.	UNIT 3 Answer any two out of four (10 marks each)	20 marks
Q.4.	a. Unit 1 - (One note of five marks OR objective type questions) b. Unit 2 - (One note of five marks OR objective type questions) c. Unit 3- (One note of five marks OR objective type questions)	15 marks

*For Question 4 it is recommended to have objective questions such as –

(a) Match the column (b) MCQ

(c) Give one word for (d) True and False

(e) Define the term (f) Answer in one sentence etc.

MODEL QUESTION BANK SEMESTER I

USZO101(COURSE I)

Question bank is suggestive and not exhaustive. The paper setters are free to modify the questions or include new questions to the best of their wisdom

UNIT 1 - (05 Marks)

1. Write a note on echolocation in Dolphins/ Whales
2. Write a short note on : Pearl formation in Mollusca
3. Describe : Mechanism of bioluminescence
4. Enumerate the uses of bioluminescence
5. Describe the uses of bioluminescence for…… (Noctiluca, Glow worm, Firefly, Angler fish, etc.)
6. Write a short note on : Luciferin – Luciferase interaction
7. Describe the process of regeneration in Earthworm
8. What is regeneration? Explain the term with an example
9. What is mimicry? Explain with an example.
10. Describe: mimicry in butterfly
11. Describe briefly the formation of Corals
12. Write a short note on types of coral reefs.
13. Describe needs of migration in birds.
14. Describe briefly, the factors inducing migration in birds.
15. How does Camel adapt itself to the desert environment?
16. Describe parental care and breeding in ……. (Examples of Pisces, Amphibia)
17. Describe briefly: Brood parasite
18. Explain parental care in Duck-billed Platypus

UNIT 2 - (05 Marks/10 Marks)

Questions that could be asked for 10 marks:

1. Explain biodiversity and its importance. What is a biodiversity hotspot? Explain Western Ghats as biodiversity hotspot in India.
2. Explain: Direct use value / Indirect use value
3. Explain biodiversity and its types.
4. Enumerate and explain threats to biodiversity.
5. State the factors which amount to habitat loss.
6. Explain the concept of Man-Wildlife conflict with an example.
7. Give a detailed account on *in situ* hybridization and ex-situ hybridization

8. Describe National Park and state its importance in conservation
9. Describe Sanctuary and state its importance in conservation
10. Give a brief account on biosphere reserve.
11. Give a detailed account on: CBD (Convention on Biological Diversity).
12. Give an account of national biodiversity plan 2002.
13. Describe important clauses of Convention for International Trade of endangered species.

Questions that could be asked for 05 marks:

1. Explain biodiversity and mention its types.
2. Explain biodiversity and give two importance
3. Explain biodiversity hotspot
4. Describe *in situ* conservation strategies.
5. Write note on ex-situ conservation strategies.
6. Give an account of genetic / species / ecosystem biodiversity.
7. Enumerate importance threat to biodiversity.
8. State direct and indirect use value of biodiversity.

UNIT 3 - (10 Marks)

1. Give a detailed account on: ……(Name of the eminent personality) For e.g.: Gadre Fisheries, Kiran Mazumdar Shaw, Baba Amte etc.
2. Describe in detail - ……(Name of the case study)
   For e.g.: Amul white revolution, Biocon, Genetic code etc.
3. Give a detailed account on the contribution made by Dr.Salim Ali in the field of Ornithology.
4. What is white revolution? State contribution of Dr. Verghese Kurian for it.
5. Describe the work of water conservation of Anna Hazare.

MODEL QUESTION BANK SEMESTER I USZO102 (COURSE II)

Question bank is suggestive and not exhaustive. The paper setters are free to modify the questions or include new questions to the best of their wisdom

UNIT I: (5 marks)

1. Describe in brief (Minimum five points)
   a. Good laboratory practices
   b. Chemical hazards in a laboratory
   c. Physical hazards in a laboratory
   d. Biological hazards in a laboratory
   e. Personal hygiene in laboratory
   f. Waste disposal
2. Define and give conversions of the three scales of measuring temperature.
3. Define Molarity. How would you prepare
   a. 1 litre of 0.1 M NaOH solution? (Mol.wt. of NaOH=40)
   b. 100 ml of 1M NaOH
   c. 500 ml of 0.2 M NaOH
4. Define Normality. How would you prepare 1 litre of 2 N NaOH solution?
5. Explain briefly the measures of central tendencies?
6. Define mean, median and mode and explain each with an example.
7. The observations of length (in cm) of 10 fishes are 22, 24, 34, 26, 28, 31, 20, 25, 36, 32. Calculate the arithmetic mean of fish length (in cm).
8. Calculate the arithmetic mean for the following data on fish length by Direct method.

Class interval (length in cm)	5-15	15-25	25-35	35-45	45-55
Frequency (no. of fish)	9	21	40	22	8

9. Calculate the arithmetic mean for the above data on fish length by shortcut method.
10. How do you find the median of the data and state the significance of median?
11. What is mode? How do you calculate mode for ungrouped and grouped data?
12. What is random sampling? State the significance.
13. Explain simple, subdivided and multiple bar diagrams.
14. What is a pie diagram? Write the formula for calculating the angles of degrees for different components.
15. The following data shows the areas in million square miles of the oceans of the world. Construct a pie diagram for the data.

16.

Ocean	Pacific	Atlantic	Indian	Antarctic	Arctic	Total
Area (million sq. miles)	70.8	41.2	28.5	7.6	4.8	152.9

t

Plot a histogram/Bar diagram? Explain how it is constructed.

UNIT 2: (5 marks)

1. Give applications of Biotechnology in the field of Medicine / Fishery / Animal Husbandry.
2. Give the Scope of Biotechnology in different areas as a diagrammatic sketch
3. What is SCID? Name the scientist who discovered the gene therapy for it.
4. In SCID which enzyme does not work properly?
5. Which cells are used for SCID gene therapy?
6. Which gene is defective in SCID?
7. Define transgenesis and mention any two transgenic animals.
8. Ethical issues of transgenesis.
9. Enlist five applications of DNA finger printing.
10. What are green genes? State one application of it.

(10 marks)

1. Describe SCID and its treatment with suitable diagram.
2. Explain various methods of transgenesis.
3. What is Cystic fibrosis? Explain its diagnostic biotechnological method.
4. Define transgenesis and explain retro viral method with its application.

UNIT 3: (10 marks)

1. Describe the components of a compound microscope giving function.

2. Explain the principle and the applications of compound microscope.
3. Discuss in detail the principle, construction and applications of dissecting microscope.
4. Write the principle and applications of
    a. Colorimeter
    b. Centrifuge
    c. Spectroscopy
    d. Compound microscope
    e. Dissecting microscope
5. Explain the principle of centrifugation and add a note on its application.
6. What is pH? Give the principle and applications of pH meter.
7. Describe paper chromatography as a separation technique.
8. Describe Agarose gel electrophoresis. Add a note on its applications.
9. Explain the principle and applications of Polyacrylamide gel electrophoresis.
10. With the help of a diagram, explain the parts of a colorimeter. Discuss the principle and uses.
11. Describe principle and uses of colorimeter.
12. Explain the principle and application of adsorption chromatography.

.

PRACTICALS

USZOP1 (Course I)

Skeleton -Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Q.1. From the given sample mount foraminiferan shells (Minimum three types) (15 Marks)

OR

Mounting of scales (placoid and cycloid/ctenoid) from fishes.

Q.2. Identify the photograph of the given animals and comment on the type of interaction /speciality. (symbiosis, camouflage, cannibalistic mate eating animals and animal architects,bioluminiscence). Any two (10 Marks)

Q.3. Identify giving reasons - Venomous/Non-venomous snake (from photographs). (5 Marks)

Q.4. Identification (one specimen each) (10 Marks)

a. Types of corals

b. Amphibians-breeding and parental care

c. Adaptive radiation in reptiles

d. Types of feathers/ claws in birds

e. Types of beaks in birds

Q.5. Field study report (Biodiversity) and viva on it. (10 Marks)

Semester I

USZOP1 (Course II)

Skeleton -Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Q. 1 Dilute the given sample and estimate the OD using colorimeter (Three dilutions) (15marks)

OR

Calculate concentration from given OD by formula (3 concentrations)

OR

Find pH of water samples (three) and comment on their chemical nature.

OR

Using red cabbage pH indicator, determine pH of the given samples and comment on their chemical nature

OR

Extract fruit juice using pectinase and compare the result with a set without using pectinase.

Q. 2. Perform experiment for separation of pigments by adsorption chromatography. (10Marks)

OR

Perform experiment for separation of mixture of amino acids by paper chromatography

OR

Calculate R_f value and identify the pigment from chromatogram.

OR

Perform Thin Layer Chromatography (TLC) for separation of lipids

Q. 3. Focus the given slide under 10 X and 45 X and show it to examiner. (5 Marks)

OR

Prepare a frequency distribution table / Plot histogram / Pie diagram / Bar diagram from the given data.

Q. 4. Identification (10 Marks)
(Safety Symbols (two), parts of compound microscope, transgenic animals, DNA fingerprinting)

Q. 5. Journal and Viva voce(on practical component) (10 Marks)

SEMESTER-II

USZO201 (Course: 3)

Ecology and Wildlife Management

Unit 1: Population ecology: (15 L)

Objective: *To facilitate the learning of population ecology, its dynamics and regulatory factors important for its sustenance.*

Desired Outcome: *This unit would allow learners to study about nature of animal population, specific factors affecting its growth and its impact on the population of other life form.*

1.1: Population dynamics

- 1.1.1: Population density
- 1.1.2: Natality
- 1.1.3: Mortality
- 1.1.4: Fecundity
- 1.1.5: Age structure
- 1.1.6: Sex ratio
- 1.1.7: Life tables
- 1.1.8: Survivorship curves
- 1.1.9: Population dispersal and distribution patterns
- 1.1.10 Niche concept

1.2: Population growth regulation

- 1.2.1: Intrinsic mechanism – Density dependent fluctuations and oscillations
- 1.2.2: Extrinsic mechanism- Density independent, environmental and climate factors, population interactions

1.3: Population growth pattern

- 1.3.1: Sigmoid
- 1.3.2: J Shaped

1.4: Human census (India) – Concept, mechanism and significance

Unit 2: Ecosystem: (15 L)

Objective: *To impart knowledge of different components of ecosystem and educate about essentials of coexistence of human beings with all other living organisms.*

Desired Outcome: *Learners will grasp the concept of interdependence and interaction of physical, chemical and biological factors in the environment and will lead to better understanding about implications of loss of fauna specifically on human being, erupting spur of desire for conservation of all flora and fauna.*

2.1: Concept of Ecosystems

2.1.1**:** Ecosystem - Definition and components
2.1.2**:** Impact of temperature on biota
2.1.3**:** Biogeochemical cycles (Water, Oxygen, Nitrogen, Sulphur)
2.1.4**:** Fresh water ecosystem – Lentic and Lotic
2.1.5**:** Food chain and food web in ecosystem (Fresh water and Grass land).
2.1.6**:** Ecological pyramids - energy, biomass and number.
2.1.7**:** Animal interactions (commensalism, mutualism, predation, antibiosis, parasitism)

Unit 3: National parks and Sanctuaries of India (15 L)

Objective: *To enlighten learners about the current status of wild life conservation in India in the light of guidelines from different relevant governing agencies vis-à-vis with adversity of poaching and biopiracy.*
Desired Outcome: *Learners would be inspired to choose career options in the field of wild life conservation, research, photography and ecotourism*.

3.1: Concept of Endangered and Critically Endangered species using examples of Indian Wildlife with respect to National Parks and Wildlife

Sanctuaries of India (Sanjay Gandhi National Park, Tadoba Tiger Reserve, Corbett National Park, Kaziranga National Park, Gir National Park, Silent Valley, Pirotan Island Marine Park, Keoladeo Ghana National Park, Bandipur Sanctuary)

3.2: Management strategies with special reference to Tiger and Rhinoceros in India

3.3: Ecotourism

3.4: Biopiracy

SEMESTER-II

Course: 4 [USZO 202]

NUTRITION, PUBLIC HEALTH AND HYGIENE

Unit 1: Nutrition and Health (15 L)

Objective: *To make learners understand the importance of balanced diet and essential nutrients of food at different stages of life.*

Desired Outcome: *Healthy dietary habits would be inculcated in the life style of learners in order to prevent risk of developing health hazards in younger generation due to faulty eating habits*.

1.1**:** Concept of balanced diet, dietary recommendations to a normal adult, infant, pregnant woman and aged.
1.2**:** Malnutrition disorders – Anemia (B_{12} and Iron deficiency), Rickets, Marasmus, Goiter, Kwashiorkar (cause, symptoms, precaution and remedy).
1.3**:** Constipation, piles, starvation, acidity, flatulence, peptic ulcers (cause, symptoms, precaution and remedy).
1.4**:** Obesity (Definition and consequences).
1.5**:** Importance of fibres in food.
1.6**:** Significance of breast feeding.
1.7**:** Swine flu and Dengue (cause, symptoms, precaution and remedy).
1.8**:** BMI calculation and its significance.

Unit 2: Public Health and Hygiene (15 L)

Objective: *To impart knowledge about source, quantum and need for conservation of fast depleting water resource and essentials of maintaining proper sanitation, hygiene and optimizing use of electronic gadgets.*

Desired Outcome: *Promoting optimum conservation of water, encouragement for maintaining adequate personal hygiene, optimum use of electronic gadgets, avoiding addiction, thus facilitating achievement of the goal of healthy young India in true sense.*

2.1: Health

2.1.1**:** Definition of Health, the need for health education and health goal.

2.1.2**:** Physical, psychological and Social health issues.

2.1.3**:** WHO and its programmes - Polio, Small pox, Malaria and Leprosy (concept, brief accounts and outcome with respect to India).

2.1.4: Ill effects of self-medication.

2.2: Water and water supply

2.2.1**:** Sources and properties of water.

2.2.2**:** Purification of water, small scale, medium scale and large scale (rapid sand filters)

2.2.3 **:** Water footprint (concept, brief accounts and significance).

2.3: Hygiene:

2.3.1**:** Hygiene and health factors at home, personal hygiene, oral hygiene and sex hygiene.

2.4: Radiation risk:

2.4.1**:** Mobile Cell tower and electronic gadgets (data of recommended level, effects and precaution).

2.5: First Aid:

2.5.1**:** Dog bite and its treatment.

2.6: Blood bank – Concept and significance

UNIT 3: Common Human Diseases and Disorders (15 L)

Objective: *To educate learners about causes, symptoms and impact of stress related disorders and infectious diseases.*

Desired Outcome: *Learners will be able to promptly recognize stress related problems at initial stages and would be able to adopt relevant solutions which would lead to psychologically strong mind set promoting positive attitude important for academics and would be able to acquire knowledge of cause, symptoms and precautions of infectious diseases*.

3.1: Stress related disorders

3.1.1**:** Hypertension, Diabetes type II, anxiety, insomnia, migraine, depression (cause, symptoms, precaution and remedy)

3.2: Communicable and non-communicable diseases

3.2.1**:** Tuberculosis and Typhoid

3.2.2**:** Hepatitis (A and B), AIDS, Gonorrhea and Syphilis

3.2.3**:** Diseases of respiratory system- Asthma, Bronchitis.

3.2.4: Oral Cancer

(Discuss cause/causative agents, symptoms, diagnostics, precaution /prevention and remedy)

SEMESTER II

Practical USZOP2 (Course III)

1. Interpretation of the given graphs/ tables and comment on pattern of population nature :
   i. Survivorship curve
   ii. Life tables
   iii. Fecundity tables
   iv. Age structure
   v. Sex ratio

2. a) Calculation of Natality, Mortality, Population density from given data
   b) Estimation of population density by capture recapture method

3. Interpretation of Growth curves (Sigmoid and J shaped)

4. Estimation of hardness from given water sample (tap water v/s well water)
5. Estimation of Free carbon dioxide (Free CO_2) from two different samples- aerated drinks(diluted) v/s tap water
6. Identification and interpretation of aquatic and terrestrial (Grassland) food chains and food webs
7. Construction of food chain/food web using given information/data.
8. a) Identification and interpretation of ecological pyramids of energy, biomass and number
   b) Construction of different types of pyramid from given data.

9. Study of the following:
   a) Endangered (Great Indian Bustard, Asiatic lion, Blackbuck, Olive Ridley sea turtle) and critically endangered species (Slender-billed vulture, Gharial, Malabar civet) of Indian wildlife and state reasons for their decline
   b) Study Biodiversity hotspots using world map (Western Ghats and Indo-Burma)
   Study of sanctuaries, national parks, biosphere reserves in India with respect to its brand fauna (as listed in theory)

***Note - The practicals may be conducted by using specimens authorised by the wildlife and such other regulating authorities though it is strongly recommended that the same should be taught by using photographs/audio-visual aids/ simulations / models, etc. as recommended by the UGC and as envisaged in the regulations of the relevant monitoring bodies. No new specimens, however, shall be procured for the purpose of conducting practicals mentioned here-in-above.**

#There shall be at least one excursion/field trip

SEMESTER II

Practical USZOP2 (Course IV)

. 1. Qualitative estimation of Vitamin C by Iodometric method.

2. Study of microscopic structure of starch granules of different cereals (wheat, maize and jowar).

3. a) Estimation of maltose from brown/white bread.
   b) Moisture content from biscuits or other suitable food products.

4. Food adulteration Test:
   a) Milk adulterants (starch and glucose), methylene blue reduction Test (MBRT).
   b) Adulterants in Cheese, Butter, Jaggery, Ghee, Honey, Iodised Salt.

5. a) Estimation of protein content of two egg varieties.
   b) Study of efficacy of different antacids (any two antacids).

6. .Study of Human Parasites

   Endoparasites - Protozoans (*Entamoeba, Plasmodium*),
   Helminths (*Ascaris, Wuchereria*),
   Ectoparasites (Head louse, tick) and Exoparasites (Bed bug, Mosquito).

7. Screening of anaemic/non-anaemic persons using $CuSO_4$ method.

8. First Aid – Demonstration Practical Training for teachers and students to be conducted by the experts from Redcorss, Civil defence, Civic authorities by individual institute or cluster colleges in rotation.

9. BMI analysis - Measurement of Height/ Weight and calculation of BMI using formula, preparation and submission of report. (10 students/ group-50 readings/group)

***Note - The practicals may be conducted by using specimens authorised by the wildlife and such other regulating authorities though it is strongly recommended that the same should be taught by using photographs/audio-visual aids/ simulations / models, etc. as recommended by the UGC and as envisaged in the regulations of the relevant monitoring bodies. No new specimens, however, shall be procured for the purpose of conducting practicals mentioned here-in-above.**

Semester II USZOP2 (Course III)

Skeleton -Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Q.1. Estimate Hardness from given water samples and compare the results. (15 Marks)

OR

Estimate Free CO_2 from given samples and compare the results.

Q.2. Solve the given problems (using statistical approach wherever possible) based on (Any two) (10Marks)

Natality
Mortality
Sex Ratio
Fecundity
Population density

Q.3. Identify brand animals (Min. 4) and place them in their respective National parks/ Sanctuaries on the given map quoting reasons for their decline. (5 Marks)

OR

Mark National parks and Sanctuaries on the map of India and mention the name of their brand animals stating reason for their decline. (Min. 4)

(5 Marks)

OR

Identify endangered and critically endangered animals (photographs) one each and state their reason of decline (5 Marks)

Q.4. Study the given information and give answers on the basis of food chain/food web and ecological pyramids. (10 Marks)

OR

Prepare food chain/food web and ecological pyramid from the given data and give its significance. (10 Marks)

OR

Identify and interpret the given graph/growth curve/age structure and comment on the pattern of population dispersal. (10 Marks)

OR

Determine Population density by capture and recapture method. (10 Marks)

Q.5. Journal and Viva voce (Based on practical component) (10 Marks)

Semester II USZOP2 (Course IV)

Skeleton -Practical Examination Question Paper Pattern

Time: 2 hrs **Marks: 50**

Q.1. Estimate Vitamin C from given sample. (15 Marks)

OR

Estimate Maltose content from bread.

OR

Estimate protein content from two different types of eggs.

Q.2. Analyse the given food sample and identify food adulterants (any 2 samples). (10 Marks)

OR

Evaluate milk quality by Methylene Blue Reduction Test (MBRT).

OR

Determine efficacy of different antacids (any two) on acidic solution.

Q.3. Determine moisture content from biscuits/ any other suitable food product. (5 Marks)

OR

On the basis of microscopic structure of starch granules identify different cereals (any two).

OR

Detect adulterants present in th given milk sample (any two).

OR

Determine whether given blood sample is from anaemic/non-anaemic person using $CuSO_4$ Method and suggest the appropriate diet.

Q.4. Identification (10 Marks)

a) One specimen of Protozoan Parasites.

b) One specimen of Helminth Parasites.

c) One specimen from Ectoparasite

d) One specimen from Exoparasite

e) One specimen from Endoparasite

Q.5. Submission of report of Body Mass Index (viva based on it) (10 Marks)

Note: There shall be at least one excursion/field trip.

USZO201 (Course III)

REFERENCES AND ADDITIONAL READING

1. Introduction to Ecology and Wildlife - University Text Book of Zoology, F.Y.B.Sc. Semester II Course 3. University Press.
2. Fundamentals of Ecology - Eugene P. Odum and Grey W. Barrett, Brook Cole/ Cengage learning
3. Fundamentals of Ecology - M. C. Dash , Tata McGraw Hill company Ltd, New Delhi

18. Public Health Nutrition. Edited - Michael J. Gidney, Barrie M. Margetts, John M. Kearney and Lenore Arab. Willey Blackwell Publication.
19. Food and Nutrition – Vol. I and II - Dr. Swaminathan , Bappco Publication.
20. Textbook of Human Nutrition - Mahtab Bamji, Prahlad Rao.
21. Total Health by Paramjit Rana.

SCHEME OF EXAMINATION THEORY

(a) Internal assessment of twenty five (25) marks per course per semester should be conducted as class test according to the guidelines given by University of Mumbai vide circular number UG/04 of 2014 Dated 5th June 2014 to be implemented from academic year 2014-15.

(b) External assessment of seventy five (75) marks per course per semester should be conducted as per the following skeleton paper pattern.

(c) One practical examination of fifty (50) marks per course each should be conducted at the end of every semester.

SKELETON- EXAMINATION PATTERN FOR THE ABOVE SYLLABUS

All Questions are compulsory

Figures to the right indicate full marks

Time: 2.5 hours **Total marks: 75**

Q.1.	UNIT 1 Answer any four out of eight (5 marks each)	20 marks
Q.2.	UNIT 2 a. Answer any one of the two (10 marks) b. Answer any two out of the four (5 marks each)	20 marks
Q.3.	UNIT 3 Answer any two out of four (10 marks each)	20 marks
Q.4.	a. Unit 1 - (One note of five marks OR objective type questions) b. Unit 2 - (One note of five marks OR objective type questions) c. Unit 3- (One note of five marks OR objective type questions)	15 marks

*For Question 4 it is recommended to have objective questions such as –

(a) Match the column (b) MCQ

(c) Give one word for (d) True and False

(e) Define the term (f) Answer in one sentence etc.

MODEL QUESTION BANK

SEMESTER II

USZO203 (COURSE III)

Question bank is suggestive and not exhaustive. The paper setters are free to modify the questions or include new questions to the best of their wisdom

UNIT 1: (10 marks)

Describe with suitable Example

1. J-Shaped and Sigmoid growth patterns
2. Population dispersal and distribution patterns
3. Natality and Mortality
4. Natality and Fecundity
5. Fecundity and Mortality
6. Density dependant fluctuation and oscillations
7. Population interactions
8. Age structure and population density
9. Concept of niche and its significance in population ecology.

Write notes on / Give a brief account of: (5 marks)

1. Population density
2. Natality
3. Mortality
4. Fecundity
5. Age structure
6. Sex ratio
7. Survivorship curve
8. Sigmoid growth pattern
9. J-shaped growth curve
10. Intrinsic mechanism
11. Extrinsic mechanism
12. Niche
13. Population dispersal and distribution pattern

UNIT 2: (5 marks)

1. Effect of temperature on metabolism

16. Impact of temperature on reproduction
17. Effect of temperature on animal behaviour
18. Define ecosystem and describe any two abiotic factors
19. Define ecosystem and describe any two biotic factors
20. Explain producers / autotrophs
21. Give a brief account of various levels of consumers in an ecosystem
22. Describe in short the inter-relationship between biotic and abiotic factors
23. Describe the following (any one of the cycles can be asked) water cycle, nitrogen cycle and oxygen cycle, sulphur cycle.
24. Explain any one of the following - lake or river
25. Explain food chain from terrestrial or aquatic ecosystem
26. What is food web and explain the same with a suitable example
27. Give a brief account of: Energy pyramid, Pyramid of biomass, Pyramid of numbers.

Unit 3: (10 marks question)

1. State the differences between National park and Wildlife Sanctuary?
2. Write an account of critically endangered species of Indian wildlife with at least two examples.
3. Explain briefly management strategy of any one tiger project in India.
4. Briefly explain management strategy of Rhinoceros project in India.
5. Write in detail about Indian Wildlife (Protection) Act 1972.
6. What is biopiracy? Explain with suitable examples.
7. Write a note on flora and fauna of Sanjay Gandhi national park.
8. Write an account of Tadoba tiger reserve project.
9. Give an account of biodiversity of Jim Corbett national park.
10. Write a note on Ranthambore Tiger reserve.
11. Write in details about Gir Lion project.
12. Write a note on Keoladeo Ghana National park.
13. Write an account of biodiversity of Silent valley.
14. Describe in detail about Bandipur sanctuary.
15. Write a note on ecotourism in India with few examples.

MODEL QUESTION BANK (COURSE IV) SEMESTERII

Question bank is suggestive and not exhaustive. The paper setters are free to modify the questions or include new questions to the best of their wisdom

Unit I (5 marks)

Explain the following:

1. Concept of balanced diet and dietary recommendations of any one of the following:
   a) Normal adult b)Infant c) Pregnant woman d) Aged
2. Cause and symptoms of the following: a) Anemia b) B_{12} deficiency c) Vitamin D deficiency d) Marasmus e) Kwashiorkar f) Goiter, g) Swine flu, h) Dengue
3. Precautions and remedy for all above mentioned health conditions.
4. Significance of breast feeding.
5. Importance of fibres in food.
6. Food adulterants and toxins with two side effects of each.
7. Causes, symptoms, precautions and treatment of a) Constipation, b) Piles, c) Insomnia, d) Starvation, e) Flatulence, f) Peptic ulcer, g) Obesity
8. BMI and its significance.

Unit II (5/10 marks)

Question of 5 marks:

1. Give a brief account and outcome of WHO Programs:
   a) Polio b) Smallpox c) Malaria d) Leprosy
2. a) Explain the concept of health goal and health knowledge.
   b) Enlist different needs of health education.
   c) State five points of social health issues.

Question of 10 marks:

1. Describe sources and properties of water in relation to human consumption.

2. Describe methods of purification of water – small scale, medium scale and large scale.
3. Explain the concept of water footprint and give its significance.
4. Describe disposal of human and animal waste – STP and ETP, its functioning and significance.
5. Give a brief of risk of radiation from mobile cell towers and electronic gadgets.
6. Explain the concepts of physical health, psychological health and myth related to it.
7. Describe the term hygiene and explain in brief health factors related to it at home.
8. Explain personal hygiene, oral hygiene and sex hygiene with significance of each.
9. Describe ill effects of self medication with respect to antibiotics and steroids.
10. Give brief account of first aid symbols.

Unit III (10 marks)

1. Explain causes, symptoms, precautions and remedy
   a) Hypertension b) Diabetes Type II c) Anxiety and Insomnia d) Migraine and depression
2. Explain causes, symptoms, precautions and remedy
   a) Tuberculosis b) Common flu c) Dengue d) Malaria e) Typhoid f) Hepatitis A g) Hepatitis B h) AIDS

UNIVERSITY OF MUMBAI

No. UG/ 9 of 2018-19

CIRCULAR:-

Attention of the Principals of the affiliated Colleges and Directors of the recognized Institutions in Humanities, Sci. & Tech. Faculties is invited to this office Circular No.UG/122 of 2017-18 dated 28th July, 2017 relating to syllabus of the B.A./B.Sc. degree course.

They are hereby informed that the recommendations made by the Board of Studies in Mathematics at its meeting held on 3rd May, 2018 have been accepted by the Academic Council at its meeting held on 5th May, 2018 **vide** item No. 4.71 and that in accordance therewith, the revised syllabus as per the (CBCS) for the T.Y.B.A./T.Y.B.Sc. in Mathematics (Sem. –V) Paper-I Integral Calculas, Paper-III Topology of Metric Spaces and (Sem.VI) Paper-I Basic Complex Analysis, Paper-III Topology of Metric Spaces and Real Analysis, has been brought into force with effect from the academic year 2018-19, accordingly. (The same is available on the University's website www.mu.ac.in).

(Dr. Dinesh Kamble)

with effect from the
academic year 2018-19

SEMESTER V

Multivariable Calculus II				
Course Code	UNIT	TOPICS	Credits	L/Week
USMT 501, UAMT 501	I	Multiple Integrals	2.5	3
	II	Line Integrals		
	III	Surface Integrals		
Linear Algebra				
USMT 502 ,UAMT 502	I	Quotien spaces and Orthogonal Linear Transformations	2.5	3
	II	Eigen values and Eigen vectors		
	III	Diagonalisation		
Topology of Metric Spaces				
USMT 503/UAMT503	I	Metric spaces	2.5	3
	II	Sequences and Complete metric spaces		
	III	Compact Sets		
Numerical Analysis I(Elective A)				
USMT5A4 ,UAMT 5A4	I	Errors Analysis	2.5	3
	II	Transcendental and Polynomial & Equations		
	III	Linear System of Equations		
Number Theory and Its applications I (Elective B)				
USMT5B4 ,UAMT 5B4	I	Congruences and Factorization	2.5	3
	II	Diophantine equations and their & solutions		
	III	Primitive Roots and Cryptography		
Graph Theory (Elective C)				
USMT5C4 ,UAMT 5C4	I	Basics of Graphs	2.5	3
	II	Trees		
	III	Eulerian and Hamiltonian graphs		
Basic Concepts of Probability and Random Variables (Elective D)				
USMT5D4 ,UAMT 5D4	I	Basic Concepts of Probability and Random Variables	2.5	3
	II	Properties of Distribution function, Joint Density function		
	III	Weak Law of Large Numbers		
PRACTICALS				
USMTP05/UAMTP05		Practicals based on USMT501/UAMT 501 and USMT 502/UAMT 502	3	6
USMTP06/UAMTP06		Practicals based on USMT503/ UAMT 503 and USMT5A4/ UAMT 5A4 OR USMT5B4/ UAMT 5B4 OR USMT5C4/ UAMT 5C4 OR USMT5D4/ UAMT 5D4	3	6

SEMESTER VI

BASIC COMPLEX ANALYSIS				
Course Code	UNIT	TOPICS	Credits	L/Week
USMT 601, UAMT 601	I	Introduction to Complex Analysis	2.5	3
	II	Cauchy Integral Formula		
	III	Complex power series, Laurent series and isolated singularities		
ALGEBRA				
USMT 602 ,UAMT 602	I	Group Theory	2.5	3
	II	Ring Theory		
	III	Polynomial Rings and Field theory Homomorphism		
Topology of Metric Spaces and Real Analysis				
USMT 603 / UAMT 603	I	Continuous functions on Metric spaces	2.5	3
	II	Connected sets		
		Sequences and series of functions		
Numerical Analysis II(Elective A)				
USMT6A4 ,UAMT 6A4	I	Interpolation	2.5	3
	II	Polynomial Approximations and Numerical Differentiation		
	III	Numerical Integration		
Number Theory and Its applications II (Elective B)				
USMT6B4 ,UAMT 6B4	I	Quadratic Reciprocity	2.5	3
	II	Continued Fractions		
	III	Pell's equation, Arithmetic function & and Special numbers		
Graph Theory and Combinatorics (Elective C)				
USMT6C4 ,UAMT 6C4	I	Colorings of Graphs	2.5	3
	II	Planar graph		
	III	Combinatorics		
Operations Research (Elective D)				
USMT6D4 ,UAMT 6D4	I	Basic Concepts of Probability and Linear Programming I	2.5	3
	II	Linear Programming II		
	III	Queuing Systems		
PRACTICALS				
USMTP07/ UAMTP07		Practicals based on USMT601/UAMT 601 and USMT 602/UAMT 602	3	6
USMTP08/UAMTP08		Practicals based on USMT603/ UAMT 603 and USMT6A4/ UAMT 6A4 OR USMT6B4/ UAMT 6B4 OR USMT6C4/ UAMT 6C4 OR USMT6D4/ UAMT 6D4	3	6

Note: 1 . USMT501/UAMT501, USMT502/UAMT502, USMT503/UAMT503 are compulsory courses for Semester V.

