LEARNING OBJECTIVE/S: An editor's job is to decide, 24/25/30 times a second, where the audience needs to be. Do we
stay in a shot or transition to another, and if so, what shot and how do we get there? Working side-by-side with the director to craft the movie that ultimately hits the screen – or your phone – editing is really about manipulating the audience, in the best possible way, all in the service of storytelling.
In this class, we will study terminology and concepts, learning both the rules and how to break them, as we look at the aesthetics choices and the technological workflow for both picture and sound editing. We will examine the historical role of editing, from the earliest silent film through the digital revolution that has transformed moviemaking today.
INTRO TO EDITING THEORY
Introduction to the history of film editing. Lumiere Brothers, Thomas Edison, Edwin Porter, DW Griffith); the manipulation of editing; Lev Kuleshov's experiment; the language of cinema;

SUBJECT: **HISTORY OF NON- FICTION FILM**

LEARNING OBJECTIVE/S: This course explores the history and theory of non-fiction film and video, with an emphasis on
work that falls under the rubric of "documentary."
Documentary is a unique form of non-fiction moving image media that claims a special relationship to reality and truth. Through screenings, readings and class discussion, we will explore such questions as:
• How does documentary relate to narrative fiction filmmaking? To other non-fiction forms of television like reality TV or news reports?
• How "real" are documentary representations, and how much does it matter?
• What are some different formal approaches documentary, and how does each mediate the representation of real life it offers?
• How has documentary image-making changed over time? What can we learn from this history that is relevant to media-making today?
• What are the particular ethics of representing others in a medium like video or film?
• What responsibility do documentarians have to their subjects, to the form, and to society at large?
• How do people watch documentaries, and what is the impact of these films on the world they aim to represent?
Be familiar with efforts to create more democratic systems of media production and distribution.
Learn how to watch earlier films both as an audience THEN (with understanding of the film's social, cultural, historical context), and NOW (with understanding of your own future goals and
with critical, analytical eyes to study history).
Be able to think – and write — critically about non-fiction media.
