<p>Brief report of programme (in 250-300 words)</p>	<p>The activity “ DISCUSSING “HAMIDABAI KI KOTHI” DRAMA WITH EESHA INGLE” was conducted online on 14, 15, 16, 17 and 18th of november 2022 at 4:00- 6:00 pm by Prof. Eesha Ingle. Prof. Eesha Ingle is an Artist, Singer. She has also been part of the following play ‘Hamidabai chi kothi’ as the character ‘shabnam’. She is also the co-founder of SHE Production.</p> <p>The entire Five day online activity consisted of breaking down various aspects of the drama. Starting from the plot, character, set, makeup and other aspects.</p>
	<p>'Yeh Kothi dekh rahe hain, isme deewaren kam aur khidkiyan zyada hain' says the ageing Hamida Bai, who represents the vanishing culture of tawaifkhanas, the world of dance and music, of tradition and a unique set of principles. Back in the time courtesans held mehfilis reverberating with the sounds of sarangi and tabla, and the ghungroo, the bells that the tawaifs wore on their feet. Semiclassical and classical music, ghazals and thumris flourished in these homes; however, many legendary singers of the era remained in the memories and fables. Sharing 3 things related to drama:</p> <ol style="list-style-type: none"> 1. Worksheet with roles and faces, you can use this to write characteristics. 2. Elements of drama 3. HMD synopsis <p>Students were involved in interactive sessions and activities in the workshop . A total of 14 Students attended the activity.</p> <p>We Thank our HOD Prof. Sameer Rane, our Principal Dr. V. S. Adigal for giving us the opportunity to conduct this activity and Prof. Eesha Ingle for guiding and teaching us.</p>

Brief report of programme (in 250 -300 words)

The college is the place where you keep learning and keep experiencing. Our VIVA college always motivates us to explore. Likewise we got a chance to interact with Mr. Pramod sir. His journey is something which blew us away. He is currently the CEO of yukti consultancy, the media agency which he founded Years ago. This media house has

worked with big brands and handled their public relation. Brands like – Panasonic India, canon India, Tata motors etc. But that's not how it started; he did his masters in communication and journalism and masters in leadership and science from Mumbai University. Before he started his media house, he has worked as a reporter in print media like Dainik Prahara and Marol Kesari.

He explained us different aspects of public relation and the importance of building a brand. He explained us by sharing a few case studies of things like- Maggi, jawed Habib McDonald/ burger king and many more. He even shared his personal experiences in the industry and guided us for our future jobs in the practical world. We learnt a lot how to handle a client and deliver what exactly they want.

Brief report of programme (in 250 -300 words)

The Department of Film, Tv and New Media Production (FTNMP) organized an Online Guest Lecture for the students of FY and SY students on the topic **“Sound and Music”** on . The speaker for the Guest Lecture was Rahul Ranade.

In his lecture Rahul Ranade discussed audio signal processing methodologies that are specific for music and of use in real applications. We focus on the spectral processing techniques of relevance for the description and transformation of sounds, developing the basic theoretical and practical knowledge with which to analyze, synthesize, transform and describe audio signals in the context of music applications. Sounds are all around us, but what is sound? Sound is a type of energy that is produced when something is in motion. This produces a vibration. When an object vibrates, it causes movement in air particles.

These particles bump into the particles that are close to them, which make them vibrate as well, causing them to bump into more air particles. These movements are called sound waves. They can travel through air, liquids and solids. If your ear is within range of the vibrations, you hear the sound.

He explained that there are sounds that humans cannot hear. Actually, they are not sounds because human beings do not hear them. They are called infra-sounds and ultrasounds. They can be heard by other creatures. Sound can travel under the water. It moves four times faster through water than through the air. It can travel such long distances that whales can hear each other when they are nearly a hundred miles apart. Sound waves need a medium to travel through. Sound can travel through air because air is made of molecules. These molecules carry the sound waves by bumping into each other, like dominos knocking each other over. Sound can travel through anything made of molecules, even water! There is no sound in space because there are no molecules there to transmit the sound waves.

The speed of sound depends on the medium through which the waves are passing. Sound travels through air at 340 meters per second. Some aircrafts fly faster than sound. In the picture, a plane is breaking the sound barrier. Pitch is the quality of sound that lets us distinguish between high and low sounds. It depends on the frequency (number of vibrations per second) of the sound wave. When the

vibrations are fast, you hear a high note. When the vibrations are slow, it creates a low note. The sound waves in the diagram show the different frequencies from high to low sounds. Musically, the pitch is the position of a tone in the musical scale. The scale is a succession of seven notes ordered according to a pattern of tones and semitones. The most common scale is “Do Major”. Its succession of tones and semitones is: TTS TTTS.