2 . Candidate has to opt one Elective Course from USMT5A4/UAMT5A4, USMT5B4/UAMT5B4, USMT5C4/UAMT5C4 and USMT5D4/UAMT5D4 for Semester V.

3 . USMT601/UAMT601, USMT602/UAMT602, USMT603/UAMT603 are compulsory courses for Semester VI.

4 . Candidate has to opt one Elective Course from USMT6A4/UAMT6A4, USMT6B4/UAMT6B4, USMT6C4/UAMT6C4 and USMT6D4/UAMT6D4 for Semester VI.

5 . Passing in theory and practical shall be separate.

Teaching Pattern for T.Y.B.Sc/B.A.

1. Three lectures per week per course (1 lecture/period is of 48 minutes duration).
2. One practical of three periods per week per course (1 lecture/period is of 48 minutes duration).

Scheme of Examination

I. **Semester End Theory Examinations:** There will be a Semester-end external Theory examination of 100 marks for each of the courses USMT501/UAMT501, USMT502/UAMT502, USMT503 and USMT5A4 OR USMT5B4 OR USMT5C4 OR USMT 5D4 of Semester V and USMT601/UAMT601, USMT602/UAMT602, USMT603 and USMT6A4 OR USMT6B4 OR USMT 6C4 OR USMT 6D4 of semester VI to be conducted by the University.

1. Duration: The examinations shall be of 3 Hours duration.
2. Theory Question Paper Pattern:
   a) There shall be FIVE questions. The first question Q1 shall be of objective type for 20 marks based on the entire syllabus. The next three questions Q2, Q2, Q3 shall be of 20 marks, each based on the units I, II, III respectively. The fifth question Q5 shall be of 20 marks based on the entire syllabus.
   b) All the questions shall be compulsory. The questions Q2, Q3, Q4, Q5 shall have internal choices within the questions. Including the choices, the marks for each question shall be 30-32.
   c) The questions Q2, Q3, Q4, Q5 may be subdivided into sub-questions as a, b, c, d & e, etc and the allocation of marks depends on the weightage of the topic.
   d) The question Q1 may be subdivided into 10 sub-questions of 2 marks each.

II. **Semester End Examinations Practicals:**
There shall be a Semester-end practical examinations of three hours duration and 100 marks for each of the courses USMTP05/UAMTP05 of Semester V and USMTP06/UAMTP06 of semester VI.

In semester V, the Practical examinations for USMTP05/UAPTP05 and USMTP06/UAMTP06 are conducted by the college.

In semester VI, the Practical examinations for USMTP07/UAMTP07 and USMTP08/UAMTP08 are conducted by the University.

Question Paper pattern:

Paper pattern: The question paper shall have two parts A, B.
Each part shall have two Sections.

Section I Objective in nature: Attempt any Eight out of Twelve multiple choice questions. ($8 \times 3 = 24$ Marks)

Section II Problems: Attempt any Two out of Three. ($8 \times 2 = 16$ Marks)

Practical Course	Part A	Part B	Marks out of	duration
USMTP05/UAMTP05	Questions from USMT501/UAMT501	Questions from USMT502/UAMT502	80	3 hours
USMTP06/UAMTP06	Questions from USMT503/UAMT503	Questions from USMT504/UAMT504	80	2 hours
USMTP07/UAMTP07	Questions from USMT601/UAMT601	Questions from USMT602/UAMT602	80	3 hours
USMTP06/UAMTP08	Questions from USMT603/UAMT603	Questions from USMT604/UAMT604	80	2 hours

Marks for Journals and Viva:
For each course USMT501/UAMT501, USMT502/UAMT502, USMT503/UAMT503, USMT504/UAMT504, USMT601/UAMT601, USMT602/UAMT602 USMT603/UAMT603, and USMT604/UAMT604:

1. Journals: 5 marks.

2. Viva: 5 marks.

Each Practical of every course of Semester V and VI shall contain 10 (ten) problems out of which minimum 05 (five) have to be written in the journal. A student must have a certified journal before appearing for the practical examination.

SEMESTER V
MULTIVARIABLE CALCULUS II
Course Code: USMT501/UAMT501

ALL Results have to be done with proof unless otherwise stated.

Unit I-Multiple Integrals (15L)
Definition of double (resp: triple) integral of a function and bounded on a rectangle (resp:box). Geometric interpretation as area and volume. Fubini's Theorem over rectangles and any closed bounded sets, Iterated Integrals. Basic properties of double and triple integrals proved using the Fubini's theorem such as

(i) Integrability of the sums, scalar multiples, products, and (under suitable conditions) quotients of integrable functions. Formulae for the integrals of sums and scalar multiples of integrable functions.

(ii) Integrability of continuous functions. More generally, Integrability of functions with a "small set of (Here, the notion of "small sets should include finite unions of graphs of continuous functions.)

(iii) Domain additivity of the integral. Integrability and the integral over arbitrary bounded domains. Change of variables formula (Statement only).Polar, cylindrical and spherical coordinates, and integration using these coordinates. Differentiation under the integral sign. Applications to finding the center of gravity and moments of inertia.

References for Unit I:

2. James Stewart , Calculus with early transcendental Functions - Section 15
3. J.E.Marsden and A.J. Tromba, Vector Calculus, Fourth Ed., W.H. Freeman and Co., New York, 1996.Section 5.2 to 5.6.

Unit 2: Line Integrals (15L)

Review of Scalar and Vector fields on $\mathbb{R}^n$, Vector Differential Operators, Gradient, Curl, Divergence.
Paths (parametrized curves) in $\mathbb{R}^n$ (emphasis on $\mathbb{R}^2$ and $\mathbb{R}^3$), Smooth and piecewise smooth paths. Closed paths. Equivalence and orientation preserving equivalence of paths. Definition of the line integral of a vector field over a piecewise smooth path. Basic properties of line integrals including linearity, path-additivity and behavior under a change of parameters. Examples.

Line integrals of the gradient vector field, Fundamental Theorem of Calculus for Line Integrals, Necessary and sufficient conditions for a vector field to be conservative. Greens Theorem (proof in the case of rectangular domains). Applications to evaluation of line integrals.

References for Unit II:

1. Lawrence Corwin and Robert Szczarba ,Multivariable Calculus, Chapter 12.
2. Apostol, Calculus, Vol. 2, Second Ed., John Wiley, New York, 1969 Section 10.1 to 10.5,10.10 to 10.18

4. J.E.Marsden and A.J. Tromba, Vector Calculus, Fourth Ed., W.H. Freeman and Co., New York, 1996. Section 6.1,7.1.7.4.

Unit III: Surface Integrals (15 L)

Parameterized surfaces. Smoothly equivalent parameterizations. Area of such surfaces.
Definition of surface integrals of scalar-valued functions as well as of vector fields defined on a surface.
Curl and divergence of a vector field. Elementary identities involving gradient, curl and divergence.
Stokes Theorem (proof assuming the general from of Greens Theorem). Examples.
Gauss Divergence Theorem (proof only in the case of cubical domains). Examples.

Linear Algebra
Course Code: USMT502/UAMT502

Unit I. Quotient Spaces and Orthogonal Linear Transformations (15L)

Review of vector spaces over $\mathbb{R}$, sub spaces and linear transformation.
Quotient Spaces: For a real vector space V and a subspace W, the cosets $v + W$
and the quotient space V/W , First Isomorphism theorem of real vector spaces (fundamental theorem of homomorphism of vector spaces), Dimension and basis of the quotient space V/W , when V is finite dimensional.

Orthogonal transformations: Isometries of a real finite dimensional inner product space, Translations and Reflections with respect to a hyperplane, Orthogonal matrices over $\mathbb{R}$, Equivalence of orthogonal transformations and isometries fixing origin on a finite dimensional inner product space, Orthogonal transformation of $\mathbb{R}^2$, Any orthogonal transformation in $\mathbb{R}^2$ is a reflection or a rotation, Characterization of isometries as composites of orthogonal transformations and translation. Characteristic polynomial of an $n \times n$ real matrix. Cayley Hamilton Theorem and its Applications (Proof assuming the result $A(\text{adj}A) = I_n$ for an $n \times n$ matrix over the polynomial ring $\mathbb{R}[t]$.

Unit II. Eigenvalues and eigen vectors (15L)

Eigen values and eigen vectors of a linear transformation $T : V \longrightarrow V$, where V is a finite dimensional real vector space and examples, Eigen values and Eigen vectors of n n real matrices, The linear independence of eigenvectors corresponding to distinct eigenvalues of a linear transformation and a Matrix. The characteristic polynomial of an n real matrix and a linear transformation of a finite dimensional real vector space to itself, characteristic roots, Similar

matrices, Relation with change of basis, Invariance of the characteristic polynomial and (hence of the) eigen values of similar matrices, Every square matrix is similar to an upper triangular matrix. Minimal Polynomial of a matrix, Examples like minimal polynomial of scalar matrix, diagonal matrix, similar matrix, Invariant subspaces.

Unit III: Diagonalisation (15L)

Geometric multiplicity and Algebraic multiplicity of eigen values of an $n \times n$ real matrix, An $n \times n$ matrix A is diagonalizable if and only if has a basis of eigenvectors of A if and only if the sum of dimension of eigen spaces of A is n if and only if the algebraic and geometric multiplicities of eigen values of A coincide, Examples of non diagonalizable matrices, Diagonalisation of a linear transformation $T : V \longrightarrow V$, where V is a finite dimensional real vector space and examples. Orthogonal diagonalisation and Quadratic Forms. Diagonalisation of real Symmetric matrices, Examples, Applications to real Quadratic forms, Rank and Signature of a Real Quadratic form, Classification of conics in $\mathbb{R}^2$ and quadric surfaces in $\mathbb{R}^3$. Positive definite and semi definite matrices, Characterization of positive definite matrices in terms of principal minors.

Recommended Books.

5. Inder K Rana, Introduction to Linear Algebra, Ane Books Pvt. Ltd.

Course: Topology of Metric Spaces
Course Code: USMT503/UAMT503

Unit I: Metric spaces (15 L)

Definition, examples of metric spaces $\mathbb{R}, \mathbb{R}^2$,Euclidean space $\mathbb{R}^n$ with its Euclidean, sup and sum metric, $\mathbb{C}$ (complex numbers), the spaces l^1 and l^2 of sequences and the space $C[a, b]$, of real valued continuous functions on $[a, b]$. Discrete metric space.
Distance metric induced by the norm, translation invariance of the metric induced by the norm. Metric subspaces, Product of two metric spaces. Open balls and open set in a metric space, examples of open sets in various metric spaces. Hausdorff property. Interior of a set. Properties of open sets. Structure of an open set in IR. Equivalent metrics.
Distance of a point from a set, between sets ,diameter of a set in a metric space and bounded sets. Closed ball in a metric space, Closed sets- definition, examples. Limit point of a set, isolated point, a closed set contains all its limit points, Closure of a set and boundary of a set.

Unit II: Sequences and Complete metric spaces (15L)

Sequences in a metric space, Convergent sequence in metric space, Cauchy sequence in a metric space, subsequences, examples of convergent and Cauchy sequence in finite metric spaces, $\mathbb{R}^n$ with different metrics and other metric spaces.
Characterization of limit points and closure points in terms of sequences, Definition and examples of relative openness/closeness in subspaces. Dense subsets in a metric space and Separability Definition of complete metric spaces, Examples of complete metric spaces, Completeness property in subspaces, Nested Interval theorem in $\mathbb{R}$, Cantor's Intersection Theorem, Applications of Cantors Intersection Theorem:

(i) The set of real Numbers is uncountable.

(ii) Density of rational Numbers(Between any two real numbers there exists a rational number)

(iii) Intermediate Value theorem: Let $: [a, b]\mathbb{R}$ be continuous, and assume that $f(a)$ and $f(b)$ are of different signs say, $f(a) < 0$ and $f(b) > 0$. Then there exists $c \in (a, b)$ such that $f(c) = 0$.

Unit III: Compact sets 15 lectures

Definition of compact metric space using open cover, examples of compact sets in different metric spaces $\mathbb{R}, \mathbb{R}^2, \mathbb{R}^n$, Properties of compact sets: A compact set is closed and bounded, (Converse is not true). Every infinite bounded subset of compact metric space has a limit point. A closed subset of a compact set is compact. Union and Intersection of Compact sets. Equivalent statements for compact sets in $\mathbb{R}$:

(i) Sequentially compactness property.

(ii) Heine-Borel property: Let be a closed and bounded interval. Let be a family of open intervals such that Then there exists a finite subset such that that is, is contained in the union of a finite number of open intervals of the given family.

(iii) Closed and boundedness property.

(iv) Bolzano-Weierstrass property: Every bounded sequence of real numbers has a convergent subsequence.

Course: Numerical Analysis I (Elective A)
Course Code: USMT5A4/UAMT5A4

N.B. Derivations and geometrical interpretation of all numerical methods have to be covered.

Unit I. Errors Analysis and Transcendental & Polynomial Equations (15L)
Measures of Errors: Relative, absolute and percentage errors. Types of errors: Inherent error, Round-off error and Truncation error. Taylors series example. Significant digits and numerical stability. Concept of simple and multiple roots. Iterative methods, error tolerance, use of intermediate value theorem. Iteration methods based on first degree equation: Newton-Raphson method, Secant method, Regula-Falsi method, Iteration Method. Condition of convergence and Rate of convergence of all above methods.

Unit II. Transcendental and Polynomial Equations (15L)
Iteration methods based on second degree equation: Muller method, Chebyshev method, Multipoint iteration method. Iterative methods for polynomial equations; Descarts rule of signs, Birge-Vieta method, Bairstrow method. Methods for multiple roots. Newton-Raphson method. System of non-linear equations by Newton- Raphson method. Methods for complex roots. Condition of convergence and Rate of convergence of all above methods.

Unit III. Linear System of Equations (15L)
Matrix representation of linear system of equations. Direct methods: Gauss elimination method.

Pivot element, Partial and complete pivoting, Forward and backward substitution method, Triangularization methods-Doolittle and Crouts method, Choleskys method. Error analysis of direct methods. Iteration methods: Jacobi iteration method, Gauss-Siedal method. Convergence analysis of iterative method. Eigen value problem, Jacobis method for symmetric matrices Power method to determine largest eigenvalue and eigenvector.

6. Scarborough James B., Numerical Mathematical Analysis, Oxford University Press, New Delhi.

Course: Number Theory and its applications I (Elective B)
Course Code: USMT5B4 / UAMT5B4

Unit I. Congruences and Factorization (15L)

Review of Divisibility, Primes and The fundamental theorem of Arithmetic.
Congruences : Definition and elementary properties, Complete residue system modulo m, Reduced residue system modulo m , Euler's function and its properties, Fermat's little Theorem, Euler's generalization of Fermat's little Theorem, Wilson's theorem, Linear congruence, The Chinese remainder Theorem, Congruences ofHillgher degree, The Fermat-Kraitchik Factorization Method.

Unit II. Diophantine equations and their solutions (15L)

The linear equations $ax + by = c$. The equations $x^2 + y^2 = p$, where p is a prime. The equation $x^2 + y^2 = z^2$, Pythagorean triples, primitive solutions, The equations $x^4 + y^4 = z^2$ and $x^4 + y^4 = z^4$ have no solutions $(x; y; z)$ with $xyz \neq 0$. Every positive integer n can be expressed as sum of squares of four integers, Universal quadratic forms $x^2+y^2+z^2+t^2$. Assorted examples :section 5.4 of Number theory by Niven- Zuckermann-Montgomery.

Unit III. Primitive Roots and Cryptography (15L)

Order of an integer and Primitive Roots. Basic notions such as encryption (enciphering) and decryption (deciphering), Cryptosystems, symmetric key cryptography, Simple examples such as shift cipher, Affine cipher,Hillll's cipher, Vigenere cipher. Concept of Public Key Cryptosystem; RSA Algorithm. An application of Primitive Roots to Cryptography.

9. William Stalling. Cryptology and network security.

Course: Graph Theory (Elective C)
Course Code: USMT5C4 / UAMT5C4

Unit I. Basics of Graphs (15L)

Definition of general graph, Directed and undirected graph, Simple and multiple graph, Types of graphs- Complete graph, Null graph, Complementary graphs, Regular graphs Sub graph of a graph, Vertex and Edge induced sub graphs, Spanning sub graphs. Basic terminology- degree of a vertex, Minimum and maximum degree, Walk, Trail, Circuit, Path, Cycle. Handshaking theorem and its applications, Isomorphism between the graphs and consequences of isomorphism between the graphs, Self complementary graphs, Connected graphs, Connected components. Matrices associated with the graphs Adjacency and Incidence matrix of a graph- properties, Bipartite graphs and characterization in terms of cycle lengths. Degree sequence and Havel-Hakimi theorem, Distance in a graph- shortest path problems, Dijkstra's algorithm.

Unit II. Trees (15L)

Cut edges and cut vertices and relevant results, Characterization of cut edge, Definition of a tree and its characterizations, Spanning tree, Recurrence relation of spanning trees and Cayley formula for spanning trees of Kn , Algorithms for spanning tree-BFS and DFS, Binary and m-ary tree, Prefix codes and Huffman coding, Weighted graphs and minimal spanning trees - Kruskal's algorithm for minimal spanning trees.

Unit III. Eulerian and Hamiltonian graphs (15L)

Eulerian graph and its characterization- Fleury's Algorithm-(Chinese postman problem), Hamiltonian graph, Necessary condition for Hamiltonian graphs using G- S where S is a proper subset of V(G), Sufficient condition for Hamiltonian graphs- Ore's theorem and Dirac's theorem, Hamiltonian closure of a graph, Cube graphs and properties like regular, bipartite, Connected and Hamiltonian nature of cube graph, Line graph of graph and simple results.

Recommended Books.

1. Bondy and Murty Grapgh, Theory with Applications.
2. Balkrishnan and Ranganathan, Graph theory and applications.
3. West D G. , Graph theory.

Additional Reference Book.

1. Behzad and Chartrand Graph theory.
2. Choudam S. A., Introductory Graph theory.

Course: Basic Concepts of Probability and Random Variables (Elective D)
Course Code: USMT5D4 / UAMT5D4

Unit I. Basic Concepts of Probability and Random Variables.(15 L)
Basic Concepts: Algebra of events including countable unions and intersections, Sigma field $\mathcal{F}$, Probability measure$P$ on $\mathcal{F}$, Probability Space as a triple $(\Omega, \mathcal{F}, P)$, Properties of P including Subadditivity. Discrete Probability Space, Independence and Conditional Probability, Theorem of Total Probability. Random Variable on $(\Omega, \mathcal{F}, P)$ Definition as a measurable function, Classification of random variables - Discrete Random variable, Probability function, Distribution function, Density function and Probability measure on Borel subsets of $\mathbb{R}$, Absolutely continuous random variable. Function of a random variable; Result on a random variable R with distribution function F to be absolutely continuous, Assume F is continuous everywhere and has a continuous derivative at all points except possibly at finite number of points, Result on density function f_2 of R_2 where $R_2 = g(R_1), h_j$ is inverse of g over a suitable subinterval $f_2(y) + \sum_{i=1}^{n} f_1(h_j(y))|h_j'(y)|$ under suitable conditions.

Reference for Unit 1, Sections 1.1-1.6, 2.1-2.5 of Basic Probability theory by Robert Ash, Dover Publication, 2008.

Unit II. Properties of Distribution function, Joint Density function (15L) Properties of distribution function F, F is non-decreasing, $\lim_{x \longrightarrow \infty} F(x) = 1$, $\lim_{x \longrightarrow \infty} F(x) = 0$, Right continuity of F, $\lim_{x \longrightarrow x_0} F(x) = P(\{R < x_o\}, P(\{R = x_o\}) = F(x_o)F(\overline{x_0})$. Joint distribution, Joint Density, Results on Relationship between Joint and Individual densities, Related result for Independent random variables. Examples of distributions like Binomial, Poisson and Normal distribution. Expectation and $k-$th moments of a random variable with properties.

Reference for Unit II:
Sections 2.5-2.7, 2.9, 3.2-3.3,3.6 of Basic Probability theory by Robert Ash, Dover Publication, 2008.

Unit III. Weak Law of Large Numbers
Joint Moments, Joint Central Moments, Schwarz Inequality, Bounds on Correlation Coefficient ρ ,Result on ρ as a measure of linear dependence, $\text{Var}\Big(\sum_{i=1}^{n} R_i\Big) = \sum_{i=1}^{n} Var(R_i) + 2 \sum_{i=1 \le i < j \le n}^{n} \text{Cov}(R_i, R_j)$, Method of Indicators to find expectation of a random variable, Chebyshevs Inequality, Weak

law of Large numbers.

Reference for Unit III
Sections 3.4, 3.5, 3.7, 4.1-4.4 of Basic Probability theory by Robert Ash, Dover Publication, 2008.

Additional Reference Books. Marek Capinski, Probability through Problems, Springer.

Course: Practicals (Based on USMT501 / UAMT501 and USMT502 / UAMT502)
Course Code: USMTP05 / UAMTP05

Suggested Practicals (Based on USMT501 / UAMT501)

1. Evaluation of double and triple integrals.
2. Change of variables in double and triple integrals and applications
3. Line integrals of scalar and vector fields
4. Greens theorem, conservative field and applications
5. Evaluation of surface integrals
6. Stokes and Gauss divergence theorem
7. Miscellaneous theory questions on units 1, 2 and 3.

Suggested Practicals (Based on USMT502 / UAMT502)

1. Quotient Spaces, Orthogonal Transformations.
2. Cayley Hamilton Theorem and Applications
3. Eigen Values & Eigen Vectors of a linear Transformation/ Square Matrices
4. Similar Matrices, Minimal Polynomial, Invariant Subspaces
5. Diagonalisation of a matrix
6. Orthogonal Diagonalisation and Quadratic Forms.
7. Miscellaneous Theory Questions

Course: Practicals (Based on USMT503 / UAMT503 and USMT5A4 / UAMT5A4 OR USMT5B4 / UAMT5B4 OR USMT5C4 / UAMT5C4 OR USMT5D4 / UAMT5D4)
Course Code: USMTP06 / UAMTP06

Suggested Practicals USMT503 / UAMT503:

1. Examples of Metric Spaces, Normed Linear Spaces,
2. Sketching of Open Balls in IR2, Open and Closed sets, Equivalent Metrics
3. Subspaces, Interior points, Limit Points, Dense Sets and Separability, Diameter of a set, Closure.

4. Limit Points ,Sequences , Bounded , Convergent and Cauchy Sequences in a Metric Space
5. Complete Metric Spaces and Applications
6. Examples of Compact Sets
7. Miscellaneous Theory Questions

Suggested Practicals on USMT5A4 / UAMT5A4
The Practicals should be performed using non-programmable scientific calculator. (The use of programming language like C or Mathematical Software like Mathematica, Matlab, MuPad, and Maple may be encouraged).

1. Newton-Raphson method, Secant method, Regula-Falsi method, Iteration Method
2. Muller method, Chebyshev method, Multipoint iteration method
3. Descarts rule of signs, Birge-Vieta method, Bairstrow method
4. Gauss elimination method, Forward and backward substitution method,
5. Triangularization methods-Doolittles and Crouts method, Choleskys method
6. Jacobi iteration method, Gauss-Siedal method
7. Eigen value problem: Jacobis method for symmetric matrices and Power method to determine largest eigenvalue and eigenvector

Suggested Practicals based on USMT5B4 / UAMT5B4

1. Congruences.
2. Linear congruences and congruences of Hilgher degree.
3. Linear diophantine equation.
4. Pythagorean triples and sum of squares.
5. Cryptosystems (Private Key).
6. Cryptosystems (Public Key) and primitive roots.
7. Miscellaneous theoretical questions based on full USMT5B4 / UAMT5B4.

Suggested Practicals based on USMT5C4 / UAMT5C4

1. Handshaking Lemma and Isomorphism.
2. Degree sequence and Dijkstra's algorithm
3. Trees, Cayley Formula
4. Applications of Trees
5. Eulerian Graphs.
6. Hamiltonian Graphs.

7. Miscellaneous Problems.

Suggested Practicals based on USMT5D4 / UAMT5D4

1. Basic concepts of Probability (Algebra of events, Probability space, Probability measure, combinatorial problems)
2. Conditional Probability, Random variable (Independence of events. Definition, Classification and function of a random variable)
3. Distribution function, Joint Density function
4. Expectation of a random variable, Normal distribution
5. Method of Indicators, Weak law of large numbers
6. Conditional density, Conditional expectation
7. Miscellaneous Theoretical questions based on full paper

SEMESTER VI
BASIC COMPLEX ANALYSIS
Course Code: USMT501/UAMT501

Unit I: Introduction to Complex Analysis (15 Lectures)

Review of complex numbers: Complex plane, polar coordinates, exponential map, powers and roots of complex numbers, De Moivres formula, $\mathbb{C}$ as a metric space, bounded and unbounded sets, point at infinity-extended complex plane, sketching of set in complex plane (No questions to be asked).

Limit at a point, theorems on limits, convergence of sequences of complex numbers and results using properties of real sequences. Functions $f : \mathbb{C} \longrightarrow \mathbb{C}$, real and imaginary part of functions, continuity at a point and algebra of continuous functions. Derivative of $f : \mathbb{C} \longrightarrow \mathbb{C}$, comparison between differentiability in real and complex sense, Cauchy-Riemann equations, sufficient conditions for differentiability, analytic function, f, g analytic then $f + g, f - g, fg$ and f/g are analytic, chain rule.

Theorem: If $f(z) = 0$ everywhere in a domain D, then $f(z)$ must be constant throughout D
Harmonic functions and harmonic conjugate.

Unit II: Cauchy Integral Formula (15 Lectures)

Explain how to evaluate the line integral $\int f(z)\, dz$ over $|z-z_0| = r$ and prove the Cauchy integral formula : If f is analytic in $B(z_0, r)$ then for any w in $B(z_0, r)$ we have $f(w) = \dfrac{1}{2\pi i} \int \dfrac{f(z)}{z - w}\, dz$, over $|z - z_0| = r$.

Taylors theorem for analytic function , Mobius transformations: definition and examples
Exponential function, its properties, trigonometric function, hyperbolic functions.

Unit III: Complex power series, Laurent series and isolated singularities. (15 Lectures)

Power series of complex numbers and related results following from Unit I, radius of convergences, disc of convergence, uniqueness of series representation, examples.

Definition of Laurent series , Definition of isolated singularity, statement (without proof) of existence of Laurent series expansion in neighbourhood of an isolated singularity, type of isolated singularities viz. removable, pole and essential defined using Laurent series expansion, examples Statement of Residue theorem and calculation of residue.

1. J.W. Brown and R.V. Churchill, Complex analysis and Applications : Sections 18, 19, 20, 21, 23, 24, 25, 28, 33, 34, 47, 48, 53, 54, 55 , Chapter 5, page 231 section 65, define residue of a function at a pole using Theorem in section 66 page 234, Statement of Cauchys residue theorem on page 225, section 71 and 72 from chapter 7.

Other References:

1. Robert E. Greene and Steven G. Krantz, Function theory of one complex variable
2. T.W. Gamelin, Complex analysis

Course: Algebra
Course Code: USMT602 / UAMT602

Unit I. Group Theory (15L)
Review of Groups, Subgroups, Abelian groups, Order of a group, Finite and infinite groups, Cyclic groups, The Center Z(G) of a group G, Cosets, Lagranges theorem, Group homomorphisms, isomorphisms, automorphisms, inner automorphisms (No questions to be asked)

Normal subgroups: Normal subgroups of a group, definition and examples including center of a group, Quotient group, Alternating group A_n, Cycles. Listing normal subgroups of A_4, S_3. First Isomorphism theorem (or Fundamental Theorem of homomorphisms of groups), Second Isomorphism theorem, third Isomorphism theorem, Cayleys theorem, External direct product of a group, Properties of external direct products, Order of an element in a direct product, criterion for direct product to be cyclic, Classification of groups of order ≤ 7.

Unit II. Ring Theory (15L)
Motivation: Integers & Polynomials.
Definitions of a ring (The definition should include the existence of a unity element), zero divisor, unit, the multiplicative group of units of a ring. Basic Properties & examples of rings, including $\mathbb{Z}, \mathbb{Q}, \mathbb{R}, \mathbb{C}, Mn(\mathbb{R}), \mathbb{Q}[X], \mathbb{R}[X], \mathbb{C}[X], \mathbb{Z}[i], \mathbb{Z}[\sqrt{2}], \mathbb{Z}[\sqrt{-5}], \mathbb{Z}_n$.
Definitions of Commutative ring, integral domain (ID), Division ring, examples. Theorem such as: A commutative ring R is an integral domain if and only if for $a, b, c \in R$ with $a \neq 0$ the relation $ab = ac$ implies that $b = c$. Definitions of Subring, examples. Ring homomorphisms, Properties of ring homomorphisms, Kernel of ring homomorphism, Ideals, Operations on ideals and Quotient rings, examples. Factor theorem and First and second Isomorphism theorems for rings, Correspondence Theorem for rings: (If $f : R \longrightarrow R'$ is a surjective ring homomorphism, then there is a $1-1$ correspondence between the ideals of R containing the ker f and the ideals of R. Definitions of characteristic of a ring, Characteristic of an ID.

Unit III. Polynomial Rings and Field theory (15L)
Principal ideal, maximal ideal, prime ideal, the characterization of the prime and maximal ideals

in terms of quotient rings. Polynomial rings, R[X] when R is an integral domain/ Field. Divisibility in Integral Domain, Definitions of associates, irreducible and primes. Prime (irreducible) elements in $\mathbb{R}[X], \mathbb{Q}[X], \mathbb{Z}_p[X]$. Eisensteins criterion for irreducibility of a polynomial over $\mathbb{Z}$. Prime and maximal ideals in polynomial rings. Definition of field, subfield and examples, characteristic of fields. Any field is an ID and a finite ID is a field. Characterization of fields in terms of maximal ideals, irreducible polynomials. Construction of quotient field of an integral domain (Emphasis on $\mathbb{Z}, \mathbb{Q}$). A field contains a subfield isomorphic to $\mathbb{Z}_p$ or $\mathbb{Q}$.

Course: Topology of Metric Spaces and Real Analysis
Course Code: USMT603/ UAMT603

Unit I: Continuous functions on metric spaces (15 L) Epsilon-delta definition of continuity at a point of a function from one metric space to another. Characterization of continuity at a point in terms of sequences, open sets and closed sets and examples, Algebra of continuous real valued functions on a metric space. Continuity of composite continuous function. Continuous image of compact set is compact, Uniform continuity in a metric space, definition and examples (emphasis on $\mathbb{R}$). Let (X, d) and (Y, d) be metric spaces and $f : X \longrightarrow Y$ be continuous. If (X, d) is compact metric, then $f : X \longrightarrow Y$ is uniformly continuous.
Contraction mapping and fixed point theorem, Applications.

Unit II: Connected sets: (15L)
Separated sets- Definition and examples, disconnected sets, disconnected and connected metric spaces, Connected subsets of a metric space, Connected subsets of $\mathbb{R}$. A subset of $\mathbb{R}$ is connected if and only if it is an interval. A continuous image of a connected set is connected. Characterization of a connected space, viz. a metric space is connected if and only if every continuous function from X to $\{1, -1\}$ is a constant function. Path connectedness in Rn, definition and examples. A path connected subset of Rn is connected, convex sets are path connected. Connected components. An example of a connected subset of Rn which is not path connected.

Unit III : Sequence and series of functions:(15 lectures)
Sequence of functions - pointwise and uniform convergence of sequences of real- valued functions, examples. Uniform convergence implies pointwise convergence, example to show converse not true, series of functions, convergence of series of functions, Weierstrass M-test. Examples. Properties of uniform convergence: Continuity of the uniform limit of a sequence of continuous function, conditions under which integral and the derivative of sequence of functions converge to the integral and derivative of uniform limit on a closed and bounded interval. Examples. Consequences of these properties for series of functions, term by term differentiation and integration. Power series in $\mathbb{R}$ centered at origin and at some point in $\mathbb{R}$, radius of convergence, region (interval) of convergence, uniform convergence, term by-term differentiation and integration of power series, Examples. Uniqueness of series representation, functions represented by power series, classical functions defined by power series such as exponential, cosine and sine functions, the basic properties of these functions.

Course: Numerical Analysis II (Elective A)
Course Code: USMT6A4 / UAMT6A4

N.B. Derivations and geometrical interpretation of all numerical methods with theorem mentioned have to be covered.

Unit I. Interpolation (15L)
Interpolating polynomials, Uniqueness of interpolating polynomials. Linear, Quadratic andHillgher order interpolation. Lagranges Interpolation. Finite difference operators: Shift operator, forward, backward and central difference operator, Average operator and relation between them. Difference table, Relation between difference and derivatives. Interpolating polynomials using finite differences Gregory-Newton forward difference interpolation, Gregory-Newton backward difference interpolation, Stirlings Interpolation. Results on interpolation error.

Unit II. Polynomial Approximations and Numerical Differentiation (15L)
Piecewise Interpolation: Linear, Quadratic and Cubic. Bivariate Interpolation: Lagranges Bivariate Interpolation, Newtons Bivariate Interpolation. Numerical differentiation: Numerical differentiation based on Interpolation, Numerical differentiation based on finite differences (forward, backward and central), Numerical Partial differentiation.

Unit III. Numerical Integration (15L)
Numerical Integration based on Interpolation. Newton-Cotes Methods, Trapezoidal rule, Simpson's 1/3rd rule, Simpson's 3/8th rule. Determination of error term for all above methods. Convergence of numerical integration: Necessary and sufficient condition (with proof). Composite integration methods; Trapezoidal rule, Simpson's rule.

Course: Number Theory and its applications II (Elective B)
Course Code: USMT6B4 / UAMT6B4

Unit I. Quadratic Reciprocity (15 L)

Quadratic residues and Legendre Symbol, Gausss Lemma, Theorem on Legendre Symbol $\left(\frac{2}{p}\right)$, the result: If p is an odd prime and a is an odd integer with $(a,p)=1$ then $\left(\frac{a}{p}\right)=(-1)^t$ where $t=\sum_{k=1}^{\frac{p-1}{2}}\left[\frac{ka}{p}\right]$, Quadratic Reciprocity law. Theorem on Legendre Symbol $\left(\frac{3}{p}\right)$. The Jacobi Symbol and law of reciprocity for Jacobi Symbol. Quadratic Congruences with Composite moduli.

Unit II. Continued Fractions (15 L)

Finite continued fractions. Infinite continued fractions and representation of an irrational number by an infinite simple continued fraction, Rational approximations to irrational numbers and order of convergence, Best possible approximations. Periodic continued fractions.

Unit III. Pells equation, Arithmetic function and Special numbers (15 L)

Pell's equation $x^2dy^2=n$, where d is not a square of an integer. Solutions of Pell's equation (The proofs of convergence theorems to be omitted). Arithmetic functions of number theory: $d(n)(or\tau(n)), \sigma(n), \sigma_k(n), \omega(n)$ and their properties, $\mu(n)$ and the Mbius inversion formula. Special numbers: Fermat numbers, Mersenne numbers, Perfect numbers, Amicable numbers, Pseudo primes, Carmichael numbers.

Recommended Books

1. Niven, H. Zuckerman and H. Montogomery. An Introduction to the Theory of Numbers. John Wiley & Sons. Inc.
2. David M. Burton. An Introduction to the Theory of Numbers. Tata McGraw-Hill Edition.
3. G. H. Hardy and E.M. Wright. An Introduction to the Theory of Numbers. Low priced edition. The English Language Book Society and Oxford University Press, 1981.

9. William Stalling. Cryptology and network security.

Course: Graph Theory and Combinatorics (Elective C)
Course Code: USMT6C4 /UAMT6C4

Unit I. Colorings of graph (15L)

Vertex coloring- evaluation of vertex chromatic number of some standard graphs, critical graph. Upper and lower bounds of Vertex chromatic Number- Statement of Brooks theorem. Edge coloring- Evaluation of edge chromatic number of standard graphs such as complete graph, complete bipartite graph, cycle. Statement of Vizing Theorem. Chromatic polynomial of graphs- Recurrence Relation and properties of Chromatic polynomials. Vertex and Edge cuts vertex and edge connectivity and the relation between vertex and edge connectivity. Equality of vertex and edge connectivity of cubic graphs. Whitney's theorem on 2-vertex connected graphs.

Unit II. Planar graph (15L)

Definition of planar graph. Euler formula and its consequences. Non planarity of $K5; K(3; 3)$. Dual of a graph. Polyhedran in $\mathbb{R}^3$ and existence of exactly five regular polyhedra- (Platonic solids) Colorabilty of planar graphs- 5 color theorem for planar graphs, statement of 4 color theorem. Networks and flow and cut in a network- value of a flow and the capacity of cut in a network, relation between flow and cut. Maximal flow and minimal cut in a network and Ford-Fulkerson theorem.

Unit III. Combinatorics (15L)

Applications of Inclusion Exclusion Principle- Rook polynomial, Forbidden position problems Introduction to partial fractions and using Newtons binomial theorem for real power find series, expansion of some standard functions. Forming recurrence relation and getting a generating function. Solving a recurrence relation using ordinary generating functions. System of Distinct Representatives and Hall's theorem of SDR. Introduction to matching, M alternating and M augmenting path, Berge theorem. Bipartite graphs.

Recommended Books.

1. Bondy and Murty Grapgh, Theory with Applications.
2. Balkrishnan and Ranganathan, Graph theory and applications. 3 West D G. , Graph theory.
3. Richard Brualdi, Introduction to Combinatorics.

Additional Reference Book.

1. Behzad and Chartrand Graph theory.
2. Choudam S. A., Introductory Graph theory. 3 Cohen, Combinatorics.

Course: Operations Research Elective D)
Course Code: USMT6D4 / UAMT6D4

Unit I. Linear Programming-I (15L)

Prerequisites: Vector Space, Linear independence and dependence, Basis, Convex sets, Dimension of polyhedron, Faces.

Formation of LPP, Graphical Method. Theory of the Simplex Method- Standard form of LPP, Feasible solution to basic feasible solution, Improving BFS, Optimality Condition, Unbounded solution, Alternative optima, Correspondence between BFS and extreme points. Simplex Method Simplex Algorithm, Simplex Tableau.

Reference for unit I

1. G. Hadley, Linear Programming, Narosa Publishing, (Chapter 3).

Unit II. Linear programming-II (15L)

Simplex Method Case of Degeneracy, Big-M Method, Infeasible solution, Alternate solution, Solution of LPP for unrestricted variable. Transportation Problem: Formation of TP, Concepts of solution, feasible solution, Finding Initial Basic Feasible Solution by North West Corner Method, Matrix Minima Method, Vogels Approximation Method. Optimal Solution by MODI method, Unbalanced and maximization type of TP.

Reference for Unit II

1. G. Hadley, Linear Programming, Narosa Publishing, (Chapter 4 and 9).

2. J. K. Sharma, Operations Research, Theory and Applications, (Chapter 4, 9).

Unit III. Queuing Systems (15L)

Elements of Queuing Model, Role of Exponential Distribution. Pure Birth and Death Models; Generalized Poisson Queuing Mode. Specialized Poisson Queues: Steady- state Measures of Performance, Single Server Models, Multiple Server Models, Self- service Model, Machine-servicing Model.

Reference for Unit III:

1. J. K. Sharma, Operations Research, Theory and Applications.

2. H. A. Taha, Operations Research, Prentice Hall of India.

Additional Reference Books:

1. Hillier and Lieberman, Introduction to Operations Research.

2. Richard Broson, Schaum Series Book in Operations Research, Tata McGrawHill Publishing Company Ltd.

Course: Practicals (Based on USMT601 / UAMT601 and USMT602 / UAMT602)
Course Code: USMTP07 / UAMTP07

Suggested Practicals (Based on USMT601 / UAMT601):

1. Limit continuity and derivatives of functions of complex variables,

2. Steriographic Projection , Analytic function, finding harmonic conjugate,

3. Contour Integral, Cauchy Integral Formula ,Mobius transformations

4. Taylors Theorem , Exponential , Trigonometric, Hyperbolic functions

5. Power Series , Radius of Convergence, Laurents Series

6. Finding isolated singularities- removable, pole and essential, Cauchy Residue theorem.
7. Miscellaneous theory questions.

Suggested Practicals (Based on USMT602 / UAMT602)

1. Normal Subgroups and quotient groups.
2. Cayleys Theorem and external direct product of groups.
3. Rings, Subrings, Ideals, Ring Homomorphism and Isomorphism
4. Prime Ideals and Maximal Ideals
5. Polynomial Rings
6. Fields.
7. Miscellaneous Theoretical questions on Unit 1, 2 and 3.

Course: Practicals (Based on USMT603 / UAMT603 and USMT6A4 / UAMT6A4 OR USMT6B4 / UAMT6B4 OR USMT6C4 / UAMT6C4 OR USMT6D4 / UAMT6D4)
Course Code: USMTP08 / UAMTP08

Suggested practicals Based on USMT603 / UAMT603:

1 Continuity in a Metric Spaces

2 Uniform Continuity, Contraction maps, Fixed point theorem

3 Connected Sets , Connected Metric Spaces

4 Path Connectedness, Convex sets, Continuity and Connectedness

5 Pointwise and uniform convergence of sequence functions, properties

6 Point wise and uniform convergence of series of functions and properties

7 Miscellaneous Theory Questions

Suggested Practicals based on USMT6A4 / UAMT6A4

The Practicals should be performed using non-programmable scientific calculator. (The use of programming language like C or Mathematical Software like Mathematica, Matlab, MuPad, and Maple may be encouraged).

1 Linear, Quadratic andHillgher order interpolation, Interpolating polynomial by Lagranges Interpolation

2 Interpolating polynomial by Gregory-Newton forward and backward difference Interpolation and Stirling Interpolation.

3 Bivariate Interpolation: Lagranges Interpolation and Newtons Interpolation

4 Numerical differentiation: Finite differences (forward, backward and central), Numerical Partial differentiation

5 Numerical differentiation and Integration based on Interpolation

6 Numerical Integration: Trapezoidal rule, Simpsons 1/3rd rule, Simpsons 3/8th rule

7 Composite integration methods: Trapezoidal rule, Simpsons rule.

Suggested Practicals based on USMT6B4 / UAMT6B4

1. Legendre Symbol.
2. Jacobi Symbol and Quadratic congruences with composite moduli.
3. Finite continued fractions.
4. Infinite continued fractions.
5. Pells equations and Arithmetic functions of number theory.
6. Special Numbers.
7. Miscellaneous Theoretical questions based on full USMT6B4 / UAMT6B4.

Suggested Practicals based on USMT6C4 / UAMT6C4

1. Coloring of Graphs
2. Chromatic polynomials and connectivity.
3. Planar graphs
4. Flow theory.
5. Inclusion Exclusion Principle and Recurrence relation.
6. SDR and Mathching.
7. Miscellaneous theoretical questions.

Suggested Practicals based on USMT6D4 / UAMT6D4
All practicals to be done manually as well as using software TORA / EXCEL solver.

1. LPP formation, graphical method and simple problems on theory of simplex method
2. LPP Simplex Method
3. Big-M method, special cases of solutions.
4. Transportation Problem
5. Queuing Theory; single server models
6. Queuing Theory; multiple server models
7. Miscellaneous Theory Questions.

Skill Enhancement Courses (SEC)

5.Foundation Course in NCC - I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction to NCC, Nation-al Integration & Awareness	10
2	Drill: Foot Drill	10
3	Adventure Training, Environment Awareness and Conservation	10
4	Personality Development and Leadership	10
5	Specialized Subject: Army/ Navy/ Air	05
	Total	**45**

Sr. No.	Modules / Units
1	**Introduction to NCC, National Integration & Awareness**
	Desired outcome: The students will display sense of patriotism, secular values and shall be transformed into motivated youth who will contribute towards nation building through national unity and social cohesion. • Genesis, Aims, Objectives of NCC & NCC Song • Organisation& Training • Incentives & Benefits • Religions, Culture, Traditions and Customs of India • National Integration: Importance and Necessity • Freedom Struggle
2	**Drill: Foot Drill**
	Desired outcome: The students will demonstrate the sense of discipline, improve bearing, smartness, turnout, develop the quality of immediate and implicit obedience of orders, with good reflexes. • General and Words of Command • Attention, Stand at Ease and Stand Easy, Turning and Inclining at the Halt • Sizing, Forming Up in Three Ranks and Numbering, Open and Close Order March and Dressing • Saluting at the Halt, Getting On Parade, Dismissing and Falling Out • Marching, Length of Pace and Time of Marching in Quick Time and Halt, Slow March and Halt • Turning on the March and Wheeling. • Saluting on the March. • Formation of squad and Squad Drill.
3	**Adventure Training, Environment Awareness and Conservation**
	Adventure Training **Desired outcome**: The students will overcome fear & inculcate within them the sense of adventure , sportsmanship , espirit-d-corp and develop confidence , courage , determination, diligence and quest for excellence. • Any Two such as – Obstacle course, Slithering, Trekking, Cycling, Rock Climbing, Para Sailing, Sailing,Scuba Diving etc **Environment Awareness and Conservation** Desired outcome: The student will be aware of the conservation of natural resources and protection of environment. • Natural Resources – Conservation and Management • Water Conservation and Rainwater Harvesting

Sr. No.	Modules / Units
4	**Personality Development and Leadership**
	Desired outcome: The student will develop an all-round personality with adequate leadership traits to deal / contribute effectively in life. • Introduction to Personality Development • Factors Influencing /Shaping Personality: Physical, Social, Physiological, Philosophical and Psychological • Self Awareness Know yourself/ Insight • Change Your Mind Set • Communication Skills: Group Discussion / Lecturettes (Public Speaking) • Leadership Traits • Types of Leadership
5	**Specialized Subject: Army Or Navy Or Air**
	<u>Army</u> **Desired outcome:** The training shall instill patriotism, commitment and passion to serve the nation motivating the youth to join the defence forces. It will also acquaint, expose & provide basic knowledge about armed, naval and air-force subjects **A. Armed Force** • Basic organisation of Armed Forces • Organisation of Army • Badges and Ranks **B. Introduction to Infantry and weapons and equipments** • Characteristics of 7.62mm SLR Rifle, Ammunition, Fire power, Stripping, Assembling and Cleaning **C. Military history** • Biographies of renowned Generals (Carriapa / Sam Manekshaw) • Indian Army War Heroes- PVCs **D. Communication** • Types of Communications • Characteristics of Wireless Technologies (Mobile, Wi-Fi etc.) ***OR*** **<u>Navy</u>** **A. Naval orientation and service subjects** • History of the Indian Navy-Pre and Post Independence, Gallantry award winners • Organization of Navy- NHQ, Commands, Fleets, Ships and shore establishments • Types of Warships and their role • Organization of Army and Air Force- Operational and Training commands • Ranks of Officers and Sailors, Equivalent Ranks in the Three Services **B. Ship and Boat Modelling** • Principles of Ship Modelling • Maintenance and Care of tools

Sr. No.	Modules / Units
	C. Search and Rescue • SAR Organization in the Indian ocean **D. Swimming** Floating for three minutes and Free style swimming for 50 meters ***OR*** **AIR** **A. General Service Knowledge** • Development of Aviation • History of IAF **B. Principles of Flight** • Introduction • Laws of Motion • Glossary of Terms. **C. Airmanship** • Introduction • Airfield Layout • Rules of the Air • Circuit Procedure • ATC/RT Procedures • Aviation Medicine **D. Aero- Engines** • Introduction to Aero-engines

Revised Syllabus of Courses of B.Com. (Financial Management) Programme at Semester I with Effect from the Academic Year 2016-2017

5.Foundation Course in Physical Education - I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction to Basic Relevant concepts in Physical Education	10
2	Components of Physical Fitness	15
3	Testing Physical Fitness	10
4	Effect of Exercise on various Body System	10
	Total	**45**

Sr. No.	Modules / Units
1	**Introduction to Basic Relevant concepts in Physical Education**
	• Dimensions and determinants of Health, Fitness & Wellness • Concept of Physical Education and its importance • Concept of Physical Fitness and its types • Concept of Physical Activity, exercise and its types & benefits
2	**Components of Physical Fitness**
	• Concept of components of Physical Fitness • Concept and components of HRPF • Concept and components of SRPF • Importance of Physical Education in developing physical fitness components.
3	**Testing Physical Fitness**
	• Tests for measuring Cardiovascular Endurance • Tests for measuring Muscular Strength& Endurance • Tests for measuring Flexibility • Tests for measuring Body Composition
4	**Effect of Exercise on various Body System**
	• Effect of exercises on Musculoskeletal system • Effect of exercises on Circulatory System • Effect of exercises on Respiratory System • Effect of exercises on Glandular System

Revised Syllabus of Courses of B.Com. (Financial Management) Programme at Semester I with Effect from the Academic Year 2016-2017

Core Courses (CC)

6.Business Environment

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Business and its Environment	15
2	Business and Society	15
3	Contemporary Issues	15
4	International Environment	15
	Total	**60**

Sr. No.	Modules / Units
1	**Business and its Environment**
	a) Business Objectives, Dynamics of Business and its Environment, Types of Business Environment b) Environmental Analysis: Importance, Factors, PESTEL Analysis, SWOT Analysis
2	**Business and Society**
	a) Business Ethics: Nature and Scope of Ethics, Ethical Dilemmas, Corporate Culture and Ethical Climate b) Development of Business Entrepreneurship: Entrepreneurship and Economic Development, Micro, Small and Medium Enterprises Development (MSMED) Act, 2006, Entrepreneurship as a Career Option c) Consumerism and Consumer Protection: Consumerism in India, Consumer Protection Act 1986
3	**Contemporary Issues**
	a) Corporate Social Responsibility and Corporate Governance: Social Responsibility of Business, Ecology and Business, Carbon Credit b) Social Audit: Evolution of Social Audit, Benefits of Social Audit, Social Audit v/s Commercial Audit

Core Courses (CC)

7.Business Economics –I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction	10
2	Demand Analysis	10
3	Supply and Production Decisions and Cost of Production	15
4	Market structure: Perfect competition and Monopoly and Pricing and Output Decisions under Imperfect Competition	15
5	Pricing Practices	10
	Total	**60**

Sr. No.	Modules / Units
1	**Introduction**
	Scope and Importance of Business Economics - basic tools- Opportunity Cost principle- Incremental and Marginal Concepts. Basic economic relations - functional relations: equations- Total, Average and Marginal relations- use of Marginal analysis in decision making, The basics of market demand, market supply and equilibrium price- shifts in the demand and supply curves and equilibrium
2	**Demand Analysis**
	Demand Function - nature of demand curve under different markets Meaning, significance, types and measurement of elasticity of demand (Price, income cross and promotional)- relationship between elasticity of demand and revenue concepts **Demand estimation and forecasting:** Meaning and significance - methods of demand estimation: survey and statistical methods *(numerical illustrations on trend analysis and simple linear regression)*
3	**Supply and Production Decisions and Cost of Production**
	Production function: short run analysis with Law of Variable Proportions- Production function with two variable inputs- isoquants, ridge lines and least cost combination of inputs- Long run production function and Laws of Returns to Scale - expansion path - Economies and diseconomies of Scale. **Cost concepts:** Accounting cost and economic cost, implicit and explicit cost, fixed and variable cost - total, average and marginal cost - Cost Output Relationship in the Short Run and Long Run *(hypothetical numerical problems to be discussed)*, LAC and Learning curve - Break even analysis *(with business applications)*
4	**Market structure: Perfect competition and Monopoly and Pricing and Output Decisions under Imperfect Competition**
	Short run and long run equilibrium of a competitive firm and of industry - monopoly - short run and long- run equilibrium of a firm under Monopoly **Monopolistic competition:**Equilibrium of a firm under monopolistic competition, debate over role of advertising *(topics to be taught using case studies from real life examples)* **Oligopolistic markets:** key attributes of oligopoly - Collusive and non collusive oligopoly market - Price rigidity - Cartels and price leadership models *(with practical examples)*
5	**Pricing Practices**
	Cost oriented pricing methods: cost – plus (full cost) pricing, marginal cost pricing, Mark up pricing, discriminating pricing, multiple – product pricing - transfer pricing *(case studies on how pricing methods are used in business world)*

Revised Syllabus of Courses of B.Com. (Financial Management) Programme at Semester I and II with effect from the Academic Year 2016-2017

Scheme of Evaluation

The performance of the learners will be evaluated in two Components. One component will be the Internal Assessment component carrying 25% marks and the second component will be the Semester-wise End Examination component carrying 75% marks. The allocation of marks for the Internal Assessment and Semester End Examinations will be as shown below:-

A) Internal Assessment: **25 %**

Question Paper Pattern
(Internal Assessment- Courses without Practical Courses)

Sr. No.	Particular	Marks
1	**One class test (20 Marks)**	
	Match the Column/ Fill in the Blanks/ Multiple Choice Questions ***(½ Mark each)***	05 Marks
	Answer in One or Two Lines (Concept based Questions) ***(01 Mark each)***	05 Marks
	Answer in Brief (Attempt Any Two of the Three) ***(05 Marks each)***	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

Question Paper Pattern
(Internal Assessment- Courses with Practical Courses)

Sr. No.	Particular	Marks
1	**Semester End Practical Examination (20 Marks)**	
	Journal	05 Marks
	Viva	05 Marks
	Laboratory Work	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

B) Semester End Examination: 75 %

i) Duration: The examination shall be of 2 ½ Hours duration

ii) Theory question paper pattern

- There shall be five questions each of 15 marks.
- All questions shall be compulsory with internal choice within the questions.
- Question may be subdivided into sub-questions a, b, c… and the allocation of marks depends on the weightage of the topic.
  (Detail question paper pattern has been given separately)

Passing Standard

The learners to pass a course shall have to obtain a minimum of 40% marks in aggregate for each course where the course consists of Internal Assessment and Semester End Examination. The learners shall obtain minimum of 40% marks (i.e. 10 out of 25) in the Internal Assessment and 40% marks in Semester End Examination (i.e. 30 Out of 75) separately, to pass the course and minimum of Grade E to pass a particular semester A learner will be said to have passed the course if the learner passes the Internal Assessment and Semester End Examination together.

Question Paper Pattern

(Practical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 ½ Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Practical question of 15 marks may be divided into two sub questions of 7/8 and 10/5 Marks. If the topic demands, instead of practical questions, appropriate theory question may be asked.

Question Paper Pattern
(Theoretical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 ½ Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Theory question of 15 marks may be divided into two sub questions of 7/8 and 10/5 Marks.

	Indian Constitution Features of Indian Constitution - Provisions related to social integrity and development **Social Justice** Social Justice- the concept and its features Inclusive growth- the concept and its features
4	**Human Personality and National Integration**
	Dimensions of human personality Social Dimension of Human personality- Understanding of the socity Physical Dimension of Human personality- Physical Exercise, Yoga, etc. **National integration & Communal Harmony** National Integration- its meaning, importance and practice Communal Harmony- its meaning, importance and practice

Revised Syllabus of Courses of B.Com. (Financial Management) Programme at Semester I with Effect from the Academic Year 2016-2017

Skill Enhancement Courses (SEC)

5.Foundation Course in NCC - I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction to NCC, Nation-al Integration & Awareness	10
2	Drill: Foot Drill	10
3	Adventure Training, Environment Awareness and Conservation	10
4	Personality Development and Leadership	10
5	Specialized Subject: Army/ Navy/ Air	05
	Total	**45**

Sr. No.	Modules / Units
1	**Introduction to NCC, National Integration & Awareness**
	Desired outcome: The students will display sense of patriotism, secular values and shall be transformed into motivated youth who will contribute towards nation building through national unity and social cohesion. • Genesis, Aims, Objectives of NCC & NCC Song • Organisation& Training • Incentives & Benefits • Religions, Culture, Traditions and Customs of India • National Integration: Importance and Necessity • Freedom Struggle
2	**Drill: Foot Drill**
	Desired outcome: The students will demonstrate the sense of discipline, improve bearing, smartness, turnout, develop the quality of immediate and implicit obedience of orders, with good reflexes. • General and Words of Command • Attention, Stand at Ease and Stand Easy, Turning and Inclining at the Halt • Sizing, Forming Up in Three Ranks and Numbering, Open and Close Order March and Dressing • Saluting at the Halt, Getting On Parade, Dismissing and Falling Out • Marching, Length of Pace and Time of Marching in Quick Time and Halt, Slow March and Halt • Turning on the March and Wheeling. • Saluting on the March. • Formation of squad and Squad Drill.
3	**Adventure Training, Environment Awareness and Conservation**
	Adventure Training **Desired outcome**: The students will overcome fear & inculcate within them the sense of adventure , sportsmanship , espirit-d-corp and develop confidence , courage , determination, diligence and quest for excellence. • Any Two such as – Obstacle course, Slithering, Trekking, Cycling, Rock Climbing, Para Sailing, Sailing,Scuba Diving etc **Environment Awareness and Conservation** Desired outcome: The student will be aware of the conservation of natural resources and protection of environment. • Natural Resources – Conservation and Management • Water Conservation and Rainwater Harvesting

Sr. No.	Modules / Units
4	**Personality Development and Leadership**
	Desired outcome: The student will develop an all-round personality with adequate leadership traits to deal / contribute effectively in life. • Introduction to Personality Development • Factors Influencing /Shaping Personality: Physical, Social, Physiological, Philosophical and Psychological • Self Awareness Know yourself/ Insight • Change Your Mind Set • Communication Skills: Group Discussion / Lecturettes (Public Speaking) • Leadership Traits • Types of Leadership
5	**Specialized Subject: Army Or Navy Or Air**
	<u>Army</u> **Desired outcome:** The training shall instill patriotism, commitment and passion to serve the nation motivating the youth to join the defence forces. It will also acquaint, expose & provide basic knowledge about armed, naval and air-force subjects **A. Armed Force** • Basic organisation of Armed Forces • Organisation of Army • Badges and Ranks **B. Introduction to Infantry and weapons and equipments** • Characteristics of 7.62mm SLR Rifle, Ammunition, Fire power, Stripping, Assembling and Cleaning **C. Military history** • Biographies of renowned Generals (Carriapa / Sam Manekshaw) • Indian Army War Heroes- PVCs **D. Communication** • Types of Communications • Characteristics of Wireless Technologies (Mobile, Wi-Fi etc.) ***OR*** **<u>Navy</u>** **A. Naval orientation and service subjects** • History of the Indian Navy-Pre and Post Independence, Gallantry award winners • Organization of Navy- NHQ, Commands, Fleets, Ships and shore establishments • Types of Warships and their role • Organization of Army and Air Force- Operational and Training commands • Ranks of Officers and Sailors, Equivalent Ranks in the Three Services **B. Ship and Boat Modelling** • Principles of Ship Modelling • Maintenance and Care of tools

Sr. No.	Modules / Units
	C. Search and Rescue • SAR Organization in the Indian ocean **D. Swimming** Floating for three minutes and Free style swimming for 50 meters ***OR*** **AIR** **A. General Service Knowledge** • Development of Aviation • History of IAF **B. Principles of Flight** • Introduction • Laws of Motion • Glossary of Terms. **C. Airmanship** • Introduction • Airfield Layout • Rules of the Air • Circuit Procedure • ATC/RT Procedures • Aviation Medicine **D. Aero- Engines** • Introduction to Aero-engines

Revised Syllabus of Courses of B.Com. (Financial Management) Programme at Semester I with Effect from the Academic Year 2016-2017

5.Foundation Course in Physical Education - I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction to Basic Relevant concepts in Physical Education	10
2	Components of Physical Fitness	15
3	Testing Physical Fitness	10
4	Effect of Exercise on various Body System	10
	Total	**45**

Sr. No.	Modules / Units
1	**Introduction to Basic Relevant concepts in Physical Education**
	• Dimensions and determinants of Health, Fitness & Wellness • Concept of Physical Education and its importance • Concept of Physical Fitness and its types • Concept of Physical Activity, exercise and its types & benefits
2	**Components of Physical Fitness**
	• Concept of components of Physical Fitness • Concept and components of HRPF • Concept and components of SRPF • Importance of Physical Education in developing physical fitness components.
3	**Testing Physical Fitness**
	• Tests for measuring Cardiovascular Endurance • Tests for measuring Muscular Strength& Endurance • Tests for measuring Flexibility • Tests for measuring Body Composition
4	**Effect of Exercise on various Body System**
	• Effect of exercises on Musculoskeletal system • Effect of exercises on Circulatory System • Effect of exercises on Respiratory System • Effect of exercises on Glandular System

Revised Syllabus of Courses of B.Com. (Financial Management) Programme at Semester I with Effect from the Academic Year 2016-2017

Core Courses (CC)

6.Business Environment

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Business and its Environment	15
2	Business and Society	15
3	Contemporary Issues	15
4	International Environment	15
	Total	**60**

Sr. No.	Modules / Units
1	**Business and its Environment**
	a) Business Objectives, Dynamics of Business and its Environment, Types of Business Environment b) Environmental Analysis: Importance, Factors, PESTEL Analysis, SWOT Analysis
2	**Business and Society**
	a) Business Ethics: Nature and Scope of Ethics, Ethical Dilemmas, Corporate Culture and Ethical Climate b) Development of Business Entrepreneurship: Entrepreneurship and Economic Development, Micro, Small and Medium Enterprises Development (MSMED) Act, 2006, Entrepreneurship as a Career Option c) Consumerism and Consumer Protection: Consumerism in India, Consumer Protection Act 1986
3	**Contemporary Issues**
	a) Corporate Social Responsibility and Corporate Governance: Social Responsibility of Business, Ecology and Business, Carbon Credit b) Social Audit: Evolution of Social Audit, Benefits of Social Audit, Social Audit v/s Commercial Audit
4	**International Environment**
	a) Strategies for going Global: MNCs and TNCs, WTO b) Foreign Trade in India- Balance of Trade, FDI Investment Flows and its Implication for Indian Industries

Revised Syllabus of Courses of B.Com. (Financial Management) Programme at Semester I with Effect from the Academic Year 2016-2017

Core Courses (CC)

7.Business Economics –I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction	10
2	Demand Analysis	10
3	Supply and Production Decisions and Cost of Production	15
4	Market structure: Perfect competition and Monopoly and Pricing and Output Decisions under Imperfect Competition	15
5	Pricing Practices	10
	Total	**60**

Sr. No.	Modules / Units
1	**Introduction**
	Scope and Importance of Business Economics - basic tools- Opportunity Cost principle- Incremental and Marginal Concepts. Basic economic relations - functional relations: equations- Total, Average and Marginal relations- use of Marginal analysis in decision making, The basics of market demand, market supply and equilibrium price- shifts in the demand and supply curves and equilibrium
2	**Demand Analysis**
	Demand Function - nature of demand curve under different markets Meaning, significance, types and measurement of elasticity of demand (Price, income cross and promotional)- relationship between elasticity of demand and revenue concepts **Demand estimation and forecasting:** Meaning and significance - methods of demand estimation: survey and statistical methods *(numerical illustrations on trend analysis and simple linear regression)*
3	**Supply and Production Decisions and Cost of Production**
	Production function: short run analysis with Law of Variable Proportions- Production function with two variable inputs- isoquants, ridge lines and least cost combination of inputs- Long run production function and Laws of Returns to Scale - expansion path - Economies and diseconomies of Scale. **Cost concepts:** Accounting cost and economic cost, implicit and explicit cost, fixed and variable cost - total, average and marginal cost - Cost Output Relationship in the Short Run and Long Run *(hypothetical numerical problems to be discussed)*, LAC and Learning curve - Break even analysis *(with business applications)*
4	**Market structure: Perfect competition and Monopoly and Pricing and Output Decisions under Imperfect Competition**
	Short run and long run equilibrium of a competitive firm and of industry - monopoly - short run and long- run equilibrium of a firm under Monopoly **Monopolistic competition:**Equilibrium of a firm under monopolistic competition, debate over role of advertising *(topics to be taught using case studies from real life examples)* **Oligopolistic markets:** key attributes of oligopoly - Collusive and non collusive oligopoly market - Price rigidity - Cartels and price leadership models *(with practical examples)*
5	**Pricing Practices**
	Cost oriented pricing methods: cost – plus (full cost) pricing, marginal cost pricing, Mark up pricing, discriminating pricing, multiple – product pricing - transfer pricing *(case studies on how pricing methods are used in business world)*

2. Business Statistics

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Population and sample	15
2	Measures of Central tendency	15
3	Measures of Dispersion	15
4	Correlation and regression (for ungrouped data)	15
	Total	**60**

Sr. No.	Modules / Units
1	**Population and sample**
	Definition of statistics, scope of statistics in Management and financial markets, Concept of population and sample with illustration Methods of sampling- SRSWR, SRSWOR, stratified, systematic (description of sampling procedures only) Data condensation and graphical methods: Raw data, attributes and variables, classification, frequency distribution, cumulative frequency distribution Graphs- Histogram and frequency polygon Diagrams- Multiple bar, pie, subdivided bar
2	**Measures of Central tendency**
	Criteria for good measures of central tendency, arithmetic mean, median mode for grouped and ungrouped data, combined mean
3	**Measures of Dispersion**
	Concept of dispersion, absolute and relative measures of dispersion, range variance, standard deviation, coefficient of variation, quartile deviation, coefficient of quartile deviation
4	**Correlation and regression (for ungrouped data)**
	Concept of correlation, positive and negative correlation, Karl Pearson's Coefficient of Correlation, meaning of regression, two regression equations, Regression coefficients and properties

Revised Syllabus of Courses of B.Com. (Accounting and Finance) Programme at Semester II with Effect from the Academic Year 2016-2017

Elective Courses (EC)

3. Principles of Finance

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction to Finance and Financial Planning	15
2	Capital Structure and Capitalisation	15
3	External Sources of Finance	15
4	Internal Sources of Finance	15
	Total	**60**

Sr. No.	Modules / Units

Revised Syllabus of Courses of B.Com. (Financial Management) Programme at Semester I and II with effect from the Academic Year 2016-2017

Scheme of Evaluation

The performance of the learners will be evaluated in two Components. One component will be the Internal Assessment component carrying 25% marks and the second component will be the Semester-wise End Examination component carrying 75% marks. The allocation of marks for the Internal Assessment and Semester End Examinations will be as shown below:-

A) Internal Assessment: **25 %**

Question Paper Pattern
(Internal Assessment- Courses without Practical Courses)

Sr. No.	Particular	Marks
1	**One class test (20 Marks)**	
	Match the Column/ Fill in the Blanks/ Multiple Choice Questions ***(½ Mark each)***	05 Marks
	Answer in One or Two Lines (Concept based Questions) ***(01 Mark each)***	05 Marks
	Answer in Brief (Attempt Any Two of the Three) ***(05 Marks each)***	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

Question Paper Pattern
(Internal Assessment- Courses with Practical Courses)

Sr. No.	Particular	Marks
1	**Semester End Practical Examination (20 Marks)**	
	Journal	05 Marks
	Viva	05 Marks
	Laboratory Work	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

B) Semester End Examination: 75 %

i) Duration: The examination shall be of 2 ½ Hours duration

ii) Theory question paper pattern

- There shall be five questions each of 15 marks.
- All questions shall be compulsory with internal choice within the questions.
- Question may be subdivided into sub-questions a, b, c… and the allocation of marks depends on the weightage of the topic.
  (Detail question paper pattern has been given separately)

Passing Standard

The learners to pass a course shall have to obtain a minimum of 40% marks in aggregate for each course where the course consists of Internal Assessment and Semester End Examination. The learners shall obtain minimum of 40% marks (i.e. 10 out of 25) in the Internal Assessment and 40% marks in Semester End Examination (i.e. 30 Out of 75) separately, to pass the course and minimum of Grade E to pass a particular semester A learner will be said to have passed the course if the learner passes the Internal Assessment and Semester End Examination together.