Intensity or volume is the quality of sound that lets us distinguish between soft or loud. It depends on the amplitude of the sound vibrations. The greater the vibration, the greater its amplitude will be and louder the sound. In music, intensity is represented by dynamic markings. Dynamic is the gradation of soft and loud notes. These symbols were created by composers in the eighteenth century, in order to produce more interesting and expressive music. Dynamic markings are written using Italian words.

He also discussed Elements of music- Melody is a series of notes arranged in a particular rhythmic pattern and divided up into smaller units called phrases. Melody is the horizontal structure of music. Melody is one of the most basic elements of music. A note is a sound with a particular pitch and duration. Play a series of notes together, one after the other, and you have a melody. But the melody of a piece of music isn't just any line of notes. It's the notes that catch your ear as you listen; the line that sounds most

	<p>important is the melody. He also talked about rhythm, rhythm notations etc.</p> <p>He also talked about audio features, presenting various spectral wave analysis methods with which we can obtain features of a sound, extraction of audio features using spectral analysis methods, describing sounds, sound collections, music recordings and music collections. Clustering and classification of sounds. Demonstration of various plugins from Sonic Visualiser to describe sound and music signals and demonstration of some advanced features of freesound.org.</p> <p>The programme started at 10:00 am and ended at :00pm. The guest speaker was heartily welcomed by Anurag Takke, a student of F.Y. FTNMP. Interested faculty and students from other colleges were also invited to the lecture. The lecture was heard with admiration by the students and they also found the slides appropriate.</p> <p>Prof. Sameer Rane, HOD, presented a small token of appreciation to our valuable guest of honour.</p>

printing from movable type all increased musical literacy across Europe. The music during this period is known for its modal harmonies, a cappella pieces and imitative polyphony, as composers turned to “word painting,” using music to express ideas and emotions.

He also discussed that many of the words used to describe music are drawn from other walks of life – art or nature, for example – to create metaphors for the experience of hearing and playing music. The language of architecture in particular can be useful in describing music’s structures and motifs: arabesques, curlicues, filigree, arching, soaring. Or more physical terms: bouncing, jogging, stamping, limping, dancing, throbbing, breathing, sobbing. Or adjectives drawn from weather: showering, thunderous, misty, dripping, rumbling, splashing.

He talked about colour in music. We often talk about ‘colour’ in music, often in relation to dynamics, from the most delicately nuanced *pianissimo* to bold *fortissimos* – and all the subtle shadings in between. Then there is light and dark – ‘*chiaroscuro*’ – bright, hazy, shimmering, veiled harmonies, plangent tenebrous chords. Thus, the writer must find metaphors and adjectives which amply describe the structure and sounds of the music, the experience of hearing it and the emotions it aroused in a way which captivates the imagination of the reader and avoids cliches.

Drama” on March 20. The speaker for the Guest Lecture was Prof. Deepak Rajadhyaksha.

In his lecture Prof. Deepak Rajadhyaksha discussed about the Aristotle's six Elements of Drama- Literary Elements such as Plot, Theme, Characters, Dialogue, Music/rhythm, spectacle. Plot refers to the action, the basic storyline of the play. He also talked about the six stages in a plot structure-Incident Incident, preliminary event, Rising action, Denouement, Falling action, Climax.

Theme refers to the meaning of the play. Theme is the main idea or lesson to be learned from the play. In some cases, the theme of a play is obvious; other times it is quite subtle. He also talked about some general themes like conflict between two individuals, conflict between man and a supernatural power, conflict between the man and himself.

Characters- The people (sometimes animals or ideas) portrayed by the actors in the play. It is the characters who move the action or plot. Characterization is the way an author presents a character. He also discussed types of characters such as protagonist, antagonist, flat, round, static, dynamic, foil, stock character, stereotype, archetype etc.

Dialogue- This refers to the words written by the playwright and spoken by the characters in the play. The dialogue helps move the action of the play along. He talked

The guest speaker was heartily welcomed by Jennifer Barla, a student of F.Y. FTNMP. Interested faculty and students from other colleges were also invited in the lecture. The lecture was heard with admiration by the students and they enjoyed it a lot.</p> <p>Prof. Sameer Rane, HOD, presented a small token of appreciation to our valuable guest of honour.</p>