Question Paper Pattern

(Practical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 ½ Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Practical question of 15 marks may be divided into two sub questions of 7/8 and 10/5 Marks. If the topic demands, instead of practical questions, appropriate theory question may be asked.

Question Paper Pattern
(Theoretical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 ½ Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Theory question of 15 marks may be divided into two sub questions of 7/8 and 10/5 Marks.

UNIVERSITY OF MUMBAI
No. UG/ 106 of 2016-17

Core Courses (CC)

7.Business Economics - I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction	10
2	Demand Analysis	10
3	Supply and Production Decisions and Cost of Production	15
4	Market structure: Perfect competition and Monopoly and Pricing and Output Decisions under Imperfect Competition	15
5	Pricing Practices	10
	Total	**60**

Sr. No.	Modules / Units
1	**Introduction**
	Scope and Importance of Business Economics - basic tools- Opportunity Cost principle- Incremental and Marginal Concepts. Basic economic relations - functional relations: equations- Total, Average and Marginal relations- use of Marginal analysis in decision making, The basics of market demand, market supply and equilibrium price- shifts in the demand and supply curves and equilibrium
2	**Demand Analysis**
	Demand Function - nature of demand curve under different markets Meaning, significance, types and measurement of elasticity of demand (Price, income cross and promotional)- relationship between elasticity of demand and revenue concepts **Demand estimation and forecasting:** Meaning and significance - methods of demand estimation : survey and statistical methods *(numerical illustrations on trend analysis and simple linear regression)*
3	**Supply and Production Decisions and Cost of Production**
	Production function: short run analysis with Law of Variable Proportions- Production function with two variable inputs- isoquants, ridge lines and least cost combination of inputs- Long run production function and Laws of Returns to Scale - expansion path - Economies and diseconomies of Scale. **Cost concepts:** Accounting cost and economic cost, implicit and explicit cost, fixed and variable cost - total, average and marginal cost - Cost Output Relationship in the Short Run and Long Run *(hypothetical numerical problems to be discussed)*, LAC and Learning curve - Break even analysis *(with business applications)*
4	**Market structure: Perfect competition and Monopoly and Pricing and Output Decisions under Imperfect Competition**
	Short run and long run equilibrium of a competitive firm and of industry - monopoly - short run and long- run equilibrium of a firm under Monopoly **Monopolistic competition:**Equilibrium of a firm under monopolistic competition, debate over role of advertising *(topics to be taught using case studies from real life examples)* **Oligopolistic markets:** key attributes of oligopoly - Collusive and non collusive oligopoly market - Price rigidity - Cartels and price leadership models *(with practical examples)*
5	**Pricing Practices**
	Cost oriented pricing methods: cost – plus (full cost) pricing, marginal cost pricing, Mark up pricing, discriminating pricing, multiple – product pricing - transfer pricing *(case studies on how pricing methods are used in business world)*

Revised Syllabus of Courses of B.Com.(Accounting and Finance) Programme at Semester I and II with effect from the Academic Year 2016-2017

Scheme of Evaluation

The performance of the learners will be evaluated in two Components. One component will be the Internal Assessment component carrying 25% marks and the second component will be the Semester-wise End Examination component carrying 75% marks. The allocation of marks for the Internal Assessment and Semester End Examinations will be as shown below:-

A) Internal Assessment: **25 %**

Question Paper Pattern
(Internal Assessment- Courses without Practical Courses)

Sr. No.	Particular	Marks
1	**One class test (20 Marks)**	
	Match the Column/ Fill in the Blanks/ Multiple Choice Questions ***(½ Mark each)***	05 Marks
	Answer in One or Two Lines (Concept based Questions) ***(01 Mark each)***	05 Marks
	Answer in Brief (Attempt Any Two of the Three) ***(05 Marks each)***	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

Question Paper Pattern
(Internal Assessment- Courses with Practical Courses)

Sr. No.	Particular	Marks
1	**Semester End Practical Examination (20 Marks)**	
	Journal	05 Marks
	Viva	05 Marks
	Laboratory Work	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

B) Semester End Examination: 75 %

i) Duration: The examination shall be of 2 ½ Hours duration

ii) Theory question paper pattern

- There shall be five questions each of 15 marks.
- All questions shall be compulsory with internal choice within the questions.
- Question may be subdivided into sub-questions a, b, c… and the allocation of marks depends on the weightage of the topic.
  (Detail question paper pattern has been given separately)

Passing Standard

The learners to pass a course shall have to obtain a minimum of 40% marks in aggregate for each course where the course consists of Internal Assessment and Semester End Examination. The learners shall obtain minimum of 40% marks (i.e. 10 out of 25) in the Internal Assessment and 40% marks in Semester End Examination (i.e. 30 Out of 75) separately, to pass the course and minimum of Grade E to pass a particular semester A learner will be said to have passed the course if the learner passes the Internal Assessment and Semester End Examination together.

Question Paper Pattern

(Practical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 ½ Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Practical question of 15 marks may be divided into two sub questions of 7/8 and 10/5 Marks. If the topic demands, instead of practical questions, appropriate theory question may be asked.

Question Paper Pattern
(Theoretical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 ½ Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks

Skill Enhancement Courses (SEC)

5.Foundation Course in NCC - I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction to NCC, National Integration & Awareness	10
2	Drill: Foot Drill	10
3	Adventure Training, Environment Awareness and Conservation	10
4	Personality Development and Leadership	10
5	Specialized Subject: Army/ Navy/ Air	05
	Total	**45**

Sr. No.	Modules / Units
1	**Introduction to NCC, National Integration & Awareness**
	Desired outcome: The students will display sense of patriotism, secular values and shall be transformed into motivated youth who will contribute towards nation building through national unity and social cohesion. • Genesis, Aims, Objectives of NCC & NCC Song • Organisation& Training • Incentives & Benefits • Religions, Culture, Traditions and Customs of India • National Integration: Importance and Necessity • Freedom Struggle
2	**Drill: Foot Drill**
	Desired outcome: The students will demonstrate the sense of discipline, improve bearing, smartness, turnout, develop the quality of immediate and implicit obedience of orders, with good reflexes. • General and Words of Command • Attention, Stand at Ease and Stand Easy, Turning and Inclining at the Halt • Sizing, Forming Up in Three Ranks and Numbering, Open and Close Order March and Dressing • Saluting at the Halt, Getting On Parade, Dismissing and Falling Out • Marching, Length of Pace and Time of Marching in Quick Time and Halt, Slow March and Halt • Turning on the March and Wheeling. • Saluting on the March. • Formation of squad and Squad Drill.
3	**Adventure Training, Environment Awareness and Conservation**
	Adventure Training **Desired outcome**: The students will overcome fear & inculcate within them the sense of adventure , sportsmanship , espirit-d-corp and develop confidence , courage , determination, diligence and quest for excellence. • Any Two such as – Obstacle course, Slithering, Trekking, Cycling, Rock Climbing, Para Sailing, Sailing,Scuba Diving etc **Environment Awareness and Conservation** Desired outcome: The student will be aware of the conservation of natural resources and protection of environment. • Natural Resources – Conservation and Management • Water Conservation and Rainwater Harvesting

Sr. No.	Modules / Units
4	**Personality Development and Leadership**
	Desired outcome: The student will develop an all-round personality with adequate leadership traits to deal / contribute effectively in life. • Introduction to Personality Development • Factors Influencing /Shaping Personality: Physical, Social, Physiological, Philosophical and Psychological • Self Awareness Know yourself/ Insight • Change Your Mind Set • Communication Skills: Group Discussion / Lecturettes (Public Speaking) • Leadership Traits • Types of Leadership
5	**Specialized Subject: Army Or Navy Or Air**
	Army **Desired outcome:** The training shall instill patriotism, commitment and passion to serve the nation motivating the youth to join the defence forces. It will also acquaint, expose & provide basic knowledge about armed, naval and air-force subjects **A. Armed Force** • Basic organisation of Armed Forces • Organisation of Army • Badges and Ranks **B. Introduction to Infantry and weapons and equipments** • Characteristics of 7.62mm SLR Rifle, Ammunition, Fire power, Stripping, Assembling and Cleaning **C. Military history** • Biographies of renowned Generals (Carriapa / Sam Manekshaw) • Indian Army War Heroes- PVCs **D. Communication** • Types of Communications • Characteristics of Wireless Technologies (Mobile, Wi-Fi etc.) ***OR*** **Navy** **A. Naval orientation and service subjects** • History of the Indian Navy-Pre and Post Independence, Gallantry award winners • Organization of Navy- NHQ, Commands, Fleets, Ships and shore establishments • Types of Warships and their role • Organization of Army and Air Force- Operational and Training commands • Ranks of Officers and Sailors, Equivalent Ranks in the Three Services **B. Ship and Boat Modelling** • Principles of Ship Modelling • Maintenance and Care of tools

Sr. No.	Modules / Units
	C. Search and Rescue • SAR Organization in the Indian ocean **D. Swimming** Floating for three minutes and Free style swimming for 50 meters ***OR*** **AIR** **A. General Service Knowledge** • Development of Aviation • History of IAF **B. Principles of Flight** • Introduction • Laws of Motion • Glossary of Terms. **C. Airmanship** • Introduction • Airfield Layout • Rules of the Air • Circuit Procedure • ATC/RT Procedures • Aviation Medicine **D. Aero- Engines** • Introduction to Aero-engines

Core Courses (CC)

6.Business Economics- I

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction	10
2	Demand Analysis	10
3	Supply and Production Decisions and Cost of Production	15
4	Market structure: Perfect competition and Monopoly and Pricing and Output Decisions under Imperfect Competition	15
5	Pricing Practices	10
	Total	**60**

Sr. No.	Modules / Units
1	**Introduction**
	Scope and Importance of Business Economics - basic tools- Opportunity Cost principle- Incremental and Marginal Concepts. Basic economic relations - functional relations: equations- Total, Average and Marginal relations- use of Marginal analysis in decision making, The basics of market demand, market supply and equilibrium price- shifts in the demand and supply curves and equilibrium
2	**Demand Analysis**
	Demand Function - nature of demand curve under different markets Meaning, significance, types and measurement of elasticity of demand (Price, income cross and promotional)- relationship between elasticity of demand and revenue concepts **Demand estimation and forecasting:** Meaning and significance - methods of demand estimation : survey and statistical methods *(numerical illustrations on trend analysis and simple linear regression)*
3	**Supply and Production Decisions and Cost of Production**
	Production function: short run analysis with Law of Variable Proportions- Production function with two variable inputs- isoquants, ridge lines and least cost combination of inputs- Long run production function and Laws of Returns to Scale - expansion path - Economies and diseconomies of Scale. **Cost concepts:** Accounting cost and economic cost, implicit and explicit cost, fixed and variable cost - total, average and marginal cost - Cost Output Relationship in the Short Run and Long Run *(hypothetical numerical problems to be discussed)*, LAC and Learning curve - Break even analysis *(with business applications)*
4	**Market structure: Perfect competition and Monopoly and Pricing and Output Decisions under Imperfect Competition**
	Short run and long run equilibrium of a competitive firm and of industry - monopoly - short run and long- run equilibrium of a firm under Monopoly **Monopolistic competition:** Equilibrium of a firm under monopolistic competition, debate over role of advertising. *(topics to be taught using case studies from real life examples)* **Oligopolistic markets:** key attributes of oligopoly - Collusive and non-collusive oligopoly market - Price rigidity - Cartels and price leadership models *(with practical examples)*
5	**Pricing Practices**
	Cost oriented pricing methods: cost – plus (full cost) pricing, marginal cost pricing, Mark up pricing, discriminating pricing, multiple – product pricing - transfer pricing *(case studies on how pricing methods are used in business world)*

Revised Syllabus of Courses of B.Com. (Investment Management) Programme at Semester I with Effect from the Academic Year 2016-2017

Core Courses (CC)

7. Quantitative Techniques

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Introduction, Organising, Data, Frequency Distribution, Data Representation	10
2	Measures of Central Tendencies	10
3	Measures of Dispersion	10
4	Correlation and Regression	10
5	Investment Analysis	10
6	Concept of real functions and Derivatives	10
Total		**60**

Sr. No.	Modules / Units
1	**Introduction, Organising, Data, Frequency Distribution, Data Representation**
	Introduction to Statistics: Definition, Uses in business and management with limitations. **Data:** Types of data their different methods of collection, Census and sample survey. **Presentation of data:**Tabular form, frequency distribution and graphical representation of data.(Frequency curve,polygon, ogive curve Histogram).
2	**Measures of Central Tendencies**
	Arithmetic mean, median and mode, geometric mean with their applications in financial institutions and limitations
3	**Measures of Dispersion**
	Absolute measures – Range,QuartileDeviation,Mean deviation and standard deviation.Coeff.of range, Coeff.of Quartile deviation and Coeff. of variations with their utility and limitations in business and management
4	**Correlation and Regression**
	Karl Pearson's Coeff.of correlation, Coeff. of determination r^2, Spearman's rank Coeff. of correlation, Regression equations their uses in forecasting.
5	**Investment Analysis**
	Financial mathematics. Simple interest,compound interest-nominal rate effective rate and continuous compounding. Immediate ordinary annuity, its present value and future value. Equated monthly installments (EMI) using reducing interest system amortization of loans and sinking funds.Depreciation of assets.
6	Concept of real functions and Derivatives
	Concept of real functions: constant functions, linear functions, x^n,e^x,a^x,logx **Derivatives and their applications:** Derivative as a measure of rate. Different types of derivatives of a function. Rules of derivatives multiplication and quotient rule. Second order derivatives. Application of derivatives marginal cost marginal revenue, elasticity of demand, maxima and minima for functions in economics and business and commerce, management etc.

5.Foundation Course in NCC - II

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Disaster Management, Social Awareness and Community Development	10
2	Health and Hygiene	10
3	Drill with Arms	10
4	Weapon Training	10
5	Specialized Subject: Army Or Navy Or Air	05
	Total	**45**

Sr. No.	Modules / Units
1	**Disaster Management, Social Awareness and Community Development**
	Disaster Management: **Desired outcome:** The student shall gain basic information about civil defence organisation / NDMA & shall provide assistance to civil administration in various types of emergencies during natural / manmade disasters • Civil Defence Organisation and Its Duties/ NDMA • Types of Emergencies/ Natural Disaster • Assistance during Natural / Other Calamities: Flood / Cyclone/ Earth Quake/ Accident etc. • 'Avan' model of NCC **Social Awareness and Community Development:** **Desired outcome:** The student shall have an understanding about social service and its need, about NGOs and shall participate in community action programmes for betterment of the community. • Basics of Social Service, Weaker Sections of Our Society and Their Needs • Social/ Rural Development Project: MNREGA, SGSY, NSAP etc. • Contribution of Youth towards Social Welfare • Civic Responsibilities • Causes & Prevention of HIV/AIDS; Role of Youth
2	**Health and Hygiene**
	Desired outcome: The student shall be fully aware about personal health and hygiene lead a healthy life style and foster habits of restraint and self awareness. • Structure and Functioning of the Human Body • Hygiene and Sanitation (Personal and Food Hygiene) • Infectious & Contagious Diseases & Their Prevention
3	**Drill with Arms**
	Desired outcome: The students will demonstrate the sense of discipline, improve bearing, smartness, turnout, develop the quality of immediate and implicit obedience of orders, with good reflexes. • Attention, Stand at Ease and Stand Easy • Getting on Parade with Rifle and Dressing at the Order • Dismissing and Falling Out • Ground / Take Up Arms • Present From the Order and Vice-versa • General Salute, Salami Shastra
4	**Weapon Training**
	Desired outcome: The student shall have basic knowledge of weapons and their use and handling. • Characteristics of a Rifle / Rifle Ammunition and its Fire Power • Stripping, Assembling, Care and Cleaning and Sight Setting of .22 rifle • Stripping, Assembling, Care and Cleaning of 7.62mm SLR • Loading, Cocking and Unloading • The lying position, Holding and Aiming- I • Trigger control and firing a shot • Range procedure and safety precautions • Short range firing, Aiming- II -Alteration of sight

Sr. No.	Modules / Units
5	**Specialized Subject: Army Or Navy Or Air**
	Army **Desired outcome:** The training shall instill patriotism, commitment and passion to serve the nation motivating the youth to join the defence forces. It will also acquaint, expose & provide basic knowledge about armed, naval and air-force subjects **A. Map reading** • Introduction to types of Maps and Conventional signs • Scales and Grid system • Topographical forms and technical terms • Relief, contours and Gradients • Cardinal points and Types of North • Types of bearings and use of Service Protractor • Prismatic compass and its use and GPS **B. Field Craft and Battle Craft** • Introduction • Judging distance • Description of ground • Recognition, Description and Indication of landmarks and targets ***OR*** **Navy** **A. Naval Communication** • Introduction to Naval Modern Communication, Purpose and Principles ▪ Introduction of Naval communication ▪ Duties of various communication sub-departments • Semaphore ▪ Introduction of position of letters and prosigns ▪ Reading of messages ▪ Transmission of messages **B. Seamanship** • **Anchor work** ▪ Parts of Anchor and Cable, their identification • **Rigging** ▪ Types of ropes and breaking strength- stowing, maintenance and securing of ropes ▪ Practical Bends and Hitches: Reef Knot, Half hitch, Clove Hitch, Rolling Hitch, Timber Hitch, Bow Line, Round Turn and Two half hitch and Bow line on the Bight and its basic elements and uses. ▪ Introduction to Shackles, Hooks, Blocks and Derricks, Coiling Down and Splicing of rope **C. Boat work** • Parts of Boat and Parts of an Oar • Instruction on boat Pulling- Pulling orders • Steering of boat under oars, Practical instruction on Boat Pulling, Precautions while pulling

Sr. No.	Modules / Units
	OR **Air** **A. Air frames** • Aircraft Controls • Landing Gear **B. Instruments** • Basic Flight Instruments **C. Aircraft Particulars** • Aircraft Particulars (Type specific) **D. Aero modelling** • History of Aero modelling • Materials used in Aero modelling • Type of Aero models • Flying/ Building of Aero models

Revised Syllabus of Courses of B.Com. (Investment Management) Programme at Semester II with Effect from the Academic Year 2016-2017

Skill Enhancement Courses (SEC)

5.Foundation Course in Physical Education - II

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Development of Fitness	10
2	Health, Fitness and Diseases	15
3	Yoga Education	10
4	Daily Schedule of Achieving Quality of Life and Wellness	10
	Total	**45**

Sr. No.	Modules / Units
1	**Development of Fitness**
	• Benefits of physical fitness and exercise and principles of physical fitness • Calculation of fitness index level 1-4 • Waist-hip ratio Target Heart Rate, BMI and types and principles of exercise (FITT) • Methods of training – continues, Interval, circuit, Fartlek and Plyometric
2	**Health, Fitness and Diseases**
	• Definition of obesity and its management • Communicable diseases, their preventive and therapeutic aspectS • Factors responsible for communicable diseases • Preventive and therapeutic aspect of Communicable and non- communicable diseases
3	**Yoga Education**
	• Meaning and history of yoga • Ashtang yoga and types of yoga • Types of Suryanamaskar and Technique of Pranayam • Benefits of Yoga
4	**Daily Schedule of Achieving Quality of Life and Wellness**
	• Daily schedule based upon one's attitude, gender, age &occupation. • Basic – module: - Time split for rest, sleep, diet, activity & recreation. • Principles to achieve quality of life:- positive attitude, daily regular exercise, control over food habits & healthy hygienic practices.

Revised Syllabus of Courses of B.Com. (Investment Management) Programme at Semester II with Effect from the Academic Year 2016-2017

Core Courses (CC)

6.Introduction to Financial Intermediaries

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Basics of Financial Intermediaries	15
2	Taxonomy of Financial Intermediaries	15
3	Theories and Management of Financial Intermediation	15
4	Future Trends	15
	Total	**60**

Sr. No.	Modules / Units
1	**Basics of Financial Intermediaries**
	• Definition of Financial System • Meaning of Financial Intermediaries • Need for financial intermediation in the Financial System • Role and functions of Financial Intermediaries • Benefits of Financial Intermediaries (w. r. t economies of Scale) • Implication of financial intermediation (effect on economic development , Hirshliefer Model) • Registration of Financial Intermediaries

Revised Syllabus of Courses of B.Com. (Investment Management) Programme at Semester I and II with effect from the Academic Year 2016-2017

Scheme of Evaluation

The performance of the learners will be evaluated in two Components. One component will be the Internal Assessment component carrying 25% marks and the second component will be the Semester-wise End Examination component carrying 75% marks. The allocation of marks for the Internal Assessment and Semester End Examinations will be as shown below:-

A) Internal Assessment: 25 %

Question Paper Pattern
(Internal Assessment- Courses without Practical Courses)

Sr. No.	Particular	Marks
1	**One class test (20 Marks)**	
	Match the Column/ Fill in the Blanks/ Multiple Choice Questions ***(½ Mark each)***	05 Marks
	Answer in One or Two Lines (Concept based Questions) ***(01 Mark each)***	05 Marks
	Answer in Brief (Attempt Any Two of the Three) ***(05 Marks each)***	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

Question Paper Pattern
(Internal Assessment- Courses with Practical Courses)

Sr. No.	Particular	Marks
1	**Semester End Practical Examination (20 Marks)**	
	Journal	05 Marks
	Viva	05 Marks
	Laboratory Work	10 Marks
2	Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities articulation and exhibit of leadership qualities in organizing related academic activities	05 Marks

B) Semester End Examination: 75 %

i) Duration: The examination shall be of 2 ½ Hours duration

ii) Theory question paper pattern

- There shall be five questions each of 15 marks.
- All questions shall be compulsory with internal choice within the questions.
- Question may be subdivided into sub-questions a, b, c… and the allocation of marks depends on the weightage of the topic.
  (Detail question paper pattern has been given separately)

Passing Standard

The learners to pass a course shall have to obtain a minimum of 40% marks in aggregate for each course where the course consists of Internal Assessment and Semester End Examination. The learners shall obtain minimum of 40% marks (i.e. 10 out of 25) in the Internal Assessment and 40% marks in Semester End Examination (i.e. 30 Out of 75) separately, to pass the course and minimum of Grade E to pass a particular semester A learner will be said to have passed the course if the learner passes the Internal Assessment and Semester End Examination together.

Question Paper Pattern

(Practical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 ½ Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Practical Question ***OR*** Full Length Practical Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Practical question of 15 marks may be divided into two sub questions of 7/8 and 10/5 Marks. If the topic demands, instead of practical questions, appropriate theory question may be asked.

Question Paper Pattern

(Theoretical Courses)

Maximum Marks: 75

Questions to be set: 05

Duration: 2 ½ Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Objective Questions A) Sub Questions to be asked 10 and to be answered any 08 B) Sub Questions to be asked 10 and to be answered any 07 (*Multiple choice / True or False / Match the columns/Fill in the blanks)	15 Marks
Q-2 Q-2	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-3 Q-3	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-4 Q-4	Full Length Question ***OR*** Full Length Question	15 Marks 15 Marks
Q-5 Q-5	A) Theory questions B) Theory questions ***OR*** Short Notes To be asked 05 To be answered 03	08 Marks 07 Marks 15 Marks

Note:

Theory question of 15 marks may be divided into two sub questions of 7/8 and 10/5 Marks.

UNIVERSITY OF MUMBAI
No. UG/ 180 of 2016-17

CIRCULAR:-

A reference is invited to the Syllabi relating to the B.Sc. degree course , **vide** this office Circular No. UG/133 of 2011, dated 13th June, 2011 and the Principals of affiliated Colleges in Science are hereby informed that the recommendation made by the Board of Studies in Statistics at its meeting held on 14th June, 2016 has been accepted by the Academic Council meeting held on 14th July, 2016 **vide** item No. 4.85 and that in accordance therewith, the revised syllabus as per the Choice Based Credit System for F.Y. B.Sc. programme in Statistics (Sem. I &II), which are available on the University's web site (www.mu.ac.in) and that the same has been brought into force with effect from the academic year 2016-17.

MUMBAI – 400 032
22 November, 2016

COURSE USST101: DESCRIPTIVE STATISTICS-1

Unit I - Types of Data and Data Condensation: a) Concept of population and sample. Finite ,Infinite population ,Notion of SRS ,SRSWOR and SRSWR b) Types of Characteristics, Different types of scales: nominal, ordinal, interval and ratio. c) Collection of Primary data: concept of a questionnaire and a schedule, Secondary data d) Types of data: Qualitative and quantitative data; Time series data and cross section data, discrete and continuous data. e) Tabulation. f) Dichotomous classification- for two and three attributes, Verification for consistency. g) Association of attributes: Yule's coefficient of association Q. Yule's coefficient of Colligation,	**15 Lectures**
Unit II–Classification of Data and Measures of central tendency **i)Classification of Data** a) Univariate frequency distribution of discrete and continuous variables. Cumulative frequency distribution. b) Graphical representation of frequency distribution by Histogram, frequency polygon, Cumulative frequency curve. Stem and leaf diagram. **ii)Measures of central tendency** a)Concept of central tendency of data. Requirements of good measure b) Locationalaverages: Median, Mode, and Partition Values: Quartiles, Deciles, and Percentiles. c)Mathematical averages Arithmetic mean (Simple, weighted mean, combined mean), Geometric mean, Harmonic mean, d)Empirical relation between mean, median and mode e)Merits and demerits of using different measures &their applicability	**15 Lectures**
Unit III - Measures of Dispersion, Skewness & Kurtosis a) Concept of dispersion. Requirements of good measure. b) Absolute and Relative measures of dispersion: Range, Quartile Deviation, Mean absolute deviation, Standard deviation. c) Variance and Combined variance, raw moments and central moments and relations between them. Their properties d) Concept of Skewness and Kurtosis: Measures of Skewness: Karl Pearson's, Bowley's and Coefficient of skewness based on moments.Measure of Kurtosis, e) Box Plot	**15 Lectures**

COURSE USST201: DESCRIPTIVE STATISTICS-1I

UNIT – I:Correlation and regression analysis a) Scatter Diagram, Product moment correlation coefficient and its properties. Spearman's Rank correlation.(With and without ties) b) Concept of linear regression. Principle of least squares. Fitting a straight line by method of least squares. c) Relation between regression coefficients and correlation coefficient. d) Fitting of curves reducible to linear form by transformation. Concept and use of coefficient of determination (R^2). **e)** Fitting a quadratic curve by method of least squares.	**15 Lectures**
UNIT – II : Time Series Definition of time series .Its component. Models of time series. Estimation of trend by: i) Freehand curve method ii) method of semi average iii)Method of Moving average iv) Method of least squares(linear trend only) Estimation of seasonal component by i) method of simple average ii) Ratio to moving average iii)Ratio to trend method .	**15 Lectures**
Unit III - Index Numbers a) Index numbers as comparative tool. Stages in the construction of Price Index Numbers. b) Measures of Simple and Composite Index Numbers. Laspeyre's, Paasche's, Marshal-Edgeworth's, Dobisch & Bowley's and Fisher's Index Numbers formula. c) Quantity Index Numbers and Value Index Numbers Time reversal test,Factor reversal test, Circular test. d) Fixed base Index Numbers, Chain base Index Numbers.Base shifting, splicing and deflating. e) Cost of Living Index Number.Concept of Real Income based on Wholesale Price Index Number	**15 Lectures**

SEMESTER I : Practicals

1. **Tabulation**
2. **Attributes**
3. **Classification of Data**
4. **Diagrammatic representation.**
5. **Measures of central tendency**
6. **Measures of dispersion**
7. **Practical using Excel and R**

   i)Classification of Data and Diagrammatic representation.

   ii)Measures of central tendency

   iii)Measures of dispersion

SEMESTER II: Practicals

1. **Correlation analysis**
2. **Regression analysis**
3. **Fitting of curve**
4. **Time series**
5. **Index number-I**
6. **Index number-II**
7. **Practical using Excel and R**

   i) Correlation analysis

   ii) Regression analysis

   iii) Fitting of curve

Proposed syllabus F.Y.B.Sc

SEMESTER I

COURSE USST102

STATISTICAL METHODS-1

UNIT – I

Elementary Probability Theory :

Trial, random experiment, sample point and sample space.

Definition of an event. Operation of events, mutually exclusive and exhaustive events.

Classical (Mathematical) and Empirical definitions of Probability and their properties.

Theorems on Addition and Multiplication of probabilities.

Independence of events, pairwise and mutual independence for three event Conditional probability, Bayes theorem and its applications.

UNIT – II

Concept of Discrete random variable and properties of its probability distribution :

Random variable. Definition and properties of probability distribution and cumulative distribution function of discrete random variable.

Raw and Central moments(definition only) and their relationship.(upto order four).

Concepts of Skewness and Kurtosis and their uses.

Expectation of a random variable. Theorems on Expectation & Variance.

Joint probability mass function of two discrete random variables.

Marginal and conditional distributions. Theorems on Expectation &Variance,

Covariance and Coefficient of Correlation. Independence of two random variables.

UNIT – III

Some Standard Discrete Distributions:

Discrete Uniform, Binomial and Poisson distributions and derivation of their mean and variance.

Recurrence relation for probabilities of Binomial and Poisson distributions .Poisson approximation to Binomial distribution .Hyper geometric distribution, Binomial approximation to hyper geometric distribution.

SEMESTER II

COURSE USST202

STATISTICAL METHODS-2

UNIT – IV

Continuous random variable :

Concept of Continuous random variable and properties of its

probability distribution

Probability density function and cumulative distribution function.

Their graphical representation.

Expectation of a random variable and its properties. Measures of location, dispersion, skewness

and kurtosis. Raw and central moments (simple illustrations).

UNIT – V

Some Standard Continuous Distributions :

Uniform, Exponential (location scale parameter) , memory less property of exponential distribution and Normal distribution.

Derivations of mean, median and variance for Uniform and Exponential distributions. Properties

of Normal distribution (without proof). Normal approximation to Binomial and Poisson

distribution (statement only). Properties of Normal curve. Use of normal tables.

UNIT – VI

Elementary topics on Estimation and Testing of hypothesis:

Sample from a distribution :

Concept of a statistic, estimate and its sampling distribution. Parameter and it's estimator.

Concept of bias and standard error of an estimator.

Central Limit theorem (statement only).

Sampling distribution of sample mean and sample proportion. (For large sample only)

Standard errors of sample mean and sample proportion.

Point and Interval estimate of single mean, single proportion from sample of large size.

Statistical tests :

Concept of hypothesis

Null and alternate hypothesis,

Types of errors, Critical region, Level of significance.

Large sample tests (using central limit theorem, if necessary)

For testing specified value of population mean

For testing specified value in difference of two means

For testing specified value of population proportion

For testing specified value of difference of population proportion

(Development of critical region is not expected.)

Use of central limit theorem**.**

PRACTICALS IN STATISTICS

Distribution of the topics for the practicals

SEMESTER I Course code USSTP1

Sr.No	(B)
1	Probability.
2	Discrete Random Variables
3	Bivariate Probability Distributions.
4	Binomial distribution
5	Poisson distribution
6	Hyper geometric distribution
7	Practicals Using R Binomial, Poisson, Hyper geometric distribution

SEMESTER II

Course code USSTP2

Sr.No	(B)
1	Continuous Random Variables
2	Uniform, Exponential and Normal Distributions
3	Applications of central limit theorem and normal approximation
4	Testing of Hypothesis
5	Large Sample Tests
6	2,3,4,5, Practicals Using R

No. UG/17 of 2020-21

CIRCULAR:-

Attention of the Principals of the Affiliated Colleges and Directors of the recognized Institutions in Humanities, Science & Technology Faculty is invited to this office circular No.UG/57 of 2018-19, dated 6th July, 2018 relating to the revised syllabus for the F.Y.B.Sc/F.Y.B.A. in Mathematics (Sem. I & II).

They are hereby informed that the recommendations made by the Board of Studies in Mathematics at its meeting held on 11th March, 2020 vide item No.1 and subsequently made by the Board of Deans at its meeting held on 20th July, 2020 vide item No.54 have been accepted by the Academic Council at its meeting held on 23rd July, 2020 vide item No. 4.106 and that in accordance therewith, the revised syllabus practical book of F.Y. B.Sc./ F.Y.B.A. in Mathematics under the (CBCS) in 75:25 pattern has been brought into force with effect from the academic year 2020 -21 accordingly. (The same is available on the University's website www.mu.ac.in).

(Dr. Vinod Patil)
I/c REGISTRAR

MUMBAI – 400 032
17th November, 2020

To

The Principals of the affiliated Colleges and Directors of the recognized Institutions in Humanities, Science &Technology Faculty.(Circular No.UG/334 of 2017-18 dated 9th January, 2018.)

A.C/4.106/23/07/2020

****

No. UG/17 -A of 2020-21 MUMBAI-400 032 17th November, 2020

Copy forwarded with Compliments for information to:-

1) The Dean, Faculty of Humanities, Science & Technology,
2) The Chairman, Board of Studies in Mathematics,
3) The Director, Board of Examinations and Evaluation,
4) The Director, Board of Students Development,
5) The Co-ordinator, University Computerization Centre,

Revised Syllabus in Mathematics
Choice Based Credit System
F. Y. B. Sc. / B. A. 2020-2021

Preamble:
The University of Mumbai has brought into force the revised syllabi as per the Choice Based Credit System (CBCS) for the First year B. Sc/ B. A. Programme in Mathematics from the academic year 2020-2021.

Mathematics has been fundamental to the development of science and technology. In recent decades, the extent of application of Mathematics to real world problems has increased by leaps and bounds. Taking into consideration the rapid changes in science and technology and new approaches in different areas of mathematics and related subjects like Physics, Statistics and Computer Sciences, the board of studies in Mathematics with concern of teachers of Mathematics from different colleges affiliated to University of Mumbai has prepared the syllabus of F.Y.B. Sc. / F. Y. B. A. Mathematics. The present syllabi of F. Y. B. Sc. for Semester I and Semester II has been designed as per U. G. C. Model curriculum so that the students learn Mathematics needed for these branches, learn basic concepts of Mathematics and are exposed to rigorous methods gently and slowly. The syllabi of F. Y. B. Sc. / F. Y. B. A. would consist of two semesters and each semester would comprise of two courses for F. Y. B. Sc. Mathematics and one course for each semester for F. Y. B. A. Mathematics. Course I is 'Calculus I and Calculus II'. Calculus is applied and needed in every conceivable branch of science. Course II, 'Algebra I and Discrete Mathematics' develops mathematical reasoning and logical thinking and has applications in science and technology.

Aims:

(1) Give the students a sufficient knowledge of fundamental principles, methods and a clear perception of innumerous power of mathematical ideas and tools and know how to use them by modeling, solving and interpreting.

(2) Reflecting the broad nature of the subject and developing mathematical tools for continuing further study in various fields of science.

(3) Enhancing students' overall development and to equip them with mathematical modeling abilities, problem solving skills, creative talent and power of communication necessary for various kinds of employment.

(4) A student should get adequate exposure to global and local concerns that explore them many aspects of Mathematical Sciences

Course outcomes:

1. Calculus (Sem I & II): This course gives introduction to basic concepts of Analysis with rigor and prepares students to study further courses in Analysis. Formal proofs are given lot of emphasis in this course which also enhances understanding of the subject of Mathematics as a whole. The portion on first order, first degree differentials prepares learner to get solutions of so many kinds of problems in all subjects of Science and also prepares learner for further studies of differential equations and related fields.

2. Algebra I (Sem I) & Discrete Mathematics (Sem II): This course gives expositions to number systems (Natural Numbers & Integers), like divisibility and prime numbers and

their properties. These topics later find use in advanced subjects like cryptography and its uses in cyber security and such related fields.

Teaching Pattern for Semester I

[1.] Three lectures per week per course.

[2.] One Practical per week per batch for each of the courses USMT101, USMT 102 (the batches to be formed as prescribed by the University).

[3.] One Tutorial per week per batch for course UAMT101 (the batches to be formed as prescribed by the University).

Teaching Pattern for Semester II

[1.] Three lectures per week per course.

[2.] One Practical per week per batch for each of the courses USMT201, USMT 202. (the batches to be formed as prescribed by the University).

[3.] One Tutorial per week per batch for the course UAMT201 (the batches to be formed as prescribed by the University).

F.Y.B.Sc. / F.Y.B.A. Mathematics

SEMESTER I

USMT 101 / UAMT 101: CALCULUS I

Note: All topics have to be covered with proof in details (unless mentioned otherwise) and examples.

Unit 1 : Real Number System (15 Lectures)

(1) Real number system $\mathbb{R}$ and order properties of $\mathbb{R}$, absolute value $|\ |$ and its properties.

(2) AM-GM inequality, Cauchy-Schwarz inequality, Intervals and neighbourhoods, interior points, limit point, Hausdorff property.

(3) Bounded sets, statements of I.u.b. axiom and its consequences, supremum and infimum, maximum and minimum, Archimedean property and its applications, density of rationals.

Unit II: Sequences in $\mathbb{R}$ (15 Lectures)

(1) Definition of a sequence and examples, Convergence of sequences, every convergent sequences is bounded. Limit of a convergent sequence and uniqueness of limit, Divergent sequences.

(2) Convergence of standard sequences like $\left(\frac{1}{1+na}\right)\ \forall a > 0,\ \ (b^n)\ \forall b,\ 0 < b < 1,\ \ (c^{\frac{1}{n}})\ \forall c > 0,\ \ \&\ \ (n^{\frac{1}{n}})$.

(3) Algebra of convergent sequences, sandwich theorem, monotone sequences, monotone convergence theorem and consequences as convergence of $\left(\left(1+\frac{1}{n}\right)^n\right)$.

(4) Definition of subsequence, subsequence of a convergent sequence is convergent and converges to the same limit, definition of a Cauchy sequences, every convergent sequences s a Cauchy sequence and converse.

Unit III: First order First degree Differential equations (15 Lectures)

Review of Definition of a differential equation, order, degree, ordinary differential equation and partial differential equation, linear and non linear ODE. Solution of homogeneous and non-homogeneous differential equations of first order and first degree. Notion of partial derivatives.

(1) Exact Equations: General solution of Exact equations of first order and first degree. Necessary and sufficient condition for $Mdx + Ndy = 0$ to be exact. Non-exact equations: Rules for finding integrating factors (without proof) for non exact equations, such as :

i) $\frac{1}{M\ x + N\ y}$ is an I.F. if $M\ x + N\ y \neq 0$ and $Mdx + Ndy = 0$ is homogeneous.

ii) $\frac{1}{M\ x - N\ y}$ is an I.F. if $M\ x - N\ y \neq 0$ and $Mdx + Ndy = 0$ is of the form $f_1(x,y)\ y\ dx + f_2(x,y)\ x\ dy = 0$.

iii) $e^{\int f(x)\ dx}$ (resp $e^{\int g(y)\ dy}$) is an I.F. if $N \neq 0$ (resp $M \neq 0$) and $\frac{1}{N}\left(\frac{\partial M}{\partial y} - \frac{\partial N}{\partial x}\right)$ $\left(\text{resp}\frac{1}{M}\left(\frac{\partial M}{\partial y} - \frac{\partial N}{\partial x}\right)\right)$ is a function of x (resp y) alone, say $f(x)$ (resp $g(y)$).

iv) Linear and reducible linear equations of first order, finding solutions of first order differential equations of the type for applications to orthogonal trajectories, population growth, and finding the current at a given time.

(2) Reduction of order :

(i) If the differential equation does not contain only the original function y, that is equations of Type $F(x, y', y'') = 0$.

(ii) If the differential equation does not contain the independent variable x that is, equations of Type $F(y, y', y'') = 0$.

ALGEBRA I
USMT 102

Prerequisite :
Set Theory: Set, subset, union and intersection of two sets, empty set, universal set, complement of a set, De Morgan's laws, Cartesian product of two sets, Relations, Permutations ${}^nP_r$ and Combinations ${}^nC_r$.
Complex numbers: Addition and multiplication of complex numbers, modulus, amplitude and conjugate of a complex number.

Unit I : Integers & Divisibility (15 Lectures)

(1) Statements of well-ordering property of non-negative integers, Principle of finite induction (first and second) as a consequence of Well-Ordering Principle.

(2) Divisibility in integers, division algorithm, greatest common divisor (g.c.d.) and least common multiple (l.c.m.) of two non zero integers, basic properties of g.c.d. such as existence and uniqueness of g.c.d. of two non zero integers $a\&b$ and that the g.c.d. can be expressed as $ma + nb$ for some $m, n \in \mathbb{Z}$, Euclidean algorithm.

(3) Primes, Euclid's lemma, Fundamental Theorem of arithmetic, The set of primes is infinite, there are arbitrarily large gaps between primes, there exists infinitely many primes of the form $4n - 1$ or of the form $6n - 1$.

(4) Congruence, definition and elementary properties, Results about linear congruence equations. Examples.

Unit II : Functions, Relations and Binary Operations (15 Lectures)

(1) Definition of relation and function, domain, co-domain and range of a function, composite functions, examples, Direct image $f(A)$ and inverse image $f^{-1}(B)$ for a function f, injective, surjective, bijective functions, Composite of injective, surjective, bijective functions when defined, invertible functions, bijective functions are invertible and conversely, examples of functions including constant, identity, projection, inclusion, Binary operation as a function, properties, examples.

(2) Equivalence relation, Equivalence classes, properties such as two equivalences classes are either identical or disjoint, Definition of partition, every partition gives an equivalence relation and vice versa.

(3) Congruence is an equivalence relation on $\mathbb{Z}$, Residue classes and partition of $\mathbb{Z}$, Addition modulo$n$, Multiplication modulo n, examples.

Unit III: Polynomials (15 Lectures)

(1) Definition of a polynomial, polynomials over F where $F = \mathbb{Q}, \mathbb{R}$ or $\mathbb{C}$, Algebra of polynomials, degree of polynomial, basic properties.

(2) Division algorithm in $F[X]$ (without proof), and g.c.d of two polynomials and its basic properties, Euclidean algorithm (proof of the above results may be given only in the case of $\mathbb{Q}[X]$ with a remark that the results as well as the proofs remain valid in the case of $\mathbb{R}[X]$ or $\mathbb{C}[X]$).

(3) Roots of a polynomial, relation between roots and coefficients, multiplicity of a root. Elementary consequences such as the following.

(i) Remainder theorem, Factor theorem.

(ii) A polynomial of degree n has at most n roots.

(iii) Complex and non-real roots of a polynomials in $\mathbb{R}[X]$ occur in conjugate pairs.

(Emphasis on examples and problems in polynomials with real coefficients).

(4) Necessary condition for a rational number $\frac{p}{q}$ to be a root of a polynomial with integer coefficients (viz. p divides the constant coefficient and q divides the leading coefficient), corollary for monic polynomials (viz. a rational root of monic polynomial with integer coefficients is necessarily an integer). Simple consequence such as the irrationality is necessarily of $\sqrt{p}$ for any prime number p. Irreducible polynomials in $\mathbb{Q}[x]$, Unique Factorisation Theorem. Examples.

PRACTICALS FOR F.Y.B.Sc
USMTP01 – Practicals

A. **Practicals for USMT101/ UAMT 101:**

(1) Algebraic and Order Properties of Real Numbers and Inequalities

(2) Hausdorff Property and LUB Axiom of $\mathbb{R}$, Archimedian Property.

(3) Convergence and divergence of sequences, bounded sequences, Sandwich Theorem.

(4) Cauchy sequences, monotonic sequences, non-monotonic sequences.

(5) Solving exact and non-exact, linear, reducible to linear differential equations.

(6) Reduction of order of Differential Equations, Applications of Differential Equations.

(7) Miscellaneous Theoretical Questions based on full paper.

B. **Practicals for USMT102:**

(1) Mathematical induction ,Division Algorithm, Euclidean algorithm in $\mathbb{Z}$, Examples on expressing the gcd. of two non zero integers $a\&b$ as $ma + nb$ for some $m, n \in \mathbb{Z}$,

(2) Primes and the Fundamental theorem of Arithmetic, Euclid's lemma, there exists infinitely many primes of the form $4n - 1$ or of the form $6n - 1$.

(3) Functions, Bijective and Invertible functions, Compositions of functions.

(4) Binary Operation, Equivalence Relations, Partition and Equivalence classes.

(5) Polynomial (I)

(6) Polynomial (II)

(7) Miscellaneous Theoretical Questions based on full paper.

TUTORIALS FOR F.Y.B.A

Tutorials for UAMT101 :

(1) Algebraic and Order Properties of Real Numbers and Inequalities

(2) Hausdorff Property and LUB Axiom of $\mathbb{R}$, Archimedian Property.

(3) Convergence and divergence of sequences, bounded sequences, Sandwich Theorem.

(4) Cauchy sequences, monotonic sequences, non-monotonic sequences.

(5) Solving exact and non-exact, linear, reducible to linear differential equations.

(6) Reduction of order of Differential Equations, Applications of Differential Equations.

(7) Miscellaneous Theoretical Questions based on full paper.

Semester II
USMT 201 / UAMT201: CALCULUS II

Unit-I: Limits and Continuity (15 Lectures)

{Brief review: Domain and range of a function, injective function, surjective function, bijective function, composite of two functions (when defined), Inverse of a bijective function. Graphs of some standard functions such as $|x|$, e^x, $\log x$, ax^2+bx+c, $\frac{1}{x}$, x^n $n \geq 3$), $\sin x$, $\cos x$, $\tan x$, $\sin\left(\frac{1}{x}\right)$, $x^2 \sin\left(\frac{1}{x}\right)$ over suitable intervals of $\mathbb{R}$. No direct questions to be added.}

(1) $\varepsilon - \delta$ definition of Limit of a function, uniqueness of limit if it exists, algebra of limits, limits of composite function, sandwich theorem, left-hand-limit $\lim\limits_{x \longrightarrow a^-} f(x)$, right-hand-limit $\lim\limits_{x \longrightarrow a^+} f(x)$, non-existence of limits, $\lim\limits_{x \longrightarrow -\infty} f(x)$, $\lim\limits_{x \longrightarrow \infty} f(x)$ and $\lim\limits_{x \longrightarrow a} f(x) = \pm\infty$.

(2) Continuous functions: Continuity of a real valued function at a point and on a set using $\epsilon - \delta$ definition, examples, Continuity of a real valued function at end points of domain using $\epsilon - \delta$ definition, f is continuous at a if and only if $\lim\limits_{x \longrightarrow a} f(x)$ exists and equals to $f(a)$, Sequential continuity, Algebra of continuous functions, discontinuous functions, examples of removable and essential discontinuity.

(3) Intermediate Value theorem and its applications, Bolzano-Weierstrass theorem (statement only): A continuous function on a closed and bounded interval is bounded and attains its bounds.

Unit-II: Differentiability of functions (15 Lectures)

(1) Differentiation of real valued function of one variable: Definition of differentiability of a function at a point of an open interval, examples of differentiable and non differentiable functions, differentiable functions are continuous but not conversely, algebra of differentiable functions.

(2) Chain rule, Higher order derivatives, Leibniz rule, Derivative of inverse functions, Implicit differentiation (only examples)

Unit-III: Applications of differentiability (15 Lectures)

(1) Rolle's Theorem, Lagrange's and Cauchy's Mean Value Theorems, applications and examples, Monotone increasing and decreasing functions, examples.

(2) L-Hospital rule (without proof), examples of indeterminate forms, Taylor's theorem with Lagrange's form of remainder with proof, Taylor polynomial and applications.

(3) Definition of critical point, local maximum/minimum, necessary condition, stationary points, second derivative test, examples, concave/convex functions, point of inflection.

(4) Sketching of graphs of functions using properties.

Reference books:

1. R. R. Goldberg, Methods of Real Analysis, Oxford and IBH, 1964.

2. James Stewart, Calculus, Third Edition, Brooks/ Cole Publishing company, 1994.

3. T. M. Apostol, Calculus, Vol I, Wiley And Sons (Asia) Pte. Ltd.

4. Sudhir Ghorpade and Balmohan Limaye, A course in Calculus and Real Analysis, Springer International Ltd, 2000.

Additional Reference:

2. Ajit Kumar and S. Kumaresan, A Basic course in Real Analysis, CRC Press, 2014.

3. K. G. Binmore, Mathematical Analysis, Cambridge University Press, 1982.

4. G. B. Thomas, Calculus, 12th Edition 2009

USMT 202: DISCRETE MATHEMATICS

Unit I: Preliminary Counting (15 Lectures)

(1) Finite and infinite sets, countable and uncountable sets examples such as $\mathbb{N}$, $\mathbb{Z}$, $\mathbb{N} \times \mathbb{N}$, $\mathbb{Q}$ $(0,1)$, $\mathbb{R}$.

(2) Addition and multiplication Principle, counting sets of pairs, two ways counting.

(3) Stirling numbers of second kind. Simple recursion formulae satisfied by $S(n,k)$ for $k = 1, 2, \cdots, n-1, n$.

(4) Pigeonhole principle simple and strong form and examples, its applications to geometry.

Unit II: Advanced Counting (15 Lectures)

(1) Permutation and combination of sets and multi-sets, circular permutations, emphasis on solving problems.

(2) Binomial and Multinomial Theorem, Pascal identity, examples of standard identities such as the following with emphasis on combinatorial proofs.

- $\sum_{k=0}^{r} \binom{m}{k}\binom{n}{r-k} = \binom{m+n}{r}$
- $\sum_{i=0}^{k} \binom{k}{i}^2 = \binom{2k}{k}$
- $\sum_{i=r}^{n} \binom{i}{r} = \binom{n+1}{r+1}$
- $\sum_{i=0}^{n} \binom{n}{i} = 2^n$

(3) Non-negative integer solutions of equation $x_1 + x_2 + \cdots + x_k = n$.

(4) Principal of inclusion and exclusion, its applications, derangements, explicit formula for d_n, deriving formula for Euler's function $\phi(n)$.

Unit III: Permutations and Recurrence relation (15 lectures)

(1) Permutation of objects, S_n, composition of permutations, results such as every permutation is a product of disjoint cycles, every cycle is a product of transpositions, signature of a permutation, even and odd permutations, cardinality of S_n, A_n.

(2) Recurrence Relations, definition of homogeneous, non-homogeneous, linear, non-linear recurrence relation, obtaining recurrence relations of Tower of Hanoi, Fibonacci sequence, etc. in counting problems, solving homogeneous as well as non homogeneous recurrence relations by using iterative methods, solving a homogeneous recurrence relation of second degree using algebraic method proving the necessary result.

PRACTICALS FOR F.Y.B.Sc
USMTP02-Practicals

A. **Practicals for USMT201 :**

(1) Limit of a function and Sandwich theorem, Continuous and discontinuous function.

(2) Algebra of limits and continuous functions, Intermediate Value theorem, Bolzano-Weierstrass theorem.

(3) Properties of differentiable functions, derivatives of inverse functions and implicit functions.

(4) Higher order derivatives, Leibnitz Rule.

(5) Mean value theorems and its applications, L'Hospital's Rule, Increasing and Decreasing functions.

(6) Extreme values, Taylor's Theorem and Curve Sketching.

(7) Miscellaneous Theoretical Questions based on full paper.

B. **Practicals for USMT202:**

(1) Counting principles, Two way counting.

(2) Stirling numbers of second kind, Pigeon hole principle.

(3) Multinomial theorem, identities, permutation and combination of multi-set.

(4) Inclusion-Exclusion principle. Euler phi function.

(5) Composition of permutations, signature of permutation, inverse of permutation.

(6) Recurrence relation.

(7) Miscellaneous Theoretical Questions based on full paper.

TUTORIALS FOR F.Y.B.A

Tutorials for UAMT201 :

(1) Limit of a function and Sandwich theorem, Continuous and discontinuous function.

(2) Algebra of limits and continuous functions, Intermediate Value theorem, Bolzano-Weierstrass theorem.

(3) Properties of differentiable functions, derivatives of inverse functions and implicit functions.

(4) Higher order derivatives, Leibnitz Rule.

(5) Mean value theorems and its applications, L'Hospital's Rule, Increasing and Decreasing functions.

(6) Extreme values, Taylor's Theorem and Curve Sketching.

(7) Miscellaneous Theoretical Questions based on full paper.

Scheme of Examination (75:25)

The performance of the learners shall be evaluated into two parts. The learner's performance shall be assessed by Internal Assessment with 25 percent marks in the first part and by conducting the Semester End Examinations with 75 percent marks in the second part. The allocation of marks for the Internal Assessment and Semester End Examinations are as shown below:-

I. **Internal Evaluation of 25 Marks:**

F.Y.B.Sc. :

(i) One class Test of 20 marks to be conducted during Practical session.
Paper pattern of the Test:
Q1: Definitions/ Fill in the blanks/ True or False with Justification (04 Marks).
Q2: Multiple choice 5 questions. (10 Marks: 5×2)
Q3: Attempt any 2 from 3 descriptive questions. (06 marks: 2×3)

(ii) Active participation in routine class: 05 Marks.

F.Y.B.A. :

(i) One class Test of 20 marks to be conducted during Tutorial session.
Paper pattern of the Test:
Q1: Definitions/ Fill in the blanks/ True or False with Justification (04 Marks).
Q2: Multiple choice 5 questions. (10 Marks: 5×2)
Q3: Attempt any 2 from 3 descriptive questions. (06 marks: 2×3)

(ii) Journal : 05 Marks.

II. **Semester End Theory Examinations :** There will be a Semester-end external Theory examination of 75 marks for each of the courses USMT101/UAMT101, USMT102 of Semester I and USMT201/UAMT201, USMT202 of semester II to be conducted by the college.

1. Duration: The examinations shall be of 2 and $\frac{1}{2}$ hours duration.
2. Theory Question Paper Pattern:
   a) There shall be FOUR questions. The first three questions Q1, Q2, Q3 shall be of 20 marks, each based on the units I, II, III respectively. The question Q4 shall be of 15 marks based on the entire syllabus.
   b) All the questions shall be compulsory. The questions Q1, Q2, Q3, Q4 shall have internal choices within the questions. Including the choices, the marks for each question shall be 25-27.
   c) The questions Q1, Q2, Q3, Q4 may be subdivided into sub-questions as a, b, c, d & e, etc and the allocation of marks depends on the weightage of the topic.
3. **Semester End Examinations Practicals:**
   At the end of the Semesters I & II Practical examinations of three hours duration and 100 marks shall be conducted for the courses USMTP01, USMTP02.
   In semester I, the Practical examinations for USMT101 and USMT102 are held together by the college.
   In Semester II, the Practical examinations for USMT201 and USMT202 are held together by the college.

   Paper pattern: The question paper shall have two parts A and B.
   Each part shall have two Sections.

   Section I Objective in nature: Attempt any Eight out of Twelve multiple choice questions (04 objective questions from each unit) ($8 \times 3 = 24$ Marks).

   Section II Problems: Attempt any Two out of Three (01 descriptive question from each unit) ($8 \times 2 = 16$ Marks).

Practical Course	Part A	Part B	Marks out of	duration
USMTP01	Questions from USMT101	Questions from USMT102	80	3 hours
USMTP02	Questions from USMT201	Questions from USMT202	80	3 hours

Marks for Journals and Viva:
For each course USMTP01 (USMT101, USMT102) and USMTP02 (USMT201, USMT202):

1. Journal: 10 marks (5 marks for each journal).
2. Viva: 10 marks.

Each Practical of every course of Semester I and II shall contain at least 10 objective questions and at least 6 descriptive questions.
A student must have a certified journal before appearing for the practical examination.
In case a student does not posses a certified journal he/she will be evaluated for 80 marks.
He/she is not qualified for Journal + Viva marks.

AC-6-6-12

Item No. 4.121

UNIVERSITY OF MUMBAI

Syllabus for M.Sc. Semester I &II

Program: M.Sc.

Course: Environmental Sciences

(Credit Based Semester and Grading System with effect from the academic year 2012–2013)

M. Sc. Environmental Sciences Syllabus

Credit Based and Grading System

To be implemented from the Academic year 2012-2013

1. The credit system will be implemented from the year 2012-13.
2. Each student is expected to take 4 credits per theory paper and two credits per practical in each semester.
3. At the end of each semester each student will be examined both in the theory and in the practicals. Similarly the student has to appear for the internal examination of theory and practicals as per the ordinances.
4. The candidate is expected to submit a journal certified by the head of the department or institution at the time of the practical examination.
5. A candidate will not be allowed to appear for the practical examination unless he or she produces a certified journal or a certificate from the head of the institution or department stating that the journal is lost and the candidate has performed the required number of experiments satisfactorily. The list of the experiments performed by the candidate should be attached with such certificate
6. Use of non programmable calculators is allowed both at the theory and the practical examination.

Semester-I papers:

1) Ecology and Ecosystem
2) Biodiversity
3) Environment and Natural resources
4) Environmental Pollution

Semester-II papers:

1) Environmental monitoring and Assessment
2) Pollution control technology

3) Green Technology
4) Environment Acts Rules and Regulations

SEMESTER-I

PSEVS101

Ecology and Ecosystem: (Credit: 4)

Unit I **(10 L)**

Ecology: Definition, principle and scope of ecology, aquatic and terrestrial ecology, freshwater ecology, marine ecology, estuarine ecology, Community concept, types of community, succession process, competition and Coexistence, types of interactions: predation, parasitism, antibiosis, commensalism, cooperation and mutualism, population growth.

Unit II **(20L)**

Concept of Biosphere and ecosystem: Biomes, Population parameters, structure, Growth Regulation, Interaction between populations, life, history, strategies. Types of ecosystem, eco system of India, Characteristics of eco system, structure of ecosystem and function of an ecosystem, population Dynamics, Carrying capacity. Abiotic and Biotic environment, limiting factors, adaptation, Habitat and niche, nature of environment. Littoral Zones: Fauna of intertidal zones, their distribution and adaptations, ecological importance of mangrove vegetation, distribution of mangrove areas in India, salinity ingress in coastal areas.

Marine Environment: Biota in different types of zones, its diversity-plankton, nekton, benthos, their adaptations and productivity, Indian marine territory, Exclusive Economic Zones (EEZ)

Dynamic biogeography: routes of migration of plants and animals, their impact on local ecosystems, trade routes, shipping, accidental import, weeds, ballast water.

Unit III **(15L)**

Organization of Ecological systems: Ecosystem components, Producers, consumers and decomposer, Food chains, food web and ecological pyramids, Biotic and abiotic components, Ecological pyramids, Bioaccumulation and biomagnifications, mass and energy transfer in successive trophical level.

Unit IV **(15L)**

Energy and Ecological succession: Flow and energy fixation, construction of ecological pyramids. Biogeochemical cycles: Hydrological cycles, carbon cycle, oxygen cycle, nitrogen cycle, sulfur cycle, phosphorus cycle-its importance and applications. Primary succession, secondary succession and ecological climax, impacts of development of ecosystem, population, commumnity ecology, predator and prey relationship.

12) Environmental Biotechnology-Alan Scragg,Oxford University Press.

PSEVS 102

Biodiversity: (Credit: 4)

Unit I **(15L)**

Biodiversity concept and components: Biodiversity concept, Biodiversity-components, Biodiversity-Types, Biodiversity-importance, ecological importance, economical importance, key stone umbrella and flagship species, Economic value of biodiversity, ecotone and niche.

Unit II **(20L)**

Biodiversity and evaluation: Biodiversity- values, Biodiversity status: National status and Global status, hotspot; threatened species, IUCN Red list, endangered species, vulnerable species, rare species, extinct species and endemic species. Climate change, induced losses. common flora and fauna in India-Aquatic: phytoplankton, Zooplankton and macrophyes.Terrestrial: Forests; Endangered and threatended speceis.

Unit III **(10L)**

Biodiversity Convention and Biodiversity Act: IPRs, national and international programs for biodiversity conservation. Wildlife values and eco-tourism, wildlife distribution in India, problem in wildlife protection, role of WWF, WCU, CITES, TRAFFIC, Wildlife Protection Act 1972.

Unit IV **(15L)**

Biodiversity Conservation: Importance of Biodiversity conservation, Different approaches for Biodiversity conservation-In-situ conservation: sanctuaries, biospheres reserves, national parks, nature reserves, preservation plots. Ex-situ conservation: botanical gardens, zoos, aquaria, homestead garden; herbarium; In-vitro Conservation: germplasm and gene Bank; tissue culture: pollen and spore bank, DNA bank.

PSEVS103
Environment and natural resources: (Credit: 4)

Unit I **(10L)**

Environment: Definition of Environment, Earth, Man and Environment, Evolution of environment, Physico-chemical and Biological Characteristics of environment. Structure and composition of atmosphere, hydrosphere, lithosphere and biosphere. Geographical classification, Distribution and zones.

Unit II **(20L)**

Mass and energy: Transfer of mass and energy across various interfaces. First and second laws of thermodynamics, heat transfer processes, Biochemical cycles, gaseous and sedimentary turnover rate and turnover item, General relationship between landscape and climate. Climates of India, Indian monsoon, Drought, Tropical cyclones and western disturbances. Atmosphere stability and instability, tem-

perature inversion and mixing heights, heat balance of the earth- atmosphere system, global climate change.

.

Unit III **(20L)**

Natural resources: Types of natural resources, Forest resources: use and over-exploitation, deforestation, timber extraction, mining, dams and their effects on forests and tribal people. Water resources: use and utilization of surfaces and ground water, floods drought, dams-benefits and problems. Mineral resources: environmental effects of extracting and using mineral sources. Food resources: World food problems overgrazing, effects of modern agriculture, fertilizers-pesticides problems, Water logging, salinity. Land resources: Land as a resource, Land degradation, man induced landslides, soil erosion and desertification

Unit IV **(10L)**

Energy resources: Concept and demand of energy, Growing energy needs, Renewable and non-renewable sources, use of alternate energy sources, Wind energy, Solar energy, water as source of energy, Biofuels prodution, use and sustainability, use and over exploitation of energy sources and associated problems. Role of an individual in conservation of natural resources. Equitable use resources for sustainable lifestyles.

8) Geography and Energy – Commercial energy systems and national policies: J. D. Chapman

PSEVS104
Environmental Pollution: (Credit: 4)

Unit I **(20L)**

Introduction to Environmental pollution, Air and Water Pollution: Definition and sources of pollution; Different types of pollution and their global, regional and local aspects. Types and sources of air pollutants; Reaction of pollutants in air forming smog, PAN, Acid rain; Atmospheric diffusion and stack performance; Transport of pollutants; Effects of air pollutants on flora and fauna; Sinks of atmospheric gases. Sources of water and their contamination; Types of pollutants, various industrial effluents such as pulp and paper mills, oil exploration and refinery, petrochemicals, iron and steel industries, domestic wastes ,organic debris, agricultural wastes, pesticides; Eutrophication - causes and effects and control measures.

Unit II **(10L)**

Soil pollution and solid waste pollution: Causes of soil pollution; Effects of Fungicides and weedicides on soil components, residual toxicity and pollution. Different kinds of synthetic fertilizer (N, P, K), and their interactions with different components of soil, their toxicity and pollution. Industrial effluents and their interactions with soil components, Contamination by radio nuclides. Solid waste pollution: sources, nature, classification and environmental effects.

Unit III **(15L)**

Radiation and Noise pollution: Radioactive decay; Interaction of radiation with matter; Biological impact and health hazards associated with radiation, Units of radioactivity and radiation dose; Protection against ionizing isotopes and their applications in waste water and air pollution analysis and treatment; Radioactive waste disposal. Basic properties of sound waves – plane and spherical waves, sound pressure, loudness and intensity levels, decibel; Sources of Noise Pollution–Measurement and analysis of sound, Measures to control noise pollution.

Unit IV **(15L)**

Thermal pollution, Oil Pollution and Electronic waste (E-waste): Definition and sources, Chemical and biological effects of thermal pollution, Effect on marine life, bacteria and water quality and other aquatic biota; Thermal pollution from power plants and their control. Oil pollution and marine ecology, sources of oil pollution, factors effecting fate of oil after spillage movement, spreading, evaporation, emulsification, dispersion, remote sensing in water quality monitoring. Sources and types and constituents of E-wastes and its environmental consequences.

4) Air Pollution – Stern

5) Environmental Pollution Control Engineering: C. S. Rao

6) Environmental Chemistry : B.K. Sharma, and H. Kaur

7) Air pollution – threat and response: D. A. Lynn

8) Air pollution and Environmental Protection – Legislative policies, Judicial trend and Social perceptions: N. Kumar; Mittal Publication

SEMESTER I

PSEVSP101
ECOLOGY AND ECOSYSTEMS

A. Minor Experiments

1. Determination of diversity indices in plant communities.
2. To construct ecological pyramids of population sizes in ecosystem.
3. Determination of Chlorophyll content from plant species.
4. Determination of Harvest method from plant species.

B. Major Experiments

1. Determination of Importance value index of species in a plant community.
2. To compare two plant communities
3. Quantitative measurement of plankton in fresh and marine water samples.
4. Determination of primary productivity by light and dark bottle method.

PSEVSP102

Biodiversity

A. Minor Experiments

1. Prepare a map of India, showing bio-geographical zones and expanse of territorial waters.
2. Identification and description of plant species.
3. To plot biosphere reserve on a map of India.
4. Prepare a document of endemic and exotic species of plants and animals for a selected PAN.

B. Major Experiments

1. Indicate distribution range of a plant and animal species identified as endangered on an Indian map.
2. Prepare a map of. Maharashtra showing Protected Area Network (PAN) in it.
3. To study qualitative and quantitative characters of a plant community by quadrate method.
4. To study a plant community by using line transect method, using line, belt and profile transects.

PSEVSP103

Environment and Natural Resources

A. Minor Experiments

1. Determination of total organic matter in soil.
2. Determination of pH value of different types of soil.
3. Determination of water holding capacity of soil.
4. To quantify hydrological cycle in different land use types in or around specified premises.

B. Major Experiments

1. Determination of mechanical composition of soil by Pipette method.
2. To study the soil profiles for their height, color, texture and electrical conductivity.
3. Determination of total nitrogen value of the soil by Kjeldahl's method
4. Determination of SAR value of soil.(Sodium Absorption Ratio)

PSEVSP104

Environmental Pollution

A. Minor Experiments

1. Determination of Total Dissolved Solids from the lake water.
2. Determination of Total Hardness of well water.
3. Measurement of photo density flux by Luxmeter.
4. Measurement and classification of noise pollution.

B. Major Experiments

1. Determination of CO_2 in the atmosphere by volumetric method.
2. Determination of physical parameters of (I) Well water (ii) Industrial of given type effluent (iii) River water (iv) Sea water.
3. Determination of Dissolved Oxygen from Sea water by Winkler's method.
4. Determination of Chemical Oxygen Demand value for industrial waste effluent.

Texts/References:

1. Standard methods for examination of water and waste water , American Public Health Association.
2. A comprehensive laboratory manual for Environmental Sciences and Engineering By P.R. Sreemahadevan Pillai. New Age International Publishers.
3. Chemical and biological methods for water pollution studies By R.K. Trivedi
4. Handbook of water and waste water analysis By S.K. Maiti.
5. Soil and air analysis by S.K. Maiti.

SEMESTER-II

PSEVS201
Environmental Monitoring and Assessment: (Credit: 4)

Unit I **(15L)**

Environmental Monitoring: What is environmental quality? Quality of environment for life on earth and man; Advantages of Environmental Monitoring, Deterioration of environmental quality with reference to anthropogenic impact; Methods of assessment of environmental quality; Short term studies/surveys; Rapid assessment; Continuous short and long term monitoring

Unit II **(15L)**

Environmental Impact Assessment (EIA): Need of EIA; Scope and objectives; Types of environmental impacts; Steps involved in conducting the EIA Studies; Environmental Impact Assessment techniques-Ad-hoc method, checklist method, overlay mapping method, network method, simulation and modeling technique, matrix method, and system diagram technique; Merits and Demerits of EIA studies.

Unit III **(15L)**

Remote sensing and its applications in Environmental Monitoring: Principles and Basic concepts of Remote sensing; EMR & its interaction with matter; Aerial Photography and image recognition; Sensors & platforms; IRS satellites & their sensors; Application of remote sensing in environmental studies: land use mapping, forest survey, habitat analysis, water management, drought monitoring and flood studies, wetland survey ; rainfall estimation, pollution studies, soil conservation, watershed management and vegetation mapping.

Unit IV **(15L)**

Geographical Information System (GIS): Basic principles, Techniques Application in Environmental Sciences. Types of Geographical Data; Data Structure; Vector and Raster data: their Advantages and Disadvantages; Input, verification, storage and out put of geographical data; Importance of Geographical

Information System in environmental studies. Global Positioning System (GPS): basic principles, Applications to environmental studies -Point source pollution, hazard monitoring and assessment.

8. Srivastava, D. C. (2005) Readings in Environmental Ethics: Multidisciplinary perspectives, Rawat Publications,Jaipur.

PSEVS202

Pollution Control Technology: (Credit: 4)

Unit I **(15L)**

Water Pollution control technologies: Sewage and waste water treatments systems; Primary, secondary and tertiary treatments; Measurement of treatment efficiencies; Biological treatments - aerobic versus anaerobic treatments; Environmental pollution control- Bioremediation, Bioaugmentation and Biostimulation; Biofilms in treatment of waste water; Bioreactors for waste water treatments; Reactors types and design; Reactors in series; Development and optimization of membrane bioreactor process for use in sanitary and industrial sewage treatment.

Unit II **(15L)**

Air pollution control technologies and devices: Methods to control air pollution in the environment, Limestone injection and fluidized bed combustion, Desulfurization; Catalytic converter and control of vehicular emission, Gravity settling chamber, Centrifugal collectors- cyclone collector and dynamic precipitators; Electrostatic precipitators; Fabric filters.

Unit III **(15L)**

Solid, Toxic, and Hazardous waste management: solid waste disposal methods – open dumps, ocean dumping, Land fills, Incineration; Recycling and reuse. Organic pollutants and Hazardous waste disposal and management. Management of Radiation, noise, thermal, oil and e-wastes: recycling of waste. Biosorption - Biotechnology and heavy metal pollution; Oil field microbiology; Improved oil recovery; Biotechnology and oil spills; Hydrocarbon degradation.

Unit IV **(15L)**

Biotechnological methods to control pollution:

Bioremediation, Biotransformation Biodegradation and Phytoremediation: In situ and Ex situ bioremediation; Evaluating Bioremediation; Bioremediation of VOCs. Factors affecting process of biodegradation; Methods in determining biodegradability; Contaminant availability for biodegradation.; Use of microbes(bacteria and fungi) and plants in biodegradation and Biotransformation; Phytoremediation: Waste water treatment using aquatic plants; Root zone treatment.

PSEVS203

Green Technology: (Credit: 4)

Unit I **(15L)**

Overview, Principle, concepts and Tools of Green technology: Overview of green chemistry, Chemistry of the atmosphere, principles of sustainable and green chemistry. Basic principles of green technology, concepts of atom economy and carbon trading, tools of green technology. waste minimization and climate change, Zero waste technology, concept of environmentally balanced industrial complexing and industrial ecology, green house effect, climate change, photochemical smog.

Unit II **(15L)**

Green synthetic methods and designs: catalytic methods in green synthesis, safer chemicals - different basic approaches; selection of auxiliary substances (solvents, separation agents), green solvents, solventless processes, immobilized solvents and ionic liquids; energy requirements-use of microwaves, ultrasonic energy; selection of starting materials; use of blocking/protecting groups, catalytic reagents; designing of biodegradable products.

Unit III: **(15L)**

Green Nanotechnology: Introduction to Nanomaterials and green nanotechnology, Fullerene, carbon nanotubes, Nanoparticles; Green nanoparticle production and characterization; Biocompatibility; Nanomedical applications of green nanotechnologies; use of nanotechnologies and materials impact on biodiversity, resource conservation, ecosystems and human.

Unit IV: **(15L)**

Green technology applications: Biocatalysis, green chemistry in industries, fuel cell and electric vehicles, solar energy and hydrogen production, energy from alternate sources; Solar photovoltaic technology, Biofuel production (bio-ethanol and biodiesel), Biomass, prevention/minimization of hazardous/toxic products. Agricultural related practices and food processing, Production of biodegradable materials, concept of green building, Pollution free engineering processes.

PSEVS204

Environmental Policies and Regulations (4 credit)

UNIT-I – Evolution of International Environmental Policy (15L)

- Fundamental principles of environmental protection - sustainable development- Brundtland report 1987.
- Intergenerational and intra-generational Equity, Polluter pays principle, precautionary principle, Public Trust Doctrine.
- Constitutional Perspective: Fundamental right to wholesome environment. Directive principles of state policy. Fundamental duty.
- National Environmental Policy.
- Environmental Regulatory Framework in India.
- Role of International Environmental Agencies -UNEP, GEF, UNFCC and IPCC

UNIT- II – Environmental Movement In India (15L)

- Movements related to Environment Sacredgroves, Bishnoi tradition, Chipko movement, Tehridam, Sardar Sarovar, Narmada dam, Almatti dam, Silent Valley.
- Supreme Court Cases – Ratlam Municipality, Ganga Action Plan, Taj Trapezium, Delhi CNG, Tamil Nadu Tanneries, Doon Valley,Span motels private limited case, Oleum gas case

UNIT-III – International Environmental Treaties and Conventions (15L)

- StockholmConferenceonHumanEnvironment,1972
- Ramsar Convention on Wetlands, 1971
- Montreal Protocol, 1987,
- Basel Convention (1989,1992),
- EarthSummitatRiodeJaneiro,1992
- Kyoto Protocol, 1997
- EarthSummitatJohannesburg,2002.
- Rotterdam Convention on Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade

- Convention on Desertification 1996
- Convention on Biodiversity & Cartagena Protocol on Bio safety

UNIT-IV - Objectives and Provisions of Acts and Rules (15L)

- Indian Forest Act 1927
- Indian Wildlife (Protection) Act, 1972
- Forest Conservation Act 1980
- Forest Rights Act
- Water (Prevention and Control of Pollution) Act, 1974
- Air (Prevention and Control of Pollution) Act 1981
- Environment (Protection) Act, 1986
- Public Liability InsuranceAct,1991
- Bio-Medical Waste (Management & Handling) Rules,1998
- Recycled Plastics Manufacture and Usage Rules, 1999
- Noise Pollution (Regulation and Control) Rules, 2000
- Municipal Solid Waste (Management and Handling Rules) 2000
- Biodiversity Act 2002
- Water (Prevention and Control of Pollution) Cess (Amendment) Act, 2003
- EIA Notification 2006
- The Hazardous Wastes (Management, Handling and Transboundary Movement) Rules,2008
- Wetland Rules 2009
- National Green Tribunal Act 2010
- Coastal Regulation Zones (CRZ) Rules 2011.
- E-waste Management and Handling Rules 2011
- Plastics Manufacture, Sale and Usage Rules, 2011

SEMESTER II

PSEVSP201

ENVIRONMENTAL MONITORING AND ASSESSMENT

A. Minor Experiments

1. Interpretation of Aerial photographs and preparing weather report based on it.
2. Determination of relative humidity from the atmosphere.
3. Determination of particulate matter from the industrial area by High Volume Sampler/Settling method.
4. Determination of Salinity of water by volhard's method.

B. Major Experiments

1. Determination of Cation-exchange capacity, moisture content, alkalinity/acidity of soil sample.
2. To prepare the station based wind rose for an area.
3. Determination of Residual Chlorine from drinking water using colorimetric method.
4. Determination of hydrocarbon from fuel gas using Orsat's apparatus.

PSEVSP202

POLLUTION CONTROL TECHNOLOGY

A. Minor Experiments

1. To isolate and study a pure culture of microorganism's from air, water and sewage.
2. Study the effect of pH on microbial growth.
3. Study the effect of heavy metals on the growth of bacteria.
4. Determination of MPN value of the drinking water and mineral water.

B. Major Experiments

1. Determination of K_2O value of soil by flame photometer.
2. Determination of P_2O_5 from soil by Olson's colorimetric method.

3. Determination of SO_2 by spectrophotometry using high volume sampler.
4. Determination of NO_2 from the atmosphere by Colorimetric method using high volume sampler.

PSEVSP203

GREEN CHEMISTRY

A. Minor Experiments

1. To study the Principle and application of Atomic absorption Spectrophotometry for analysis of metal ions from samples.

2. To study the Principle and application of Nephelometry and Turbidimetry: General discussion, Instruments for nephelometry and turbidimetry

3. To Study the chemical reactions involved in green nanotechnology: Nanoparticle production and characterization.

B. Major Experiments

1. Extraction and separation of organic compounds from soil and biological materials
   a. Ammonium sulphate method (Nichols method),
   b. TCA method,
   c. Acid digestion method,
   d. Wet washing for metals,
   e. Steam distillation for volatiles
2. To study different separation Techniques: Principle and process of solvent extraction,; Chromatography – principle and application of thin layer and ion exchange chromatography, Gas Chromatography and High Performance Liquid Chromatography.
3. Biofuel production methods and characterization for biodiesel and bioethanol.

PSEVSP204

ENVIRONMENTAL POLICIES AND REGULATIONS

A. Minor Experiments

1. Legal Case citation (one per student)
2. Reports on various study tours/academic visits.

B. Major Experiments

1. Preparation/drafting of EIA Report (Chemical Industry, Fertilizer Industry, hydropower station).
2. Report on Eco-tourism.

NOTE:-

Students should undertake field work and survey. The Students should visit different places to collect data to make survey and analyze. At least four places may be visited. The Places of visit could be: Lakes, rivers, estuary and marine, nature parks, water/ sewage/ Industrial effluent treatment plant, Solid waste dump, meteorological centre, mangrove vegetation, industries – food, pharmaceutical, petrochemical, fertilizer, paper, sugar, distillery etc. The students should also be encouraged to participate in the public lectures/ seminars/ workshops etc. on environment related issues.

Reports on each of visit/ activity undertaken must be included in the journal.

M.Sc Environmental Sciences Semester I

Course Code No. & Title	Unit No.	Credits	Internal assessment Marks	External Assessment Marks
PSEVS 101Ecology and Ecosystem	I,II,III,IV	4	40	60
PSEVS102 Biodiversity	I,II,III,IV	4	40	60
PSEVS 103 Environment and Natural Resources	I,II,III,IV	4	40	60
PSEVS 104 Environmental Pollution	I,II,III,IV	4	40	60
PSEVSP 101		2	20	30
PSEVSP 102		2	20	30
PSEVSP103		2	20	30
PSEVSP104		2	20	30

M.Sc Environmental Sciences Semester II

Course Code No. & Title	Unit No.	Credits	Internal assessment Marks	External Assessment Marks
PSEVS201Environmental Monitoring and Assessment	I,II,III,IV	4	40	60
PSEVS202 Pollution Control and Technology	I,II,III,IV	4	40	60
PSEVS 203 Green Technology	I,II,III,IV	4	40	60
PSEVS 204 Environmental Policies and Regulations	I,II,III,IV	4	40	60
PSEVSP201		2	20	30
PSEVSP202		2	20	30
PSEVSP203		2	20	30
PSEVSP204		2	20	30

A) Internal Assessment:- 40%

a) Theory

Sr. No.	Evaluation type	Marks
1.	Two Assignments/Case study/Project	20
2.	One Class Test (Multiple questions objective)	10
3.	Active participation in routine class instructional deliveries (case studies/seminars/presentations)	05
4.	Overall Conduct as a responsible student, manners, skill in articulation, leadership qualities demonstrated through co-curricular, etc.	05

b) Practicals

Sr. No.	Evaluation type	Marks
1.	One Practical	10
2.	Journal	05
3.	Viva	05

B) External Assessment:- 60%

a) Semester end Theory Assessment- 60% 60 Marks

i) Duration – These examinations shall be of two hours duration for each paper.

ii) Theory Question Paper Pattern:-

- There shall be five questions each of 12 Marks. On each unit there will be one question and the first one will be based on entire syllabus.
- All questions shall be compulsory with internal choice within the questions. Each question will be of 18 to 20 Marks with options.
- Questions shall be subdivided into sub-questions a,b,c….. and the allocation of marks depend on the weightage of the topic

b) Practicals 30 Marks (Each Unit)

SEMESTER I

Practical Examination
Four Days Examination (Each 4 Hrs. Per day) **Marks 120**

Day 1: PSEVSP 101 – Ecology and Ecosystem

[I] – Major Experiment	20 Marks
[II] – Minor Experiment	10 Marks

Day 2: PSEVSP 102 – Biodiversity

[I] – Major Experiment	20 Marks
[II] – Minor Experiment	10 Marks

Day 3: PSEVSP 103 – Environment and Natural Resources

[I] – Major Experiment	20 Marks
[II] – Minor Experiment	10 Marks

Day 4: PSEVSP 104 – Environmental Pollution

[I] – Major Experiment	20 Marks
[II] – Minor Experiment	10 Marks

Note:

1. Students should undertake field work and survey. The Students should visit different places to collect data to make survey and analyze. At least four places may be visited. The Places of visit could be: Lakes, rivers, estuary and marine, nature parks, water/ sewage/ Industrial effluent treatment plant, Solid waste dump, meteorological centre, mangrove vegetation, industries – food, pharmaceutical, petrochemical, fertilizer, paper, sugar, distillery etc. The students should also be encouraged to participate in the public lectures/ seminars/ workshops etc. on environment related issues.
   Reports on each of visit/ activity undertaken must be included in the journal.
2. A student is expected to submit a journal certified by the head of the Department/ Head of the institution.
3. A student will not be permitted to appear at the practical examination unless he/ she produce a certified journal. If the journal is lost, the students should produce a certificate from the Head of the Department/ Head of the institution stating that he/ she have satisfactory completed the experimental work.

SEMESTER II

Practical Examination
Four Days Examination (Each 4 Hrs. Per day) **Total Marks 120**

Day 1: PSESP 201 –Environmental Monitoring and Assessment

[I] – Major Experiment	20 Marks
[II] – Minor Experiment	10 Marks

Day 2: PSESP 202 – Pollution Control and Technology

[I] – Major Experiment	20 Marks
[II] – Minor Experiment	10 Marks

Day 3: PSESP 203 – Green Technology

[I] – Major Experiment	20 Marks
[II] – Minor Experiment	10 Marks

Day 4: PSESP 204 – Environmental Policies and Regulations

[I] – Major Experiment	20 Marks
[II] – Minor Experiment	10 Marks

Note:

4. Students should undertake field work and survey. The Students should visit different places to collect data to make survey and analyze. At least four places may be visited. The Places of visit could be: Lakes, rivers, estuary and marine, nature parks, water/ sewage/ Industrial effluent treatment plant, Solid waste dump, meteorological centre, mangrove vegetation, industries – food, pharmaceutical, petrochemical, fertilizer, paper, sugar, distillery etc. The students should also be encouraged to participate in the public lectures/ seminars/ workshops etc. on environment related issues.
   Reports on each of visit/ activity undertaken must be included in the journal.
5. A student is expected to submit a journal certified by the head of the Department/ Head of the institution.
6. A student will not be permitted to appear at the practical examination unless he/ she produce a certified journal. If the journal is lost, the students should produce a certificate from the Head of the Department/ Head of the institution stating that he/ she have satisfactory completed the experimental work.

UNIVERSITY OF MUMBAI
M.SC. ENVIRONMENTAL SCIENCES
Semester I/Semester II Examination
2012 – 2013

Course PSES_

Maximum Marks: 60
Duration: 2 Hrs.
Marks Option 90

Question 1: Unit I
Question 2: Unit II
Question 3: Unit III
Question 4: Unit IV
Question 5: Unit I to Unit IV (Mixed questions)

Instructions:

i. All Questions are compulsory
ii. All questions carry equal marks
iii. Draw neat and labeled diagrams wherever necessary

1. Answer any **two** questions from the following **(Based on Unit I)**
- a. 06
- b. 06
- c. 06

2. Answer any **two** questions from the following **(Based on Unit II)**
- a. 06
- b. 06
- c. 06

3. Answer any **two** questions from the following **(Based on Unit III)**
- a. 06
- b. 06
- c. 06

4. Answer any **two** questions from the following **(Based on Unit IV)**
- a. 06
- b. 06
- c. 06

5. Answer any **two** questions from the following **(Based on Unit IV)**
- a. 03
- b. 03
- c. 03
- d. 03
- e. 03
- f. 03

Projects / Assignments (for Internal Assessment)

i. Projects/Assignments should be drawn for the component on Internal Assessment from the topics in **Module 1 to Module 4**.

ii. Students should be given a list of possible topics - at least 3 from each Module at the beginning of the semester.

iii. The Project/Assignment can take the form of Street-Plays / Power-Point Presentations / Poster Exhibitions and similar other modes of presentation appropriate to the topic.

iv. Students can work in groups of not more than 8 per topic.

v. Students must submit a hard / soft copy of the Project / Assignment before appearing for the semester end examination.

QUESTION PAPER PATTERN (Semester III)

The Question Paper Pattern for Semester End Examination shall be as follows:

TOTAL MARKS: 75 **DURATION: 150 MINUTES**

QUESTION NUMBER	DESCRIPTION	MARKS ASSIGNED
1	**i.** Question 1 A will be asked on the meaning / definition of concepts / terms from all Modules. **ii.** Question 1 B will be asked on the topic of the Project / Assignment done by the student during the Semester **iii.** In all 8 Questions will be asked out of which 5 have to be attempted.	**a)** Total marks: 15 **b)** For 1 A, there will be 3 marks for each sub-question. **c)** For 1 B there will be 15 marks without any break-up.
2	Descriptive Question with internal option (A or B) on Module 1	15
3	Descriptive Question with internal option (A or B) on Module 2	15
4	Descriptive Question with internal option (A or B) on Module 3	15
5	Descriptive Question with internal option (A or B) on Module 4	15

2B. Skill Enhancement Courses (SEC)

Foundation Course in NSS - III

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	Value System & Gender sensitivity	12
2	Disaster preparedness & Disaster management	10
3	Health, hygiene & Diseases	13
4	Environment & Energy conservation	10
	Total	**45**

Sr. No.	Modules / Units
1	**Value System & Gender sensitivity**
	UNIT - I – Value System Meaning of value, Types of values- human values and social responsibilities- Indian value system- the concepts and its features **UNIT - II - Gender sensitivity and woman empowerment** Concept of gender- causes behind gender related problems- measures Meaning of woman empowerment- schemes for woman empowerment in India
2	**Disaster preparedness & Disaster management**
	UNIT - I - Basics of Disaster preparedness Disaster- its meaning and types Disaster preparedness- its meaning and methods **UNIT - II - Disaster management** Disaster management- concept- disaster cycle - role of technology in disaster response- role of as first responder – the study of 'Avhan' Model
3	**Health, hygiene & Diseases**
	UNIT - I - Health and hygiene Concept of complete health and maintenance of hygiene **UNIT - II - Diseases and disorders- preventive campaigning** Diseases and disorders- preventive campaigning in Malaria, Tuberculosis, Dengue, Cancer, HIV/AIDS, Diabetes
4	**Environment & Energy conservation**
	UNIT - I Environment and Environment enrichment program Environment- meaning, features , issues, conservation of natural resources and sustainability in environment **UNIT - II Energy and Energy conservation program** Energy- the concept, features- conventional and non- conventional energy Energy conservation- the meaning and importance

Revised Syllabus of Courses of B.Com. (Accounting and Finance) Programme at Semester III with Effect from the Academic Year 2017-2018

2B. Skill Enhancement Courses (SEC)

Foundation Course in NCC - III

Modules at a Glance

Sr. No.	Modules	No. of Lectures
1	National Integration & Awareness	10
2	Drill: Foot Drill	10
3	Adventure Training and Environment Awareness and Conservation	05
4	Personality Development and Leadership	10
5	Specialized subject (ARMY)	10
	Total	**45**

Sr. No.	Modules / Units
1	**National Integration & Awareness**
	Desired outcome: The students will display sense of patriotism, secular values and shall be transformed into motivated youth who will contribute towards nation building through national unity and social cohesion. The students shall enrich themselves about the history of our beloved country and will look forward for the solutions based on strengths to the challenges to the country for its development. • Freedom Struggle and nationalist movement in India. • National interests, Objectives, Threats and Opportunities. • Problems/ Challenges of National Integration. • Unity in Diversity
2	**Drill: Foot Drill**
	Desired outcome: The students will demonstrate the sense of discipline, improve bearing, smartness, turnout, develop the quality of immediate and implicit obedience of orders, with good reflexes. • Side pace, pace forward and to the rear • Turning on the march and whiling • Saluting on the march • Marking time, forward march and halt in quick time • Changing step • Formation of squad and squad drill
3	**Adventure Training, Environment Awareness and Conservation**
3A	**Adventure Training**
	Desired outcome: The students will overcome fear & inculcate within them the sense of adventure, sportsmanship, espirit-d-corp and develop confidence, courage, determination, diligence and quest for excellence. • Any Two such as – Obstacle course, Slithering, Trekking, Cycling, Rock Climbing, Para Sailing, Sailing, Scuba Diving etc.
3B	**Environment Awareness and Conservation**
	Desired outcome: The student will be made aware of the modern techniques of waste management and pollution control. • Waste management • Pollution control, water, Air, Noise and Soil
4	**Personality Development and Leadership**
	Desired outcome: The student will inculcate officer like qualities with desired ability to take right decisions. • Time management • Effect of Leadership with historical examples • Interview Skills • Conflict Motives- Resolution

Sr. No.	Modules / Units
5	**Specialized Subject: Army Or Navy Or Air**
	<u>Army</u> **Desired outcome:** It will acquaint, expose & provide knowledge about Army/ Navy/ Air force and to acquire information about expanse of Armed Forces ,service subjects and important battles **A. Armed Force** • Task and Role of Fighting Arms • Modes of Entry to Army • Honors and Awards **B. Introduction to Infantry and weapons and equipments** • Characteristics of 5.56mm INSAS Rifle, Ammunition, Fire power, Stripping, Assembling and Cleaning • Organization of Infantry Battalion. **C. Military history** • Study of battles of Indo-Pak War 1965,1971 and Kargil • War Movies **D. Communication** • Characteristics of Walkie-Talkies • Basic RT Procedure • Latest trends and Development (Multi Media, Video Conferencing, IT) ***OR*** **<u>Navy</u>** **A. Naval orientation and service subjects** • Organization of Ship- Introduction on Onboard Organization • Naval Customs and Traditions • Mode of Entry into Indian Navy • Branches of the Navy and their functions • Naval Campaign (Battle of Atlantic, Pearl Harbour, Falkland War/Fleet Review/ PFR/ IFR)s **B. Ship and Boat Modelling** • Types of Models • Introduction of Ship Model- Competition Types of Model Prepare in NSC and RDC • Care and handling of power-tools used- maintenance and purpose of tools

Sr. No.	Modules / Units
	C. Search and Rescue • Role of Indian Coast Guard related to SAR **D. Swimming** • Floating and Breathing Techniques- Precautions while Swimming ***OR*** **AIR** **A. General Service Knowledge** • Organization Of Air Force • Branches of the IAF. **B. Principles of Flight** • Venturi Effect • Aerofoil • Forces on an Aircraft • Lift and Drag **C. Airmanship** • ATC/RT Procedures • Aviation Medicine **D. Aero- Engines** • Types of Engines • Piston Engines • Jet Engines • Turboprop Engines

Projects / Assignments (for Internal Assessment)

i. Projects/Assignments should be drawn for the component on Internal Assessment from the topics in **Module 1 to Module 4**.

ii. Students should be given a list of possible topics - at least 3 from each Module at the beginning of the semester.

iii. The Project/Assignment can take the form of Street-Plays / Power-Point Presentations / Poster Exhibitions and similar other modes of presentation appropriate to the topic.

iv. Students can work in groups of not more than 8 per topic.

v. Students must submit a hard / soft copy of the Project / Assignment before appearing for the semester end examination.

QUESTION PAPER PATTERN (Semester III)

The Question Paper Pattern for Semester End Examination shall be as follows:

TOTAL MARKS: 75 **DURATION: 150 MINUTES**

QUESTION NUMBER	DESCRIPTION	MARKS ASSIGNED
1	**i.** Question 1 A will be asked on the meaning / definition of concepts / terms from all Modules. **ii.** Question 1 B will be asked on the topic of the Project / Assignment done by the student during the Semester **iii.** In all 8 Questions will be asked out of which 5 have to be attempted.	**a)** Total marks: 15 **b)** For 1 A, there will be 3 marks for each sub-question. **c)** For 1 B there will be 15 marks without any break-up.
2	Descriptive Question with internal option (A or B) on Module 1	15
3	Descriptive Question with internal option (A or B) on Module 2	15
4	Descriptive Question with internal option (A or B) on Module 3	15
5	Descriptive Question with internal option (A or B) on Module 4	15

1. Database Management System

Modules at a Glance

SN	Modules	No. of Lectures
1	Introduction to Database Management System (DBMS)	15
2	Relational Database Design	15
3	Transaction Management and Recovery System	15
4	SQL Concept	15
	Total	**60**

SN	Modules/ Units
1	**Introduction to Database Management System (DBMS)**
	• Concept of Database, Database Management System: Concept,features, Importance and Evolution • Environment, Classifications, Advantages and Issues of using DBMS, Functional component • Three Level of Architecture, Implications of the Database Approach , Database Languages and Interfaces, The Database System Environment
2	**Relational Database Design**
	• Codd's rule, Entity relationship model, Entity Types, Attributes, Keys , • Roles and Structural Constraints, Constraints on Relationship Types, Basic Relational Algebra Operations • Additional Relational Operations • Roles and functional Dependencies, Normalization, Mapping the ER model to Relational DB
3	**Transaction Management and Recovery System**
	• Transaction Management: Transaction Concept, Transaction State, Implementation of Atomicity and Durability, Implementation of Isolation - Testing for serializability. • Recovery System: Failure Classification, Storage Structure, Recovery and Atomicity - Log - Based Recovery - Recovery with Concurrent Transactions • Buffer Management - Failure with loss of non-volatile storage, Advance Recovery systems, Remote Backup systems.
4	**SQL Concept**
	• Basics of SQL: Form of Basic SQL Query - Examples of Basic SQL Queries, Multi table Queries, • Introduction to Nested Queries, Correlated Nested Queries • NULL values - Comparison using Null values - Disallowing NULL values, Complex Integrity Constraints in SQL Triggers and Active Data bases.

Master of Commerce (M.Com) Programme at Semester III
(To be implemented from Academic Year- 2017-2018)

Group D: E-Commerce

3. Network Infrastructure and Payment System

Modules at a Glance

SN	Modules	No. of Lectures
1	Introduction to Network infrastructure for e-commerce	15
2	Internet Protocol, Security and Protection	15
3	E-payment System	15
4	Security Protocol, Threats and Measures	15
	Total	**60**

SN	Modules/ Units
1	**Introduction to Network infrastructure for E-Commerce**
	• Requirements for Network infrastructure for e-commerce, Market forces influencing I-way, Component of I-way, Global Information distribution Network, • Network Access equipment, Strategic Alliances and I-Way Infrastructure, Public policy issues shaping I-way • Telephone based infrastructure, Cable/ TV based infrastructure, Wireless infrastructure, Commercial online infrastructure, Narrow band V/S Broad band Network,
2	**Internet Protocol, Security and Protection**
	• TCP/IP Internet protocol for Network Infrastructure, Wireless Access Protocol (WAP), Mobile Network Infrastructure • Internet, Intranet and extranet as E-commerce infrastructure, Network Infrastructure Security- External and Internal Attack • Integrated Services Digital Network (ISDN), Protecting Network infrastructure - Steps in hacking Network Infrastructure, A new model to protect Network infrastructure
3	**E-payment System**
	• E-Payment System- Concept, Online Payment System – prepaid e-payment service, postpaid e-payment system;, Advantages and Limitations of Payment System, Role of E-payments, • Classification of Payment System, Scope of Payment system, Payment meditation services V/S Payment system • Payment processing Network, Payment Processing Settlement, Payment Gateway
4	**Security Protocol, Threats and Measures**
	• Security Protocol, Digital certificates, Security threats in E-com environment, Credit & legal risk of e-payment system. • Credit Card based Payment System, Electronic Payment security- Encryption, Digital signatures, Digital Certificate, Public Key Infrastructure (PKI) • Secure Socket Layer (SSL), 3D SET and Secure, Case studies in E- payment system.

Revised Syllabus of Courses of
Master of Commerce (M.Com) Programme at Semester III
(To be implemented from Academic Year- 2017-2018)

Group D: E-Commerce

4. Logistic & supply chain Management in E-Commerce

Modules at a Glance

SN	Modules	No. of Lectures
1	Logistic in E-Commerce	15
2	Warehouse and E-logistics	15
3	Introduction to Supply Chain Management (SCM)	15
4	Logistics/Supply Chain Management in the Global Environment-	15
	Total	**60**

SN	Modules/ Units
1	**Logistic in E-Commerce**
	• Logistic in E-commerce – Features, Significance, Evolution, E-Commerce logistics in developed market, • ICT infrastructure for future logistics, E- logistics for transport modes and nodes, Airfreight, Rail-freight, Road-freight, Sheep-Freight • Automating E-logistics- B2C E-commerce fulfillment, E-fulfillment dimension, Inventory Management
2	**Warehouse and E-logistics**
	• Warehouse Management System (WMS)- Functions, Connectivity of WMS solution into ERP, Warehousing challenges of e-commerce, • Radio Frequency Identification (RFID)- Cost and benefits, RFID to enhance data capture processes in warehouse environment • GS1 keys used in logistics and E-procurement, The Global Data Synchronization Network (GDSN), Electronic Product Code Information System (EPCIS)
3	**Introduction to Supply Chain Management (SCM)**
	• SCM- Concept, Significance, IT applications, Evolution of global SCM • Value Chain Management- Concepts and features, Challenges, Sustainability • E-Supply Chain planning(Component); E-Supply chain fusion; Channel Management and Channel Integration
4	**Logistics/Supply Chain Management in the Global Environment**-
	• Managing the Global Supply Chain, Impact of Globalization on Logistics and Supply Chain Management, • Global Logistics Trends, Global Issues and Challenges in Logistics and Supply Chain Management. • New trends in logistics and SCM- Technology in SCM, Artificial intelligence, Single window system for Global SCM

Revised Syllabus of Courses of
Master of Commerce (M.Com) Programme at Semester III
(To be implemented from Academic Year- 2017-2018)

Group D: E-Commerce

5. Business Models in E-Commerce & ICT Applications

Modules at a Glance

SN	Modules	No. of Lectures
1	Introduction to E-enterprise and Business Models	15
2	E-commerce Business Models	15
3	Introduction to Information Communication Technology(ICT)	15
4	Vital ICT Applications	15
	Total	**60**

SN	Modules/ Units
1	**Introduction to E-enterprise and Business Models**
	• E-Commerce and E-enterprise- Concepts, Features, types of Business models, Difference between E-commerce and E-business, • Eight key elements of a business model, E-tailing Business Models, Primary revenue Models in e- commerce. • e-Commerce Process Models: E-business Models Based on the Relationship of Transaction Parties, e-commerce Sales Life Cycle (ESLC) Model, selection of E-commerce business model
2	**E-commerce Business Models**
	• E-commerce Business Models: Business models in emerging E-commerce areas, Business to Consumer (B2C)- Characteristics, Process. • Business to Business (B2B)- Characteristics, Importance, Alternative models of B2B, Features of C2C and C2B • Marketing and Business strategies: B2C and B2B E-commerce, Role of Websites in B2C
3	**Introduction to Information Communication Technology(ICT)**
	• Evolution of computers – Features and design – Managing Hardware, Software, Computer Languages . Operating Systems – DOS • Information Communication Technology(ICT)- Concept, Importance, Components, Use of ICT in E-commerce, • Role of ICT in driving E-commerce business, ICT and E-commerce relationship, ICT Infrastructure and E-commerce
4	**Vital ICT Applications**
	• E-Governance: Models – G2G, G2B, G2C, Benefits and risks of E-Governance, ICT in manufacturing – overview of CAD in conjunction with CAM, • E-environment- Geographical Information System (GIS) weather forecasting, E-education- statistical packages (SPSS), Computer aided learning/e-learning in schools and over the Internet. • E-health –Stress, Repetitive Strain Injury (RSI), Eyestrain, Extremely Low Frequency (ELF) radiation. Computers, health and the law.

Master of Commerce (M.Com) Programme

Under Choice Based Credit, Grading and Semester System

Course Structure

(To be implemented from Academic Year- 2017-2018)

Semester IV

SN	Modules/ Units
1	**Portfolio Management – An Introduction**
	A) Portfolio Management – An Introduction Investment - Meaning, Characteristics, Objectives, Investment V/s Speculation, Investment V/s Gambling and Types of Investors Portfolio Management – Meaning, Evolution, Phases, Role of Portfolio Managers, Advantages of Portfolio Management. Investment Environment in India and factors conducive for investment in India. **B) Portfolio Analysis and Selection** Portfolio Analysis – Meaning and its Components, Calculation of Expected Return and Risk, Calculation of Covariance, Risk – Return Trade off. Portfolio Selection – Meaning, Feasible Set of Portfolios, Efficient Set of Portfolios, Selection of Optimal Portfolio, Markowitz Model, Limitations of Markowitz Model, Measuring Security Return and Portfolio Return and Risk under Single Index Model and Multi Index Model.
2	**Portfolio Revision and Evaluation and Bond Evaluation**
	A) Portfolio Revision and Evaluation - Portfolio Revision – Meaning, Need, Constraints and Strategies. Portfolio Evaluation – Meaning, Need, Measuring Returns (Sharpe, Treynor and Jensen Ratios) and Decomposition of Performance. **B) Bond Valuation**– Meaning, Measuring Bond Returns – Yield to Maturity, Yield to call and Bond Pricing. Bond Pricing Theorems, Bond Risks and Bond Duration. (Practical Problems on YTM and Bond Duration)
3	**Fundamental and Technical Analysis**
	A) Fundamental Analysis - Economy Analysis – Meaning, Framework of Economic Analysis, Forecasting, Barometric or Indicator Approach, Econometric Model Building and Opportunistic Model Building. Industry Analysis – Concept of Analysis, Industry Life Cycle, Industry Characteristics. Company Analysis – Financial Statements, Analysis of Financial Statements, (Practical questions on Debt equity ratios, total debt ratio, proprietary ratios, interest coverage ratio, Profitability ratios related to sales, investment, equity shares and Efficiency or Activity Ratios) and Assessment of risk (Leverages) **B) Technical Analysis -** Dow Theory , Meaning and Principles of Technical Analysis, Price Chart, Line Chart, Bar Chart, Japanese Candlestick Chart, Trends and Trends and Trend Reversals, Chart Patterns, Support and Resistance, Reversal Patterns, Continuation Patterns and Elliot Wave Theory, Mathematical Indicators – Calculation of Moving Averages (Simple and Exponential Moving Average), Oscillators and Relative strength Index, Market Indicators and Fundamental Analysis V/s Technical Analysis
4	**Efficient Market Theory and CAPM**
	A) Efficient Market Theory - Random Walk Theory, The Efficient Market Hypothesis , Forms of Market Efficiency , Competitive Market Hypothesis **B) CAPM-** Fundamental Notions of Portfolio Theory, Assumption of CAPM, Efficient Frontier with Riskless Lending and Borrowing, Capital Market Line, Security Market Line and Pricing of Securities with CAPM. Arbitrage Pricing Theory (APT) – The Return Generating Model, Factors Affecting Stock Return, Expected Return on Stock, APT V/s CAPM.

Group D: E-Commerce

1. E-Commerce Security and Law

Modules at a Glance

SN	Modules	No. of Lectures
1	Introduction to E-Commerce Security	15
2	Security Threats and Measures	15
3	Introduction to Cyber Law	15
4	Cyberspace Laws	15
	Total	**60**

SN	Modules/ Units
1	**Introduction to E-Commerce Security**
	• E-commerce security: Concept, Need/Importance, Security Issues in E-Commerce- Security risks of e-commerce, • Threats and Risk Management: Type of threats, Sources of threats, Security tools & Risk – Types of security, management approach • Network Security: Encryption, Protecting Web server with a Firewall, Firewall and the Security Policy, Network Firewalls and Application Firewalls, Proxy Server
2	**Security Threats and Measures**
	• Current threats, Cryptography, public key certificates and infrastructures, authentication and authorization certificates, • Mobile code security, security of agent-based systems, secure electronic transactions, electronic payment systems, intellectual property protection, • Symmetric and Asymmetric Cryptosystem, Role of electronic signature, EDI Security
3	**Introduction to Cyber Law**
	• Introduction to Cyber Laws-World Scenario, Cyber-crime& Laws in India and their limitations, • Threats in Computer Systems: Virus, Cyber Crime, Hacking, Web Vandals, E-mail Abuse, Software Piracy and Patents. • The problems of internet jurisdictions, Law relating to Electronic records, Importance of Electronic Records as Evidence.
4	**Cyberspace Laws**
	• Cyberspace and Internet in India- Penalties, Offences and Compensation • Protection of Cyber Consumers in India and CPA 1986, International efforts related to cyberspace laws, Trace an IP address, • Security Tools, Client server network security, Encryption and concepts of public and private key infrastructure

2. Advance technology for E-Commerce

Modules at a Glance

SN	Modules	No. of Lectures
1	Introduction to Advanced technology for E-commerce	15
2	Information Publishing Technology	15
3	E-commerce Success with Contain Marketing	15
4	New Trends	15
	Total	**60**

SN	Modules/ Units
1	**Introduction to Advanced technology for E-commerce**
	• Advanced technology for E-commerce: Concept of E-commerce, Internet & WWW, Functions, • Types of technology, Electronic Data Interchange (EDI)- Benefits, Transaction and examples, Multimedia technology – desktop Video Conferencing • Securing Network Transaction: Cryptology, Digital Signature, E-mail security
2	**TCP/IP and Information Publishing Technology**
	• Internet Protocols – OSI Model, TCP/IP, FTP; LAN, WAN • Information Publishing Technology - HTML, URL, HTTP, HTML FORM, CGI SERVICES, • eXtensible Markup Language (XML) – Application and Architecture, Data Mining and Web Mining
3	**Mobile Agents& WAP**
	• Mobile Agents- Concept, Mobility and security issues, Client Server Approach v/s Mobile Agent based approach, • Mobile computing, Mobile users in Global E-commerce, Coalition Formation • Wireless Application Protocol (WAP) - Benefits and Architecture, Web Server and client (Web Browser).
4	**New Trends**
	• New E-commerce Technology Trends, Broadband technologies, Affiliate Marketing, Content marketing - challenges, • Key performance indicators (KPIs),Complex Server and Network Infrastructure, transitioning to Virtualization & Cloud Computing, use of fully or partially outsourced IT support • Supercharged Kiosks, Role of Instant Messaging (IM), Digital literacy and multimedia design

3. Management Information System

Modules at a Glance

SN	Modules	No. of Lectures
1	Introduction to Management Information System (MIS)	15
2	Business & Designing Information System	15
3	Information and System Concept	15
4	Decision Support System & Development of MIS	15
	Total	**60**

SN	Modules/ Units
1	**Introduction to Management Information System (MIS)**
	• MIS: Concept, Characteristics, Components, Strategic uses, Challenges of Global information system • Information System Resources: Selection of Business Software and Hardware, Business Network and Data Warehouses • Business Intelligence, Knowledge Management, System Planning and Development
2	**Business &Designing Information System**
	• Classification of MIS: Transaction Process System (TPS), Process Control System (PCS), Enterprise Collaboration System (ECS), Business information system, • System Design: Conceptual Design, Objectives, Methods • Structuring Data of MIS: Pyramid structure, Querying, Aggregating and Visualizing Data
3	**Information and System Concept**
	• Information: Concept, Types, Dimensions of Information, Information Quality • System: Kinds, Elements of system, Human as information processing system • Need of IT Industry, Scope of Infrastructure Management, Attributes of Computing System
4	**Decision Support System& Development of MIS**
	• Decision Making: Concept, Types, Simon's Model, Decision Making and MIS • Supporting Management Decision: Key Performance Indicators (KPI), Planning and Implementation. • Development of MIS: Steps in developing a right MIS, System Development Approaches, System analysis and design- Determinants and requirement

Group D: E-Commerce

4. Digital Marketing

Modules at a Glance

SN	Modules	No. of Lectures
1	Introduction to Digital Marketing & SEO	15
2	Google analytics and SMO	15
3	SEM and Social Media	15
4	Email and Mobile Marketing	15
	Total	**60**

SN	Modules/ Units
1	**Introduction to Digital Marketing & SEO**
	• Digital Marketing - Introduction, Features, Strategies, Types, Aligning Internet with Business Objectives, • User Behaviour & Navigation, Branding & User Experience, Customer Insights • Search Engine Optimization(SEO) – Search Engines Basics, Functioning of Search Engines, On&off-page Optimization,
2	**Google analytics and SMO**
	• Google Analytics–Concepts, steps, Accounts-profiles and users navigation, Basic metrics, • The main sections of Google Analytics reports-Traffic Sources, Direct referring and search traffic; • Social Media Optimization (SMO) - Concepts, Pros & Cons, bookmarking & aggregating, content, content sharing, knowledge sharing; connecting to social networking
3	**SEM and Social Media**
	• Search Engine Marketing (SEM) - Concept, Understanding Google search - Organic & Paid, Overview of Google Adwords, Google Adsense, Microsoft AdCenter and Yahoo Search Marketing, • Campaign Management, Pay Per Click (PPC) Management, Conversion Tracking, Targeting & Analytics, Keyword Selection, • Conversion Metrics- CPA, CTR, Campaigns - Google PPC Campaigns, LinkedIn Campaigns, Facebook Campaign, YouTube Advertising
4	**Email and Mobile Marketing**
	• E-mail Marketing - User Behaviour, Segmentation, Key Metrics, Best Practice Case Studies, E-marketing strategies, • Tracking landing pages, Choosing your metrics, A/B and Multivariate testing, Analyzing test results, Setting your budgets; • Mobile Marketing - Concept, SMS Strategy, Mobile Advertising, Mobile Optimized Websites, Mobile Apps, Proximity Marketing,

5. International Business, Law and Taxation

Modules at a Glance

SN	Modules	No. of Lectures
1	Use of Internet in the International Business	15
2	International Outsourcing and Ethics	15
3	International Law and Taxation	15
4	Government Intervention in International Business	15
	Total	**60**

SN	Modules/ Units
1	**Use of Internet in the International Business**
	• International Business: Concept, Features, External and Internal Factors of International business • Internet and International business: Significance, Use of Internet, Impact of E-commerce and Barriers • International E-commerce business: Concept of E-business, Features, Evolution,
2	**International Outsourcing and Ethics**
	• Global outsourcing: Concept, Forms, Drivers, Development in IT-BPO Sector • International Outsourcing in India: Benefits,Growth Drivers of India, Limitations • Ethics in International e-Business, Constraint in e-Business in India, International e-Commerce Benchmarking,
3	**International Law and Taxation**
	• International Legal environment in E-commerce, European Community Law, Intellectual Property Law, Pillaging Patent • United States Taxation of International e-Commerce, Law and Policy of Organisation for Economic Co-operation and Development (OECD) • International Taxation and e-Commerce: Direct and Indirect taxation, Relevance of E-commerce, Effect of E-commerce on consumption taxes, Emerging Tax Policy,
4	**Government Intervention in International Business**
	• Instruments of Government Intervention: Tariff and Non- Tariff Barriers, Investment Barriers, • Policies regarding e-commerce: FDI Policy, Foreign Trade Policy, Export-Import Policy- Methods of E-payment, e-Documentations • Rationale for Government Intervention: Defensive and offensive rationale, Economic Freedom and Government Support

Scheme of Examination:

The performance of the learners will be evaluated in two components. One component will be the Internal Assessment component carrying 40% marks and the second component will be the Semester End Examination component carrying 60% marks.

Internal Assessment:

The Internal Assessment will consist of one class test of 40 marks for each course excluding projects. The question paper pattern will be shown as below:

Question Paper Pattern

(Internal Assessment)

Maximum Marks: 40 marks

Questions to be set: 03

Duration: 1½ hours

Question No	Particular	Marks
Q-1	Objective Questions Students to answer 10 sub questions out of 15 sub questions. *(*Multiple choice/ True or False/ Match the columns/ Fill in the blanks)* ***OR*** Objective Questions A) Sub Questions to be asked 08 and to be answered any 05 B) Sub Questions to be asked 08 and to be answered any 05 *(*Multiple choice/ True or False/ Match the columns/ Fill in the blanks)*	10 Marks
Q-2	Concept based short questions Students to answer 5 sub questions out of 8 sub questions.	10 Marks
Q-3	Practical problems or short questions Students to answer 02 sub questions out of 03 sub questions	20 Marks

Question Paper Pattern

(Practical Courses)

Maximum Marks: 60

Questions to be set: 04

Duration: 2 Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Practical Question	15 Marks
	OR	
Q-1	Practical Question	15 Marks
Q-2	Practical Question	15 Marks
	OR	
Q-2	Practical Question	15 Marks
Q-3	Practical Question	15 Marks
	OR	
Q-3	Practical Question	15 Marks
Q-4	Objective Question *(Multiple Choice/ True or False/ Fill in the Blanks/ Match the Columns/ Short Questions.)*	15 Marks
	OR	
Q-4	Short Notes *(Any three out of five)*	15 Marks

Note:

Full length question of 15 marks may be divided into two sub questions of 08 and 07 marks.

Question Paper Pattern

(Theoretical Courses)

Maximum Marks: 60

Questions to be set: 04

Duration: 2 Hrs.

All Questions are Compulsory Carrying 15 Marks each.

Question No	Particular	Marks
Q-1	Full length Question	15 Marks
	OR	
Q-1	Full length Question	15 Marks
Q-2	Full length Question	15 Marks
	OR	
Q-2	Full length Question	15 Marks
Q-3	Full length Question	15 Marks
	OR	
Q-3	Full length Question	15 Marks
Q-4	Objective Question *(Multiple Choice/ True or False/ Fill in the Blanks/ Match the Columns/ Short Questions.)*	15 Marks
	OR	
Q-4	Short Notes *(Any three out of five)*	15 Marks

Note:

Full length question of 15 marks may be divided into two sub questions of 08 and 07 marks.

M.Com II
Project work

Work Load:

Work load for Project Work is 1 hour per batch of 15 students per week for the teacher. The student shall do field work and library work in the remaining 3 hours per week.

Guidelines:

- The project topic may be undertaken in any area of Elective Courses.
- Each of the students has to undertake a Project individually under the supervision of a teacher-guide.
- The student shall decide the topic in consultation with the teacher-guide concerned.
- University/college should allot P G Teacher for guidance to the students based on her / his specialization.
- There shall be double valuation of project by the teacher- guide concerned and an external examiner appointed by the University/College with equal weightage.
- The teacher-guide along with the external examiner appointed by the University/College for the valuation of project shall conduct viva voce examination with equal weightage.
- The date of viva voce shall be intimated to the students by the Department well in advance.
- The project report shall be prepared as per the broad guidelines given below:
  a. Project Report shall be typed in Times New Roman with one and half line spacing in 12 Font Size and 1.5 spacing.
  b. The size of the Project Report shall be with a minimum of 25,000 words and a maximum of 40,000 words. (
  c. Project Report shall be printed on both sides of the paper.
  d. The Project Report shall be bounded.

Evaluation:

The Project Report evaluation is for 60 Marks and the Viva –Voce examination is for 40 Marks (without presentation).

No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.

Project Report (60 marks):

Introduction and other areas covered	– 20 marks
Presentation, Analysis & Findings	-- 30 marks
Conclusion & Recommendations	-- 10 marks

Viva-Voce (40 marks):

In course of Viva-Voce Examination, the question may be asked in the following areas:

Importance / relevance of the Study, Objective of the Study, Methodology of the Study/ Mode of Enquiry	-- 10 marks
Ability to explain the analysis, findings, concluding observations, recommendation, limitations of the Study	-- 20 marks
Overall Impression (including Communication Skill)	-- 10 marks

Passing:

- Minimum of Grade E in the project component
- In case of failing in the project work, the same project can be revised for ATKT examination.
- Absence of student for viva voce: If any student fails to appear for the viva voce on the date and time fixed by the department such student shall appear for the viva voce on the date and time fixed by the Department, such student shall appear for the viva voce only along with students of the next batch.

Objective: To equip the student with the theory inputs with respect to understanding the fundamentals of computers and necessary skills to operate the generic applications and standard operating systems

Contents of syllabus for USHO 107

(Theory – 15 Hrs)

Unit I

Sr. Topic Hr

A Introduction to Computer Fundamentals **15 Hours**

- 5 Parts of Computer
- Difference between Hardware & Software
- Difference Between Data and Information
- Types of Computers – Server (Types), Clients (Types of Portable Computer)
- Application Software
- System Software
- Software Copyright – Freeware, Shareware, Licensed

B Software

- Application Software – Word Processor, Spreadsheet, Database Management, Presentation, Media, Outlook, Browser and Utility Software like Acrobat Reader
- System Software – Operating System (Windows, Linux, Android)
- Device Driver
- Utility Software – VLC Player, File Converter

C Hardware

- Introduction of Central Processing Unit
- Processor – Intel, AMD, Clock Speed
- Input Devices – Keyboard, Mouse, Mic, Scanner, Barcode Reader, RFID, Touch Screen
- Output Devices – Displays (CRT, TFT, LCD, Plasma, LED, Projector)
- Display Resolution
- Printers – Inkjet, Laser, Thermal
- Storage Devices – Primary (RAM & ROM), Secondary (HDD, Flash Drive, USB, CD/DVD, Blue Ray, Media Players)

D Networking

- Types of Network (LAN, WAN, MAN)
- Topology (Bus, Star, Ring, Mesh & Tree)
- Network Hardware – (Cables – RJ45, RJ11, MTRJ, Switch, Routers, Access Point, Modem)
- IP and MAC Address, Subnet, Gateway, DNS
- Understanding Network Address & Node Address
- Network Security – Firewalls (Hardware & Software)
- Bandwidth

E Internet

- Intranet, Internet & Extranet
- WWW, HTTP, Domains
- VPN & VoIP
- Search Engines
- ISP & Bandwidth

(Practical 30 Hrs)

Sr.	Topic	Hr
1	**Computer Architecture (DEMO)** • Motherboard, RAM, PCI Slots, SMPS & different Ports	**02**
2	**Operating System** • DOS Commands (CMD, IP, IPCONFIG, DIR, CLS, PING etc.) • Introduction to Desktop • Control Panel • Configuring Printers (Standalone & Network) • Sharing & Security	**06**
3	**Word 2007** **Microsoft word** File, Edit, View, Insert, Format, Tools, Table Commands Page Setup, Print Options, Setting Page Margins Clip Arts, Inserting Pictures/Charts/Files Correcting Text, Cut, Paste, Undo, Redo, Deleting Blank Lines, Inserting A Page, Typing Over Text, Replacing Text, Moving And Copying Text. Menu Method, Key Board Method, Tool Bar Method, Drag & Drop Method, Checking Text, The Spell Checker, Auto Correct Check Up, The Sanrus, The Grammar Checker, Formatting A Text, Changing Type Style, Character Highlighting, Alignment Of Text, Left, Right, Center, Justifying Text-Types & Tab Setting, Setting Tab Using Ruler, Indenting Paragraphs, Increasing And Decreasing Indents, Using Ruler To Set Indents, Spacing Paragraph Line Spacing, Spacing Between Paragraphs, Page Views, Normal Views,	**06**

Page Layout View, Outline View, Print Preview, "Full Screen View, Master Document View, Magnification, 200 M Control In Any View, Page Formatting, Setting Margins, Paper Size, Printing In Landscape Or Portrait Orientation, Page Numbering, Adjoining Page Numbering, Deleting Page Numbering, Header & Footer, Creating And Editing, Inserting And Deleting Pages In A Document, Saving The Text, Saving The File To Disk, Closing A File, Opening A Non-Work Document, Printing The Text.

4 EXCEL **06**

Processing With Ms Excel, Starting Excel, Starting New Work Book, Entering And Editing Data, Formatting Work Sheet, Sorting The Data, The Worksheet Selecting Cells And Ranges, Selecting With Mouse, Data Entry, Entering Numbers, Text, Date 4 Time Entries, Entering Series, Filing A Text Series With Auto Fill, Filing A Number Series, Editing Data, Clearance And Replacing Contents Of A Cell, Deleting The Contents Of A Range Of Cell, Rearranging Work Sheet Data, Copying, Auto Correct, Spell Checking, File dose, Formatting Data, Font Selection, Aligning Data, Format Style, Formatting Work Book, Arranging, Hiding, Un hiding, Inserting Columns And Rows, Adjusting Width, Copying And Moving, Inserting And Deleting Sheets From Work Book, Mathematical Operator, Exponentiation And Percentage Operators, Logical Or Comparison Operators, Using Mouse To Create A Formula.

Inserting A Chart, Chart Types, Modifying Chart, Adding Drawing To The Chart, Printing In Excel, Print Parameters, Default And Changing Default Settings, Sorting, Printing Etc.

5 POWERPOINT **08**

Power Point Terminology-Getting Into Power Point-Creating, Opening And Saving Presentations- The Easy Way-Using Auto Content Wizard-Working With Blank Presentation-Using The Templates-Using The Slide Master-Working With Color Schemes-Working With Slides-Making A New Slide -Move, Copy Or Duplicate Slides-Delete A Slide-Copy A Slide From One Presentation To Another-Go To Specific Slide-Change The Lay Out Of A Slide-Zoom In Or Out Of Slide-Working With Text In Power Point-Cutting, Copying and Pasting-Formatting Text, Change Font & Size, Shadowing, Embossing-Alignment The Text-Left, Center, Right And Justify-Power Of Graphics In Power Point-Working With Clipart Picture-Using Microsoft Excel-Chart-Using Organization Charts-Power Point Drawings-Ways To Draw-Adding Lines-Connecting Lines-Borders And Adding Curves-Creating Word Tables-Making Great Looking Presentations(Putting On A Show)-Arranging, Creating Animated Slides- Manually Advancing Slides-Adding And Removing Transitions-Running A Presentation Continuously-Printing The Presentation Elements.

OBJECTIVES:

At the end of Semester – I

- To learn about the importance of hygiene & sanitation in the catering industry
- To get acquainted with the food standards.
- To learn about ways to minimize food poisoning and infections.
- To understand function, sources & deficiency of nutrients.
- To gain basic knowledge of nutrition
- To gain knowledge about maintenance of good health.
- To understand the changes brought about in food nutrients during processing

Semester I – 15 weeks

UNIT	TOPIC	TOTAL NO. OF HOURS
I	**INTRODUCTION TO HYGIENE** 1.1 Rules & importance of hygiene 1.2 Personal Hygiene 1.3 Cleaning of premises 1.4 Pest Control 1.5 Waste disposal 1.6 Dishwashing methods	15
	HACCP 2.1 Introduction 2.2 Importance 2.3 VII Critical Control Points	
	MICROBES 3.1 Introduction (Bacteria, Yeast, Mould) 3.2 Classification 3.3 Factors for growth 3.4 Role of microbes in manufacture of fermented foods (dairy products, Veg. & bakery preparations, alcoholic Bev., vinegar, fermented Indian foods)	
II	**FOOD BORNE ILLNESS** 1.1 Natural Toxins (Kesari Dal, Potatoes, Mushrooms, Shell Fish, Peanuts) 1.2 Chemical (Tin, Copper, Arsenic, Lead) 1.3 Bacterial toxins (staphylococcus, salmonella, Clostridium perfringens, Clostridium botulinum) 1.4 Food poisoning & Infections • Definitions • Food contamination & Spoilage • Differentiation • Examples	15

FOOD ADULTERATION 2.1 Definition and types 2.2 Test to detect (coffee, semolina, flour, ghee, butter, margarine, oil, milk, turmeric, coriander powder, pepper corn , meat etc. 2.3 Food standards in India (PFA, FPO, MPO, BIS-ISI, AGMARK, ISO)	

	FOOD ADDITIVES 3.1 Colours & Flavours 3.2 Browning reactions-causes, desirable & undesirable effects)	
	FOOD PRESERVATION ❖ **Methods of Preservation** 4.1 Natural & Chemical Preservation 4.2 Low temperature(Refrigeration, Freezing) 4.3 High Temperature(Pasteurisation, Sterilization, Canning) 4.4 Irradiation	
	FOOD STORAGE 5.1 Dry food store 5.2 Refrigerated store 5.3 Freezer store 5.4 Holding at High Temperature 5.5 Stock rotation & cross contamination	
III	**INTRODUCTION TO NUTRITION** 1.1- Definitions(Food, balanced diet, nutrition, over nutrition, under nutrition, malnutrition, health) 1.2 - Balanced diet-Food pyramid 1.3 - Meal planning steps	15

	CARBOHYDRATES 2.1 - Classification & composition 2.2 - Functions & requirements, sources 2.3 - Excess & Deficiency 2.4 -Uses in food preparation (Gelatinization, Gel formation, Dextrinization, Gluten formation, Caremelization)	
	PROTEINS 3.1 - Classification & Composition 3.2 - Functions & requirements, Sources 3.3 - Excess & Deficiency 3.4 - Uses in food preparation 3.5 - Effect of heat (Denaturation, Coagulation) 3.6 - Gel formation 3.7 - Foaming	
	FATS&OILS 4.1 - Classification & Composition 4.2 - Functions & requirements, Sources 4.3 - Excess & Deficiency 4.4 - Types, Sources, Uses 4.5 - Factors causing deterioration 4.6 - Rancidity 4.7 - Flavour reversion 4.8 - Shortening 4.9 - Polymerisation	

	VITAMINS, MINERALS, WATER & COLLOIDS 5.1 - Functions 5.2 - Sources 5.3 - Deficiency & Excess 5.4 - Fat soluble & water soluble Vitamins (A,D,E,K,B1,B2,B3,C) 5.5 - Minerals (Ca,P, Na,K,Fe,I,Fl) 5.6 - Importance, balance & Sources 5.7 - Cooking losses & prevention 5.8 - Definitions (sol, gels, foam, emulsion) 5.9 - Examples(roasting, grilling, frying, baking, boiling, poaching, microwave) 5.10 - Importance in food industry

Objective: To equip the student with the theory inputs with respect to understanding the fundamentals of computers and necessary skills to operate the generic applications and standard operating systems

Contents of syllabus for USHO 107

(Theory – 15 Hrs)

Unit I

Sr. Topic Hr

A Introduction to Computer Fundamentals **15 Hours**

- 5 Parts of Computer
- Difference between Hardware & Software
- Difference Between Data and Information
- Types of Computers – Server (Types), Clients (Types of Portable Computer)
- Application Software
- System Software
- Software Copyright – Freeware, Shareware, Licensed

B Software

- Application Software – Word Processor, Spreadsheet, Database Management, Presentation, Media, Outlook, Browser and Utility Software like Acrobat Reader
- System Software – Operating System (Windows, Linux, Android)
- Device Driver
- Utility Software – VLC Player, File Converter

C Hardware

- Introduction of Central Processing Unit
- Processor – Intel, AMD, Clock Speed
- Input Devices – Keyboard, Mouse, Mic, Scanner, Barcode Reader, RFID, Touch Screen
- Output Devices – Displays (CRT, TFT, LCD, Plasma, LED, Projector)
- Display Resolution
- Printers – Inkjet, Laser, Thermal
- Storage Devices – Primary (RAM & ROM), Secondary (HDD, Flash Drive, USB, CD/DVD, Blue Ray, Media Players)

D Networking

- Types of Network (LAN, WAN, MAN)
- Topology (Bus, Star, Ring, Mesh & Tree)
- Network Hardware – (Cables – RJ45, RJ11, MTRJ, Switch, Routers, Access Point, Modem)
- IP and MAC Address, Subnet, Gateway, DNS
- Understanding Network Address & Node Address
- Network Security – Firewalls (Hardware & Software)
- Bandwidth

E Internet

- Intranet, Internet & Extranet
- WWW, HTTP, Domains
- VPN & VoIP
- Search Engines
- ISP & Bandwidth

(Practical 30 Hrs)

Sr.	Topic	Hr
1	**Computer Architecture (DEMO)** • Motherboard, RAM, PCI Slots, SMPS & different Ports	**02**
2	**Operating System** • DOS Commands (CMD, IP, IPCONFIG, DIR, CLS, PING etc.) • Introduction to Desktop • Control Panel • Configuring Printers (Standalone & Network) • Sharing & Security	**06**
3	**Word 2007** **Microsoft word** File, Edit, View, Insert, Format, Tools, Table Commands Page Setup, Print Options, Setting Page Margins Clip Arts, Inserting Pictures/Charts/Files Correcting Text, Cut, Paste, Undo, Redo, Deleting Blank Lines, Inserting A Page, Typing Over Text, Replacing Text, Moving And Copying Text. Menu Method, Key Board Method, Tool Bar Method, Drag & Drop Method, Checking Text, The Spell Checker, Auto Correct Check Up, The Sanrus, The Grammar Checker, Formatting A Text, Changing Type Style, Character Highlighting, Alignment Of Text, Left, Right, Center, Justifying Text-Types & Tab Setting, Setting Tab Using Ruler, Indenting Paragraphs, Increasing And Decreasing Indents, Using Ruler To Set Indents, Spacing Paragraph Line Spacing, Spacing Between Paragraphs, Page Views, Normal Views,	**06**

Page Layout View, Outline View, Print Preview, "Full Screen View, Master Document View, Magnification, 200 M Control In Any View, Page Formatting, Setting Margins, Paper Size, Printing In Landscape Or Portrait Orientation, Page Numbering, Adjoining Page Numbering, Deleting Page Numbering, Header & Footer, Creating And Editing, Inserting And Deleting Pages In A Document, Saving The Text, Saving The File To Disk, Closing A File, Opening A Non-Work Document, Printing The Text.

4 EXCEL **06**

Processing With Ms Excel, Starting Excel, Starting New Work Book, Entering And Editing Data, Formatting Work Sheet, Sorting The Data, The Worksheet Selecting Cells And Ranges, Selecting With Mouse, Data Entry, Entering Numbers, Text, Date 4 Time Entries, Entering Series, Filing A Text Series With Auto Fill, Filing A Number Series, Editing Data, Clearance And Replacing Contents Of A Cell, Deleting The Contents Of A Range Of Cell, Rearranging Work Sheet Data, Copying, Auto Correct, Spell Checking, File dose, Formatting Data, Font Selection, Aligning Data, Format Style, Formatting Work Book, Arranging, Hiding, Un hiding, Inserting Columns And Rows, Adjusting Width, Copying And Moving, Inserting And Deleting Sheets From Work Book, Mathematical Operator, Exponentiation And Percentage Operators, Logical Or Comparison Operators, Using Mouse To Create A Formula.

Inserting A Chart, Chart Types, Modifying Chart, Adding Drawing To The Chart, Printing In Excel, Print Parameters, Default And Changing Default Settings, Sorting, Printing Etc.

5 POWERPOINT **08**

Power Point Terminology-Getting Into Power Point-Creating, Opening And Saving Presentations- The Easy Way-Using Auto Content Wizard-Working With Blank Presentation-Using The Templates-Using The Slide Master-Working With Color Schemes-Working With Slides-Making A New Slide -Move, Copy Or Duplicate Slides-Delete A Slide-Copy A Slide From One Presentation To Another-Go To Specific Slide-Change The Lay Out Of A Slide-Zoom In Or Out Of Slide-Working With Text In Power Point-Cutting, Copying and Pasting-Formatting Text, Change Font & Size, Shadowing, Embossing-Alignment The Text-Left, Center, Right And Justify-Power Of Graphics In Power Point-Working With Clipart Picture-Using Microsoft Excel-Chart-Using Organization Charts-Power Point Drawings-Ways To Draw-Adding Lines-Connecting Lines-Borders And Adding Curves-Creating Word Tables-Making Great Looking Presentations(Putting On A Show)-Arranging, Creating Animated Slides- Manually Advancing Slides-Adding And Removing Transitions-Running A Presentation Continuously-Printing The Presentation Elements.

6 Outlook **02**

- Configuration

Scheme of Examination (Theory)

(b) Internal assessment- 40 marks

Sr. No.	Evaluation type	Marks
1	Two assignments/ case study/ projects	20
2	One class test (multiple choice questions objective)	10
3	Active participation in routine class instructional deliveries (case studies/ seminars/ presentation)	05
4	Overall conduct as a responsible student, manners, skill, in articulation, leadership qualities demonstrated through organizing co-curricular activities, etc.	05
	Total	40

(b) Semester end examination (Pattern of Question Paper):-

Theory

First Semester (Duration 2 hrs.)		
Questions in Examination Paper	Units	Maximum Marks
Q - 1	1	15
Q - 2	2	15
Q - 3	3	15
Q - 4	1,2,3	15
Total		60

- Question 1, 2 & 3 should be from topics mentioned in the table total 3 sub questions to be attempted of 5 marks each out of the choice of 4 sub questions.
- Question no. 4 should be of short answer type questions having six sub questions (2 from each unit) of 3 marks each. Total 5 questions are to be attempted.

Conduct of Practical Examination

(a) Internal assessment- 20 marks

Sr. No.	Evaluation type	Marks
1	Two best practical	10
2	Journal	05
3	Viva	05
		20

(b) Semester end assessment - 30 marks

- A candidate will asked to carry out skill based practical in the Computer lab.
- Assessment will be done as follows

File	Grooming	Skill Set-I	Skill Set-II	Viva -voce
10	10	10	10	10

- Marks obtained out of 50 shall be converted to out of 30 to the next integer for final calculation.

Contents of syllabus for USHO 108

OBJECTIVES:

At the end of Semester – I

- To learn about the importance of hygiene & sanitation in the catering industry
- To get acquainted with the food standards.
- To learn about ways to minimize food poisoning and infections.
- To understand function, sources & deficiency of nutrients.
- To gain basic knowledge of nutrition
- To gain knowledge about maintenance of good health.
- To understand the changes brought about in food nutrients during processing

Semester I – 15 weeks

UNIT	TOPIC	TOTAL NO. OF HOURS
I	**INTRODUCTION TO HYGIENE** 1.1 Rules & importance of hygiene 1.2 Personal Hygiene 1.3 Cleaning of premises 1.4 Pest Control 1.5 Waste disposal 1.6 Dishwashing methods	15
	HACCP 2.1 Introduction 2.2 Importance 2.3 VII Critical Control Points	
	MICROBES 3.1 Introduction (Bacteria, Yeast, Mould) 3.2 Classification 3.3 Factors for growth 3.4 Role of microbes in manufacture of fermented foods (dairy products, Veg. & bakery preparations, alcoholic Bev., vinegar, fermented Indian foods)	
II	**FOOD BORNE ILLNESS** 1.1 Natural Toxins (Kesari Dal, Potatoes, Mushrooms, Shell Fish, Peanuts) 1.2 Chemical (Tin, Copper, Arsenic, Lead) 1.3 Bacterial toxins (staphylococcus, salmonella, Clostridium perfringens, Clostridium botulinum) 1.4 Food poisoning & Infections • Definitions • Food contamination & Spoilage • Differentiation • Examples	15

FOOD ADULTERATION 2.1 Definition and types 2.2 Test to detect (coffee, semolina, flour, ghee, butter, margarine, oil, milk, turmeric, coriander powder, pepper corn , meat etc. 2.3 Food standards in India (PFA, FPO, MPO, BIS-ISI, AGMARK, ISO)	

	FOOD ADDITIVES 3.1 Colours & Flavours 3.2 Browning reactions-causes, desirable & undesirable effects)	
	FOOD PRESERVATION ❖ **Methods of Preservation** 4.1 Natural & Chemical Preservation 4.2 Low temperature(Refrigeration, Freezing) 4.3 High Temperature(Pasteurisation, Sterilization, Canning) 4.4 Irradiation	
	FOOD STORAGE 5.1 Dry food store 5.2 Refrigerated store 5.3 Freezer store 5.4 Holding at High Temperature 5.5 Stock rotation & cross contamination	
III	**INTRODUCTION TO NUTRITION** 1.1- Definitions(Food, balanced diet, nutrition, over nutrition, under nutrition, malnutrition, health) 1.2 - Balanced diet-Food pyramid 1.3 - Meal planning steps	15

	CARBOHYDRATES 2.1 - Classification & composition 2.2 - Functions & requirements, sources 2.3 - Excess & Deficiency 2.4 -Uses in food preparation (Gelatinization, Gel formation, Dextrinization, Gluten formation, Caremelization)	
	PROTEINS 3.1 - Classification & Composition 3.2 - Functions & requirements, Sources 3.3 - Excess & Deficiency 3.4 - Uses in food preparation 3.5 - Effect of heat (Denaturation, Coagulation) 3.6 - Gel formation 3.7 - Foaming	
	FATS&OILS 4.1 - Classification & Composition 4.2 - Functions & requirements, Sources 4.3 - Excess & Deficiency 4.4 - Types, Sources, Uses 4.5 - Factors causing deterioration 4.6 - Rancidity 4.7 - Flavour reversion 4.8 - Shortening 4.9 - Polymerisation	

	VITAMINS, MINERALS, WATER & COLLOIDS 5.1 - Functions 5.2 - Sources 5.3 - Deficiency & Excess 5.4 - Fat soluble & water soluble Vitamins (A,D,E,K,B1,B2,B3,C) 5.5 - Minerals (Ca,P, Na,K,Fe,I,Fl) 5.6 - Importance, balance & Sources 5.7 - Cooking losses & prevention 5.8 - Definitions (sol, gels, foam, emulsion) 5.9 - Examples(roasting, grilling, frying, baking, boiling, poaching, microwave) 5.10 - Importance in food industry

OBJECTIVES:
At the end of semester II:-

- Programme activities and lecture to learn about emerging Indian Corporate World and Global Phenomenon with stress upon hospitality industry.
- To train the student as future managers and make them understand the working of an organisation.
- Teaching through PowerPoint presentations, case studies, activities, brain storming sessions, SWOT/PEST analysis etc.
- Trying to bridge the gap between management studies and real corporate world through real time stories from newspapers, journals and business magazines, books.
- Encouraging students to read more so as to refine their analytical power and sharpen business sense and become more aware of the business environment.
- Opportunity to participate in business discussions, article/book reviews and presentations

Semester II – 15 weeks

UNIT NO.	TOPICS	TOTAL NO. OF HOURS
I.	**1. INTRODUCTION TO MANAGEMENT** 1.1 Evolution of management 1.2 Definitions and Importance of Management 1.3 Management as a Science and Art 1.4 Principles of Management (14 principles of Fayol) 1.5 Levels of Management and their functions 1.6 Managerial skills 1.7 Functions of Management 1.8 Process of communication 1.9 Business communication **2. PLANNING** 2.1 Definition and Characteristics 2.2 Planning Process (Steps in Planning) 2.3 Essentials of a Good Plan 2.4 Vision and mission Statements 2.5 Planning with relation to hospitality industry 2.6 Meaning and Process of MBO 2.7 Meaning and steps in Decision Making	15
II	**3. ORGANIZING** 3.1 Meaning and Process of Organizing 3.2 Formal and Informal Organization and Distinction 3.3 Span of control (Meaning and Importance) 3.4 Tall and Flat Organization 3.5 Definition and Process of Delegation 3.6 Centralization and Decentralization of Authority 3.7 Departmentation and Basis of Departmentation 3.8 Organisation chart 3.9 Closed vs open system of organisation 3.10 Line and Staff organization **4. STAFFING AND COORDINATION** 4.1 Meaning and Imporance of Staffing 4.2 Internal and External Sources of Recruitment 4.3 Coordination - As an essence of Management 4.4 Principles of Coordination	15

III	**5. DIRECTING, MOTIVATING AND LEADING** 5.1 Meaning and importance of Directing 5.2 Element of Directions / Components 5.3 Definition of Motivation and factors 5.4 Maslow's Need Hierarchy Theory 5.5 Mc Gregor's Theory X and Theroy Y 5.6 Definition of Leadership and Leader 5.7 Qualities of a Leader 5.8 Leadership Styles 5.9 Leaders from hospitality industry 5.10 Leadership theory **6. CONTROLLING** 6.1 Meaning 6.2 Steps in Control process 6.3 Types of control:feed forward,feedback,concurrent 6.4 Time Management	15

(Food Production Practical)

Each institute will prepare their own menus as per the pattern given below. Well-known and authentic dishes from particular region should be included while compiling the menu.

States
1. Andhra Pradesh / Hyderabadi 2. Bengal & North Eastern States 3. Goa 4. Gujarat / Parsi / Bohri 5. Karnataka 6. Kashmir 7. Kerala / Malabari 8. Maharashtra / Malvani 9. Punjab 10. Rajasthan 11. Tamil Nadu / Chettinad 12. Uttar Pradesh / Dum & Avadh / Lucknavi

BAKERY & CONFECTIONERY PRACTICAL

Demonstration of the following
Cakes – 4 varieties
Pastries – Short Crust, Puff Pastry, Flaky Pastry & Choux Pastry
Cookies – 6 varieties

FOOD PRODUCTION PRACTICAL MENUS – SEMESTER 3 or 4			
MENU NO.	**PRACTICAL TOPIC**	**Any 6 dishes per Menu (Prepare any 1 or 2 dishes per course)**	
1	Andhra Pradesh / Hyderabadi Cuisine	Starter Options:	Shammi Kebab / Shikampuri Kebab
		Main Course Options:	Tamater ka Kut / Mirchi ka Salan/ Baghara Baingan/ Burhani/ Achari Gosht/ Nehari/ Haleem/ Khichra/ Murgh Malai Korma
		Breads, Rice & Dal Options:	Sheermal/ Bakharkhani/ Khameeri Roti/ Hyderabadi Biryani/ Sofyani Biryani/ Qabooli/ Khatti Dal
		Dessert Options:	Double ka Meetha/ Khubani ka Meetha/ Sheer Qurma/ Gil e Firdaus
2	North Eastern States / Bengali Cuisine	Starter Options:	Begun Bhaja/ Panthar Ghugni/ Alu Chop/ Egg Roll
		Main Course Options:	Shukto/ Alu Posto/ Palak Panch Phoran / PanchMishali Charchari/ Macher Jhol/ macher Kalia/ Doi Mach/ Chingri Malai Kari/ Mangsho
		Breads, Rice & Dal Options:	Luchi/ Dhakai Paratha/ Ghee Bhat/ Cholar Dal/ Mishti Mug Dal
		Dessert Options:	Gulab jamun/ Balu Shahi/ Rasmalai/ Mishti Doi
3	Goan Cuisine	Soup & Starter Options:	Caldo Verde/ Sopa Grossa/ Rissois de Camarao/ Stuffed Prawn Papad/Goan Fried Fish/Pomfret Recheiado/ Prawn Balchao/ Kismur

		Main Course Options:	Goan Fish Curry/ Amottik Fish Curry/ Sorpotel/ Vindaloo/ Baffat/ Chicken Cafreal/ Galina Xacuti
		Breads, Rice & Dal Options:	Sannas/ Pav/ Boiled Rice/Coconut Rice/ Daali Thoy
		Dessert Options:	Neureos/ Coconut Bhatt/ Bebinca/Dodol/Perada
4	Gujarati Cuisine	Starter Options:	Dhokla/Patra/Muthiya
		Main Course Options:	Oondhiya/ Sev Tameta nu Shaak/ Tuvar Ringna nu Shaak/ Flower Batata nu Shaak
		Breads, Rice & Dal Options:	Thepla/Rotla/Munga Dal Khichdi/ Vagheral Bhaat/ Shaakwala Bhaat/ Dal Dhokli/ Kadhi
		Dessert Options:	Basundi/ Dudh Paak/ Mohan Thaal/ Gor Papdi
5	Bohri Cuisine	Starter Options:	Shammi kebab/ Kheema Samosa/ Kheema Pattice/ Kheema Cutlet (with mint chutney)
		Main Course Options:	Alishan Baingan/ Bohri Chicken Kari/ White Mutton kari/ Dabba Gosht
		Rice & Dal Options:	Chawal/ Khada Masala Pulav/ Kheema Pulav/ Dal/Palidu
		Dessert Options:	Thuli/Malido
6	Parsi Cuisine	Starter Options:	Papeta nu Pattice/ Papeta ne Cheese na Pattice/ Eda Chutney na pattice
		Main Course Options:	Kolmi no Patio/ Saas ni Macchi/ Salli Murghi/ Patra ni Macchi/ Margi na Farcha/ Mutton Dhansaak
		Rice/ Dal Option:	Dhan (steam rice)/ Brown Rice/Dar
		Dessert Options:	Lagan nu Custard/ Kopra Pak

FOOD PRODUCTION PRACTICAL MENUS – SEMESTER 3 or 4

MENU NO.	PRACTICAL TOPIC	Any 6 dishes per Menu (Prepare any 1 or 2 dishes per course)	
7	Karnataka Cuisine	Starter Option:	Alu Bonda
		Main Course Options:	Uppu Curry/ Chana Ghashi/ Upkari/ Koli Gassi/ Mangalorean Fish Curry
		Bread & Rice Options:	Jolada(Jwar Roti)/ Neer Dosa/ Bisi Bele Huliana
		Dessert Options:	Worne/ Chiroti
8	Kashmiri Cuisine	Starter Options:	Seekh Kebab/ Shammi Kebab
		Main Course Options:	Dum Oluv/ Navratan Korma/ Dhaniwal Korma/ Mutton Roganjosh/Gustaba/Rista
		Breads & Rice Options:	Khameeri Naan/ Khameeri Roti/ Kashmiri Pulav/ Yakhni Pulav

		Dessert Options:	Phirni/ Zarda/Seb ki Kheer
9	Kerala / Malabari Cuisine	Main Course Veg. Options:	Drumstick Ullitheeyal/ Avial/ Olan/Kalan/Erussery
		Main Course Non veg. Options:	Meen Moilee/ Meen Curry/ Malabari Fish Curry/ Kozhi Vartha Curry/ Mutton Kuruma/ Malabari Egg Curry
		Breads, Rice & Dal Options:	Kerala Parotta/ Lime Rice/ Boiled Rice/ Nai Chor(Ghee Bhat)/ Rassam/ Sambhar
		Dessert Options:	Payasam
10	Maharashtrian / Malwani Cuisine	Starter & Salad Options:	Sabudana Wada/ Aluchi wadi/ Kothimbirwadi/Batata Vada/Koshimbir/Khamang Kakdi
		Main Course Options:	Bharli Vangi/ Zhunka/ Kala Vatana Rassa/ Btatyachi Bhaaji/ Kombdicha Rassa/ Kolhapuri Mutton/ Malvani Kombdi
		Breads, Rice & Dal Options:	Bhakri/ Chapati/ Thalipith/Puri/Masale Bhat/Tendli Bhat/Varan/Amti/Dal Bhaji/Usal/Sol Kadhi
		Dessert Options:	Sheera/ Shrikhand/ Kheer/ Besan Ladu/Puran Poli/ Modak
11	Punjabi Cuisine	Starter & Accompaniment Options:	Dahi Bhalle/Paneer Pakoda/ Alu Tikki/ Tandoori Chicken/ Chicken Tikka/ Hara Bhara Kebab/ Alu Chat/ Alu Papdi Chat/Boondi Raita/ Pudina Raita
		Main Course Options:	Matar Paneer/ Malai Kofta/ Sarson da Saag/ Baigan Bharta/ Pindi Chole/ Rajmah/Murgh Makhani/ Palak Gosht
		Breads, Rice & Dal Options:	Makai di Roti/ Missi Roti/ Pudina Paratha/ Mooli Paratha/ Kulcha/ Bhatura/ Matar Pulav/ Jeera Rice/ Dal Makhani/ Dal Amritsari/ Punj Ratni Dal/ Punjabi Kadhi
		Dessert Options:	Gajrela/ Rabri/Jalebi/Malpoora
FOOD PRODUCTION PRACTICAL MENUS – SEMESTER 3 or 4			
MENU NO.	**PRACTICAL TOPIC**	**Any 6 dishes per Menu (Prepare any 1 or 2 dishes per course)**	
12	Rajasthani Cuisine	Starter Options:	Pyaz ki Kachori/ Matar ki Kachori
		Main Course Options:	Panchmel Subji/ Gatta Curry/ Ker Sangri/ Methi Mangodi Subji/ Amrud ki Subji/Lal Maas/ Makai ka Soweta/ Maas ki Kadhi

(SEMESTER – III/IV) – 15 Weeks

Objective: To equip the student with the required knowledge to understand the theory and practical aspects of the functioning of the systems department of a hotel with focus on skills development in handling Property Management Systems software.

(Theory – 45 Hrs)

UNIT 1 **15 Hrs**

Management Information Systems

- Definition of MIS
- MIS Personnel
- Managing multi processor environments
- MIS security issues

Selecting and Implementing Computer systems

- Analysing current information needs
- Collecting sales information
- Establishing system requirements
- Requesting proposals from vendors
- Contract negotiation

UNIT 2 **15 Hrs**

Reservation Systems

- E-Distribution systems
- Intersell agencies
- Central Reservation Systems
- Property Level Reservation systems
- Reservations through the internet

Rooms Management and Guest Accounting Applications

- Room Management Module
- Guest Accounting Module

Point of Sale Technologies

- POS Order entry units
- POS Printers
- Accounts Settlement
- Managing Guest Accounts
- POS Software
- Automated Beverage control systems

UNIT 3 **15 Hrs**

Food & Beverage Management Applications

- Recipe Management
- Sales Analysis
- Menu Management
- Integrated Food Service software
- Automated Beverage system reports

Sales & Catering Applications

- Hotel Sales Office Automation
- Revenue Management
- Catering Software

Students will be sent for Industrial Training either during the IIIrd or IVth semester as per the convenience of Industry/Institute. Classes will be conducted for the batch of students not undergoing Industrial Training.

The Industrial training semester will be a minimum of 20 weeks.
This is required as students need minimum 4 weeks exposure to each of the core departments.(Kitchen, Food & Beverage Service, Front Office & Housekeeping. The Training hours are calculated on the basis of 6 days a week and minimum 8 hours per day.

Semester IV - B.Sc. Hospitality Studies

Course Code	Subject	Class Room Instruction Face to Face									Notional				Credits

	Total	-	48			960	-	-	960			40		1000	-	20	-	20

L one lecture / period of 60 minutes (1 hr.) **P**

Notional includes time spent in library / home / other institutions for preparation and writing of assignments, quizes, open book test, journal, case studies, project, practical, field work, excursion, etc.

INDUSTRIAL TRAINING – USHO 401

Semester - IV

1. Exposure to Industrial Training is an integral part of the 4th semester. The class would be divided into two groups or as the case may be. The 20 weeks industrial training would be divided into all the major departments of the hotel.

2. Industrial Training will require an input of 120 working days i.e. (20 weeks x 06 days = 120 days).

3. For award of marks, 50% marks of IT would be on the basis of feed-back from the industry in a prescribed Performance Appraisal Form (PAF). It will be the students responsibility to get this feed-back / assessment form completed from departments of the hotel for submission to the institute at the end of Industrial Training. For the remaining 50% marks(10%-Presentation Skills,10% Viva, 10% Log Book and 20% Training Report) students would be assessed on the basis of seminar / presentation before a select panel. A hard copy of the report will also have to be submitted to the panel.

4. Responsibilities of Institute, hotel and the student / trainee with aims & objectives have been prescribed for adherence.

5. Once the student has been selected / deputed for industrial Training by the institute, he / she shall not be permitted to undergo IT elsewhere. In case students make direct arrangements with the hotel for Industrial Training, these will necessarily have to be approved by the institute. Students selected through campus interviews will not seek Industrial Training on their own.

NOTE: TUTION FEE FOR THE SEMESTER Rs. 65,000/-

USHO 502	Food & Beverage Operations Management	03	04	-	45	60	-	45	60	-	105	100	100	02	02	-	04

OBJECTIVES:

At the end of semester V the student will be able to:-

- Identify Food & Beverage setup and planning of various outlets in the department.
- Describe casual, theme restaurants etc. and how they are operated.
- How food service managers develop and manage labour & revenue control system.
- Explain how banquets and catering events are booked and planned, and describe how managers and staff members provide service for these events.
- Explain the operations of various catering establishments such as Railway, Airline & Marine caterings.

Contents of syllabus for USHO502

Unit No.	Chapter No.	TOPIC	Hours	Marks
01	**1**	1.1 F & B Outlet Planning 1.1.1 Objective of a good layout 1.1.2 Steps in planning of layout. (Specialty Restaurants, Coffee Shop, Room Service) 1.1.3 Factors to be considered while planning the actual ambience (Colour, light, décor, furniture & uniform) 1.2 Operational aspects of various F & B Outlets (Specialty Restaurants, Coffee Shop, Room Service) 1.2.1 Menu planning 1.2.2 Constraints of Menu planning 1.2.3 Planning of staff requirement 1.2.4 Shifts (Panzer, Straight, Split & Reliever) 1.2.5 Factors to be considered for selecting appropriate Crockery, Cutlery, Glassware, and Linen. 1.3 Elements of cost 1.3.1 Types of cost (Material, Labour & Overhead) 1.3.2 Cost Groups (Fixed, semi-fixed & variable) & types of profit (gross & net) 1.3.3 Breakeven / Cost volume profit analysis	**15**	**15**

Unit No.	Chapter No.	TOPIC	Hours	Marks
02	**2**	Function Catering / Banquets 2.1 Definition, History & Importance 2.2 Organization of Banquet dept., duties and responsibilities. 2.3 Types of Banquets: Formal, Semiformal & Informal 2.4 Banquet Sales 2.5 Banquet reservation diary and booking procedure. 2.6 Function contract & Function prospectus 2.7 Banquet Menus 2.8 Types of service in the banquets. 2.9 Staffing & Duty allocation 2.10 Toast procedure at wedding reception & Protocol 2.11 Outdoor catering. 2.12 Glossary **<u>Glossary</u>** **Audiovisual Equipment** Dais | Easel | Flip charts Keystoning | Lavaliere microphone | Lectern	**15**	**15**

Monitor	Opaque projector	Overhead projector
Podium (rostrum)	Roving microphone	Table microphone
Teleconferencing		

Exhibitions

Area exhibit	Booth exhibit	Consumer show
Exhibition (Exposition)	Floor load	Floor plan
Gross square feet	Hospitality suite	Island booth
Move-In/Move-Out Dates	Peninsula booth	Perimeter booth
Pipe and drape	Tabletop exhibit	Trade show/fair

Meeting And Convention Marketing

Breakout room	Citywide convention	CMP (Complete Meeting Package)
Cut-off date	Destination management companies	DMP (Day Meeting Package)
Duo serve	Function rooms	Home run accounts
ICW – In Conjunction With	Incentive travel house	Lead time
Letter of agreement	Major close	MICE
MMP (Modified Meeting Package)	Proposal	Sales blitz
Set-up time	Slippage	Spouse program
Tentative booking	Second-tier cities	Shoulder period
SMERF groups	Tickler file	Trial Close
Uni serve	Yield management	

Types of Meetings

Assembly	Breakout sessions	Clinic
Colloquium	Concurrent sessions	Conference
Congress	Convention	Dealer meetings
Forum	Incentive meetings	Plenary session
Retreat	Sales meeting	Seminar
Summit	Symposium	Workshop

Misc Function Catering Terminology

Air walls	Cash bar	Corkage
Crash bar	Guaranteed and Expected number	Head count
Host bar	PDR	Pre-function area
Reader Board	Reception	Skirting
Theme party	Upstage	

Unit No.	Chapter No.	TOPIC	Hours	Marks
03	3	3.1 Buffet. 3.1.1 Definition & Types of buffets. (Meal period, manner of consumption, food served & other types – Display, Gourmet & Running) 3.1.2 Points to be considered while planning a buffet. 3.1.3 Buffet equipment 3.1.4 Banquet layout (formal, informal & cabaret) & Space area calculation 3.1.5 Meeting room setups: (U Shape, Hollow Square, Classroom Theatre, Board of Directors, 'T' Shape) 3.2 Food and Beverage Management in various catering establishments 3.2.1 Railway Catering & Airline catering 3.2.2 Marine Catering (offshore & cruise liners) 3.2.3 Industrial catering	15	15

ASSIGNMENTS

Sr. No.	Topic for Assignments	Marks
1	Design & Layout of a Specialty Restaurant, Coffee Shop or Room Service	(10)
2	Designing Function Prospectus	(10)
3	Layout of the various seating plans associated with banquets	(10)
4	Layouts of various buffet setup as per function & space requirement.	(10)

FOOD & BEVERAGE OPERATIONS MANAGEMENT (Practical)

Unit	Practical	Hours
1	1 Practice: Sample layout plans 1.1 Specialty Restaurants 1.2 Coffee Shop 1.3 Room Service 2 Compiling menus a la Carte (Specialty Restaurants, Coffee Shop, and Room Service). 3 Order-taking (Room Service). 4 Planning Duty Rota for, Specialty Restaurants, Coffee Shop, and Room Service	20
2	5 Drafting Function Prospectus 6 Table setups and arrangements for banqueting and buffet including menu designing with styles of service & Calculation of space requirement (Formal banquet, Cocktail parties, conventions, exhibition, fashion show, wedding reception).	20
3	7 Frilling (Box, Diamond & Accordion Pleated) 8 Screening of educational videos related to Railway, Airline, Marine & Industrial catering	20
